UNIVERSITY

Academic Catalog

2026-27

Catalog Home

The Augusta University online catalog serves as the official source for academic programs, courses, and policies. Students are encouraged to use the catalog as a key resource for planning their academic journey and ensuring a clear path to graduation.

Choose AU

At Augusta University, you'll find a community that inspires growth, discovery, and success. Through life-changing and life-saving education, hands-on learning, and more than 150 programs of study, you'll gain the knowledge and skills to make a meaningful impact in your career and community. With world-class faculty, innovative facilities, and opportunities that extend beyond the classroom, Augusta University empowers you to build the future you envision and become the person you aspire to be. Augusta University delivers an education that doesn't just inform – it transforms. One that equips students from every background for lifelong success, with the tools to thrive, to belong, and to lead.

Find Your Path

From health sciences and cybersecurity to animation and the arts, Augusta University offers programs that turn ambition into opportunity. As a nationally recognized leader in medical, dental, and health sciences education and a thriving research university, we equip students with the knowledge, skills, and experiences to make an impact in their chosen fields.

How to Navigate the Catalog

The catalog menu provides easy access to key information:

- **Academic Regulations:** Find policies and procedures such as graduation requirements, course repeat policies, grading, registration, and withdrawal processes.
- **Programs:** Browse all undergraduate and graduate degree programs, certificates, and non-degree offerings.
- **Colleges/Schools and Departments:** Access detailed information about colleges, schools, departments, and the programs they offer.
- **Archived Catalogs:** Use the dropdown menu in the upper-right corner or the Archived Catalogs link to view previous editions.
- **Catalog Search:** Quickly locate specific topics using the search box in the upper-left corner.
- **Bookmarks:** Save and organize your favorite pages for easy reference using the Catalog Bookmarks feature, accessible in the left navigation menu. A User Guide is available for reference.

[Website URLs listed in the Catalogs are provided for reference purposes only. Please note that URLs are not routinely updated with each publication of the Catalog and may change over time. For the most current information, please visit the university's official website or contact the relevant department directly.]

Additional Resources

- **PDF Downloads:** Download a complete PDF version of the catalog under the Downloads section in the left navigation menu.

President's Welcome

Welcome to Augusta University! It's an honor to welcome you to this incredible community. We are deeply committed to your well-being and academic progress. You are not just joining a university, you are now part of a family that cares about your success, your growth, and your future.

Our university is growing in extraordinary ways. Over the past year, we have celebrated remarkable milestones including record enrollment, transformative research, and new facilities that will help shape the future of healthcare, innovation, and education in Georgia and beyond.

Augusta University has an unwavering focus on three key areas: research, student success, and community engagement. As the state's designated health sciences university, research here leads to discoveries that save and improve lives, and you will have the opportunity to work alongside faculty who are leaders in their fields. Your success is our priority, and our faculty and staff are here to support you every step of the way both inside and outside the classroom. Through community engagement, you will build connections that extend beyond campus, using your talents and education to improve the lives of others and strengthen communities across our state.

The friendships and connections you make here will shape your journey, and there will be countless opportunities for you to get involved, whether through clubs, student government, Greek life, research, service opportunities, or cheering for the Jaguars at athletic events. At Augusta University, learning extends far beyond the classroom through research, service, clinical experiences, leadership opportunities, and collaboration across disciplines. These moments will become memories and experiences that stay with you for a lifetime.

As you explore all that Augusta University has to offer, we hope you discover what makes this place truly special – and that's you. Our students are the heart of everything we do. At AU, you are not just another number or a face in the crowd. You are an individual with unique talents, goals, and aspirations and we are committed to helping you reach your full potential. From faculty who are deeply invested in your success to fellow students who encourage and support one another, you will find a community committed to helping you grow both personally and professionally.

We know that each of you will leave your mark not only on Augusta University, but on the communities and professions you will one day serve. We cannot wait to see all that you will accomplish.

Onward and Upward!

Russell T. Keen, EdD **Karen B. Keen**
President, Augusta University *First Lady, Augusta University*

augusta.edu/president

About Augusta University

Augusta University offers a unique experience that sets it apart. Our forward-thinking educational programs, high-impact research, patient-centered clinical expertise, and nationally recognized athletics create an unparalleled learning environment. As Georgia's designated health sciences university, we are committed to training the next generation of innovators, leaders, and healthcare providers.

With a rich history dating back to 1828, Augusta University is made up of 11 colleges and schools, including top-ranked business and nursing schools, the state's flagship public medical school, and Georgia's only dental school. Our state-of-the-art classrooms and clinical facilities deliver academic excellence across a broad range of disciplines, blending arts, humanities, and health sciences.

Partnership campuses across the state and strategic alliances that stretch throughout the region provide exceptional learning and clinical opportunities in fields like cybersecurity, musical performance, and clinical practice. Our Riverfront Campus is home to the

Georgia Cyber Innovation and Training Center, where we're preparing the next generation of cybersecurity professionals, offering hands-on experience and collaboration with government and industry partners, including Army Cyber Command based at Fort Gordon.

Our 12,337 students are taught, mentored, and inspired by over 1,900 dedicated faculty members, including prestigious scientists, clinicians, and scholars from around the world. Our extensive research portfolio offers students opportunities at both the graduate and undergraduate levels, with renowned faculty scientists leading groundbreaking research in areas like cancer, neuroscience, and personalized medicine.

Our outstanding student-athletes compete in NCAA intercollegiate sports and a range of intramural sports, with both our men's and women's golf teams competing at the NCAA Division 1 level, and our remaining 13 teams proudly representing Jaguar Nation in the Peach Belt Conference, one of the premier Division II athletic conferences in the country.

For more facts and figures on Augusta University, visit the Division of Institutional Effectiveness website.

Mission

Our mission is to provide leadership and excellence in teaching, discovery, clinical care, and service as a student-centered comprehensive research university and academic health center with a wide range of programs from learning assistance through postdoctoral studies.

Vision

Our vision is to be a top-tier university that is a destination of choice for education, health care, discovery, creativity, and innovation.

Accreditation

Augusta University is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) to award baccalaureate, master's, educational specialist, first professional and doctorate degrees. Augusta University also may offer credentials such as certificates and diplomas at approved degree levels. Questions about the accreditation of Augusta University may be directed in writing to the Southern Association of Colleges and Schools Commission on Colleges at 1866 Southern Lane, Decatur, GA 30033-4097, by calling (404) 679-4500, or by using information available on SACSCOC's website (www.sacscoc.org).

Legal Notices

The statements set forth in this catalog are for informational purposes only and should not be construed as the basis of a contract between a student and this institution.

While the provisions of the catalog will ordinarily be applied as stated, Augusta University reserves the right to change any provision listed in this catalog, including but not limited to academic requirements for graduation, without actual notice to individual students. Reasonable effort will be made to keep students advised of any such changes. Information on changes will be available in the offices of the president, academic deans, and enrollment and student affairs. It is especially important that students note that it is their responsibility to keep themselves apprised of current graduation requirements for their particular degree program.

Limitation on Institutional Liability

In the event that an administrative hearing officer or a court of record determines that "publications" issued by the institution create a contractual or quasi-contractual relationship with any person, the number of damages recoverable by the parties shall be limited to the amount of consideration paid by the person for the privilege of admission, enrollment, continued enrollment or other service rendered by the institution to such person. As used herein, the term "publications" (without limiting the generality of the normal meaning of the term) shall be deemed to include any and all written or electronic forms or other documents issued by the institution concerning applications for admission, enrollment or continued enrollment, waivers of liability, consents to medical treatment, dormitory occupancy and any and all other written forms, documents, letters or other materials issued by the university in furtherance of its educational mission.

Statement of Non-Discrimination

Augusta University is an affirmative action/equal opportunity educational institution in that no person shall on the grounds of sex/gender, race/ethnicity, color, creed, religion, age, national origin, sexual orientation, veteran's status, handicap, or any other category protected by law be excluded from participation in or be otherwise subjected to discrimination in any educational program, activity, or facility.

Augusta University is committed to an effective affirmative action policy. Augusta University strives to recruit, admit, and educate a cross-section of qualified men and women representing the socio-economic, racial, and cultural diversity of Georgia. This commitment is in keeping with our moral, legal, and social responsibility and with the highest ideals and principles of American higher education.

Accessibility to Disabled Persons

Augusta University's physical facilities and institutional programs have been modified in accordance with federal law and regulations to allow equally effective access by disabled persons. Structural changes, such as adaptations to public restrooms and construction of ramps and curb cuts, have been made to improve accessibility. Special services may be made available on a reasonable basis in accordance with reported needs of individual disabled students.

In accordance with Section 504 of the Rehabilitation Act of 1973 and The Americans With Disabilities Act, it is the policy of Augusta University to ensure that all students with disabilities are afforded equal opportunity and access to programs and facilities. Students are encouraged to identify their disability so that the medical college can determine what reasonable accommodation may be made.

Communication Requirement

All students at Augusta University are expected to check their JagMail e-mail accounts daily for important university announcements and other pertinent information. Students are also expected to update their own contact information in Banner.

What's New @ AU?

**NEW
PROGRAMS**

**DISCONTINUED
PROGRAMS**

**COURSE
PREFIXES**

OTHER

**ON THE
HORIZON**

New Programs

New degrees and programs that appear for the first time in this Catalog include:

New Undergraduate Degree Programs

- Bachelor of Business Administration with a Concentration in Hospitality Management

New Graduate Degree Programs

- Master of Business Administration with a Concentration in Strategic Innovation and Technology Management
- Master of Public Health with a Concentration in Epidemiology
- Master of Science in Medical Science
- Doctor of Education in Educational Innovation with a Concentration in Higher Education

New Accelerated/Dual Degree Programs

A dual degree program gives students the distinction of graduating with two degrees—usually in less time than it would take to earn each one individually.

- Accelerated Bachelor of Science in Computer Science to Master of Science in Computer Science
- Accelerated Bachelor of Science in Data Science to Master of Science in Data Science
- Doctor of Dental Medicine & Master of Public Health Dual Degree
- Doctor of Medicine and Master of Science in Epidemiology

New Certificates

- Certificate of Less than One Year in Sports Coaching
- Sports Media Certificate

Discontinued Programs

Discontinued degrees and programs include:

- Accelerated Bachelor of Arts in Nonprofit Leadership and Administration to Master of Public Administration
- Accelerated Bachelor of Science in Nursing
- Bachelor of Arts in Nonprofit Leadership and Administration
- Bachelor of Arts in World Languages and a Concentration in French
- Bachelor of Arts in World Languages and a Concentration in French with P-12 Teacher Certification
- Bachelor of Arts in World Languages and a Concentration in Spanish
- Bachelor of Arts in World Languages and a Concentration in Spanish with P-12 Teacher Certification
- Master of Clinical and Translational Science
- Post-Master's Certificate in Clinical and Translational Science

Course Prefixes

New Course Prefixes

- **CLAS** - Critical Learning and Adaptive Strategies

Other

- Wellness Graduation Requirements for undergraduate programs reduced from 4 credit hours to 1 credit hour for one Activity course

On the Horizon

The following programs have been submitted for consideration and future approval.

Undergraduate Degree Programs

- Bachelor of Science in Human Biology

Graduate/Professional Degree Programs

- Doctor of Education in Educational Leadership
- Doctor of Education in Educational Innovation with a Concentration in ESOL
- Doctor of Nursing Practice with a Concentration in Pediatric Nurse Practitioner - Acute Care
- PhD in Health Sciences: Prevention, Diagnosis, Therapeutics, & Rehabilitation

Certificate Programs

- Certificate in Nursing Education for PhD Prepared Faculty
- Post-Baccalaureate Certificate in Anatomy Education

Admissions Information

Undergraduate Admissions Information

Augusta University offers the unique advantages of outstanding academic programs, a convenient location, flexible class scheduling, and very affordable cost. Our faculty members truly enjoy teaching and sincerely endeavor to assist all students in obtaining their educational goals. We invite students to learn more about the various benefits and opportunities at Augusta University by visiting the campus. The Office of Admissions is open 8 a.m. to 5 p.m., Monday-Friday. Tour reservations and other admissions information are available by visiting augusta.edu/admissions.

Undergraduate Admission requirements for transfer students seeking program admission to the College of Allied Health Sciences, the Dental College of Georgia, and the College of Nursing

Admission requirements and application procedures, including information pertaining to application forms, personal interviews and pre-entrance testing are listed on each college's website.

Undergraduate Admission requirements for freshmen and transfer students seeking program admission to all other Augusta University colleges

Undergraduate Admission requirements for freshmen and transfer students seeking admission to all other Augusta University colleges is provided below.

Application Procedure

To seek admission to the university, a student must submit an official application for admission with the Office of Undergraduate Admissions. Students can access applications online at augusta.edu/admissions/apply.

The application and all supporting documents should be received by the Office of Admissions prior to the advertised application deadline. A non-refundable application fee must accompany the application (except for students applying to participate in Dual Enrollment at AU). An applicant who wishes to change their semester of enrollment may be required to reapply online and submit another fee.

Because additional time is required for processing, international student applicants should apply at least 90 days prior to the beginning of the desired semester.

Students who do not register in the semester for which they are admitted and wish to attend a later semester should contact the Office of Undergraduate Admissions and may have to reapply for admission online. All supporting documents will be transferred to the new file. If one year has expired since the initial application, the student will have to reapply and may have to re-submit supporting documents.

Required Documents

It is the responsibility of the applicant to request that official documents required for admission be sent to the Office of Undergraduate Admissions. Documents that have been faxed or that have been opened by the applicant, such as student copy transcripts or letters, grade reports, diplomas, or graduation lists, are not official. The documents must remain in the original, unopened, sealed and stamped/signed envelope from the issuing institution. These documents become a part of the applicant's permanent record and will not be returned. Documents received by the University are the property of AU and will not be shared. Applicants are considered for admission once all required documents have been received. Notification of acceptance is through the student's online Admission Portal. The Office of Undergraduate Admissions requires the following:

- **Official Application:** A candidate seeking admission must submit an official application for admission and pay a non-refundable application fee prior to the specified deadline. Application links are online at augusta.edu/admissions/apply.
- **Application Fee (Non-refundable):** The application fee may be waived for new freshman applicants who provide an approved ACT, College Board, or NACAC fee waiver form. Students applying for the Dual Enrollment program do not have to pay an application fee.
- **Official Transcript(s):** A freshman candidate should ask their high school to send an official copy of the secondary school record. A transfer candidate should ask the Registrar from each college attended to send an official transcript of grades (a separate transcript from each college attended is required). Official documents must be received by the Office of Undergraduate Admissions before the acceptance is final.
- **Scholastic Aptitude Test (SAT) or the American College Testing Program (ACT) Scores:** A freshman candidate is required to submit SAT or ACT scores. A transfer candidate who has earned fewer than 30 semester hours (45 quarter hours) of transferable credit must also submit SAT or ACT scores. To be considered official, test scores should come directly from the testing agency. Beginning Fall 2027, the Classic Learning Test (CLT) is also accepted for admission.

Freshman Admissions Requirements

Every applicant for freshman admission must be a high school graduate from a high school accredited by an accepted accrediting body or the Georgia Accrediting Commission, the Georgia Private School Accrediting Commission, or from a public school regulated by a school system and the State Department of Education. High school students who receive a "Certificate of Attendance" do not satisfy the graduation requirements. In addition, the applicant must have completed the Required High School Curriculum (RHSC) in high school. The required 17 RHSC units are listed below:

- English: 4 units
- Mathematics: 4 units
- Science: 4 units
- Social Science: 3 units, including one course focusing on world studies
- Foreign Language: 2 units of the same language

Specifics about courses that meet these requirements can be found at

https://www.usg.edu/student_affairs/assets/student_affairs/documents/Staying_on_Course.pdf

In the determination of eligibility for freshmen admissions, the most important consideration is the Freshman Index (FI). The Freshman Index is determined by a formula which uses two variables: the high school average computed on academic courses by the Office of Undergraduate Admissions and the SAT or ACT scores. The following formula is used to compute the SAT Freshman Index:

- **Using SAT Scores:** $FI = 500 \times (\text{High School GPA}) + 1.06 \times (\text{SAT Evidence-Based Reading \& Writing section score} + \text{SAT Math section score})$
- **Using ACT Scores:** $FI = 500 \times (\text{High School GPA}) + (\text{ACT Composite} \times 42) + 88$

Applicants who achieve at least a 2500 FI score, meet the minimum high school course requirements, meet the minimum test score requirements, and meet the minimum recalculated high school GPA will automatically be offered admission. Applicants who meet the minimum high school course requirements but have less than a 2500 FI score may be offered a place in our summer bridge program (Jaguar Jumpstart) but applications will be reviewed on an individual basis. Test scores and GPA minimums can be found online at augusta.edu/admissions/freshman.

Home-Schooled Freshmen

University System of Georgia policy dictates that in addition to college entrance exam scores and Freshman Index, students must present seventeen specific Required High School Curriculum units or RHSCs to be accepted to a state university. (See prevailing

regular freshman admission standards for specific details, above.) These units must be completed in high schools that have been accredited by an accepted accrediting body (such as SACS) or the Georgia Accrediting Commission, the Georgia Private School Accrediting Commission, or from a public high school regulated by a school system and the State Department of Education.

For students who have completed their RHSCs in a home schooled program or secondary school that is not accredited by an accepted accrediting body, options are available to validate RHSC units in a specific area including SAT or ACT scores (480 EBRW or 17 English/Reading for English and 440 Math or 17 Math for Math), CLEP or DSST scores, exemption from learning support, or other comparable examinations. More information is located on USG's policy 3.1.1.1.

Augusta University recognizes that most home-schooled students are amply prepared for college work. For more information on Augusta University's Home School admission policies, please contact the Office of Undergraduate Admissions.

Life Enrichment Student Admissions Requirements

A life enrichment applicant is one who submits a completed application, has graduated from high school or earned an equivalent, whose high school class graduated at least five years ago, and has earned no more than 30 transferable semester hours (45 quarter hours) of college credit. Although neither the ACT or SAT is required of Life Enrichment applicants, the Accuplacer examination will be required for admission consideration. If Life Enrichment students can provide official SAT (≥ 480 SAT EBRW and 440 SAT Math or ≥ 17 ACT English/Reading and 17 ACT Math) from a test administration within the past seven years, the Accuplacer exams may be waived.

Dual Enrollment for High School Students

Augusta University is committed to providing opportunities to high school students allowing for the enhancement of their high school curriculum through the availability of college offerings prior to high school graduation.

Dual Enrollment

Dual Enrollment provides opportunities for high school juniors and seniors to enroll full time in postsecondary institutions to earn both high school and college credits simultaneously. To participate, a student must be enrolled in a public or private secondary high school that is regulated by a school system and state department of education or accredited by one of the following:

- An accepted accrediting body (such as the Southern Association of Colleges and Schools)
- The Georgia Accrediting Commission
- The Georgia Private School Accrediting Council (GAPSAC)

Home-Schooled Students

Home-schooled students may be considered for dual enrollment if they are enrolled in Non-traditional Educational Centers that are recognized by GAPSAC or by state departments of education. Students attending home school programs or high schools not accredited by an accepted accrediting body may also be eligible to participate if they meet all general admission requirements and have validated their on-track Required High School Curriculum (RHSC) units.

General Admission Requirements

Dual Enrollment:

- Minimum score of 510 on SAT Reading & Writing and 510 SAT Math OR minimum score of 22 ACT English or Reading and 22 ACT Math.
- Minimum cumulative high school grade point average of 3.04 as calculated by the institution for admission purposes.
- Completion of two units of RHSC English and high school Algebra II or the equivalent (before the first day of classes).
- Dual Enrollment Participation Agreement and funding form with approval from the high school counselor or administrator and the parent or guardian.
- Evidence in the transcript that student is on track towards the completion of the USG RHSC requirements and high school graduation.

Note: Students with a recalculated high school GPA of 3.5 or higher are not required to submit college entrance exam scores for Dual Enrollment admission.

Acceptance of Transfer Credit for Dual Enrollment

Freshmen seeking admission to a USG institution can expect that the college credit earned at an accredited institution prior to high school graduation will be considered as transfer credit if the prospective student meets the USG institution's regular admission requirements.

Transfer Student Admissions Requirements

An applicant who has previously attended an institution accredited by an accepted accrediting body after graduating high school and who is not classified as a Life Enrichment student is considered a transfer student. Transfer students are divided into two categories as listed below:

- **Fewer than 30 transferable semester hours:** Meet prevailing freshman admissions requirements.
- **30 transferable semester hours:** Must have a 2.3 or higher cumulative GPA.

The transfer applicant whose only attendance has been at a technical college accredited by an accepted accrediting body in a "Non-College Transfer Program" is considered a freshman applicant and must satisfy freshman admission requirements.

Evaluation of Transfer Credit

An evaluation of accepted transferable credits is made by the Office of Undergraduate Admissions. A complete transfer evaluation report will be available in DegreeWorks/JagTrax once the student is accepted by the university and all official transcripts have been received from each college previously attended. The basic policy regarding the acceptance of courses by transfer is to allow credit for courses completed with satisfactory grades from an institution accredited by an accepted accrediting body, provided the courses correspond in content to courses offered at Augusta University. Additional validation will be required for courses taken at another institution that were previously completed with a penalty grade at Augusta University. In addition, credit earned at technical colleges accredited by an accepted accrediting body may not transfer unless the credit was earned in a designated college transfer program.

Advanced Placement Credit and Credit by Examination

Advanced Placement

A qualified student who has taken college-level work in secondary schools may receive academic credit. Examinations used to determine advanced placement are the Advanced Placement (AP) test of the College Entrance Examination Board and The Achievement Tests in English Composition and intermediate Mathematics (Level 1). A final determination of credit is made after results have been evaluated by the university.

Credit by Examination

College credits are traditionally earned through attendance in scheduled classes. However, some courses allow credit by examination. A student currently enrolled who presents satisfactory evidence that they are qualified in a particular subject may receive credit for a course by an examination approved by the appropriate instructional department, or through the College Level Examination Program (CLEP).

Satisfactory evidence may be, but is not limited to, work experience, non-credit courses, course work taken at non-accredited institutions, or military courses. There is a \$25 per credit hour fee for credit by departmental examination.

Courses in which a student is or has been enrolled may not be challenged, and courses which require demonstrations and application of skills (practical, laboratory sciences, and courses requiring field work or performance, for example) may be challenged only with the permission of the chairperson of the department offering the course.

Credit by examination is listed as such on the transcript along with the course number, title, and hours of credit, however, no grade is assigned and the credit is not included in computing the Grade Point Average. Credit by examination is limited to 10 semester hours in a discipline and 30 semester hours in the university.

A current list of tests available for credit by examination for courses offered at Augusta University may be found on the Office of Undergraduate Admissions website.

Prior Education and Training

In addition to acceptance of transfer credit from an institution accredited by an accepted accrediting body, Augusta University considers the ACE Guide transfer credit recommendations for military training that are appropriate degree preparation. For more information, see the Transfer Equivalency Guide (located on the drop-down menu under the Transfer Students on the undergraduate Admissions web page). In some instances, standardized examinations can be substituted for course requirements. For a list of examinations, subjects and minimum scores, select Credit by Examination. Currently, a student can receive no more than 30 total semester hours of credit by examination.

Visiting Student Admissions Requirements

A Visiting student, often called a Transient student, is a degree candidate at another institution who is granted the privilege of temporary enrollment at Augusta University. To apply for admission as a visiting student, applicants must:

1. Submit a completed application form and pay the non-refundable application fee.
2. Submit a letter of permission confirming good standing from the Registrar of the college in which enrolled or matriculated. In addition, applicants are recommended to submit a transcript from their home institution in the event that Augusta University courses require prerequisites.

Applicants can be admitted to Augusta University as visiting students only if they are currently eligible for re-admission to their home institution. Please note: Visiting students must reapply for admissions and submit supporting documents for each semester of attendance.

Additional Degree Admissions Requirements

An Additional Degree applicant, often called a Post-Baccalaureate student, is classified as a student who has successfully completed a baccalaureate degree at an institution accredited by an accepted accrediting body and wishes to pursue a second undergraduate degree at Augusta University. To apply as an Additional Degree student, applicants must:

1. Submit a completed application.
2. Submit official transcripts from all colleges attended.

Once the applicant has been accepted, a transfer credit evaluation will be completed by the Office of Undergraduate Admissions.

Non-Degree Admissions Requirements

A non-degree applicant is classified as a student interested in enrolling at Augusta University for credit without pursuing a college degree. The nondegree student may be a visiting student (see above), post-baccalaureate, postgraduate, or auditing student. A candidate for this type of limited enrollment seeks instruction in particular courses for personal or professional purposes, or for completion of degree requirements at another institution. Applicants holding a baccalaureate degree or graduate degree from an institution accredited by an accepted accrediting body and wishing to enroll in undergraduate courses as a non-degree student must request an official transcript be sent to the Office of Admissions from the college or university which awarded the highest degree.

Each applicant for admission as a non-degree student must:

1. Submit a completed application.
2. Provide evidence of satisfactory past academic work at the secondary or post-secondary level.
3. Satisfy all other admission requirements as determined by the Office of Undergraduate Admissions.

Senior Citizens Admission Requirements

Georgia residents 62 years of age or older are eligible to enroll in units of the University System free of charge on a space available basis. Senior citizens from Aiken and Edgefield Counties qualify for the contiguous county tuition waiver and pay in-state tuition and fees. Senior citizens who pay tuition are not required to register on a space available basis.

Former Student Readmission Requirements

Students who have attended any other college or university since their last enrollment at Augusta University, regardless of how long they have been away from Augusta University, must re-apply through the Office of Undergraduate Admissions. In addition, they must provide the Office of Undergraduate Admissions with official transcripts of all college work attempted since their last enrollment in Augusta University and may be required to submit previously received transcripts. Failure to provide required transcripts may result in loss of credit or dismissal from Augusta University. Students who have not enrolled in Augusta University or attended any other college or university for three consecutive semesters must apply for readmission through the Office of Undergraduate Admissions using the online application process following the published deadlines.

International Students: Special Requirements

International students do not complete a separate application for admission. Students who are not U.S. citizens or permanent residents should fully complete the sections on their applications indicating what kind of visa they currently hold or desire to solicit. If a student is offered admission to the university and seeks a student visa, these students must provide documented evidence of adequate financial support to meet educational and personal expenses.

Non-native English-speaking applicants who completed secondary school outside the U.S. Secondary School System or who completed high school within the U.S. Secondary School System may be required to demonstrate English proficiency as part of the admission process. All methods of demonstrating English proficiency are noted at augusta.edu/admissions/international.

All international, post-secondary transcripts must be forwarded to a credential evaluation agency for a "course by course" evaluation. Official evaluations (sent directly to Augusta University) are accepted from Josef Silny & Associates, Inc., World Education Services (WES) and Educational Credential Evaluators, Inc. (ECE). The official credential evaluation is required before an application for admissions can be processed.

Because additional processing time is required for international students, they should submit the application and all supporting documents at least 90 days prior to the desired semester of entrance. The Certificate of Eligibility (Form I-20) cannot be forwarded to the student until an offer of acceptance has been extended from Augusta University.

Admission Decisions at Augusta University

Undergraduate applications to Augusta University are considered on an individual basis. After all required information has been received, the student will be notified electronically in the student's Admissions Portal. Although the University System of Georgia sets certain minimum standards for admission, the individual institutions retain the right to impose additional requirements. Accordingly, the university reserves the right to refuse admission to any applicant who, in its judgment, is not qualified to pursue work at Augusta University. Such a decision may be based on a variety of factors: social maturity, character, or intellectual potential as indicated by previous academic work and appropriate examinations. Admission decision exceptions may be made at the discretion of the Director of Undergraduate Admissions.

Verification of Lawful Presence in Georgia and the United States Pursuant to Acceptance at Augusta University: In accordance with Board of Regents Policy 4.3.4, Augusta University verifies the lawful presence of every successfully admitted person applying for in-state resident tuition status, as defined in Section 7.3 of the Board of Regents Policy Manual. Lawful presence is not required for enrollment, but it is required for in-state benefits such as in-state tuition.

Undergraduate Admissions Decision Notification

Undergraduate applicants will be notified of the conditions of acceptance in their Admissions Portal. Students accepted based on an unofficial or incomplete transcript must submit a final and official transcript before the admission is final. If this information has not been received by the day of registration, students may register on a conditional basis for one semester only. Registration for the succeeding semester will not be permitted unless the required document has been received. Under certain conditions, the university may release admissions decisions to high schools and colleges.

Graduate and Professional Admissions Information

Admission requirements and application procedures, including information pertaining to application forms, required documents, personal interviews and pre-entrance testing can be found through the links listed within each program's page of this catalog. The most up-to-date information can be obtained from the Office of Graduate Admissions Operations or online at augusta.edu/admissions.

Financial Information

Financial Aid

The Office of Student Financial Aid (OSFA) is dedicated to providing guidance and assistance for students to help ease the financial burdens associated with their education. We strive to assist our students in funding their education while at Augusta University.

To receive federal and state financial aid, you must meet certain eligibility requirements which include but are not limited to such things as being a U.S. citizen or eligible non-citizen and maintaining Satisfactory Academic Progress. See augusta.edu/finaid/documents/standardssapnewrevf.pdf.

To apply for federal financial aid, students must complete the Free Application for Federal Student Aid (FAFSA) at studentaid.gov. To apply for state scholarship and grant programs, students must complete the Georgia Student Financial Aid Application System (GSFAPPS) at gafutures.org.

The financial aid application priority deadlines for each term are as follows: Fall Semester – April 1st; Spring Semester - October 1st; and Summer Semester - March 1st. Students are expected to submit all required applications and support documents on or before the published financial aid application priority deadlines for the chosen enrollment term. Failure to meet the priority deadline may result in incurring your own educational expenses until your financial aid file is complete and aid has been processed.

Augusta University offers a variety of institutional scholarships through one central scholarship system. Scholarships may be based on program of study, merit and/or financial need (as defined by the Department of Education). This system also provides access to external scholarship opportunities. The scholarship system can be accessed at augusta.edu/finaid/applyscholarships.

New Summer Students: For financial aid purposes, the summer semester is at the end of the award year. You must complete a FAFSA for both the current academic year and for the next academic year. Example: If enrolling at Augusta University during the Summer 2025 semester, you must complete both the 2024-2025 FAFSA (covers Fall 2024, Spring 2025, and Summer 2025) and the 2025-2026 FAFSA (covers Fall 2025, Spring 2026, and Summer 2026).

OSFA provides education funding from sources such as grants, scholarships, loans, and the federal work-study program. For further information, please refer to our website at augusta.edu/finaid or email osfa@augusta.edu.

Fee Payment and Refund Policy

Student Payment Options

Payment by WebCheck (no fee) or Credit Card directly on POUNCE. There is a 2.95% convenience fee charge for credit card payments.

Payment by check or money order mailed to:

Augusta University Business Office

Payne Hall 1st Floor
2500 Walton Way
Augusta, Georgia 30904

Payment can be made in POUNCE. To access, log in, then click "Student Account." When the new tab/window opens, click "Make Payment" to enter your payment information.

Payment must be received by the payment deadline as published on POUNCE and the Business Office website.

Payment in person by check, cash, or money order at the Business Office Monday through Friday.

Payment by electronic funds transfer directly from your banking institution. Please contact the Business Office 706-737-1767 to make arrangements for this type of payment transaction. Limited time payment plans are available during registration through the end of add/drop by visiting Nelnet at <http://www.mycollegepaymentplan.com/augustau>, or by clicking the link within POUNCE.

Refund Options

There are two options for refunds: electronic Refund (eRefund) by signing up on POUNCE through the student account center, or mailed paper check.

To sign up for eRefund, log onto POUNCE.

Refunds (BOR Policy Manual 7.3.5)

The policy for determining refunds to be made on institutional charges and other mandatory fees and elective fees and special charges (non-mandatory fees) at USG institutions, except for those institutions for which special refund policies have been approved by the Board of Regents, follows the institutional refunds procedures, as defined in the 1998 Amendments to the Higher Education Act of 1965, P.L. 105-244, TITLE IV-STUDENT ASSISTANCE, PART G-GENERAL PROVISIONS, SEC. 485.

Tuition and fees awarded by scholarship or grant from an agency or authority of the State of Georgia on behalf of a student receiving a refund under this policy shall be reimbursed to such agency or authority.

The Chancellor is authorized and empowered to take or cause to be taken any and all such other and further action as, in the judgment of the Chancellor may be necessary, proper, convenient or required in connection with the execution of this policy. Such authority may be further delegated to the president of the institution.

USG presidents are authorized and empowered to take or cause to be taken any and all such other and further action as may be necessary, proper, convenient, or required in connection with the execution of this policy.

Students Withdrawing from an Institution (BOR Policy Manual 7.3.5.1)

The refund amount for students withdrawing from an institution shall be based on a pro rata percentage determined by dividing the number of calendar days in the semester that the student completed by the total calendar days in the semester. The total calendar days in a semester includes weekends, but excludes scheduled breaks of five (5) or more days and days that a student was on an approved leave of absence.

The unearned portion shall be refunded up to the point in time that the amount earned equals sixty percent (60%). Students who withdraw from the institution when the calculated percentage of completion is greater than 60% are not entitled to a refund of any portion of institutional charges.

Death of a Student (BOR Policy Manual 7.3.5.2)

A refund of all nonresident fees, matriculation fees, and other mandatory fees shall be made in the event of the death of a student at any time during the academic session.

Military Service Refunds (BOR Policy Manual 7.3.5.3)

Subject to institutional policies, full refunds of tuition and mandatory fees and pro rata refunds of elective fees are hereby authorized for students who are:

1. Military reservists (including members of the National Guard) who, after having enrolled in a USG institution and paid tuition and fees, receive orders to active duty or are reassigned for temporary duty or mandatory training that prevents completion of the term;

2. Commissioned officers of the United States Public Health Service Commissioned Corps (PHSCC) who receive deployment orders in response to a public health crisis or national emergency after having enrolled in a USG institution and paid tuition and fees;
3. Active duty military personnel who after having enrolled in a USG institution and paid fees, receive reassignment or a temporary duty assignment or a training assignment that would prevent completion of the term;
4. Otherwise unusually and detrimentally affected by the activation of members of the reserve components or the deployment of active duty personnel of the Armed Forces of the United States who demonstrate a need for exceptional equitable relief.

Students planning to use Veterans Benefits must apply for admission like any other student.

Students using Chapter 33 (Post 9/11) benefits are required to pay (by the Final Payment Deadline) any tuition and fees not covered by the VA. The fees not covered include, but are not limited to: on campus housing, meal plans, and parking passes. The VA does not pay tuition and fees to Augusta University for students using Chapter 30, Chapter 1606, or Chapter 35 benefits. These students are responsible for payment of their tuition and fees by the payment deadline, since they are paid benefits directly through Veterans Affairs.

Students using Chapter 33 or Chapter 31 education benefits will be allowed to attend and participate in their course of education provided they have submitted to their Veteran Certifying Official a current Certificate of Eligibility or Statement of Benefits "eBenefits" (for Chapter 33) or a current VA Form 28-1905 (for Chapter 31 which comes from their counselor). If the VA delays in submitting funds to Augusta University for these students, these students will have full access to their classes, libraries, and other institutional facilities. They will not be required to borrow funds and will not have penalties or late fees imposed because of the VA's delay.

Veteran Readiness and Employment (VR&E) benefits are provided to promote the employment possibilities for disabled individuals. Applicants may be eligible to receive grants covering tuition, fees, books, and supplies. For further information, contact the Atlanta Regional VR&E Office at 1700 Clairmont Road, Decatur, GA 30033. The Augusta University Military and Veterans Services Office will work with VR&E and the Bursar's Office to assist eligible students.

For more information visit <https://www.augusta.edu/finance/controller/businessoffice/policies-fees.php#students>.

Academic Honesty

Augusta University recognizes that academic honesty is essential to its academic function. The regulations in the Academic Honesty Policy protect the equity and integrity of the University's grades and degrees, and help students develop ethical standards and attitudes appropriate to academic and professional life. Violations of academic honesty include, but are not limited to, cheating of all kinds, plagiarism, research misconduct, collusion, and false statements made to avoid negative academic consequences.

Cheating is prohibited.

Cheating includes, but is not limited to, the following:

- Possessing, using, or exchanging improperly acquired information, written or oral, in the preparation of any assignment or examination;
- Copying from another student's work;
- Using prepared materials, notes, or texts during an examination without permission from the instructor;
- Using any technological device to gain or provide advantage on an examination, lab practical, or other assignment without the permission of the instructor, including use of AI text generators;
- Substituting for another person during an examination or allowing someone else to substitute for you; and,
- Solicitation or bribery of any person to obtain examination information.

Collusion is prohibited.

Collusion occurs when multiple students conspire to violate academic honesty by providing or accepting unauthorized assistance, written or oral, in the preparation or completion of any activity, assignment, or examination without permission from the instructor, even if one or more of the students is not enrolled in the course or context in which the collusion occurs. Ordinary study groups, general discussions to facilitate learning, assigned cooperative learning projects, and appropriate campus resources (e.g., the Center for Writing Excellence, the Academic Success Center) do not constitute academic misconduct except when these are explicitly prohibited by the instructor. Collusion may result in additional consequences beyond the action taken for each individual violation of academic honesty. If students have any doubt about which types of collaboration are permissible, it is their responsibility to ask the instructor.

False statements are prohibited.

False statements include verbal or written declarations made to avoid or mitigate negative academic consequences by misrepresenting, distorting, embellishing, or concealing facts pertaining to a student's academic conduct in a course or program of study.

Plagiarism is prohibited.

Plagiarism occurs whenever someone uses another person's words or ideas, verbatim or paraphrased, without giving appropriate credit to the source. It includes reusing previously completed work (even one's own, i.e. self-plagiarism) without consulting the instructor in advance to confirm such use is permitted and to clarify the extent of revision needed to qualify for credit. It also includes presenting content generated by artificial intelligence as one's own. Students should not submit texts generated in part or full by artificial intelligence unless the instructor has granted explicit permission to do so (e.g. in the syllabus or on the assignment prompt). It is always assumed that all work produced or submitted in an academic context is the student's own and reflects original labor performed to satisfy the expectations assigned in that context, except when the student explicitly acknowledges indebtedness to another source. Such acknowledgment should occur whenever one quotes another person's words; uses or traces another person's ideas, opinions, or theories (even if paraphrased); or borrows facts, statistics, sounds, images, or other intellectual property or illustrative materials, unless the information is common knowledge. If students have any doubt whether a piece of information is considered common knowledge, it is their responsibility to ask the instructor.

Research Misconduct is prohibited.

Research Misconduct is misrepresentation of data collection and analysis, including falsification, fabrication, or omission of data. Augusta University's Policy for Responding to Allegations of Research Misconduct applies to students.

All other acts of academic dishonesty are also prohibited.

Other acts of academic dishonesty may be defined by the instructor in their course syllabus or other written instructions (e.g., assignment sheet, exam directions).

It is the duty of the faculty and all instructors to practice and preserve academic honesty and to encourage it among students. The instructor must clarify in writing (for example, in the course syllabus) any situation peculiar to the course that may differ from the generally stated policy. It is the responsibility of the instructor to provide for appropriate oversight of assignments, examinations, internship components, and other course requirements. Finally, it is the responsibility of the instructor to provide written notice to the student of any suspected violations of academic honesty as described in the Academic Honesty Policy.

It is the duty of the student to practice and preserve academic honesty. Each student is responsible for knowing the specific policies that govern academic conduct for the program(s) and course(s) in which they are enrolled, as well as the appeals process for adjudicating such policies. If the student has any doubt about a course policy or the instructor's expectations, they should consult the instructor or the course director. It is also the student's responsibility to check daily their Augusta University email so that official notification to the student regarding academic dishonesty can be carried out in timely fashion.

If the student is alleged to have engaged in non-academic misconduct, they should refer to the Augusta University Student Code of Conduct and the procedures outlined therein.

Academic Records and Transcripts

Permanent academic records are maintained by the Office of Registrar. Under the provisions of the Family Educational Rights and Privacy Act of 1974 (FERPA), a student attending a post-secondary educational institution may examine his or her permanent record maintained by the institution to assure the accuracy of its contents. This Act also provides that no personally identifiable information will be released to any party not authorized to have access to such information without the written consent of the student.

An Augusta University transcript is a complete record of a student's enrollment at Augusta University, including all undergraduate, graduate, and professional coursework. Transcripts are available to request by current students, alumni, and former students. Visit the Transcripts webpages for details and any applicable costs.

Academic Warning, Probation, and Dismissal

Note: Students should always check the University Policy Library for the most recent version of university policies. The applicable policy is the Academic Standing for Undergraduate Students Policy.

Any undergraduate student whose institutional grade point average (GPA) at the conclusion of any semester is below a 2.00 shall be given an academic warning by being placed on academic probation. Undergraduate students at Augusta University who are on academic probation must have their course schedules approved by their advisors prior to registration. They may continue to attend only if they meet the following minimum academic standards, which are based on progression level.

Progression Level	Term GPA	Institutional GPA
0-29	1.50	1.00
30-59	2.00	1.60
60-89	2.00	1.90
90 & above	2.00	2.00

Students who are on probation and fail to meet either the minimum Term or the Institutional GPA requirements specified above will be suspended (see below, "Academic Suspension"). Students who meet the Term GPA requirement will remain on probation until their

Institutional GPA is at or above 2.00, at which time they will return to good standing. Some programs within the University maintain academic standards specific to their degree requirements which may exceed these basic requirements.

Academic Suspension

The mandatory minimum term of suspension shall be one semester. Students wishing to return to the University after a suspension must petition for reinstatement (see below "Appeal for Reinstatement"). Exceptions may only be made by the Dean of the student's major. If reinstatement is approved, the student will be placed on academic probation and may be subject to additional conditions of continuation established by the University at the time of reinstatement. Should the probationary student achieve good standing, the student will be subject to the policy guidelines for students in good standing.

Appeal for Reinstatement

There is no guarantee of reinstatement from any academic suspension. Students suspended for academic deficiencies who complete the mandatory period of suspension may be considered for reinstatement. The student must submit a petition, in writing, at least 30 days prior to the desired semester of reinstatement. The appeal should state clearly the reasons why the student should be considered for reinstatement. Students should submit petitions through the Academic Advisement Center. These students should submit petitions to the Director of Academic Advisement for reinstatement. If a student has been away from the University for more than three semesters (including summer), they must also apply for readmission through the Office of Academic Admissions.

Academic Dismissal After Reinstatement

Should the student not satisfy the conditions of continuation established after returning from suspension, they will be academically dismissed from Augusta University. If dismissed, the student may be readmitted only after an absence of three calendar years (nine semesters) from Augusta University. Students who have been academically dismissed can, after the period of dismissal has elapsed, petition the university for readmission as part of the Academic Renewal process, outlined below.

Academic Renewal

Any undergraduate, degree-seeking student who has experienced significant academic difficulty may petition to have one opportunity to make a fresh start after an absence of three consecutive calendar years (nine semesters) from Augusta University. The procedures for students seeking academic renewal will follow the requirements in the USG's Academic and Student Affairs Handbook, section 02.05.02. Use the following link for the policy 02.05.02: <https://usg.policystat.com/policy/19293692/latest/#autoid-kawy8>

I. Applying for Academic Renewal Status

Students are encouraged to apply for Academic Renewal status at the time of reenrollment or enrollment as a transfer student at Augusta University. Students who do not request Academic Renewal at that time must do so within one calendar year after reenrollment.

Applications for Academic Renewal are made through the Office of Undergraduate Admissions. Students who are denied academic renewal may re-petition after one calendar year (three semesters).

A student can be granted Academic Renewal status only one time.

II. All previously attempted coursework continues to be recorded on the student's official transcript.

Only coursework completed prior to the period of absence may be considered for Academic Renewal.

The Academic Renewal GPA will be used for determining academic standing and eligibility for graduation.

To earn a degree, a student must meet the institution's academic residency requirements after acquiring Academic Renewal status.

Academic credit for previously completed coursework, including transfer coursework, will be retained only for courses in which a grade of A, B, or C has been earned.

Retained grades are not calculated in a Renewal GPA. Such credit is considered in the same context as transfer credit, credit for prior learning, and courses with grades of "S."

Courses with grades of D or F prior to the Academic Renewal must be repeated at Augusta University if they are required in the student's degree program.

Applicability of retained credit to degree requirements will be determined by the degree requirements in effect at the time Academic Renewal status is conferred on the student. Specific institutional program regulations must also be met.

Augusta University will accept visiting credits for students with Academic Renewal status in accordance with current policy.

The Academic Renewal GPA is not used to determine graduation with honors. In order to graduate from Augusta University with honors, all attempted coursework from all institutions attended is used to calculate the final grade point average.

III. Undergraduate students who are transferring to Augusta University or are returning to Augusta University after a period of absence may be eligible for Academic Renewal.

Readmitted Students: Readmitted students may be eligible for Academic Renewal for coursework taken prior to the period of absence. Students must be absent from Augusta University for three consecutive calendar years (nine semesters).

Transfer Students: Students who leave an institution accredited by an accepted accrediting body and transfer to Augusta University are eligible to apply for Academic Renewal. Only coursework completed three years or more prior to the enrollment at Augusta University can be considered for academic renewal. Courses taken more recently than the period of eligibility are ineligible for consideration for Academic Renewal. However, transfer credit can be granted for coursework taken during this period in accordance with current policy.

IV. Any scholastic suspension that occurred in the past shall remain recorded on the student's permanent record. If a suspension is on the record and the student encounters subsequent academic difficulty after having been granted Academic Renewal, the next suspension subjects the student to dismissal.

V. Re-entry into any program is not automatic.

VI. The granting of Academic Renewal does not supersede financial aid policies regarding Satisfactory Academic Progress.

VII. The granting of Academic Renewal does not supersede the admissions requirements of certain programs, e.g., teacher education and nursing, which require a specific minimum grade point average based upon all coursework.

VIII. Academic Renewal status granted by another USG institution shall be honored at Augusta University.

Additional Baccalaureate Degree

A student holding a baccalaureate degree from an institution accredited by an accepted accrediting body who wishes to work for another degree must complete the minimum residence requirements of the university (30 hours of coursework in courses numbered 3000 or above with an average grade of C or better) with at least 30 hours of resident credit in excess of the requirement for the original degree. In addition, the student must complete the exact requirements of major courses, allied fields, mathematics and foreign languages.

Auditing a Course

Regularly enrolled students at Augusta University may register for courses as auditors. No academic credit shall be awarded to students enrolled on this basis. No changes from audit to credit or credit to audit will be permitted after the last day of the scheduled drop/add for the term. Students auditing courses will be required to pay regular fees for enrollment. Courses taken as audits do not count toward financial aid eligibility. A student enrolled as an auditor is expected to attend class regularly and perform such other tasks as may be assigned by the instructor. An auditor who does not attend class regularly may be dropped from the class with a grade of W. A grade of V is assigned to a student who registers as an auditor.

Certificate Residency Requirement

A student must complete at Augusta University at least 25 percent of the credits required for the degree and a minimum of 30 hours of academic credit in courses numbered 3000 or above.

- at least 25% of the overall certificate hours from AU, **and**
- 50% of all certificate credit hours at the 3000 level or above from AU.

Class Attendance

Note: Students should always check the University Policy Library for the most recent version of university policies. The policy governing Class Attendance for undergraduates is the Undergraduate Class Attendance Policy.

Augusta University (AU) expects students' regular attendance. Attendance within the courses for which a student is registered is a precondition for receiving credit for the course. Students registering late or who miss class are required to consult with their instructor to determine whether missed work may be made up, in a manner determined by the instructor and the course syllabus.

AU expects students to attend all regularly scheduled class meetings for instruction and examination. When a student is compelled for any reason to be absent, the student should notify the instructor as soon as possible and provide a reason for the absence. The student is responsible for all material presented in class and for all announcements and assignments.

Students should consult with their instructors about all class absences.

It is the responsibility of the **student** to:

- Notify the instructor as soon as possible about class absences.
- Determine what they missed during their absence and reach out to their instructor to determine whether make up work is possible or available.

The Augusta University instructor will clearly define excessive unexcused absences in their syllabus, including a clear statement about any potential penalties.

In all cases of excused absences, an instructor may require written proof of the reason for the absence, such as military orders, doctor's notes, official AU communications, and the like.

While keeping with the excessive absence threshold, a student may miss a scheduled class without penalty, under the following conditions:

- Absences that occur with prior approval by the instructor of record or his/her designee
- Absences due to students involved in required activities representing Augusta University. These include, but are not limited to, athletic events for student-athletes, required academic or artistic events or competitions, or required student government activities. Other potential events as defined by the Deans of the colleges could be considered excused absences from classes when traveling. [Note: absences related to student clubs are not to be considered excused unless approved by the class instructor.]
- Absences due to legally compelled attendance at a court of law
- Absences due to required participation in ROTC Activities
- Absences due to pregnancy-related issues in accordance with the most recent federal guidance under Title IX
- Absence due to weather conditions that AU has officially recognized as hazardous for travel (does not apply to online classes unless the storm causes the student's internet connection to fail.)
- Absences for religious accommodations: see Religious Holiday Policy
- Absences due to an officially documented illness or other medical or psychological issue, for which the instructor may require the student to provide official documentation from the care provider indicating that an absence was medically reasonable.
- Inability of a member of our armed services to attend class due to receiving orders for a period of service.

For absences that meet at least one of these "excused" conditions, the instructor will make reasonable efforts to find a means for the student to make up missed work; the make-up work is not required to be identical.

In all other cases, the decision to permit students to make up missed work shall reside with the instructor.

Any absence problems which cannot be resolved between the instructor and the student shall be challenged and reviewed in accordance with the AU policy on Student Academic Grievances.

Course Excursions or Field Trips

Whenever class trips entail absences from other classes, the instructor must secure advance approval from their department or program chair. If approved, a list of all students involved and the courses they will miss must be composed by the Department or College, which must then provide official notice. Students may not be required to go on field trips if they involve the student's absences from classes in which examinations or other significant in-person exercises are scheduled, unless the professor overseeing the scheduled exam agrees to reschedule the exam for the impacted student(s).

Withdrawal for Excessive Absences

See Adding, Dropping, and Withdrawing from Courses for Undergraduate Students.

Classification of Students

Undergraduate students at Augusta University are classified as follows, based on the number of academic credit hours earned: Freshman, less than 30 hours; Sophomore 30-59 hours; Junior 60-89 hours; Senior 90 or more hours. The classification under which a student registers at the beginning of each academic semester will continue throughout the academic term. This policy does not apply to post-baccalaureate students.

Course Load

A normal undergraduate course load in a semester is 15-18 hours. Undergraduate students who wish to register for more than 18 semester credit hours must receive approval from either 1) the chair of their academic department, or 2) the Director of Academic Advisement if they are assigned to the Academic Advisement Center. A student may be approved to register for more than 18 hours only if: 1) they has a Regents' GPA of 3.0 with at least 15 credit hours taken at Augusta University, or 2) they is within 30 hours of graduation, or 3) the student is granted permission by their dean.

Course Numbering System

Courses should be numbered according to the appropriate level as determined by the stated student learning outcomes of each course.

- 1000-numbered courses present introductory or general knowledge courses at the undergraduate level. Courses in this level generally have no prerequisites unless it is part of a sequence.
- 2000- numbered courses present fundamental knowledge in a particular field or discipline at the undergraduate level. Courses in this level may have prerequisites at the 1000 level.
- 3000- numbered courses present topics related to major fields and disciplines at an undergraduate level.
- 4000- numbered courses present more advanced topics related to major fields and disciplines at an undergraduate level.
- 5000- numbered courses present introductory or general knowledge in a particular field or discipline at a graduate level.
- 6000- numbered courses present fundamental knowledge in a particular field or discipline at a graduate level.
- 7000- numbered courses are generally seminars and lectures and are reserved for specialists in educational, professional doctorates, and first-professional degrees.
- 8000- numbered courses are generally advanced seminar and lecture courses for research-based and doctoral degrees.
- 9000- numbered courses are advanced seminar and research courses and are to be used only by Doctor of Philosophy degree programs

Course Repeat Policy

Only specifically designated courses may be repeated for credit towards graduation and/or program completion.

With the exception of such courses as Wellness (WELL) activity courses, "Selected Topics" courses, and other courses specifically designated for repetition and designated as such in the catalog, by registering for a course for which credit has already been received, a student forfeits credit towards graduation and the earned grade. Only the credit and grade from the latest attempt will count, unless they qualify for a grade substitution. Students who retake a course not designated as repeatable who then withdraw will not have their previously earned credit hours restored, unless they qualify for a grade substitution.

Students who retake a course and earn a lower grade (or W), may petition through the grade substitution process to have that grade removed from their Institutional GPA and have the prior credit reinstated. Student can do this once per course and up to four times during an undergraduate academic career.

Students wishing to attempt a course a third or more time, regardless of performance in or completion of previous attempts, must seek prior approval through their advisor.

All hours attempted and all grades earned will appear on the student's transcript. For the purposes of calculating the Regents' (or cumulative) GPA, all course attempts will be used.

The Office of the Registrar's regular recording processes will be used in carrying out these policies.

For further details, see the Undergraduate Repeated Course and Grade Substitution Policy.

Credit for Prior Learning

Requests to award credit for prior learning may be initiated by faculty or by an individual student. If initiated by a student, the request should generally be made prior to or within the first semester of enrollment. Regardless of who initiates the request, all credit for prior learning must be approved through the university's curriculum approval process as outlined in the Curriculum Approval policy. Once approved, all documentation associated with the approval will be on file with the Office of the Registrar.

The following processes and procedures are in addition to the curriculum approval process:

Credit for Prior Learning from Standardized or Field Examinations

Augusta University may award credit for tests from certain standardized or field examinations such as Advanced Placement (AP), International Baccalaureate (IB), College Level Examination Program (CLEP), Scholastic Aptitude Subject Test II, and the DANTES Subject Standardized Tests. Faculty of the appropriate discipline shall review at least once every five years – or when a major change takes place in the examination – 1) the required score(s), 2) level of credit, and 3) amount of credit awarded. Any recommendation for change resulting from this review must be submitted through the Curriculum Approval process. Credit for prior learning from standardized or field examinations shall be awarded automatically upon entrance to the university after receipt of official scores from the examination agency. A list of the required score(s), level of credit, and amount of credit awarded is available at the Office of the Registrar and Office of Academic Admissions. Credit awarded for prior learning from standardized or field examinations shall be recorded on the student's transcript with the letter "K" in lieu of a letter grade. The Office of Academic Admissions is responsible for processing credit for prior learning from standardized or field examinations.

Credit for Prior Learning from Augusta University Departmental Examinations

Students may request to receive credit for prior learning through departmental examinations (sometimes known as "challenging a course") for courses that apply to their official program of study consistent with departmental policy. Faculty of the appropriate discipline may decide to recommend credit through departmental examinations. A copy of the examination, a chart linking examination questions to student learning outcomes appropriate to the rigor and level of credit being awarded, and a standardized scoring methodology are available in each department and with the Office of Academic and Faculty Affairs. A list of 1) the required score(s), 2) level of credit, and 3) amount of credit awarded based on departmental examinations is available at the Office of the Registrar. Credit awarded for prior learning from departmental examinations shall be recorded on the student's transcript with the letter "K" in lieu of a letter grade. A non-refundable fee of \$25.00 (USD) per credit hour must be assessed prior to a student attempting departmental examinations (e.g. \$75.00 for a three-credit course). The academic department administering the examination is responsible for providing a graded copy of the examination and a letter outlining the amount of credit to be awarded based on the attempt to the Office of the Registrar. The Registrar will also be informed if the student fails to achieve a minimum credit-eligible score on the exam.

Credit for Prior Learning for Significant, Documented, Experiential Learning

Faculty of the appropriate discipline may decide to recommend credit for significant, documented, and verified experiential learning for courses that apply to a student's official program of study. A chart linking these learning experiences to Augusta University course-level student learning outcomes appropriate to the rigor, level, and amount of credit being awarded is required. Faculty of the appropriate discipline shall review previously approved experiences at least once every five years. Any recommendation change resulting from this review must be submitted through the Curriculum Approval process. A list of approved experiences is available at the Office of the Registrar. Credit awarded for prior learning from significant, documented, experiential learning shall be recorded on the student's transcript with the letter "K" in lieu of a letter grade.

Transfer credit is not considered credit for prior learning. See Transfer Credit.

Dean's and President's Lists

Augusta University believes it is important to recognize the superior academic performance of undergraduate and Dental College of Georgia students by awarding them an academic distinction for a given semester.

To qualify for the President's List, an undergraduate student must: (a) earn 12 or more hours of undergraduate coursework numbered 1000 or above, exclusive of K grades; (b) have achieved a grade point average of 4.00 for that semester; and (c) have received no grade of F or WF during the semester. For students with an Incomplete ("I") grade, President's List computations will not be made until a grade is determined.

Undergraduate students who do not qualify for the President's List in a given semester, can qualify for the Dean's List, if they: (a) earn 12 or more hours of undergraduate coursework numbered 1000 or above, exclusive of K grades; (b) have achieved a grade point average of at least 3.50 for that semester; and (c) have received no grade of F or WF during the semester. For students with an Incomplete ("I") grade, Dean's List computations will not be made until a grade is determined.

To qualify for the Dean's List in the Dental College of Georgia, students must exhibit acceptable professional behavior, have a grade point average of 3.50 (on a 4.00 scale) or higher for that semester while carrying at least 12 hours of credit, and must not have received any unsatisfactory or failing grades for that semester.

The achievement of each student who qualifies for President's List and Dean's List is acknowledged and noted on the student's permanent record.

Double Majors

Students seeking to double major must satisfy all of the requirements of the two majors, including all residency and institutional requirements for each degree program. Students graduating with a double major must complete a minimum of 45 credit hours of upper-division coursework overall, with a minimum of 21 credit hours of upper-division coursework in one major. Courses taken to meet residency and institutional requirements for one major may be counted towards the residency and institutional requirements for the other major. Coursework for both majors must be completed prior to graduation. Students pursuing a double major must submit two separate graduation applications. Both majors will appear on the student's official transcript.

Students graduating with a double major will be awarded one diploma if both majors are in the same baccalaureate degree (e.g., Bachelor of Science with separate majors in Mathematics and Physics). Students are eligible for a Simultaneous Degree if they graduate with a double major in two different baccalaureate degrees. Those students will be issued two diplomas (e.g., Bachelor of Arts with a Major in English and a Bachelor of Science with a Major in Mathematics).

Students earning a Bachelor of Arts with a Major in Integrated Studies are not permitted to double major.

Students graduating with a double major may add one or more minors and certificates, unless the catalog entry for that program explicitly prohibits it.

Family Educational Rights and Privacy Act (FERPA) Annual Notification

In establishing the University FERPA Records Policy, Augusta University adheres to a policy of compliance with the Family Educational Rights and Privacy Act of 1974, also known as FERPA, a federal law that requires colleges and universities to protect the confidentiality of student education records. The law states that, except in specified circumstances, no one outside the institution shall have access to a student's education records, nor will the institution disclose any information from those records without the written consent of the student.

For details, see the FERPA Annual Notification posted on the Office of the Registrar FERPA webpage.

All questions concerning this FERPA Annual Notification may be directed to the attention of the Office of the Registrar.

Final Exams

Normally, the completion of a course will include a final examination; however, the instructor may choose to instead require an alternative instructional activity if the course organization is such that an examination is not appropriate. The official examination schedule is published on the Registrar's Office website each semester.

Grades

Augusta University follows the Board of Regents' grading system, as required for all University System of Georgia institutions. A 4.00 grade point average system, calculated to and truncated at two significant digits, is used. The following grades are approved for use at Augusta University and are included in the determination of the grade point average:

Grade	Description	Grade Points

A	Excellent	4.0
B	Good	3.0
C	Satisfactory	2.0
D	Passing	1.0
F	Failure	0.0
WA	Withdrawal	Not Computed
WH	Withdrawal	Not Computed
WF	Withdrawal Failing	0.0
WM	Military Withdrawal	Not Computed
W	Withdrawal	Not Computed
I	Incomplete	Not Computed
S	Satisfactory	Not Computed
U	Unsatisfactory	Not Computed
V	Audit	Not Computed
K	Credit By Exam	Not Computed
CP	Continued Progress	Not Computed
IP	In Progress	Not Computed
NR	Not Reported	Not Computed

The following symbols are approved for use in the cases indicated but will not be included in the determination of the grade point average.

I	A student who is doing satisfactory work but, for non-academic reasons beyond their control, is unable to meet the full requirements of the course, may be assigned an incomplete ("I") grade. An incomplete justification must be completed by the course instructor to assign the incomplete grade. A student who has received an "I" grade has until the grading deadline for the full term of the next semester to complete the required work and to receive a final grade. A grade change must be submitted in the student information system to remove the incomplete and assign the final grade. Any incomplete grade not removed by the grading deadline for the next semester will be converted to an "F" grade. If a student is assigned an I, the course instructor must notify the student in writing of the requirements for removal of the I and of the deadline for removal of the I.
NR	Grades that are not reported have not been submitted by the grading deadline. NR grades may be converted upon instructor submission of a final grade.
W	This symbol indicates that a student was permitted to withdraw without penalty. Any student who withdraws on or before the last day to receive a "W" as listed in the Academic Calendar will receive a W. Withdrawals without penalty are not permitted after the last day to receive a "W" as listed in the Academic Calendar of the total grading period (including final examinations) unless an exception is approved in accordance with institutional withdrawal procedures.
WA	This symbol indicates a student was withdrawn from a course due to medical circumstances.
WH	This symbol indicates a student was withdrawn from a course due to hardship circumstances.

WM	This symbol indicates a student was withdrawn from a course due to military obligations.
S	This symbol indicates that credit has been given for completion of degree requirements other than academic coursework. The use of this symbol is approved for dissertation and thesis hours, student teaching, clinical practicum, internship, and proficiency requirements in graduate programs. Exceptions to the use of this symbol for academic coursework must be submitted to the USG chief academic officer for approval.
U	This symbol indicates unsatisfactory performance in an attempt to complete degree requirements other than academic coursework. The use of this symbol is approved for dissertation and thesis hours, student teaching, clinical practicum, internship, and proficiency requirements in graduate programs. Exceptions to the use of this symbol for academic coursework must be submitted to the USG chief academic officer for approval.
V	This symbol indicates that a student was given permission to audit this course. After the last day of late registration, students may not transfer from audit to credit status or vice versa.
K	This symbol indicates that a student was given credit for the course via a credit by examination program approved by the respective school's faculty. (CLEP, AP, Proficiency, etc).
CP	This symbol designates a course that extends beyond the semester. A grade is not given until the course is completed. This symbol cannot be substituted for an I (Incomplete).

See the full **The Grading System Policy**.

Grade Changes

Augusta University requires a grade change to be submitted in the student information system. Any grade changes unable to be completed electronically should be submitted on the Grade Change Form to the Registrar's Office. Grade Change Forms are internal institutional documents and are not routinely distributed to students. Grade changes must be initiated by the course instructor and approved by the Department Chair/Program Director and Dean before it will be honored by the Registrar.

Grade changes should be submitted as soon as possible, and no later than one semester after the initial grade was assessed. There may be reasons that justify a later change of grade, but they must be of an unusual nature and considered most exceptional. Any exception must receive the respective college dean's approval as well as the Vice Provost. Changes in Incomplete grades are exempt from this policy.

Grade changes after degree conferral are permitted only in exceptional circumstances and require approval of the appropriate academic Dean.

Grade Appeal Process

See **Student Academic Grievances**.

Incomplete Grades

An Incomplete (I) grade indicates that a student did not complete course requirements by the end of the term due to circumstances beyond their control.

The student is responsible for initiating the request for an incomplete grade with the course instructor. The course instructor determines whether the student is eligible to receive an incomplete grade based on satisfactory academic progress in the course and the nature of the circumstances preventing completion of course requirements (must be non-academic). An incomplete justification must be submitted by the course instructor through the Student Information System (POUNCE) when assigning the grade.

Students receiving an I grade have one additional semester to complete the required coursework:

- Incomplete grades assigned in the Spring term must be resolved by the end of the Summer term.
- Incomplete grades assigned in the Summer term must be resolved by the end of the Fall term.
- Incomplete grades assigned in the Fall term must be resolved by the end of the Spring term.

If the coursework is not completed by the applicable deadline, the I grade will automatically convert to an F grade at the end of the term.

Students who retake the course must register and pay for the course again. Retaking the course does not automatically remove the original I grade. The original I grade must be resolved through submission of a final grade, withdrawal grade, or conversion to an F grade.

If warranted, the course instructor may extend the incomplete grade period by submitting an extension through the Student Information System (POUNCE). Additional approvals are not required.

For students graduating, incomplete grades in required coursework must be resolved before the degree can be awarded. Incomplete grades may not remain on required coursework at the time of graduation. Unresolved incomplete grades may delay graduation and require the student to reapply for graduation.

Incomplete grades, along with the last date of attendance (for financial aid purposes), must be submitted by the term grading deadline.

Graduation

Graduation Requirements

All candidates for the bachelor's degree at Augusta University must satisfy the following conditions:

Students must earn 39 or more hours in upper level courses. Students must complete all requirements for a major with a grade of C or better in each course. Together with the core curriculum, minor, if applicable, and electives these requirements must total at least 120 hours, not including the credits for the wellness requirement.

Specific graduation requirements for each program are found in this catalog.

Payment of Financial Obligations: No student will be permitted to graduate if they are in default on any payment due to the university.

Additional Degrees: Normally, two identical degrees are not awarded. However, a student may receive the appropriate degree of any other program by completing the additional requirements of that program and earning at least 30 hours of resident credit in excess of the requirement for the original degree.

Core IMPACTS Curriculum: The Core IMPACTS curriculum was developed by the University System of Georgia for the purpose of facilitating the education of students as they pursue baccalaureate degrees within and among the units of the University System. It includes 60 hours of lower-level courses that would normally be covered in the first half of a baccalaureate degree program. A student who completes any area of the core at a university system institution has the assurance that core area has been satisfied at Augusta University.

Course Requirements: Complete a minimum of 120 hours for the baccalaureate degree, not including the Wellness requirement as specified for the candidate's program. A minimum of 39 hours of upper-division courses is required for students graduating with the baccalaureate degree.

Credit from Other Institutions: See Residence Requirement and Credit from Other Institutions.

Degree Requirements in Effect at Candidacy for Graduation: A candidate for graduation is subject to requirements in effect at the time of initial enrollment; however, changes may have been made while the student is enrolled. The changes in requirements shall be implemented so as to minimize the problems of transition for currently enrolled students. A student who is not enrolled for three or more consecutive semesters or who transferred to another institution will be required to complete a new application to the university and will be subject to the requirements for graduation in effect at time of readmission.

Grade Point Average: Students must achieve an institutional grade point average (see above) of at least 2.00 on all work attempted at this university or an academic renewal grade point average of at least 2.00 on all work since the date of academic renewal.

Graduation Application Fee: The graduation application fee is used to defray the cost of processing candidates for graduation, printing and mailing diplomas, and conducting the commencement ceremonies held each May and December. See the Graduation website for additional information.

Legislative Requirements: In 1975, the Georgia legislature enacted a measure that requires all graduates to have passed examinations on the history of the United States and of Georgia and on the provisions and principles of the constitutions of the United States and of Georgia. No academic credit is given for these examinations, which are administered each semester by Testing and Disability Services.

Certain history and political science courses (i.e., HIST 2111, HIST 2112, HIST 3711, POLS 1101, and POLS 4101), which are listed in the Course Descriptions section of the Catalog, will satisfy this requirement. Students who fail one or both of the examinations should contact the chair of the appropriate department (History, Anthropology, and Philosophy or Social Sciences) soon after the examination date.

Wellness Requirement: One activity course is required for all Augusta University students seeking an undergraduate degree; transfer students who transfer in with 60 or more hours will have the requirement waived.

Baccalaureate Degree: Each student is required to pass one course which should normally be completed during the freshman and sophomore years. Unless a waiver (as described below) is granted, the requirement will consist of the following:

- WELL XXXX - Activity Course (1 Credit Hour)

Waivers and Substitutions:

- Military Service – Students who were in the military may receive a waiver of the Wellness Activity Course requirement if they were in good standing at the time of their separation. The student will submit a copy of their DD-214 Discharge Document to the Chair of Kinesiology and Health Science. Upon review of the document the Chair will email the Registrar and student stating if a waiver will be granted. If the waiver is granted, the student will not be required to take the Wellness Activity Course.
- Physical Limitations - If a student has limitations regarding physical activity participation (as specified by a physician), written documentation from the physician is required indicating the type and amount of activity in which the student is allowed to participate. The student will submit this documentation to the Chair of Kinesiology and Health Science for their review. The Chair will email the Registrar and student stating if a waiver for the Wellness Activity Course will be granted.

Residence Requirements and Credit from Other Institutions: Students seeking a baccalaureate degree must complete in residence at Augusta University at least 25 percent of the credits required for the degree and a minimum of 30 hours of academic credit in courses numbered 3000 or above. At least one-half of the major concentration and at least one-half of the minor concentration must be completed in residence at Augusta University.

The amount of credit that the university will allow for work done in another institution within a given period of time may not exceed the normal amount of credit that could have been earned at the university during that time. A maximum of 62 hours of credit earned in a community college may be applied toward a degree.

Augusta University limits academic residency to no more than twenty-five percent of the degree requirements for all degrees for active duty servicemembers. Academic residency can be completed at any time while active duty service members are enrolled. Reservists and National Guardsmen on active duty are covered in the same manner.

Special Examinations: Special examinations may be required of the student as they progresses through various levels of the curriculum.

Graduation with Honors

AU awards honors to students graduating with a bachelor's degree who meet specific standards of academic excellence as measured by the grade point average. For an undergraduate degree to be awarded with honors, a student must have completed a minimum of 60 semester hours in residence for a bachelor's degree. For students completing all coursework at AU, the Regents GPA is used for the calculation of honors. For students transferring coursework to AU, a grade point average including all transfer work and all work taken at AU will be used for calculation of honors. For transfer students, both the calculated GPA and the Regents GPA must meet the standards below. The honor will be determined by the lower of the two GPAs.

The standards for honors are as follows:

- **Summa Cum Laude:** 3.90 - 4.00 GPA
- **Magna Cum Laude:** 3.70 - 3.89 GPA
- **Cum Laude:** 3.50 - 3.69 GPA

Participation in Commencement

Augusta University holds two commencement ceremonies each year, in the fall semester and spring semester. Augusta University students who have completed all requirements by the end of the spring semester are permitted to participate in the spring commencement. Students completing requirements at the end of the summer or fall semester participate in the fall commencement.

Students wishing to participate in commencement must complete the graduation application by the published deadline for the relevant semester.

No diploma will be awarded until the student has been certified as having completed all academic requirements.

Minors

Minor programs of study are prescribed areas of academic study consisting of 15 to 18 credit hours of coursework with at least 9 hours of upper-division coursework. Courses taken to satisfy any of the Core IMPACTS domains may not be counted as coursework in a student's minor. However, Field of Study courses may be counted as coursework in the minor.

Students must complete at least half of the courses for the minor while in residence at Augusta University. Student must earn a grade of at least a "C" in the last attempt of all courses applicable to a minor.

Coursework completed for a degree program may usually be applied to a minor and vice-versa. For majors that do not have a mandatory minor requirement, 100% sharing between a major and a minor is permitted. In those cases, a course may satisfy the requirement of the major, a first minor, and -- if applicable -- a second minor. Students in majors that have a mandatory minor requirement, or students in majors where hours for the minor are required to meet the minimum hours for graduation, cannot share upper-division coursework between major and minor requirements, unless the catalog entry for that program explicitly permits it.

Professional Liability Insurance

Students in the health professions are required to participate in various clinical learning experiences as a prerequisite to successful completion of programs of study. Many of the clinical facilities where these learning experiences take place will only accept students who are covered by professional liability insurance. Students may contact the office of the dean of the Augusta University college/school in which they expect to enroll for information on the availability and cost of such coverage.

Registration

Registration procedures at Augusta University are maintained by the Office of the Registrar. Notification of these procedures and any changes in the Academic Calendar will be published on the University website.

Students at Augusta University are allowed ample time to register for classes. Registration for courses must be completed in accordance with the dates provided on the University Academic Calendar. A late registration charge may be assessed to any student registering outside the published registration dates.

In keeping with Board of Regents' policy, students are required to pay all tuition and fees prior to the first day of class. Students are not considered enrolled in the institution until all tuition and fees have been paid.

Verification of attendance in all courses is required by the primary faculty member and must be completed by the published deadline.

Except for unusual circumstances, students are not allowed to register after the last day of late registration (the drop/add period listed in the Academic Calendar).

While reasonable efforts shall be made to inform students of registration dates and of any changes in these dates, it is the student's responsibility to keep apprised of such changes.

Student Academic Appeals

Note: Students should always check the University Policy Library for the most recent version of university policies. The applicable policy is the Student Academic Appeals Policy.

An academic appeal is a request for review of an administrative decision made with respect to an individual student which bears upon their student career. The appeals procedure does not apply to issues which have broad application to the university as a whole or to constituent groupings within the university. However, appeals can be made in matters such as admission, transfer of credit, probation, suspension, dismissal, and other similar matters. Appeals also may be made in cases related to the Augusta University Student Concerns and Complaints Policy. A supervisor's decision in an appeal can itself be appealed, but there is no appeal of the President's decisions except in cases where it is reasonably alleged that a decision against the student was based on discrimination with respect to race, sex, age, handicap, religion, or national origin. This policy provides a means to appeal in cases where administrative decisions

have been made which may have a negative effect on a student's academic career. It addresses situations not covered by the Student Academic Grievance Policy.

The procedures set forth in the Student Academic Appeals Policy are intended to provide students at Augusta University a means for appealing administrative decisions which are alleged to have a negative impact on that student's academic career. If the student wishes to address alleged violations of their rights by their instructor, or wish to file a grade appeal, the student should refer to the Student Academic Grievance section in these regulations. If the student's problem is related to a non-academic issue, they should refer to the Augusta University Student Code of Conduct.

Student Academic Grievances

Note: Students should always check the University Policy Library for the most recent version of university policies. The applicable policy is the Student Academic Grievance Policy.

Prior to initiating a formal academic grievance, including a grade appeal, student concerns may be discussed with the faculty member and/or reported to the department chair or unit head.

Academic grievances should normally be made by the grievant during the term of the student's enrollment in the course in which the violation of rights was alleged to have occurred, and no later than end of the semester following the alleged violation of rights, including summer semester. A grievant who seeks a change of final grade in a course should be mindful that University policy requires such changes to be made by the end of the semester following the semester (including summer semester) in which the student was enrolled in the course. If the student wishes to initiate an academic grievance, they must follow the student academic grievance procedure as outlined below, keeping in mind the following principles:

Except when the complaint is of the most egregious nature or is related to intellectual diversity, the student must start with a sincere attempt to settle the dispute in an informal manner with the instructor. In general, administrators can initially hear the student's concerns and refer them to this document, but they will not discuss any specific grievance until the appropriate procedural steps have been taken. The Dean of Students or designee may serve an advisory role for the most egregious incidents or those involving intellectual diversity by hearing specific grievances and facilitating the procedures outlined below.

Within the guidelines of the institution, faculty have authority and responsibility for course content, classroom procedure, and grading, except insofar as it can be shown that a decision was arbitrary or capricious, or based on discrimination with respect to race, religion, sex, handicap, age, or national origin.

When a student prepares their case, they should keep in mind that the burden of proof is on them, not on the instructor.

Students who have legitimate grievances which cannot be resolved at the departmental level should follow the procedures outlined in the Student Academic Grievance Policy. However, frivolous or mendacious complaints are discouraged.

Administrators shall not discuss the details of a specific grievance with a student who has not followed the procedure outlined in the policy, and any representative of a student must follow the same procedure.

Each party in the grievance, whether the grievant, the instructor, or an administrator, shall normally have five (5) business days to respond at any stage in the grievance procedure, unless both parties agree to an extension, or the exercise of due diligence requires additional time.

When a student believes they have an academic grievance, they should first seek to resolve that grievance by discussions with the faculty member or administrator involved. If initial discussions are not satisfactory, the student may take the complaint to the next administrative level as specified below, taking care not to skip levels in the administrative hierarchy. At every level the person hearing the alleged grievance should respond to the student within a reasonable length of time of the initial request. Normally such response should occur within five (5) business days after the student request unless bona fide reasons such as illness, personal emergency or campus absence for professional reasons makes this time limit unreasonable.

The student should consult with the faculty member involved by written letter or email, no later than the first day of classes of the semester following that in which the grievance occurs. The student should articulate the reason(s) for the grievance and the expected remedy. The faculty member (respondent) should provide a response to the student by written letter or email within five (5) business days.

If after communicating with the faculty member the student is not satisfied that a fair and equitable solution has been achieved, the student may take the grievance to the administrative supervisor of the faculty member. In most instances, this will be the department chair. This statement of the alleged grievance and the remedy, along with any documentary evidence, should be in written form.

If the student is still not satisfied, they may take the grievance to the academic dean of the faculty member's school or college (for undergraduate students). Graduate students must concurrently contact the academic dean of the faculty member's school or college and the dean of the graduate school. This statement of the alleged grievance and the remedy, along with any documentary evidence, should be in written form.

As a last resort and only after the previous steps have been carried out, or have been conscientiously attempted, the student may present a formal grievance in writing to the Augusta University Vice President for Faculty Affairs. They should set forth in writing a statement of the alleged grievance and the remedy sought at the department/unit or college level, along with any documentary evidence, which should be delivered to the Office of the Vice President for Faculty Affairs (OVP). The process for this formal grievance is outlined in the Student Academic Grievance Policy.

Student Complaints

A complaint is a concern or grievance regarding a policy or procedure that has been inappropriately or unjustly applied or a violation of an institutional principle or policy. Augusta University seeks to resolve concerns and complaints in a fair and prompt manner. When appropriate, students should initially seek to resolve concerns within the office or department from which the concern originates. The personnel of those offices possess the qualifications, experience, and knowledge to manage resolution process as well as to work in a collaborative and confidential manner. If a resolution is not reached, students can file a written Student Complaint with the Office of the Dean of Students.

Students who wish to dispute an assigned grade, or appeal actions or decisions of faculty members in the context of an academic course, are to follow the Student Academic Grievance Policy. Students who wish to appeal an administrative decision which bears on their academic career, are to follow the Student Academic Appeals Policy.

Concerns related to a compliance issue can be filed anonymously through the Ethics Reporting Hotline. Before pursuing external options, including appeals to the University System of Georgia, exhaust all internal Augusta University avenues of complaint resolutions.

Augusta University participates in the National Council for State Authorization Reciprocity Agreement (NC-SARA), allowing us to offer online programs to students outside Georgia. Membership in NC-SARA does not waive state-specific professional licensing requirements. Under U.S. Department of Education "Program Integrity" rules, each state must have a student complaint process for institutions receiving Title IV funds. In Georgia, GA-SARA oversees written and signed complaints against SARA-approved degree-granting institutions that remain unresolved at the institutional level. For details, see GA-SARA Student Complaint Rules. Students living outside of Georgia should submit complaints through the GA-SARA Online Student Complaint Form. The SARA student complaint process can be found [here](#).

Student Conduct

Non-Academic Conduct Issues

Augusta University has defined the relationships and appropriate behavior of students as members of the university community through the Student Code of Conduct, which may be found within sections two and three of the Student Manual. The document is available to all members of the university community through the Office of the Dean of Students.

The students of Augusta University have established a precedent of exemplary behavior as members of the university and civic communities. Behavior that unduly disrupts the learning environment and ultimately violates the University's Code of Conduct will be addressed through the Student Conduct Process. Such violations may result in disciplinary probation, suspension, expulsion, or other appropriate disciplinary and/or educational measures.

Academic standards and procedures, including the process for violations of Academic Honesty, are addressed in section five of the Student Manual.

Transfer Credit

Coursework must be validated as being academically rigorous for the appropriate level at which a student receives transfer credit. The institution where credit was earned must be accredited by an accrediting organization that is recognized by the Council for Higher Education Accreditation or by the U.S. Department of Education, or both. For institutions outside of the United States, such assurance is provided by an approved credentials evaluation service to which applicants submit their educational credentials.

Transfer Credit for Baccalaureate Degrees

For coursework to be transferred to undergraduate degree programs at AU, the original academic coursework must be completed at the collegiate level and be relevant and applicable to the degree being sought at AU, as general education coursework, major degree requirements, minor requirements, or electives. Augusta University does not accept for transfer equivalency: developmental/remedial courses, non-academic vocational or technical training courses, and technology courses for which there is no corresponding discipline or course at Augusta University.

For more information on transferable credit from TCGS institutions, visit https://www.usg.edu/academic_affairs_handbook/assets/academic_affairs_handbook/docs/TCSGUSGTransfer.pdf.

After admission, an evaluation of accepted transferable credits is made by the Office of Undergraduate Admissions in consultation with Academic Affairs. Students, in consultation with their advisors, may request departments to review their academic records to potentially approve a Required Course Substitution/Exception Request or Examination of Transfer Work form. A course substitution allows a course to fulfill a degree requirement it would not typically satisfy. All course substitutions must be approved by the chair of the department in which the course in question is offered. All approved course substitutions must be submitted to the Office of the Registrar for processing. A department chair, or their designated reviewer can also authorize an updated evaluation of transfer credit if they feel that a course for which substitution is being sought should have a different Augusta University equivalent than originally determined. All official correspondence for this re-evaluation of transfer work must be submitted to the Office of Undergraduate Admissions for processing.

Students seeking a baccalaureate degree must complete at Augusta University at least 25 percent of the credits required for the degree and a minimum of 30 hours of academic credit in courses numbered 3000 or above. At least one-half of the major concentration and one-half of the minor concentration, if applicable, must be completed at Augusta University.

The amount of credit that the university will allow for work done in another institution within a given period of time may not exceed the normal amount of credit that could have been earned at the university during that time.

Active duty service members of the United States Armed Services or the United States Public Health Service Commissioned Corps (PHSCC) must complete at least 25 percent of the degree requirements for all degrees at Augusta University. Academic residency can be completed at any time while active-duty service members are enrolled. Reservists and National Guardsmen on active duty are covered in the same manner.

Coursework that is more than 20 years old is subject to validation by the Office Undergraduate Admissions or that person's designee. Credit decisions will be made in consultation with appropriate department chairs.

Visiting and Cross-Registered Students

At Augusta University, students must be in good standing and must obtain prior approval to enroll in any and all credit courses at any other institution as a visiting or cross-registered student. This prior approval of each course must be obtained from the Augusta University department or college that offers a course most comparable to the one that will be taken elsewhere. A **visiting student** is defined as a degree candidate at Augusta University who is granted the privilege of temporary registration at another institution and will not be enrolled at Augusta University during that period of temporary registration. A **cross-registered student** is defined as a degree candidate at Augusta University who is granted the privilege of enrolling at both Augusta University and another institution during a semester.

Withdrawal

Augusta University students may add or drop courses from their schedule of classes, provided they do so by the published deadline.

After the add/drop period has ended, a student may withdraw from a course without penalty up to the last day to receive a "W" as published in the **Academic Calendar**. Following this deadline, a student who withdraws from a course will receive a grade of WF (Withdrew Failing), unless an exception is approved in accordance with institutional withdrawal procedures, including approved medical, hardship, or military withdrawals. WF grades are treated as F grades for grade point average calculations.

Beginning fall 2026, Augusta University undergraduate students may withdraw from up to six courses (not to include lab courses and other one-credit courses) in their undergraduate academic careers. Thereafter, a WF grade will be entered for any subsequent withdrawal from a course. The WF grade will count as an F grade for purposes of grade point average calculation.

Initiating a withdrawal is the responsibility of the student. Forms for initiating a withdrawal may be obtained from the Office of the Registrar's website and the Academic Advisement Center. A student must consult an advisor before withdrawing from a course. A student must obtain all required signatures on the official withdrawal form and obtain a last date of attendance for the course.

Once the withdrawal request has been received by the Office of the Registrar, the official date of withdrawal will be the date the student initiated the request.

A student who registers for a course and stops attending class (or never attends class) is not automatically withdrawn by the instructor and is subject to receiving a grade of W (before the last day to receive a "W" set forth in the **Academic Calendar**), WF, or F for the course. However, an instructor may withdraw a student for excessive absences (more than 10 percent of class time).

See the **Adding, Dropping, and Withdrawing from Courses for Undergraduate Students policy** for more information.

Academic Honesty

Augusta University recognizes that academic honesty is essential to its academic function. The regulations in the Academic Honesty Policy protect the equity and integrity of the University's grades and degrees, and help students develop ethical standards and attitudes appropriate to academic and professional life. Violations of academic honesty include, but are not limited to, cheating of all kinds, plagiarism, research misconduct, collusion, and false statements made to avoid negative academic consequences.

Cheating is prohibited.

Cheating includes, but is not limited to, the following:

- Possessing, using, or exchanging improperly acquired information, written or oral, in the preparation of any assignment or examination;
- Copying from another student's work;
- Using prepared materials, notes, or texts during an examination without permission from the instructor;
- Using any technological device to gain or provide advantage on an examination, lab practical, or other assignment without the permission of the instructor, including use of AI text generators;

- Substituting for another person during an examination or allowing someone else to substitute for you; and,
- Solicitation or bribery of any person to obtain examination information.

Collusion is prohibited.

Collusion occurs when multiple students conspire to violate academic honesty by providing or accepting unauthorized assistance, written or oral, in the preparation or completion of any activity, assignment, or examination without permission from the instructor, even if one or more of the students is not enrolled in the course or context in which the collusion occurs. Ordinary study groups, general discussions to facilitate learning, assigned cooperative learning projects, and appropriate campus resources (e.g., the Center for Writing Excellence, the Academic Success Center) do not constitute academic misconduct except when these are explicitly prohibited by the instructor. Collusion may result in additional consequences beyond the action taken for each individual violation of academic honesty. If students have any doubt about which types of collaboration are permissible, it is their responsibility to ask the instructor.

False statements are prohibited.

False statements include verbal or written declarations made to avoid or mitigate negative academic consequences by misrepresenting, distorting, embellishing, or concealing facts pertaining to a student's academic conduct in a course or program of study.

Plagiarism is prohibited.

Plagiarism occurs whenever someone uses another person's words or ideas, verbatim or paraphrased, without giving appropriate credit to the source. It includes reusing previously completed work (even one's own, i.e. self-plagiarism) without consulting the instructor in advance to confirm such use is permitted and to clarify the extent of revision needed to qualify for credit. It also includes presenting content generated by artificial intelligence as one's own. Students should not submit texts generated in part or full by artificial intelligence unless the instructor has granted explicit permission to do so (e.g. in the syllabus or on the assignment prompt). It is always assumed that all work produced or submitted in an academic context is the student's own and reflects original labor performed to satisfy the expectations assigned in that context, except when the student explicitly acknowledges indebtedness to another source. Such acknowledgment should occur whenever one quotes another person's words; uses or traces another person's ideas, opinions, or theories (even if paraphrased); or borrows facts, statistics, sounds, images, or other intellectual property or illustrative materials, unless the information is common knowledge. If students have any doubt whether a piece of information is considered common knowledge, it is their responsibility to ask the instructor.

Research Misconduct is prohibited.

Research Misconduct is misrepresentation of data collection and analysis, including falsification, fabrication, or omission of data. Augusta University's Policy for Responding to Allegations of Research Misconduct applies to students.

All other acts of academic dishonesty are also prohibited.

Other acts of academic dishonesty may be defined by the instructor in their course syllabus or other written instructions (e.g., assignment sheet, exam directions).

Responsibilities

Faculty Responsibility

It is the duty of the faculty and all instructors to practice and preserve academic honesty and to encourage it among students. The instructor must clarify in writing (for example, in the course syllabus) any situation peculiar to the course that may differ from the generally stated policy. Whenever possible, the instructor should make explicit the intent and purpose of each assignment so that the student may complete the assignment without unintentionally compromising academic honesty. It is the responsibility of the instructor to provide for appropriate oversight of assignments, examinations, internship components, and other course requirements. Finally, it is the responsibility of the instructor to provide written notice to the student of any suspected violations of the academic honesty policy as described in process and procedures below.

Student Responsibility

It is the duty of the student to practice and preserve academic honesty. Each student is responsible for knowing the specific policies that govern academic conduct for the program(s) and course(s) in which they are enrolled, as well as the appeals process for adjudicating such policies. If the student has any doubt about a course policy or the instructor's expectations, they should consult the instructor or the course director. It is also the student's responsibility to check daily their Augusta University email so that official notification to the student regarding academic dishonesty can be carried out in timely fashion. The following colleges handle disciplinary actions according to policies and procedures set forth in their respective conduct or honor codes:

- Dental College of Georgia (DMD Students) – Student Conduct Code. Available upon request of the Associate Dean for Students, Admissions, and Alumni.
- Medical College of Georgia (MD Students) – Medical College of Georgia Honor System. Available upon request by calling 706-721-2231.

If the student is alleged to have engaged in non-academic misconduct, they should refer to the Augusta University Student Code of Conduct and the procedures outlined therein.

Academic Records and Transcripts

Permanent academic records are maintained by the Office of Registrar. Under the provisions of the Family Educational Rights and Privacy Act of 1974 (FERPA), a student attending a post-secondary educational institution may examine his or her permanent record maintained by the institution to assure the accuracy of its contents. This Act also provides that no personally identifiable information will be released to any party not authorized to have access to such information without the written consent of the student.

An Augusta University transcript is a complete record of a student's enrollment at Augusta University, including all undergraduate, graduate, and professional coursework. Transcripts are available to request by current students, alumni, and former students. Visit the Transcripts webpages for details and any applicable costs.

Academic Standing

Grades, Academic Performance and Progress

The Graduate School: Satisfactory progress toward a degree in The Graduate School requires that a student maintain a cumulative grade point average* (GPA) of at least 2.8 for all courses attempted, and that all milestones required by the student's program be met in the timeframe set by that program. A minimum grade of C or satisfactory in courses graded S/U (where S = satisfactory, U = unsatisfactory) must be earned for each non-repeatable course applying toward a graduate degree, and a 2.8 cumulative GPA in all courses attempted toward the degree is required for graduation. For repeatable S/U courses only, students may be allowed up to one U grade. Individual programs may set stricter GPA, U grade and/or other graduation requirements. Additional standards for satisfactory progress in courses related to the specific discipline may be set by the program (with approval of the TGS dean), in which case the higher standards shall apply. Such higher standards may include recommendation for dismissal from the program. Consult your program's handbook.

*Cumulative Grade Point Average (GPA) includes all courses taken (every time taken) while in the degree (or certificate) program with no D/F grade forgiveness.

Academic Probation and Dismissal

Any student whose cumulative GPA for a degree program falls below 2.8 is placed on academic probation. This is not noted on transcripts. While on probation, the student must earn a minimum of 3.0 each grading period until the cumulative GPA is raised to at least 2.8. Students who fail to earn at least 3.0 each period while on probation shall be recommended for academic dismissal from the Program. The above are minimum standard for AU's TGS graduate programs. With approval of the TGS Dean, individual programs may establish stricter GPA standards and/or performance standards for probation or dismissal, in which cases the stricter standards shall apply. For example, in the College of Education, any student who is unable to remediate the grade point average after one semester on academic probation will be placed on "academic suspension" for a period of one semester. Consult your program's handbook for specific information.

Where circumstances warrant and upon recommendation of the academic program concerned and approval of the TGS Dean, a student being considered for dismissal under the provisions of this policy may be permitted to continue as a student on probation. In such cases, the student must earn a GPA of at least 3.0 each grading period while on probation until a 2.8 cumulative GPA is achieved. Failure to do so will result in dismissal from the degree program. The second dismissal will be final.

Students cannot graduate with a D or F grade in a course, and must re-take the course to earn at least a C grade or higher. Students cannot graduate with a U grade in any non-repeatable S/U course and likewise must re-take the course to earn an S grade. Any student in a dissertation or thesis track (including consulting track for Biostatistics MS students) who receive a U in a repeatable research course will be placed on academic probation. For repeatable S/U courses (e.g. research courses, seminar courses, journal clubs), students may have one, but not two, U grades. Two or more U grades in repeatable courses will result in the student being recommended for dismissal. Students earning a D, F, or U in a graduate course required for their degree can be recommended for dismissal by their program. The above are minimum standard for AU's TGS graduate programs. Individual programs may set more stringent C, D, F and/or U probation and/or dismissal policies. Consult your program's handbook.

Any PhD student who earns a grade of Unsatisfactory (U) in a Research course will be placed on academic probation. A student appointed as a Graduate Research Assistant will also be placed on GRA-funding probation if they earn a U in a Research course. Assignment of such a U grade by a faculty advisor will be accompanied by a written report to the Program Director and TGS Dean citing the reason(s) for the U grade, and the expectations/requirements the student must meet during the next semester in order to earn an S grade in the subsequent course. The Program Director and faculty advisor will discuss the student's past performance and future expectations with the student. While on probation, a student must earn Satisfactory (S) grades in all S/U courses in which s/he is enrolled. A student who fails to earn all S grades while on probation will be recommended for academic dismissal. GRA-appointed students who earn a second U grade will be terminated from the GRA appointment.

A student may be considered for dismissal if s/he fails to make timely progress (meeting program requirements including milestones and timelines) toward the degree sought.

Academic Appeals

Any student who has been dismissed from a program and would like to appeal that dismissal should follow the Student Academic Appeals Policy at augusta.edu/compliance/policyinfo/policy/student-academic-appeals-policy.pdf. The Augusta University Student Academic Appeals Policy is specifically designed to address administrative decisions made with respect to an individual student which bears upon their career.

Auditing a Course

Students may audit graduate courses, but must secure permission of the instructor/course director, program director, and Dean of The Graduate School. No academic credit is awarded. Students auditing courses must pay the program's tuition and fees. No changes from audit to credit or credit to audit will be permitted after the last day of the schedule adjustment (add/drop) period. Courses taken as audit do not count toward financial aid eligibility. A student enrolled as an auditor is expected to attend class regularly and to complete assignments as assigned by the instructor. An auditor who does not attend regularly may be withdrawn from the course. In order to audit a class, students must first apply at augusta.edu/admissions/apply.php, click on non-degree seeking, Auditor, Apply. Once this is complete, a Course Approval Form must also be completed. Contact The Graduate School to complete this form.

Class Attendance

Regular, punctual attendance is expected of students in all classes and is counted from the first class meeting each term. Professors are required to monitor student attendance or ongoing participation in courses. Students who incur an excessive number of absences are subject to academic penalty. Additional attendance requirements may be established by the individual schools or programs as well as by the faculty for distance learning courses.

At the beginning of each semester, all professors will provide a clear written statement to all their classes regarding their policies in handling absences. Professors will also be responsible for counseling with their students regarding the academic consequences of absences from their classes or laboratories. Students are obligated to adhere to the requirements of each course and each course professor.

To assist the University in complying with federal regulations pertaining to financial aid, faculty members are also required to maintain a record of and report student non-attendance at the start of each academic term. The Registrar is responsible for informing faculty of the duration of the nonattendance verification period and appropriate reporting method at the beginning of each academic term. In accordance with this policy, a student who does not attend a class or begin participation in an online course during the non-attendance verification period will be dropped from the course by the professor unless they have contacted their professor and notified them of their reason for non-attendance. In the event a student is dropped for non-attendance during this designated time period, the effect is the same as if the student never registered for the class and the course will not appear on the student's transcript.

Faculty members will be flexible enough in their attendance and grading policies to allow students a reasonable number of absences without penalty for extraordinary personal reasons or for officially representing the university. Students are expected to adhere to the

attendance guidelines within the syllabus. No student should assume that the faculty member has initiated a withdrawal form. A student not withdrawn from a course who stops attending class, or who never attends class, is subject to receiving a grade of "WF" or "F" for the course.

Students involved in required activities representing Augusta University are excused from class meetings that conflict with specified events. These include, but are not limited to, athletic events for student-athletes, required academic or artistic events or competitions, or required student government activities. Other potential events as defined by the Deans of the colleges could be considered excused absences from classes when traveling. These absences shall not count against the student's attendance record.

Course Load

A graduate student who registers for 9 or more hours is considered a full time student. A graduate student who is registered for 5 to 8 hours is considered a half time student. A graduate student who is registered for 1 to 4 hours is considered a less than half time student.

The Medical College of Georgia does not admit students on a part-time basis. Students in the Medical College may, with appropriate approval from that college, carry lesser academic loads than other students because of academic or scheduling problems. However, these students are considered to be committed to full-time pursuit of the Doctor of Medicine degree.

All Doctor of Dental Medicine degree-seeking students are considered to be fulltime and are expected to devote full-time efforts toward completing requirements for the degree. Most students complete the program in four academic years and take a uniform semester course schedule. Other students may, with special permission, complete the degree program in more than four years and take a variable semester course load designed to meet their academic or scheduling circumstances. Exceptions to this rule are part-time Dental College of Georgia faculty with international, non-CODA accredited dental degrees who may register as part-time students in order to complete the DMD degree for licensure purposes, and a limited number of special students (eg foreign exchange students), who are not degree-seeking.

Course Numbering System

Courses should be numbered according to the appropriate level as determined by the stated student learning outcomes of each course.

- 1000-numbered courses present introductory or general knowledge courses at the undergraduate level. Courses in this level generally have no prerequisites.
- 2000-numbered courses present fundamental knowledge in a particular field or discipline at the undergraduate level. Courses in this level may have prerequisites at the 1000 level.
- 3000-numbered courses present topics related to major fields and disciplines at an undergraduate level.
- 4000-numbered courses present more advanced topics related to major fields and disciplines at an undergraduate level.
- 5000-numbered courses present introductory or general knowledge in a particular field or discipline at a graduate level.
- 6000-numbered courses present fundamental knowledge in a particular field or discipline at a graduate level.
- 7000-numbered courses are generally seminars and lectures and are reserved for specialists in educational, professional doctorates, and first-professional degrees.
- 8000-numbered courses are generally advanced seminar and lecture courses for research-based and doctoral degrees.
- 9000-numbered courses are advanced seminar and research courses and are to be used only by Doctor of Philosophy degree programs.

Offered courses are numbered from 1000 to 4999 to students at the undergraduate level. Generally, 1000 level courses are aligned to Freshmen level, 2000 level courses are aligned to Sophomore level, 3000 level courses are aligned to Junior level, and 4000 level courses are aligned to Senior level students. Post-baccalaureate, professional, and graduate courses are numbered from 5000 to 9999, depending on the relevant college or program. Certain courses are offered to undergraduate, graduate, and professional students jointly. Such courses are numbered appropriately for each class and degree program.

Credit for Prior Learning

See the policy at augusta.edu/services/legal/policyinfo/policy/credit-for-prior-learning-policy.pdf.

Requests to award credit for prior learning may be initiated by faculty or by an individual student. If initiated by a student, the request should generally be made prior to or within the first semester of enrollment. Regardless of who initiates the request, all credit for prior learning must be approved through the university's curriculum approval process as outlined in the Curriculum Approval policy. Once approved, all documentation associated with the approval will be on file with the Office of the Registrar.

The following processes and procedures are in addition to the curriculum approval process:

Credit for prior learning from standardized or field examinations. Credit may be awarded for tests from certain standardized or field examinations such as Advanced Placement (AP), International Baccalaureate (IB), College Level Examination Program (CLEP), Scholastic Aptitude Subject Test II, and the DANTES Subject Standardized Tests. Faculty of the appropriate discipline shall review at least once every five years – or when a major change takes place in the examination – 1) the required score(s), 2) level of credit, and 3) amount of credit awarded. Any recommendation for change resulting from this review must be submitted through the Curriculum Approval process. Credit for prior learning from standardized or field examinations shall be awarded automatically upon entrance to the university after receipt of official scores from the examination agency. A list of the required score(s), level of credit, and amount of credit awarded is available at the Office of the Registrar and Office of Academic Admissions. Credit awarded for prior learning from standardized or field examinations shall be recorded on the student's transcript with the letter "K" in lieu of a letter grade. The Office of Academic Admissions is responsible for processing credit for prior learning from standardized or field examinations.

Credit for prior learning from departmental examinations. Students may request to receive credit for prior learning through departmental examinations (sometimes known as "challenging a course") for courses that apply to their official program of study consistent with departmental policy. Faculty of the appropriate discipline may decide to recommend credit through departmental examinations. A copy of the examination, a chart linking examination questions to student learning outcomes appropriate to the rigor and level of credit being awarded, and a standardized scoring methodology are available in each department and with the Office of Academic and Faculty Affairs. A list of 1) the required score(s), 2) level of credit, and 3) amount of credit awarded based on departmental examinations is available at the Office of the Registrar. Credit awarded for prior learning from departmental examinations shall be recorded on the student's transcript with the letter "K" in lieu of a letter grade. A non-refundable fee of \$25.00 (USD) per credit hour must be assessed prior to a student attempting departmental examinations (e.g. \$75.00 for a three-credit course). The academic department administering the examination is responsible for providing a graded copy of the examination and a letter outlining the amount of credit to be awarded based on the attempt to the Office of the Registrar. The Registrar will also be informed if the student fails to achieve a minimum credit-eligible score on the exam.

Credit for prior learning for significant, documented, experiential learning. Faculty of the appropriate discipline may decide to recommend credit for significant, documented, and verified experiential learning for courses that apply to a student's official program of study. A chart linking these learning experiences to course-level student learning outcomes appropriate to the rigor, level, and amount of credit being awarded is required. Faculty of the appropriate discipline shall review previously approved experiences at least once every five years. Any recommendation change resulting from this review must be submitted through the Curriculum Approval process. A list of approved experiences is available at the Office of the Registrar. Credit awarded for prior learning from significant, documented, experiential learning shall be recorded on the student's transcript with the letter "K" in lieu of a letter grade.

Transfer credit is not considered credit for prior learning. See Transfer Credit.

Discipline

Academic Discipline

There are defined standards of academic honesty and integrity for all facets of its students' academic careers. Disciplinary sanctions for violations of these standards are mentioned in each academic policy.

Non-Academic Discipline

The relationships and appropriate behavior of students as members of the university community are defined through the document Student Code of Conduct in the Student Handbook. The document is available to all members of the university community through the Office of the Dean of Students.

The students have established a precedent of exemplary behavior as members of the university and civic communities. Individuals and groups are expected to observe the tradition of decorum and behave in no way which would precipitate physical, social, or emotional hazards to other members of the university community. Behavior that disrupts the learning environment and ultimately violates the University's Code of Conduct will be addressed through the conduct system. Such violations may result in probation, suspension, expulsion, or other appropriate disciplinary measures.

Family Educational Rights and Privacy Act (FERPA) Annual Notification

In establishing the University FERPA Records Policy, Augusta University adheres to a policy of compliance with the Family Educational Rights and Privacy Act of 1974, also known as FERPA, a federal law that requires colleges and universities to protect the confidentiality

of student education records. The law states that, except in specified circumstances, no one outside the institution shall have access to a student's education records, nor will the institution disclose any information from those records without the written consent of the student.

For details, see the FERPA Annual Notification posted on the Office of the Registrar FERPA webpage.

All questions concerning this FERPA Annual Notification may be directed to the attention of the Office of the Registrar.

Grades

The university follows the Board of Regents' grading system, as required for all University of Georgia institutions. A 4.00 grade point average system, calculated to and truncated at two significant digits, is used. The following grades are approved for use and are included in the determination of the grade point average:

Grade	Description	Grade Points
A	Excellent	4.0
B	Good	3.0
C	Satisfactory	2.0
D	Passing	1.0
F	Failure	0.0
WA	Withdrawal	Not Computed
WH	Withdrawal	Not Computed
WF	Withdrawal Failing	0.0
WM	Military Withdrawal	Not Computed
W	Withdrawal	Not Computed
I	Incomplete	Not Computed
S	Satisfactory	Not Computed
U	Unsatisfactory	Not Computed
V	Audit	Not Computed
K	Credit by Exam	Not Computed
CP	Continued Progress	Not Computed
IP	In Progress	Not Computed
NR	Not Reported	Not Computed

The following symbols are approved for use in the cases indicated, but will not be included in the determination of the grade point average.

I	A student who is doing satisfactory work but, for non-academic reasons beyond their control, is unable to meet the full requirements of the course may be assigned an incomplete ("I") grade. An incomplete justification must be completed by the

	course instructor to assign the incomplete grade. A student who has received an "I" grade has until the grading deadline for the full term of the next semester to complete the required work and receive a final grade. A grade change must be submitted in the student information system to remove the incomplete and assign the final grade. Any incomplete grade not removed by the grading deadline for the next semester will be converted to an "F" grade. If a student is assigned an I, the course instructor must notify the student in writing of the requirements for removal of the I and of the deadline for removal of the I.
NR	Grades that are not reported have not been submitted by the grading deadline. NR grades may be converted upon instructor submission of a final grade.
W	This symbol indicates that a student was permitted to withdraw without penalty. Any student who withdraws on or before the last day to receive a "W" as listed in the Academic Calendar will receive a W. Withdrawals without penalty are not permitted after the last day to receive a "W" as listed in the Academic Calendar of the total grading period (including final examinations) unless an exception is approved in accordance with institutional withdrawal procedures.
WA	This symbol indicates a student was withdrawn from a course due to medical circumstances.
WH	This symbol indicates a student was withdrawn from a course due to hardship circumstances.
WM	This symbol indicates a student was withdrawn from a course due to military obligations.
S	This symbol indicates that credit has been given for completion of degree requirements other than academic course work. The use of this symbol is approved for dissertation and thesis hours, student teaching, clinical practicum, internship, and proficiency requirements in graduate programs. Exceptions to the use of this symbol for academic course work must be submitted to the USG chief academic officer for approval.
U	This symbol indicates unsatisfactory performance in an attempt to complete degree requirements other than academic course work. The use of this symbol is approved for dissertation and thesis hours, student teaching, clinical practicum, internship, and proficiency requirements in graduate programs. Exceptions to the use of this symbol for academic course work must be submitted to the USG chief academic officer for approval.
V	This symbol indicates that a student was given permission to audit this course. After the last day of late registration, students may not transfer from audit to credit status or vice versa.
K	This symbol indicates that a student was given credit for the course via a credit by examination program approved by the respective school's faculty. (CLEP, AP, Proficiency, etc).
CP	This symbol designates a course that extends beyond the semester. A grade is not given until the course is completed. This symbol cannot be substituted for an I (Incomplete).

The Grading Policy is available online at augusta.edu/compliance/policyinfo/policy/grading-system-policy.pdf.

Grade Changes

The university requires a grade change to be submitted in the student information system (POUNCE). Any grade changes unable to be completed electronically should be submitted on the Grade Change Form to the Registrar's Office. Grade Change Forms are internal institutional documents and are not routinely distributed to students. Grade changes must be initiated by the course instructor and approved by the Department Chair/Program Director and Dean before they are honored by the Registrar. Students in The Graduate School programs must also have approval from the dean or designee of The Graduate School for the grade change.

Grade changes should be submitted as soon as possible and no later than one semester after the initial grade was assessed. There may be reasons that justify a later change of grade, but they must be of an unusual nature and considered most exceptional. Any exception must receive the respective college dean's approval as well as approval from the Vice Provost or dean/designee of The Graduate School, as applicable. Changes in Incomplete grades are exempt from this policy.

Grade changes after degree conferral are permitted only in exceptional circumstances and require approval of the dean of the college offering the course.

Incomplete Grades

An Incomplete (I) grade indicates that a student did not complete course requirements by the end of the term due to circumstances beyond their control.

The student is responsible for initiating the request for an incomplete grade with the course instructor. The course instructor determines whether the student is eligible to receive an incomplete grade based on satisfactory academic progress in the course and the nature of the circumstances preventing completion of course requirements (must be non-academic). An incomplete justification must be submitted by the course instructor through the student information system (POUNCE) when assigning the grade.

Students receiving an I grade have one additional semester to complete the required coursework:

- Incomplete grades assigned in the Spring term must be resolved by the end of the Summer term.
- Incomplete grades assigned in the Summer term must be resolved by the end of the Fall term.
- Incomplete grades assigned in the Fall term must be resolved by the end of the Spring term.

If approved, the course instructor sets the conditions and deadline for completion. Incomplete grades, along with the last date of attendance (for financial aid purposes), must be submitted by the term's grading deadline.

If the coursework is not completed by the applicable deadline, the I grade will automatically convert to an F grade at the end of the term.

Students who retake the course must register and pay for the course again. Retaking the course does not automatically remove the original I grade. The original I grade must be resolved through submission of a final grade, withdrawal grade, or conversion to an F grade.

If warranted, the course instructor may extend the incomplete grade period by submitting an extension through the student information system (POUNCE). Additional approvals are not required.

For students graduating, incomplete grades in required coursework must be resolved before the degree can be awarded. Incomplete grades may not remain on required coursework at the time of graduation. Unresolved incomplete grades may delay graduation and require the student to reapply for graduation. Students in The Graduate School programs must satisfy all degree and grading requirements established by The Graduate School prior to degree conferral.

Graduation

Graduation dates for each term are published in the Academic Calendar. Students who have applied and complete requirements for graduation will be awarded their degree at the end of their completion term. Two commencement ceremonies are held each year, in fall semester and spring semester. Students who have completed all requirements by the end of the spring semester are permitted to participate in the Spring commencement. Students completing requirements at the end of the summer or fall semester participate in the Fall commencement. Students wishing to participate in commencement must complete the graduation application by the published deadline for the relevant semester. No diploma will be awarded until the student has been certified as having completed all academic requirements and has been certified by the Bursar as having met all financial obligations.

Each candidate for a graduate degree must apply for graduation. Graduation information and the Application for Graduation Form. Please read the application carefully and provide ALL requested information.

- Spring Applicants: submit application Fall Midterm BEFORE completion of requirements
- Summer & Fall Applicants: submit application Spring Midterm BEFORE completion of requirements

Students must have completed all degree requirements and be certified for graduation in order to participate in graduation and hooding ceremonies. Satisfactory fulfillment of any additional requirements and/or milestones required by the student's program or the institution must also be completed to be eligible for graduation.

Time Limits

It is the student's responsibility to meet all the requirements for their degree in the proper sequence and in the time limits specified in this document. Where circumstances warrant, a student may petition the Dean for exceptions to the time limit policies.

Doctor of Philosophy

The minimum requirement for the Doctor of Philosophy degree is three full academic years (nine semesters of full time enrollment), which cannot be satisfied through summer work alone. Typical PhD degree programs take more than three years of full time enrollment to complete. All course work and other requirements for the Doctor of Philosophy degree, including the Final Oral Examination, must be

completed within seven (7) consecutive years from the date of enrollment in The Graduate School. Leaves of absence (withdrawals) do not extend the seven-year limit. It is the student's responsibility to meet all the requirements for the degree in the proper sequence and in the time limits specified in this document. For students in combined MD/PhD or DMD/PhD degree programs, the seven-year limit does not include semesters of enrollment in the professional degree program.

EdD

The minimum requirement for the EdD degree is three full academic years (nine semesters of full time enrollment), which cannot be satisfied through summer work alone. All course work and other requirements must be completed within seven (7) consecutive years from the date of enrollment. Leaves of absence (withdrawals) do not extend the seven year limit.

DNP

All course work and other requirements for the DNP Traditional Program and the DNP Executive track, including the Final Oral Examination, must be completed within five (5) consecutive calendar years from the date of initial enrollment in the DNP program. Leaves of absence (withdrawals) do not extend the five-year limit. It is the student's responsibility to meet all the requirements for the degree in the proper sequence within the 5 year time limit. This applies to both full-and part-time enrollment.

All course work and other requirements for the DNP Program with NP concentrations, including the Final Oral Examination, must be completed within six (6) consecutive calendar years from the date of initial enrollment in the DNP program. Leaves of absence (withdrawals) do not extend the six year limit. It is the student's responsibility to meet all the requirements for the degree in the proper sequence within the six year time limit. This applies to both full-and part-time enrollment.

Master's Degree

The minimum requirement for a master's degree is two (2) full academic semesters. All course work and other requirements must be completed within five (5) consecutive years from the date of enrollment. Leaves of absence (withdrawals) do not extend the five year limit.

Grade Point Average Requirement for Graduation

The Graduate School requires a cumulative GPA of at least 2.8 to graduate. Students cannot graduate with a D or F grade in any course and must re-take the course to earn at least a C grade or higher. Students cannot graduate with a U grade in any non-repeatable S/U course and likewise must re-take the course to earn an S grade. The GPA and minimal grade requirement may be higher for some programs. Student's should check with their program's director for program specific information.

Professional Liability Insurance

Students in the health professions are required to participate in various clinical learning experiences as a prerequisite to successful completion of programs of study. Many of the clinical facilities where these learning experiences take place will only accept students who are covered by professional liability insurance. Students may contact the office of the dean of the college in which they expect to enroll for information on the availability and cost of such coverage.

Registration

Registration procedures are maintained by the Office of the Registrar. Notification of these procedures and any changes in the Academic Calendar will be published on the University website. Students are allowed ample time to register for classes. Registration for courses must be completed in accordance with the dates provided on the University Academic Calendar. A late registration charge will be assessed to any student registering outside the published registration dates. In keeping with Board of Regents' policy 7.3.3, students are required to pay all tuition and fees prior to the first day of class. Students are not considered enrolled in the institution until all tuition and fees have been paid. Verification of attendance in all courses is required by the primary faculty member and must be completed by the published deadline. Except for unusual circumstances, students are not allowed to register after the last day of late registration (the drop/add period listed in the Academic Calendar). While reasonable efforts shall be made to inform students of registration dates and of any changes in these dates, it is the student's responsibility to keep apprised of such changes.

Student Academic Grievances

Note: Students should always check the University Policy Library for the most recent version of university policies. The applicable policy is the Student Academic Grievance Policy.

Prior to initiating a formal academic grievance, including a grade appeal, student concerns may be discussed with the faculty member and/or reported to the department chair or unit head.

Academic grievances should normally be made by the grievant during the term of the student's enrollment in the course in which the violation of rights was alleged to have occurred, and no later than end of the semester following the alleged violation of rights, including summer semester. A grievant who seeks a change of final grade in a course should be mindful that University policy requires such changes to be made by the end of the semester following the semester (including summer semester) in which the student was enrolled in the course. If the student wishes to initiate an academic grievance, they must follow the student academic grievance procedure as outlined below, keeping in mind the following principles:

Except when the complaint is of the most egregious nature or is related to intellectual diversity, the student must start with a sincere attempt to settle the dispute in an informal manner with the instructor. In general, administrators can initially hear the student's concerns and refer them to this document, but they will not discuss any specific grievance until the appropriate procedural steps have been taken. The Dean of Students or designee may serve an advisory role for the most egregious incidents or those involving intellectual diversity by hearing specific grievances and facilitating the procedures outlined below.

Within the guidelines of the institution, faculty have authority and responsibility for course content, classroom procedure, and grading, except insofar as it can be shown that a decision was arbitrary or capricious, or based on discrimination with respect to race, religion, sex, handicap, age, or national origin.

When a student prepares their case, they should keep in mind that the burden of proof is on them, not on the instructor.

Students who have legitimate grievances which cannot be resolved at the departmental level should follow the procedures outlined in the Student Academic Grievance Policy. However, frivolous or mendacious complaints are discouraged.

Administrators shall not discuss the details of a specific grievance with a student who has not followed the procedure outlined in the policy, and any representative of a student must follow the same procedure.

Each party in the grievance, whether the grievant, the instructor, or an administrator, shall normally have five (5) business days to respond at any stage in the grievance procedure, unless both parties agree to an extension, or the exercise of due diligence requires additional time.

When a student believes they have an academic grievance, they should first seek to resolve that grievance by discussions with the faculty member or administrator involved. If initial discussions are not satisfactory, the student may take the complaint to the next administrative level as specified below, taking care not to skip levels in the administrative hierarchy. At every level the person hearing the alleged grievance should respond to the student within a reasonable length of time of the initial request. Normally such response should occur within five (5) business days after the student request unless bona fide reasons such as illness, personal emergency or campus absence for professional reasons makes this time limit unreasonable.

The student should consult with the faculty member involved by written letter or email, no later than the first day of classes of the semester following that in which the grievance occurs. The student should articulate the reason(s) for the grievance and the expected remedy. The faculty member (respondent) should provide a response to the student by written letter or email within five (5) business days.

If after communicating with the faculty member the student is not satisfied that a fair and equitable solution has been achieved, the student may take the grievance to the administrative supervisor of the faculty member. In most instances, this will be the department chair. This statement of the alleged grievance and the remedy, along with any documentary evidence, should be in written form.

If the student is still not satisfied, they may take the grievance to the academic dean of the faculty member's school or college (for undergraduate students). Graduate students must concurrently contact the academic dean of the faculty member's school or college and the dean of the graduate school. This statement of the alleged grievance and the remedy, along with any documentary evidence, should be in written form.

As a last resort and only after the previous steps have been carried out, or have been conscientiously attempted, the student may present a formal grievance in writing to the Augusta University Vice President for Faculty Affairs. They should set forth in writing a statement of the alleged grievance and the remedy sought at the department/unit or college level, along with any documentary evidence, which should be delivered to the Office of the Vice President for Faculty Affairs (OVP). The process for this formal grievance is outlined in the Student Academic Grievance Policy.

Student Complaints

A complaint is a concern or grievance regarding a policy or procedure that has been inappropriately or unjustly applied or a violation of an institutional principle or policy. Augusta University seeks to resolve concerns and complaints in a fair and prompt manner. When appropriate, students should initially seek to resolve concerns within the office or department from which the concern originates. The personnel of those offices possess the qualifications, experience, and knowledge to manage resolution process as well as to work in a collaborative and confidential manner. If a resolution is not reached, students can file a written Student Complaint with the Office of the Dean of Students.

Students who wish to dispute an assigned grade, or appeal actions or decisions of faculty members in the context of an academic course, are to follow the Student Academic Grievance Policy. Students who wish to appeal an administrative decision which bears on their academic career, are to follow the Student Academic Appeals Policy.

Concerns related to a compliance issue can be filed anonymously through the Ethics Reporting Hotline. Before pursuing external options, including appeals to the University System of Georgia, exhaust all internal Augusta University avenues of complaint resolutions.

Augusta University participates in the National Council for State Authorization Reciprocity Agreement (NC-SARA), allowing us to offer online programs to students outside Georgia. Membership in NC-SARA does not waive state-specific professional licensing requirements. Under U.S. Department of Education "Program Integrity" rules, each state must have a student complaint process for institutions receiving Title IV funds. In Georgia, GA-SARA oversees written and signed complaints against SARA-approved degree-granting institutions that remain unresolved at the institutional level. For details, see GA-SARA Student Complaint Rules. Students living outside of Georgia should submit complaints through the GA-SARA Online Student Complaint Form. The SARA student complaint process can be found [here](#).

Transfer Credit

Coursework must be validated as being academically rigorous for the appropriate level at which a student receives transfer credit. Accreditation by one of the following organizations is one of the evaluations of quality used: Middle States Commission on Higher Education, New England Association of Schools and Colleges Commission on Institutions of Higher Education, North Central Association of Colleges and Schools -The Higher Learning Commission, Northwest Commission on Colleges and Universities, Southern Association of Colleges and Schools Commission on Colleges, Western Association of Schools and Colleges Accrediting Commission for Senior Colleges and Universities. For institutions outside of the United States, such assurance is provided by an approved credentials evaluation service to which applicants submit their educational credentials.

Transfer Credit for Graduate Programs

The Graduate School

Transfer of graduate credit is never automatic; credits transferred do not reduce the residency requirement for any advanced degree. At the discretion of the Dean of The Graduate School of Augusta University (or Dean's designee) and the faculty of the major program, up to nine semester hours of credit toward a degree may be transferred with the exception of the Doctor of Philosophy degree PhD. The actual maximum number of credit hours allowed for transfer (0-9) is program specific. A request for credit transfer should be initiated by the student and their advisor, through the program's director.

Course work transferred to a degree program in The Graduate School must be relevant and applicable to the degree being sought. The individual applying for the transfer credit is responsible for providing the necessary documentation (i.e., course syllabi, transcripts, etc.) for the review. Course credit may be accepted for transfer if the:

- course content is equivalent to a course offered by the graduate program at Augusta University
- course was taken by the student within five years prior to the date of their projected enrollment
- student earned a grade of either "B" or higher or "pass"
- course is recommended for transfer by the graduate program and approved by the Graduate School dean.

Doctor of Philosophy (PhD) degree programs. A maximum of six credit hours is usually recommended but nine credit hours may be allowed in transfer from a master's degree. The transfer of any course work beyond the master's level is a matter for negotiation between the student, their advisory committee, their major department and the Dean of The Graduate School. In general, no more than a total of 20 semester hours may be transferred toward the PhD under any circumstances.

Colleges of Allied Health Sciences and College of Nursing

At the discretion of the Dean (or Dean's designee), these Colleges may allow a maximum of six credit hours of transfer of graduate credit except as noted below. Approved coursework must be taken within five years prior to date of student's projected enrollment.

The physician assistant program allows no transfer credit toward degree requirements.

The physical therapy program allows no transfer credit for physical therapy coursework completed at another institution.

The occupational therapy program will consider transfer credit of coursework completed within four years prior to student's projected date of enrollment.

College of Education and Human Development

For the Master of Arts in Teaching (MAT), up to nine semester hours of credit toward the degree may be transferred in consultation with the student, advisor, and the department chair of the discipline of the courses being considered.

Transfer Credit for Professional Programs

Dental College of Georgia (DCG)

The Dental College of Georgia does not normally accept advanced standing transfer students. However, in the event that a Georgia resident who has enrolled in a dental education program at another accredited U.S. institution cannot complete their dental education due to discontinuation of the program in which the student was initially enrolled, the Dean of the Dental College of Georgia may grant advanced standing admission to such a student provided the student has met the admission requirements for the Dental College of Georgia at Augusta University, and was in good standing at the time the program was discontinued.

Medical College of Georgia (MCG)

Students currently enrolled and are in good standing at other Liaison Committee on Medical Education (LCME) medical schools will be considered for transfer admission with advance standing to the second and third year classes of MCG only when there are compelling reasons for the transfer and only on a space available basis. Courses taken at the student's first institution will be evaluated and transfer credit will be awarded on a course by course basis. Students accepted as advanced standing transfers under these circumstances may be required to study on an altered or modified curriculum and may be required to repeat courses taken at the student's first institution.

Appeal Process

Appeals regarding transfer credit shall be handled in accordance with the Student Academic Appeals Policy.

Visiting Students and Cross-Registered Students

At Augusta University, students must be in good standing and must obtain prior approval to enroll in any and all credit courses at any other institution as a visiting or cross-registered student. This prior approval of each course must be obtained from the Augusta University department or college that offers a course most comparable to the one that will be taken elsewhere. A **visiting student** is defined as a degree candidate at Augusta University who is granted the privilege of temporary registration at another institution and will not be enrolled at Augusta University during that period of temporary registration. A **cross-registered student** is defined as a degree candidate at Augusta University who is granted the privilege of enrolling at both Augusta University and another institution during a semester.

Withdrawal

Students may add or drop courses from their course schedules, provided they do so by the published deadline. Thereafter, they may withdraw from courses up to midterm. After midterm, students may withdraw from courses without penalty up to the last day to receive a "W," as published in the **Academic Calendar**. Following this deadline, students who withdraw from courses will receive a "WF" grade, unless an exception is approved in accordance with institutional withdrawal procedures, including approved medical, hardship,

or military withdrawals. The WF grade will count as an F grade for purposes of institutional grade point average calculation.

The responsibility for initiating a withdrawal resides with the student. A student who registers for a course and stops attending class (or never attends class) is not automatically withdrawn by the instructor and is subject to receiving a grade of "WF" or "F" for the course. However, an instructor may withdraw a student for excessive absences.

Forms for initiating a withdrawal may be obtained from the Office of the Registrar's website. A student should consult with their advisor before withdrawing from a course. Students must obtain the signature of the instructor to officially withdraw from a course. Students in The Graduate School programs must also have approval from the dean of The Graduate School. Once the withdrawal request has been received by the Office of the Registrar, the official date of withdrawal will be the date the student initiated the request.

Withdrawal with Option to Return

Registration in each grading period indicates that a student is making progress toward their enrollment objective. Students who plan to take a semester or more off from what is required by their official approved program curriculum should request a withdrawal with the option to return from The Graduate School Dean, through their program director, using the **Withdrawal Form**. Withdrawal requests may be for absences no more than three consecutive semesters in length. The semester in which the student withdraws is considered semester one. Students withdrawn (with the option to return) less than three consecutive semesters will be required to be reactivated. Such reactivation requests must be specifically approved by The Graduate School Dean using the **Reactivation Form**. Some programs may require a re-enrollment plan. A withdrawal does not modify a student's obligation to complete the degree within the maximum time limit allowed for that degree. Students must notify their program director and The Graduate School of their intent to return at least three weeks prior to the beginning of the semester (grading period) in which they plan to return, unless a longer period is specified by the program.

Students who have not enrolled in Augusta University for three consecutive semesters must apply for readmission through the Office of Academic Admissions using the online application process following published procedures and deadlines. Acceptance back into the program is not automatic.

Inactivation after Non-Attendance

A student who does not enroll for three consecutive terms will be classified as inactive by the Registrar. Re-enrollment after withdrawal is not automatic, and the individual will be required to re-apply for admission and be evaluated through the standard admissions process.

Medical Withdrawal

Students may request a **Medical Withdrawal** when the student experiences a medical emergency or serious health condition which prevents them from completing their course work for the current semester.

Hardship Withdrawal

Students may request a **Hardship Withdrawal** when they have experienced an unexpected occurrence in their life that requires that they withdraw from all classes for the semester. Students must apply for a hardship withdrawal with the Dean of Students Office prior to the last day of classes for the term they experienced the hardship. The last date to apply is by 5:00 PM on the last day of classes for the semester in which the student experienced the hardship. A hardship withdrawal can only be requested after the last day to withdraw without penalty.

Military Withdrawal

Students who are active duty military and receive reassignment orders that would prevent completion of the term may request a **Military Withdrawal**.

Dismissal and Withdrawal from The Graduate School and University with No Option to Return

Students who have been dismissed from a program or from The Graduate School, or have chosen to withdraw with no option to return, will not be eligible to return to the program or The Graduate School, whichever applies. A student withdrawing from their program and all courses in which they are currently enrolled must complete the **Withdrawal Form** to include all required signatures.

Colleges/Schools and Departments

Augusta University

Academic Affairs

Department of Military Science / Army ROTC

Department Overview

The Department of Military Science is also known as the Army Reserve Officers Training Corps (ROTC). ROTC is a way for young men and women to start strong in life. The college elective for undergraduate and graduate students that provides unrivalled leadership training for success in any career field. The Department of Military Science trains cadets to commission second lieutenants who demonstrate the potential to be agile, adaptive, and innovative tactical leaders capable of succeeding in complex situations.

Honors Program

Program Overview

The Augusta University Honors Program provides all motivated and high-potential learners the opportunity to enhance their undergraduate education.

The Honors curriculum encompasses three central educational goals—**knowledge, communication, and professionalism**—supported through creative core courses, unique interdisciplinary seminars, and mentored projects. The process of undergraduate research, scholarship, and creative activity culminates in an honors thesis. Throughout the program, Honors students receive advising, instruction, and mentoring from Honors staff and faculty and the support to present their findings at appropriate state, regional, and national conferences.

Office of First and Second Year Experiences

Program Overview

First Year and Second Year Experiences are designed to help students make the most of their college experience from the day they step on campus! FYE/SYE offers a variety of programs including Freshman Convocation, the Jaguar Jumpstart Learning Community, INQR 1000 *Design Your Life* course, Purpose and Pathway Book Clubs, Study Abroad for first and second year students, the Certificate of Leadership Program, two honor societies for Freshmen and Transfer Students, and campus wide events that recognize significant milestones to support all students from college to career. Our office, aka "the Treehouse" encourages all students to branch out and explore!

College of Allied Health Sciences

College Overview

The College of Allied Health Sciences at Augusta University was established as an administrative entity in 1968. Prior to this date, a Master of Science program in medical illustration and Bachelor of Science programs in health information management, medical technology and radiography had been active; in 1967, the dental hygiene program was initiated. Since then, programs in occupational therapy, physician assistant, nuclear medicine technology, respiratory therapy, physical therapy, radiation therapy, and public health were added. Subsequently, the College launched an academic program in nutrition with a dietetic internship. A doctorate of philosophy in applied health sciences was added in 2013. The College was later approved to offer a Bachelor of Science in Health Services degree. In 2023, the MPH and the PhD in Applied Health Sciences programs moved to the new School of Public Health, and most recently, the college was approved to begin a Speech-Language Pathology master's program at Augusta University. The first cohort of students will begin the fall of 2025. In regards to administrative changes, there were two departmental name changes in 2024. The Department of Interdisciplinary Health Sciences is now the Department of Nutrition and Dietetics. The Department of Undergraduate Health Professions is now titled the Department of Allied Health Professions. For Fall 2025, the college was approved to offer a concentration in Pre-Speech Language Pathology as a part of the Bachelor of Science in Health Services degree major, and the dental hygiene program was relocated to the Dental College of Georgia.

Located on the campus of Augusta University in Augusta, Georgia, the College's concentration on health sciences education and research offers students and faculty a rich environment for learning, discovering and caring. All of the programs are fully accredited, with outcomes such as 80-85% employment at graduation and >95% student retention.

Department of Nutrition and Dietetics

Department Overview

The department is comprised of faculty and staff who are focused on providing students with high-quality education while working on cutting-edge research projects.

Students practice with medical simulators, have access to state-of-the-art equipment, and train in highly reputable hospitals and medical centers locally and across the nation. All academic programs are top-ranked nationally and are accredited by national institutional agencies. Students are educated on important aspects of healthcare delivery such as ethics, patient communication, and teamwork.

Department of Physical Therapy

Department Overview

Physical therapy is a dynamic profession with an established theoretical and scientific base and widespread clinical applications in the restoration, maintenance, and promotion of optimal physical function.

Physical therapists are health care professionals that diagnose and manage movement dysfunction and enhance physical and functional abilities. Physical therapists (PTs) treat individuals of all ages, from newborns to the very oldest, who have medical problems or other health-related conditions that limit their abilities to move and perform functional activities in their daily lives.

An education in physical therapy allows individuals the opportunity to choose from a wide variety of career settings (including hospitals, private practices, educational institutions, work settings, nursing homes, and more). Physical therapists must be licensed in the state where they wish to practice. After completing an accredited doctoral physical therapy program, individuals must pass the National Physical Therapy Examination to become licensed.

Department of Physician Assistant

Department Overview

Physician Assistants (PAs) are highly trained healthcare providers who deliver patient-centered care across a wide range of settings. Students in our PA training program learn to evaluate patient signs and symptoms, screen for and diagnose illness, develop and implement management and treatment plans, provide preventive care, assist in operative environments, and support continuity of care over time. PAs are nationally certified and state-licensed providers, recognized as one of the three primary provider groups, alongside physicians and nurse practitioners.

PA education prepares graduates as medical generalists while opening pathways to diverse fields such as primary care, emergency medicine, surgery and surgical specialties, pediatrics, psychiatry, women's health, cardiology, dermatology, oncology, neurology, gastroenterology, critical care, and rural or underserved health. This breadth of training gives graduates the flexibility to adapt their career to their interests and to the evolving needs of patients and communities.

Department of Speech-Language Pathology

Department Overview

Our mission: To prepare students with the clinical acumen necessary for professional employment as an entry-level speech-language pathology clinician demonstrated by a collaborative therapeutic skillset to improve the quality of life of individuals with speech-language-communication and swallowing therapy needs.

Our vision: The vision of the new Master of Health Science in Speech-Language Pathology program at Augusta University is to be a leader of innovation and transformational learning by providing high impact experiential training within a diverse, interprofessional, academic, and clinical learning environment.

Our values: We honor our values of compassion, excellence, inclusivity, integrity, and leadership. We uphold these values—and their foundational principles like respect and social responsibility—by living them in the small actions we take in our day-to-day lives.

Department of English and World Languages

Department Overview

In the Department of English and World Languages (EWL), students are immersed in a liberal arts education that prioritizes the development of humane values and a passion for life-long learning. EWL students hone professional skills that prepare them for successful careers in diverse fields. Students gain intra-disciplinary knowledge and communicative proficiency in English and several world languages. Students develop an interdisciplinary understanding of literature and world cultures, as well as the race, gender, and class dynamics within these cultures. Through course offerings and co-curricular activities, EWL fosters the development of advanced reading, writing, critical thinking, and research skills.

Department of History, Anthropology, and Philosophy

Department Overview

The Department of History, Anthropology and Philosophy offers a dynamic education where students can choose from a wide array of courses about US and global history, historical archaeology and cultural anthropology, and contemporary and historical philosophy. History, Anthropology, and Philosophy are foundational academic disciplines, which provide training in analyzing and interpreting the human past, the complexity of human social patterns, and the enduring questions about who we are. The mission of the Department of History, Anthropology and Philosophy is to create critical thinkers, writers, and researchers. We focus on building contextualized knowledge of the world, through an exploration of the lives, problems, and legacy of real people and societies.

Department of Music

Department Overview

The Department of Music is a professional unit which regards music as both an art and a discipline. It recognizes the artistic values of creativity, experimentation, and music discrimination as well as the disciplinary attributes of scholarship, independent and critical thinking, self-motivation, skill development, and dedication. Musical performance is a vital component of all programs of study. Individualized instruction allows for a nurturing environment reflecting high regard for the musical legacies of the past as well as preparedness for the future. Graduates in music at Augusta University have gone on to careers as professional performers, public school music teachers, band directors, choral directors, and church musicians. Augusta University graduates have been accepted for graduate study at some of the most prestigious music schools in the country, including Indiana University, the University of North Texas, and the New England Conservatory.

The music unit provides intensive musical training on the collegiate level for musicians preparing for professions in music education, music performance, music history, conducting, music industry studies, and general studies in music, while serving non-music majors and music minors with a variety of offerings. Public school teachers are served through the offering of courses which satisfy the requirements for Staff Development Units. Persons of all ages in the community are encouraged to participate in musical activities through the Conservatory Program at Augusta University.

Department of Psychological Sciences

Department Overview

The Department of Psychological Sciences is dedicated to the understanding of behavior and the mind. Both the undergraduate and graduate programs provide opportunities to learn about the theoretical and empirical findings and the process by which information is

obtained. The degree programs focus on developing skill sets highly valued by employers and graduate programs: critical thinking, ethical integrity, professional development, social and cultural awareness, and communication. These experiences happen in the classroom as well as research labs and internships.

tpatton@augusta.edu

Department of Social Sciences

Department Overview

The Department of Social Sciences equips students to exercise political and social responsibility at the local, state, national, and international levels. The programs prepare undergraduates for advanced study in graduate and professional school in a variety of fields and careers in all levels of government, public administration, international relations, human services, and the private sector. We also value your time and resources so we have five-year two-in-one degree programs (the BA to MPA and the BA to MAISS).

Accelerated/Dual Degrees

- Accelerated Bachelor of Arts in Communication to Master of Arts in Intelligence and Security Studies with a Concentration in Social Influence
- Accelerated Bachelor of Arts in Communication to Master of Public Administration
- Accelerated Bachelor of Arts in Criminal Justice to Master of Arts in Intelligence and Security Studies
- Accelerated Bachelor of Arts in Criminal Justice to Master of Public Administration
- Accelerated Bachelor of Arts in Health, Society, and Policy to Master of Science in Epidemiology
- Accelerated Bachelor of Arts in History to Master of Arts in Intelligence and Security Studies
- Accelerated Bachelor of Arts in Integrated Studies to Master of Arts in Intelligence and Security Studies
- Accelerated Bachelor of Arts in Integrated Studies to Master of Public Administration
- Accelerated Bachelor of Arts in Political Science to Master of Arts in Intelligence and Security Studies
- Accelerated Bachelor of Arts in Political Science to Master of Public Administration
- Accelerated Bachelor of Science in Psychology to Master of Arts in Intelligence and Security Studies with a Concentration in Social Influence

Bachelor's

- Bachelor of Arts in Criminal Justice
- Bachelor of Arts in Health, Society, and Policy
- Bachelor of Arts in Political Science
- Bachelor of Arts in Political Science and a Secondary Teacher Certification
- Bachelor of Arts in Sociology
- Bachelor of Social Work

Master's

- Master of Arts in Intelligence and Security Studies
- Master of Arts in Intelligence and Security Studies with a Concentration in Social Influence
- Master of Arts in Intelligence and Security Studies with a Concentration in Technical Intelligence Analysis
- Master of Public Administration
- Master of Public Administration with a Concentration in Criminal Justice

Doctorates

- Doctor of Philosophy in Intelligence, Defense, and Cybersecurity Policy

Certificates

- Certificate of Less than One Year in Cultural Diversity in Healthcare
- Certificate of Less than One Year in European Union Studies
- Certificate of Less than One Year in Legal Studies
- Certificate of Less than One Year in National Security Studies
- Post-Baccalaureate Certificate in Epidemiological Intelligence
- Post-Baccalaureate Certificate in Intelligence Studies
- Post-Baccalaureate Certificate in Nonprofit Leadership
- Post-Baccalaureate Certificate in Social Influence
- Post-Baccalaureate Certificate in Urban Planning and Community Development

Minors

- Minor in Criminal Justice
- Minor in Gerontology
- Minor in International Studies
- Minor in Nonprofit Management
- Minor in Political Science
- Minor in Sociology
- Minor in Women's and Gender Studies

James M. Hull College of Business

College Overview

The James M. Hull College of Business is accredited by the Association to Advance Collegiate Schools of Business (AACSB) and offers the Bachelor of Business Administration and the Master of Business Administration degrees. Students pursuing the Bachelor of Business Administration degree may choose to major in accounting or choose a concentration in one of several areas: applied economic analysis, healthcare management, financial services, or digital marketing. Students may also choose a unique group of six business electives in lieu of a concentration to "customize" their BBA for a specific job or industry, with input from their academic advisor and program faculty. Additionally, the college offers a minor in accounting, business administration, and economics, as well as an undergraduate certificate in hospitality administration. Students pursuing the Master of Business Administration degree may choose the on-campus program, with or without the healthcare management concentration, or the Georgia WebMBA fully online program.

The Hull College of Business provides a high quality, student-focused education that prepares students to excel in their fields of study and become leaders on a global stage. The programs are highly desirable and develop graduates that are highly recruited. The faculty members advance scholarly understanding and improve the professional practice of our disciplines through collaborative research and service.

School of Computer and Cyber Sciences

College Overview

The School of Computer and Cyber Sciences was established in 2017 and is headquartered in the Hull-McKnight Georgia Cyber Center for Innovation and Training at Augusta University's Riverfront Campus. The vision of the School of Computer and Cyber Sciences is to be a comprehensive research college, achieving excellence in education, research, outreach & engagement in the fields of computer science, information technology, cybersecurity, and engineering. The school provides high-engagement, state-of-the-art technology education, and research across its disciplines.

The school offers undergraduate programs in computer science, information technology, cybersecurity, cyber operations, and cybersecurity engineering. The school offers masters programs in information security management and computer science, and a doctoral degree program in computer and cyber sciences. Additionally, the school offers several certificates in the field of cybersecurity.

Department of Computer Science

Department Overview

The Department of Computer Science offers comprehensive undergraduate and graduate programs in Computer Science, Cyber Operations, and Data Science. Our curriculum prepares students for high-demand careers, including software development, defensive cyber operations, data science, and research scientist roles. The Bachelor of Science in Computer Science is ABET-accredited. Augusta University is recognized as a Center of Academic Excellence in Cyber Defense and Cyber Operations by the National Security Agency (NSA), specifically highlighting our Bachelor of Science in Cyber Operations. Our faculty possess extensive teaching experience and conduct cutting-edge research in artificial intelligence, data science, software engineering, cybersecurity, formal methods, human-computer interaction, distributed and cloud systems, and high-performance computing.

Department of Information Systems and Security

Department Overview

The Department of Information Systems and Security offers comprehensive undergraduate and graduate programs in Information Technology and Cybersecurity. The curriculum is designed to equip students with the knowledge and skills necessary for in-demand careers such as systems analyst, web developer, cyber defense analyst, cyber defense incident responder, and cybersecurity manager. Augusta University is recognized as a Center of Academic Excellence in Cyber Defense and Cyber Operations by the National Security Agency (NSA) and other federal agencies—an honor that includes our Bachelor of Science in Cybersecurity. Our faculty bring extensive industry experience and active research in information systems, business, and cybersecurity.

Dental College of Georgia

College Overview

The Dental College of Georgia (DCG) provides dental education to the next generation of professionals by offering hands-on education through innovative research, patient care, and service.

The DCG was founded to provide the people of Georgia with quality dental care by educating students in dentistry. The DCG offers a four-year program leading to a Doctor of Dental Medicine degree. Advanced studies are also available through eight different dental residency programs and one internship program. In addition, a Bachelor's Degree in Dental Hygiene, Master's in Oral Biology, and Doctorate of Philosophy in Oral Biology and Maxillofacial Pathology are available.

Dental school requires intense focus, hard work and long hours, but Augusta University's dedicated faculty and staff are on hand to assist. Most students approach dental school as a full-time pursuit, but students with families, including those who pursue dentistry as a second career, have excelled at Augusta University. Balance and commitment are key.

Augusta University's numerous student organizations, as well as dental organizations for students, provide fun, service, camaraderie and inspiration. Some of these organizations emphasize fun or philanthropy; others provide an early start on networking and the opportunity to help shape the dental profession.

Department of Kinesiology

Department Overview

The Department of Kinesiology offers undergraduate and graduate degrees in Kinesiology, an undergraduate degree in Sports Management, and a post-baccalaureate certificate in Sports Coaching. We provide a dynamic and comprehensive path to success, whether you're interested in physical therapy, occupational therapy, the medical profession, athletic training, nutrition, sports management, or a range of other health and wellness professions. We offer a supportive and engaging environment for both undergraduate and graduate students.

Department of Research, Counseling, and Curriculum

Department Overview

The Department of Research, Counseling, and Curriculum (RCC) in COEHD is where passionate educators, counselors, and scholars turn a commitment to the public good into action. We offer graduate level programs in

- Master of Education (MEd) in Counselor Education (concentrations: a) Clinical Mental Health and b) School Counseling)
- Education Specialist (EdS) in Advanced Education Studies
- Doctor of Education in Educational Innovation (concentrations: a) Curriculum and Instruction, b) Educational Leadership, and c) Higher Education)

Coursework blends evidence-based learning with immersive experiences that prepare you to transform lives and communities. Our faculty's expertise in educational foundations, counseling, curriculum, and research methodology drives data informed advancements across the university. If you're ready to challenge the status quo and lead change, this is your academic home.

Department of Teaching and Leading

Department Overview

The Department of Teaching and Leading offers undergraduate and graduate level programs in teaching, educational leadership, and special education. Our faculty and staff are committed to high impact practice within the context of a caring community, and produce innovative research that seeks to address matters related to education, education policy, intellectual growth and moral development. Simply put, we are invested in developing good, decent, thoughtful people who can make our world a better place in which to live.

Based on standards from state and national accrediting agencies, best practices, and relevant research, the Department of Teaching and Leading programs emphasize what beginning and advanced professional educators should know and be able to do at the end of their undergraduate and graduate studies.

The Department of Teaching and Leading is committed to scholarship, service, and to providing: (1) an educational experience with the overriding objective of preparing undergraduate and graduate students to become effective educators and school leaders; and (2) partnership based field experiences that engage candidates in authentic educational learning opportunities.

The emphasis of the professional preparation program is on integrating scientific knowledge, pedagogical theory, skill acquisition, and application into a comprehensive educational experience. The educational program will be conducted in an atmosphere that is open, concerned, and responsive to the needs of students and the community.

To accomplish this goal the department collaborates with professional associations, local P-12 schools, and community organizations. Additionally, the department strives to ensure that the missions of the College of Education and Human Development and Augusta University are realized.

Medical College of Georgia

College Overview

The impact of the state of Georgia's only public medical school spans from its founding nearly 200 years ago, in 1828, as one of the nation's first medical schools to its current role optimizing health and health care in Georgia and beyond through education, discovery and service.

The Medical College of Georgia is one of the nation's largest medical schools by class size, with 300 plus students per class. The educational experience is anchored by the main campus in Augusta, a second four year campus in Savannah in partnership with Georgia Southern University, regional clinical campuses for third- and fourth-year students across the state, and a campus in Athens in partnership with the University of Georgia. MCG's expanding partnerships with physicians and hospitals across Georgia currently provides about 350 sites where students can experience the full spectrum of medicine, from complex care hospitals to small-town solo practices. MCG and its teaching hospitals also provide postgraduate education to more than 500 residents and fellows in 50 different Accreditation Council for Graduate Medical Education-approved programs.

Our researchers and clinicians focus on what most impacts the health of Georgia's and America's children and adults, including cardiovascular biology and disease, cancer, neurosciences and behavioral sciences, public and preventive health, regenerative and reparative medicine, personalized medicine, and genomics. Our physician faculty also share their expertise with physicians and patients at about 100 clinics and hospitals statewide.

Department of Biological Sciences

Department Overview

The Department of Biological Sciences seeks to stimulate an interest in scientific inquiry and the diversity of living organisms. They seek to equip students with skills necessary for future employment in various scientifically related fields or for further study at graduate and/or professional schools. Biology is the natural science concerned with the study of living organisms, including their structure, function, growth, origin, evolution, distribution, and taxonomy.

A broad education in the fundamentals of biology via the classroom setting and through hands-on learning in laboratories is provided. The department allows for specialized training by providing opportunities for students to participate in basic and applied research in ecology, genetics, microbiology, plant physiology, aquatic biology, cell and molecular biology, and more. The curriculum prepares students for graduate school and professional programs such as medicine, dentistry, veterinary medicine, pharmacy, and related fields. To enhance professional development and employment potential, faculty members encourage students to participate in undergraduate research opportunities to gain practical experience.

augusta.edu/scimath/biological-sciences

Department Administration

Department of Biological Sciences

706-737-1539

biology@augusta.edu

Department of Chemistry and Biochemistry

Department Overview

Chemistry and Biochemistry involve the study of the fundamental principles and materials of the world around us. The Bachelor of Science degrees in Chemistry allow students to develop the analytical and problem-solving skills that are universally sought by graduate schools, professional programs (such as medicine, dentistry, and pharmacy), as well as by employers. Chemistry graduates have the preparation to tackle many emerging world problems such as the development of new medicines and medical devices, energy advances and security, sufficient food and clean water for a growing population, eco-friendly chemistry and engineering, isolation, and characterization of natural products, and advanced novel materials. With the demand for scientifically literate college graduates as strong as ever, a solid foundation in chemistry is a must to stay on the cutting edge of nearly any science or medical field. Numerous opportunities to engage in undergraduate research allow our graduates to build strong resumes to be competitive for opportunities after graduation. Multiple concentrations allow students to match their educational path with career goals through specialized electives in medicinal chemistry, nuclear science, forensics, and biochemistry. The department also participates in the 3+4 pharmacy program with University of Georgia. The department houses an American Chemical Society approved chemistry degree, and this accreditation allows awarding of nationally recognized certificates to qualifying graduates.

augusta.edu/scimath/chemistry

Christopher A. Terry, PhD

706-737-1672

mathematics@augusta.edu

Department of Physics and Biophysics

Department Overview

Physics and Biophysics involves the study of fundamental principles in science and materials in the world around us. These degrees allow you to develop the analytical and problem-solving skills that are universally sought by graduate schools, professional programs (such as mechanical and electrical engineering, computer science, data science, medicine, dentistry, or pharmacy), as well as by employers. Physics graduates have the preparation to tackle many emerging world problems that require both detailed analysis and novel design approaches. Studies involve fundamental physical systems as well as applications in nuclear physics, materials, fluids and microfluids, electronics, optics, and biophysics. Students develop innovative research projects in courses, go on internships, and participate in research with the faculty. Student research engages in topics such as sensor development, cancer research, materials science, microfluidics, and nuclear physics. The skills developed are highly sought after for both continuing postgraduate studies or post-graduate employment. The diverse faculty in the department allows for developing of a valuable array of skills. Our graduates leave with a high rate of success in their chosen paths. The availability of selected concentrations, upper-level elective studies, and research allows students to match their educational path with their career goals.

The Graduate School

College Overview

The Graduate School (TGS) provides leadership, strategic vision, and oversight for many of Augusta University's graduate programs, along with dedicated services and support for both graduate students and faculty. TGS fosters an engaged and dynamic community in which students benefit from a variety of resources and opportunities for academic and professional development. Graduate faculty, representing all of Augusta University's colleges and schools, are selected for their excellence in research, scholarship, and teaching. They are dedicated to mentoring graduate students and cultivating supportive, collegial, and professional relationships. Through this collaborative and enriching environment, TGS offers a portfolio of programs designed to prepare innovative leaders, scholars, researchers, educators, and clinicians—empowering them to advance their fields and make meaningful contributions to their communities and beyond.

- Master of Science in Nutrition and Dietetics
- Master of Science in Biological and Computational Mathematics
- Master of Science in Biomolecular Science with a Concentration in Cell and Molecular Biology
- Master of Science in Biomolecular Science with a Concentration in Medicinal Chemistry
- Master of Science in Biostatistics
- Master of Science in Computer Science
- Master of Science in Data Science
- Master of Science in Epidemiology
- Master of Science in Cybersecurity Management and Technology
- Master of Science in Kinesiology
- Master of Science in Medical Illustration
- Master of Science in Medical Physiology
- Master of Science in Oral Biology
- Master of Science in Psychology with a Concentration in Applied Experimental
- Master of Science in Psychology with a Concentration in Clinical/Counseling
- Master of Science in Psychology with a Concentration in General Experimental

Certificate: Post-Baccalaureate

- Post-Baccalaureate Certificate in Public Health

Certificate: Post-Master's

- Post-Master's Certificate in Adult Gerontology Acute Care Nurse Practitioner
- Post-Master's Certificate in Psychiatric and Mental Health Advanced Nurse Practitioner

General Education/Core IMPACTS

General Education/Core IMPACTS

From the origins of intellectual study to the present, general education has been a key to a fulfilling life of self-knowledge, self-reflection, critical awareness, and lifelong learning. General education has traditionally focused on oral and written communication, quantitative reasoning and mathematics, studies in culture and society, scientific reasoning, and aesthetic appreciation. Today, general education also assists students in their understanding of technology, information literacy, diversity, and global awareness. In meeting all these needs, general education provides college students with their best opportunity to experience the breadth of human knowledge and the ways that knowledge in various disciplines is interrelated. In the University System of Georgia, the general education program is known as the Core Curriculum.

The USG Core Curriculum, Core IMPACTS, is designed to ensure that students acquire essential knowledge in foundational academic areas and develop career-ready competencies. The attainment of Core IMPACTS learning outcomes prepares responsible, reflective citizens who adapt constructively to change. The Core IMPACTS requirements impart knowledge, values, skills, and behaviors related to critical thinking, logical problem-solving, teamwork, time management, informational literacy, inquiry and analysis, intercultural competence, persuasion, and ethical reasoning. Core IMPACTS includes opportunities for interdisciplinary learning and experiences

that increase intellectual curiosity, providing the basis for advanced study in the variety of fields offered by today's colleges and universities.

As an institution of the University System of Georgia, Augusta University's faculty have carefully designed undergraduate programs which incorporate 60 hours of general education requirements approved by the Board of Regents of the University System of Georgia. The Core Curriculum provides some flexibility in which courses the student takes based on their individual interests; therefore, substitutions of courses from outside core curriculum or from other areas of the core curriculum are generally not permitted except under extraordinary circumstances.

Students should confer with their academic advisor to select the courses best suited for their intended major.

General Education Learning Outcomes

There are seven Core IMPACTS areas: Institutional Priority; **M**athematics and Quantitative Skills; **P**olitical Science and US History; **A**rts, Humanities, and Ethics; **C**ommunicating in Writing; **T**echnology, Mathematics, and Sciences; and **S**ocial Sciences.

institutional Priority

- Students will demonstrate the ability to think critically and solve problems related to academic priorities at their institution.

mathematics and Quantitative Skills

- Students will apply mathematical and computational knowledge to interpret, evaluate, and communicate quantitative information using verbal, numerical, graphical, or symbolic forms.

political Science and U.S. History

- Students will demonstrate knowledge of the history of the United States, the history of Georgia, and the provisions and principles of the United States Constitution and the Constitution of Georgia.

Arts, Humanities, and Ethics

- Students will effectively analyze and interpret the meaning, cultural significance, and ethical implications of literary/philosophical texts in English or other languages, or of works in the visual/performing arts.

communication in Writing

- Students will communicate effectively in writing, demonstrating clear organization and structure, using appropriate grammar and writing conventions.
- Students will appropriately acknowledge the use of materials from original sources.
- Students will adapt their written communications to purpose and audience.
- Students will analyze and draw informed inferences from written texts.

technology, Mathematics, and Sciences

- Students will use the scientific method and laboratory procedures or mathematical and computational methods to analyze data, solve problems, and explain natural phenomena.

social Sciences

- Students will effectively analyze the complexity of human behavior, and how historical, economic, political, social, or geographic relationships develop, persist, or change.

Core IMPACTS Requirements

Institutional Priority (Institution): 4 Hours

Academic Inquiry: 1 Hour

- INQR 1000 - Fundamentals of Academic Inquiry (1 Credit Hour)

Communication: 3 Hours

- COMM 1110 - Public Speaking (3 Credit Hours)

Mathematics and Quantitative Skills (Mathematics): 3 Hours

Students must enroll in a Mathematical and Quantitative Skills course, depending on placement, in their first semester at Augusta University unless they have received equivalent credit for a course via transfer or credit for prior learning. Students must continue to register for Mathematical and Quantitative Skills courses each successive semester until they have completed an appropriate course with a successful grade depending on degree requirements. Mathematical and Quantitative Skills courses should be completed within the first 30 hours of a student's undergraduate degree program.

Option I - Non-Science Majors:

Select one of the following:

- MATH 1001 - Quantitative Reasoning (3 Credit Hours) *(Not every Non-Science major can use this course. Please consult academic advisor for the appropriate course.)*
- MATH 1111 - College Algebra (3 Credit Hours)
- MATH 1113 - Precalculus Mathematics (3 Credit Hours)
- MATH 1401 - Elementary Statistics (3 Credit Hours)
- MATH 1401H - Honors: Elementary Statistics (3 Credit Hours)
- MATH 2011 - Calculus and Analytical Geometry I (4 Credit Hours) *(Note: 4th hour counted in non-core 60 hours.)*
- MATH 2011H - Honors: Calculus and Analytical Geometry I (4 Credit Hours) *(Note: 4th hour counted in non-core 60 hours.)*

Option II - Science Majors:

Applies to Biology, Chemistry, Computer Science, Mathematics, and Physics majors.

Select one of the following:

- MATH 1113 - Precalculus Mathematics (3 Credit Hours)
- MATH 2011 - Calculus and Analytical Geometry I (4 Credit Hours) *(Note: 4th hour counted in Field of Study Area or non-core 60 hours)*
- MATH 2011H - Honors: Calculus and Analytical Geometry I (4 Credit Hours) *(Note: 4th hour counted in Field of Study Area or non-core 60 hours)*

Option III - Health Science Majors:

Select one of the following:

- MATH 1111 - College Algebra (3 Credit Hours) *(Not every Health Science major can use this course; please consult with academic advisor for the appropriate course)*
- MATH 1113 - Precalculus Mathematics (3 Credit Hours)
- MATH 2011 - Calculus and Analytical Geometry I (4 Credit Hours) *(Note: 4th hour counted in Field of Study Area or non-core 60 hours)*

- MATH 2011H - Honors: Calculus and Analytical Geometry I (4 Credit Hours) (*Note: 4th hour counted in Field of Study Area or non-core 60 hours*)

Political Science and U.S. History (Citizenship): 6 Hours

Political Science: 3 Hours

- POLS 1101 - Introduction to American Government (3 Credit Hours)

History: 3 Hours

Select one of the following:

- HIST 2111 - United States to 1877 (3 Credit Hours)
- HIST 2112 - United States Since 1877 (3 Credit Hours)

Arts, Humanities, and Ethics (Humanities): 6 Hours

Select two of the following:

- ARAB 1001 - Elementary Modern Standard Arabic I (4 Credit Hours)
- ARAB 1002 - Elementary Modern Standard Arabic II (4 Credit Hours)
- ARAB 2001 - Intermediate Modern Standard Arabic I (4 Credit Hours)
- ARAB 2002 - Intermediate Modern Standard Arabic II (4 Credit Hours)
- ART 2010 - The Marvel of Art (3 Credit Hours)
- CHNS 1001 - Elementary Chinese I (3 Credit Hours)
- CHNS 1002 - Elementary Chinese II (3 Credit Hours)
- CHNS 2001 - Intermediate Chinese I (3 Credit Hours)
- CHNS 2002 - Intermediate Chinese II (3 Credit Hours)
- ENGL 2060 - Introduction to Literature (3 Credit Hours)
- ENGL 2111 - World Literature I (3 Credit Hours)
- ENGL 2112 - World Literature II (3 Credit Hours)
- ENGL 2121 - British Literature I (3 Credit Hours)
- ENGL 2122 - British Literature II (3 Credit Hours)
- ENGL 2131 - American Literature I (3 Credit Hours)
- ENGL 2132 - American Literature II (3 Credit Hours)
- FILM 1100 - Film Appreciation (3 Credit Hours)
- FREN 1001 - Elementary French I (3 Credit Hours)
- FREN 1002 - Elementary French II (3 Credit Hours)
- FREN 2001 - Intermediate French I (3 Credit Hours)
- FREN 2002 - Intermediate French II (3 Credit Hours)
- GRMN 1001 - Elementary German I (3 Credit Hours)
- GRMN 1002 - Elementary German II (3 Credit Hours)
- GRMN 2001 - Intermediate German I (3 Credit Hours)
- GRMN 2002 - Intermediate German II (3 Credit Hours)
- HUMN 2010 - Human Experience and Meaning (3 Credit Hours)
- MUSI 2320 - Rock n' Roll and Society (3 Credit Hours)
- MUSI 2340 - Music of the Spheres (3 Credit Hours)
- MUSI 2350 - The World of Film Music (3 Credit Hours)
- PHIL 2010 - Introduction to Philosophy (3 Credit Hours)
- PHIL 2020 - Introduction to Critical Thinking (3 Credit Hours)
- PHIL 2030 - Introduction to Ethics (3 Credit Hours)
- SPAN 1001 - Elementary Spanish I (3 Credit Hours)

- SPAN 1002 - Elementary Spanish II (3 Credit Hours)
- SPAN 2001 - Intermediate Spanish I (3 Credit Hours)
- SPAN 2002 - Intermediate Spanish II (3 Credit Hours)
- THEA 1100 - Theatre Appreciation (3 Credit Hours)

Communicating in Writing (Writing): 6 Hours

A grade of C or better is required in all Communicating in Writing area courses.

Students must enroll in ENGL 1101 in their first semester at Augusta University, unless they have received equivalent credit for the course via transfer or credit for prior learning. Students must continue to register for ENGL 1101 each successive semester until they have completed the course with a grade of C or better.

Students who complete ENGL 1101 must then enroll in ENGL 1102 no later than the first semester in which they enroll following completion of ENGL 1101. Students must continue to register for ENGL 1102 each successive semester until they have completed the course with a grade of C or better.

Both ENGL 1101 and ENGL 1102 should be completed within the first 30 hours of a student's undergraduate degree program.

- ENGL 1101 - College Composition I (3 Credit Hours) or ENGL 1101H - Honors College Composition I (3 Credit Hours)
- ENGL 1102 - College Composition II (3 Credit Hours) or ENGL 1102H - Honors College Composition II (3 Credit Hours)

Technology, Mathematics, and Sciences (STEM): 11 Hours

Option I - Non-Science Majors:

Laboratory Course Sequences: 8 Hours

Select two of the following:

- 1) ANTH 1105 - Introduction to Biological Anthropology (3 Credit Hours) and ANTH 1105L - Introduction to Biological Anthropology Laboratory (1 Credit Hour)
- 2) ASTR 1000 - Introduction to the Universe (4 Credit Hours)
- 3) BIOL 1101 - Fundamentals of Biology (3 Credit Hours) and BIOL 1101L - Fundamentals of Biology Laboratory (1 Credit Hour)
or BIOL 1107 - Principles of Biology I (3 Credit Hours) and BIOL 1107L - Principles of Biology I Laboratory (1 Credit Hour)
- 4) BIOL 1102 - Environmental Biology (3 Credit Hours) and BIOL 1102L - Environmental Biology Laboratory (1 Credit Hour)
or BIOL 1108 - Principles of Biology II (3 Credit Hours) and BIOL 1108L - Principles of Biology II Laboratory (1 Credit Hour)
- 5) CHEM 1151 - Survey of Chemistry I (4 Credit Hours)
or CHEM 1211 - Principles of Chemistry I (3 Credit Hours) and CHEM 1211L - Principles of Chemistry I Laboratory (1 Credit Hour)
- 6) CHEM 1152 - Survey of Chemistry II (4 Credit Hours)
or CHEM 1212 - Principles of Chemistry II (3 Credit Hours) and CHEM 1212L - Principles of Chemistry II Laboratory (1 Credit Hour)
- 7) GEOG 1112 - Introduction to Weather and Climate (4 Credit Hours)
- 8) GEOL 1121 - Introductory Geosciences I: Physical Geology (4 Credit Hours)
- 9) GEOL 1122 - Introductory Geosciences II: Historical Geology (4 Credit Hours)
- 10) PHSC 1011 - Physical Science (4 Credit Hours)
- 11) PHYS 1111 - Introductory Physics I (3 Credit Hours) and PHYS 1111L - Introductory Physics I Laboratory (1 Credit Hour)
or PHYS 2211 - Principles of Physics I (4 Credit Hours)
- 12) PHYS 1112 - Introductory Physics II (3 Credit Hours) and PHYS 1112L - Introductory Physics II Laboratory (1 Credit Hour)
or PHYS 2212 - Principles of Physics II (4 Credit Hours)

Additional Technology, Mathematics, or Science Course: 3 Hours

Select one additional course from those listed above or from the following:

- CHEM 1100 - Introductory Chemistry: Selected Topics (3 Credit Hours)
- DATA 1501 - Introduction to Data Science (3 Credit Hours)
- MATH 1113 - Precalculus Mathematics (3 Credit Hours)
- MATH 1401 - Elementary Statistics (3 Credit Hours)
- MATH 2011 - Calculus and Analytical Geometry I (4 Credit Hours) (Note: 4th credit hour counted in non-core 60 hours)
- MATH 2012 - Calculus and Analytical Geometry II (4 Credit Hours) (Note: 4th credit hour counted in non-core 60 hours)
- PHYS 1010 - Fundamentals of Physics: Selected Topics (3 Credit Hours)

Option II - Science Majors:

Laboratory Course Sequence: 8 Hours

Select one of the following laboratory course sequences:

Principles of Biology

- BIOL 1107 - Principles of Biology I (3 Credit Hours)
- BIOL 1107L - Principles of Biology I Laboratory (1 Credit Hour)
- BIOL 1108 - Principles of Biology II (3 Credit Hours)
- BIOL 1108L - Principles of Biology II Laboratory (1 Credit Hour)

Principles of Chemistry

- CHEM 1211 - Principles of Chemistry I (3 Credit Hours)
- CHEM 1211L - Principles of Chemistry I Laboratory (1 Credit Hour)
- CHEM 1212 - Principles of Chemistry II (3 Credit Hours)
- CHEM 1212L - Principles of Chemistry II Laboratory (1 Credit Hour)

Introductory Physics

- PHYS 1111 - Introductory Physics I (3 Credit Hours)
- PHYS 1111L - Introductory Physics I Laboratory (1 Credit Hour)
- PHYS 1112 - Introductory Physics II (3 Credit Hours)
- PHYS 1112L - Introductory Physics II Laboratory (1 Credit Hour)

Principles of Physics

- PHYS 2211 - Principles of Physics I (4 Credit Hours)
- PHYS 2212 - Principles of Physics II (4 Credit Hours)

Mathematics Course: 3 Hours

Select one of the following:

- MATH 2011 - Calculus and Analytical Geometry I (4 Credit Hours) (Note: 4th hour counted in Field of Study Area or non-core 60 hours)
- MATH 2012 - Calculus and Analytical Geometry II (4 Credit Hours) (Note: 4th hour counted in Field of Study Area or non-core 60 hours)
- MATH 1401 - Elementary Statistics (3 Credit Hours) (This option is only available to Biology majors)

Option III - Health Science Majors:

For all health science majors, with the exception of the Bachelor of Science in Health Information Administration, which follows Option I.

Laboratory Course Sequence: 8 Hours

Select one of the following laboratory course sequences:

Introduction to Biology

- BIOL 1101 - Fundamentals of Biology (3 Credit Hours)
- BIOL 1101L - Fundamentals of Biology Laboratory (1 Credit Hour)
- BIOL 1102 - Environmental Biology (3 Credit Hours)
- BIOL 1102L - Environmental Biology Laboratory (1 Credit Hour)

Principles of Biology

- BIOL 1107 - Principles of Biology I (3 Credit Hours)
- BIOL 1107L - Principles of Biology I Laboratory (1 Credit Hour)
- BIOL 1108 - Principles of Biology II (3 Credit Hours)
- BIOL 1108L - Principles of Biology II Laboratory (1 Credit Hour)

Survey of Chemistry

- CHEM 1151 - Survey of Chemistry I (4 Credit Hours)
- CHEM 1152 - Survey of Chemistry II (4 Credit Hours)

Principles of Chemistry

- CHEM 1211 - Principles of Chemistry I (3 Credit Hours)
- CHEM 1211L - Principles of Chemistry I Laboratory (1 Credit Hour)
- CHEM 1212 - Principles of Chemistry II (3 Credit Hours)
- CHEM 1212L - Principles of Chemistry II Laboratory (1 Credit Hour)

Introductory Physics

- PHYS 1111 - Introductory Physics I (3 Credit Hours)
- PHYS 1111L - Introductory Physics I Laboratory (1 Credit Hour)
- PHYS 1112 - Introductory Physics II (3 Credit Hours)
- PHYS 1112L - Introductory Physics II Laboratory (1 Credit Hour)

Principles of Physics

- PHYS 2211 - Principles of Physics I (4 Credit Hours)
- PHYS 2212 - Principles of Physics II (4 Credit Hours)

Additional Mathematics or Science Course: 3 Hours

Select one additional course from those listed above or from the following:

- CHEM 1100 - Introductory Chemistry: Selected Topics (3 Credit Hours)

- MATH 1113 - Precalculus Mathematics (3 Credit Hours)
- MATH 1401 - Elementary Statistics (3 Credit Hours)
- MATH 2011 - Calculus and Analytical Geometry I (4 Credit Hours) (Note: 4th hour counted in non-core 60 hours)
- MATH 2012 - Calculus and Analytical Geometry II (4 Credit Hours) (Note: 4th hour counted in non-core 60 hours)
- PHYS 1010 - Fundamentals of Physics: Selected Topics (3 Credit Hours)

Social Sciences (Social Sciences): 6 Hours

First Social Science Course: 3 Hours

Select one of the following:

- ANTH 2011 - Cultural Anthropology (3 Credit Hours)
- ECON 1101 - Economics of Financial Literacy (3 Credit Hours)
- PSYC 1101 - Introduction to General Psychology (3 Credit Hours)
- SOCI 1101 - Introduction to Sociology (3 Credit Hours)

Second Social Science Course: 3 Hours

Select one of the following not already taken above:

- ANTH 1102 - Introductory Anthropology (3 Credit Hours)
- ANTH 2011 - Cultural Anthropology (3 Credit Hours)
- ECON 1101 - Economics of Financial Literacy (3 Credit Hours)
- ECON 1810 - Introduction to Economics (3 Credit Hours)
- ECON 2105 - Macroeconomics (3 Credit Hours)
- ECON 2106 - Microeconomics (3 Credit Hours)
- GEOG 1111 - World Geography (3 Credit Hours)
- HIST 1111 - Pre-Modern World Civilization (3 Credit Hours)
- HIST 1112 - Modern World Civilization (3 Credit Hours)
- HIST 2111 - United States to 1877 (3 Credit Hours)
- HIST 2112 - United States Since 1877 (3 Credit Hours)
- POLS 2401 - Introduction to Global Issues (3 Credit Hours)
- PSYC 1101 - Introduction to General Psychology (3 Credit Hours)
- PSYC 2150 - Introduction to Human Diversity (3 Credit Hours)
- SOCI 1101 - Introduction to Sociology (3 Credit Hours)
- SOCI 1160 - Social Problems Analysis (3 Credit Hours)
- SOCI 2241 - Social and Cultural Diversity (3 Credit Hours)
- SOWK 1101 - Introduction to Social Work Practices (3 Credit Hours)

Core IMPACTS Total: 42 Hours

Field of Study: 18 Hours

The "Field of Study" requirement refers to courses taken by students that are directly related to their chosen major and are part of their general education curriculum. These courses are usually taken during the first two years of their degree program, alongside the Core IMPACTS courses. See specific undergraduate degree programs for details and requirements.

Core IMPACTS + Field of Study Total: 60 Hours

All Programs (A-Z)

Accelerated Bachelor of Arts in Communication to Master of Arts in Intelligence and Security Studies with a Concentration in Social Influence

Program Overview

This program is designed as a 4 +1 where students earn a Bachelor of Arts in Communication as well as a Master of Arts in Intelligence and Security Studies with a Concentration in Social Influence. The purpose of this accelerated option is to give students expertise in communication as well as into propaganda and information warfare within the national security landscape. Social influence and persuasion are heavily influenced by communication, especially through social media and digital content, and thus, the two options pair well together for the purpose of U.S. national security.

calbert@augusta.edu

Admissions Information

Students applying to this program must:

- Apply for the accelerated degree before their senior year
- Have completed at least 30 hours of coursework at Augusta University
- Have an overall cumulative undergraduate GPA of 3.0 or better
- Be within 30 semester hours of graduating with a BA in Communication
- Have written permission of the chair of the department of the undergraduate major to use the graduate level courses as acceptable substitutes to fulfill related requirements of the bachelor's degree
- Meet all requirements for admission into the MAISS program and be in good standing with the university (except for receipt of the undergraduate degree)
- Submit an application for admission in the spring semester of the junior year to the Accelerated Bachelor's-Master's Degree Program, along with all necessary admissions documentation to The Graduate School according to institutional policy

For more information on admissions requirements, visit the Office of Admissions website.

Progression and Graduation Requirements

Once accepted to the program, students must:

- Take the following three MAISS courses:
 - SECR 6168 - Cross-Cultural Security and Psychology (3 Credit Hours)
 - SECR 6920 - Weaponizing Information: The History and Theory of Propaganda (3 Credit Hours)
 - SECR 6982 - Information Warfare (3 Credit Hours)
- Graduate with the BA
- Continue with the MAISS to complete all other degree requirements
- Maintain a minimum 2.7 GPA in the MAISS program in order to graduate

Program Information

- Program Length: 5 Years
- CIP Code: 45.0999 0 International Relations and National Security Studies, Other.
- Attribute: BAMl

Dual Degree Requirements

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

- COMM 2000 - Writing for Communication Professionals (3 Credit Hours)
- COMM 2010 - Media Literacy (3 Credit Hours)
- COMM 2020 - Introduction to Research (3 Credit Hours)

Field of Study Electives: 9 Hours

Select any combination of the following:

- ANTH 1XXX or 2XXX
- ARAB 1XXX or 2XXX
- ART 1XXX or 2XXX
- CHNS 1XXX or 2XXX
- COMM 1XXX or 2XXX
- ENGL 1XXX or 2XXX
- FILM 1XXX or 2XXX
- FITH 1XXX or 2XXX
- FREN 1XXX or 2XXX
- GEOG 1XXX or 2XXX
- GERM 1XXX or 2XXX
- HIST 1XXX or 2XXX
- LDRS 1XXX or 2XXX
- PHIL 1XXX or 2XXX
- POLS 1XXX or 2XXX
- PSYC 1XXX or 2XXX
- SOCI 1XXX or 2XXX
- SOSC 1XXX or 2XXX
- SPAN 1XXX or 2XXX
- THEA 1XXX or 2XXX
- WGST 1XXX or 2XXX

Note: Transferred language courses not taught at Augusta University (i.e., LANG courses) may also count.

Undergraduate Major Courses: 15 Hours

- COMM 3000 - Theoretical Perspectives (3 Credit Hours)
- COMM 3010 - Advanced Public Speaking (3 Credit Hours)
- COMM 3020 - Writing for Multimedia Platforms (3 Credit Hours)
- COMM 3030 - Audiovisual Media Production (3 Credit Hours)
- COMM 3600 - Integrated Strategic Communication (3 Credit Hours)

Undergraduate Major Electives: 15 Hours

Select five of the following:

- COMM 3040 - Interpersonal Communication (3 Credit Hours)

- COMM 3060 - History of Mass Media (3 Credit Hours)
- COMM 3100 - Communications for Professionals (3 Credit Hours)
- COMM 3120 - Television Production (3 Credit Hours)
- COMM 3170 - Small Group Communication (3 Credit Hours)
- COMM 3180 - Television History (3 Credit Hours)
- COMM 3200 - Communication and Popular Culture (3 Credit Hours)
- COMM 3220 - Public Relations Writing (3 Credit Hours)
- COMM 3250 - Persuasion (3 Credit Hours)
- COMM 3300 - Introduction to Visual Communication (3 Credit Hours)
- COMM 3320 - Digital Editing (3 Credit Hours)
- COMM 3500 - Intercultural Communication (3 Credit Hours)
- COMM 3650 - Health Communication (3 Credit Hours)
- COMM 4000 - Communication Law and Ethics (3 Credit Hours)
- COMM 4010 - Preparing and Producing Visual Media (3 Credit Hours)
- COMM 4020 - Investigative Reporting (3 Credit Hours)
- COMM 4120 - Gender and Communication (3 Credit Hours)
- COMM 4300 - Visual Storytelling (3 Credit Hours)
- COMM 4320 - Public Relations and Social Media Campaigns (3 Credit Hours)
- COMM 4330 - Sports Event Communication and Media Relations (3 Credit Hours)
- COMM 4340 - Sports Communication (3 Credit Hours)
- COMM 4350 - Sports Media Production Practicum (3 Credit Hours)
- COMM 4360 - Advanced Sports Podcasting (3 Credit Hours)
- COMM 4370 - Esports Communication (3 Credit Hours)
- COMM 4400 - Media Editing and Production (3 Credit Hours)
- COMM 4950 - Advanced Special Topics in Communications (3 Credit Hours)
- COMM 4960 - Professional Internship (3 to 6 Credit Hours)
- COMM 4990 - Undergraduate Student Research (3 Credit Hours)
- SECR 6168 - Cross-Cultural Security and Psychology (3 Credit Hours)
- SECR 6920 - Weaponizing Information: The History and Theory of Propaganda (3 Credit Hours)
- SECR 6982 - Information Warfare (3 Credit Hours)

Undergraduate Free Electives: 27 Hours

To complete the requirements for the BA in Communication, students must also take 27 free elective hours, including 21 hours from 1000-4000 level academic courses and 6 hours from 3000-4000 level academic courses.

- Free Elective 1XXX, 2XXX, 3XXX, 4XXX (3 Credit Hours)
- Free Elective 1XXX, 2XXX, 3XXX, 4XXX (3 Credit Hours)
- Free Elective 1XXX, 2XXX, 3XXX, 4XXX (3 Credit Hours)
- Free Elective 1XXX, 2XXX, 3XXX, 4XXX (3 Credit Hours)
- Free Elective 1XXX, 2XXX, 3XXX, 4XXX (3 Credit Hours)
- Free Elective 1XXX, 2XXX, 3XXX, 4XXX (3 Credit Hours)
- Free Elective 1XXX, 2XXX, 3XXX, 4XXX (3 Credit Hours)
- Free Elective 3XXX or 4XXX (3 Credit Hours)
- Free Elective 3XXX or 4XXX (3 Credit Hours)

Undergraduate Capstone: 3 Hours

- COMM 4970 - Capstone (3 Credit Hours)

Shared Undergraduate/Graduate Courses: 9 Hours

- SECR 6168 - Cross-Cultural Security and Psychology (3 Credit Hours)

- SECR 6920 - Weaponizing Information: The History and Theory of Propaganda (3 Credit Hours)
- SECR 6982 - Information Warfare (3 Credit Hours)

Graduate Core Courses: 18 Hours

- SECR 6411 - Introduction to Intelligence Studies (3 Credit Hours)
- or SECR 6980 - Introduction to Cyber Intelligence and Cybersecurity Policy (3 Credit Hours)
- SECR 6412 - Intelligence Collection (3 Credit Hours)
- or SECR 6415 - Intelligence Analysis (3 Credit Hours)
- or SECR 6981 - Cyber Conflict: History and Theory of Cyber War (3 Credit Hours)
- SECR 6351 - Homeland Security (3 Credit Hours)
- or SECR 6906 - Terrorism Studies (3 Credit Hours)
- SECR 6600 - Research Design and Writing for Intelligence and Security Studies (3 Credit Hours)
- SECR 6910 - International Relations Theory (3 Credit Hours)
- SECR 6911 - Introduction to Security Studies (3 Credit Hours)

Graduate Concentration Courses: 12 Hours

- SECR 6168 - Cross-Cultural Security and Psychology (3 Credit Hours)
- SECR 6413 - Open-Source Intelligence (3 Credit Hours)
- SECR 6920 - Weaponizing Information: The History and Theory of Propaganda (3 Credit Hours)
- SECR 6982 - Information Warfare (3 Credit Hours)

Graduate Electives

- AIST 6359 - Legal Issues in Information Security (3 Credit Hours)
- AIST 6510 - Information Systems Security I (3 Credit Hours)
- AIST 6515 - Information Systems Security II (3 Credit Hours)
- ECON 6800 - National and International Economics for Management (3 Credit Hours)
- MGMT 6500 - Organizational Behavior (3 Credit Hours)
- MGMT 6510 - Managerial Leadership: Professional and Personal Development (3 Credit Hours)
- PADM 6020 - Geographic Information Systems for Public Management (3 Credit Hours)
- PADM 6150 - Leadership and Ethics (3 Credit Hours)
- QUAN 6600 - Business Analytics for Managers (3 Credit Hours)
- SECR 6168 - Cross-Cultural Security and Psychology (3 Credit Hours)
- SECR 6412 - Intelligence Collection (3 Credit Hours)
- SECR 6413 - Open-Source Intelligence (3 Credit Hours)
- SECR 6414 - Public Health and Medical Intelligence: Security and Civilian Principles and Applications (3 Credit Hours)
- SECR 6415 - Intelligence Analysis (3 Credit Hours)
- SECR 6650 - National Security and Public Policy (3 Credit Hours)
- SECR 6809 - Ethnic Conflict and Political Violence (3 Credit Hours)
- SECR 6810 - The Politics of Islam and International Security (3 Credit Hours)
- SECR 6813 - Environmental Issues in International Security (3 Credit Hours)
- SECR 6814 - Space and International Security (3 Credit Hours)
- SECR 6815 - Weapons of Mass Destruction and International Security (3 Credit Hours)
- SECR 6912 - Counterterrorism Studies (3 Credit Hours)
- SECR 6913 - Critical Security Studies (3 Credit Hours)
- SECR 6914 - Future Wars (3 Credit Hours)
- SECR 6915 - The Economics of International Security (3 Credit Hours)
- SECR 6917 - Democracy and Conflict (3 Credit Hours)

- SECR 6918 - Stability and Peacekeeping Operations (3 Credit Hours)
- SECR 6919 - The Psychology of Terrorism (3 Credit Hours)
- SECR 6920 - Weaponizing Information: The History and Theory of Propaganda (3 Credit Hours)
- SECR 6950 - Selected Topics in Intelligence and Security Studies (3 Credit Hours)
- SECR 6980 - Introduction to Cyber Intelligence and Cybersecurity Policy (3 Credit Hours)
- SECR 6981 - Cyber Conflict: History and Theory of Cyber War (3 Credit Hours)
- SECR 6982 - Information Warfare (3 Credit Hours)
- SECR 6983 - Hybrid Warfare (3 Credit Hours)
- SECR 7000 - Directed Readings in Intelligence and Security Studies (0 to 6 Credit Hours)

Graduate Capstone: 6 Hours

Select one of the following options:

- SECR 6997 - Capstone (0 to 6 Credit Hours)
- SECR 6998 - Thesis I (3 Credit Hours)
- and SECR 6999 - Thesis II (3 Credit Hours)
- SECR 6916 - The Causes and Prevention of War (3 Credit Hours)
- and any other SECR course (*courses not taken from Cyber/Intel above are recommended*) (3 Credit Hours)

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Dual Degree Total: 148 Hours

Accelerated Bachelor of Arts in Communication to Master of Public Administration

Program Overview

The Master of Public Administration (MPA) at Augusta University is the preferred degree for professionals working in government and the nonprofit sector. Accredited by the Network of Public Policy, Affairs, and Administration (NASPAA), the MPA degree is a versatile degree that allows students to advance their careers in numerous fields in the public sector, such as managing cybersecurity, economic development, criminal justice, city-county management, emergency management, and many others.

Progression and Graduation Requirements

For more information on admissions requirements, please visit the Office of Admissions website.

Students applying for this program must:

- Apply for the accelerated degree before their senior year
- Have completed at least 30 hours of coursework at Augusta University
- Have an overall cumulative undergraduate GPA of 3.0 or better
- Be within 30 semester hours of graduating with either a BA in communication
- Have written permission of the chair of the department of the undergraduate major to use the graduate level courses as acceptable substitutes to fulfill related requirements of the bachelor's degree (students must satisfy all prerequisites for those graduate courses)
- Meet all requirements for admission into the MPA program and be in good standing with the university (except for receipt of the undergraduate degree)
- Submit an application for admission in the spring semester of the junior year to the Accelerated Bachelor's-Master's Degree Program, along with all necessary admissions documentation to The Graduate School according to institutional policy

Once accepted to the program, students must:

- Take the following three MPA courses:
 - PADM 6000 - Survey of Public Administration (3 Credit Hours)
 - PADM 6600 - Analytical Tools for Decision Makers (3 Credit Hours)
 - PADM 6150 - Leadership and Ethics (3 Credit Hours)
- All three courses will count for towards both the BA and the MPA
- Graduate with the BA
- Continue with the MPA to complete all other degree requirements

Accelerated Bachelor of Arts in Health, Society, and Policy to Master of Science in Epidemiology

Program Overview

The BA in Health, Society, and Policy (HESP) to the MS in Epidemiology provide qualified students interested in health policy, health care, and epidemiology an accelerated route to earn both the BA degree and the MS degree within five years. Having an accelerated route provides students with a pipeline to future employment in health care and epidemiology.

The BA in HESP degree is a 124 credit hour undergraduate program. The MS in Epidemiology degree is a 36 credit hour graduate program, which is delivered completely online. Qualified students (see below for the program's requirements) will take four courses in the MS in Epidemiology program (12 credit hours) during their senior year as an undergraduate in the BA in HESP program. Three of the four courses will double count toward the BA and MS degrees. If students successfully complete their undergraduate courses and earn a B or higher in the MS in Epidemiology courses, then they will graduate with the BA in HESP and automatically transition into the MS in Epidemiology program. While finishing the BA in HESP program, tuition and fees will be at the undergraduate level.

Dual Degree Requirements

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

Foreign Language Sequence: 6 Hours

Select a two-course language sequence.

History Courses: 6 Hours

Select from the following:

- HIST 1111 - Pre-Modern World Civilization (3 Credit Hours)
- HIST 1112 - Modern World Civilization (3 Credit Hours)
- HIST 2111 - United States to 1877 (3 Credit Hours)
- HIST 2112 - United States Since 1877 (3 Credit Hours)

Other Courses: 6 Hours

Select from the following. A grade of C or better is required in these courses.

- ANTH 1102 - Introductory Anthropology (3 Credit Hours)
- ANTH 2011 - Cultural Anthropology (3 Credit Hours)

- ECON 1810 - Introduction to Economics (3 Credit Hours)
- GEOG 1111 - World Geography (3 Credit Hours)
- HIST 1111 - Pre-Modern World Civilization (3 Credit Hours)
- HIST 1112 - Modern World Civilization (3 Credit Hours)
- HIST 2111 - United States to 1877 (3 Credit Hours)
- HIST 2112 - United States Since 1877 (3 Credit Hours)
- HONR 1900 - Honors: Contemporary Issues (3 Credit Hours) (*with department approval*)
- MATH 1401 - Elementary Statistics (3 Credit Hours)
- MINF 2201 - Microcomputer Applications (3 Credit Hours)
- PHIL 2010 - Introduction to Philosophy (3 Credit Hours)
- PHIL 2020 - Introduction to Critical Thinking (3 Credit Hours)
- PHIL 2030 - Introduction to Ethics (3 Credit Hours)
- POLS 2401 - Introduction to Global Issues (3 Credit Hours)
- WGST 1101 - Introduction to Women's and Gender Studies (3 Credit Hours)

Undergraduate Major Courses: 28 Hours

Prerequisites

The following courses are required if not already taken as part of the core. A grade of C or better is required in these courses.

- HIST 1111 - Pre-Modern World Civilization (3 Credit Hours)
- HIST 1112 - Modern World Civilization (3 Credit Hours)
- HIST 2111 - United States to 1877 (3 Credit Hours)
- HIST 2112 - United States Since 1877 (3 Credit Hours)

Major Required Courses: 22 Hours

- HIST 3001 - Historical Research Methods (4 Credit Hours)
- HIST 3491 - Military History of the US (3 Credit Hours)
- or HIST 4451 - U.S. National Security and Foreign Policy, 1898-Present (3 Credit Hours)
- HIST 3220 - Modern China (3 Credit Hours)
- or HIST 3250 - Modern Japan (3 Credit Hours)
- HIST 3311 - Modern Russia (3 Credit Hours)
- or HIST 3341 - Modern Europe: War and Diplomacy (3 Credit Hours)
- or HIST 4391 - Twentieth Century Europe (3 Credit Hours)
- HIST 3111 - Modern Africa (3 Credit Hours)
- or HIST 3811 - Topics in the Islamic World (3 Credit Hours)
- HIST 3531 - History of Mexico (3 Credit Hours)
- or HIST 3571 - Topics in Latin America (3 Credit Hours)
- or HIST 3140 - History of Canada (3 Credit Hours)
- HIST 4011 - History of Women (3 Credit Hours)
- or HIST 4021 - History of Gender and Sexuality (3 Credit Hours)
- or HIST 4511 - Black Internationalism (3 Credit Hours)
- or HIST 4521 - The Long Civil Rights Movement (3 Credit Hours)

Major Elective Courses: 6 Hours

Select two additional courses from the following:

- HIST 3020 - 4999 (3 Credit Hours)
- HIST 3020 - 4999 (3 Credit Hours)

Undergraduate Concentration Courses: 15 Hours

Undergraduate Courses: 6 Hours

Select two of the following:

- ANTH 3817 - African Cultural Issues (3 Credit Hours)
- ANTH 3851 - Religion, Culture, and Society (3 Credit Hours)
- ANTH 3870 - Identity: Ethnicity, Gender, and Class (3 Credit Hours)
- ANTH 4021 - Violence and Warfare (3 Credit Hours)
- ANTH 4217 - Travelers, Migrants and Refugees (3 Credit Hours)
- POLS 3801 - International Relations (3 Credit Hours)
- POLS 4902 - World Politics (3 Credit Hours)

Shared Undergraduate/Graduate Courses: 9 Hours

Select three of the following, after admission to the MAISS program:

- SECR 6809 - Ethnic Conflict and Political Violence (3 Credit Hours)
- SECR 6810 - The Politics of Islam and International Security (3 Credit Hours)
- SECR 6906 - Terrorism Studies (3 Credit Hours)
- SECR 6910 - International Relations Theory (3 Credit Hours)
- SECR 6920 - Weaponizing Information: The History and Theory of Propaganda (3 Credit Hours)
- SECR 6981 - Cyber Conflict: History and Theory of Cyber War (3 Credit Hours)
- SECR 6982 - Information Warfare (3 Credit Hours)

Undergraduate Free Electives: 17 Hours

Select 17 hours of electives.

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Graduate Core Courses: 18 Hours

- SECR 6351 - Homeland Security (3 Credit Hours)
- or SECR 6650 - National Security and Public Policy (3 Credit Hours)
- SECR 6411 - Introduction to Intelligence Studies (3 Credit Hours)
- or SECR 6980 - Introduction to Cyber Intelligence and Cybersecurity Policy (3 Credit Hours)
- SECR 6809 - Ethnic Conflict and Political Violence (3 Credit Hours)
- or SECR 6810 - The Politics of Islam and International Security (3 Credit Hours)
- or SECR 6906 - Terrorism Studies (3 Credit Hours)

- SECR 6600 - Research Design and Writing for Intelligence and Security Studies (3 Credit Hours)
- SECR 6910 - International Relations Theory (3 Credit Hours)
- SECR 6911 - Introduction to Security Studies (3 Credit Hours)

Graduate Electives

- PADM 6020 - Geographic Information Systems for Public Management (3 Credit Hours)
- PADM 6150 - Leadership and Ethics (3 Credit Hours)
- SECR 6168 - Cross-Cultural Security and Psychology (3 Credit Hours)
- SECR 6412 - Intelligence Collection (3 Credit Hours)
- SECR 6413 - Open-Source Intelligence (3 Credit Hours)
- SECR 6414 - Public Health and Medical Intelligence: Security and Civilian Principles and Applications (3 Credit Hours)
- SECR 6415 - Intelligence Analysis (3 Credit Hours)
- SECR 6650 - National Security and Public Policy (3 Credit Hours)
- SECR 6809 - Ethnic Conflict and Political Violence (3 Credit Hours)
- SECR 6813 - Environmental Issues in International Security (3 Credit Hours)
- SECR 6814 - Space and International Security (3 Credit Hours)
- SECR 6815 - Weapons of Mass Destruction and International Security (3 Credit Hours)
- SECR 6912 - Counterterrorism Studies (3 Credit Hours)
- SECR 6913 - Critical Security Studies (3 Credit Hours)
- SECR 6914 - Future Wars (3 Credit Hours)
- SECR 6915 - The Economics of International Security (3 Credit Hours)
- SECR 6917 - Democracy and Conflict (3 Credit Hours)
- SECR 6918 - Stability and Peacekeeping Operations (3 Credit Hours)
- SECR 6919 - The Psychology of Terrorism (3 Credit Hours)
- SECR 6920 - Weaponizing Information: The History and Theory of Propaganda (3 Credit Hours)
- SECR 6950 - Selected Topics in Intelligence and Security Studies (3 Credit Hours)
- SECR 6980 - Introduction to Cyber Intelligence and Cybersecurity Policy (3 Credit Hours)
- SECR 6981 - Cyber Conflict: History and Theory of Cyber War (3 Credit Hours)
- SECR 6982 - Information Warfare (3 Credit Hours)
- SECR 6983 - Hybrid Warfare (3 Credit Hours)
- SECR 7000 - Directed Readings in Intelligence and Security Studies (0 to 6 Credit Hours)

Graduate Capstone: 6 Hours

Select one of the following options:

- SECR 6997 - Capstone (0 to 6 Credit Hours)
- SECR 6998 - Thesis I (3 Credit Hours)
- and SECR 6999 - Thesis II (3 Credit Hours)
- SECR 6916 - The Causes and Prevention of War (3 Credit Hours)
- and SECR XXXX - Elective (3 Credit Hours)

Dual Degree Total: 148 Hours

- Have an overall cumulative undergraduate GPA of 3.25 or better.
- Be within 30 semester hours of graduating with either a BA in Criminal Justice or a BA in Political Science (or other majors upon approval).
- Have written permission of the chair of the department of the undergraduate major to use the graduate level courses as acceptable substitutes to fulfill related requirements of the bachelor's degree (students must satisfy all prerequisites for those graduate courses).
- Meet all requirements for admissions into the MPA program and be in good standing with the university (except for receipt of the undergraduate degree and the completion of the GRE).
- Submit an application for admissions in the spring semester of the junior year to the BA to MPA program, along with all necessary admissions documentation to The Graduate School according to institutional policy.

Once accepted to the program, students must:

- Take the following courses during their senior year in both the BA and MPA program:
 - PADM 6000, PADM 6150, and PADM 6600
- Only count up to nine credit hours of MPA courses during dual enrollment toward both the BA and MPA requirements.
- Graduate with the BA.
- Continue with MPA degree to complete all other degree requirements.

Accelerated Bachelor of Science in Cell and Molecular Biology to Doctor of Dental Medicine

Program Overview

Augusta University offers a BS/DMD program which allows outstanding students the opportunity to achieve both their BS and DMD in only seven years. Only new freshmen students are eligible to apply to the program. In this program, students will spend their first three years in pursuit of the Bachelor of Science with a Major in Cell and Molecular Biology through the Department of Biological Sciences in

the College of Science and Mathematics (CSM). In their fourth year, students will begin their four-year program in dental medicine through the Dental College of Georgia (DCG) to earn their Doctor of Dental Medicine. Courses taken in the first year of dental program will be used to satisfy any remaining course requirements needed to complete the BS degree.

Admissions Information

For more information on admissions requirements, please visit the Office of Admissions website.

Progression and Graduation Requirements

- Students must maintain a minimum cumulative and science/mathematics GPA of 3.6 at the end of each of the first three years
- Students must be enrolled full-time with a target of 15 credit hours each semester in the courses prescribed by the program
- A grade of C or better is required in all courses
- Students are required to take courses in the prescribed sequence, and they do not have the option to take a course out of sequence or to repeat a course.
- Students will be evaluated in an ongoing manner to a standard consistent with a future career in dentistry. This standard will consist of core competencies characterized by interpersonal and communications skills, professionalism, practice-based learning and improvement, and more. These competencies are derived from the Accreditation Council for Graduate Medical Education and are modified to levels appropriate for the pre-professional student.
- Students must take the DAT no later than August 31 after the Sophomore year, and they must achieve scores of not less than the prior year's academic and perceptual DAT means of students matriculating into dental school
- All volunteer clinical service hours must be completed and documented by October 1 of the Junior year
- Students are required to complete a research paper due to the Program Manager by October 1 of their Junior year
- Application to dental school must be completed in AADSAS by September 1 of the Junior year
- DCG's secondary application must be completed by September 30 of the junior year
- Satisfactory completion of the ETS Major Field Test at the end of the Junior year

Undergraduate Degree Requirements

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

- BIOL 1107 - Principles of Biology I (3 Credit Hours)
- BIOL 1107L - Principles of Biology I Laboratory (1 Credit Hour)
- BIOL 1108 - Principles of Biology II (3 Credit Hours)
- BIOL 1108L - Principles of Biology II Laboratory (1 Credit Hour)
- CHEM 1211 - Principles of Chemistry I (3 Credit Hours)
- CHEM 1211L - Principles of Chemistry I Laboratory (1 Credit Hour)

- CHEM 1212 - Principles of Chemistry II (3 Credit Hours)
- CHEM 1212L - Principles of Chemistry II Laboratory (1 Credit Hour)

Plus select one of the following:

- BUSA 1105 - Introduction to Business and Professional Skills (3 Credit Hours)
- CSCI 1200 - Introduction to Computers and Programming (3 Credit Hours)
- CSCI 1210 - Introduction to Java Programming (3 Credit Hours)
- CSCI 1301 - Principles of Computer Programming I (4 Credit Hours)
- ENGL 2680 - Professional and Technical Writing (3 Credit Hours)
- KNHS 2300 - Introduction to Medical Terminology (3 Credit Hours)
- MATH 2011 - Calculus and Analytical Geometry I (4 Credit Hours)
- MILS 1021 - Basic Leadership (3 Credit Hours)
- MILS 2011 - Individual Leadership Studies (3 Credit Hours)
- MILS 2021 - Leadership and Teamwork (3 Credit Hours)
- MINF 2201 - Microcomputer Applications (3 Credit Hours)
- Foreign Language Course (3 Credit Hours)

Major Courses: 41-42 Hours

The following courses are required. The remaining Major Courses hours will come from courses taken during the first year of dental school for the Doctor of Dental Medicine.

- BIOL 3200 - Genetics (3 Credit Hours)
- BIOL 3400 - Cell Biology (3 Credit Hours)
- BIOL 3500 - Microbiology (4 Credit Hours)
- BIOL 3700 - Molecular Biology Laboratory (3 Credit Hours)
- BIOL 4700 - Advanced Cell Biology (3 Credit Hours)

Plus select one of the following:

- BIOL 4720 - Principles of Pharmacology (3 Credit Hours)
- BIOL 4730 - Immunology (3 Credit Hours)
- BIOL 4740 - Molecular Pathogenesis (4 Credit Hours)
- BIOL 4750 - Developmental Biology (4 Credit Hours)
- BIOL 4780 - Molecular Carcinogenesis (3 Credit Hours)

Upper-Division Electives: 8 Hours

- CHEM 3411 - Organic Chemistry I (3 Credit Hours)
- CHEM 3411L - Organic Chemistry I Laboratory (1 Credit Hour)
- CHEM 3412 - Organic Chemistry II (3 Credit Hours)
- CHEM 3412L - Organic Chemistry II Laboratory (1 Credit Hour)

Electives: 17-21 Hours

As needed to complete the credit hours required for graduation.

Required Lower-Division Courses: 19 Hours

- BIOL 2251 - Anatomy and Physiology I (3 Credit Hours)
- BIOL 2252 - Anatomy and Physiology II (3 Credit Hours)

The following courses may be used as part of the Core IMPACTS requirements:

- MATH 1401 - Elementary Statistics (3 Credit Hours)
- PHYS 1111 - Introductory Physics I (3 Credit Hours)
- PHYS 1111L - Introductory Physics I Laboratory (1 Credit Hour)
- PHYS 1112 - Introductory Physics II (3 Credit Hours)
- PHYS 1112L - Introductory Physics II Laboratory (1 Credit Hour)
- PSYC 1101 - Introduction to General Psychology (3 Credit Hours)
- SOCI 1101 - Introduction to Sociology (3 Credit Hours)

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 121 Hours

Accelerated Bachelor of Science in Computer Science to Master of Science in Computer Science

Program Overview

The accelerated BS/MS in Computer Science is for students who are motivated to get both BS and MS in Computer Science in five years to be ready for the continuously growing job market in the field. This option allows students majoring in Computer Science, who meet certain criteria, the opportunity to apply 9 credit hours of graduate CS courses to both the 121 undergraduate degree required hours and the 30 MS degree required hours. This option allows students to complete both degree programs within 5 years.

<https://www.augusta.edu/ccs/programs.php>

Program Contact

Dr. Konstantin Busch, Professor, Chair of the Department of Computer Science

706-721-1110

ccs@augusta.edu

Admissions Information

A student may use up to 9 credit hours of graduate Computer Science courses to fulfill both the 121 undergraduate degree required credit hours and the 30 graduate degree required credit hours.

Students applying for this degree option must satisfy the following requirements:

1. Have completed at least 30 credit hours of coursework at Augusta University.
2. Have a minimum overall undergraduate GPA of 3.0.
3. Be within 31 credit hours of graduating with a BS in Computer Science (during their senior year).
4. Meet all requirements for admission into the MS Computer Science program and be in good standing with the university.
5. Have written permission of the Program Director of BS and MS Computer Science to use the graduate level courses as acceptable substitutes to satisfy related requirements of the Computer Science major requirement.
6. Apply as undergraduates through The Graduate School for admission to the Master's program in Computer Science during the Spring of their junior year by working closely with their undergraduate major advisor in the School of Computer and Cyber Sciences and the MS-Computer Science Program Director.
7. Must maintain a cumulative GPA of at least 3.00 for all graduate level courses once admitted to the MS program in Computer Science.
8. Must maintain a cumulative GPA of at least 3.00 for all undergraduate courses taken in the senior year (final year of undergraduate study).

Undergraduates will follow the standard application process for accelerated degree programs per Augusta University and The Graduate School.

Undergraduates will submit an application for admission to the accelerated BS to MS degree program in the spring semester of the junior year along with a copy of their AU transcript (JagTrax).

A standard accelerated schema for thesis and non-thesis tracks (semester by semester course of study) will be published in catalog/website; student specific schema will be approved by both Bachelor's and Master's programs and submitted with each application.

Undergraduates will indicate whether they will pursue the thesis or non-thesis track at the time of application.

Program Accreditation Information

The Bachelor of Science in Computer Science is accredited by ABET and accelerated students meet all of the requirements of this accredited program.

Progression and Graduation Requirements

1. Students in this degree option will be accepted into the accelerated program pathway in their senior year and begin taking up to 3 designated graduate level courses (they will still be enrolled in the BS program during the senior year). At the end of the spring of students' senior year, the BS program requirements will be completed, and the BS degree will be awarded. Students finish the MS program requirements in the following spring (of the fifth year) and the MS degree in Computer Science will be awarded at the end of their fifth year.
2. Students will pay undergraduate tuition and fees only during their fourth (senior) year while enrolled in the approved bachelor's–master's accelerated degree program, provided they meet the criteria to remain classified as undergraduates in an accelerated program.
3. Once they graduate with their bachelor's degree and are only enrolled in graduate courses as part of the MS-CS degree program, they will pay graduate tuition (and fees).
4. If a student leaves the program at the end of the fourth year as an undergraduate, the CSCI 7100 course, and the two CSCI/CYBR GRAD electives will be approved as substitutes for free electives, if they earned a grade of C or better and as determined by the Department of Computer Science.
5. Students should follow the current academic policy given in the SCCS and TGS Graduate Student Handbooks

- CSCI 4711 - Software Engineering (3 Credit Hours)
- CSCI 4712 - Senior Capstone Project (3 Credit Hours)

Major Emphasis Courses: 12 Hours

Select three CSCI courses from below:

- CSCI 4420 - Distributed and Mobile Systems (3 Credit Hours)
- CSCI 3430 - Artificial Intelligence (3 Credit Hours)
- CSCI 3600 - Internet Programming (3 Credit Hours)
- CSCI 4531 - Malware Analysis and Reverse Engineering (3 Credit Hours)
- CSCI 4532 - Hardware and Embedded Systems (3 Credit Hours)
- CSCI 4800 - Compiler Writing (3 Credit Hours)
- CSCI 4820 - Computer Graphics (3 Credit Hours)
- CSCI 4950 - Selected Topics (1 to 3 Credit Hours)
- CSCI 4990 - Undergraduate Research (1 to 3 Credit Hours)

Select one MATH course from below:

- MATH 4420 - Introduction to the Theory of Graphs (3 Credit Hours)
- MATH 4211 - Modern Abstract Algebra I (3 Credit Hours)
- MATH 4320 - Theory of Numbers (3 Credit Hours)
- MATH 4350 - Numerical Analysis (3 Credit Hours)
- MATH 3250 - Introduction to Statistics and Data Analysis (3 Credit Hours)
- MATH 3280 - Linear Algebra (3 Credit Hours)
- MATH 3710 - Combinatorics (3 Credit Hours)

Undergraduate Free Electives: 15 Hours

Select 15 hours from any non-WELL classes.

(9 Hours may be double-counted, 6 of the 9 Hours from undergraduate level free electives)

Shared Undergraduate/Graduate Courses: 9 Hours

- CSCI 7100 - Algorithm Analysis (3 Credit Hours) *(counting towards undergraduate elective for undergraduate degree)*
CSCI/CYBR Graduate Elective (counting towards undergraduate elective for undergraduate degree) (3 Credit Hours)
CSCI/CYBR Graduate Elective (counting towards undergraduate elective for undergraduate degree) (3 Credit Hours)

Graduate Core Courses: 6 Hours

- CSCI 7300 - Programming Languages (3 Credit Hours)
- CSCI 7340 - Machine Learning (3 Credit Hours)

Graduate Electives: 21 (Non-Thesis) or 12 Hours (Thesis)

Non-Thesis Track: Select 21 hours from the following, with approval from the program director:

- CSCI 6XXX-Computer Science Elective
- CSCI 7XXX-Computer Science Elective
- CYBR 6XXX-Cyber Studies Elective
- CYBR 7XXX-Cyber Studies Elective

Thesis Track: Select 12 hours from the following, with approval from the program director:

- CSCI 6XXX-Computer Science Elective
- CSCI 7XXX-Computer Science Elective
- CYBR 6XXX-Cyber Studies Elective
- CYBR 7XXX-Cyber Studies Elective

Thesis Track: 9 Hours

- CSCI 6900 - Introduction to Research (3 Credit Hours)
- CSCI 6910 - Master's Thesis Research (1 to 9 Credit Hours)

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Dual Degree Total: 151 Hours

Accelerated Bachelor of Science in Cybersecurity Engineering to Master of Science in Computer Science

Program Overview

The School of Computer and Cyber Sciences (SCCS) offers an accelerated BS/MS in Cybersecurity Engineering/Computer Science for students who are motivated to get both a BS in Cybersecurity Engineering and an MS in Computer Science in five years and be ready for the continuously growing job market or undertake research at the intersection of Cybersecurity and Computer Science. This option enables Cybersecurity Engineering majors who meet specific criteria to apply 9 credit hours of graduate Computer Science courses toward both the 129 credit hours required for their undergraduate degree and the 30 credit hours required for their MS degree. This also allows students to earn both a BS and an MS in a shorter timeframe (5 years instead of 6).

Program Contact

Dr. Konstantin Busch
706-721-1100
ccs@augusta.edu

Admissions Information

Students applying for this degree option must satisfy the following requirements:

- have completed at least 30 credit hours of coursework at Augusta University
- have a minimum overall undergraduate GPA of 3.3
- Have sufficient hours, either through extra courses, summer courses, AP, or other credit to reasonably expect to be able to have the needed 129 hours for the BS degree by the end of the fourth year
- be within 31 credit hours of graduating with a BS in Cybersecurity Engineering during the senior year
- meet all requirements (except GRE requirement) for admission into the MS Computer Science program and be in good standing with the university
- have written permission of the Program Coordinator of Cybersecurity Engineering and the Director of Graduate Studies to use the graduate level courses as acceptable substitutes to satisfy related requirements of the Cybersecurity Engineering major requirement

- students would apply to the Graduate School for admission to the Master's program in Computer Science during the Spring of their junior year (with GRE requirement waived) by working closely with their major advisors in the School of Computer and Cyber Sciences

For more information on admissions requirements, please visit the Office of Admissions website.

Progression and Graduation Requirements

- Maintain a cumulative GPA of at least 3.00 for all graduate level courses once admitted to the MS program in Computer Science
- Maintain a cumulative GPA of at least 3.00 for all undergraduate courses taken in the senior year
- Follow the current academic policy given in the departmental Graduate Student Handbook

Program Information

- Attribute: BSMS

Program Requirements

BS Program Requirements

- Bachelor of Science in Cybersecurity Engineering

MS Program Requirements

- Master of Science in Computer Science

Dual Degree Requirements

Students in this dual degree option enter the graduate program in their senior year (they will still be enrolled in the BS program during the senior year). At the end of the spring semester of students' senior year, the BS program requirements will be completed and the BS degree is awarded. Students finish the MS program requirements in the following spring (of the fifth year) and the MS degree in Computer Science will be awarded at the end of their fifth year.

Note: If students leave the program at the end of the fourth year, the courses CSCI 6100, CSCI 6531, and CSCI 6532 will be approved as substitutes for upper-division electives as determined by the School of Computer and Cyber Sciences.

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

- CENG 2001 - Introduction to Cybersecurity Engineering (3 Credit Hours)
- CSCI 1301 - Principles of Computer Programming I (4 Credit Hours)
- CSCI 1302 - Principles of Computer Programming II (3 Credit Hours)
- CSCI 2700 - Ethics in Computer Science (2 Credit Hours)
- CYBR 2600 - Introduction to Networking and Cyber Security (4 Credit Hours)
- Credit hours carried over MATH 2011 and MATH 2012 in the Core IMPACTS Requirements (2 Credit Hours)

Undergraduate Major Courses: 56 Hours

- AIST 3310 - Advanced Networking (3 Credit Hours)

- or AIST 3320 - TCP/IP Protocol Analysis (3 Credit Hours)
- AIST 3360 - Cellular and Mobile Technology (3 Credit Hours)
- CENG 4700 - Secure Design Engineering (3 Credit Hours)
- CENG 4712 - Senior Capstone Project (3 Credit Hours)
- CSCI 3030 - Mathematical Structures for Computer Science (3 Credit Hours)
- CSCI 3170 - Computer Organization (3 Credit Hours)
- CSCI 3271 - Operating System (3 Credit Hours)
- CSCI 3371 - Low-Level Programming Languages (3 Credit Hours)
- CSCI 3400 - Data Structures (3 Credit Hours)
- CSCI 4540 - Digital Forensics and Machine Learning (3 Credit Hours)
- CYBR 3100 - Introduction to Defensive Cyber Operations (3 Credit Hours)
- CYBR 3200 - Cyber Network Defense and Counter Measures (3 Credit Hours)
- MATH 3020 - Differential Equations (3 Credit Hours)
- MATH 3250 - Introduction to Statistics and Data Analysis (3 Credit Hours)
- MATH 3280 - Linear Algebra (3 Credit Hours)
- PHYS 3011 - Electronics I (4 Credit Hours)
- PHYS 3012 - Electronics II (4 Credit Hours)
- MATH Elective (3 Credit Hours)

Shared Undergraduate/Graduate Courses: 9 Hours

- CSCI 6100 - Cyber-Physical Systems (3 Credit Hours)
- CSCI 6531 - Malware Analysis and Reverse Engineering (3 Credit Hours)
- CSCI 6532 - Hardware and Embedded Systems (3 Credit Hours)

Graduate Core Courses: 15 Hours

- CSCI 6900 - Introduction to Research (3 Credit Hours)
- CSCI 7100 - Algorithm Analysis (3 Credit Hours)
- CSCI 7130 - Software Engineering (3 Credit Hours)
- CSCI 7500 - Theory of Computation (3 Credit Hours)
- CSCI 7954 - Advanced Topics in Cybersecurity (3 Credit Hours)

Graduate Electives: 6 Hours

Select from the following:

- CSCI 5420 - Mobile and Distributed Computing (3 Credit Hours)
- CSCI 5430 - Artificial Intelligence (3 Credit Hours)
- CSCI 5600 - Internet Programming (3 Credit Hours)
- CSCI 7300 - Programming Languages (3 Credit Hours)

- CSCI 7410 - Operating Systems (3 Credit Hours)
- CSCI 7420 - Human-Computer Interaction (3 Credit Hours)
- CSCI 7580 - Computer Architecture and Parallel Processing (3 Credit Hours)
- CSCI 7585 - High Performance Computing (3 Credit Hours)
- CSCI 7950 - Selected Topics (3 Credit Hours)

Thesis: 9 Hours

Take the following 3 times for 3 credit hours each time:

- CSCI 6910 - Master's Thesis Research (1 to 9 Credit Hours)

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Dual Degree Total: 147 Hours

Accelerated Bachelor of Science in Data Science to Master of Science in Data Science

Program Overview

The Department of Computer Science in the School of Computer and Cyber Sciences and the Department of Biostatistics, Data Science and Epidemiology in the School of Public Health jointly propose an accelerated BS/MS in Data Science for students who are motivated to get both a BS in Data Science and an MS in Data Science in five years and be ready for the continuously growing job market in Data Science. This option will allow students majoring in undergraduate Data Science, who meet certain criteria, the opportunity to apply 9 credit hours of graduate Data Science and Statistics courses to both the 124 undergraduate degree required hours and the 36 MS degree required hours. This option provides a great opportunity for Augusta University to increase undergraduate enrollment in Data Science (one of the STEM fields) and graduate enrollment in the Master's degree program in Data Science. This option is also an opportunity for recruiting and retaining excellent undergraduate students through the pipeline of getting both BS and MS in a shorter time (5 years versus 6 years).

Program Contact

Hongyan Xu
BDSE@augusta.edu

Admissions Information

The proposed accelerated BS/MS option is designed to allow Data Science undergraduate students to complete both the BS in Data Science and the MS in Data Science degrees in five years. A student may use up to 9 credit hours of graduate Statistics and/or Data Science courses to fulfill both the 124 undergraduate degree required hours and the MS degree required hours.

Students applying for this degree option must satisfy the following requirements:

1. Have completed at least 30 credit hours of coursework at Augusta University;
2. Have a minimum overall undergraduate GPA of 3.25;
3. Have sufficient hours, either through extra courses, summer courses, AP or other credit to reasonably expect to be able to have the needed 124 hours for the BS degree by the end of the fourth year;
4. Be within 31 credit hours graduating with a BS in Data Science during the senior year;
5. Meet all requirements for admission into the MS Data Science program and be in good standing with the university;
6. Have written permission of the Chair of the Department of Computer Science to use the graduate level courses as acceptable substitutes to satisfy related requirements of the data science BS requirement;
7. Students would apply to the Graduate School for admission to the Master's program in Data Science during the Spring of their junior year by working closely with their major advisors in the computer science department;
8. Students should maintain a cumulative GPA of at least 3.00 for all graduate level courses once admitted to the MS program in Data Science;
9. Students should maintain a cumulative GPA of at least 3.00 for all undergraduate courses taken at the senior year;
10. Students should follow the current academic policy given in the departmental Graduate Student Handbook.

For more information on admissions requirements, visit the Office of Admissions website.

Progression and Graduation Requirements

1. Students in this degree option will enter the graduate program in their senior year (they will still be enrolled in the BS program during the senior year). At the end of the spring of students' senior year, the BS program requirements will be completed and the BS degree will be awarded. Students finish the MS program requirements in the following spring (of the fifth year) and the MS degree in Data Science will be awarded at the end of their fifth year.
2. Students will pay undergraduate tuition during the 4th year as their primary academic program is still the baccalaureate program in mathematics.
3. Students will pay graduate tuition only during their 5th year.
4. If a student leaves the program at the end of the fourth year, the courses DATS 7100 , STAT 7630, and DATS 7510 will be approved as substitutes for upper division electives as determined by the Computer Science Department Chair.

Program Information

- Program Length: 5 Years

Program Requirements

BS Program Requirements

- Bachelor of Science in Data Science

MS Program Requirements

- Master of Science in Data Science

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Dual Degree Requirements

Field of Study Courses: 17 Hours

- AIST 2110 - Principles of Scripting (3 Credit Hours)
- MATH 2011 - Calculus and Analytical Geometry I (4 Credit Hours) (*One hour from Math 2011 counts*)
- MATH 2012 - Calculus and Analytical Geometry II (4 Credit Hours)
- CSCI 2700 - Ethics in Computer Science (2 Credit Hours)
- CYBR 2600 - Introduction to Networking and Cyber Security (4 Credit Hours)
- DASC 1302 - Data Science Programming II (3 Credit Hours) or CSCI 1302 - Principles of Computer Programming II (3 Credit Hours)

Undergraduate Major Courses: 33 Hours

- DASC 3400 - Data Structures and Algorithms (3 Credit Hours) *or* CSCI 3400 - Data Structures (3 Credit Hours)
- CSCI 3410 - Database Systems (3 Credit Hours)
- CSCI 3430 - Artificial Intelligence (3 Credit Hours)
- DASC 2030 - Mathematical Foundations of Data Science (3 Credit Hours)
- DASC 4712 - Data Science Capstone (3 Credit Hours)
- DASC 4740 - Data Mining (3 Credit Hours)
- DASC 4850 - Machine Learning (3 Credit Hours)
- MATH 3250 - Introduction to Statistics and Data Analysis (3 Credit Hours)
- MATH 3280 - Linear Algebra (3 Credit Hours)
- MATH 4251 - Probability and Statistics I (3 Credit Hours)

Undergraduate Electives: 12 Hours

Select four of the following:

- CSCI 4540 - Digital Forensics and Machine Learning (3 Credit Hours)
- CSCI 4711 - Software Engineering (3 Credit Hours)
- DASC 3230 - Data Security and Privacy (3 Credit Hours)
- DASC 4260 - Computer Vision (3 Credit Hours)
- DASC 4760 - Big Data and Analytics (3 Credit Hours)
- DASC 4851 - Deep Learning (3 Credit Hours)
- MATH 4252 - Probability and Statistics II (3 Credit Hours)
- MATH 4420 - Introduction to the Theory of Graphs (3 Credit Hours)
- PHYS 3260 - Computational Physics (3 Credit Hours)

Free Electives: 16 Hours

Select 16 hours from any non-WELL courses.

Shared Undergraduate/Graduate Courses: 9 Hours

- DATS 7100 - Introduction to Statistical Models (3 Credit Hours)
- DATS 7510 - Programming for Data Analysis (3 Credit Hours)
- STAT 7630 - Applied Linear Models (3 Credit Hours)

Graduate Core Courses: 21 Hours

- DATS 7530 - Computing for Data Science (3 Credit Hours)
- STAT 7670 - Modern Methods of Multivariate Analysis (3 Credit Hours)
- DATS 7760 - Data and Visual Analytics (3 Credit Hours)
- DATS 7860 - Statistical and Machine Learning for Big Data (3 Credit Hours)
- DATS 7100 - Introduction to Statistical Models (3 Credit Hours)
- DATS 7510 - Programming for Data Analysis (3 Credit Hours)
- STAT 7630 - Applied Linear Models (3 Credit Hours)

Graduate Electives: 9 Hours

Select 9 hours from:

- STAT 7750 - Introduction to Genetic Analysis (3 Credit Hours)
- STAT 7850 - Omics Data Analysis (3 Credit Hours)
- STAT 8150 - Advanced Genomic Data Analysis (3 Credit Hours)
- CYBR 6250 - Scripting and Automation for Cybersecurity (3 Credit Hours)
- CYBR 6400 - Digital Forensics (3 Credit Hours)

Capstone Project: 6 Hours

- DATS 7900 - Capstone Project in Data Science (3 to 6 Credit Hours)

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Dual Degree Total: 157 Hours

Accelerated Bachelor of Science in Kinesiology with a Concentration in Health Science or Exercise and Sports Science to Master of Science in Kinesiology

Program Overview

The Master of Science in Kinesiology (MSK) is designed to advance students' knowledge and experience in exercise science, health, physical activity, and sports coaching. The degree is comprised of two distinct tracks/options: non-thesis (comprehensive exams and internship) and thesis (research paper and oral presentation/defense). The non-thesis track is offered 100% online and does not require students to be physically present on the Augusta University campus in order to complete the degree program. The thesis track is offered primarily online; however, it does require students to be physically present on the Augusta University campus for two semesters (typically the last two semesters of the degree program) to complete the applied research courses and related face-to face work.

Admissions Information

For more information on admissions requirements, please visit the Office of Admissions website.

Progression and Graduation Requirements

Once accepted to the program, students:

- Must take the following four MSK courses:
 - KNHS 6311 - Behavioral Aspects of Physical Activity (3 Credit Hours)
 - KNHS 6339 - Trends and Issues in Kinesiology and Health Sciences (3 Credit Hours)
 - KNHS 6411 - Motor Control and Learning (3 Credit Hours)
 - EDUC 6021 - Introduction to Educational Research (3 Credit Hours)
- May only count up to 12 hours of courses toward both the BSK and the MSK
- Graduate with a BSK
- Continue with the MSK to complete all other degree requirements

Program Information

- Master of Science in Kinesiology

Accelerated Bachelor of Science in Mathematics to Master of Science in Biostatistics

Program Overview

Students enroll in the mathematics BS program with a concentration in biostatistics. During their junior year, they apply for entrance into the MS program in Biostatistics and begin the MS program in their fourth year. Nine credit hours of coursework are counted toward both degrees. At the end of the spring of fourth year, the BS is completed. Students will then complete the MS in the spring of the fifth year.

Accelerated Bachelor of Science in Mathematics to Master of Science in Data Science

Program Overview

The Department of Mathematics in the College of Science and Mathematics and the School of Public Health jointly offer an accelerated BS in Mathematics/MS in Data Science for students who are motivated to get both a BS in Mathematics and an MS in Data Science in five years and be ready for the continuously growing job market in Data Science. This option allows students majoring in Mathematics -- who meet certain criteria -- the opportunity to apply 9 credit hours of graduate Data Science and Statistics courses to both the 124 undergraduate degree required hours and the 36 graduate degree required hours. Students pay undergraduate tuition during the 4th year as their primary academic program is still the baccalaureate program in mathematics. Students pay graduate tuition only during their fifth year.

Program Contact

Mathematics Department Chair: Dr. Seth Oppenheimer
706-737-1672
mathematics@augusta.edu

School of Public Health: Dr. Jie Chen
706-721-3278
jiechen@augusta.edu

Admissions Information

The accelerated BS/MS option is designed to allow Mathematics undergraduate students to complete both the BS in Mathematics and the MS in Data Science degrees in five years. A student may use up to 9 credit hours of graduate Statistics and/or Data Science courses to fulfill both the 124 undergraduate degree required hours and the MS degree required hours.

Students applying for this degree option must satisfy the following requirements:

1. Have completed at least 30 credit hours of coursework at Augusta University
2. Have a minimum overall undergraduate GPA of 3.25
3. Have sufficient hours, either through extra courses, summer courses, AP or other credit to reasonably expect to be able to have the needed 124 hours for the BS degree by the end of the fourth year
4. Be within 31 credit hours graduating with a BS in Mathematics during the senior year
5. Meet all requirements for admission into the MS Data Science program and be in good standing with the university
6. Have written permission of the Chair of the Department of Mathematics to use the graduate level courses as acceptable substitutes to satisfy related requirements of the math major requirement
7. Students would apply to the Graduate School for admission to the Master's program in Data Science during the Spring of their junior year (with GRE requirement waived) by working closely with their major advisors in the mathematics department
8. Students should maintain a cumulative GPA of at least 3.00 for all graduate level courses once admitted to the MS program in Data Science
9. Students should maintain a cumulative GPA of at least 3.00 for all undergraduate courses taken at the senior year
10. Students should follow the current academic policy given in the departmental Graduate Student Handbook

For more information on admissions requirements, visit the Office of Admissions website.

Progression and Graduation Requirements

1. Students in this degree option will enter the graduate program in their senior year (they will still be enrolled in the BS program during the senior year). At the end of the spring of students' senior year, the BS program requirements will be completed and the BS degree will be awarded. Students finish the MS program requirements in the following spring (of the fifth year) and the MS degree in Data Science will be awarded at the end of their fifth year.
2. Students will pay undergraduate tuition during the 4th year as their primary academic program is still the baccalaureate program in mathematics.
3. Students will pay graduate tuition only during their fifth year.
4. If a student leaves the program at the end of the fourth year, the courses STAT 7110, STAT 7630, and DATS 7510 will be approved as substitutes for upper division electives as determined by the Mathematics Department Chair.

Accelerated Bachelor of Science in Psychology to Master of Arts in Intelligence and Security Studies with a Concentration in Social Influence

Program Overview

This program is designed as a 4 +1 where students earn a Bachelor of Science in Psychology as well as a Master of Arts in Intelligence and Security Studies with a Concentration in Social Influence. The purpose of this accelerated option is to give students expertise in psychological sciences as well as into propaganda and information warfare within the national security landscape. Social influence and persuasion are heavily influenced by psychological sciences and thus, the two options pair well together for the purpose of U.S. national security.

calbert@augusta.edu

Admissions Information

Students applying to this program must:

- Apply for the accelerated degree before their senior year
- Have completed at least 30 hours of coursework at Augusta University
- Have an overall cumulative undergraduate GPA of 3.0 or better
- Be within 30 credit hours of graduating with a BS in Psychology
- Have written permission of the chair of the department of the undergraduate major to use the graduate level courses as acceptable substitutes to fulfill related requirements of the bachelor's degree
- Meet all requirements for admission into the MAISS program and be in good standing with the university (except for receipt of the undergraduate degree)
- Submit an application for admission in the spring semester of the junior year to the Accelerated Bachelor's-Master's Degree Program, along with all necessary admissions documentation to The Graduate School according to institutional policy

For more information on admissions requirements, visit the Office of Admissions website.

Progression and Graduation Requirements

Once accepted to the program, students must:

- Take the following two MAISS courses:
 - SECR 6168 - Cross-Cultural Security and Psychology (3 Credit Hours)
 - SECR 6911 - Introduction to Security Studies (3 Credit Hours)
- Take one of the following MAISS courses:
 - SECR 6919 - The Psychology of Terrorism (3 Credit Hours)
 - SECR 6982 - Information Warfare (3 Credit Hours)
- Graduate with the BS in Psychology
- Continue with the MAISS to complete all other degree requirements
- Maintain a minimum 2.7 GPA in the MAISS program in order to graduate

Dual Degree Requirements

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

Field of Study Required Courses: 9 Hours

A grade of C or better is required in all courses.

- PSYC 1101 - Introduction to General Psychology (3 Credit Hours)
- PSYC 2101 - Introduction to Psychology of Adjustment (3 Credit Hours)
- PSYC 2150 - Introduction to Human Diversity (3 Credit Hours)

Field of Study Electives: 9 Hours

Select the remaining 9 hours from the approved 1000-2000 courses. A grade of D or better required in these courses.

- ANTH 1102 - Introductory Anthropology (3 Credit Hours)
- ANTH 2011 - Cultural Anthropology (3 Credit Hours)
- CHEM 1211 - Principles of Chemistry I (3 Credit Hours)
- CHEM 1212 - Principles of Chemistry II (3 Credit Hours)
- CSCI 1200 - Introduction to Computers and Programming (3 Credit Hours)
- CRJU 1103 - Introduction to Criminal Justice (3 Credit Hours)
- ECON 1810 - Introduction to Economics (3 Credit Hours)
- ECON 2105 - Macroeconomics (3 Credit Hours)
- ECON 2106 - Microeconomics (3 Credit Hours)
- GEOG 1111 - World Geography (3 Credit Hours)
- GEOL 1122 - Introductory Geosciences II: Historical Geology (4 Credit Hours)
- HONR 1900 - Honors: Contemporary Issues (3 Credit Hours)
- MATH 1220 - Applied Calculus (3 Credit Hours)
- MATH 1401 - Elementary Statistics (3 Credit Hours)
- MILS 2011 - Individual Leadership Studies (3 Credit Hours)
- MILS 2021 - Leadership and Teamwork (3 Credit Hours)
- MINF 2201 - Microcomputer Applications (3 Credit Hours)
- PHIL 2010 - Introduction to Philosophy (3 Credit Hours)
- POLS 2000 - Society, Law, and the Criminal (3 Credit Hours)
- POLS 2401 - Introduction to Global Issues (3 Credit Hours)
- PSYC 2103 - Introduction to Human Development (3 Credit Hours)
- SOCI 1101 - Introduction to Sociology (3 Credit Hours)
- SOCI 1160 - Social Problems Analysis (3 Credit Hours)
- SOCI 2241 - Social and Cultural Diversity (3 Credit Hours)
- SOWK 1101 - Introduction to Social Work Practices (3 Credit Hours)
- SOWK 2100 - Social Welfare History and Philosophy (3 Credit Hours)
- WGST 1101 - Introduction to Women's and Gender Studies (3 Credit Hours)
- 2XXX - Foreign Language (3 Credit Hours)

Undergraduate Major Courses: 33 Hours

Foundation Courses: 9 Hours

A grade of C or better is required in all courses.

- PSYC 3190 - Ethical and Professional Foundations (1 Credit Hour) (*take prior to PSYC 3121*)
- PSYC 3121 - Quantitative Methods (4 Credit Hours) (*take prior to PSYC 3122*)
- PSYC 3122 - Research Methods (4 Credit Hours)

Advanced Theory Courses (Shared Undergraduate/Graduate Courses): 9 Hours

Select three of the following earning a grade of C or better in each:

- SECR 6168 - Cross-Cultural Security and Psychology (3 Credit Hours)
- SECR 6911 - Introduction to Security Studies (3 Credit Hours)
- SECR 6919 - The Psychology of Terrorism (3 Credit Hours)
- SECR 6982 - Information Warfare (3 Credit Hours)

Major Electives: 15 Hours

Select from the following PSYC 3000-4000 level courses. A grade of C or better is required in all courses. No more than 3 hours of credit to be counted in the major may come from undergraduate research (PSYC 4990), internship (PSYC 4960), independent study (PSYC 4950), and/or HONR 3999/4000. This policy does not apply to non-repetitive special topics courses which might carry a PSYC 3950 or PSYC 4950 designation.

- PSYC 3131 - Child and Adolescent Development (3 Credit Hours)
- PSYC 3133 - Adult Development and Aging (3 Credit Hours)
- PSYC 3140 - Theories of Personality (3 Credit Hours)
- PSYC 3143 - Mental Health and Psychopathology (3 Credit Hours)
- PSYC 3145 - Clinical Psychology (3 Credit Hours)
- PSYC 3160 - Sensation and Perception (3 Credit Hours)
- PSYC 3178 - Psychology Applied to the Workplace (3 Credit Hours)
- PSYC 3180 - Drugs and Behavior (3 Credit Hours)
- PSYC 3183 - Health Psychology (3 Credit Hours)
- PSYC 3188 - Human Sexuality (3 Credit Hours)
- PSYC 3950 - Selected Topics (1 to 5 Credit Hours)
- PSYC 4115 - History and Systems of Psychology (3 Credit Hours)
- PSYC 4125 - Psychological Tests and Measurement (3 Credit Hours)
- PSYC 4165 - Learning Principles and Applications (3 Credit Hours)
- PSYC 4168 - Cognitive Psychology (3 Credit Hours)
- PSYC 4173 - Social Psychology (3 Credit Hours)
- PSYC 4180 - Behavioral Neuroscience (3 Credit Hours)
- PSYC 4950 - Selected Topics (1 to 3 Credit Hours)
- PSYC 4960 - Undergraduate Internship (1 to 9 Credit Hours)
- PSYC 4990 - Undergraduate Research (1 to 9 Credit Hours)

Undergraduate Free Electives: 27 Hours

To complete the requirements for the BS in Psychology, students must also take 27 free elective hours, including 21 hours from 1000-4000 level academic courses and 6 hours from 3000-4000 level academic courses.

- Free Elective 1XXX, 2XXX, 3XXX, 4XXX (3 Credit Hours)
- Free Elective 1XXX, 2XXX, 3XXX, 4XXX (3 Credit Hours)
- Free Elective 1XXX, 2XXX, 3XXX, 4XXX (3 Credit Hours)
- Free Elective 1XXX, 2XXX, 3XXX, 4XXX (3 Credit Hours)

- Free Elective 1XXX, 2XXX, 3XXX, 4XXX (3 Credit Hours)
- Free Elective 1XXX, 2XXX, 3XXX, 4XXX (3 Credit Hours)
- Free Elective 1XXX, 2XXX, 3XXX, 4XXX (3 Credit Hours)
- Free Elective 3XXX or 4XXX (3 Credit Hours)
- Free Elective 3XXX or 4XXX (3 Credit Hours)

Graduate Core Courses: 18 Hours

- SECR 6411 - Introduction to Intelligence Studies (3 Credit Hours)
- or SECR 6980 - Introduction to Cyber Intelligence and Cybersecurity Policy (3 Credit Hours)
- SECR 6412 - Intelligence Collection (3 Credit Hours)
- or SECR 6415 - Intelligence Analysis (3 Credit Hours)
- or SECR 6981 - Cyber Conflict: History and Theory of Cyber War (3 Credit Hours)
- SECR 6351 - Homeland Security (3 Credit Hours)
- or SECR 6906 - Terrorism Studies (3 Credit Hours)
- SECR 6600 - Research Design and Writing for Intelligence and Security Studies (3 Credit Hours)
- or SECR 6910 - International Relations Theory (3 Credit Hours)
- or SECR 6911 - Introduction to Security Studies (3 Credit Hours)

Graduate Concentration Courses: 12 Hours

- SECR 6168 - Cross-Cultural Security and Psychology (3 Credit Hours)
- SECR 6413 - Open-Source Intelligence (3 Credit Hours)
- SECR 6920 - Weaponizing Information: The History and Theory of Propaganda (3 Credit Hours)
- SECR 6982 - Information Warfare (3 Credit Hours)

Graduate Electives

- AIST 6359 - Legal Issues in Information Security (3 Credit Hours)
- AIST 6510 - Information Systems Security I (3 Credit Hours)
- AIST 6515 - Information Systems Security II (3 Credit Hours)
- ECON 6800 - National and International Economics for Management (3 Credit Hours)
- MGMT 6500 - Organizational Behavior (3 Credit Hours)
- MGMT 6510 - Managerial Leadership: Professional and Personal Development (3 Credit Hours)
- PADM 6020 - Geographic Information Systems for Public Management (3 Credit Hours)
- PADM 6150 - Leadership and Ethics (3 Credit Hours)
- QUAN 6600 - Business Analytics for Managers (3 Credit Hours)
- SECR 6168 - Cross-Cultural Security and Psychology (3 Credit Hours)
- SECR 6412 - Intelligence Collection (3 Credit Hours)
- SECR 6413 - Open-Source Intelligence (3 Credit Hours)
- SECR 6414 - Public Health and Medical Intelligence: Security and Civilian Principles and Applications (3 Credit Hours)
- SECR 6415 - Intelligence Analysis (3 Credit Hours)
- SECR 6650 - National Security and Public Policy (3 Credit Hours)
- SECR 6809 - Ethnic Conflict and Political Violence (3 Credit Hours)
- SECR 6810 - The Politics of Islam and International Security (3 Credit Hours)
- SECR 6813 - Environmental Issues in International Security (3 Credit Hours)
- SECR 6814 - Space and International Security (3 Credit Hours)
- SECR 6815 - Weapons of Mass Destruction and International Security (3 Credit Hours)
- SECR 6912 - Counterterrorism Studies (3 Credit Hours)
- SECR 6913 - Critical Security Studies (3 Credit Hours)

- SECR 6914 - Future Wars (3 Credit Hours)
- SECR 6915 - The Economics of International Security (3 Credit Hours)
- SECR 6917 - Democracy and Conflict (3 Credit Hours)
- SECR 6918 - Stability and Peacekeeping Operations (3 Credit Hours)
- SECR 6919 - The Psychology of Terrorism (3 Credit Hours)
- SECR 6920 - Weaponizing Information: The History and Theory of Propaganda (3 Credit Hours)
- SECR 6950 - Selected Topics in Intelligence and Security Studies (3 Credit Hours)
- SECR 6980 - Introduction to Cyber Intelligence and Cybersecurity Policy (3 Credit Hours)
- SECR 6981 - Cyber Conflict: History and Theory of Cyber War (3 Credit Hours)
- SECR 6982 - Information Warfare (3 Credit Hours)
- SECR 6983 - Hybrid Warfare (3 Credit Hours)
- SECR 7000 - Directed Readings in Intelligence and Security Studies (0 to 6 Credit Hours)

Graduate Capstone: 6 Hours

Select one of the following options:

- SECR 6997 - Capstone (0 to 6 Credit Hours)
- SECR 6998 - Thesis I (3 Credit Hours)
- and SECR 6999 - Thesis II (3 Credit Hours)
- SECR 6916 - The Causes and Prevention of War (3 Credit Hours)
- and any other SECR course (*courses not taken from Cyber/Intel above are recommended*) (3 Credit Hours)

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Dual Degree Total: 148 Hours

Bachelor of Arts in Anthropology

Program Overview

Anthropology studies all aspects of human culture, past and present, including human biological and cultural diversity, human origins, the origins and development of cultural complexity, analyzing material artifacts, preserving heritage, and understanding and solving problems related to globalization and the multicultural environments it creates in business, healthcare, education, government, NGOs, etc. that individuals and societies must negotiate in the modern world.

Bachelor of Arts in Art

Program Overview

The Bachelor of Arts program is a broad-based studio concentration for students interested in art. With fewer requirements in studio arts, students have a great deal of flexibility to include a wide range of courses to suit their interests, including humanities, science, mathematics, social/behavioral classes or foreign languages.

augusta.edu/pamplin/art

Program Contact

Scott Thorp, MFA
706-667-4888
AUART@augusta.edu

Program Accreditation

The art and design unit is accredited by the National Association of Schools of Art and Design.

Admissions Information

For more information on admissions requirements, please visit the Office of Admissions website.

Progression and Graduation Requirements

- Portfolio Review: All art majors are required to submit their work for a review by all fulltime Department of Art and Design faculty after the completion of the following courses: ART 1211, ART 1520, ART 1530, and 12 additional hours of studio art courses (21 hours total). Portfolio reviews are scheduled at the end of the fall and spring semesters. Passing the portfolio review is a prerequisite for ART 4998 which is a graduation requirement. Portfolio review occurs on the day after the last day of class of the fall and spring semesters. Transfer students must meet this requirement with the provision that a minimum of three hours be done while in residency at the university and that the transfer courses for the remaining 18 hrs. be equivalent to the required courses listed above. Each student should submit a minimum of 15 studio works. These are to include both two-dimensional and three-dimensional works. See the Department of Art and Design for specific portfolio requirements.
- Senior Exhibition: The BA degree candidate is required to pass to graduate. The work for this exhibition must be accepted and judged by a fulltime Department of Art and Design faculty mentor and ART 4998 instructor as demonstrating significant quality and quantity to warrant the earning of the BA degree.

Select and fulfill the requirements of a minor in a different discipline than the major.

Free Electives: 3 to 6 Hours

As needed to complete the credit hours required for graduation. Select from any non-WELL courses.

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 121 Hours

Bachelor of Arts in Communication

Program Overview

The Bachelor of Arts degree in Communication includes coursework in oral, written, and mediated communication. Students complete a core of theory, writing, speaking, and audiovisual media production courses, select five elective courses from the major, and finish with a senior capstone seminar course/professional portfolio. Students also will complete twenty-seven hours of elective courses, which may include coursework for minors, certificates, additional degrees, or free elective courses. Many students also complete professional internships in related fields. Disciplines covered by the degree include communication studies, journalism, public relations, sports media, health communication, and digital media production.

Admissions Information

For more information on admissions requirements, please visit the Office of Admissions website.

Progression and Graduation Requirements

- Students must receive grades of C or better for COMM 2000, COMM 2010, and COMM 2020; and a grade of D or better for Field of Study electives, unless specified for a course sequence (e.g., a grade of C in SPAN 1001 is required for students to enroll in SPAN 1002).
- Grade of C or better is required for all major courses.

Program Information

- Program Length: 4 Years
- Academic Focus Area: Arts and Humanities [HUAR]
- CIP Code: 09.0101
- Program Code: 1BA-COMMUNIC
- Major Code: COMM

Degree Requirements

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

Grade of C or better is required in all Field of Study courses.

- COMM 2000 - Writing for Communication Professionals (3 Credit Hours)
- COMM 2010 - Media Literacy (3 Credit Hours)
- COMM 2020 - Introduction to Research (3 Credit Hours)

Electives: 9 Hours

Field of Study electives may be any combination of 1000-2000 level courses in the following areas: ANTH, ARAB, ART, CHNS, COMM, ENGL, FILM, FITH, FREN, GEOG, GERM, HIST, ILIT 1500, LDRS, PHIL, POLS, PSYC, SOCI, SOSC, SPAN, THEA, and WGST. Other transferred language courses not taught at Augusta University (i.e., LANG courses) may also count.

Notes:

- *Practicum and internship/practicum courses may be taken for no more than 3 units of total credit in Field of Study courses. Any additional units earned will be counted as elective credit.*
- *Students must receive grade of C or better for COMM 2000, COMM 2010, and COMM 2020; and a grade of D or better for Field of Study electives, unless specified for a course sequence (e.g., a grade of C in SPAN 1001 is required for students to take SPAN 1002).*

Major Courses: 33 Hours

A grade of C or better is required for all major courses.

Major Keystone Courses: 15 Hours

- COMM 3000 - Theoretical Perspectives (3 Credit Hours)
- COMM 3010 - Advanced Public Speaking (3 Credit Hours)
- COMM 3020 - Writing for Multimedia Platforms (3 Credit Hours)
- COMM 3030 - Audiovisual Media Production (3 Credit Hours)

- COMM 3600 - Integrated Strategic Communication (3 Credit Hours)

Major Electives: 15 Hours

Select five of the following courses:

- COMM 3040 - Interpersonal Communication (3 Credit Hours)
- COMM 3060 - History of Mass Media (3 Credit Hours)
- COMM 3100 - Communications for Professionals (3 Credit Hours)
- COMM 3120 - Television Production (3 Credit Hours)
- COMM 3170 - Small Group Communication (3 Credit Hours)
- COMM 3180 - Television History (3 Credit Hours)
- COMM 3200 - Communication and Popular Culture (3 Credit Hours)
- COMM 3220 - Public Relations Writing (3 Credit Hours)
- COMM 3250 - Persuasion (3 Credit Hours)
- COMM 3300 - Introduction to Visual Communication (3 Credit Hours)
- COMM 3320 - Digital Editing (3 Credit Hours)
- COMM 3340 - Podcasting and Audio Communication (3 Credit Hours)
- COMM 3500 - Intercultural Communication (3 Credit Hours)
- COMM 3650 - Health Communication (3 Credit Hours)
- COMM 4000 - Communication Law and Ethics (3 Credit Hours)
- COMM 4010 - Preparing and Producing Visual Media (3 Credit Hours)
- COMM 4020 - Investigative Reporting (3 Credit Hours)
- COMM 4120 - Gender and Communication (3 Credit Hours)
- COMM 4300 - Visual Storytelling (3 Credit Hours)
- COMM 4320 - Public Relations and Social Media Campaigns (3 Credit Hours)
- COMM 4330 - Sports Event Communication and Media Relations (3 Credit Hours)
- COMM 4340 - Sports Communication (3 Credit Hours)
- COMM 4350 - Sports Media Production Practicum (3 Credit Hours)
- COMM 4360 - Advanced Sports Podcasting (3 Credit Hours)
- COMM 4370 - Esports Communication (3 Credit Hours)
- COMM 4400 - Media Editing and Production (3 Credit Hours)
- COMM 4950 - Advanced Special Topics in Communications (3 Credit Hours)
- COMM 4960 - Professional Internship (3 to 6 Credit Hours)
- COMM 4990 - Undergraduate Student Research (3 Credit Hours)

- COMM 4970 - Capstone (3 Credit Hours)

Free Electives: 27 Hours

To complete the requirements for the BA in Communication, students also should take twenty-seven elective hours, including 21 hours from 1000 to 4000 level academic courses and 6 hours from 3000-4000 level academic courses.

Free elective courses may include targeted electives, and/or requirements for minors, certificates, or additional degrees.

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 121 Hours

Bachelor of Arts in Criminal Justice

Program Overview

The Bachelor of Arts in Criminal Justice teaches core criminal justice concepts and theories that help students to analyze and understand criminal behavior and various structures within the criminal justice system. Our majors conduct research using the major data sources used by criminologists, learn to recognize strengths and weaknesses in qualitative and quantitative analyses, and discuss the ethical issues that can arise in the course of research. They also develop an understanding of the administration of justice and the history and philosophy of law enforcement, including issues relevant to the operation of the correctional system and its subsystems. Our faculty are dedicated to student learning, both in the classroom and through community involvement. We have a long tradition of supporting vibrant student organizations and encouraging student involvement in research.

- A grade of C or better is required in all Major Concentration courses.
- Exit Exam required in final term.

Program Information

- Program Length: 4 Years
- Academic Focus Area: Social Sciences [SOSC]
- CIP Code: 43.0104
- Program Code: 1BA-CRIM JUS
- Major Code: CRIM

Degree Requirements

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

A grade of C or better is required in these courses.

- CRJU 1103 - Introduction to Criminal Justice (3 Credit Hours)
- POLS 2000 - Society, Law, and the Criminal (3 Credit Hours)
- SOCI 1101 - Introduction to Sociology (3 Credit Hours)
- SOCI 1160 - Social Problems Analysis (3 Credit Hours)

Elective Courses: 6 Hours

Select six hours from the following not chosen above:

- ACCT 2101 - Principles of Accounting I (3 Credit Hours)
- CRJU 2950 - Selected Topics (1 to 3 Credit Hours)
- ECON 1810 - Introduction to Economics (3 Credit Hours)
- or ECON 2105 - Macroeconomics (3 Credit Hours)
- or ECON 2106 - Microeconomics (3 Credit Hours)
- LDRS 2000 - Introduction to Leadership and Professionalism (3 Credit Hours)
- MATH 1401 - Elementary Statistics (3 Credit Hours)
- MINF 2201 - Microcomputer Applications (3 Credit Hours)
- PHIL 2010 - Introduction to Philosophy (3 Credit Hours)
- PHIL 2020 - Introduction to Critical Thinking (3 Credit Hours)
- PSYC 1101 - Introduction to General Psychology (3 Credit Hours)
- SOCI 2241 - Social and Cultural Diversity (3 Credit Hours) (Grade of C or better)
- SOWK 1101 - Introduction to Social Work Practices (3 Credit Hours) (Grade of C or better)
- WGST 1101 - Introduction to Women's and Gender Studies (3 Credit Hours)
- A two-course language sequence

Major Concentration: 33 Hours

A grade of C or better is required in each course.

Research Methods: 6 Hours

- SOSC 3001 - Methods in Social Science (3 Credit Hours)
- SOSC 3002 - Quantitative Analysis in Social Sciences (3 Credit Hours) or SOSC 3003 - Qualitative Analysis in Social Sciences (3 Credit Hours)

Criminological Theory: 6 Hours

- CRJU 3000 - Criminology (3 Credit Hours)
- or SOCI 3000 - Criminology (3 Credit Hours)
- CRJU 3330 - Social Deviance (3 Credit Hours)
- or SOCI 3330 - Social Deviance (3 Credit Hours)
- or SOCI 3380 - Sociological Theory (3 Credit Hours)

Law Enforcement Area: 3 Hours

Choose one course from the following:

- CRJU 3327 - Crimes Against People (3 Credit Hours)
- CRJU 3328 - Introduction to Police Science and Investigations (3 Credit Hours)
- CRJU 4540 - Law Enforcement in the Digital Age (3 Credit Hours)

Administration of Justice Area: 3 Hours

Choose one course from the following:

- CRJU 3305 - Criminal Evidence (3 Credit Hours)
- CRJU 4433 - Juvenile Delinquency and Justice (3 Credit Hours)
- POLS 3301 - Judicial Process (3 Credit Hours)
- POLS 4401 - Government Organization and Administrative Theory (3 Credit Hours)
- POLS 4501 - Constitutional Law: Distribution of Power (3 Credit Hours)
- POLS 4601 - Constitutional Law: Civil Liberties (3 Credit Hours)

Corrections Area: 3 Hours

Choose one course from the following:

- CRJU 3333 - Introduction to Corrections (3 Credit Hours)
- CRJU 3334 - Institutional Corrections (3 Credit Hours)
- CRJU 3335 - Community Corrections (3 Credit Hours)

Demography, Crime, and Justice Area: 3 Hours

Select one of the following:

- CRJU 4010 - Hate Crimes (3 Credit Hours)
- CRJU 4162 - Race, Crime, and Justice (3 Credit Hours)
- CRJU 4172 - Comparative Criminal Justice Systems (3 Credit Hours)
- CRJU 3336 - Women, Crime and the Criminal Justice System (3 Credit Hours) or SOCI 3336 - Women, Crime and the Criminal Justice System (3 Credit Hours) or WGST 3336 - Women, Crime, and the Criminal Justice System (3 Credit Hours)
- CRJU 4336 - Gender and Victimization (3 Credit Hours) or SOCI 4336 - Gender and Victimization (3 Credit Hours) or WGST 4336 - Gender and Victimization (3 Credit Hours)

Electives: 9 Hours

Select from the following:

- Any CRJU 3XXX or CRJU 4XXX course
- CRJU 3000 - Criminology (3 Credit Hours)
- CRJU 3325 - Homeland Security and Counterterrorism (3 Credit Hours)
- CRJU 3327 - Crimes Against People (3 Credit Hours)
- CRJU 3328 - Introduction to Police Science and Investigations (3 Credit Hours)
- CRJU 3305 - Criminal Evidence (3 Credit Hours)
- CRJU 3330 - Social Deviance (3 Credit Hours)
- CRJU 3331 - Youth and Society (3 Credit Hours)
- CRJU 3332 - Juvenile Delinquency (3 Credit Hours)
- CRJU 3333 - Introduction to Corrections (3 Credit Hours)
- CRJU 3334 - Institutional Corrections (3 Credit Hours)
- CRJU 3335 - Community Corrections (3 Credit Hours)
- CRJU 3336 - Women, Crime and the Criminal Justice System (3 Credit Hours)
- CRJU 3341 - White Collar Crime (3 Credit Hours)
- CRJU 3342 - Organized Crime (3 Credit Hours)
- CRJU 3540 - Cyber Crime (3 Credit Hours)
- CRJU 3950 - Selected Topics (1 to 3 Credit Hours)
- CRJU 4010 - Hate Crimes (3 Credit Hours)
- CRJU 4162 - Race, Crime, and Justice (3 Credit Hours)
- CRJU 4172 - Comparative Criminal Justice Systems (3 Credit Hours)
- CRJU 4336 - Gender and Victimization (3 Credit Hours)
- CRJU 4433 - Juvenile Delinquency and Justice (3 Credit Hours)
- CRJU 4436 - Obedience and Authority (3 Credit Hours)

- CRJU 4441 - Violence and the South (3 Credit Hours)
- CRJU 4950 - Selected Topics (1 to 3 Credit Hours)
- CRJU 4990 - Undergraduate Research (3 Credit Hours)
- POLS 3301 - Judicial Process (3 Credit Hours)
- POLS 4401 - Government Organization and Administrative Theory (3 Credit Hours)
- POLS 4501 - Constitutional Law: Distribution of Power (3 Credit Hours)
- POLS 4601 - Constitutional Law: Civil Liberties (3 Credit Hours)

- SOCI 3003 - Qualitative Research Methods (3 Credit Hours)
- SOCI 3187 - Sociology of Murder (3 Credit Hours)
- SOCI 3380 - Sociological Theory (3 Credit Hours)
- SOSOC 4960 - Social Science Undergraduate Internship (0 to 12 Credit Hours)

Free Electives: 27 Hours

At least 6 credit hours must be at the 3000 or 4000 level.

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 121 Hours

Bachelor of Arts in English and a Concentration in Creative Writing

Program Overview

The Creative Writing track of the English major emphasizes the writing of poetry, fiction, drama, and creative nonfiction, encouraging the crossing of genres. Creative writing students learn to examine poems and prose works with the eyes of apprentice writers, energetically mastering the best literary models. Working intensely with faculty mentors, creative writing majors mature into promising artists in their craft and learn to educate the discerning readers of the future.

Select and fulfill the requirements of a minor in a different discipline than the major. Students may substitute a certificate or double major to satisfy the minor requirement.

Electives: 12-15 Hours

Select electives to complete the 30 Hours requirement.

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 124 Hours

Bachelor of Arts in English and a Concentration in Literature

Program Overview

Augusta University English literature majors recognize that storytelling is at the heart of the human experience. English literature students integrate their ethical development—empathy, respect for the work of others, cultivating multiple perspectives—with practical skills needed in today's complex global environment:

- Versatility and adaptability
- Interpersonal and communication skills
- Advanced skill in reading a range of texts, especially literary texts

- High-level skill in thinking and argumentation
- The ability to synthesize, organize, and manage complex information
- Intercultural competence and historical awareness
- The ability to analyze information and translate it for different contexts

- ENGL 4990 - Undergraduate Research (3 Credit Hours)

Minor Concentration and Electives: 30 Hours

Minor or Certificate Concentration: 15-18 Hours

Select a minor or certificate to complete. Students may substitute a certificate or double major to satisfy the minor requirement.

Free Electives: 12-15 Hours

Select electives to complete the 30 Hour requirement.

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 121 Hours

Bachelor of Arts in English and a Concentration in Professional Writing and Rhetoric

Program Overview

The Professional Writing and Rhetoric (PWR) concentration of the English major emphasizes a broad knowledge of rhetoric, including its history, trends, methods, issues, and themes. Students in this concentration work closely with faculty mentors who provide encouragement and assistance in completing focused, timely research projects. Augusta University's Professional Writing and Rhetoric

program specializes in genre and language theory, style, public discourses, and writing pedagogy. Students in this concentration enjoy considerable flexibility in developing a course of study that will promote scholarly and professional development.

Admissions Information

For more information on admissions requirements, please visit the Office of Admissions website.

Progression and Graduation Requirements

- A grade of C or better is required in all Major Concentration courses.
- Courses completed for Core IMPACTS cannot be duplicated in the Field of Study.
- Graduating seniors must submit an exit portfolio acceptable to the appropriate portfolio committee.

Program Information

- Program Length: 4 Years
- Academic Focus Area: Arts and Humanities [HUAR]
- CIP Code: 23.0101
- Program Code: 1BA-ENGLISH
- Major Code: ENGL
- Concentration Code: PROW

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

Required Course: 3 Hours

- ENGL 2680 - Professional and Technical Writing (3 Credit Hours)

English Literature or Writing Courses: 6 Hours

Select two of the following:

- ENGL 2110 - Creative Writing (3 Credit Hours)
- ENGL 2111 - World Literature I (3 Credit Hours)
- ENGL 2112 - World Literature II (3 Credit Hours)
- ENGL 2121 - British Literature I (3 Credit Hours)
- ENGL 2122 - British Literature II (3 Credit Hours)
- ENGL 2131 - American Literature I (3 Credit Hours)
- ENGL 2132 - American Literature II (3 Credit Hours)
- ENGL 2140 - African American Literature (3 Credit Hours)

Foreign Language Sequence: 9 Hours

Select one of the following language sequences:

Arabic

- ARAB 1002 - Elementary Modern Standard Arabic II (4 Credit Hours)
- ARAB 2001 - Intermediate Modern Standard Arabic I (4 Credit Hours)
- ARAB 2002 - Intermediate Modern Standard Arabic II (4 Credit Hours)

Chinese

- CHNS 1002 - Elementary Chinese II (3 Credit Hours)
- CHNS 2001 - Intermediate Chinese I (3 Credit Hours)
- CHNS 2002 - Intermediate Chinese II (3 Credit Hours)

French

- FREN 1002 - Elementary French II (3 Credit Hours)
- FREN 2001 - Intermediate French I (3 Credit Hours)
- FREN 2002 - Intermediate French II (3 Credit Hours)

German

- GRMN 1002 - Elementary German II (3 Credit Hours)
- GRMN 2001 - Intermediate German I (3 Credit Hours)
- GRMN 2002 - Intermediate German II (3 Credit Hours)

Spanish

- SPAN 1002 - Elementary Spanish II (3 Credit Hours)
- SPAN 2001 - Intermediate Spanish I (3 Credit Hours)
- SPAN 2002 - Intermediate Spanish II (3 Credit Hours)

Major Concentration: 30 Hours

Certain literature and creative writing courses may be substituted for PWR courses in consultation with a PWR advisor.

A grade of C or better required for all Major Concentration courses.

Required Foundations: 12 Hours

- ENGL 3688 - Theory and History of Rhetoric (3 Credit Hours)
- ENGL 3700 - Introduction to Professional Writing and Rhetoric (3 Credit Hours)
- ENGL 4520 - Research in Writing (3 Credit Hours)
- ENGL 4961 - Professional Writing Internship (3 Credit Hours)

Theory: 6 Hours

Choose two from the following:

- ENGL 3684 - Rhetorical Genre Studies (3 Credit Hours)

- ENGL 3685 - Digital Rhetoric (3 Credit Hours)
- ENGL 4650 - Advanced Theory of Professional Writing and Rhetoric (3 Credit Hours)
- ENGL 4680 - Special Topics in Writing (3 Credit Hours)

Application: 9 Hours

Choose three from the following:

- ENGL 3650 - Grant Writing (3 Credit Hours)
- ENGL 3830 - Writing Center Theory and Practice (3 Credit Hours)
- ENGL 3681 - Advanced Style and Editing (3 Credit Hours)
- ENGL 3682 - Writing in the Community (3 Credit Hours)
- ENGL 3686 - Introduction to Writing in the Sciences (3 Credit Hours)
- ENGL 4680 - Special Topics in Writing (3 Credit Hours)
- ENGL 4690 - Rhetoric and Digital Media (3 Credit Hours)

Research Methods: 3 Hours

- ENGL 3687 - User Research and Design (3 Credit Hours)

Free Electives: 30 Hours

6 to 9 hours must be at the **3000** or **4000** level.

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 121 Hours

Bachelor of Arts in English and a Secondary Teacher Certification

Program Overview

Augusta University English literature majors with secondary teacher certification recognize that storytelling, at the heart of the human experience, is carried forward to future generations partly through classroom pedagogy. English teacher candidates integrate their ethical development—empathy, respect for the work of others, cultivating multiple perspectives—with practical skills needed in today's complex global environment:

- Versatility and adaptability
- Interpersonal and communication skills
- Advanced skill in reading a range of texts, especially literary texts
- High-level skill in thinking and argumentation
- The ability to synthesize, organize, and manage complex information
- Intercultural competence and historical awareness
- The ability to analyze information and translate it for different contexts

By conveying these skills and abilities to students in secondary schools, English teacher candidates bring their major studies into the world to support the common good.

Progression and Graduation Requirements

- Courses completed in Core IMPACTS cannot be duplicated in Field of Study.
- A grade of C or better is required in all Major Concentration courses.
- English post-baccalaureate initial certification students must submit an exit portfolio acceptable to the appropriate portfolio committee to complete their English requirements.

Program Information

- Program Length: 4 Years
- Academic Focus Area: Arts and Humanities [HUAR]
- CIP Code: 230101
- Program Code: 1BA-ENGL EDU

Degree Requirements

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

Courses completed for the Core IMPACTS Curriculum cannot be duplicated in the Field of Study courses.

- ENGL 2680 - Professional and Technical Writing (3 Credit Hours)

Select two of the following:

- ENGL 2060 - Introduction to Literature (3 Credit Hours)
- ENGL 2111 - World Literature I (3 Credit Hours)
- ENGL 2112 - World Literature II (3 Credit Hours)
- ENGL 2121 - British Literature I (3 Credit Hours)
- ENGL 2122 - British Literature II (3 Credit Hours)
- ENGL 2131 - American Literature I (3 Credit Hours)
- ENGL 2132 - American Literature II (3 Credit Hours)
- ENGL 2140 - African American Literature (3 Credit Hours)

Students must complete a two-course language sequence through at least the 2001 level. Select one sequence from the list below:

- ARAB 1002 - Elementary Modern Standard Arabic II (4 Credit Hours)
 - ARAB 2001 - Intermediate Modern Standard Arabic I (4 Credit Hours)
 - ARAB 2002 - Intermediate Modern Standard Arabic II (4 Credit Hours)
- or
- CHNS 1002 - Elementary Chinese II (3 Credit Hours)

- CHNS 2001 - Intermediate Chinese I (3 Credit Hours)
- CHNS 2002 - Intermediate Chinese II (3 Credit Hours)
- or
- FREN 1002 - Elementary French II (3 Credit Hours)
- FREN 2001 - Intermediate French I (3 Credit Hours)
- FREN 2002 - Intermediate French II (3 Credit Hours)
- or
- GRMN 1002 - Elementary German II (3 Credit Hours)
- GRMN 2001 - Intermediate German I (3 Credit Hours)
- GRMN 2002 - Intermediate German II (3 Credit Hours)
- or
- SPAN 1002 - Elementary Spanish II (3 Credit Hours)
- SPAN 2001 - Intermediate Spanish I (3 Credit Hours)
- SPAN 2002 - Intermediate Spanish II (3 Credit Hours)

Field of Study Elective: 3 Hours

Select one of the following (not taken above):

- ARAB 1002 - Elementary Modern Standard Arabic II (4 Credit Hours)
- ARAB 2001 - Intermediate Modern Standard Arabic I (4 Credit Hours)
- ARAB 2002 - Intermediate Modern Standard Arabic II (4 Credit Hours)
- CHNS 1002 - Elementary Chinese II (3 Credit Hours)
- CHNS 2001 - Intermediate Chinese I (3 Credit Hours)
- CHNS 2002 - Intermediate Chinese II (3 Credit Hours)
- FREN 1002 - Elementary French II (3 Credit Hours)
- FREN 2001 - Intermediate French I (3 Credit Hours)
- FREN 2002 - Intermediate French II (3 Credit Hours)
- GRMN 1002 - Elementary German II (3 Credit Hours)
- GRMN 2001 - Intermediate German I (3 Credit Hours)
- GRMN 2002 - Intermediate German II (3 Credit Hours)
- SPAN 1002 - Elementary Spanish II (3 Credit Hours)
- SPAN 2001 - Intermediate Spanish I (3 Credit Hours)
- SPAN 2002 - Intermediate Spanish II (3 Credit Hours)
- ENGL 2060 - Introduction to Literature (3 Credit Hours)
- ENGL 2110 - Creative Writing (3 Credit Hours)
- ENGL 2111 - World Literature I (3 Credit Hours)
- ENGL 2112 - World Literature II (3 Credit Hours)
- ENGL 2121 - British Literature I (3 Credit Hours)
- ENGL 2122 - British Literature II (3 Credit Hours)
- ENGL 2131 - American Literature I (3 Credit Hours)
- ENGL 2132 - American Literature II (3 Credit Hours)
- ENGL 2140 - African American Literature (3 Credit Hours)
- ENGL 2950 - Selected Topics (3 Credit Hours)
- PHIL 2010 - Introduction to Philosophy (3 Credit Hours)
- PHIL 2020 - Introduction to Critical Thinking (3 Credit Hours)
- ANTH 1102 - Introductory Anthropology (3 Credit Hours)
- ANTH 2011 - Cultural Anthropology (3 Credit Hours)
- HIST 1111 - Pre-Modern World Civilization (3 Credit Hours)
- HIST 1112 - Modern World Civilization (3 Credit Hours)
- HIST 1113 - Issues in World Civilization (1 to 3 Credit Hours)

Major Courses: 30 hours

Major Concentration Courses: 12 Hours

A grade of C or better is required in all Major Concentration courses.

- ENGL 3250 - Introduction to Theory and Method (3 Credit Hours)
- ENGL 4712 - Modern Grammatical Systems (3 Credit Hours) or ENGL 4720 - The Story of the English Language (3 Credit Hours)
- ENGL 4800 - Capstone Seminar (3 Credit Hours)

- ENGL 3650 - Grant Writing (3 Credit Hours) or
- ENGL 3660 - The Art of the Essay (3 Credit Hours) or
- ENGL 3681 - Advanced Style and Editing (3 Credit Hours) or
- ENGL 3682 - Writing in the Community (3 Credit Hours) or
- ENGL 3830 - Writing Center Theory and Practice (3 Credit Hours) or
- ENGL 4520 - Research in Writing (3 Credit Hours) or
- ENGL 4670 - Sand Hills Literary Editing and Publishing (3 Credit Hours) or
- ENGL 4680 - Special Topics in Writing (3 Credit Hours)

Pre-1500 Literature: 3 Hours

Select one upper-level course from the following:

- ENGL 4350 - Studies in Medieval Literature and Medievalism (3 Credit Hours)
- ENGL 4410 - Chaucer (3 Credit Hours)
- ENGL 4460 - Mythology and Folklore (3 Credit Hours)
- Other courses that fulfill the 1500-1800 requirement as indicated on the schedule of classes each semester

1500-1800 Literature: 3 Hours

Select one upper-level course from the following:

- ENGL 4020 - History of the Book (3 Credit Hours)
- ENGL 4420 - Shakespeare (3 Credit Hours)
- ENGL 4430 - Milton (3 Credit Hours)
- Other courses that fulfill the 1500-1800 requirements as indicated on the schedule of classes each semester

1800-Present Literature: 3 Hours

Select one upper-level course from the following:

- ENGL 3110 - Topics in African American Literature and Culture (3 Credit Hours)
- ENGL 3120 - Southern Literature (3 Credit Hours)
- ENGL 3320 - Children's Literature (3 Credit Hours)
- ENGL 3330 - Literature for Pre-Adolescents and Adolescents (3 Credit Hours)
- ENGL 4020 - History of the Book (3 Credit Hours)
- ENGL 4220 - Contemporary Theatre (3 Credit Hours)
- ENGL 4230 - Modern Poetry (3 Credit Hours)
- ENGL 4250 - The Modern American Novel (3 Credit Hours)
- ENGL 4261 - The English Novel to 1900 (3 Credit Hours)
- ENGL 4262 - The Modern British Novel (3 Credit Hours)
- ENGL 4470 - Imagining Other Worlds (3 Credit Hours)
- Other courses that fulfill the 1800-present requirement as indicated on the schedule of classes each semester

Literature: 6 Hours

Select two upper-level courses from the following (not previously taken):

- ENGL 3110 - Topics in African American Literature and Culture (3 Credit Hours)
- ENGL 3120 - Southern Literature (3 Credit Hours)
- ENGL 3210 - Film Appreciation (3 Credit Hours)
- ENGL 3310 - Women's Literature (3 Credit Hours)
- ENGL 3320 - Children's Literature (3 Credit Hours)
- ENGL 3330 - Literature for Pre-Adolescents and Adolescents (3 Credit Hours)
- ENGL 4000 - Studies in British Literature (3 Credit Hours)
- ENGL 4020 - History of the Book (3 Credit Hours)
- ENGL 4100 - Studies in American Literature (3 Credit Hours)
- ENGL 4200 - Studies in Genre (3 Credit Hours)
- ENGL 4220 - Contemporary Theatre (3 Credit Hours)
- ENGL 4230 - Modern Poetry (3 Credit Hours)
- ENGL 4250 - The Modern American Novel (3 Credit Hours)
- ENGL 4261 - The English Novel to 1900 (3 Credit Hours)
- ENGL 4262 - The Modern British Novel (3 Credit Hours)
- ENGL 4310 - Studies in Feminism (3 Credit Hours)
- ENGL 4330 - Studies in Popular Culture (3 Credit Hours)
- ENGL 4350 - Studies in Medieval Literature and Medievalism (3 Credit Hours)
- ENGL 4360 - Studies in World Literature (3 Credit Hours)
- ENGL 4410 - Chaucer (3 Credit Hours)
- ENGL 4420 - Shakespeare (3 Credit Hours)
- ENGL 4430 - Milton (3 Credit Hours)
- ENGL 4440 - Major British Authors (3 Credit Hours)
- ENGL 4450 - Major American Authors (3 Credit Hours)
- ENGL 4460 - Mythology and Folklore (3 Credit Hours)
- ENGL 4470 - Imagining Other Worlds (3 Credit Hours)
- ENGL 4510 - Literary Theory (3 Credit Hours)
- ENGL 4530 - Studies in Theory (3 Credit Hours)
- Other courses that fulfill the Literature requirement as indicated on the schedule of classes each semester

Contemporary Literature:

At least one of the courses taken to satisfy the above requirements must be selected from the following:

- ENGL 3110 - Topics in African American Literature and Culture (3 Credit Hours)
- ENGL 3120 - Southern Literature (3 Credit Hours)
- ENGL 3310 - Women's Literature (3 Credit Hours)
- ENGL 3320 - Children's Literature (3 Credit Hours)
- ENGL 3330 - Literature for Pre-Adolescents and Adolescents (3 Credit Hours)
- ENGL 4220 - Contemporary Theatre (3 Credit Hours)
- ENGL 4230 - Modern Poetry (3 Credit Hours)
- ENGL 4250 - The Modern American Novel (3 Credit Hours)
- ENGL 4262 - The Modern British Novel (3 Credit Hours)
- Other courses that fulfill the contemporary literature requirement as indicated on the schedule of classes each semester

American Minority:

At least one of the courses taken to satisfy the above requirements must be selected from the following:

- ENGL 3110 - Topics in African American Literature and Culture (3 Credit Hours)
- ENGL 3120 - Southern Literature (3 Credit Hours)
- ENGL 3310 - Women's Literature (3 Credit Hours)

- Other courses that fulfill the American minority literature requirement as indicated on the schedule of classes each semester

English Course: 3 Hours

Select one upper-level course from the following (not taken above):

- ENGL 3110 - Topics in African American Literature and Culture (3 Credit Hours)
- ENGL 3120 - Southern Literature (3 Credit Hours)
- ENGL 3210 - Film Appreciation (3 Credit Hours)
- ENGL 3310 - Women's Literature (3 Credit Hours)
- ENGL 3320 - Children's Literature (3 Credit Hours)
- ENGL 3330 - Literature for Pre-Adolescents and Adolescents (3 Credit Hours)
- ENGL 3620 - Writing for the Theatre (3 Credit Hours)
- ENGL 3630 - The Art of Poetry (3 Credit Hours)
- ENGL 3640 - The Art of Fiction (3 Credit Hours)
- ENGL 3650 - Grant Writing (3 Credit Hours)
- ENGL 3660 - The Art of the Essay (3 Credit Hours)
- ENGL 3681 - Advanced Style and Editing (3 Credit Hours)
- ENGL 3682 - Writing in the Community (3 Credit Hours)
- ENGL 3684 - Rhetorical Genre Studies (3 Credit Hours)
- ENGL 3685 - Digital Rhetoric (3 Credit Hours)

Secondary Teacher Certification

Prior to Admission to Teacher Education: 9 Hours

- EDUC 2110 - Investigating Critical and Contemporary Issues in Education (3 Credit Hours)
- EDUC 2120 - Exploring Social-Cultural Perspectives on Diversity (3 Credit Hours)
- EDUC 2130 - Exploring Learning and Teaching (3 Credit Hours)

After Admission to Teacher Education: 25 Hours

- EDTD 3200 - Assessment and Differentiation for Adolescent Learners (3 Credit Hours)
- EDTD 3221 - Adolescent English Pedagogy (3 Credit Hours)
- EDTD 4940 - Foundations of Reading Seminar (2 Credit Hours)
- SCED 3102 - Secondary School Context and Curriculum (3 Credit Hours)
- SPED 3002 - Teaching Students with Disabilities in the Inclusive Classroom (3 Credit Hours)
- SCED 4901 - Secondary Culminating Residency (11 Credit Hours)

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 125 Hours

Bachelor of Arts in Health, Society, and Policy

Program Overview

The Bachelor of Arts in Health, Society, and Policy focuses on the human and policy side of health and illness. This degree will train students to recognize the many social and cultural determinants of health, and to apply knowledge of human behavior and the social environment to evaluate and understand the risks and challenges to health for diverse populations. Students in the program will study the individual's relationship to the communities they belong to, by completing courses about health, health care, and illness in diverse social and cultural contexts. Students will acquire skills in writing, communication, and analysis that are critical to their future careers in health fields.

The interdisciplinary curriculum develops students' cultural competencies as they relate to systems of care, by teaching social science research techniques and methods and by promoting a behavioral approach to understanding health. These skills enable graduates to work in human service fields within the health industry, including community health, health behavior, pastoral care, and public health, which are trending as the fastest growing fields in the healthcare industry. Furthermore, the curriculum has been designed so that students can satisfy the requirements for entry into a number of graduate and professional programs, such as public health, occupational therapy, health-sociology, and other social sciences.

Admissions Information

For more information on admissions requirements, please visit the Office of Admissions website.

Progression and Graduation Requirements

- A grade of C or higher in all Major Concentration Courses
- Departmental Exit Exam Required

Program Information

- Program Length: 4 Years
- Academic Focus Area: Health Professions [HEPR]
- CIP Code: 44.0503
- Program Code: 1BA-HESP

Degree Requirements

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

Select these courses if not selected in the Social Sciences area of Core IMPACTS.

- ANTH 1102 - Introductory Anthropology (3 Credit Hours)
- PSYC 1101 - Introduction to General Psychology (3 Credit Hours)
- SOCI 1101 - Introduction to Sociology (3 Credit Hours)

Choose from the following: 9-18 Hours

- ANTH 2011 - Cultural Anthropology (3 Credit Hours)
- CHEM 1211 - Principles of Chemistry I (3 Credit Hours)
- CHEM 1212 - Principles of Chemistry II (3 Credit Hours)
- ECON 2105 - Macroeconomics (3 Credit Hours)
- HIST 1111 - Pre-Modern World Civilization (3 Credit Hours)
- HIST 1112 - Modern World Civilization (3 Credit Hours)
- MATH 1401 - Elementary Statistics (3 Credit Hours)
- PHIL 2020 - Introduction to Critical Thinking (3 Credit Hours)
- PHIL 2030 - Introduction to Ethics (3 Credit Hours)
- PHYS 1111 - Introductory Physics I (3 Credit Hours)
- PHYS 1112 - Introductory Physics II (3 Credit Hours)
- PSYC 2103 - Introduction to Human Development (3 Credit Hours)

- PSYC 2150 - Introduction to Human Diversity (3 Credit Hours)
- SOCI 1160 - Social Problems Analysis (3 Credit Hours)
- SOCI 2241 - Social and Cultural Diversity (3 Credit Hours)

Major Concentration: 33-36 Hours

A grade of C or better is required for each of the following:

- HIST 3610 - History of Modern Health and Medicine (3 Credit Hours)
- PHIL 3004 - Bioethics (3 Credit Hours)
- SOSC 3001 - Methods in Social Science (3 Credit Hours)
- SOSC 4960 - Social Science Undergraduate Internship (0 to 12 Credit Hours)

Research Course: 3 Hours

Select one of the following courses:

- ANTH 3001 - Methods in Cultural Anthropology (4 Credit Hours)
- HIST 3001 - Historical Research Methods (4 Credit Hours)
- SOSC 3002 - Quantitative Analysis in Social Sciences (3 Credit Hours)
- SOSC 3003 - Qualitative Analysis in Social Sciences (3 Credit Hours)

Sociology or Anthropology of Medicine: 3 Hours

Select one of the following courses:

- ANTH 3535 - Medical Anthropology (3 Credit Hours)
- SOCI 3317 - Sociology of Health and Illness (3 Credit Hours)

Behavioral Health: 6 Hours

Select two of the following courses:

- KNHS 4310 - Global Health and Health Disparities (3 Credit Hours)
- PSYC 3180 - Drugs and Behavior (3 Credit Hours)
- PSYC 3183 - Health Psychology (3 Credit Hours)
- PSYC 3188 - Human Sexuality (3 Credit Hours)
- SOCI 3375 - Sociology of Death, Grief and Caring (3 Credit Hours)
- SOCI 4317 - Sociology of Health Care (3 Credit Hours)
- SOCI 4421 - Gerontology (3 Credit Hours)

Health Humanities: 3 Hours

Select one of the following courses:

- COMM 3650 - Health Communication (3 Credit Hours)
- FREN 3620 - French for Health and Medical Professions (3 Credit Hours)
- HIST 3600 - Premodern Health and Medicine (3 Credit Hours)
- HIST 4710 - Premodern Science, Religion, and Magic (3 Credit Hours)
- SPAN 3620 - Spanish for the Medical Professions (3 Credit Hours)

Choose from the following courses: 6 Hours

Select two additional courses from the following that were not completed above:

- ANTH 3535 - Medical Anthropology (3 Credit Hours)
- ANTH 3841 - Biological Anthropology (3 Credit Hours)
- ANTH 3870 - Identity: Ethnicity, Gender, and Class (3 Credit Hours)
- ANTH 4541 - Food and Culture (3 Credit Hours)
- CHEM 3411 - Organic Chemistry I (3 Credit Hours)
- CHEM 3412 - Organic Chemistry II (3 Credit Hours)
- COMM 3650 - Health Communication (3 Credit Hours)
- FREN 3620 - French for Health and Medical Professions (3 Credit Hours)
- HIST 3600 - Premodern Health and Medicine (3 Credit Hours)
- HIST 4710 - Premodern Science, Religion, and Magic (3 Credit Hours)
- KNHS 4310 - Global Health and Health Disparities (3 Credit Hours)
- PSYC 3183 - Health Psychology (3 Credit Hours)
- SOCI 3317 - Sociology of Health and Illness (3 Credit Hours)
- SOCI 3340 - Social Stratification (3 Credit Hours)
- SOCI 3375 - Sociology of Death, Grief and Caring (3 Credit Hours)
- SOCI 4317 - Sociology of Health Care (3 Credit Hours)
- SOCI 4421 - Gerontology (3 Credit Hours)
- SOCI 4451 - Sociology of Work and Occupation (3 Credit Hours)
- SPAN 3620 - Spanish for the Medical Professions (3 Credit Hours)

Free Electives: 24-27 Hours

6 to 9 hours must be at the 3000 or 4000 level.

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 121 Hours

Bachelor of Arts in History

Program Overview

Our History program immerses students in the laboratory of the human past, under the guidance of a renowned faculty who teach courses about real people and their triumphs and failures. We show how humanity has shaped cultural, economic and political forces, both close to home and far-afield. With a varied and flexible curriculum, students choose their own concentrations, taking advanced courses to suit their interests and needs. Our students learn to think rigorously, evaluate arguments and evidence, conduct historical research, and write clearly and precisely. The skills and knowledge they acquire empower them to engage in meaningful discussions about past events that still shape and impact our society today. The history degree teaches the analytical tools and transferable skills desired by employers, and suitable for a wide range of careers: teachers & educators, researchers, museum curators, information managers, authors, and more.

Select from any non-WELL courses.

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 121 Hours

Bachelor of Arts in History and a Concentration in Public History

Program Overview

The concentration in public history prepares students to practice and apply history beyond the classroom walls. The theory and methodology of public history builds on the core competencies of the discipline of history, with additional skills and perspectives useful in public history practice. The concentration focuses on preparing graduates to engage in collaborative work with community members, museum professionals, stakeholders, and professional colleagues. Coursework and the culminating capstone internship experience will prepare students to engage in the public history debates about a role for shared authority and the proper place for the professionalization of local history. A particular focus will be on museum studies, which plays an important role in the work of public historians. Students may also choose from a variety of concentration electives allowing them to gain skills in public communication, management and finance, or related subject matter expertise.

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 123 Hours

Bachelor of Arts in Integrated Studies

Program Overview

The Bachelor of Arts in Integrated Studies allows students to design their own degree for their own careers. This innovative degree provides educational opportunities not available through traditional programs. Working with an advisor, students construct a degree program to fit their interests. This program is a great option for students with multiple passions.

The Integrated Studies program offers a range of academic pathways that allow students to integrate multiple disciplines while developing the tools needed for interdisciplinary inquiry and career preparation. Students can work with an advisor to develop a self-designed pathway, or select one of the designed pathways. All students are required to complete the culminating experience course which will allow them to reflect on how their interdisciplinary pathway has prepared them for their future career.

Students enrolled in the Integrated Studies program are encouraged to pursue experiential learning opportunities, including internships, study abroad programs, service learning, and undergraduate research.

Admissions Information

For more information on admissions requirements, please visit the Office of Admissions website.

Progression and Graduation Requirements

- Grade of C or better is required for Field of Study and Major courses.
- Must complete the culminating experience course INTS 4970.
- Must complete a portfolio to graduate.
- May optionally select one or more minors or certificates as part of their program of study.
- Students in Integrated Studies are not allowed to double major.

Program Information

- Program Length: 4 Years
- Academic Focus Area: Arts and Humanities [HUAR]
- CIP Code: 30.0000
- Program Code: 1BA-INTS

Degree Requirements

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

This area consists of 18-credit hours of lower-division courses. The combination of courses is customizable by the student in consultation with an advisor or chosen from one of the designed pathways.

Students must receive a grade of C or better in all Field of Study courses.

Major Courses: 39 Hours

- INTS 4970-Integrated Studies Culminating Experience (3 Credit Hours)

The remaining 36-credit hours of upper-division courses are customizable by each student in consultation with an advisor or chosen from a designed pathway.

Students must receive a grade of C or better in all major concentration courses.

Electives: 21 Hours

(any level)

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 121 Hours

Bachelor of Arts in Music

Program Overview

The Bachelor of Arts in Music is a degree designed for the emphasis of study in music within a liberal arts curriculum. Students pursuing the BA in Music typically conduct a significant amount of their course work outside the field of music and focus on the interrelationship of music with other academic disciplines. The student entering this program will be expected to take more courses in liberal arts fields than is required of students in the Bachelor of Music degrees. This degree can prepare one for graduate study leading to the Master of Arts and Doctor of Philosophy degrees, as well as careers based on cultural concerns. This degree can also be oriented towards pre-professional, social, and/or business opportunities.

As a music major, you will be required to declare a major performing area (voice, piano, trumpet, etc.). In addition to being proficient on your instrument, music majors must also demonstrate a knowledge of music theory. Students who have a basic knowledge of the fundamentals of music theory upon entry into a music program are much more likely to succeed in all fields of musical study. All entering freshmen and those who have previous college credit but are new to the music major must take a music theory diagnostic examination before being advised into their first semester of coursework. This exam is given by the music departmental office. Those with adequate knowledge will be placed in MUSI 1211 and MUSI 1101.

All entering music majors must also perform a placement audition before a faculty panel in their major performing area. These auditions will be scheduled prior to the start of classes. Students are expected to demonstrate background and experience through their high school programs or prior collegiate work in musical ensembles, private study, church music, etc. Students without this background must show extraordinary potential to be admitted as a music major. Students who are unable to demonstrate these abilities will not be admitted into the music program and will be advised to seek another major.

Progression and Graduation Requirements

Grade of C or better is required for all courses in the Core IMPACTS and Liberal Arts Emphasis Curriculum areas.

Program Information

- Program Length: 4 Years
- Academic Focus Area: Arts and Humanities [HUAR]
- CIP Code: 50.0901
- Program Code: 1BA-MUSIC

Degree Requirements

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

A grade of C or better is required in all of these courses.

Lower-Division Theory: 10 Hours

Take each of the following courses:

- MUSI 1101 - Aural Skills I (2 Credit Hours)
- MUSI 1102 - Aural Skills II (2 Credit Hours)
- MUSI 1211 - Music Theory I (2 Credit Hours)
- MUSI 1212 - Music Theory II (2 Credit Hours)
- MUSI 1521 - Class Piano I (1 Credit Hour)
- MUSI 1522 - Class Piano II (1 Credit Hour)

Lower-Division Applied Lessons: 4 Hours

Take each of the following courses:

- MUSA 1XX1 - Applied Lessons: Concentration
- MUSA 1XX2 - Applied Lessons: Concentration
- MUSA 2XX1 - Applied Lessons: Concentration

Choose one credit from the following courses:

- MUSI 3660 - Augusta University Jazz Ensemble (0 to 1 Credit Hour)
- MUSI 4610 - Augusta University Opera Ensemble (0 to 3 Credit Hours)
- MUSI 4620 - TONEalities (0 to 1 Credit Hour)
- MUSI 4640 - Woodwind Ensemble (0 to 1 Credit Hour)
- MUSI 4650 - Brass Ensemble (0 to 1 Credit Hour)
- MUSI 4660 - Jazz Combo (0 to 1 Credit Hour)
- MUSI 4670 - Keyboard Ensemble (0 to 1 Credit Hour)
- MUSI 4680 - Percussion Ensemble (0 to 1 Credit Hour)
- MUSI 4690 - Chamber Music Ensemble (0 to 1 Credit Hour)

Major Ensembles as assigned: 3 Hours

- MUSI 3610 - Augusta University Wind Ensemble (0 to 1 Credit Hour)
- MUSI 3620 - University Singers (0 to 1 Credit Hour)
- MUSI 3630 - Augusta University Orchestra (0 to 1 Credit Hour)

Music Common Curriculum: 22 Hours

A grade of C or better is required in all courses.

Recital Experience

- MUSI 1500 - Recital Laboratory (0 Credit Hours) (*5 semesters minimum*)

Studio Experience

- MUSA 2X05 - Studio Class (0 Credit Hours) (*5 semesters minimum*)

Music Theory Curriculum: 9 Hours

Take each of the following courses:

- MUSI 2101 - Aural Skills III (2 Credit Hours)
- MUSI 2211 - Music Theory III (2 Credit Hours)
- MUSI 2102 - Aural Skills IV (2 Credit Hours)
- MUSI 2212 - Music Theory IV (2 Credit Hours)
- MUSI 3210 - Form and Analysis (1 Credit Hour)

Music History Curriculum: 8 Hours

Take each of the following courses:

- MUSI 2230 - Introduction to Western Music Literature (2 Credit Hours)
- MUSI 3340 - Music History I (3 Credit Hours)
- MUSI 3350 - Music History II (3 Credit Hours)

Miscellaneous Requirements: 5 Hours

Take each of the following:

- MUSI 1810 - Music Technology (1 Credit Hour)
- MUSI 2523 - Class Piano III (1 Credit Hour)
- MUSI 2524 - Class Piano IV (1 Credit Hour)
- MUSI 4090 - Senior Project for BA in Music (2 Credit Hours)

Electives: 10 Hours

Select elective courses totaling 10 credit hours. 6 of the 10 credit hours must be in upper-division level courses.

Take a foreign language through the 1002 level, or satisfy the foreign language proficiency exam for that level.

Non-Music Related Study: 18 Hours

Complete 18 hours at the upper-division level.

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 121 Hours

Bachelor of Arts in Music and an Emphasis in Music Industry Studies

Program Overview

The Bachelor of Arts in Music and an Emphasis in Music Industry Studies provides students with specific industry-related courses, along with a flexible curriculum that highlights musical interests in theory, performance, music history, and music business. This program allows students to choose courses in either Business Administration and/or Nonprofit Management, giving our students the edge in creating their own path to success for employment in the music industry. It shares coursework with the Certificate of Less than One Year in Music Industry Studies.

Program features include:

- music industry-specific courses
- students participate in music ensembles
- hands-on applications with music production technology and live sound reinforcement
- collaboration with local music industry and performing arts organization in Augusta, GA

Bachelor of Arts in Sports Management

Program Overview

The Bachelor of Arts in Sports Management is 120 credit hours, exclusive of 4 hours in wellness and physical activity requirements. Courses are offered in-person and online with less than 50% being online. The degree takes a traditional student four years to complete. The degree program allows students to select up to 21 credit hours in electives (a minor) in which the program faculty encourage students to take courses in other colleges. Minors in Business, Marketing, Communication, World Languages, Psychology, and others related to the interest of the student are encouraged.

Program Information

- Program Length: 4 Years
- Academic Focus Area: Health Professions [HEPR]
- CIP Code: 31.0504
- Program Code: 1BA-SMGT

Degree Requirements

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

Required Field of Study Courses: 9 Hours

Take the following courses if not selected in the Social Sciences area of Core IMPACTS:

- PSYC 1101 - Introduction to General Psychology (3 Credit Hours)
- SOCI 1101 - Introduction to Sociology (3 Credit Hours)
- SPMT 2100 - Introduction to Sport Management (3 Credit Hours)

Elective Field of Study Courses: 9 Hours

Select 9 hours from the following:

- ECON 1810 - Introduction to Economics (3 Credit Hours)
- ECON 2105 - Macroeconomics (3 Credit Hours)
- ECON 2106 - Microeconomics (3 Credit Hours)
- PSYC 2150 - Introduction to Human Diversity (3 Credit Hours)
- PHIL 2030 - Introduction to Ethics (3 Credit Hours)
- COMM 2010 - Media Literacy (3 Credit Hours)
- MATH 1401 - Elementary Statistics (3 Credit Hours)
- PSYC 2103 - Introduction to Human Development (3 Credit Hours)
- ACCT 2101 - Principles of Accounting I (3 Credit Hours)
- ACCT 2102 - Principles of Accounting II (3 Credit Hours)
- SOCI 2241 - Social and Cultural Diversity (3 Credit Hours)
- PSYC 2101 - Introduction to Psychology of Adjustment (3 Credit Hours)

Major Courses: 39 Hours

Required Major Courses: 30 Hours

- SPMT 3400 - Current Issues in Sports Management (3 Credit Hours)
- SPMT 3500 - Sports Ethics (3 Credit Hours)
- SPMT 3510 - Sport Marketing (3 Credit Hours)
- SPMT 3550 - Legal Issues in Sports (3 Credit Hours)
- SPMT 4140 - Organizational Behavior in Sport (3 Credit Hours)
- SPMT 4510 - Financial Management of Sport (3 Credit Hours)
- SPMT 4540 - Management of Sport and Physical Activity Organizations (3 Credit Hours)
- SPMT 4600 - International Sport Management (3 Credit Hours)
- MKTG 3700 - Principles of Marketing (3 Credit Hours)
- MKTG 4720 - Services Marketing (3 Credit Hours)

Elective Major Courses: 12 Hours

Select 12 hours from the following:

- SPMT 3450 - E-Sport Management (3 Credit Hours)
- SPMT 4710 - Management and Governance of Sport Organizations (3 Credit Hours)
- COMM 4340 - Sports Communication (3 Credit Hours)
- **Any SPMT 3000/4000 level courses not taken in other areas**

- KNHS 4410 - Human-Centered Practice in Kinesiology (3 Credit Hours)
- SPMT 4960 - Internship in Sports Management (6 Credit Hours) (*Permission of program faculty required*)

Free Electives: 18 Hours

9 credit hours must be courses at the 3000 or 4000 level. No more than 30 total credit hours (including Field of Study courses) may be taken from courses in the Hull College of Business.

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 121 Hours

Bachelor of Business Administration

Program Overview

The Bachelor of Business Administration focuses on the general study of business, including the processes of interchanging goods and services (buying, selling and producing), business organization, and accounting as used in profit-making and nonprofit public and private institutions and agencies. This program prepares individuals to apply business principles and techniques in various occupational settings. This program offers students the opportunity to "customize" their degree.

Degree Total: 121 Hours

Bachelor of Business Administration in Accounting

Program Overview

The accounting program provides significant exposure to courses in business, finance, and management, and is designed to give students an understanding of the theory of accounting as it is used in our society. Bachelor level students are given a broad background of accounting classes to provide the basic tools to pursue an accounting career. Should a student want to specialize in specific areas, he or she would need to pursue a Master of Accountancy program that allows specialization in audit, taxation, or systems.

Bachelor of Business Administration with a Concentration in Corporate Finance

Program Overview

The Bachelor of Business Administration with a concentration in Corporate Finance is focused on the financial management of organizations. It involves making financial decisions that aim to maximize the value of the organization while effectively managing its

financial resources. The primary goal of corporate finance is to ensure that an organization can achieve its financial objectives and create wealth for its owners or shareholders. Our students learn about capital budgeting, working capital management, capital structure, financial decision making, risk management, financial statement analysis, and valuation.

Bachelor of Business Administration with a Concentration in Hospitality Management

Program Overview

Program Mission

The mission of the Hospitality Management program is to prepare career-ready graduates who excel in designing, delivering, and promoting exceptional guest experiences across hospitality, tourism, events, and service-based industries. Grounded in the Hull College of Business commitment to applied learning, innovation, and workforce development, this program equips students with competencies that respond to the evolving needs of Augusta's regional economy and Georgia's high-demand sectors.

The program supports Augusta University's "life-changing, life-saving" mission by developing professionals who enhance community well-being, elevate service quality, and strengthen economic vitality in industries central to the CSRA.

Purpose & Scope of Programming

The purpose of the program is to:

Address regional workforce needs in a sector employing more than 26,000 individuals in the CSRA and representing a major driver of economic growth and visitor engagement.

- Support Augusta University's role in preparing leaders for hospitality, tourism, and service-based industries in alignment with state and regional priorities.
- Provide a focused, professionally oriented curriculum that integrates classroom learning with experiential opportunities, internships, employer partnerships, live projects, and community-based engagement.
- Expand access to applied business education for first-generation students, adult learners, and current hospitality workers seeking advancement.

Organizational Structure

The Hospitality Marketing Concentration is housed within the Hull College of Business, operating under the Applied BBA in Hospitality Management framework.

Unique Discriminators

- **The CSRA's First Hospitality Marketing Pathway-** Hospitality degrees offered elsewhere in the USG are located more than 100 miles from Augusta.
- **Direct Integration with Augusta's High-Profile Events, Healthcare Ecosystem, and Regional Economy-** The program is positioned within a community that annually hosts The Masters Tournament, Ironman, AU Health events, and national-level conferences. This provides unmatched access to experiential learning, internships, capstone projects, and industry partnerships. Students will gain hands-on experience in healthcare hospitality, sports and events marketing, and tourism promotion, aligning with regional workforce demands and emerging economic development priorities.

Admissions Requirements

For more information on admissions requirements, please visit the Office of Admissions website.

Progression and Graduation Requirements

A grade of C or better required in all Field of Study, Business Core, and Concentration courses.

Program Information

- Program Length: 4 Years
- Academic Focus Area: Business
- CIP Code: 52.0101
- Program Code: 1BBAGB-BUAM
- Major Code: BUAM

- Concentration Code: SCMG

Degree Requirements

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

A grade of C or better required in all courses listed below.

- ACCT 2101 - Principles of Accounting I (3 Credit Hours)
- ACCT 2102 - Principles of Accounting II (3 Credit Hours)
- BUSA 1105 - Introduction to Business and Professional Skills (3 Credit Hours)
- ECON 2105 - Macroeconomics (3 Credit Hours)
- ECON 2106 - Microeconomics (3 Credit Hours)
- MINF 2650 - Principles of Data Management and Analysis (3 Credit Hours)

Business Core: 36 Hours

A grade of C or better is required in the courses listed below.

- BUSA 4200 - International Business (3 Credit Hours)
- BUSA 4960 - Undergraduate Internship (3 Credit Hours)
- FINC 3400 - Corporate Finance (3 Credit Hours)
- MGMT 2106 - Legal and Ethical Environment of Business (3 Credit Hours)
- MGMT 3500 - Management Theory and Practice (3 Credit Hours)
- MGMT 4580 - Strategic Management (3 Credit Hours)
- MINF 3625 - Project Management (3 Credit Hours)
- MINF 3650 - Information Systems (3 Credit Hours)
- MKTG 3700 - Principles of Marketing (3 Credit Hours)
- MKTG 3730 - Professional Selling (3 Credit Hours)
- QUAN 3600 - Fundamental Analytics for Business Decision-Making (3 Credit Hours)
- QUAN 4640 - Operations Management (3 Credit Hours)

Concentration Courses: 18 Hours

- MGMT 3510 - Organizational Behavior (3 Credit Hours)
- QUAN 4630 - Business Analytics (3 Credit Hours)
- QUAN 4690 - Supply Chain Management (3 Credit Hours)

Plus select three of the following:

- MGMT 4500 - Human Resource Management (3 Credit Hours)
- MINF 4625 - Advanced Project Management (3 Credit Hours)
- QUAN 4650 - Supplier Relationship Management (3 Credit Hours)
- QUAN 4670 - Logistics (3 Credit Hours)
- QUAN 4680 - Quality Management (3 Credit Hours)

Free Electives: 6 Hours

As needed to complete the credit hours required for graduation. Select from any non-WELL courses.

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 121 Hours

Bachelor of Fine Arts in Art

Program Overview

The Bachelor of Fine Arts in Art is a studio-intensive concentration giving students an exceptional range of creative skills to visually express ideas through fine arts media. These include abstract problem-solving, critical thinking, prototyping, and professional practice skills related to visual arts. This interdisciplinary concentration prepares students for professional careers in fine arts and represents a richly diverse ecosystem of philosophies and practices.

Progression and Graduation Requirements

Portfolio Review

All art majors are required to submit their work for a review by all fulltime Department of Art and Design faculty after the completion of the following courses: ART 1211, ART 1520, ART 1530, and 12 additional hours of studio art courses (21 hours total). Portfolio reviews are scheduled at the end of the fall and spring semesters. Passing the portfolio review is a prerequisite for ART 4999 which is a graduation requirement. Portfolio review occurs on the day after the last day of class of the fall and spring semesters. Transfer students must meet this requirement with the provision that a minimum of three hours be done while in residency at the university and that the transfer courses for the remaining 18 hrs. be equivalent to the required courses listed above. Each student should submit a minimum of 15 studio works. These are to include both two-dimensional and three-dimensional works. See the Department of Art and Design for specific portfolio requirements.

Professional Practice

The BFA degree candidate is required to pass ART 4999 to graduate. The work for this exhibition must be accepted and judged by a fulltime Department of Art and Design faculty mentor and ART 4999 instructor as demonstrating significant quality and quantity to warrant the earning of the BFA degree.

Bachelor of Fine Arts in Art and a Concentration in Animation

Program Overview

The Animation concentration prepares students as capable media professionals competing in a broad entertainment and visualization market. Graduates of the Animation concentration acquire industry standard proficiencies in media literacy, aesthetic development, critical thinking, collaboration, technology adaptability, and creative leadership. Students will utilize cutting-edge techniques to create strong portfolios that include a range of creative skillsets that explore motion, performance, aesthetic appeal, visual communication, and expression. Students are exposed to contemporary professional challenges that include 3D modeling, aesthetic development, preproduction, 2D and 3D animation, technical animation, and visual storytelling. Students will also acquire proficiency in industry standard tools in the game, film, and visualization markets such as the Adobe Creative Cloud, Autodesk Maya, Substance, and ZBrush.

Bachelor of Fine Arts in Art and a Concentration in Printmaking/Photography

Program Overview

Photography and Printmaking combines two rapidly evolving domains with fine arts and commercial applications. This concentration combines the traditional forms of both photography and printmaking with the more contemporary digital applications which keep these areas current in the field. Printmaking techniques include screen printing and relief techniques, while photography teaches both darkroom and digital formats.

Bachelor of Fine Arts in Art and a Concentration in Sculpture/Ceramics

Program Overview

Sculpture and Ceramics offer students a broad range of sculptural experiences in a variety of media. Our studios for both ceramics and sculpture are state-of-the-art facilities where students are inspired to realize their ideas through three-dimensional media. We prepare students for the contemporary art world with offerings in mixed-media and 3D printing for ceramics.

Progression and Graduation Requirements

Portfolio Review

All art majors are required to submit their work for a review by all fulltime Department of Art and Design faculty after the completion of the following courses: ART 1211, ART 1520, ART 1530, and 12 additional hours of studio art courses (21 hours total). Portfolio reviews are scheduled at the end of the fall and spring semesters. Passing the portfolio review is a prerequisite for ART 4999 which is a graduation requirement. Portfolio review occurs on the day after the last day of class of the fall and spring semesters. Transfer students must meet this requirement with the provision that a minimum of three hours be done while in residency at the university and that the transfer courses for the remaining 18 hours be equivalent to the required courses listed above. Each student should submit a minimum of 15 studio works. These are to include both two-dimensional and three-dimensional works. See the Department of Art and Design for specific portfolio requirements.

Professional Practice

The BFA degree candidate is required to pass ART 4999 to graduate. The work for this exhibition must be accepted and judged by a fulltime Department of Art and Design faculty mentor and ART 4999 instructor as demonstrating significant quality and quantity to warrant the earning of the BFA degree.

Program Information

- Program Length: 4 Years
- Academic Focus Area: Arts and Humanities [HUAR]
- CIP Code: 50.0706
- Program Code: 1BFA-ART

Degree Requirements

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

- ART 1211 - Drawing I: An Introduction to Techniques and Methods of Expression (3 Credit Hours)
- ART 1520 - Two-Dimensional Design (3 Credit Hours)
- ART 1530 - Three-Dimensional Design (3 Credit Hours)
- ART 2611 - Art History I: Art of the Ancient World (3 Credit Hours)
- ART 2612 - Art History II: Art of the Modern World (3 Credit Hours)
- ART 2700 - Color Experience and Theory (3 Credit Hours)

Major Concentration: 60 Hours

- ART 3212 - Drawing II (3 Credit Hours)
- ART 3213 - Drawing III: Figure Drawing (3 Credit Hours)
- ART 3221 - Painting I for Art Majors and Art Minors (3 Credit Hours)
- ART 3231 - Photography I for Art Majors and Art Minors (3 Credit Hours)
- ART 3251 - Printmaking I (3 Credit Hours)
- ART 3311 - Sculpture: Carving I (3 Credit Hours)
- ART 3401 - Ceramics I for Art Majors and Art Minors (3 Credit Hours)
- ART 3402 - Ceramics II (3 Credit Hours)
- ART 3721 - Aesthetics and the Philosophy of Art (3 Credit Hours)
- ART 4341 - Sculpture: Mixed Media I (3 Credit Hours)

Choose two: 6 Hours

- ART 3331 - Sculpture: Figure Modeling I (3 Credit Hours)
- ART 4321 - Sculpture: Casting I (3 Credit Hours)
- ART 4331 - Sculpture: Installation I (3 Credit Hours)

Sculpture or Ceramics: 3 Hours

Choose one from the following:

- ART 3312 - Sculpture: Advanced Carving (3 Credit Hours)

- ART 3313 - Sculpture: Advanced Techniques in Carving (3 Credit Hours)
- ART 3403 - Ceramics III (3 Credit Hours)
- ART 4322 - Sculpture: Casting II (3 Credit Hours)
- ART 4323 - Sculpture: Casting III (3 Credit Hours)
- ART 4342 - Sculpture: Mixed Media II (3 Credit Hours)
- ART 4343 - Sculpture: Mixed Media III (3 Credit Hours)
- ART 4404 - Ceramics IV (3 Credit Hours)
- ART 4405 - Ceramics V (3 Credit Hours)
- ART 4406 - Ceramics VI (3 Credit Hours)

Art History: 6 Hours

Choose two upper division courses from the following:

- ART 4620 - Art Since WWII (3 Credit Hours)
 - ART 4640 - Raphael (3 Credit Hours)
 - ART 4650 - Art of the Renaissance (3 Credit Hours)
 - SABR 4930 - Studies Abroad (1 to 12 Credit Hours) *
- * with Art History instructor approval

Studio Art Electives: 12 Hours

- Any 3000/4000 level Studio course
- Any 3000/4000 level Studio course
- Any 3000/4000 level Studio course
- Any 3000/4000 level Studio course

Professional Practice: 3 Hours

- ART 4999 - Professional Practice (BFA) (3 Credit Hours)

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 121 Hours

Bachelor of Fine Arts in Digital and Visual Storytelling

Program Overview

Bachelor of Fine Arts is a practice-intensive concentration giving students an exceptional range of creative skills to visually express ideas through film and performance. These include abstract problem-solving, critical thinking, performing, creative visioning, digital storytelling, and other professional practice skills related to visual and performing arts. This interdisciplinary concentration prepares students for professional careers in film and theatre, as well as a wide variety of creative storytelling- and communication-related roles through digital and social media, and it represents a richly diverse ecosystem of philosophies and practices.

Admissions Information

For more information on admissions requirements, please visit the Office of Admissions website.

Progression and Graduation Requirements

- Students are expected to earn a C or better in their major coursework, and to fulfill all curricular requirements, including the capstone course FITH 4800, in order to graduate.

Program Information

- Program Length: 4 Years
- Academic Focus Area: Arts and Humanities [HUAR]
- CIP Code: 50.0101
- Program Code: 1BFA-DIVS

Degree Requirements

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

Required Field of Study Courses: 12 Hours

- ART 1530 - Three-Dimensional Design (3 Credit Hours)
- FITH 2000 - Approaches to Acting (3 Credit Hours)
- FITH 2001 - The Art of Film (3 Credit Hours)
- FITH 2010 - Performance Composition (3 Credit Hours)

Elective Field of Study Courses: 6 Hours

Select two of the following:

- ANTH 2011 - Cultural Anthropology (3 Credit Hours)
- ART 1520 - Two-Dimensional Design (3 Credit Hours)
- ART 2611 - Art History I: Art of the Ancient World (3 Credit Hours)
- ART 2612 - Art History II: Art of the Modern World (3 Credit Hours)
- ART 2700 - Color Experience and Theory (3 Credit Hours)
- GFA 1000 - Introduction to On-Set Film Production (6 Credit Hours)
- GFA 2000 - Film and Television Production Internship (6 Credit Hours)
- GFA 2010 - Set Construction and Scenic Painting (6 Credit Hours)
- GFA 2050 - Introduction to Special Makeup Effects (6 Credit Hours)

Major Courses: 60 Hours

- FITH 3000 - Voice and Movement (3 Credit Hours)

- FITH 3050 - Post-Production (3 Credit Hours)
- FITH 3001 - History of Performance I (3 Credit Hours)
- FITH 3002 - History of Performance II (3 Credit Hours)
- FITH 3020 - Directing for the Stage (3 Credit Hours)
- FITH 3021 - Directing for Film (3 Credit Hours)
- FITH 3030 - Cinematography (3 Credit Hours)

Writing-Intensive Course: 3 Hours

Select one of the following:

- FITH 3010 - Writing for the Stage (3 Credit Hours)
- FITH 3011 - Screenwriting (3 Credit Hours)

Practice-Intensive Courses: 9 Hours

Select three of the following:

- ART 4341 - Sculpture: Mixed Media I (3 Credit Hours)
- FITH 3200 - Place and Context (3 Credit Hours)
- FITH 4000 - Theory and Practice (3 Credit Hours)
- FITH 4150 - Performance Art (3 Credit Hours)
- FITH 4960 - Internship (3 Credit Hours)

Production-Intensive Course: 3 Hours

Select one of the following:

- FITH 4500 - Short Film Production (3 Credit Hours)
- FITH 4600 - Research in Performance (3 Credit Hours)

Upper-Division Electives: 21 Hours

Select seven of the following:

- ART 3565 - Motion Graphics: Moving Imagery and Type Motion (3 Credit Hours)
- ART 3600 - Animation History and Fundamentals (3 Credit Hours)
- ANTH 3001 - Methods in Cultural Anthropology (4 Credit Hours)
- COMM 3010 - Advanced Public Speaking (3 Credit Hours)
- COMM 3120 - Television Production (3 Credit Hours)
- COMM 3320 - Digital Editing (3 Credit Hours)
- COMM 4000 - Communication Law and Ethics (3 Credit Hours)
- COMM 4010 - Preparing and Producing Visual Media (3 Credit Hours)
- COMM 4400 - Media Editing and Production (3 Credit Hours)
- ENGL 3620 - Writing for the Theatre (3 Credit Hours)
- ENGL 3640 - The Art of Fiction (3 Credit Hours)
- ENGL 3660 - The Art of the Essay (3 Credit Hours)
- ENGL 4660 - Advanced Creative Nonfiction Workshop (3 Credit Hours)
- GFA 3000 or 4000 Level Course

Any upper-level FITH course not counted elsewhere:

- FITH 3101 - Performance Practicum (1 to 3 Credit Hours)

- FITH 3102 - Production Practicum (1 to 3 Credit Hours)
- FITH 3300 - Combat for Stage and Screen (3 Credit Hours)
- FITH 4510 - Feature Film Production (3 Credit Hours)
- FITH 4520 - Music Video Production (3 Credit Hours)
- FITH 4530 - Experimental Film Production (3 Credit Hours)
- FITH 4610 - Advanced Acting Styles (3 Credit Hours)
- FITH 4620 - Place, Performance, and Authenticity (3 Credit Hours)
- FITH 4630 - Visual Culture as Performance (3 Credit Hours)
- FITH 4920 - Study Abroad: Topics in International Film and Theatre (3 Credit Hours)
- FITH 4950 - Special Topics (3 Credit Hours)

Capstone Project: 3 Hours

- FITH 4800 - Creative Expression through Multiple Media (3 Credit Hours)

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 121 Hours

Bachelor of Music in Music Education and a Concentration in Instrumental

Bachelor of Science in Biology

Program Overview

The major in biology provides a broad education in the fundamentals of biology via the classroom setting and through hands-on learning in laboratories and at field sites. The curriculum prepares students for graduate school and professional programs such as medicine, dentistry, veterinary medicine, pharmacy, and related fields. To enhance professional development and employment potential, students are encouraged to obtain specialized training by participating in basic and applied research in ecology, genetics, microbiology, plant physiology, aquatic biology, cell and molecular biology, physiology, cancer biology, and more.

biology@augusta.edu

Admissions Information

For more information on admissions requirements, please visit the Office of Admissions website.

Progression and Graduation Requirements

- Double or triple majors, or major-minor combinations, that combine biology and/or cell and molecular biology are not permitted.
- A grade of C or better is required in all Field of Study, Required Lower Division, Major Concentration, and Upper Division Elective courses.
- Satisfactory completion of the ETS Major Field Test
- If a student does not successfully complete a biology course after two attempts (i.e., they receive a D, F, W, or WF), the student will be limited to specific registration times for any subsequent attempts. Any student meeting these criteria will not be allowed to register for the course until the last day of late registration. Appeals may be made to the Chair of the Department of Biological Sciences in hardship cases.
- Major Concentration hours and Upper Elective hours must total at least 39 hours.

Program Information

- Program Length: 4 Years
- Academic Focus Area: Science and Mathematics [STEM]
- CIP Code: 26.0101
- Program Code: 1BS-BIOLOGY

- Major Code: BIOL

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

Grade of C or better is required in all of the following courses.

- BIOL 1107 - Principles of Biology I (3 Credit Hours)
- BIOL 1107L - Principles of Biology I Laboratory (1 Credit Hour)
- BIOL 1108 - Principles of Biology II (3 Credit Hours)
- BIOL 1108L - Principles of Biology II Laboratory (1 Credit Hour)
- CHEM 1211 - Principles of Chemistry I (3 Credit Hours)
- CHEM 1211L - Principles of Chemistry I Laboratory (1 Credit Hour)
- CHEM 1212 - Principles of Chemistry II (3 Credit Hours)
- CHEM 1212L - Principles of Chemistry II Laboratory (1 Credit Hour)

Select one of the following:

- Foreign Language
- BUSA 1105 - Introduction to Business and Professional Skills (3 Credit Hours)
- CHEM 2410 - Chemistry of Organic and Biomolecules (4 Credit Hours)
- CSCI 1200 - Introduction to Computers and Programming (3 Credit Hours)
- CSCI 1210 - Introduction to Java Programming (3 Credit Hours)
- CSCI 1301 - Principles of Computer Programming I (4 Credit Hours)
- ENGL 2680 - Professional and Technical Writing (3 Credit Hours)
- MATH 2011 - Calculus and Analytical Geometry I (4 Credit Hours)
- MILS 1021 - Basic Leadership (3 Credit Hours)
- MILS 2011 - Individual Leadership Studies (3 Credit Hours)
- MILS 2021 - Leadership and Teamwork (3 Credit Hours)
- MINF 2201 - Microcomputer Applications (3 Credit Hours)

Required Lower Division Courses: 2-16 Hours

- May be used in the Core IMPACTS Curriculum and spill over hours from Field of Study Courses
- Grade of C or better is required in all of these courses

1.

- MATH 1401 - Elementary Statistics (3 Credit Hours)

2.

- CHEM 2410 - Chemistry of Organic and Biomolecules (4 Credit Hours)
or
- CHEM 3411 - Organic Chemistry I (3 Credit Hours) and CHEM 3411L - Organic Chemistry I Laboratory (1 Credit Hour)

3.

- PHYS 1111 - Introductory Physics I (3 Credit Hours) , PHYS 1111L - Introductory Physics I Laboratory (1 Credit Hour) and

- PHYS 1112 - Introductory Physics II (3 Credit Hours) , PHYS 1112L - Introductory Physics II Laboratory (1 Credit Hour)
or
- PHYS 2211 - Principles of Physics I (4 Credit Hours) and
- PHYS 2212 - Principles of Physics II (4 Credit Hours)

Major Concentration: 28 Hours Minimum

A grade of C or better is required in all these courses.

- BIOL 3000 - General Botany (4 Credit Hours)
 - BIOL 3100 - Zoology (4 Credit Hours)
 - BIOL 3200 - Genetics (3 Credit Hours)
 - BIOL 3400 - Cell Biology (3 Credit Hours)
 - BIOL 3700 - Molecular Biology Laboratory (3 Credit Hours)
 - BIOL 4100 - Principles of Ecology (4 Credit Hours)
- Select two additional upper-division biology courses. At least one must be a 4 hour course.

Upper Division Electives: 10 Hours Minimum

- A Grade of C or better is required in all these courses.
- To be chosen with the assistance of the student's faculty advisor.

Free Electives: 5-16 Hours

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Total Hours for the Degree: 124

Bachelor of Science in Biology and a Concentration in Ecology

Program Overview

The major in biology provides a broad education in the fundamentals of biology via the classroom setting and through hands-on learning in laboratories and at field sites. The curriculum prepares students for graduate school and professional programs such as medicine, dentistry, veterinary medicine, pharmacy, and related fields. To enhance professional development and employment potential, students are encouraged to obtain specialized training by participating in basic and applied research in ecology, genetics, microbiology, plant physiology, aquatic biology, cell and molecular biology, physiology, cancer biology, and more.

The focus on ecology courses for the concentration provides students with the opportunity to intensively explore current diverse topics such as biodiversity, aquatic resources, environmental pollution, toxicology, invasive species, natural resource conservation, and sustainability; and through unique laboratory and field experiences they will learn state of the art techniques in experimental methodologies for monitoring, sampling, and accessing ecosystems.

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

A grade of C or better is required in all Field of Study courses.

Required Field of Study Courses

- BIOL 1107 - Principles of Biology I (3 Credit Hours)
- BIOL 1107L - Principles of Biology I Laboratory (1 Credit Hour)
- BIOL 1108 - Principles of Biology II (3 Credit Hours)
- BIOL 1108L - Principles of Biology II Laboratory (1 Credit Hour)
- CHEM 1211 - Principles of Chemistry I (3 Credit Hours)
- CHEM 1211L - Principles of Chemistry I Laboratory (1 Credit Hour)
- CHEM 1212 - Principles of Chemistry II (3 Credit Hours)
- CHEM 1212L - Principles of Chemistry II Laboratory (1 Credit Hour)

Elective Field of Study Course

Select one of the following:

- BUSA 1105 - Introduction to Business and Professional Skills (3 Credit Hours)
- CHEM 2410 - Chemistry of Organic and Biomolecules (4 Credit Hours)
- CSCI 1200 - Introduction to Computers and Programming (3 Credit Hours)
- CSCI 1210 - Introduction to Java Programming (3 Credit Hours)

- CSCI 1301 - Principles of Computer Programming I (4 Credit Hours)
- ENGL 2680 - Professional and Technical Writing (3 Credit Hours)
- MATH 2011 - Calculus and Analytical Geometry I (4 Credit Hours)
- MILS 1021 - Basic Leadership (3 Credit Hours)
- MILS 2011 - Individual Leadership Studies (3 Credit Hours)
- MILS 2021 - Leadership and Teamwork (3 Credit Hours)
- MINF 2201 - Microcomputer Applications (3 Credit Hours)
- Foreign Language Course

Major Courses: 18-19 Hours

- BIOL 3000 - General Botany (4 Credit Hours)
- BIOL 3100 - Zoology (4 Credit Hours)
- BIOL 3200 - Genetics (3 Credit Hours)
- or BIOL 3400 - Cell Biology (3 Credit Hours)
- BIOL 4100 - Principles of Ecology (4 Credit Hours)
- BIOL 3000- or 4000-Level Elective Course (3 or 4 Credit Hours)

Concentration Courses: 11 to 12 Hours

Required Concentration Course

- BIOL 4150 - Evolutionary Biology (4 Credit Hours)

Elective Concentration Courses

Select two of the following. One must be a 4-credit course.

- BIOL 3380 - Animal Behavior (4 Credit Hours)
- BIOL 3810 - Ecotoxicology (4 Credit Hours)
- BIOL 3820 - Marine Pollution (4 Credit Hours)
- BIOL 3050 - Economic Botany (4 Credit Hours)
- BIOL 4000 - Plant Physiology (4 Credit Hours)
- BIOL 4110 - Urban Ecology (4 Credit Hours)
- BIOL 4120 - Community Field Ecology (4 Credit Hours)
- BIOL 4420 - Herpetology (4 Credit Hours)
- BIOL 4430 - Ornithology (4 Credit Hours)
- BIOL 4500 - Ichthyology (4 Credit Hours)
- BIOL 4520 - Marine Biology (4 Credit Hours)
- BIOL 4540 - Marine Ecology (4 Credit Hours)
- BIOL 4950 - Selected Topics (1 to 10 Credit Hours)

Free Electives: 28 to 31 Hours

- Upper-Division Electives – select any 3000 or 4000 level courses (14 Credit Hours)
- Free Electives - select any courses (14 to 17 Credit Hours)

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Total Hours for the Degree: 124

Bachelor of Science in Biomedical Systems Engineering

Program Overview

The Bachelor of Science in Biomedical Systems Engineering (BMSE) is a four-year degree program offered by the School of Computer and Cyber Sciences (SCCS), located in the Georgia Cyber Center. The program concentrates on the biomedical and health informatics systems focused on people, processes, and organizations in healthcare. This program is aimed at improving the understanding and management of biomedicine systems and the ability to develop digital healthcare-oriented systems and technologies, with security and integrity guarantees.

Admissions Information

For more information on admissions requirements, please visit the Office of Admissions website.

Progression and Graduation Requirements

- A grade of C or better is required in all Field of Study, Major Requirements, Concentration, and Major Elective courses
- Students must take PHIL 2030 and pass with a C or better
- Students must take ECON 2105 or ECON 2106 and pass with a C or better

Program Information

- Program Length: 4 Years
- Academic Focus Area: Computing [ITCS]
- CIP Code: 14.0501
- Program Code: 1BS-BSEN

Degree Requirements

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

A grade of C or better is required in all courses listed below.

- MATH 2011 - Calculus and Analytical Geometry I (4 Credit Hours)
- MATH 2012 - Calculus and Analytical Geometry II (4 Credit Hours)
- MATH 2013 - Calculus and Analytical Geometry III (4 Credit Hours)
- CSCI 1301 - Principles of Computer Programming I (4 Credit Hours)

- CYBR 2600 - Introduction to Networking and Cyber Security (4 Credit Hours)
- ENGR 2060 - Programming for Science and Engineering (4 Credit Hours)

Major Courses: 50 Hours

- BIOL 2251 - Anatomy and Physiology I (3 Credit Hours)
- BMSE 1901 - Introduction to Biomedical System Engineering (3 Credit Hours)
- BMSE 2101 - Overview of Health Systems and Processes (3 Credit Hours)
- BMSE 3501 - Biomedical System Security (3 Credit Hours)
- BMSE 4711 - Senior Design 1 (3 Credit Hours)
- BMSE 4712 - Senior Design 2 (2 Credit Hours)
- CHEM 1211 - Principles of Chemistry I (3 Credit Hours)
- CHEM 1211L - Principles of Chemistry I Laboratory (1 Credit Hour)
- CHEM 1212 - Principles of Chemistry II (3 Credit Hours)
- CHEM 1212L - Principles of Chemistry II Laboratory (1 Credit Hour)
- CYBR 3200 - Cyber Network Defense and Counter Measures (3 Credit Hours)
- HINF 3209 - Principles of Health Informatics and Information Management (4 Credit Hours)
- HINF 4209 - Health Law and Ethics (3 Credit Hours)
- MATH 3020 - Differential Equations (3 Credit Hours)
- MATH 3250 - Introduction to Statistics and Data Analysis (3 Credit Hours)
- PHYS 3011 - Electronics I (4 Credit Hours)
- PHYS 3012 - Electronics II (4 Credit Hours)

Electives: 15 Hours

Select from the following:

- BMSE 2201 - Biomedical Visualization (3 Credit Hours)
- BMSE 3101 - Biomechanics (3 Credit Hours)
- BMSE 3201 - Biomedical Signal Processing (3 Credit Hours)
- BMSE 3202 - Biomedical Applications of AI + ML (3 Credit Hours)
- BMSE 3601 - Biomedical Instrumentation (3 Credit Hours)
- BMSE 3602 - Biomedical Data Analytics (3 Credit Hours)
- BMSE 3901 - Modeling and Simulation of Biomedical Systems (3 Credit Hours)
- BMSE 4601 - Biomedical Imaging (3 Credit Hours)
- CSCI 3030 - Mathematical Structures for Computer Science (3 Credit Hours)
- MATH 3280 - Linear Algebra (3 Credit Hours)

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 126 Hours

Bachelor of Science in Cell and Molecular Biology

Program Overview

The major in cell and molecular biology provides students with the opportunity to intensively explore the functions of genes, proteins, and cells at the molecular level; and through lab experiences they will learn state of the art techniques such as polymerase chain reaction (PCR), genetic cloning, protein isolation and identification, and more. This program of study will provide excellent preparation

for those pursuing advanced degrees, professional healthcare programs, or employment in biotechnology. To enhance professional development and employment potential, students are encouraged to obtain specialized training by participating in basic and applied research in genetics, microbiology, cell and molecular biology, physiology, cancer biology, and more.

Admissions Information

For more information on admissions requirements, please visit the Office of Admissions website.

Progression and Graduation Requirements

- Double or triple majors, or major-minor combinations, that combine biology and/or cell and molecular biology are not permitted.
- A grade of C or better is required in all Area F, Required Lower Division, Major Concentration, and Required Upper Division Courses
- Satisfactory completion of the ETS Major Field Test
- If a student does not successfully complete a biology course after two attempts (i.e., they receive a D, F, W, or WF), the student will be limited to specific registration times for any subsequent attempts. Any student meeting these criteria will not be allowed to register for the course until the last day of late registration. Appeals may be made to the Chair of the Department of Biological Sciences in hardship cases.
- Major Concentration hours and Upper Division Elective hours must total at least 43 hours.

Program Information

- Program Length: 4 Years
- Academic Focus Area: Science and Mathematics [STEM]
- CIP Code: 26.0406
- Program Code: 1BS-CELL MBI

Degree Requirements

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

A grade of C or better is required in all of the following courses.

- BIOL 1107 - Principles of Biology I (3 Credit Hours) and BIOL 1107L - Principles of Biology I Laboratory (1 Credit Hour)
- BIOL 1108 - Principles of Biology II (3 Credit Hours) and BIOL 1108L - Principles of Biology II Laboratory (1 Credit Hour)
- CHEM 1211 - Principles of Chemistry I (3 Credit Hours) and CHEM 1211L - Principles of Chemistry I Laboratory (1 Credit Hour)
- CHEM 1212 - Principles of Chemistry II (3 Credit Hours) and CHEM 1212L - Principles of Chemistry II Laboratory (1 Credit Hour)

Plus select one of the following:

- BUSA 1105 - Introduction to Business and Professional Skills (3 Credit Hours)
- CHEM 2410 - Chemistry of Organic and Biomolecules (4 Credit Hours)
- CSCI 1200 - Introduction to Computers and Programming (3 Credit Hours)
- CSCI 1210 - Introduction to Java Programming (3 Credit Hours)
- CSCI 1301 - Principles of Computer Programming I (4 Credit Hours)
- ENGL 2680 - Professional and Technical Writing (3 Credit Hours)
- MATH 2011 - Calculus and Analytical Geometry I (4 Credit Hours)
- MILS 1021 - Basic Leadership (3 Credit Hours)
- MILS 2011 - Individual Leadership Studies (3 Credit Hours)
- MILS 2021 - Leadership and Teamwork (3 Credit Hours)
- MINF 2201 - Microcomputer Applications (3 Credit Hours)
- Foreign Language Course (3 Credit Hours)

Required Lower-Division Courses: 1-12 Hours

A grade of C or better is required in all these courses. May be used in the Core IMPACTS Curriculum and spill over hours from Field of Study courses.

Math Course

- MATH 1401 - Elementary Statistics (3 Credit Hours)

Physics Courses

Select one of the following options:

Option 1

- PHYS 1111 - Introductory Physics I (3 Credit Hours)
- PHYS 1111L - Introductory Physics I Laboratory (1 Credit Hour)
- PHYS 1112 - Introductory Physics II (3 Credit Hours)
- PHYS 1112L - Introductory Physics II Laboratory (1 Credit Hour)

Option 2

- PHYS 2211 - Principles of Physics I (4 Credit Hours)
- PHYS 2212 - Principles of Physics II (4 Credit Hours)

Major Concentration: 29-32 Hours

A grade of C or better is required in all courses.

Required Courses

- BIOL 3200 - Genetics (3 Credit Hours)
- BIOL 3400 - Cell Biology (3 Credit Hours)
- BIOL 3700 - Molecular Biology Laboratory (3 Credit Hours)
- BIOL 4100 - Principles of Ecology (4 Credit Hours)
- BIOL 4700 - Advanced Cell Biology (3 Credit Hours)

Electives

Select four additional upper-division biology courses. At least three must come from the list of selected elective courses below, and at least one of these selected electives must be a 4-credit hour course.

- BIOL 3320 - Comparative Vertebrate Physiology (4 Credit Hours)
- BIOL 3350 - Histology (4 Credit Hours)
- BIOL 3370 - Neurobiology (3 Credit Hours)
- BIOL 3500 - Microbiology (4 Credit Hours)
- BIOL 4000 - Plant Physiology (4 Credit Hours)
- BIOL 4420 - Herpetology (4 Credit Hours)
- BIOL 4630 - Reproductive Physiology (4 Credit Hours)
- BIOL 4650 - Endocrinology (4 Credit Hours)
- BIOL 4680 - Pathophysiology (3 Credit Hours)
- BIOL 4720 - Principles of Pharmacology (3 Credit Hours)
- BIOL 4730 - Immunology (3 Credit Hours)
- BIOL 4740 - Molecular Pathogenesis (4 Credit Hours)
- BIOL 4750 - Developmental Biology (4 Credit Hours)
- BIOL 4780 - Molecular Carcinogenesis (3 Credit Hours)
- BIOL 4950 - Selected Topics (1 to 10 Credit Hours) (*Advisor approval required*)

Required Upper Division Courses: 14 Hours

A grade of C or better is required in all these courses.

- CHEM 3411 - Organic Chemistry I (3 Credit Hours)
- CHEM 3411L - Organic Chemistry I Laboratory (1 Credit Hour)
- CHEM 3412 - Organic Chemistry II (3 Credit Hours)
- CHEM 3412L - Organic Chemistry II Laboratory (1 Credit Hour)
- CHEM 4551 - Biochemistry I: Physical Biochemistry (3 Credit Hours)
- CHEM 4552 - Biochemistry II: Bioenergetics and Metabolism (3 Credit Hours)

Free Electives: 14-17 Hours

As needed to complete the credit hours required for graduation. Select from any non-WELL courses.

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 121 Hours

Bachelor of Science in Chemistry and a Concentration in Biochemistry

Program Overview

The AU chemistry program is accredited by an accepted accrediting body with students having the option of obtaining an American Chemical Society (ACS) certified degree. The biochemistry concentration provides a flexible curriculum to allow students to customize their education to suit their career aspirations. This flexibility is especially well-suited for students completing pre-medical, pre-dental, or pre-pharmacy requirements. Students can focus on a secondary area with a minor, or customize their degree with upper-division electives in any field as well as undergraduate research.

Admissions Information

For more information on admissions requirements, please visit the Office of Admissions website.

Progression and Graduation Requirements

- Completion of ACS Diagnostic of Undergraduate Chemistry Knowledge Exam with a minimum score of 25 correct.
- A grade of C or better is required in all minor or upper division electives.
- CHEM 4990 and CHEM 4993 (not to exceed 3 hours credit towards major electives) are highly recommended as minor or upper division electives.

Program Information

- Program Length: 4 Years
- Academic Focus Area: Science and Mathematics [STEM]
- CIP Code: 40.0501
- Program Code: 1BS-CHEM

Degree Requirements

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

- CHEM 1211 - Principles of Chemistry I (3 Credit Hours)
- CHEM 1211L - Principles of Chemistry I Laboratory (1 Credit Hour)
- CHEM 1212 - Principles of Chemistry II (3 Credit Hours)
- CHEM 1212L - Principles of Chemistry II Laboratory (1 Credit Hour)
- CHEM 2810 - Quantitative Analysis (5 Credit Hours)
- MATH 2011 - Calculus and Analytical Geometry I (4 Credit Hours) (*1 hour applied here; the remainder in Core IMPACTS*)
- PHYS 1111 - Introductory Physics I (3 Credit Hours) and PHYS 1111L - Introductory Physics I Laboratory (1 Credit Hour)

Non-Core Courses: 8 Hours

- MATH 2012 - Calculus and Analytical Geometry II (4 Credit Hours)
- PHYS 1112 - Introductory Physics II (3 Credit Hours)
- PHYS 1112L - Introductory Physics II Laboratory (1 Credit Hour)

Major Concentration: 34 Hours

- CHEM 3411 - Organic Chemistry I (3 Credit Hours)
- CHEM 3411L - Organic Chemistry I Laboratory (1 Credit Hour)
- CHEM 3412 - Organic Chemistry II (3 Credit Hours)

- CHEM 3412L - Organic Chemistry II Laboratory (1 Credit Hour)
- CHEM 3721 - Physical Chemistry I (3 Credit Hours)
- CHEM 3820 - Laboratory Management and Safety (2 Credit Hours)
- CHEM 4210 - Advanced Inorganic Chemistry (3 Credit Hours)
- CHEM 4450 - Advanced Organic Chemistry: Synthesis (3 Credit Hours)
or CHEM 4460 - Advanced Organic Chemistry: Mechanisms (3 Credit Hours)
- CHEM 4551 - Biochemistry I: Physical Biochemistry (3 Credit Hours)
- CHEM 4552 - Biochemistry II: Bioenergetics and Metabolism (3 Credit Hours)
- CHEM 4553 - Biochemistry Laboratory (1 Credit Hour)
- CHEM 4700 - Integrated Laboratory (3 Credit Hours)
- CHEM 4800 - Advanced Seminar (1 Credit Hour)
- CHEM 4840 - Instrumental Analysis (4 Credit Hours)

Minor or Upper Division Electives and Free Electives: 18 Hours

Minor or Upper Division Electives: 11-14 Hours

A grade of C or better is required in all courses. To be chosen with the assistance of the student's faculty advisor. The following courses are highly recommended:

- CHEM 3990 - Undergraduate Research (0 to 3 Credit Hours)
- CHEM 4990 - Undergraduate Research (0 to 3 Credit Hours)
- CHEM 4993 - Research Thesis (1 Credit Hour) (*not to exceed 3 hours credit towards major electives*)

Free Electives: 4-7 Hours

Select 4-7 hours of electives from any non-WELL courses to complete the requirement.

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 121 Hours

Bachelor of Science in Chemistry and a Concentration in Forensic Science

Program Overview

The AU chemistry program is accredited by an accepted accrediting body with students having the option of obtaining an American Chemical Society (ACS) certified degree. The forensic science concentration emphasizes chemical and biochemical analysis applicable to both forensic labs as well as more broadly. Research labs and industrial quality control labs also have a high demand for analysis and provide many good employment opportunities. This concentration provides a flexible curriculum to allow students to customize their education to suit their career aspirations. This flexibility is well-suited for students completing pre-medical, pre-dental, or pre-pharmacy requirements. Major electives provide breadth of experience through coursework in biology as well as non-science courses in judicial process or communications to complement a rigorous chemistry curriculum. Coursework in judicial process is important for a forensic scientist, and advanced communications skills are universally valued by employers.

Progression and Graduation Requirements

- A minor is not required for this degree.
- Completion of ACS Diagnostic of Undergraduate Chemistry Knowledge Exam with a minimum score of 25 correct.
- A grade of C or better is required in all minor or upper division electives.

Program Information

- Program Length: 4 Years
- Academic Focus Area: Science and Mathematics [STEM]
- CIP Code: 40.0501
- Program Code: 1BS-CHEM

Degree Requirements

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

- CHEM 1211 - Principles of Chemistry I (3 Credit Hours)
- CHEM 1211L - Principles of Chemistry I Laboratory (1 Credit Hour)
- CHEM 1212 - Principles of Chemistry II (3 Credit Hours)
- CHEM 1212L - Principles of Chemistry II Laboratory (1 Credit Hour)
- CHEM 2810 - Quantitative Analysis (5 Credit Hours)
- PHYS 1111 - Introductory Physics I (3 Credit Hours)
- PHYS 1111L - Introductory Physics I Laboratory (1 Credit Hour)
- PHYS 1112 - Introductory Physics II (3 Credit Hours)
- PHYS 1112L - Introductory Physics II Laboratory (1 Credit Hour)

Lower-Level Requirements: 6-7 Hours

Includes spillover hours from Field of Study Courses.

- MATH 1401 - Elementary Statistics (3 Credit Hours) *(if not taken in Core IMPACTS)*
- or DATA 1501 - Introduction to Data Science (3 Credit Hours)
- MATH 2011 - Calculus and Analytical Geometry I (4 Credit Hours) *(if not taken in Core IMPACTS)*
- PHYS 1112 - Introductory Physics II (3 Credit Hours) *(if not taken in Core IMPACTS)*
- PHYS 1112L - Introductory Physics II Laboratory (1 Credit Hour)

Major Concentration: 26 Hours

- CHEM 3411 - Organic Chemistry I (3 Credit Hours)
- CHEM 3411L - Organic Chemistry I Laboratory (1 Credit Hour)
- CHEM 3412 - Organic Chemistry II (3 Credit Hours)
- CHEM 3412L - Organic Chemistry II Laboratory (1 Credit Hour)
- CHEM 3820 - Laboratory Management and Safety (2 Credit Hours)
- CHEM 4100 - Forensic Chemistry (4 Credit Hours)
- CHEM 4551 - Biochemistry I: Physical Biochemistry (3 Credit Hours)
- CHEM 4553 - Biochemistry Laboratory (1 Credit Hour)
- CHEM 4700 - Integrated Laboratory (3 Credit Hours)
- CHEM 4800 - Advanced Seminar (1 Credit Hour)
- CHEM 4840 - Instrumental Analysis (4 Credit Hours)

Major and Upper Division Electives: 17 Hours

Select two CHEM, one BIOL and one non-science course from the list below. Select from other courses in the list (CHEM or BIOL only) to total a minimum of 17 credit hours.

- CHEM 3000 - Introduction to Nuclear Science (3 Credit Hours)
- CHEM 3721 - Physical Chemistry I (3 Credit Hours)
- CHEM 3990 - Undergraduate Research (0 to 3 Credit Hours) , CHEM 4990 - Undergraduate Research (0 to 3 Credit Hours), and CHEM 4993 - Research Thesis (1 Credit Hour) *(not to exceed 3 hours credit total towards major electives)* - **highly recommended**
- CHEM 4130 - Water Chemistry (3 Credit Hours)
- CHEM 4210 - Advanced Inorganic Chemistry (3 Credit Hours)
- CHEM 4410 - Heterocyclic and Natural Product Chemistry (3 Credit Hours)
- CHEM 4450 - Advanced Organic Chemistry: Synthesis (3 Credit Hours) or CHEM 4460 - Advanced Organic Chemistry: Mechanisms (3 Credit Hours)
- CHEM 4552 - Biochemistry II: Bioenergetics and Metabolism (3 Credit Hours)
- CHEM 4620 - Principles of Medicinal Chemistry (3 Credit Hours)
- CHEM 4950 - Selected Topics (1 to 4 Credit Hours)
- BIOL 3200 - Genetics (3 Credit Hours)
- BIOL 3350 - Histology (4 Credit Hours)
- BIOL 3400 - Cell Biology (3 Credit Hours)
- BIOL 3500 - Microbiology (4 Credit Hours)
- COMM 3100 - Communications for Professionals (3 Credit Hours)
- POLS 3301 - Judicial Process (3 Credit Hours)

Free Electives: 10-11 Hours

As needed to complete the credit hours required for graduation. Select from any non-WELL courses.

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 121 Hours

Bachelor of Science in Chemistry and a Concentration in Medicinal Chemistry

Program Overview

The AU chemistry program is accredited by an accepted accrediting body with students having the option of obtaining an American Chemical Society (ACS) certified degree. The medicinal chemistry concentration focuses the curriculum on organic and analytical areas to complement the medicinal chemistry courses. Students will learn about drug design, mechanism of action of drugs, classes of drugs, and modern methods of synthesis. Major elective hours allow customization of the degree and facilitate the ability to satisfy prerequisite courses for pre-medical, pre-dental, or pre-pharmacy preparation. Participation in undergraduate research may be completed for credit towards major electives and is highly recommended.

- CHEM 4700 - Integrated Laboratory (3 Credit Hours)
- CHEM 4800 - Advanced Seminar (1 Credit Hour)
- CHEM 4840 - Instrumental Analysis (4 Credit Hours)

Major Electives: 6 Hours

Select upper-division CHEM 3XXX or 4XXX courses for a minimum total of 6 hours. The following are highly recommended:

- CHEM 3990 - Undergraduate Research (0 to 3 Credit Hours)
- CHEM 4990 - Undergraduate Research (0 to 3 Credit Hours)
- CHEM 4993 - Research Thesis (1 Credit Hour) (not to exceed 3 hours credit towards major electives)

Free Electives: 7 Hours

As needed to complete the credit hours required for graduation. Select from any non-WELL courses.

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Total Hours for the Degree: 124 Hours

Bachelor of Science in Chemistry and a Concentration in Nuclear Science

Program Overview

The AU chemistry program is accredited by an accepted accrediting body with students having the option of obtaining an American Chemical Society (ACS) certified degree. Students will explore the basic properties of the nucleus, nuclear decay, radiation properties, and applications with each of these topics. Radiation detection and measurements explored in a laboratory course. Local and regional nuclear industry provides numerous employment opportunities. The flexibility in this program is well-suited for students completing pre-medical, pre-dental, or pre-pharmacy requirements. Background in nuclear science is applicable to radiology, radiopharmaceuticals, and medical diagnostics with radioactive tracers that can give students interested in these fields a competitive edge in their careers. Major electives allow students to include undergraduate research or explore other course areas such as medicinal or forensic chemistry. A minor is not required for this degree.

- CHEM 1212L - Principles of Chemistry II Laboratory (1 Credit Hour)
- CHEM 2810 - Quantitative Analysis (5 Credit Hours)

- PHYS 1111 - Introductory Physics I (3 Credit Hours) and PHYS 1111L - Introductory Physics I Laboratory (1 Credit Hour) and PHYS 1112 - Introductory Physics II (3 Credit Hours) and PHYS 1112L - Introductory Physics II Laboratory (1 Credit Hour)
or
- PHYS 2211 - Principles of Physics I (4 Credit Hours) and PHYS 2212 - Principles of Physics II (4 Credit Hours)
or
- MATH 2012 - Calculus and Analytical Geometry II (4 Credit Hours) (*if PHYS used in Core IMPACTS*)

Lower-Level Requirements: 6-7 Hours

Includes spillover hours from Field of Study Courses.

- MATH 1401 - Elementary Statistics (3 Credit Hours) or MATH 2012 - Calculus and Analytical Geometry II (4 Credit Hours)
- PHYS 1111 - Introductory Physics I (3 Credit Hours) and PHYS 1111L - Introductory Physics I Laboratory (1 Credit Hour) or PHYS 2211 - Principles of Physics I (4 Credit Hours)
- PHYS 1112 - Introductory Physics II (3 Credit Hours) and PHYS 1112L - Introductory Physics II Laboratory (1 Credit Hour) or PHYS 2212 - Principles of Physics II (4 Credit Hours)

Major Concentration: 33 Hours

- CHEM 3000 - Introduction to Nuclear Science (3 Credit Hours)
- CHEM 3010 - Introduction to Nuclear Measurements (3 Credit Hours)
- CHEM 3020 - Application of Nuclear Science (3 Credit Hours)
- CHEM 3411 - Organic Chemistry I (3 Credit Hours)
- CHEM 3411L - Organic Chemistry I Laboratory (1 Credit Hour)
- CHEM 3412 - Organic Chemistry II (3 Credit Hours)
- CHEM 3412L - Organic Chemistry II Laboratory (1 Credit Hour)
- CHEM 3721 - Physical Chemistry I (3 Credit Hours)
- CHEM 3820 - Laboratory Management and Safety (2 Credit Hours)
- CHEM 4210 - Advanced Inorganic Chemistry (3 Credit Hours)
- CHEM 4700 - Integrated Laboratory (3 Credit Hours)
- CHEM 4800 - Advanced Seminar (1 Credit Hour)
- CHEM 4840 - Instrumental Analysis (4 Credit Hours)

Major and Upper-Division Electives: 10 Hours

With the assistance of advisor, choose a minimum of 10 credit hours from the following. Courses marked with an asterisk (*) are recommended for students who intend to pursue graduate studies in the nuclear sciences.

- BIOL 4100 - Principles of Ecology (4 Credit Hours)
- BIOL 4950 - Selected Topics (1 to 10 Credit Hours)
- CHEM 3723 - Physical Chemistry Laboratory (1 Credit Hour)
- CHEM 3990 - Undergraduate Research (0 to 3 Credit Hours) or CHEM 4990 - Undergraduate Research (0 to 3 Credit Hours) or CHEM 4993 - Research Thesis (1 Credit Hour) (*maximum 3 hours total toward major electives*)
- CHEM 4100 - Forensic Chemistry (4 Credit Hours)
- CHEM 4450 - Advanced Organic Chemistry: Synthesis (3 Credit Hours)
- CHEM 4460 - Advanced Organic Chemistry: Mechanisms (3 Credit Hours)
- CHEM 4551 - Biochemistry I: Physical Biochemistry (3 Credit Hours) *
- CHEM 4552 - Biochemistry II: Bioenergetics and Metabolism (3 Credit Hours)
- CHEM 4600 - Physical Chemistry II - Quantum Mechanics (3 Credit Hours) *
- CHEM 4950 - Selected Topics (1 to 4 Credit Hours)
- MATH 2012 - Calculus and Analytical Geometry II (4 Credit Hours) *
- MATH 3020 - Differential Equations (3 Credit Hours) *
- MATH 4251 - Probability and Statistics I (3 Credit Hours)
- PHYS 3300 - Modern Physics (3 Credit Hours)
- PHYS 4600 - Quantum Mechanics (3 Credit Hours)
- CHEM 3XXX - Chemistry Elective (3 Credit Hours)
- CHEM 4XXX - Chemistry Elective (3 Credit Hours)

Free Electives: 9-10 Hours

As needed to complete the credit hours required for graduation. Select from any non-WELL courses.

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 121 Hours

Bachelor of Science in Chemistry and a Concentration in Professional Chemistry

Program Overview

The AU chemistry program is accredited by an accepted accrediting body with students having the option of obtaining an American Chemical Society (ACS) certified degree. Students seeking the ACS approved degree certificate generally follow the professional concentration and complete a research thesis. The professional concentration ensures that students have experience in all five traditional areas of chemistry- inorganic, organic, physical, analytical, and biochemistry. Major electives allow students to include undergraduate research or explore other course areas such as medicinal, forensic, or nuclear chemistry. A minor is not required for this degree.

Admissions Information

For more information on admissions requirements, please visit the Office of Admissions website.

Progression and Graduation Requirements

- Completion of ACS Diagnostic of Undergraduate Chemistry Knowledge Exam with a minimum score of 25 correct.
- A grade of C or better is required in all minor or upper division electives.

Program Information

- Program Length: 4 Years
- Academic Focus Area: Science and Mathematics [STEM]
- CIP Code: 40.0501
- Program Code: 1BS-CHEM

Degree Requirements

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

- CHEM 1211 - Principles of Chemistry I (3 Credit Hours)
- CHEM 1211L - Principles of Chemistry I Laboratory (1 Credit Hour)
- CHEM 1212 - Principles of Chemistry II (3 Credit Hours)
- CHEM 1212L - Principles of Chemistry II Laboratory (1 Credit Hour)
- CHEM 2810 - Quantitative Analysis (5 Credit Hours)
- MATH 2011 - Calculus and Analytical Geometry I (4 Credit Hours) (*1 hour is applied here*)
- MATH 2012 - Calculus and Analytical Geometry II (4 Credit Hours)

Non-Core Courses: 3-11 Hours

- PHYS 2211 - Principles of Physics I (4 Credit Hours) *(if not in taken in Core IMPACTS Requirements)*
- PHYS 2212 - Principles of Physics II (4 Credit Hours) *(if not in taken in Core IMPACTS Requirements)*
- MATH 3020 - Differential Equations (3 Credit Hours)

Major Concentration: 40 Hours

- CHEM 3411 - Organic Chemistry I (3 Credit Hours)
- CHEM 3411L - Organic Chemistry I Laboratory (1 Credit Hour)
- CHEM 3412 - Organic Chemistry II (3 Credit Hours)
- CHEM 3412L - Organic Chemistry II Laboratory (1 Credit Hour)
- CHEM 3721 - Physical Chemistry I (3 Credit Hours)
- CHEM 3723 - Physical Chemistry Laboratory (1 Credit Hour)
- CHEM 3820 - Laboratory Management and Safety (2 Credit Hours)
- CHEM 4210 - Advanced Inorganic Chemistry (3 Credit Hours)
- CHEM 4551 - Biochemistry I: Physical Biochemistry (3 Credit Hours)
- CHEM 4600 - Physical Chemistry II - Quantum Mechanics (3 Credit Hours)
- CHEM 4700 - Integrated Laboratory (3 Credit Hours)
- CHEM 4800 - Advanced Seminar (1 Credit Hour)
- CHEM 4840 - Instrumental Analysis (4 Credit Hours)
- CHEM 4450 - Advanced Organic Chemistry: Synthesis (3 Credit Hours)
- or CHEM 4460 - Advanced Organic Chemistry: Mechanisms (3 Credit Hours)

Plus select two of the following: 6-7 Hours

- CHEM 3000 - Introduction to Nuclear Science (3 Credit Hours)
- CHEM 4100 - Forensic Chemistry (4 Credit Hours)
- CHEM 4130 - Water Chemistry (3 Credit Hours)
- CHEM 4410 - Heterocyclic and Natural Product Chemistry (3 Credit Hours)
- CHEM 4552 - Biochemistry II: Bioenergetics and Metabolism (3 Credit Hours)
- CHEM 4610 - Rational Drug Design (3 Credit Hours)
- CHEM 4620 - Principles of Medicinal Chemistry (3 Credit Hours)
- CHEM 4950 - Selected Topics (1 to 4 Credit Hours) *(may be repeated with different topic)*
- CHEM 3990 - Undergraduate Research (0 to 3 Credit Hours)

Free Electives: 2-11 Hours

As needed to complete the credit hours required for graduation. Select from any non-WELL courses.

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 121 Hours

Bachelor of Science in Clinical Laboratory Science

Program Overview

The university grants a Bachelor of Science degree in Clinical Laboratory Science (Medical Laboratory Science/Medical Technology). Upon completion of the program, the graduates are eligible to take the Medical Laboratory Scientist (MLS) certification exam administered by the American Society for Clinical Pathology (ASCP). Students begin the CLS program in fall semester of their junior year, contingent upon completion of prerequisites either at this university or at another college (see Admission Requirements below). Both on-campus and internet students have four semesters of classroom, laboratory and internships through clinical affiliates.

Student laboratories are conducted at the mobile laboratory in the Atlanta and physical attendance is required. The program requires computer capability and Internet connectivity.

Admissions Information

Please see the Office of Admissions website for specific admissions information and prerequisites.

Progression and Graduation Requirements

- Students must earn a grade of C or higher in all courses taken to remain in the program.
- Students must complete 59 hours of curriculum coursework, GA History and Legislative Requirements, as well as pass the departmental exit exam to graduate from the program.

Program Information

- Program Length: 4 Years
- Academic Focus Area: Health Professions [HEPR]
- CIP Code: 51.1005
- Program Code: BSCLS_CLS
- Major Code: CLS

Degree Requirements

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

- BIOL 2251 - Anatomy and Physiology I (3 Credit Hours)
- BIOL 2251L - Anatomy and Physiology I Lab (1 Credit Hour)
- CHEM 1211 - Principles of Chemistry I (3 Credit Hours)
- CHEM 1211L - Principles of Chemistry I Laboratory (1 Credit Hour)

- CHEM 1212 - Principles of Chemistry II (3 Credit Hours)
- CHEM 1212L - Principles of Chemistry II Laboratory (1 Credit Hour)
- CHEM 2410 - Chemistry of Organic and Biomolecules (4 Credit Hours) or CHEM 3411 - Organic Chemistry I (3 Credit Hours) and CHEM 3411L - Organic Chemistry I Laboratory (1 Credit Hour)
- **Elective: any Math or Science course (2 Credits of 3 Credit Course)**

Major Courses: 59 Hours

- CAHS 4300 - Professional Issues and Ethics (1 Credit Hour)
- CLSC 3220 - Introduction to Clinical Laboratory Science Practice (3 Credit Hours)
- CLSC 3640 - Clinical Biochemistry (4 Credit Hours)
- CLSC 3645 - Clinical Biochemistry Laboratory (2 Credit Hours)
- CLSC 4440 - Clinical Microbiology (4 Credit Hours)
- CLSC 4445 - Clinical Microbiology Laboratory (2 Credit Hours)
- CLSC 4480 - Clinical Microbiology Internship (3 Credit Hours)
- CLSC 4501 - Seminar in CLS Evidence-Based Practice (1 Credit Hour)
- CLSC 4540 - Clinical Immunology (4 Credit Hours)
- CLSC 4680 - Clinical Biochemistry/Immunology Internship (5 Credit Hours)
- CLSC 4740 - Clinical Immunohematology (4 Credit Hours)
- CLSC 4745 - Clinical Immunohematology Laboratory (2 Credit Hours)
- CLSC 4780 - Clinical Immunohematology Internship (3 Credit Hours)
- CLSC 4840 - Clinical Hematology (4 Credit Hours)
- CLSC 4845 - Clinical Hematology Laboratory (2 Credit Hours)
- CLSC 4880 - Clinical Hematology Internship (3 Credit Hours)
- CLSC 4903 - Clinical Laboratory Science Review (3 Credit Hours)
- CLSC 4940 - Clinical Molecular Methods (3 Credit Hours)
- CLSC 4945 - Clinical Molecular Methods Laboratory (2 Credit Hours)
- MLIR 3320 - Principles of Education and Management (2 Credit Hours)
- MLIR 3510 - Applied Research and Statistics (2 Credit Hours)

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 120 Hours

Bachelor of Science in Clinical Laboratory Science for Certified MLTs/CLTs and the Military

Program Overview

This university grants a Bachelor of Science degree in Clinical Laboratory Science (Medical Laboratory Science/Medical Technology). Upon completion of the program, the graduates are eligible to take the Medical Laboratory Scientist (MLS) certification exam administered by the American Society for Clinical Pathology (ASCP). Students begin the CLS program in fall semester of their junior year, contingent upon completion of prerequisites either at this university or at another college (see Admission Requirements below). Both on-campus and internet students have four semesters of classroom, laboratory and internships through clinical affiliates.

For the distance/WEB students, laboratories are conducted at a satellite laboratory in the Atlanta area or at the clinical affiliates. The clinical internships are conducted at affiliated clinical sites. Internet students are encouraged to identify possible internship sites convenient to them. The program of Clinical Laboratory Science will contact these sites to explore a clinical affiliation. The program requires computer capability and Internet connectivity.

Bachelor of Science in Computer Science

Program Overview

The study of computer science spans the range from theory to practice to cutting-edge invention of computing solutions. Computer Science teaches students to be aware of new ideas and technologies and is a foundation that prepares graduates for many different computer careers while permitting them to adapt to new technologies. The Computer Science curriculum covers the principles of key computing technologies such as hardware, operating systems, database systems, networks, graphics, and artificial intelligence. Students will study the logical and mathematical foundations of computing and how to implement problem solutions as programs in a computer language.

Progression and Graduation Requirements

- A grade of C or better is required in all Field of Study and Major Requirement courses.

Program Information

- Program Length: 4 Years
- Academic Focus Area: Computing [ITCS]
- CIP Code: 11.0101
- Program Code: 1BS-COSC
- Major Code: COSC

Degree Requirements

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

A grade of C or better is required in all of the following courses.

- CSCI 1301 - Principles of Computer Programming I (4 Credit Hours)
- CSCI 1302 - Principles of Computer Programming II (3 Credit Hours)
- CSCI 2700 - Ethics in Computer Science (2 Credit Hours)
- CYBR 2600 - Introduction to Networking and Cyber Security (4 Credit Hours)
- MATH 2011 - Calculus and Analytical Geometry I (4 Credit Hours) (1 hour from the Technology, Mathematics and Sciences area of Core IMPACTS)
- MATH 2012 - Calculus and Analytical Geometry II (4 Credit Hours)

Major Courses: 33 Hours

Grade of C or better is required in all Junior/Senior level courses.

- CSCI 3030 - Mathematical Structures for Computer Science (3 Credit Hours)
- CSCI 3170 - Computer Organization (3 Credit Hours)
- CSCI 3271 - Operating System (3 Credit Hours)
- CSCI 3300 - Programming Languages Concepts (3 Credit Hours)
- CSCI 3371 - Low-Level Programming Languages (3 Credit Hours)
- CSCI 3400 - Data Structures (3 Credit Hours)
- CSCI 3410 - Database Systems (3 Credit Hours)
- CSCI 3500 - Theory of Computation (3 Credit Hours)
- CSCI 4100 - Analysis of Algorithms (3 Credit Hours)
- CSCI 4711 - Software Engineering (3 Credit Hours)
- CSCI 4712 - Senior Capstone Project (3 Credit Hours)

Major Emphasis Courses: 12 Hours

Select three CSCI courses from below:

- CSCI 3430 - Artificial Intelligence (3 Credit Hours)
- CSCI 3600 - Internet Programming (3 Credit Hours)
- CSCI 4420 - Distributed and Mobile Systems (3 Credit Hours)
- CSCI 4531 - Malware Analysis and Reverse Engineering (3 Credit Hours)
- CSCI 4532 - Hardware and Embedded Systems (3 Credit Hours)
- CSCI 4800 - Compiler Writing (3 Credit Hours)
- CSCI 4820 - Computer Graphics (3 Credit Hours)
- CSCI 4950 - Selected Topics (1 to 3 Credit Hours)
- CSCI 4990 - Undergraduate Research (1 to 3 Credit Hours)

Select one MATH course from below:

- MATH 3250 - Introduction to Statistics and Data Analysis (3 Credit Hours)
- MATH 3280 - Linear Algebra (3 Credit Hours)
- MATH 3710 - Combinatorics (3 Credit Hours)
- MATH 4211 - Modern Abstract Algebra I (3 Credit Hours)
- MATH 4320 - Theory of Numbers (3 Credit Hours)
- MATH 4350 - Numerical Analysis (3 Credit Hours)
- MATH 4420 - Introduction to the Theory of Graphs (3 Credit Hours)

Free Electives: 15 Hours

Select 15 hours from any non-WELL classes.

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 121 Hours

Bachelor of Science in Cyber Operations

Program Overview

The degree in cyber operations provides a specialization in technologies and techniques related to advanced offensive and defensive cyber operations, such as collection, exploitation, and response to cyber threats. This concentration prepares students to apply computer science theory to the problem of analyzing, designing, implementing, and operating secure computing environments. Students are exposed to malware analysis, reverse engineering, penetration testing, and hardware analysis.

Bachelor of Science in Cybersecurity

Program Overview

The cybersecurity curriculum provides students with a broad foundation of technical abilities and understanding. The cybersecurity degree arms students with specific core skills needed to be successful in cybersecurity positions, including network defense monitoring, penetration testing, and incidence response. The field of cybersecurity is one of increasing importance to governments and enterprises around the world. Demand for individuals with expertise in this area will continue to grow as society's dependence on information systems grows and society's enemies become ever more adept at bypassing information security measures.

Field of Study Courses: 18 Hours

A grade of C or better is required in the following courses.

- AIST 2110 - Principles of Scripting (3 Credit Hours)
- AIST 2120 - Intermediate Scripting and Automation (3 Credit Hours)
- CSCI 2700 - Ethics in Computer Science (2 Credit Hours)
- CYBR 2600 - Introduction to Networking and Cyber Security (4 Credit Hours)
- MATH 2020 - Introduction to Discrete Mathematics (3 Credit Hours)
- MINF 2650 - Principles of Data Management and Analysis (3 Credit Hours)

Major Courses: 42 Hours

A grade of C or better is required in all courses.

Major Required Courses: 33 Hours

- AIST 3310 - Advanced Networking (3 Credit Hours)
- AIST 3320 - TCP/IP Protocol Analysis (3 Credit Hours)
- AIST 3410 - Database Management Systems (3 Credit Hours)
- AIST 3610 - System Analysis and Design (3 Credit Hours)

- AIST 3720 - Operating System Concepts and Administration (3 Credit Hours)
- AIST 4720 - Enterprise System Architectures (3 Credit Hours)
- AIST 4820 - Information Technology Project (3 Credit Hours)
- COMM 3100 - Communications for Professionals (3 Credit Hours)
- CYBR 3100 - Introduction to Defensive Cyber Operations (3 Credit Hours)
- CYBR 3200 - Cyber Network Defense and Counter Measures (3 Credit Hours)
- CYBR 4400 - Digital Forensics (3 Credit Hours)

Major Electives: 9 Hours

Select three from the following:

- AIST 2220 - Introduction to Web Development (3 Credit Hours)
- MINF 3625 - Project Management (3 Credit Hours)
- CSCI 1302 - Principles of Computer Programming II (3 Credit Hours)
- AIST 3XXX - Applied Information Systems and Technology Elective (3 Credit Hours)
- AIST 4XXX - Applied Information Systems and Technology Elective (3 Credit Hours)
- CSCI 3XXX - Computer Science Elective (3 Credit Hours)
- CSCI 4XXX - Computer Science Elective (3 Credit Hours)
- CYBR 3XXX - Cybersecurity Elective (3 Credit Hours)
- CYBR 4XXX - Cybersecurity Elective (3 Credit Hours)

Free Electives: 18 Hours

Select electives from any non-WELL courses.

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 121 Hours

Bachelor of Science in Cybersecurity Engineering

Program Overview

The Bachelor of Science in Cybersecurity Engineering moves beyond the disciplinary boundaries approach of computer engineering, computer science, information technology, information systems, and software engineering. The program aligns with the proposed 2018-2019 ABET Engineering Accreditation Commission Program criteria for cybersecurity engineering and the Joint Task Force on Cybersecurity Education curriculum guidelines. With the development of this degree program, Augusta University is eligible to be designated as a National Security Agency (NSA) Centers of Excellence in Cyber Operations (CAE-Cyber Operations).

Admissions Information

For more information on admissions requirements, please visit the Office of Admissions website.

Progression and Graduation Requirements

- A Grade of C or better is required for all Field of Study and Major Courses.
- Students must take PHIL 2030 and pass with a grade of C or better.
- Students must take ECON 1810, ECON 2105, or ECON 2106 and pass with a grade of C or better.

Program Information

- Program Length: 4 Years
- Academic Focus Area: Computing [ITCS]
- CIP Code: 14.0999
- Program Code: 1BS-CYBE
- Major Code: CYBE

Degree Requirements

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

- CENG 2001 - Introduction to Cybersecurity Engineering (3 Credit Hours)
- CSCI 1301 - Principles of Computer Programming I (4 Credit Hours)
- CSCI 1302 - Principles of Computer Programming II (3 Credit Hours)
- CSCI 2700 - Ethics in Computer Science (2 Credit Hours)
- CYBR 2600 - Introduction to Networking and Cyber Security (4 Credit Hours)
- MATH 2011 - Calculus and Analytical Geometry I (4 Credit Hours) *(1 hour overflow from Core IMPACTS Mathematics and Quantitative Skills Area)*
- MATH 2012 - Calculus and Analytical Geometry II (4 Credit Hours) *(1 hour overflow from Core IMPACTS Technology, Mathematics, and Sciences Area)*

Major Courses: 65 Hours

Required Courses: 62 Hours

- AIST 3310 - Advanced Networking (3 Credit Hours) or AIST 3320 - TCP/IP Protocol Analysis (3 Credit Hours)
- AIST 3360 - Cellular and Mobile Technology (3 Credit Hours)
- CENG 4100 - Critical Infrastructure Security (3 Credit Hours)
- CENG 4700 - Secure Design Engineering (3 Credit Hours)
- CENG 4712 - Senior Capstone Project (3 Credit Hours)
- CSCI 3030 - Mathematical Structures for Computer Science (3 Credit Hours)
- CSCI 3170 - Computer Organization (3 Credit Hours)
- CSCI 3271 - Operating System (3 Credit Hours)
- CSCI 3370 - Assembly Language Programming (3 Credit Hours)
- CSCI 3400 - Data Structures (3 Credit Hours)
- CSCI 4531 - Malware Analysis and Reverse Engineering (3 Credit Hours)
- CSCI 4532 - Hardware and Embedded Systems (3 Credit Hours)
- CSCI 4540 - Digital Forensics and Machine Learning (3 Credit Hours)
- CYBR 3100 - Introduction to Defensive Cyber Operations (3 Credit Hours)

- CYBR 3200 - Cyber Network Defense and Counter Measures (3 Credit Hours)
- MATH 3020 - Differential Equations (3 Credit Hours)
- MATH 3250 - Introduction to Statistics and Data Analysis (3 Credit Hours)
- MATH 3280 - Linear Algebra (3 Credit Hours)
- PHYS 3011 - Electronics I (4 Credit Hours)
- PHYS 3012 - Electronics II (4 Credit Hours)

Math Elective: 3 Hours

Select one of the following:

- MATH 3710 - Combinatorics (3 Credit Hours)
- MATH 4211 - Modern Abstract Algebra I (3 Credit Hours)
- MATH 4310 - Modern Geometry (3 Credit Hours)
- MATH 4320 - Theory of Numbers (3 Credit Hours)
- MATH 4350 - Numerical Analysis (3 Credit Hours)
- MATH 4420 - Introduction to the Theory of Graphs (3 Credit Hours)
- MATH 4510 - Complex Variables (3 Credit Hours)

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 126 Hours

Bachelor of Science in Data Science

Program Overview

Augusta University's Bachelor of Science in Data Science leverages the region's data-driven strengths in Cyber Command, health sciences, and cybersecurity. This dynamic, interdisciplinary program, offered in collaboration between the School of Computer and Cyber Sciences and the College of Science and Mathematics, prepares students to become leaders in data-driven decision-making and technological innovation across key industries.

Admissions Information

For more information on admissions requirements, please visit the Office of Admissions website.

Progression and Graduation Requirements

A grade of C or better is required in all Field of Study, Major, Concentration, and Elective courses.

Program Information

- Program Length: 4 Years

- Academic Focus Area: Computing [ITCS]
- CIP Code: 30.7001
- Program Code: 1BS-DASC
- Major Code: DASC

Degree Requirements

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 17 Hours

Some of the following required courses may be applied to Core IMPACTS requirements.

- AIST 2110 - Principles of Scripting (3 Credit Hours)
- MATH 2011 - Calculus and Analytical Geometry I (4 Credit Hours)
- MATH 2012 - Calculus and Analytical Geometry II (4 Credit Hours)
- CSCI 2700 - Ethics in Computer Science (2 Credit Hours)
- CYBR 2600 - Introduction to Networking and Cyber Security (4 Credit Hours)
- DASC 1302 - Data Science Programming II (3 Credit Hours)
- or CSCI 1302 - Principles of Computer Programming II (3 Credit Hours)

Major Courses: 33 Hours

- DASC 3400 - Data Structures and Algorithms (3 Credit Hours)
- or CSCI 3400 - Data Structures (3 Credit Hours)
- CSCI 3410 - Database Systems (3 Credit Hours)
- CSCI 3430 - Artificial Intelligence (3 Credit Hours)
- DASC 2030 - Mathematical Foundations of Data Science (3 Credit Hours)
- DASC 4712 - Data Science Capstone (3 Credit Hours) *(taken twice for a total of 6 hours)*
- DASC 4740 - Data Mining (3 Credit Hours)
- DASC 4850 - Machine Learning (3 Credit Hours)
- MATH 3250 - Introduction to Statistics and Data Analysis (3 Credit Hours)
- MATH 3280 - Linear Algebra (3 Credit Hours)
- MATH 4251 - Probability and Statistics I (3 Credit Hours)

Major Electives: 12 Hours

Select four of the following:

- CSCI 4540 - Digital Forensics and Machine Learning (3 Credit Hours)
- CSCI 4711 - Software Engineering (3 Credit Hours)
- DASC 3230 - Data Security and Privacy (3 Credit Hours)
- DASC 4260 - Computer Vision (3 Credit Hours)
- DASC 4760 - Big Data and Analytics (3 Credit Hours)
- DASC 4851 - Deep Learning (3 Credit Hours)
- MATH 4252 - Probability and Statistics II (3 Credit Hours)
- MATH 4420 - Introduction to the Theory of Graphs (3 Credit Hours)
- PHYS 3260 - Computational Physics (3 Credit Hours)

Free Electives: 16 Hours

Select 16 hours from any non-WELL courses.

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 121 Hours

Bachelor of Science in Dental Hygiene

Program Overview

The program is a "2+2," meaning the student completes the first two years at any accredited college or university of choice, and the last two years on campus. All students begin the program fall semester of their junior year. The program includes classroom, laboratory and clinical education.

Policies on blood borne and infectious diseases are strictly enforced in the program. These policies are available to applicants for admission and for patients treated in the dental hygiene clinics.

Chicago, Illinois 60611
312-440-2500

Admissions Information

This program requires an additional admissions application beyond the regular Augusta University undergraduate admissions application. This program is an accredited 2+2 program, which means applicants must complete their freshmen and sophomore years (60 credit hours) at an accredited college/university of choice, and the junior and senior years (65 credit hours) on the Augusta University campus after being admitted to the program.

For information on admissions requirements, visit the Office of Admissions website at augusta.edu/admissions.

Please note that PSYC 1101 and SOCI 1101 are requirements for admission to the Dental Hygiene program.

Progression and Graduation Requirements

In addition to demonstrating personal characteristics appropriate for a health professions career, students must satisfy general and specific technical standards. Visit the department website above to review these requirements.

Program Information

- Program Length: 4 Years (5 semesters)
- Academic Focus Area: Health Professions [HEPR]
- CIP Code: 51.0602
- Program Code: BSDH1_DHYG
- Major Code: DYHG

Degree Requirements

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Core IMPACTS Courses Specific to This Major:

PSYC 1101 and SOCI 1101 are requirements for the major and may also be used to fulfill the Social Sciences area of Core IMPACTS.

Field of Study Courses: 18 Hours

- BIOL 2251 - Anatomy and Physiology I (3 Credit Hours)
- BIOL 2252 - Anatomy and Physiology II (3 Credit Hours)
- BIOL 2260 - Foundations of Microbiology (4 Credit Hours)
- CHEM 1151 - Survey of Chemistry I (4 Credit Hours)
- or CHEM 1211 - Principles of Chemistry I (3 Credit Hours) and CHEM 1211L - Principles of Chemistry I Laboratory (1 Credit Hour) *

Note:

**If the course listed has been taken in another area, another science course may be chosen to fulfill this area.*

Elective: 3 Hours

Select one of the following:

- PSYC 2103 - Introduction to Human Development (3 Credit Hours)
- KNHS 2300 - Introduction to Medical Terminology (3 Credit Hours)
- Any Math/Science Course (3 Credit Hours)

Major Courses: 65 Hours

- DHYG 3100 - Introduction to Clinic I (6 Credit Hours)
- DHYG 3105 - Theory and Practice I (3 Credit Hours)
- DHYG 3110 - Dental Anatomy (2 Credit Hours)
- DHYG 3115 - Applied Head and Neck Anatomy (2 Credit Hours)
- DHYG 3120 - Introduction to Clinic II (4 Credit Hours)
- DHYG 3125 - Theory and Practice II (3 Credit Hours)
- DHYG 3130 - Dental Radiology (3 Credit Hours)
- DHYG 3135 - Dental Microbiology (2 Credit Hours)
- DHYG 3140 - Periodontics Seminar (3 Credit Hours)
- DHYG 3150 - Dental Materials (1 Credit Hour)
- DHYG 3155 - Pain Management for the Dental Hygiene Patient (3 Credit Hours)
- DHYG 3200 - Patient Care I (6 Credit Hours)

- DHYG 3205 - Theory and Practice III (3 Credit Hours)
- DHYG 3220 - Dental Specialty Clinics I (1 Credit Hour)
- DHYG 3225 - Dental Materials Lab (1 Credit Hour)
- DHYG 3228 - Community Health and Research Design (3 Credit Hours)
- DHYG 3230 - Patient Care II (6 Credit Hours)
- DHYG 3235 - Theory and Practice IV (3 Credit Hours)
- DHYG 3240 - Pharmacology (3 Credit Hours)
- DHYG 3250 - Pathology (2 Credit Hours)
- DHYG 3255 - Dental Specialty Clinic II (1 Credit Hour)
- DHYG 3280 - Practice Management and Ethics (2 Credit Hours)
- DHYG 3285 - Dental Hygiene Practicum (2 Credit Hours)

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 126-130 Hours

Term-by-Term Pathway

To outline and visualize the path from start to finish in this program, refer to the suggested Term-by-Term Pathway.

Bachelor of Science in Dental Hygiene - Degree Completion Track

This program (for those who are already dental hygienists) is not currently accepting applications; however, the Bachelor of Science in Dental Hygiene is accepting applications for new students.

Program Overview

The BS-DH Bachelor of Science Degree Completion Program is designed for dental hygiene graduates of accredited associate degree programs. The degree completion curriculum is offered completely online to accommodate students who are already gainfully employed. Prior to application, students are strongly encouraged to complete all University System of Georgia graduation and core curriculum requirements. Students must complete the core curriculum (60 hours) and Degree Completion Program (30 hours) before being awarded Professional Credit (30 hours) prior to graduation.

Bachelor of Science in Education in Elementary Education

Program Overview

The teacher preparation programs at Augusta University place a strong emphasis on "hands-on" experiences with professional educators in actual classroom settings. Students should expect a field experience as a part of most courses in the preparation process. Clinical and field experiences are monitored for each student to ensure that they have had the opportunity to work with various populations in a wide variety of educational levels and settings.

Admissions Information

For more information on admissions requirements, please visit the Office of Admissions website.

Progression and Graduation Requirements

- Due to the sensitive nature of working with children in the public schools, the Department of Public Safety at Augusta University will conduct a background review of all students at three specific points in the preparation program. The first check will be made as part of enrollment in EDUC 2110. Only students who present a record free of criminal and/or disciplinary activity will be allowed to enter a public school classroom. The second check will be made as part of the admission to Teacher Education process. The third check will be made as a prerequisite to entering the student teaching experience. Students who are admitted to the Culminating Residency experience must have a record free of criminal and/or disciplinary activity.
- All coursework must be successfully completed prior to Culminating Residency.

Program Information

- Program Length: 4 Years
- Academic Focus Area: Education [EDUC]
- CIP Code: 13.1210
- Program Code: 1BSED-ELEM

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

- EDUC 2110 - Investigating Critical and Contemporary Issues in Education (3 Credit Hours)
- EDUC 2120 - Exploring Social-Cultural Perspectives on Diversity (3 Credit Hours)
- EDUC 2130 - Exploring Learning and Teaching (3 Credit Hours)
- ISCI 2001 - Life/Earth Sciences for Elementary Education (3 Credit Hours)
- ISCI 2002 - Foundations of Physical Science (3 Credit Hours)
- MATH 2008 - Foundations of Numbers and Operations (3 Credit Hours)

Major Courses: 60 Hours

- ELED 3151 - Elementary Curriculum (3 Credit Hours)
- ELED 3252 - Language Arts Curriculum (3 Credit Hours)
- ELED 3271 - Using Children's Literature to Teach Reading (3 Credit Hours)
- ELED 3161 - Classroom Management for Learning (3 Credit Hours)
- ELED 3212 - Literacy I: Basic Literacy for Elementary Education (3 Credit Hours)
- ELED 3231 - Elementary Science Education (3 Credit Hours)
- ELED 3241 - Elementary Social Studies Education (3 Credit Hours)
- ELED 4313 - Literacy II: Advanced Literacy Instruction for Elementary Education (3 Credit Hours)
- ELED 4322 - Elementary Mathematics Education (3 Credit Hours)
- ELED 4332 - STEAM Education (3 Credit Hours)
- ELED 4352 - Educational Assessment for Learning (3 Credit Hours)
- MATH 3241 - Mathematics for Early Childhood Teachers I (3 Credit Hours)
- MATH 3242 - Mathematics for Early Childhood Teachers II (3 Credit Hours)
- SPED 3002 - Teaching Students with Disabilities in the Inclusive Classroom (3 Credit Hours)
- Elective (3 Credit Hours)

Student Teaching: 15 Hours

- ELED 4491 - Elementary Culminating Residency (13 Credit Hours)
- EDTD 4940 - Foundations of Reading Seminar (2 Credit Hours)

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Total Hours for the Degree: 124 Hours

Bachelor of Science in Education in Middle Grades Education

Program Overview

The teacher preparation programs at Augusta University place a strong emphasis on "hands-on" experiences with professional educators in actual classroom settings. Students should expect a field experience as a part of most courses in the preparation process. Clinical and field experiences are monitored for each student to ensure that they have had the opportunity to work with various populations in a wide variety of educational levels and settings.

- CIP Code: 13.1203
- Program Code: 1BSED-MIDDLE-BSED

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

- EDUC 2110 - Investigating Critical and Contemporary Issues in Education (3 Credit Hours)
- EDUC 2120 - Exploring Social-Cultural Perspectives on Diversity (3 Credit Hours)
- EDUC 2130 - Exploring Learning and Teaching (3 Credit Hours)

Additional Courses: 9 Hours

Following your concentration, select 9 hours from the Technology, Mathematics and Sciences area or Social Sciences area from the Core IMPACTS Courses.

* Mathematics concentration must have MATH 1113. MATH 2011, MATH 2012, and MATH 2013 are recommended.

* Social Studies concentration must have GEOG 1111.

* Language Arts concentration may select from ENGL 2121 or ENGL 2122.

* Science concentration must select from the following courses if not selected previously: ASTR 1000, BIOL 1107, and CHEM 1211 or CHEM 1151.

Major Concentration: 60 Hours

Core Courses: 21 Hours

- EDTD 3200 - Assessment and Differentiation for Adolescent Learners (3 Credit Hours)
- MGED 3100 - The Nature and Needs of the Middle Grades Learner (3 Credit Hours)
- MGED 3200 - Active Learning in the Middle Grades Classroom (3 Credit Hours)
- MGED 3222 - Integrated Reading to Learn (3 Credit Hours)
- MGED 3300 - Middle Level Programs and Schools (3 Credit Hours)
- MGED 4200 - Classroom Management in Middle Grades (3 Credit Hours)
- SPED 3002 - Teaching Students with Disabilities in the Inclusive Classroom (3 Credit Hours)

Content Concentration Courses: 24 Hours

Choose two of the following sets:

Language Arts Concentration: 12 Hours

- EDTD 3221 - Adolescent English Pedagogy (3 Credit Hours)
- One 3000-4000 level ENGL Writing course (ENGL 3681 recommended)
- One 3000-4000 level ENGL Literature course (ENGL 3330 recommended)
- One 3000-4000 level ENGL course (ENGL 4712 recommended)

Mathematics Concentration: 12 Hours

- EDTD 3231 - Adolescent Mathematics Pedagogy (3 Credit Hours)
- MATH 3261 - Mathematics for Middle School Teachers I (3 Credit Hours)
- MATH 3262 - Mathematics for Middle School Teachers II (3 Credit Hours)
- MATH 3263 - Mathematics for Middle School Teachers III (3 Credit Hours)

Social Studies Concentration: 12 Hours

- EDTD 3241 - Adolescent Social Science Pedagogy (3 Credit Hours)
- HIST 3012 - World History Seminar (3 Credit Hours)
- HIST 3711 - Georgia History (3 Credit Hours)

Choose one from the following:

- HIST 3020 - Premodern Europe (3 Credit Hours)
- HIST 3111 - Modern Africa (3 Credit Hours)
- HIST 3211 - History and Culture of East Asia (3 Credit Hours)
- HIST 3321 - Modern Europe: Revolutions (3 Credit Hours)
- HIST 3331 - Modern Europe: People (3 Credit Hours)
- HIST 3341 - Modern Europe: War and Diplomacy (3 Credit Hours)
- HIST 3471 - American Religious History (3 Credit Hours)
- HIST 3491 - Military History of the US (3 Credit Hours)
- HIST 3510 - Latin American Civilizations (3 Credit Hours)
- HIST 4111 - History of World Religions (3 Credit Hours)
- HIST 4411 - Revolutionary America (3 Credit Hours)
- HIST 4421 - Civil War and Reconstruction (3 Credit Hours)
- HIST 4471 - Old South/New South (3 Credit Hours) (if HIST 3711 wasn't taken)
- HIST 4491 - The American West (3 Credit Hours)
- HIST 4501 - African Americans, Africa and the African Diaspora (3 Credit Hours)
- HIST 4521 - The Long Civil Rights Movement (3 Credit Hours)
- POLS 3101 - Comparative European Governments (3 Credit Hours)
- POLS 4902 - World Politics (3 Credit Hours)
- POLS 4904 - Politics of Latin America (3 Credit Hours)
- POLS 4930 - Model UN II (3 Credit Hours)

Science Concentration: 12 Hours

- MGED 3251 - Science Education for Middle Grades (3 Credit Hours)

Required Science Courses

If already taken for the Core IMPACT Curriculum or Field of Study courses, select from the Optional Science Courses list.

- ASTR 1000 - Introduction to the Universe (4 Credit Hours)
- BIOL 1107 - Principles of Biology I (3 Credit Hours)

- CHEM 1151 - Survey of Chemistry I (4 Credit Hours) or
- CHEM 1211 - Principles of Chemistry I (3 Credit Hours)

Optional Science Courses

- BIOL 1108 - Principles of Biology II (3 Credit Hours)
- BIOL 4100 - Principles of Ecology (4 Credit Hours)
- CHEM 1212 - Principles of Chemistry II (3 Credit Hours)
- GEOG 1112 - Introduction to Weather and Climate (4 Credit Hours)
- GEOL 1121 - Introductory Geosciences I: Physical Geology (4 Credit Hours)
- GEOL 1122 - Introductory Geosciences II: Historical Geology (4 Credit Hours)
- PHSC 1011 - Physical Science (4 Credit Hours)
- PHYS 1111 - Introductory Physics I (3 Credit Hours)
- PHYS 1112 - Introductory Physics II (3 Credit Hours)

Student Teaching: 15 Hours

- EDTD 4940 - Foundations of Reading Seminar (2 Credit Hours)
- MGED 4210 - Middle Grades Culminating Residency (13 Credit Hours)

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 121 Hours

Bachelor of Science in Education in Special Education (eMajor USG Consortium)

**No new students are being accepted into the on-campus program.*

Program Overview

The Bachelor of Science in Education – Special Education (BSED-SPED) Collaborative prepares students to enter the field of Special Education and address Georgia's growing need for highly qualified teachers. Through a shared online curriculum offered by the University System of Georgia, students complete coursework focused on evidence-based practices, inclusive instruction, and individualized supports for students with disabilities.

The program leads to certification in Interrelated Special Education (P–12) and prepares graduates to serve students typically educated in interrelated classroom settings. Candidates develop the skills needed to design and implement IEPs, collaborate with general education teachers, and support students with high-incidence disabilities.

Students enroll through Augusta University (a participating institution), receive local advising and field placement support, and benefit from shared statewide expertise. This collaborative model expands access while strengthening Georgia's special education teacher pipeline.

Admissions Information

For more information on AU admissions requirements, please visit the Office of Admissions website. For more information on Admission to Teacher Education requirements, visit the Teaching & Leading website and meet with your advisor.

Prospective students must have earned a minimum overall GPA of 2.5 (4.0 scale) and a minimum grade of "C" on all attempted courses in the Core IMPACTS and Field of Study (Areas A-F) courses prior to application to the BSSED SPED.

Prospective students must have successfully completed 51+ credit hours in the Core IMPACTS, which should include at least 6 credits of EDUC in Area F, prior to application for admission to the BSSED SPED.

Prospective students should present evidence of having taken the GACE Ethics assessment, *and after acceptance should apply to the GaPSC for a Pre-Service Certificate prior to orientation and registration for major courses.*

Progression and Graduation Requirements

- Successful completion of any course with a field experience component is contingent on the candidate passing a background check at required transition points in the program.
- A GaPSC Pre-Service Certificate is required for all candidates in the program.
- Candidates must successfully complete all required courses and practicums/field experiences and maintain a 2.5 cumulative GPA prior to Culminating Residency and prior to graduation.
- Candidates must earn a minimum grade of "B" or higher in SPED 3111 Foundations in Special Education. Candidates must earn a "C" or higher in all other courses.
- Successful completion of both institutional requirements and program requirements are required for graduation.
- Passing required GACE assessments is required for initial teacher certification.

Program Information

- Program Length: 4 Years
- Academic Focus Area: Education [EDUC]
- CIP Code: 13.1001
- Program Code: 1BSSED-SPECU
- Major Code: SPEC, PSPE
- Campus Code: OLC, M
- Concentration Code: GCUR

Degree Requirements

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

- EDUC 2110 - Investigating Critical and Contemporary Issues in Education (3 Credit Hours)
- EDUC 2120 - Exploring Social-Cultural Perspectives on Diversity (3 Credit Hours)
- EDUC 2130 - Exploring Learning and Teaching (3 Credit Hours)
- EDUC 2140 - Foundations of Reading (3 Credit Hours)
- MATH 2008 - Foundations of Numbers and Operations (3 Credit Hours)
- READ 2230 - Cognition and Language (3 Credit Hours)

Major Courses: 60 Hours

- READ 3110 - Foundations of Reading and Literacy (3 Credit Hours)
- READ 3270 - Teaching Reading and Writing to Student with Disabilities (3 Credit Hours)
- READ 4110 - Assessing Reading Development and Instructional Planning (3 Credit Hours)
- READ 4270 - Intervention Strategies for Struggling Readers (3 Credit Hours)
- SPED 3111 - Foundations in Special Education (3 Credit Hours)
- SPED 3112 - Special Education Law, Ethics, and Procedures (3 Credit Hours)
- SPED 3113 - Instructional Technology and Accessibility Tools (3 Credit Hours)
- SPED 3114 - Collaboration and Consultation in Special Education (3 Credit Hours)
- SPED 3271 - Positive Behavior Management Strategies (3 Credit Hours)
- SPED 3272 - Instructional Methods for P-5 Learners with Disabilities (3 Credit Hours)
- SPED 3273 - Teaching Social Studies and Science to Learners with Disabilities (3 Credit Hours)
- SPED 3299 - Practicum I: P-5 Field Experience (3 Credit Hours)
- SPED 4111 - Assessment for Learners with Disabilities (3 Credit Hours)
- SPED 4112 - Instructional Methods and Transition Planning for 6-12 Learners with Disabilities (3 Credit Hours)
- SPED 4113 - Teaching Mathematics to Learners with Disabilities (3 Credit Hours)
- SPED 4199 - Practicum II: 6-12 Field Experience (3 Credit Hours)
- SPED 4299 - Culminating Residency in Special Education (12 Credit Hours)

Degree Total: 120 Hours

Bachelor of Science in Health Information Administration

Program Overview

The Bachelor of Science in Health Information Administration (HIA) program is a "2+2" program, meaning the student completes the first two years at any accredited college of choice and the last two years as an HIA student at Augusta University. Students begin the HIA program fall semester of their junior year. Students who complete the program are eligible to take the national registration exam to become a Registered Health Information Administrator. This BS degree program is offered in an on-campus setting or completely online.

Admissions Information

Please see the Office of Academic Admissions website for specific admissions information.

Progression and Graduation Requirements

In addition to demonstrating personal characteristics appropriate for a health professions career, students must satisfy general and specific technical standards for this program. View these requirements on the department website above.

Program Information

- Program Length: 4 Years
- Academic Focus Area: Health Professions [HEPR]
- CIP Code: 51.0706
- Program Code: BSHIA_HINA
- Major Code: HINA

Degree Requirements

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

- ACCT 2101 - Principles of Accounting I (3 Credit Hours)
- BIOL 2251 - Anatomy and Physiology I (3 Credit Hours) and BIOL 2251L - Anatomy and Physiology I Lab (1 Credit Hour)
- BIOL 2252 - Anatomy and Physiology II (3 Credit Hours) and BIOL 2252L - Anatomy and Physiology II Lab (1 Credit Hour)
- MINF 2201 - Microcomputer Applications (3 Credit Hours)

Electives: 4 Hours

Select from the following:

- ACCT 2102 - Principles of Accounting II (3 Credit Hours)
- AIST 2120 - Intermediate Scripting and Automation (3 Credit Hours)
- AIST 2220 - Introduction to Web Development (3 Credit Hours)
- AIST 2310 - Introduction to Computer Networking (3 Credit Hours)
- AIST 2950 - Special Topics in Information Technology (3 Credit Hours)
- BUSA 1105 - Introduction to Business and Professional Skills (3 Credit Hours)
- CSCI 1200 - Introduction to Computers and Programming (3 Credit Hours)
- CSCI 1210 - Introduction to Java Programming (3 Credit Hours)
- CSCI 1301 - Principles of Computer Programming I (4 Credit Hours)
- CSCI 1302 - Principles of Computer Programming II (3 Credit Hours)
- CSCI 2120 - Introduction to C# Programming (3 Credit Hours)
- CSCI 2320 - Introduction to Computer Networking (3 Credit Hours)
- CSCI 2330 - System Administration (3 Credit Hours)
- CSCI 2700 - Ethics in Computer Science (2 Credit Hours)
- CSCI 2950 - Selected Topics (1 to 3 Credit Hours)
- CSCI 2980 - Applications Seminar (1 Credit Hour)
- KNHS 2100 - Introduction to Nutrition (3 Credit Hours)
- KNHS 2200 - CPR, First Aid and Sport Safety (1 Credit Hour)
- KNHS 2300 - Introduction to Medical Terminology (3 Credit Hours)
- KNHS 2350 - Health and PE at Early Childhood (2 Credit Hours)
- MATH 1113 - Precalculus Mathematics (3 Credit Hours)
- MATH 1220 - Applied Calculus (3 Credit Hours)
- MATH 1401 - Elementary Statistics (3 Credit Hours)
- MATH 1950 - Selected Topics (1 to 3 Credit Hours)
- MATH 2008 - Foundations of Numbers and Operations (3 Credit Hours)
- MATH 2011 - Calculus and Analytical Geometry I (4 Credit Hours)
- MATH 2011H - Honors: Calculus and Analytical Geometry I (4 Credit Hours)

- MATH 2012 - Calculus and Analytical Geometry II (4 Credit Hours)
- MATH 2013 - Calculus and Analytical Geometry III (4 Credit Hours)
- MATH 2030 - Logic and Set Theory (3 Credit Hours)
- MATH 2950 - Selected Topics (1 to 3 Credit Hours)
- MGMT 2106 - Legal and Ethical Environment of Business (3 Credit Hours)
- PSYC 2101 - Introduction to Psychology of Adjustment (3 Credit Hours)
- PSYC 2103 - Introduction to Human Development (3 Credit Hours)
- PSYC 2150 - Introduction to Human Diversity (3 Credit Hours)
- PSYC 2990 - Undergraduate Research (1 to 4 Credit Hours)
- SOCI 1160 - Social Problems Analysis (3 Credit Hours)
- SOCI 2241 - Social and Cultural Diversity (3 Credit Hours)
- SOCI 2950 - Selected Topics (1 to 3 Credit Hours)

Major Courses: 60 Hours

- HINF 3101 - Principles of Healthcare Management (3 Credit Hours)
- HINF 3102 - Human Resource Management for Healthcare (3 Credit Hours)
- HINF 3209 - Principles of Health Informatics and Information Management (4 Credit Hours)
- HINF 3213 - Healthcare Data Management and Analytics (4 Credit Hours)
- HINF 3315 - Clinical Foundations in Health Informatics and Information Management (5 Credit Hours)
- HINF 3316 - Medical Terminology for Health Informatics and Information Management (3 Credit Hours)
- HINF 4106 - Health Informatics and Information Management Leadership Capstone (4 Credit Hours)
- HINF 4107 - Healthcare Finance and Revenue Cycle Management (4 Credit Hours)
- HINF 4209 - Health Law and Ethics (3 Credit Hours)
- HINF 4418 - Coding Classifications and Compliance (4 Credit Hours)
- HINF 4520 - Electronic Health Information Systems (4 Credit Hours)
- HINF 4521 - Advanced Health Information Systems (4 Credit Hours)
- HINF 4723 - Project Management in Healthcare (6 Credit Hours)
- MINF 2650 - Principles of Data Management and Analysis (3 Credit Hours)
- MINF 3650 - Information Systems (3 Credit Hours)
- STAT 4020 - Statistics and Research Methodology (3 Credit Hours)

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 121 Hours

Bachelor of Science in Health Services

Program Overview

The mission of the Health Services program is to provide knowledge and skills in health care delivery, leadership, cultural competency, global health, bioethics, statistics and research/innovation. The program will prepare students to assume medical and health care jobs in health services administration. The goals of the program are to 1) prepare students to assume medical and health care jobs in health services administration, 2) prepare students to work in a team-oriented environment, 3) prepare students to become knowledgeable leaders in the health care industry.

The Bachelor of Science in Health Services is an open-degree undergraduate program. "Open degree" means that students will be able to declare the degree upon matriculation to the university. Students may start their major courses in either the spring, summer or fall

semesters. The program consists of courses, both lecture and asynchronous, in the College of Allied Health Sciences, Hull College of Business, Pamplin College, and College of Education.

Admissions Information

The Health Services program is an open degree program. Students may enter the program by declaring Health Services as their major. Visit the Admissions website for general requirements of Augusta University.

Progression and Graduation Requirements

- Completion of all Augusta University graduate requirements
- A grade of C or higher in all Major and Field of Study courses

Program Information

- Program Length: 4 Years
- Academic Focus Area: Health Professions [HEPR]
- CIP Code: 51.0701
- Program Code: BS_HLTS
- Major Code: HLTS

Degree Requirements

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

Select 18 hours from the following courses.

- CHEM 1151 - Survey of Chemistry I (4 Credit Hours)
- CHEM 2410 - Chemistry of Organic and Biomolecules (4 Credit Hours)
- CHEM 3411 - Organic Chemistry I (3 Credit Hours) and CHEM 3411L - Organic Chemistry I Laboratory (1 Credit Hour)
- ECON 1810 - Introduction to Economics (3 Credit Hours)
- KNHS 2300 - Introduction to Medical Terminology (3 Credit Hours)
- MATH 1401 - Elementary Statistics (3 Credit Hours)
- PHIL 2010 - Introduction to Philosophy (3 Credit Hours)
- PSYC 2101 - Introduction to Psychology of Adjustment (3 Credit Hours)
- PSYC 2103 - Introduction to Human Development (3 Credit Hours)
- PSYC 2150 - Introduction to Human Diversity (3 Credit Hours)
- SOCI 1160 - Social Problems Analysis (3 Credit Hours)
- SOCI 2241 - Social and Cultural Diversity (3 Credit Hours)
- Any Core IMPACTS course from the Technology, Mathematics and Sciences area not already used
- Any Math or Science course

Major Courses: 60 Hours

- BSHS 3100 - Seminar in Health Services (1 Credit Hour)
- BSHS 3200 - Issue and Challenges in Public Health (3 Credit Hours)
- BSHS 3660 - U.S. Health Care Delivery for Health Services (3 Credit Hours)
- BSHS 4100 - Innovation and Technology in Health Care (3 Credit Hours)
- BSHS 4150 - Health Economics (3 Credit Hours)
- BSHS 4200 - Healthcare Marketing and Commercialization (3 Credit Hours)
- BSHS 4210 - Capstone Project (3 Credit Hours)
- BSHS 4540 - Research in Health Services (3 Credit Hours)
- CAHS 3610 - Ethics for Health Professionals (1 Credit Hour)
- COMM 2010 - Media Literacy (3 Credit Hours)
- HINF 3107 - Principles of Healthcare Management for Health Services (3 Credit Hours)
- HINF 3108 - Human Resources in Healthcare for Health Services (3 Credit Hours)
- HINF 3210 - Principles of Health Informatics and Information Management for Health Services (4 Credit Hours)
- KNHS 3312 - Current Issues in Health and Diseases (3 Credit Hours)
- MGMT 2106 - Legal and Ethical Environment of Business (3 Credit Hours)
- MINF 2201 - Microcomputer Applications (3 Credit Hours)
- MINF 2650 - Principles of Data Management and Analysis (3 Credit Hours)
- POLS 2401 - Introduction to Global Issues (3 Credit Hours)
- POLS 4401 - Government Organization and Administrative Theory (3 Credit Hours)
- STAT 4020 - Statistics and Research Methodology (3 Credit Hours)
- Elective (3 Credit Hours)

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 121 Hours

Term-by-Term Pathway

To outline and visualize the path from start to finish in this program, refer to the suggested Term-by-Term Pathway.

Bachelor of Science in Health Services and a Concentration in Pre-Speech Language Pathology

Program Overview

This concentration provides students with a knowledge of human communication and communication disorders in preparation for graduate study in speech-language pathology. The pre-professional courses focuses on speech-language-communication development, head and neck anatomy, introduction to a wide spectrum of communication disorders, as well as the assessment and treatment of communication disorders. The pre-professional courses include the required prerequisite courses for application to the Master of Health Science in Speech-Language Pathology (SLP) program at Augusta University.

Graduates of the concentration can gain immediate employment as an SLP Assistant. Due to the critical shortage of certified Speech Language Pathologists, there is a high demand for SLP Assistants nationwide. In addition, the students will earn a Bachelor of Science in Health Services, which prepares students for a career in Healthcare Administration.

- BSHS 4540 - Research in Health Services (3 Credit Hours)
- CAHS 3610 - Ethics for Health Professionals (1 Credit Hour)
- COMM 2010 - Media Literacy (3 Credit Hours)
- HINF 3107 - Principles of Healthcare Management for Health Services (3 Credit Hours)
- HINF 3108 - Human Resources in Healthcare for Health Services (3 Credit Hours)
- HINF 3210 - Principles of Health Informatics and Information Management for Health Services (4 Credit Hours)
- KNHS 3210 - Motor Behavior (3 Credit Hours)
- MGMT 2106 - Legal and Ethical Environment of Business (3 Credit Hours)

- MINF 2201 - Microcomputer Applications (3 Credit Hours)
- MINF 2650 - Principles of Data Management and Analysis (3 Credit Hours)
- POLS 2401 - Introduction to Global Issues (3 Credit Hours)
- POLS 4401 - Government Organization and Administrative Theory (3 Credit Hours)
- STAT 4020 - Statistics and Research Methodology (3 Credit Hours)

Concentration Courses: 18 Credit Hours

- SLPP 2100 - Introduction to Speech Language Pathology (3 credit hours)
- SLPP 2102 - Introduction to Audiology (3 Credit Hours)
- SLPP 2101 - Anatomy and Physiology of the Speech and Hearing Mechanism (3 Credit Hours)
- SLPP 2103 - Phonetics (3 Credit Hours)
- SLPP 2104 - Clinical Observations in Speech-Language Pathology (3 Credit Hours)
- SLPP 2105 - Speech and Language Development (3 Credit Hours)

Elective Courses: 3 Hours

Select any three-hour course that has not already been counted as part of the Core courses, Field of Study courses, or Major courses.

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 121 Hours

Bachelor of Science in Information Technology

Program Overview

The Information Technology (IT) curriculum provides students with a broad foundation of technical skills and understanding. The core curriculum covers both theoretical and applied concepts, including computer programming, networking, cybersecurity, web design, data management and analysis, system analysis and design, IT infrastructure, and project management. The remainder of the curriculum is highly flexible, which allows students to personalize their learning experience to obtain the necessary skills and knowledge needed for their desired career path.

Degree Requirements

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

A grade of C or better is required in all courses listed below.

- AIST 2110 - Principles of Scripting (3 Credit Hours)
- AIST 2120 - Intermediate Scripting and Automation (3 Credit Hours)
- CSCI 2700 - Ethics in Computer Science (2 Credit Hours)
- CYBR 2600 - Introduction to Networking and Cyber Security (4 Credit Hours)
- MATH 2020 - Introduction to Discrete Mathematics (3 Credit Hours)
- MINF 2650 - Principles of Data Management and Analysis (3 Credit Hours)

Major Courses: 24 Hours

A grade of C or better is required in all courses listed below.

- AIST 2220 - Introduction to Web Development (3 Credit Hours)
- AIST 3310 - Advanced Networking (3 Credit Hours)
- AIST 3410 - Database Management Systems (3 Credit Hours)
- AIST 3610 - System Analysis and Design (3 Credit Hours)
- AIST 3720 - Operating System Concepts and Administration (3 Credit Hours)
- AIST 4820 - Information Technology Project (3 Credit Hours)
- COMM 3100 - Communications for Professionals (3 Credit Hours)
- MINF 3625 - Project Management (3 Credit Hours)

Major Electives: 21 Hours

Select from the following. A grade of C or better is required in all courses listed below.

- CSCI 1302 - Principles of Computer Programming II (3 Credit Hours)
- AIST 3XXX or 4XXX
- CSCI 3XXX or 4XXX
- CYBR 3XXX or 4XXX

Free Electives: 15 Hours

Select from the following:

- CYBR 2600 - Introduction to Networking and Cyber Security (4 Credit Hours) (1 Hour)
- Non-WELL Electives (14 Hours)

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

Bachelor of Science in Information Technology with a Concentration in Business

Program Overview

The Information Technology curriculum provides students with a broad foundation of technical abilities and understanding. The concentration in business, offered in collaboration with the Hull College of Business, provides students with a deeper understanding of core business concepts, functions and processes, including economics, accounting, management and marketing. It is ideal for students seeking to create technology-enabled solutions to critical business challenges.

Bachelor of Science in Kinesiology with a Concentration in Exercise and Sports Science

Program Overview

The Exercise and Sport Science concentration is designed to provide a strong science-based academic preparation for students who wish to pursue study in physical fitness and training. This concentration is also appropriate for students desiring to enter a graduate program in exercise science, exercise physiology, or who plan to work in fitness and cardiac rehabilitation professions.

- CHEM 1XXX or BIOL 2XXX
- PHYS 1XXX or PHYS 2XXX
- PHYS 1111 - Introductory Physics I (3 Credit Hours) (*recommended*)
- BIOL 2260 - Foundations of Microbiology (4 Credit Hours) (*recommended*)

Major Courses: 30 Hours

- KNHS 3100 - Introduction to Kinesiology and Health Science (3 Credit Hours)
- KNHS 3210 - Motor Behavior (3 Credit Hours)
- KNHS 3220 - Structural Kinesiology (3 Credit Hours)
- KNHS 3310 - Sport and Exercise Psychology (3 Credit Hours)
- KNHS 3319 - Exercise Physiology (3 Credit Hours)
- KNHS 4210 - Fitness Assessment and Exercise Prescription (3 Credit Hours)
- KNHS 4960 - Internship in Kinesiology and Health Promotion (12 Credit Hours)

Concentration Courses: 18 Hours

- KNHS 2300 - Introduction to Medical Terminology (3 Credit Hours)
- KNHS 3311 - Sexuality, Gender, and Health in the Professional Workplace (3 Credit Hours)
- KNHS 3312 - Current Issues in Health and Diseases (3 Credit Hours)
- KNHS 3420 - Instructional Strategies in Health Science (3 Credit Hours)
- KNHS 3XXX or 4XXX (3 Credit Hours)
- KNHS 3XXX or 4XXX (3 Credit Hours)

Electives: 12 Hours

Select any of the following applicable courses with advisement:

- BIOL 2260 - Foundations of Microbiology (4 Credit Hours)
- BIOL 1XXX, BIOL 3XXX, or BIOL 4XXX
- BUSA 3XXX or BUSA 4XXX
- CHEM 1XXX, CHEM 3XXX, or CHEM 4XXX
- ECON 3XXX or ECON 4XXX
- FINC 3XXX or FINC 4XXX
- KNHS 3XXX or KNHS 4XXX
- MGMT 3XXX or MGMT 4XXX
- MILS 3XXX or MILS 4XXX
- PHYS 3XXX or PHYS 4XXX
- PSYC 3XXX or PSYC 4XXX
- SOCI 3XXX or SOCI 4XXX

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 121 Hours

Bachelor of Science in Kinesiology with a Concentration in Medical Professions

Program Overview

The Bachelor of Science in Kinesiology with a concentration in Medical Professions will provide students with an undergraduate degree option that focuses on entering a healthcare field of study. Students interested in medicine or medical school, physician assistant programs, dentistry, or other medical professions may be successful in this program.

Program Contact

Dr. Madison Kindred

706-737-1468

mkindred@augusta.edu

Admissions Information

For more information on admissions requirements, please visit the Office of Admissions website.

Progression and Graduation Requirements

- In Field of Study, Major, Concentration, and Electives, student must earn a grade of "C" or better.
- Students must pass the kinesiology exit exam during the internship semester.

Program Information

- Program Length: 4 Years
- Academic Focus Area: Health Professions [HEPR]
- CIP Code: 31.0505
- Program Code: 1BSK-KINES

Degree Requirements

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

- BIOL 2251 - Anatomy and Physiology I (3 Credit Hours)
- BIOL 2252 - Anatomy and Physiology II (3 Credit Hours)
- KNHS 2100 - Introduction to Nutrition (3 Credit Hours)
- MATH 1401 - Elementary Statistics (3 Credit Hours)

Field of Study Elective: 4 Hours

Select from the following:

- BIOL 1XXX or BIOL 2XXX
- CHEM 1XXX or BIOL 2XXX
- PHYS 1XXX or PHYS 2XXX
- PHYS 1111 - Introductory Physics I (3 Credit Hours) (*recommended*)
- PHYS 1111L - Introductory Physics I Laboratory (1 Credit Hour) (*recommended*)

Major Courses: 30 Hours

- KNHS 3100 - Introduction to Kinesiology and Health Science (3 Credit Hours)
- KNHS 3210 - Motor Behavior (3 Credit Hours)
- KNHS 3220 - Structural Kinesiology (3 Credit Hours)
- KNHS 3310 - Sport and Exercise Psychology (3 Credit Hours)
- KNHS 3319 - Exercise Physiology (3 Credit Hours)

- KNHS 4210 - Fitness Assessment and Exercise Prescription (3 Credit Hours)
- KNHS 4960 - Internship in Kinesiology and Health Promotion (12 Credit Hours)

Concentration Courses: 30 Hours

Concentration Required Courses: 11 Hours

- CHEM 1212 - Principles of Chemistry II (3 Credit Hours)
- CHEM 1212L - Principles of Chemistry II Laboratory (1 Credit Hour)
- CHEM 3411 - Organic Chemistry I (3 Credit Hours)
- CHEM 3411L - Organic Chemistry I Laboratory (1 Credit Hour)
- CHEM 4551 - Biochemistry I: Physical Biochemistry (3 Credit Hours)

Concentration Electives: 19 Hours

Select 19 hours from the following with guidance from advisor:

- BIOL 2260 - Foundations of Microbiology (4 Credit Hours)
- CHEM 3412 - Organic Chemistry II (3 Credit Hours)
- CHEM 3412L - Organic Chemistry II Laboratory (1 Credit Hour)
- KNHS 2300 - Introduction to Medical Terminology (3 Credit Hours)
- PHYS 1112 - Introductory Physics II (3 Credit Hours)
- PHYS 1112L - Introductory Physics II Laboratory (1 Credit Hour)
- PSYC 2103 - Introduction to Human Development (3 Credit Hours)
- PSYC 3143 - Mental Health and Psychopathology (3 Credit Hours)
- BIOL 1XXX, BIOL 3XXX, or BIOL 4XXX
- BUSA 3XXX or BUSA 4XXX
- CHEM 1XXX, CHEM 3XXX, or CHEM 4XXX
- ECON 3XXX or ECON 4XXX
- FINC 3XXX or FINC 4XXX
- KNHS 3XXX or KNHS 4XXX
- MGMT 3XXX or MGMT 4XXX
- MILS 3XXX or MILS 4XXX
- PHYS 3XXX or PHYS 4XXX
- PSYC 3XXX or PSYC 4XXX
- SOCI 3XXX or SOCI 4XXX

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 121 Hours

Bachelor of Science in Kinesiology with a Concentration in Nutrition

Program Overview

The Bachelor of Science in Kinesiology with a concentration in Nutrition provides students with an undergraduate degree option that focuses on work in helping others to pursue healthy lifestyles through nutritional methods. Students who are interested in topics like preventative health, dietetics, disease prevention, community or food service, and general health and wellness may be successful in this program.

Students with a concentration in Nutrition will have the knowledge and skills that will prepares them to apply for accredited master's programs with dietetic internships. Please note, though, that it does not meet the requirements for application to a dietetic internship to become a registered dietitian.

Degree Total: 121 Hours

Bachelor of Science in Kinesiology with a Concentration in Pre-Physical Therapy

Program Overview

The Pre-Physical Therapy concentration is an excellent preparatory program for graduate study in physical therapy as well as post-baccalaureate study in exercise physiology and cardiac rehabilitation. Students learn the principles of measurement/evaluation as they

relate to injury assessment and rehabilitation, principles of exercise physiology to prescribe safe and effective rehabilitation programs, and identify preventative techniques.

Bachelor of Science in Mathematics

Program Overview

Graduates who earn a bachelor's degree in mathematics are logical thinkers and trained problem solvers. They have a broad background in a variety of mathematical techniques, and their program of study can emphasize either pure or applied mathematics. They often embark on careers as actuaries, systems analysts, statisticians, economists, or many other careers. A graduate in

mathematics is well prepared to continue their education in a master's or Ph.D. program in the mathematical sciences, medical school, law school, or by selecting appropriate coursework, enter a career in Actuarial Science.

Admissions Information

For more information on admissions requirements, please visit the Office of Admissions website.

Progression and Graduation Requirements

- A grade of C or better required in all Area F and major concentration courses
- Must complete capstone requirement: MATH 4800 or MATH 4990
- ETS Major Field Test is required

Program Information

- Program Length: 4 Years
- Academic Focus Area: Science and Mathematics [STEM]
- CIP Code: 27.0101
- Program Code: 1BS-MATH

Degree Requirements

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

A grade of C or better is required in all of the following courses.

- MATH 2012 - Calculus and Analytical Geometry II (4 Credit Hours)
- MATH 2013 - Calculus and Analytical Geometry III (4 Credit Hours)
- MATH 2011 - Calculus and Analytical Geometry I (4 Credit Hours) (*1 Hour from the Technology, Mathematics and Sciences (STEM) area of the Core IMPACTS Curriculum*)
- MATH 2030 - Logic and Set Theory (3 Credit Hours)

Select one course from the following:

- CSCI 1301 - Principles of Computer Programming I (4 Credit Hours)
- ENGR 2060 - Programming for Science and Engineering (4 Credit Hours)

Select one course from the following:

No course may duplicate any previous selection. Overflow hours go into General Electives.

- Any 1000 or 2000 level CSCI or AIST course
- Any Science course from the Technology, Mathematics and Sciences (STEM) area of the Core IMPACTS Curriculum
- MATH 1401 - Elementary Statistics (3 Credit Hours)
- DATA 1501 - Introduction to Data Science (3 Credit Hours)
- FREN 1002 - Elementary French II (3 Credit Hours)
- GRMN 1002 - Elementary German II (3 Credit Hours)
- FREN 2001 - Intermediate French I (3 Credit Hours)
- GRMN 2001 - Intermediate German I (3 Credit Hours)

Major Courses: 27 Hours

A grade of C or better is required in all courses.

- MATH 3020 - Differential Equations (3 Credit Hours)
- MATH 3280 - Linear Algebra (3 Credit Hours)
- MATH 4011 - Real Variables I (3 Credit Hours)
- MATH 4211 - Modern Abstract Algebra I (3 Credit Hours)

Sequence Requirement

A sequence of two courses in either abstract algebra, real/complex variables, or statistics is required. Select from the following options:

Option 1 - for students who may be interested in future graduate study in mathematics.

Take one of the following (the first course in the sequence was taken above):

- MATH 4012 - Real Variables II (3 Credit Hours)
- MATH 4212 - Modern Abstract Algebra II (3 Credit Hours)
- MATH 4510 - Complex Variables (3 Credit Hours)

Option 2 - for students who may be interested in future graduate study in statistics.

Take both of the following:

- MATH 4251 - Probability and Statistics I (3 Credit Hours)
- MATH 4252 - Probability and Statistics II (3 Credit Hours)

Option 3 - recommended for students who are interested in careers in Actuarial Science. Students completing option 3 should also consider taking MATH 3251 as an elective.

Take both of the following:

- MATH 4251 - Probability and Statistics I (3 Credit Hours)
- MATH 4253 - Mathematical Statistics (3 Credit Hours)

Elective Courses

Select 6-11 hours from the following:

- MATH 3250 - Introduction to Statistics and Data Analysis (3 Credit Hours)
- MATH 3251 - Theory of Interest (3 Credit Hours)
- MATH 3610 - Introduction to Mathematical Models (3 Credit Hours)
- MATH 3710 - Combinatorics (3 Credit Hours)

- MATH 4012 - Real Variables II (3 Credit Hours)
- MATH 4110 - Mathematical Biology (3 Credit Hours)
- MATH 4212 - Modern Abstract Algebra II (3 Credit Hours)
- MATH 4251 - Probability and Statistics I (3 Credit Hours)
- MATH 4252 - Probability and Statistics II (3 Credit Hours)
- MATH 4253 - Mathematical Statistics (3 Credit Hours)
- MATH 4310 - Modern Geometry (3 Credit Hours)
- MATH 4320 - Theory of Numbers (3 Credit Hours)
- MATH 4350 - Numerical Analysis (3 Credit Hours)
- MATH 4370 - Mathematical Foundations of Cryptography (3 Credit Hours)
- MATH 4420 - Introduction to the Theory of Graphs (3 Credit Hours)
- MATH 4510 - Complex Variables (3 Credit Hours)
- MATH 4520 - General Topology (3 Credit Hours)
- MATH 4530 - Mathematical Methods of Physics (3 Credit Hours)
- MATH 4720 - Partial Differential Equations (3 Credit Hours)
- MATH 4800 - Secondary Mathematics from an Advanced Perspective (3 Credit Hours)
- MATH 4950 - Selected Topics (1 to 3 Credit Hours)
- MATH 4990 - Undergraduate Research (1 to 3 Credit Hours)
- MATH 5110 - Introduction to Biostatistics (3 Credit Hours)
- MATH 5220 - Estimation and Hypothesis Testing (3 Credit Hours)

Capstone Requirement

Select one of the following:

- MATH 4800 - Secondary Mathematics from an Advanced Perspective (3 Credit Hours)
- MATH 4990 - Undergraduate Research (1 to 3 Credit Hours)

Electives or Minor and Electives: 33 Hours

At least 12 courses at upper level.

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 121 Hours

Bachelor of Science in Mathematics and a Concentration in Biostatistics or Statistics

Program Overview

Graduates who earn a bachelor's degree in mathematics with a concentration in biostatistics are logical thinkers and trained problem solvers. They have a broad background in a variety of mathematical techniques with a focus on statistics and data science. They embark on careers as statisticians, epidemiologists, actuaries, and many other careers. A graduate is also well prepared to continue their education in graduate school, medical school, or other programs of study.

Admissions Information

For more information on admissions requirements, please visit the Office of Admissions website.

Progression and Graduation Requirements

- A grade of C or better required in all Field of Study and major concentration courses
- ETS Major Field Test is required

Program Information

- Program Length: 4 Years
- Academic Focus Area: Science and Mathematics [STEM]
- CIP Code: 27.0101
- Program Code: 1BS-MATH

Degree Requirements

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

A grade of C or better is required in all of the following courses.

- MATH 2012 - Calculus and Analytical Geometry II (4 Credit Hours)
- MATH 2013 - Calculus and Analytical Geometry III (4 Credit Hours)
- MATH 2011 - Calculus and Analytical Geometry I (4 Credit Hours) (*1 Hour from the Technology, Science, and Mathematics area of Core IMPACTS*)
- MATH 2030 - Logic and Set Theory (3 Credit Hours)

Select one course from the following:

- CSCI 1301 - Principles of Computer Programming I (4 Credit Hours) or
- ENGR 2060 - Programming for Science and Engineering (4 Credit Hours)

Select one course from the following:

No course may duplicate any previous selection. Overflow hours go into General Electives.

- MATH 1401 - Elementary Statistics (3 Credit Hours)
- DATA 1501 - Introduction to Data Science (3 Credit Hours)
- FREN 1002 - Elementary French II (3 Credit Hours)
- FREN 2001 - Intermediate French I (3 Credit Hours)
- GRMN 1002 - Elementary German II (3 Credit Hours)
- GRMN 2001 - Intermediate German I (3 Credit Hours)
- Any 1000 or 2000 level AIST or CSCI course

- Any science course from the Technology, Mathematics and Sciences area of Core IMPACTS

Major Concentration: 28 Hours

Required Courses: 16 Hours

Grade of C or better is required in all courses.

- MATH 3020 - Differential Equations (3 Credit Hours)
- MATH 3280 - Linear Algebra (3 Credit Hours)
- MATH 4011 - Real Variables I (3 Credit Hours)
- MATH 4211 - Modern Abstract Algebra I (3 Credit Hours)
- MATH 4990 - Undergraduate Research (1 to 3 Credit Hours)
- MATH 5110 - Introduction to Biostatistics (3 Credit Hours)
- or STAT 7110 - Statistical Models and Methods (3 Credit Hours) *

Course Sequence: 9 Hours

Select one of the following sequences:

Sequence I

- MATH 4251 - Probability and Statistics I (3 Credit Hours)
- MATH 4252 - Probability and Statistics II (3 Credit Hours)
- MATH 5220 - Estimation and Hypothesis Testing (3 Credit Hours)

Sequence II

- STAT 7520 - Statistical Theory I (3 Credit Hours) *
- STAT 7620 - Statistical Theory II (3 Credit Hours) *
- Plus one course from the Math Electives list below

Math Elective: 3 Hours

Select one of the following:

- MATH 3250 - Introduction to Statistics and Data Analysis (3 Credit Hours)
- MATH 3251 - Theory of Interest (3 Credit Hours)
- MATH 4012 - Real Variables II (3 Credit Hours)
- MATH 4253 - Mathematical Statistics (3 Credit Hours)
- MATH 4350 - Numerical Analysis (3 Credit Hours)
- MATH 4420 - Introduction to the Theory of Graphs (3 Credit Hours)
- MATH 4510 - Complex Variables (3 Credit Hours)
- MATH 4530 - Mathematical Methods of Physics (3 Credit Hours)
- MATH 4950 - Selected Topics (1 to 3 Credit Hours)

Note:

** Enrollment in STAT 7110, STAT 7520, or STAT 7620 requires admission to the Master of Science in Biostatistics program.*

Minor Courses/Electives: 33 Hours

Select and fulfill the requirements of a minor in a different discipline than the major and/or select electives as needed to complete the credit hours required for graduation. Select electives from any non-WELL courses. At least 12 hours must be from upper-level courses (3XXX or 4XXX).

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 121 Hours

Bachelor of Science in Mathematics and a Secondary Teacher Certification

Program Overview

Graduates who earn a bachelor's degree in mathematics are logical thinkers and trained problem solvers. They have a broad background in a variety of mathematical techniques. By earning a secondary teacher certification as well, they are trained in educational theory and pedagogical techniques, and are well prepared for a career as a high school mathematics teacher.

- MATH 4251 - Probability and Statistics I (3 Credit Hours)
- MATH 4310 - Modern Geometry (3 Credit Hours)
- MATH 4800 - Secondary Mathematics from an Advanced Perspective (3 Credit Hours)

Plus select one of the following:

- MATH 3250 - Introduction to Statistics and Data Analysis (3 Credit Hours)
- MATH 3251 - Theory of Interest (3 Credit Hours)
- MATH 3710 - Combinatorics (3 Credit Hours)
- MATH 4012 - Real Variables II (3 Credit Hours)
- MATH 4110 - Mathematical Biology (3 Credit Hours)
- MATH 4252 - Probability and Statistics II (3 Credit Hours)
- MATH 4253 - Mathematical Statistics (3 Credit Hours)
- MATH 4320 - Theory of Numbers (3 Credit Hours)
- MATH 4350 - Numerical Analysis (3 Credit Hours)

- MATH 4420 - Introduction to the Theory of Graphs (3 Credit Hours)
- MATH 4510 - Complex Variables (3 Credit Hours)
- MATH 4520 - General Topology (3 Credit Hours)
- MATH 4530 - Mathematical Methods of Physics (3 Credit Hours)
- MATH 4950 - Selected Topics (1 to 3 Credit Hours)
- MATH 4990 - Undergraduate Research (1 to 3 Credit Hours)
- MATH 5110 - Introduction to Biostatistics (3 Credit Hours)

Free Electives: 1-2 Hours

As needed to complete the credit hours required for graduation. Select from any non-WELL courses.

Secondary Teacher Certification

A grade of C or better is required in all courses. These courses include a lab (field experience) component totaling 920 clock hours.

Before Admission to Teacher Education: 9 Hours

- EDUC 2110 - Investigating Critical and Contemporary Issues in Education (3 Credit Hours)
- EDUC 2120 - Exploring Social-Cultural Perspectives on Diversity (3 Credit Hours)
- EDUC 2130 - Exploring Learning and Teaching (3 Credit Hours)

After Admission to Teacher Education: 25 Hours

- EDTD 3200 - Assessment and Differentiation for Adolescent Learners (3 Credit Hours)
- EDTD 4940 - Foundations of Reading Seminar (2 Credit Hours)
- SCED 3102 - Secondary School Context and Curriculum (3 Credit Hours)
- SCED 4301 - Secondary Mathematics Pedagogy I (3 Credit Hours)
- SCED 4901 - Secondary Culminating Residency (11 Credit Hours)
- SPED 3002 - Teaching Students with Disabilities in the Inclusive Classroom (3 Credit Hours)

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 123-124 Hours

Bachelor of Science in Neuroscience

Program Overview

The major in Neuroscience provides an interdisciplinary education combining classes from Biology, Chemistry, Mathematics, Physics and Psychology. The curriculum will focus on the molecular, structural, physiologic, cognitive, and behavioral aspects of the nervous system. The degree will include neurobiology specific laboratory experiments and opportunities to incorporate undergraduate research experiences. This curriculum prepares a student to pursue a graduate degree or a professional degree in medicine, dentistry, veterinary medicine and other fields as well as being ready for a variety of opportunities in the work force.

Admissions Information

For more information on admissions requirements, please visit the Office of Admissions website.

Progression and Graduation Requirements

- A grade of C or better is required in all Field of Study, Required Lower Division, Major courses and Upper Division Elective courses.
- Students are responsible for checking prerequisites for all courses.

Program Information

- Program Length: 4 Years
- Academic Focus Area: Health Professions [HEPR]
- CIP Code: 26.1501
- Program Code: 1BS-BNER

Degree Requirements

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

- CHEM 1211 - Principles of Chemistry I (3 Credit Hours)
- CHEM 1211L - Principles of Chemistry I Laboratory (1 Credit Hour)
- CHEM 1212 - Principles of Chemistry II (3 Credit Hours)
- CHEM 1212L - Principles of Chemistry II Laboratory (1 Credit Hour)
- NSCI 2001 - Introduction in Neuroscience (3 Credit Hours)
- NSCI 2010 - Introduction to Neuropharmacology (3 Credit Hours)
- NSCI 2020 - Neuroscience Seminar (1 Credit Hour)

Plus one of the following:

- PSYC 2101 - Introduction to Psychology of Adjustment (3 Credit Hours)
- PSYC 2103 - Introduction to Human Development (3 Credit Hours)
- PSYC 2150 - Introduction to Human Diversity (3 Credit Hours)

Major Courses: 38-39 Hours

Required Courses: 12 Hours

- BIOL 3400 - Cell Biology (3 Credit Hours)
- BIOL 3370 - Neurobiology (3 Credit Hours)
- NSCI 3001 - Neuroscience Journal Club (1 Credit Hour)
- NSCI 3010 - Neuroscience Methods (2 Credit Hours)

- NSCI 4990 - Neuroscience Research (3 Credit Hours)

Neuroscience Course: 3 Hours

Select one of the following:

- NSCI 4120 - Neurobiology of Disease (3 Credit Hours)
- NSCI 4210 - Cognitive Neuroscience (3 Credit Hours)
- NSCI 4310 - Developmental Neurobiology (3 Credit Hours)

Lab Course: 3-4 Hours

Select one of the following:

- BIOL 3350 - Histology (4 Credit Hours)
- BIOL 3380 - Animal Behavior (4 Credit Hours)
- BIOL 3700 - Molecular Biology Laboratory (3 Credit Hours)
- BIOL 4750 - Developmental Biology (4 Credit Hours)

Biology/Psychology Courses: 9 Hours

Select from the following:

- BIOL 3200 - Genetics (3 Credit Hours)
- BIOL 4680 - Pathophysiology (3 Credit Hours)
- BIOL 4700 - Advanced Cell Biology (3 Credit Hours)
- PSYC 3133 - Adult Development and Aging (3 Credit Hours)
- PSYC 3143 - Mental Health and Psychopathology (3 Credit Hours)
- PSYC 3160 - Sensation and Perception (3 Credit Hours)
- PSYC 3180 - Drugs and Behavior (3 Credit Hours)

Upper-Division Courses: 11 Hours

- CHEM 3411 - Organic Chemistry I (3 Credit Hours)
- CHEM 3411L - Organic Chemistry I Laboratory (1 Credit Hour)
- CHEM 3412 - Organic Chemistry II (3 Credit Hours)
- CHEM 3412L - Organic Chemistry II Laboratory (1 Credit Hour)

Plus one of the following:

- CHEM 4551 - Biochemistry I: Physical Biochemistry (3 Credit Hours)
- CHEM 4620 - Principles of Medicinal Chemistry (3 Credit Hours)
- MATH 3250 - Introduction to Statistics and Data Analysis (3 Credit Hours)
- BIOL 4990 - Undergraduate Research (1 to 10 Credit Hours)
- CHEM 4990 - Undergraduate Research (0 to 3 Credit Hours)
- MATH 4990 - Undergraduate Research (1 to 3 Credit Hours)
- PHYS 4990 - Undergraduate Research (0 to 3 Credit Hours)
- PSYC 4990 - Undergraduate Research (1 to 9 Credit Hours)

Free Electives: 21-22 Hours

Select from any non-WELL courses. However, the following Lower-Division Courses are required for the program if not taken as part of the Core IMPACTS requirements.

- PSYC 1101 - Introduction to General Psychology (3 Credit Hours)
- BIOL 1107 - Principles of Biology I (3 Credit Hours)
- BIOL 1107L - Principles of Biology I Laboratory (1 Credit Hour)
- BIOL 1108 - Principles of Biology II (3 Credit Hours)
- BIOL 1108L - Principles of Biology II Laboratory (1 Credit Hour)

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 121 Hours

Bachelor of Science in Nursing

Program Overview

The BSN program provides students the knowledge, skills, and abilities to function effectively in all areas of nursing practice through quality instruction and clinical experiences. Clinical experiences encompass not only acute care settings but also community and home care, ambulatory care, and primary care settings. The program provides students with the opportunity to apply didactic knowledge in a variety of hands-on and simulated clinical settings and lays the groundwork for continuing one's professional education at the graduate level. Upon successful completion of the BSN program, graduates are eligible to take the National Council Licensure Examination for Registered Nurses (NCLEX) offered by the National Council of State Boards of Nursing. The BSN program is taught on Augusta and Athens campuses.

bsn@augusta.edu

Program Accreditation

- Commission on Collegiate Nursing (through 12/31/2034)
- Georgia Board of Nursing

Admissions Information

This program requires an additional admissions application beyond the regular Augusta University undergraduate admissions application. This program is an accredited 2+2 program, which means applicants must complete their freshmen and sophomore years (60 credit hours) at an accredited college/university of choice, and the junior and senior years (64 credit hours) on the Augusta University campus after being admitted to the program. For more information on admissions requirements, please visit the Office of Admissions website.

Progression and Graduation Requirements

- A grade of C or better required in all Core IMPACTS Courses, Field of Study, Lower Division, and Upper Division Courses
- Lower Division courses may be used in the Core Curriculum

Program Information

- Program Length: 4 Years
- Academic Focus Area: Health Professions [HEPR]
- CIP Code: 51.3801
- Program Code: BSN_NURS

Degree Requirements

Below is the required course list for the Bachelor of Science in Nursing.

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

Grade of C or better required in the courses listed below.

- BIOL 2251 - Anatomy and Physiology I (3 Credit Hours) and BIOL 2251L - Anatomy and Physiology I Lab (1 Credit Hour)
- BIOL 2252 - Anatomy and Physiology II (3 Credit Hours) and BIOL 2252L - Anatomy and Physiology II Lab (1 Credit Hour)
- BIOL 2260 - Foundations of Microbiology (4 Credit Hours)
- PSYC 2103 - Introduction to Human Development (3 Credit Hours)

Guided Elective

Select one course from the Technology, Mathematics, and Sciences area of Core IMPACTS (if not already used) or select one of the following:

- MILS 2021 - Leadership and Teamwork (3 Credit Hours)
- POLS 2401 - Introduction to Global Issues (3 Credit Hours)
- PSYC 1101 - Introduction to General Psychology (3 Credit Hours)
- PSYC 2150 - Introduction to Human Diversity (3 Credit Hours)
- SOCI 1101 - Introduction to Sociology (3 Credit Hours)
- SOCI 1160 - Social Problems Analysis (3 Credit Hours)
- SOCI 2241 - Social and Cultural Diversity (3 Credit Hours)
- SOWK 2100 - Social Welfare History and Philosophy (3 Credit Hours)
- SPAN 1001 - Elementary Spanish I (3 Credit Hours)
- SPAN 1002 - Elementary Spanish II (3 Credit Hours)

Required Lower Division Courses

The following courses are required for the Nursing major, if not completed in the Core IMPACTS Requirements. A grade of C or better is required in all courses listed below.

- MATH 1111 - College Algebra (3 Credit Hours)
- or MATH 1113 - Precalculus Mathematics (3 Credit Hours)
- or MATH 2011 - Calculus and Analytical Geometry I (4 Credit Hours)
- or MATH 2011H - Honors: Calculus and Analytical Geometry I (4 Credit Hours)
- MATH 1401 - Elementary Statistics (3 Credit Hours)

Major Courses: 60 Hours

Required Upper Division Courses

A grade of C or better is required in all courses listed below.

- NURS 3800 - Essentials of Pathophysiology (3 Credit Hours)
- NURS 3801 - Health Assessment Across the Lifespan (3 Credit Hours)
- NURS 3802 - Introduction to Nursing Practice (7 Credit Hours)
- NURS 3803 - Health Promotion and Nutrition (2 Credit Hours)
- NURS 3804 - Essentials of Pharmacology (3 Credit Hours)
- NURS 3805 - Adult Health Nursing I (6 Credit Hours)
- NURS 3806 - Geriatric Nursing (3 Credit Hours)
- NURS 3807 - Introduction to Nursing Research (3 Credit Hours)
- NURS 4800 - Mental Health Nursing (3 Credit Hours)
- NURS 4801 - Adult Health Nursing II (6 Credit Hours)
- NURS 4802 - Maternal Child Nursing (6 Credit Hours)
- NURS 4803 - Leadership, Management, and Contemporary Nursing Topics (3 Credit Hours)
- NURS 4804 - Synthesis of Advanced Nursing Concepts (3 Credit Hours)
- NURS 4805 - Community and Public Health Nursing (4 Credit Hours)
- NURS 4806 - Transition to Professional Nursing Practice (5 Credit Hours)

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 121 Hours

Bachelor of Science in Nursing - RN to BSN

Program Overview

Students who enter the RN to BSN track are registered nurses who hold a valid and unrestricted license as a registered nurse (RN) in the state of Georgia. They must complete 60 credit hours in Core IMPACTS and Field of Study requirements prior to applying to the nursing program. Once admitted into the program, student receive 30 hours of credit toward the major and must earn another 30 hours in the major to satisfy the degree requirements. Students will be accepted into this program beginning in Fall 2027.

augusta.edu/nursing/programs/bsn/rn-bsn

Program Contact

bsn@augusta.edu
706-721-4862

Admissions Information

This program requires an additional admissions application beyond the regular Augusta University admissions application. For more information on admissions requirements, please visit the Office of Admissions website.

Progression and Graduation Requirements

- A grade of C or better is required in all Core courses and Field of Study courses.

Program Information

- Program Length: 1 Year (or 2 semesters) full-time. Part-time options are available.
- Academic Focus Area: Health Professions [HEPR]
- CIP Code: 51.3801
- Program Code: BSN_NURS-Nursing

Degree Requirements

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Required Lower-Division Courses

The following are required lower-division courses and should be taken to fulfill the Core IMPACTS requirements. A grade of C or better is required in these courses.

- MATH 1111 - College Algebra (3 Credit Hours)
- MATH 1113 - Precalculus Mathematics (3 Credit Hours)
- MATH 2011 - Calculus and Analytical Geometry I (4 Credit Hours)
- MATH 2011H - Honors: Calculus and Analytical Geometry I (4 Credit Hours)
- MATH 1401 - Elementary Statistics (3 Credit Hours)

Field of Study Courses: 18 Hours

- BIOL 2251 - Anatomy and Physiology I (3 Credit Hours) and BIOL 2251L - Anatomy and Physiology I Lab (1 Credit Hour)
- BIOL 2252 - Anatomy and Physiology II (3 Credit Hours) and BIOL 2252L - Anatomy and Physiology II Lab (1 Credit Hour)
- BIOL 2260 - Foundations of Microbiology (4 Credit Hours)
- PSYC 2103 - Introduction to Human Development (3 Credit Hours)
- Guided Elective (3 Credit Hours)

Associate's Degree in Nursing: 30 Hours

Students receive admission into the RN-BSN program only after proving completion of Core IMPACTS and Field of Study requirements, including an associate's degree in nursing accompanying their active RN license. They must complete 60 credit hours in core requirements prior to applying. Once admitted into the program, they receive 30 hours of credit toward the major and must earn another 30 hours in the major to satisfy the degree.

Major Courses: 30 Hours

Prerequisites: proof of completion of required General Education/Core IMPACTS, prerequisite courses, and prior nursing courses (all with an earned grade of C or higher).

- NURS 3197 - Professional Nursing Practice (3 Credit Hours)
- NURS 3297 - Nursing Research Application (3 Credit Hours)
- NURS 3397 - Health Assessment (3 Credit Hours)
- NURS 4497 - Community Health Nursing (3 Credit Hours)
- NURS 4498 - Community Health Nursing - Clinical (1 Credit Hour)
- NURS 4597 - Leadership and Management (3 Credit Hours)
- NURS 4598 - Leadership & Management Clinical (2 Credit Hours)
- NURS 4813 - Health Promotion Across the Lifespan (3 Credit Hours)
- NURS 4815 - Healthcare Information Technology in Nursing (2 Credit Hours)

- NURS 4816 - Quality and Safety in Professional Nursing (2 Credit Hours)
- NURS 4818 - Policy, Ethics, and Advocacy in Professional Nursing (3 Credit Hours)
- NURS 4819 - Collaborative Nursing Care (2 Credit Hours)

Wellness Graduation Requirement: 0 Hours

Students who begin at or transfer to Augusta University with more than 60 credit hours are not required to complete the Wellness Requirement.

Degree Total: 120 Hours

Bachelor of Science in Nursing - RN to BSN (Program Pathway)

Year 1

Fall-Semester Total: 15 Hours

- NURS 3197 - Professional Nursing Practice (3 Credit Hours)
- NURS 3397 - Health Assessment (3 Credit Hours)
- NURS 4813 - Health Promotion Across the Lifespan (3 Credit Hours)
- NURS 4497 - Community Health Nursing (3 Credit Hours)
- NURS 4498 - Community Health Nursing - Clinical (1 Credit Hour)
- NURS 4815 - Healthcare Information Technology in Nursing (2 Credit Hours)

Spring-Semester Total: 15 Hours

- NURS 4816 - Quality and Safety in Professional Nursing (2 Credit Hours)
- NURS 3297 - Nursing Research Application (3 Credit Hours)
- NURS 4818 - Policy, Ethics, and Advocacy in Professional Nursing (3 Credit Hours)
- NURS 4819 - Collaborative Nursing Care (2 Credit Hours)
- NURS 4597 - Leadership and Management (3 Credit Hours)
- NURS 4598 - Leadership & Management Clinical (2 Credit Hours)

Bachelor of Science in Physics

Program Overview

The BS in physics program provides instruction in each major area of physics. Graduates are well prepared to enter graduate programs in physics, professional programs, or begin employment in any of a variety of areas. Upon completion of Calculus I, students are ready to begin the two-semester introductory physics coursework. The advanced physics coursework is completed in the junior and senior years. Most of the advanced courses are currently offered only every other year, thus the juniors and seniors take the advanced courses together. Many majors participate in undergraduate research projects and present results at professional meetings. The physics faculty work closely with the majors to advise and mentor them through the program.

Progression and Graduation Requirements

- A grade of C or better is required in all physics courses, required Field of Study courses, and required non-core courses
- Satisfactory Physics Oral Exam departmental requirement
- Satisfactory completion of the Exit Exam

Program Information

- Program Length: 4 Years
- Academic Focus Area: Science and Mathematics [STEM]
- CIP Code: 40.0801
- Program Code: 1BS-PHYSICS

Degree Requirements

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

- ENGR 2060 - Programming for Science and Engineering (4 Credit Hours)
- PHYS 2211 - Principles of Physics I (4 Credit Hours)
- PHYS 2212 - Principles of Physics II (4 Credit Hours)
- MATH 2011 - Calculus and Analytical Geometry I (4 Credit Hours)
- MATH 2012 - Calculus and Analytical Geometry II (4 Credit Hours)
- MATH 2013 - Calculus and Analytical Geometry III (4 Credit Hours)

Non-Core Courses: 6-17 Hours

- MATH 2011 - Calculus and Analytical Geometry I (4 Credit Hours) (if not taken in Core IMPACTS, transfer student)
- ENGR 2060 - Programming for Science and Engineering (4 Credit Hours) (3 Hours from Field of Study courses)
- CHEM 1211 - Principles of Chemistry I (3 Credit Hours)
- CHEM 1211L - Principles of Chemistry I Laboratory (1 Credit Hour)
- CHEM 1212 - Principles of Chemistry II (3 Credit Hours) (if not taken in Core IMPACTS)
- CHEM 1212L - Principles of Chemistry II Laboratory (1 Credit Hour)
- MATH 3020 - Differential Equations (3 Credit Hours)

Major Concentration: 36 Hours

- PHYS 3011 - Electronics I (4 Credit Hours)
- PHYS 3012 - Electronics II (4 Credit Hours)
- PHYS 3250 - Theoretical Mechanics (4 Credit Hours)
- PHYS 3260 - Computational Physics (3 Credit Hours)
- PHYS 3300 - Modern Physics (3 Credit Hours)
- PHYS 4010 - Advanced Laboratory (3 Credit Hours)
- PHYS 4051 - Electromagnetic Theory I (3 Credit Hours)

- PHYS 4052 - Electromagnetic Theory II (3 Credit Hours)
- PHYS 4310 - Thermal Physics (3 Credit Hours)
- PHYS 4530 - Mathematical Methods of Physics (3 Credit Hours)
- PHYS 4600 - Quantum Mechanics (3 Credit Hours)

Free Electives: 7-18 Hours

As needed to complete the credit hours required for graduation. Select from any non-WELL courses.

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 121 Hours

Bachelor of Science in Physics and a Concentration in Nuclear Science

Program Overview

In addition to a broad preparation in physics, the nuclear science concentration of the BS physics degree provides students with a thorough introduction to the basic properties of the nucleus, nuclear decay, radiation properties and applications of each of these topics. Radiation detection and measurements are explored in the nuclear laboratory course. Upon completion of Calculus I, students are ready to begin the 2-semester introductory physics coursework. The advanced physics coursework is completed in the junior and senior years. The 3 nuclear courses are currently taught every year, while most of the other advanced courses are every other year. This allows juniors and seniors to take many of their courses together. Local and regional nuclear industry provides numerous employment opportunities. Many nuclear students complete internships with Savannah River National Laboratory and physics majors often participate in undergraduate research projects and present their work at professional meetings. The physics faculty work closely with the majors to advise and mentor them through the program. The nuclear science concentration includes three specialized nuclear science courses, an intro course in fall plus an applications course and measurements lab in the spring.

Admissions Information

For more information on admissions requirements, please visit the Office of Admissions website.

Progression and Graduation Requirements

- A grade of C or better is required in all physics courses, required Field of Study courses, and required non-core courses
- Satisfactory Physics Oral Exam departmental requirement
- Satisfactory completion of the Exit Exam
- Courses marked with an asterisk are recommended for students who intend to pursue graduate studies in health physics.

Program Information

- Program Length: 4 Years
- Academic Focus Area: Science and Mathematics [STEM]
- CIP Code: 40.0801
- Program Code: 1BS-PHYSICS

Degree Requirements

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

- CSCI 1301 - Principles of Computer Programming I (4 Credit Hours)
- or ENGR 2060 - Programming for Science and Engineering (4 Credit Hours)
- PHYS 2211 - Principles of Physics I (4 Credit Hours)
- PHYS 2212 - Principles of Physics II (4 Credit Hours)
- MATH 2011 - Calculus and Analytical Geometry I (4 Credit Hours) (*1 Hour applied here*)
- MATH 2012 - Calculus and Analytical Geometry II (4 Credit Hours)
- MATH 2013 - Calculus and Analytical Geometry III (4 Credit Hours)

Non-Core Courses: 6-14 Hours

Includes spillover hours from Field of Study courses.

- CHEM 1211 - Principles of Chemistry I (3 Credit Hours)
- CHEM 1212 - Principles of Chemistry II (3 Credit Hours) (*if not taken in Core IMPACTS*)
- MATH 3020 - Differential Equations (3 Credit Hours)
- CHEM 1211L - Principles of Chemistry I Laboratory (1 Credit Hour)
- CHEM 1212L - Principles of Chemistry II Laboratory (1 Credit Hour)

Major Concentration: 29 Hours

- PHYS 3000 - Introduction to Nuclear Science (3 Credit Hours)
- PHYS 3010 - Introduction to Nuclear Measurements (3 Credit Hours)
- PHYS 3011 - Electronics I (4 Credit Hours)
- PHYS 3020 - Application of Nuclear Science (3 Credit Hours)
- PHYS 3250 - Theoretical Mechanics (4 Credit Hours)
- PHYS 3300 - Modern Physics (3 Credit Hours)
- PHYS 4051 - Electromagnetic Theory I (3 Credit Hours)
- PHYS 4310 - Thermal Physics (3 Credit Hours)
- PHYS 4010 - Advanced Laboratory (3 Credit Hours)

Major Electives: 7 Hours

Select from the following with Faculty Advisor assistance:

- PHYS 3012 - Electronics II (4 Credit Hours)
- PHYS 3260 - Computational Physics (3 Credit Hours) *
- PHYS 3990 - Undergraduate Research (0 to 3 Credit Hours)
- PHYS 4052 - Electromagnetic Theory II (3 Credit Hours)

- PHYS 4530 - Mathematical Methods of Physics (3 Credit Hours) *
 - PHYS 4600 - Quantum Mechanics (3 Credit Hours) *
 - PHYS 4990 - Undergraduate Research (0 to 3 Credit Hours)
- *Recommended for students who intend to pursue graduate studies in health physics.

Free Electives: 10-18 Hours

As needed to complete the credit hours required for graduation. Select from any non-WELL courses.

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 121 Hours

Bachelor of Science in Psychology

Program Overview

A Bachelor of Science in Psychology prepares students for diverse and rewarding careers through classes in human learning, cognition, social psychology, biological psychology, development, and more. Students have opportunities to take part in undergraduate research, internships, study abroad, the leadership certificate, Honors classes and more.

Admissions Information

For more information on admissions requirements, please visit the Office of Admissions website.

Progression and Graduation Requirements

- A grade of C or better is required in PSYC 1101, PSYC 2101, and PSYC 2150 in Field of Study courses.
- A grade of C or better is required in all Foundation Courses, Advanced Theory Courses, and Major Elective courses.
- The best set of courses to take as a psychology major varies depending on one's career expectations. Students should meet with their academic advisor every semester to plan classes carefully. The foundation series of courses requires a minimum of three successive semesters to complete.
- To progress in a timely manner toward graduation, students should enroll in PSYC 3190 **DURING THEIR FRESHMAN OR SOPHOMORE YEAR** and PSYC 3121 no later than the first semester of the Junior year. Students are responsible for checking prerequisites for all courses in the Catalog.

Program Information

- Program Length: 4 Years
- Academic Focus Area: Social Sciences [SOSC]
- CIP Code: 42.0101

- Program Code: 1BS-PSYCH

Degree Requirements

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

A grade of C or better required in these courses.

- PSYC 1101 - Introduction to General Psychology (3 Credit Hours)
- PSYC 2101 - Introduction to Psychology of Adjustment (3 Credit Hours)
- PSYC 2150 - Introduction to Human Diversity (3 Credit Hours)

Select remaining 9 hours from approved 1000-2000 courses

A grade of D or better required in these courses.

- ANTH 1102 - Introductory Anthropology (3 Credit Hours)
- ANTH 2011 - Cultural Anthropology (3 Credit Hours)
- CHEM 1211 - Principles of Chemistry I (3 Credit Hours)
- CHEM 1212 - Principles of Chemistry II (3 Credit Hours)
- CSCI 1200 - Introduction to Computers and Programming (3 Credit Hours)
- CRJU 1103 - Introduction to Criminal Justice (3 Credit Hours)
- ECON 1810 - Introduction to Economics (3 Credit Hours)
- ECON 2105 - Macroeconomics (3 Credit Hours)
- ECON 2106 - Microeconomics (3 Credit Hours)
- GEOG 1111 - World Geography (3 Credit Hours)
- GEOL 1122 - Introductory Geosciences II: Historical Geology (4 Credit Hours)
- HONR 1900 - Honors: Contemporary Issues (3 Credit Hours)
- MATH 1220 - Applied Calculus (3 Credit Hours)
- MATH 1401 - Elementary Statistics (3 Credit Hours)
- MILS 2011 - Individual Leadership Studies (3 Credit Hours)
- MILS 2021 - Leadership and Teamwork (3 Credit Hours)
- MINF 2201 - Microcomputer Applications (3 Credit Hours)
- PHIL 2010 - Introduction to Philosophy (3 Credit Hours)
- POLS 2000 - Society, Law, and the Criminal (3 Credit Hours)
- POLS 2401 - Introduction to Global Issues (3 Credit Hours)
- PSYC 2103 - Introduction to Human Development (3 Credit Hours)
- SOCI 1101 - Introduction to Sociology (3 Credit Hours)
- SOCI 1160 - Social Problems Analysis (3 Credit Hours)
- SOCI 2241 - Social and Cultural Diversity (3 Credit Hours)
- SOWK 1101 - Introduction to Social Work Practices (3 Credit Hours)
- SOWK 2100 - Social Welfare History and Philosophy (3 Credit Hours)
- WGST 1101 - Introduction to Women's and Gender Studies (3 Credit Hours)
- Foreign Language 2XXX – Foreign Language Elective (3 Credit Hours)

Major Courses: 33 Hours

Foundation Courses: 9 Hours

A grade of C or better is required in all courses.

- PSYC 3190 - Ethical and Professional Foundations (1 Credit Hour) *(must be taken before PSYC 3121 and PSYC 3122)*
- PSYC 3121 - Quantitative Methods (4 Credit Hours) *(must be taken before PSYC 3122)*
- PSYC 3122 - Research Methods (4 Credit Hours)

Advanced Theory Courses: 6 Hours

Select at least two of the following, earning grade C or better in each course:

- PSYC 4115 - History and Systems of Psychology (3 Credit Hours)
- PSYC 4125 - Psychological Tests and Measurement (3 Credit Hours)
- PSYC 4165 - Learning Principles and Applications (3 Credit Hours)
- PSYC 4168 - Cognitive Psychology (3 Credit Hours)
- PSYC 4173 - Social Psychology (3 Credit Hours)
- PSYC 4180 - Behavioral Neuroscience (3 Credit Hours)

Major Electives: 18 Hours

Select from the following, earning a grade of C or better in each course:

- PSYC 3XXX – Psychology Elective
- PSYC 4XXX – Psychology Elective

Note: No more than 3 credit hours counted in the major may come from undergraduate research (PSYC 4990), internship (PSYC 4960), independent study (PSYC 4950), and/or HONR 3999H/HONR 4000H. This policy does not apply to non-repetitive special topics courses which might carry a PSYC 3950 or PSYC 4950 designation.

Minor and Electives: 27 Hours

There are two options for completing these hours. One option is to choose a minor; the second option is to take general electives without a minor. Regardless of the option selected, students must meet the university requirement of 39 hours of upper-level coursework, 33 of which are met through the major.

Option I - Minor

The minor is optional for Psychology majors. Students who plan carefully may take advantage of the minor to designate an area of subspecialty.

Minor Courses: 15-18 Hours

Students majoring in psychology may select a minor and should consult with their advisor on this selection, especially in cases where the student wishes the minor to support career goals. Some minors require 15 hours, others require 18 hours. Note that the minor must be in a different discipline than the major. Please see the catalog description for any given minor to determine the requirements.

Free Electives: 9-12 Hours

Free electives may be taken at any level, and may include additional psychology courses. Wellness classes (WELL) may not count toward the free electives.

Option II - No Minor

If a student chooses not to take a minor, they may take more psychology upper-level electives or electives from other disciplines, as long as they satisfy the requirement of 39 total upper-level hours. Students may substitute a second major for the minor and/or elective courses. Details on taking a second major are provided elsewhere in the catalog and may require 3 additional credits for graduation.

Free Electives:

Free electives may be taken at any level and may include additional psychology courses. The student should consult with the advisor to ensure that the electives include at least 6 credit hours of upper-division classes in addition to the major. Wellness classes (WELL) may not count toward the free electives.

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 121 Hours

Bachelor of Science in Radiologic Sciences in Nuclear Medicine Technology

Program Overview

The Nuclear Medicine Technology B.S.R.S. degree program is a 2+2 transfer program. Sixty credit hours of freshman and sophomore core courses are completed at the college of choice, after which the applicant applies to transfer to the university for the N.M.T. professional component during the junior and senior years.

There are two tracks in the program, a resident track in Augusta and a distance track for North, West, and Central Georgia. Clinical affiliates are located in Augusta, Athens, Atlanta, Gainesville, and Columbus, Georgia. Academic course work and clinical attendance require 40 hours per week, regardless of locale.

Admissions Information

For more information on admissions requirements, please visit the Office of Admissions website.

Progression and Graduation Requirements

- Students must have access to a highspeed (DSL or cable) personal computer. Most student and faculty communication, projects and research require Internet interaction and many lectures are presented online for repeated viewing. Faculty and technical staff are available for technical and instructional support seven days a week.
- In addition to demonstrating personal characteristics appropriate for a health professions career, students must satisfy general and specific technical standards.

Program Information

- Program Length: 4 Years
- Academic Focus Area: Health Professions [HEPR]
- CIP Code: 51.0905
- Program Code: BSRS_NUMT
- Major Code: NUMT

Degree Requirements

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

- CHEM 1151 - Survey of Chemistry I (4 Credit Hours) *
- KNHS 2300 - Introduction to Medical Terminology (3 Credit Hours)
- PHYS 1111 - Introductory Physics I (3 Credit Hours) *
- PHYS 1111L - Introductory Physics I Laboratory (1 Credit Hour) *
- Math/Science Elective (1-3 Credit Hours)

* CHEM 1151 and/or PHYS 1111/PHYS 1111L are required in Field of Study Courses if not taken as science sequence or elective in the Technology, Mathematics and Sciences area of Core IMPACTS. Applicants must have a chemistry with laboratory and a physics with laboratory. If these are counted in Technology, Mathematics and Sciences, then the credit may be fulfilled by any unused course listed in Technology, Mathematics and Sciences, or from any of the 1000 or 2000 numbered PHYS, CHEM, MATH, and/or CSCI courses identified. Technology, Mathematics and Sciences courses may not include "Topics" or "Research" courses, such as CHEM 1000 and PHYS 1010, which are allowable in Technology, Mathematics and Sciences as an elective.

Major Courses: 64 Hours

- NMMT 3100 - Introduction to Patient Care (2 Credit Hours)
- NMMT 3105 - Introduction to Patient Care Lab (1 Credit Hour)
- NMMT 3210 - Radiation Protection and Biology (4 Credit Hours)
- NMMT 3215 - Radiation Protection and Bio Lab (1 Credit Hour)
- NMMT 3320 - Information Technology and Clinical Services Delivery (1 Credit Hour)
- NMMT 3400 - Physics of Nuclear Medicine (4 Credit Hours)
- NMMT 3600 - Introduction to Nuclear Cardiology (3 Credit Hours)
- NMMT 3605 - Physics of Nuclear Medicine Lab (1 Credit Hour)
- NMMT 3611 - Principles and Practice of Nuclear Medicine I (3 Credit Hours)
- NMMT 3612 - Principles and Practices of Nuclear Medicine II (3 Credit Hours)
- NMMT 3621 - Principles and Practice of Nuclear Medicine Laboratory I (1 Credit Hour)
- NMMT 3622 - Principles and Practice of Nuclear Medicine Lab II (1 Credit Hour)
- NMMT 3631 - Applied Research I (1 Credit Hour)
- NMMT 3641 - Clinical Internship (3 Credit Hours)
- NMMT 3642 - Clinical Internship (3 Credit Hours)
- NMMT 3643 - Clinical Internship (5 Credit Hours)
- NMMT 4120 - Principles and Instrumentation of CT (3 Credit Hours)
- NMMT 4140 - Advanced Patient Care (1 Credit Hour)
- NMMT 4160 - Pathology for Radiologic Sciences (2 Credit Hours)
- NMMT 4300 - Professional Issues and Ethics (1 Credit Hour)
- NMMT 4400 - Sectional Anatomy (2 Credit Hours)

- NMMT 4500 - Radiopharmacy for Nuclear Medicine Technology (3 Credit Hours)
- NMMT 4600 - Advance Practice in Nuclear Medicine I (2 Credit Hours)
- NMMT 4610 - Advanced Practice in Nuclear Medicine Laboratory I (1 Credit Hour)
- NMMT 4620 - Research Design and Statistical Methods (2 Credit Hours)
- NMMT 4623 - Clinical Correlation in Nuclear Medicine (3 Credit Hours)
- NMMT 4631 - Applied Research III (1 to 4 Credit Hours)
- NMMT 4641 - Clinical Practicum (2 Credit Hours)
- NMMT 4642 - Clinical Practicum (2 Credit Hours)
- NMMT 4650 - Advanced Practice in Nuclear Medicine II (3 Credit Hours)
- NMMT 4651 - Advanced Practice of Nuclear Medicine Lab II (1 to 4 Credit Hours)

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 125 Hours

Bachelor of Science in Radiologic Sciences in Radiation Therapy

Program Overview

Radiation Therapy is the use of high-energy ionizing radiation to treat cancer and some benign diseases. The goal of radiation therapy is to damage the cancer cells' DNA and destroy its ability to divide and grow, while sparing the surrounding normal tissue. This may be accomplished using highly sophisticated equipment to deliver external beam radiation or using brachytherapy in which radioactive sources are placed inside the patient on a temporary or permanent basis. Radiation Therapy may be used to cure cancer or to relieve pain and other symptoms associated with cancer.

Term-by-Term Pathway

To outline and visualize the path from start to finish in this program, refer to the suggested Term-by-Term Pathway.

Bachelor of Science in Respiratory Therapy

Program Overview

The Bachelor of Science in Respiratory Therapy program is a 2+2 program, meaning that the student completes the first two years at any accredited college or university of choice, and the last two years at Augusta University. All 2+2 students begin the program in the fall semester after completing a core curriculum. The program consists of five semesters and includes classroom and clinical education.

Only 18% of therapists have a BS in Respiratory Therapy. Therapists with a BS are able to work in fields such as pharmaceutical sales or management which command higher salaries.

Degree Requirements

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

Required Courses: 9 Hours

- BIOL 2251 - Anatomy and Physiology I (3 Credit Hours)
- BIOL 2252 - Anatomy and Physiology II (3 Credit Hours)
- BIOL 2260 - Foundations of Microbiology (4 Credit Hours)

Science Electives: 6 Hours

Select 6 hours from the following:

- MATH 1401 - Elementary Statistics (3 Credit Hours)
- PSYC 2103 - Introduction to Human Development (3 Credit Hours)
- BIOL 1XXX - Biology Elective (3 Credit Hours)*
- BIOL 2XXX - Biology Elective (3 Credit Hours)*
- CHEM 1XXX - Chemistry Elective (3 Credit Hours)*
- CHEM 2XXX - Chemistry Elective (3 Credit Hours)*
- PHYS 1XXX - Physics Elective (3 Credit Hours)*
- PHYS 2XXX - Physics Elective (3 Credit Hours)*

** Any BIOL, CHEM, or PHYS course not used in another area.*

Major Courses: 66 Hours

- CAHS 3110 - Human Physiology (3 Credit Hours)
- RTHP 3100 - Foundations of Respiratory Care (3 Credit Hours)
- RTHP 3204 - Fundamentals of Respiratory Care Practice I (3 Credit Hours)
- RTHP 3208 - Fundamentals of Respiratory Care Practice Lab I (2 Credit Hours)
- RTHP 3304 - Fundamentals of Respiratory Care Practice II (3 Credit Hours)
- RTHP 3308 - Fundamentals of Respiratory Care Practice Lab II (1 Credit Hour)
- RTHP 3322 - Clinical Aspects of Cardiopulmonary Disease for the Respiratory Therapist I (3 Credit Hours)
- RTHP 3525 - Clinic I (3 Credit Hours)
- RTHP 3560 - Diagnostic Testing in Respiratory Care (3 Credit Hours)
- RTHP 3601 - Community and Public Health Respiratory Therapy (3 Credit Hours)
- RTHP 4114 - Introduction to Ventilator-Patient Management (3 Credit Hours)
- RTHP 4117 - Introduction to Ventilator-Patient Management Lab (1 Credit Hour)
- RTHP 4124 - Neonatal and Pediatric Respiratory Care (3 Credit Hours)
- RTHP 4127 - Neonatal and Pediatric Respiratory Care Lab (2 Credit Hours)
- RTHP 4422 - Clinical Aspects of Cardiopulmonary Disease for the Respiratory Therapist II (3 Credit Hours)
- RTHP 4426 - Clinic II (3 Credit Hours)
- RTHP 4514 - Advanced Ventilator-Patient Management Techniques (3 Credit Hours)
- RTHP 4517 - Advanced Ventilator-Patient Management Lab (1 Credit Hour)
- RTHP 4525 - Advanced Clinic I (4 Credit Hours)
- RTHP 4526 - Advanced Clinic II (3 Credit Hours)

- RTHP 4527 - Advanced Clinic III - Externship (11 Credit Hours)
- RTHP 4540 - Research in Health Care (3 Credit Hours)
- RTHP 4601 - Professional and Ethical Issues in Respiratory Therapy (3 Credit Hours)

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Bachelor of Social Work

Program Overview

The distinction of the Augusta University CSWE accredited Social Work program comes in small interactive courses with individual mentoring taught by social workers with considerable practice experience. The social work program is designed to prepare students for generalist social work practice upon graduation. Coursework also prepares students with the groundwork to pursue and succeed in an MSW graduate programs or other graduate or professional programs.

augusta.edu/pamplin/social-sciences/social-work

Program Accreditation

This program is accredited by the Council on Social Work Education (CSWE).

Admissions Information

For more information on admissions requirements, please visit the Office of Admissions website.

Progression and Graduation Requirements

- A grade of C or better is required in all Major courses, as well as CRJU 1103, SOCI 1101, SOCI 1160, SOWK 2100 and SOWK 2102
- A grade of B or better is required in SOWK 1101

Program Information

- Program Length: 4 Years
- Academic Focus Area: Social Sciences [SOSC]

- CIP Code: 44.0701
- Program Code: 1BSW-SOCW

Degree Requirements

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Field of Study Courses: 18 Hours

- SOWK 1101 - Introduction to Social Work Practices (3 Credit Hours) (grade of B or better)
- SOWK 2100 - Social Welfare History and Philosophy (3 Credit Hours) (grade of C or better)
- SOWK 2102 - Fundamentals of Social Work Practice (3 Credit Hours) (grade of C or better)

Select 3 courses not chosen above:

- ANTH 2011 - Cultural Anthropology (3 Credit Hours)
- BIOL 1101 - Fundamentals of Biology (3 Credit Hours)
- CRJU 1103 - Introduction to Criminal Justice (3 Credit Hours) (grade C or better)
- ECON 1810 - Introduction to Economics (3 Credit Hours) or ECON 2105 - Macroeconomics (3 Credit Hours)
- MATH 1401 - Elementary Statistics (3 Credit Hours)
- LDRS 2000 - Introduction to Leadership and Professionalism (3 Credit Hours)
- MUSI 2000 - Introduction to Music Therapy (3 Credit Hours)
- PHIL 2030 - Introduction to Ethics (3 Credit Hours)
- POLS 2000 - Society, Law, and the Criminal (3 Credit Hours)
- POLS 2101 - Introduction to Political Science (3 Credit Hours)
- POLS 2401 - Introduction to Global Issues (3 Credit Hours)
- PSYC 1101 - Introduction to General Psychology (3 Credit Hours)
- PSYC 2103 - Introduction to Human Development (3 Credit Hours)
- SOCI 1101 - Introduction to Sociology (3 Credit Hours) (grade C or better)
- SOCI 1160 - Social Problems Analysis (3 Credit Hours) (grade C or better)
- SOCI 2241 - Social and Cultural Diversity (3 Credit Hours)
- Two-course foreign language sequence (preferably Spanish) (6 Credit Hours)

Lower-Division Courses:

If not already taken in the Core IMPACTS or Field of Study areas, part of the above 9-10 hours.

- BIOL 1101 - Fundamentals of Biology (3 Credit Hours) (*Strongly recommended*)
- BIOL 1102 - Environmental Biology (3 Credit Hours) (*Strongly recommended*)
- MATH 1401 - Elementary Statistics (3 Credit Hours) (*Strongly recommended*)

While not required for the degree, the following courses are required as prerequisites to SOWK 3300 and should be considered when making core course choices:

- PSYC 1101 - Introduction to General Psychology (3 Credit Hours)
- SOCI 1101 - Introduction to Sociology (3 Credit Hours)

Major Requirements: 48 Hours

A grade of C or better is required in all courses.

- SOWK 3300 - Human Behavior in the Social Environment I (3 Credit Hours)

- SOWK 3301 - Human Behavior in the Social Environment II (3 Credit Hours)
- SOWK 3400 - Social Work Practice I (3 Credit Hours)
- SOWK 3401 - Generalist Practice in Groups (3 Credit Hours)
- SOWK 3402 - Generalist Practice in Communities (3 Credit Hours)
- SOWK 3500 - Social Welfare Policy (3 Credit Hours)
- SOWK 3501 - Child and Family Welfare (3 Credit Hours)
- SOWK 3600 - Social Work Research I (3 Credit Hours)
- SOWK 3601 - Social Work Research II (3 Credit Hours)
- SOWK 4421 - Gerontology (3 Credit Hours)
- SOWK 4601 - Integrated Seminar I (3 Credit Hours)
- SOWK 4602 - Integrative Seminar II (3 Credit Hours)
- SOWK 4701 - Field Placement I (6 Credit Hours)
- SOWK 4702 - Field Placement II (6 Credit Hours)

6 hours in Upper-Division Social Work Electives

6 hours in Upper-Division Social Work Electives. Choose from the following (not previously taken):

- SOWK 3501 - Child and Family Welfare (3 Credit Hours)
- SOWK 4421 - Gerontology (3 Credit Hours)
- SOWK 3331 - Youth and Society (3 Credit Hours)
- SOWK 3375 - Sociology of Death, Grief, and Caring (3 Credit Hours)
- SOWK 3950 - Selected Topics (3 Credit Hours)
- SOWK 4950 - Selected Topics (0 to 3 Credit Hours)
- SOWK 4960 - Undergraduate Internship (3 Credit Hours)
- SOWK 4990 - Undergraduate Research (1 to 3 Credit Hours)

Free Electives: 6-12 Hours

As needed to complete the credit hours for graduation. Select from non-WELL courses.

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Degree Total: 121 Hours

Certificate of Less than One Year in Cultural Diversity in Healthcare

Program Overview

Students who aspire to careers in medicine, dentistry, nursing, allied health, and social work as well as public administration or business, can complete this specialized training certificate in the first two years of their degree program prior to applying for internships, shadowing opportunities or focused programs, as well as before sitting entrance exams. Our students and certificate graduates can feel confident in their diversity knowledge and skills and will be better prepared to effectively and empathetically interact with others in the healthcare arena. This is an embedded and stand alone certificate.

Certificate of Less than One Year in European Union Studies

Program Overview

This is a five-course certificate program that is a collaborative effort among this university, the University System of Georgia, and the University of Munich, Germany. This program is open to all academic majors. A certificate in EU Studies must be taken in tandem with a formal degree program. Students from all academic majors are eligible to participate so long as they possess a minimum 2.75 cumulative grade point average (GPA). A student may formally apply to enroll in the program after successful completion of the prerequisites.

Certificate of Less than One Year in Filmmaking

Program Overview

The Department of Art and Design's Certificate in Filmmaking provides a focused sequence of courses that guides students through the art and craft of filmmaking. Taught by a faculty of experienced and award-winning professionals, the Certificate in Filmmaking provides a strong foundation in screenwriting, cinematography, and editing. The sequence culminates with an applied capstone in which students create a substantive documentary or narrative film. This is an embedded certificate.

Culminating Experience: 3 Hours

- FITH 4000 - Theory and Practice (3 Credit Hours)

Certificate Total: 18 Hours

Certificate of Less than One Year in Health Humanities

Program Overview

This undergraduate certificate is open to any undergraduate student interested in examining medicine, health, and wellness from a humanities perspective. It develops writing and research skills while training students in bioethics and cultural competency through courses that emphasize critical thinking about health, medicine, and wellness. It will be of value in particular to students interested in health policy, bioethics, medical administration, art therapy, and pastoral care. This is an embedded certificate.

- Other courses as approved

Certificate Total: 15 Hours

Certificate of Less than One Year in Leadership

Program Overview

Leadership, one of the university's core values, is an important skill for students to develop during the undergraduate education regardless of discipline. The Certificate of Leadership at Augusta University exposes students to leadership theory and practice, guides students in leadership development and offers students opportunities to gain significant leadership experiences on campus and in the community. Throughout this certificate, students develop leadership competencies in Communication, Problem Solving, Leadership, Professionalism, and Teamwork.

The Certificate is housed in the Office of First and Second Year Experiences located in University Hall 331; our staff can be reached at 706-667-4412.

Program Contact

Dr. Elizabeth Huggins, Director, First and Second Year Experiences
706-667-4412
COL@augusta.edu

Admissions Information

Undergraduate students in any program of study may declare the intention to pursue the Certificate of Leadership. Students may seek entry into the Certificate of Leadership by speaking with the COL advisor or their undergraduate academic advisor. Interested students should email COL@augusta.edu to add the COL curriculum to their student record.

It is ideal that students enroll in INQR 1000 in the Freshman year and LDRS 2000 during the second semester of the freshman year or during the sophomore year. Subsequent courses (LDRS 3000, 4999) should be taken after the successful completion of LDRS 2000.

For more program information please visit the Office of First and Second Year Experiences in UH 331 or our COL website at augusta.edu/COL/.

Progression and Graduation Requirements

- Students wishing to earn the Certificate of Leadership will complete 9-12 hours of COL coursework with a C or better
- Students must complete INQR 1000 with a grade of C or better prior to or concurrently with LDRS 2000

Program Information

- Program Length: 1 Year
- CIP Code: 13.1401
- Program Code: 1CER0-LEDR

Certificate Requirements

- INQR 1000 - Fundamentals of Academic Inquiry (1 Credit Hour)
- LDRS 2000 - Introduction to Leadership and Professionalism (3 Credit Hours)
- LDRS 3000 - Experience in Leadership (1 to 3 Credit Hours) or LDRS 4960 - Undergraduate Internship in Leadership (0 to 3 Credit Hours) (*3 to 6 credit hours total*)
- LDRS 4999 - Leadership Capstone (0 to 3 Credit Hours) (*2 Credit Hours total*)

Certificate Total: 9-12 Hours

Certificate of Less than One Year in Legal Studies

Program Overview

The Certificate in Legal Studies provides students with foundational knowledge about the law and the legal profession and helps them develop the academic and professional skills related to the practice of law, including the ability to think logically, read critically, and write clearly and persuasively. This is an embedded certificate. Students can work with their advisor to complete the certificate completely online.

- SOSC 4960 - Social Science Undergraduate Internship (0 to 12 Credit Hours)

Certificate Total: 18 Hours

Certificate of Less than One Year in Linguistics

Program Overview

The Certificate in Linguistics serves students who desire to undertake a scientific study of language as a communication system. While linguistics is not a study of multiple languages, this certificate program is suitable for students who study one or more languages in addition to English, and it is especially well suited for students who transfer into the institution with significant numbers of credits in a foreign language other than those currently offered at Augusta University. The certificate program will prepare students for further study or careers in interpretation, translation, speech/audio pathology, business, or further study in multiple areas of linguistics. Knowledge attained in the courses that comprise the Linguistics Certificate complements majors in foreign languages, English, international studies, anthropology, or computer science. This is an embedded or standalone certificate.

Certificate of Less than One Year in Media Production

Program Overview

Offering a certificate in media production will give our students the opportunity to specialize in a communication area that is attractive to our students and in which there are jobs available in the Augusta job market. Here jobs are most abundant in television, radio, news media, and magazines; thus, this certificate will give students fifteen hours of concentration in these production-oriented fields. This is a standalone certificate.

Certificate of Less than One Year in Teaching English to Speakers of Other Languages (TESOL)

Program Overview

The Department of English and World Languages offers a certificate to teach English to speakers of other languages (TESOL). The TESOL Certificate is a 15-hour undergraduate certificate. The certificate may be completed by any undergraduate, but it is targeted at English or World Language majors. The goal of this certificate is to enable students to teach English to speakers of other languages abroad or private institutions in the United States by providing essential knowledge and teaching skills to students. It includes courses such as English linguistics, English grammar, culture, and teaching methods. The TESOL Certificate will be awarded at the end of the undergraduate program. It may also be offered to post-baccalaureate students as an add-on certificate. This is an embedded certificate.

Doctor of Dental Medicine

Program Overview

The Dental College of Georgia (DCG) at Augusta University offers a four-year program leading to a Doctor of Dental Medicine (DDM) degree. The dental curriculum consists of courses in oral biology, clinical sciences, behavioral sciences and management. An Augusta University dental education emphasizes early exposure to patients. Students begin treating patients as early as sophomore year, enjoying a seamless transition from lecture halls and laboratories to clinics. As they master new skills they practice them in the clinic, closely supervised by caring, committed faculty. The fourth year of education is devoted almost solely to patient care. Senior students also practice their skills in clinics and facilities throughout the state.

Email: osaas@augusta.edu

Progression and Graduation Requirements

The DCG measures student performance in many ways throughout the DMD curriculum with the goal of educating well-rounded, competent dentists. The curriculum begins with foundational knowledge in basic sciences and clinical reasoning and skills. As the curriculum progresses, it moves into the formative stages and then practice, finally culminating in achievement of overall competence. Overall Competency is the moment when a student is deemed to have the knowledge, skills, and ability to operate independently as an entry-level dentist. Overall competency at the DCG is achieved when a student:

- passes all competency components,
- completes comprehensive care for patients reflecting a body of acceptable clinical activity,
- exhibits acceptable ethical and professional behavior/exhibiting the values of a health professional, and
- completes clinical experiences.

A comprehensive care faculty review committee reviews individual student's overall performance and can make exceptions to (item no. 4) so students are not prevented from graduating based strictly on a "number of clinical experiences" aspect. This also means that completing the historical average number of experiences does not guarantee competence. The quality factor is determined by the

comprehensive care faculty review committee. This same committee reviews the factors above and deems achievement for overall competency. It should also be noted that overall competency does not guarantee completion of the DMD degree; academic criteria must be met as well.

D4 Clinic: 35 Hours

- ADFD 5793 - Clinical Ethics and Professionalism III (3 Credit Hours)
- ADFD 5894 - Clinical Ethics and Professionalism IV (3 Credit Hours)
- GDCC 5791 - Comprehensive Care Clinic I (13 Credit Hours)
- GDCC 5892 - Comprehensive Care Clinic II (11 Credit Hours)
- OMFS 5793 - Oral Surgery Clinic III (1 Credit Hour)
- OMFS 5794 - Oral Surgery Hospital Clinic (1 Credit Hour)
- OMFS 5895 - Oral Surgery Clinic IV (1 Credit Hour)
- PERI 5793 - Periodontics Clinic III (1 Credit Hour)
- PERI 5894 - Periodontics Clinic IV (1 Credit Hour)

Degree Total: 275 Hours

Term-by-Term Pathway

To outline and visualize the path from start to finish in this program, refer to the suggested Term-by-Term Pathway.

Doctor of Dental Medicine and Master of Business Administration

Program Overview

The concurrent DMD-MBA Degree Program allows students to be dually enrolled in both DMD and MBA courses simultaneously. Developed through a partnership between the Dental College of Georgia and The Hull College of Business, our mission is to foster future leaders in dentistry who are skilled in the practices of dentistry and business management. Students must complete at least two semesters of the DMD program before enrolling into concurrent MBA coursework.

Doctor of Education in Educational Innovation with a Concentration in a Teaching and Curriculum Area

Program Overview

The doctoral program in educational innovation is designed for practitioners who work in varied educational settings. There are three concentration areas: 1) Teaching and Curriculum, 2) Educational Leadership, and 3) Higher Education. The degree program prepares educators to lead effectively in the teaching and learning environment, to advocate for solutions to problems, to foster innovation, and to be responsive to the evolving expectations placed upon educational systems. Based on the Carnegie Project on the Educational Doctorate (CPED) principles, the 55-hour program of study includes 19 hours of core coursework, 9 hours in a concentration of choice (see list of 21 concentrations available for the Teaching and Curriculum concentration), 12 hours in research, and 15 hours of capstone/dissertation in practice.

Students progress through the program as a cohort, and courses in the Curriculum and Instruction concentration are taught face-to-face using an executive model over six weekends each semester. Starting in Spring 2026, students entering the Educational Leadership concentration, the program will be delivered online via asynchronous instruction.

Admissions Information

This program has a secondary admissions process. For more information on admissions requirements, visit The Graduate School website.

Progression and Graduation Requirements

- Students in the Doctor of Education degree program must meet all academic standards of the College of Education and Human Development and The Graduate School, to include a requirement to maintain a minimum GPA of 3.0 each semester and overall. A minimum grade of B (or satisfactory in courses graded S and U) must be earned for each course applying toward the EdD.
- Students whose semester or cumulative GPA falls below a 3.0 will be placed on academic probation. While on academic probation students must maintain at least a 3.0 GPA each semester. The student will have two consecutive enrolled semesters to re-establish a cumulative 3.0 GPA. Any student making less than a 3.0 GPA for more than one semester, consecutive or otherwise, will automatically be dismissed.
- Student's earning a "U" or "C" in any course will be required to repeat the course and/or participate in faculty-designed remediation. Remediation plan may include enrolling in and satisfactorily completing an Independent Study. Failure to remediate the academic probation can result in dismissal from the program.

- Any student who earns a "C" and/or "U" in more than one course during their enrollment will be considered for dismissal. Students who earn a "D" or "F" in any course of the Ed. D. are automatically dismissed from the college. When circumstances are warranted, a student being considered for dismissal under this policy may be permitted to continue as a student on probation upon the recommendation of the academic program director and approval of the Dean.
- Any student dismissed from the College of Education and Human Development/The Graduate School may appeal the action in accordance with the Augusta University policy.

Degree Total: (55 Credit Hours)

Doctor of Medicine (Athens Campus)

Program Overview

First and second year students study foundational and clinical sciences in an organ-systems based, hybrid curriculum, the centerpiece of which is case-based, small group learning, supplemented by interactive large group sessions. Subject areas such as biochemistry, anatomy, genetics, physiology, neuroscience, microbiology, immunology, pathology, pharmacology, and psychiatry are integrated and presented in the context of clinical problems to encourage a more logical sequence of learning and to highlight the clinical relevance of the foundational sciences. This helps students learn in a context that more directly applies to how they will care for patients.

The emphasis on an integrated approach to lifelong learning begins in the first year to help students learn the normal structure and function of the human body, as well as understand social and behavioral aspects of medicine. It continues in the second year, which emphasizes pathophysiology and clinical decision making. Throughout both foundational science years, clinical components include Art of Doctoring, Community and Population Health, Clinical Skills and Methods, and Evidence Based Medicine and Practice, in addition to Ethics and Professionalism.

The third year consists of clinical rotations in the core disciplines of medicine, and the fourth year consists of electives and selectives. Required and elective third- and fourth-year clerkships are available in private practices, community clinics and hospitals. These two years involve the application of the knowledge acquired in the foundational science years to a clinical setting.

- MEDI 5212 - Module 1: Hematology/Oncology (11 Credit Hours)
- MEDI 5226 - Module 2: Genitourinary (15 Credit Hours)
- MEDI 5232 - Module 3: Cardiopulmonary (15 Credit Hours)
- MEDI 5242 - Module 4: Digestive and Endocrine Systems (12 Credit Hours)
- MEDI 5252 - Module 5: Behavior and Brain (12 Credit Hours)
- MEDI 5262 - Module 6: Multi-System Disorders (11 Credit Hours)

Year Three: Clerkship and Enrichment

Students must satisfactorily complete all of the requirements of Year 2 before entering Clerkship and Enrichment. Students must pass USMLE Step I to enter the third year curriculum.

Students complete their core clerkships and electives at hospitals and community-based training sites throughout Northeast Georgia. All core clerkships and the intersession in the care for chronically ill and terminally ill patients occur in the catchment area for the Medical Partnership Campus.

- FMPC 5000 - Basic Clerkship Family Medicine (18 Credit Hours)
- GMED 5000 - Basic Clerkship in Internal Medicine (18 Credit Hours)
- MEDI 6000 - Care of the Chronically and Terminally Ill Intersession (5 Credit Hours)
- NEUR 5000 - Basic Clerkship in Neurology (9 Credit Hours)
- OBGN 5000 - Basic Clerkship in Obstetrics and Gynecology (18 Credit Hours)
- PEDS 5000 - Basic Clerkship in Pediatrics (18 Credit Hours)
- PSRY 5000 - Basic Psychiatry Clerkship (9 Credit Hours)
- SURG 5000 - Basic Clerkship in Surgery (18 Credit Hours)

Year Four: Senior Year Requirements

The fourth year is ten months in length. Students must complete two clerkships and two selectives. All students must complete an adult ambulatory clerkship, an emergency medicine clerkship, an acting internship selective, and a critical care selective. The remainder of the fourth year consists of at least three electives. Students may take additional electives during the academic year. Of these three required electives in the fourth year, one must be at an MCG-affiliated site.

- Only one international experience may fulfill the elective requirements for graduation.
- Students may only receive graduation credit for one research elective regardless of the length of the experience. A student may do research electives in different areas of interest; however, only one of these electives fulfills the elective requirements for graduation.
- If a student did not complete a third-year elective, they must do a total of four electives in the fourth year to fulfill the requirements for graduation. Two of the four electives must be on-campus.
- The Curriculum Office must approve off-campus electives for graduation credit.
- According to institutional policy, students may not receive retroactive credit for electives that were not approved by the Curriculum Office.

Degree Total: 155 Hours

Term-by-Term Pathway

To outline and visualize the path from start to finish in this program, refer to the suggested Term-by-Term Pathway.

Doctor of Medicine (Main Campus)

Program Overview

Students are required to complete the Preclerkship Phase followed by Clerkship/Advanced Clerkship/Enrichment Phases. By the conclusion of the Preclerkship Phase students must have chosen one of four pathways. The three-year PGY-1 Pathway, the Dual Degree Pathway, the Advanced Research Pathway, or the four-year Residency Jump Start Pathway. All students, regardless of Pathway choice, must complete the requirements of the Core Curriculum outlined below.

- **Preclerkship:** Students must complete all Preclerkship courses prior to moving to the Clerkship Phase.
- **Clerkship:** Students must complete seven clerkships during the clerkship phase before being promoted to the Advanced Clerkship Phase. These are Family Medicine, Internal Medicine, Neurology, Obstetrics and Gynecology, Pediatrics, Psychiatry, and Surgery. Clerkships may be taken in any order or altogether in the form of an LIC. Depending on the student's Pathway of choice, clerkships may be interrupted by electives. Students will also complete a PCL Clerkship course which runs concurrently with the clerkships.
- **Advanced Clerkship:** Upon promotion to the Advanced Clerkship Experience, students must complete a clerkship in Emergency Medicine. This clerkship is taken during the Advanced Clerkship Phase except in the case of a student on the 3-year Primary Care Pathway who is an Emergency Medicine student - These students will complete the Emergency Medicine clerkship during the Clerkship Experience. Additionally as a part of the core curriculum, students must complete three 4-week clinical selectives. These are Ambulatory, Critical Care, and Sub-Internship. Courses that meet the clinical selective requirement are available in a variety of different departments. Students also complete a USMLE prep course and an PCL course during this phase.
- **Electives:** Students must complete 6 weeks of elective courses. Electives may be completed during the Clerkship/Advanced Clerkship or Enrichment phases depending on the prerequisites for the elective and the student's chosen pathway. Students in the 4-year Residency Jump Start Pathway have additional elective requirements.
- **USMLE:** Students must pass USMLE Step 1 and Step 2 prior to graduation. The timing of these tests is dependent on the individual student, pathway choice, and residential campus.

Note: As a part of the Core Curriculum, students may complete up to four weeks of electives off campus on a visiting elective.

In addition to the requirements of the Core Curriculum, students on the Residency Jump Start, Dual Degree and Advanced Research Pathways have further requirements outlined below during the Enrichment Phase.

- **Patient Centered Learning:** Students in all of these pathways must complete two additional PCL – Enrichment courses. These courses will be taken concurrently with all other curricular requirements.
- **Selectives:** Students in the Residency Jump Start Pathway must complete one 4 weeks of Clinical Elective and four weeks of a Scholarly Project selective. Students must also complete an additional 8 weeks that can be made up of 8 more weeks of clinical elective or scholarly project or 4 weeks of each. Additionally, students complete an Integrative Science Selective.
- **Electives:** Students on the Residency Jump Start Pathway must complete an additional eight weeks/16 hrs. of electives in blocks ranging from two to six weeks in length.
- **Dual Degree Courses:** Students on the Dual Degree Pathway must complete the requirements of their chosen second degree.
- **Advanced Research:** Students on the Advanced Research Pathway must complete an additional 20 weeks of research.

Note: Students in these three Pathways may take an additional eight weeks of time off campus to fulfill the selective or elective requirements for graduation. Students may take as much time off campus as they wish, but no more than twelve weeks (four weeks in Core and eight weeks in Enrichment) will be counted toward the graduation requirements.

Program Information

- Program Length: 4 Years
- CIP Code: 51.1201
- Program Code: MD_MEDD
- Major Code: MEDD

Curriculum for Main Campus Students

Pre-Clerkship: 149 Hours

Year One

Pre-Clerkship Fall: 45 Hours

- MEDI 6100 - Orientation to Medicine Module (3 Credit Hours)
- MEDI 6110 - Patient Centered Learning 1 (11 Credit Hours)
- MEDI 6120 - Foundations of Medicine Module (15 Credit Hours)
- MEDI 6130 - Musculoskeletal/ Skin Module (12 Credit Hours)
- MEDI 6150 - MCG YOU+ Learning Communities (4 Credit Hours)
- MEDI 6300 - Career Paths in Medicine (0 to 15 Credit Hours) (*taken for 0 credit hours*)

Pre-Clerkship Spring: 48 Hours

- MEDI 6150 - MCG YOU+ Learning Communities (4 Credit Hours)
- MEDI 6210 - Patient Centered Learning 2 (13 Credit Hours)
- MEDI 6220 - Cardiopulmonary/Renal (16 Credit Hours)
- MEDI 6230 - Healthcare Matters Module (4 Credit Hours)
- MEDI 6240 - GI/Endocrine/Reproduction/Lifespan Module (15 Credit Hours)
- MEDI 6300 - Career Paths in Medicine (0 to 15 Credit Hours) (*taken for 0 credit hours*)

Year Two

Pre-Clerkship Fall: 56 Hours

- MEDI 6230 - Healthcare Matters Module (4 Credit Hours)
- MEDI 6150 - MCG YOU+ Learning Communities (4 Credit Hours)
- MEDI 6300 - Career Paths in Medicine (0 to 15 Credit Hours) (*taken for 9 credit hours*)
- MEDI 6310 - Patient Centered Learning 3 (12 Credit Hours)
- MEDI 6320 - Brain, Behavior, and Movement Module (15 Credit Hours)
- MEDI 6340 - Capstone in Medicine 1 Module (12 Credit Hours)

Clerkship: 120 Hours

- FMPC 5000 - Basic Clerkship Family Medicine (18 Credit Hours)
- GMED 5000 - Basic Clerkship in Internal Medicine (18 Credit Hours)
- MEDI 6410 - Patient Centered Learning - Clerkship Spring (6 Credit Hours)
- MEDI 6420 - Patient Centered Learning - Clerkship Fall (6 Credit Hours)
- NEUR 5000 - Basic Clerkship in Neurology (9 Credit Hours)
- OBGYN 5000 - Basic Clerkship in Obstetrics and Gynecology (18 Credit Hours)
- PEDS 5000 - Basic Clerkship in Pediatrics (18 Credit Hours)

- PSRY 5000 - Basic Psychiatry Clerkship (9 Credit Hours)
- SURG 5000 - Basic Clerkship in Surgery (18 Credit Hours)

Advanced Clerkship: 83 Hours

- EMED 5001 - Emergency Medicine Clerkship (12 Credit Hours)
- MEDI 5010 - USMLE Preparation Elective (1 to 12 Credit Hours) (*Passing Step 1 exam required during course; Passing Step 2 required prior to graduation*) (*taken for a total of 12 Credit Hours*)
- MEDI 6510 - Patient Centered Learning - Advanced Clerkship (6 Credit Hours)
- MEDI 6000 - Care of the Chronically and Terminally Ill Intersession (5 Credit Hours)

Ambulatory Selective: 12 Hours

Select 12 hours from the following courses:

- GMED 5077 - Ambulatory Adult Selective (12 Credit Hours)
- PEDS 5077 - Pediatric Ambulatory Selective (12 Credit Hours)
- PEDS 5078 - Medicine/Pediatrics Ambulatory Selective (12 Credit Hours)
- SURG 5077 - Surgery Ambulatory Selective (12 Credit Hours)

Critical Care Selective: 12 Hours

Select 12 hours from the following courses:

- ANES 5015 - Anesthesia Critical Care (12 Credit Hours)
- GMED 5034 - Medical Critical Care (12 Credit Hours)
- NEUR 5010 - Neurology Critical Care (12 Credit Hours)
- PEDS 5001 - Neonatal Sub-I/Critical Care (12 Credit Hours) (*can be critical care or sub-I*)
- PEDS 5018 - Pediatric Critical Care (12 Credit Hours)
- SURG 5005 - Surgery Critical Care/Trauma (12 Credit Hours)

Sub-I Selective: 12 Hours

Select 12 hours from the following courses:

- FMPC 5003 - Family Medicine Sub-I (12 Credit Hours)
- GMED 5011 - Medicine Sub-I (12 Credit Hours)
- NEUR 5001 - Adult Neurology Sub-I (12 Credit Hours)
- NEUR 5009 - Child Neurology Sub-I (12 Credit Hours)
- OBGN 5009 - Obstetrics and Gynecology Sub-I (12 Credit Hours)
- PEDS 5001 - Neonatal Sub-I/Critical Care (12 Credit Hours)
- PEDS 5009 - Pediatrics Sub-I (12 Credit Hours)
- PSRY 5047 - Child and Adolescent Psychiatry Sub I (12 Credit Hours)
- PSRY 5048 - General Psychiatry Sub I (12 Credit Hours)
- SURG 5007 - Surgery Sub-I (12 Credit Hours)
- SURG 5016 - Surgery Sub-I for Military Students (12 Credit Hours)
- SURG 5026 - Surgery Sub I, Cardiothoracic Surgery (12 Credit Hours)
- SURG 5027 - Surgery Sub I, Neurosurgery (12 Credit Hours)
- SURG 5028 - Surgery Sub I, Orthopedic Surgery (12 Credit Hours)
- SURG 5029 - Surgery Sub I, Otolaryngology (12 Credit Hours)
- SURG 5030 - Surgery Sub I, Plastic Surgery (12 Credit Hours)
- SURG 5031 - Surgery Sub I, Urology (12 Credit Hours)
- SURG 5032 - Surgery Sub I, Vascular Surgery (12 Credit Hours)

Six weeks of Electives: 12 Hours

Select from the following courses:

- ANAT 5002 - Research Elective in Anatomy (4 to 8 Credit Hours)
- ANAT 5005 - Clinical Anatomy and Teaching Skills (4 to 8 Credit Hours)
- ANES 5002 - Anesthesiology Research Elective (4 to 8 Credit Hours)
- ANES 5003 - Anesthesiology Off-Campus Externship (4 to 8 Credit Hours)
- ANES 5008 - Pain Management Elective (4 to 8 Credit Hours) *
- ANES 5011 - Anesthesiology Externship (4 to 8 Credit Hours) *
- ANES 5014 - Respiratory Care Elective (4 to 8 Credit Hours)
- ANES 5018 - Pediatric Anesthesia Elective (4 to 8 Credit Hours) *
- BCMB 5002 - Research in Biochemistry and Molecular Biology (4 to 8 Credit Hours)
- DERM 5001 - Dermatology Externship (4 to 8 Credit Hours) *
- DERM 5002 - Dermatology Off-Campus Externship (4 to 8 Credit Hours) *
- DERM 5003 - Advanced Dermatology (4 to 8 Credit Hours) *
- EMED 5002 - Emergency Medicine Externship (4 to 8 Credit Hours) *
- EMED 5004 - Research in Emergency Medicine (4 to 8 Credit Hours) *
- EMED 5005 - Emergency Medicine Externship Off-Campus (4 to 8 Credit Hours) *
- EMED 5008 - Emergency Ultrasound (4 to 8 Credit Hours) *
- EMED 5013 - Rural Emergency Medicine (4 to 8 Credit Hours) *
- EMED 5014 - Emergency Medicine Services (EMS) Elective for Medical Students (4 to 8 Credit Hours) *
- EMED 5016 - Transition to Residency Elective (4 to 8 Credit Hours) *
- EMED 5019 - Imaging in Clinical Emergency Medicine Elective (4 to 8 Credit Hours) *
- FMPC 5007 - Family Medicine Off-Campus Externship (4 to 8 Credit Hours) *
- FMPC 5008 - Family Medicine Externship (4 to 8 Credit Hours) *
- FMPC 5009 - Family Medicine Research (4 to 8 Credit Hours)
- FMPC 5015 - Primary Care Sports Medicine (4 to 8 Credit Hours) *
- FMPC 5017 - Rural Family Medicine (4 to 8 Credit Hours) *
- FMPC 5018 - Vulnerable Populations Elective (4 to 8 Credit Hours) *
- FMPC 5019 - Family Medicine Procedures (4 to 8 Credit Hours) *
- FMPC 5020 - Health Policy and Advocacy (4 to 8 Credit Hours)
- FMPC 5021 - Osteopathic Manipulative Medicine in Family Medicine Practice (4 to 8 Credit Hours) *
- FMPC 5022 - Georgia War Geriatrics and Palliative Care Elective (8 Credit Hours) *
- FMPC 6000 - Population Health/Business in Medicine (4 to 8 Credit Hours)
- FMPC 6004 - Food As Medicine: Addressing Diet-Related Illnesses Affected by Poverty (4 to 8 Credit Hours)
- FMPC 6599 - M4 Student Chief (8 Credit Hours)
- GMED 5010 - Rheumatology Externship (4 to 8 Credit Hours) *
- GMED 5012 - Hematology/Oncology Externship (4 to 8 Credit Hours) *
- GMED 5013 - Nephrology Externship (4 to 8 Credit Hours) *
- GMED 5014 - Rehabilitation Medicine Externship (4 to 8 Credit Hours) *
- GMED 5016 - Nephrology Consult Elective (4 to 8 Credit Hours) *
- GMED 5017 - Cardiology Consultation Service (4 to 8 Credit Hours) *
- GMED 5021 - Gastroenterology Externship (4 to 8 Credit Hours) *
- GMED 5022 - Sleep Medicine (4 to 8 Credit Hours) *
- GMED 5023 - Pulmonary Externship (4 to 8 Credit Hours) *
- GMED 5025 - Infectious Diseases Externship (4 to 8 Credit Hours) *
- GMED 5027 - Medicine Off-Campus Externship (4 to 8 Credit Hours) *
- GMED 5028 - Research Elective in Medicine (4 to 8 Credit Hours) *
- GMED 5039 - Endocrinology Externship (4 to 8 Credit Hours) *
- GMED 5040 - Cardiology Externship (4 to 8 Credit Hours) *
- GMED 5056 - Epidemiology Atlanta Externship (4 to 8 Credit Hours) *
- GMED 5066 - Obesity Medicine (4 to 8 Credit Hours) *

- GMED 5078 - Introduction to Rheumatology (4 to 8 Credit Hours) *
- GMED 5095 - Palliative Care Externship (4 to 8 Credit Hours) *
- GMED 5096 - Introduction to Outpatient Internal Medicine (4 to 8 Credit Hours) *
- GMED 6599 - GMED Student Chief (4 to 8 Credit Hours)
- MEDI 5004 - Independent Study (0 to 8 Credit Hours)
- MEDI 5007 - International and Travel Medicine (4 to 8 Credit Hours) *
- MEDI 5012 - Medical Education (4 to 8 Credit Hours)
- MEDI 5014 - CBL (Case-Based Learning) Elective (0 to 8 Credit Hours)
- MEDI 5015 - Overview of Health Professions Education Scholarship (3 Credit Hours)
- MEDI 5016 - Professional Development Elective (4 to 8 Credit Hours)
- MEDI 5017 - Telemedicine Elective (4 to 8 Credit Hours) *
- MEDI 5018 - Clerkship Procedure Elective (4 to 8 Credit Hours) *
- MEDI 5019 - Southwest Campus Clinical Leadership Immersion (4 Credit Hours)
- MEDI 5020 - Comparative Policy, Strategy, and Systems in Rural Health-Scotland (8 Credit Hours) *
- MEDI 5021 - Enrichment Experiential Learning Mentorship Elective Syllabus (8 Credit Hours)
- MEDI 5022 - The Use of Artificial Intelligence in Medical Education (4 to 8 Credit Hours)
- MEDI 5080 - Disease Prevention Research (8 Credit Hours)
- MEDI 5099 - On/Off-Campus Research Elective (4 to 8 Credit Hours)
- MEDI 6001 - Simulation Education Elective (4 to 8 Credit Hours)
- NEUR 5003 - Neurology Consult and Clinics Externship (4 to 8 Credit Hours) *
- NEUR 5006 - Neurology Research (4 to 8 Credit Hours) *
- NEUR 5008 - Neurology Off-Campus Externship (4 to 8 Credit Hours) *
- NEUR 5012 - UME GME Education- Osler Apprenticeship in Neurology (4 to 8 Credit Hours)
- NEUR 5020 - Neuromuscular Disease Senior Elective (4 to 8 Credit Hours) *
- NEUR 5022 - Electromyography Senior Elective (4 to 8 Credit Hours) *
- OBGN 5001 - Obstetrics and Gynecology Off-Campus Externship (4 to 8 Credit Hours) *
- OBGN 5005 - Maternal Fetal Medicine Externship (4 to 8 Credit Hours) *
- OBGN 5006 - Reproductive Endocrinology Externship (4 to 8 Credit Hours) *
- OBGN 5007 - Gynecologic Oncology Externship (4 to 8 Credit Hours) *
- OBGN 5008 - Benign Gynecology Externship (4 to 8 Credit Hours) *
- OBGN 5011 - Obstetrics and Gynecology Research (4 to 8 Credit Hours) *
- OBGN 5012 - Urogynecology Externship (4 to 8 Credit Hours) *
- OBGN 5013 - Bioethics in Obstetrics and Gynecology (4 Credit Hours)
- OBGN 5016 - Gynecology Boot Camp (4 to 8 Credit Hours) *
- OBGN 5017 - Obstetrics Emergency Department Elective (4 to 8 Credit Hours) *
- OBGN 5018 - Transgender Health Longitudinal Elective (4 to 8 Credit Hours) *
- OBGN 5019 - OB/Gyn Advocacy Elective (4 to 8 Credit Hours) *
- OBGN 5020 - Rural Outpatient Gynecology Elective (4 to 8 Credit Hours) *
- OBGN 5500 - OBGYN Clinical Anatomy Readiness Course (8 Credit Hours) *
- OBGN 6599 - OB/Gyn Student Chief (4 to 8 Credit Hours)
- OPTH 5001 - Ophthalmology Externship (4 to 8 Credit Hours) *
- OPTH 5002 - Ophthalmology Research Elective (4 to 8 Credit Hours)
- OPTH 5003 - Ophthalmology Off-Campus Externship (4 to 8 Credit Hours) *
- PATH 5003 - Surgical Pathology Externship (4 to 8 Credit Hours) *
- PATH 5009 - Clinical Pathology Externship (4 to 8 Credit Hours) *
- PATH 5014 - Pathology Off-Campus Externship (4 to 8 Credit Hours) *
- PATH 5016 - Anatomic Pathology Externship (4 to 8 Credit Hours) *
- PATH 5019 - Clinical Microbiology Externship (4 to 8 Credit Hours) *
- PATH 5028 - Introduction to Pathology (4 to 8 Credit Hours) *
- PATH 5029 - Forensic Medicine Elective (4 to 8 Credit Hours) *
- PATH 5086 - Pathology General Research Elective (4 to 8 Credit Hours)
- PEDS 5002 - Pediatric Off-Campus Externship (4 to 8 Credit Hours) *
- PEDS 5005 - Pediatric Cardiology Externship (4 to 8 Credit Hours) *

- PEDS 5006 - Pediatric Allergy Immunology Externship (4 to 8 Credit Hours) *
- PEDS 5007 - Pediatric Research (4 to 8 Credit Hours)
- PEDS 5011 - Pediatric Gastroenterology Externship (4 to 8 Credit Hours) *
- PEDS 5013 - Pediatric Infectious Disease Externship (4 to 8 Credit Hours) *
- PEDS 5014 - Newborn Nursery Sub-I (4 to 8 Credit Hours) *
- PEDS 5017 - Pediatric Hematology/Oncology Externship (4 to 8 Credit Hours) *
- PEDS 5020 - Pediatric Endocrinology Externship (4 to 8 Credit Hours) *
- PEDS 5022 - Pediatric Pulmonology Externship (4 to 8 Credit Hours) *
- PEDS 5025 - Developmental Pediatrics (4 to 8 Credit Hours) *
- PEDS 5026 - Pediatric Enhanced Primary Care "PEPC" (4 to 8 Credit Hours) *
- PEDS 5029 - Med-Peds Elective (4 to 8 Credit Hours) *
- PEDS 5035 - Pediatric Assistantship at Special Needs Summer Camp (4 to 8 Credit Hours) *
- PEDS 5036 - Pediatric Sub-Specialties Externship (4 to 8 Credit Hours) *
- PEDS 5037 - Advanced Pediatrics (4 to 8 Credit Hours) *
- PEDS 5038 - Spirituality and Medicine (4 Credit Hours) *
- PEDS 5039 - Pediatric Hospital Medicine Elective (4 Credit Hours) *
- PEDS 5040 - Pediatric Palliative Care (4 to 8 Credit Hours) *
- PEDS 5041 - Pediatric Nephrology (4 to 8 Credit Hours) *
- PEDS 5042 - Pediatric Therapy and Rehabilitation: The Medically Complex Child (4 to 8 Credit Hours) *
- PEDS 5043 - Pediatric Rheumatology (4 to 8 Credit Hours) *
- PEDS 5045 - Pediatric Complex Care (4 to 8 Credit Hours) *
- PEDS 6599 - Pediatric Chief Elective (4 to 8 Credit Hours)
- PHRM 5003 - Pharmacology Tutorial (4 Credit Hours)
- PHRM 5004 - Pharmacology Research (4 Credit Hours)
- PHRM 5012 - Clinical Pharmacology Tutorial (4 Credit Hours)
- PHRM 5015 - Critical Care Pharmacology Tutorial (4 Credit Hours)
- PSIO 5011 - Research Elective in Physiology (4 Credit Hours)
- PSRY 5002 - Consult-Liaison Psychiatry Externship (4 to 8 Credit Hours) *
- PSRY 5005 - Psychiatry Off-Campus Externship (4 to 8 Credit Hours) *
- PSRY 5007 - Eating Disorders Externship (4 to 8 Credit Hours) *
- PSRY 5023 - Child and Adolescent Psychiatry Externship (4 to 8 Credit Hours) *
- PSRY 5028 - HIV and LGBTQ+ Mental Health (4 to 8 Credit Hours) *
- PSRY 5029 - Molecular Neurobiology of Treatment Outcome of Schizophrenia (4 to 8 Credit Hours) *
- PSRY 5040 - Research Elective in Psychotic Disorders (4 to 8 Credit Hours)
- PSRY 5041 - Addiction Psychiatry Externship (4 to 8 Credit Hours) *
- PSRY 5043 - Emergency Psychiatry Externship (4 to 8 Credit Hours) *
- PSRY 5044 - Neurostimulation Externship (4 to 8 Credit Hours) *
- PSRY 5045 - Advanced Psychiatry Sub-I (4 to 8 Credit Hours) *
- PSRY 5046 - Mood Disorders Externship (4 to 8 Credit Hours) *
- PSRY 5050 - Psychiatry Media Elective (8 Credit Hours) *
- PSRY 6599 - PSRY Student Chief (4 to 8 Credit Hours)
- RADM 5001 - Radiology Externship (4 to 8 Credit Hours) *
- RADM 5003 - Pediatric Radiology Externship (4 to 8 Credit Hours) *
- RADM 5004 - Advanced Diagnostic Radiology Externship (4 to 8 Credit Hours) *
- RADM 5005 - Radiology Off-Campus Externship (4 to 8 Credit Hours) *
- RADM 5007 - Vascular/Interventional Radiology Externship (4 to 8 Credit Hours) *
- RADM 5013 - Radiology Research Elective (4 to 8 Credit Hours)
- RADM 5015 - Introduction to Clinical Ultrasound (4 to 8 Credit Hours) *
- RONC 5006 - Radiation Therapy Externship (4 to 8 Credit Hours) *
- RONC 5008 - Radiation Therapy Off-Campus Externship (4 to 8 Credit Hours) *
- SURG 5002 - General Surgery Research (4 to 8 Credit Hours)
- SURG 5003 - General Surgery Externship (4 to 8 Credit Hours) *
- SURG 5004 - General Surgery Off-Campus Externship (4 to 8 Credit Hours) *

- SURG 5015 - Tutorial in the History of Medicine (4 Credit Hours) *
- SURG 5025 - Fundamentals of Robotics - General Surgery Externship (4 to 8 Credit Hours) *
- SURG 5120 - Introduction to Acute Care Surgery (4 Credit Hours)
- SURG 5121 - Introduction to Minimally Invasive Surgery (4 Credit Hours)
- SURG 5122 - Introduction to Surgical Oncology (4 Credit Hours)
- SURG 5123 - Introduction to Transplant Surgery (4 Credit Hours)
- SURG 5124 - Introduction to Vascular Surgery (4 Credit Hours)
- SURG 5125 - Introduction to Cardiothoracic Surgery (4 Credit Hours)
- SURG 5150 - Introduction to Urology (4 Credit Hours)
- SURG 5154 - Introduction to Otolaryngology (4 Credit Hours)
- SURG 5175 - Introduction to Orthopedic Surgery (4 Credit Hours)
- SURG 5200 - Neurosurgery Externship (4 to 8 Credit Hours) *
- SURG 5201 - Introduction to Neurosurgery (4 Credit Hours)
- SURG 5202 - Neurosurgery Off-Campus Externship (4 to 8 Credit Hours) *
- SURG 5203 - Neurosurgery Externship and Research (4 to 8 Credit Hours)
- SURG 5205 - Pediatric Neurosurgery Externship (4 to 8 Credit Hours) *
- SURG 5252 - Otolaryngology Off-Campus Externship (4 to 8 Credit Hours) *
- SURG 5254 - Otolaryngology Externship (4 to 8 Credit Hours) *
- SURG 5255 - Research in Otolaryngology (8 Credit Hours)
- SURG 5275 - Orthopedics Externship (4 to 8 Credit Hours) *
- SURG 5278 - Orthopedics Off-Campus Externship (4 to 8 Credit Hours) *
- SURG 5292 - Orthopedic Surgery Research (4 to 8 Credit Hours)
- SURG 5300 - Pediatric Surgery Externship (4 to 8 Credit Hours) *
- SURG 5301 - Introduction to Pediatric Surgery (4 Credit Hours)
- SURG 5325 - Thoracic and Cardiac Surgery Externship (4 to 8 Credit Hours) *
- SURG 5326 - Off-Campus Thoracic and Cardiac Surgery Externship (4 to 8 Credit Hours) *
- SURG 5350 - Urology Externship (4 to 8 Credit Hours) *
- SURG 5351 - Urology Off-Campus Externship (4 to 8 Credit Hours) *
- SURG 5352 - Urologic Research (4 to 8 Credit Hours)
- SURG 5375 - Plastic Reconstructive Surgery Externship (4 to 8 Credit Hours) *
- SURG 5376 - Introduction to Plastic Surgery (4 Credit Hours)
- SURG 5379 - Pediatric Urology Externship (4 to 8 Credit Hours) *
- SURG 5380 - Surgery Boot Camp (4 to 8 Credit Hours) *
- SURG 5500 - Integrated Anatomy for General Surgery (8 Credit Hours) *
- SURG 5501 - Integrated Anatomy for Orthopedic Surgery (8 Credit Hours) *
- SURG 6599 - SURG Student Chief (4 to 8 Credit Hours)

Three-Year Curriculum Degree Total: 352 Hours

Enrichment Curriculum: 68 Hours

- MEDI 5005 - Integrative Science Selective (8 Credit Hours)
- MEDI 6610 - Patient Centered Learning - Enrichment Fall (6 Credit Hours)
- MEDI 6620 - Patient Centered Learning - Enrichment Spring (6 Credit Hours)

Enrichment Selectives: 32 Hours

Select one of the following options:

Option 1

- One 4-week/8 Hour Clinical Elective (*select courses with an asterisk (*) from Electives list above*) (8 Credit Hours)

- MEDI 5088 - Mentored Research Project (0 to 24 Credit Hours) *(taken for 24 Credit Hours)*

Option 2

- Two 4-week/8 Hour Clinical Electives *(select courses with an asterisk (*) from Electives list above)* (16 Credit Hours)
- MEDI 5088 - Mentored Research Project (0 to 24 Credit Hours) *(taken for 16 Credit Hours)*

Option 3

- Three 4-week/8 Hour Clinical Electives *(select courses with an asterisk (*) from Electives list above)* (24 Credit Hours)
- Plus 8 Credit Hours from the following:
 - ANAT 5002 - Research Elective in Anatomy (4 to 8 Credit Hours)
 - ANES 5002 - Anesthesiology Research Elective (4 to 8 Credit Hours)
 - BCMB 5002 - Research in Biochemistry and Molecular Biology (4 to 8 Credit Hours)
 - EMED 5004 - Research in Emergency Medicine (4 to 8 Credit Hours)
 - FMPC 5009 - Family Medicine Research (4 to 8 Credit Hours)
 - GMED 5028 - Research Elective in Medicine (4 to 8 Credit Hours)
 - MEDI 5088 - Mentored Research Project (0 to 24 Credit Hours)
 - MEDI 5099 - On/Off-Campus Research Elective (4 to 8 Credit Hours)
 - NEUR 5006 - Neurology Research (4 to 8 Credit Hours)
 - OBGYN 5011 - Obstetrics and Gynecology Research (4 to 8 Credit Hours)
 - OPTH 5002 - Ophthalmology Research Elective (4 to 8 Credit Hours)
 - PATH 5086 - Pathology General Research Elective (4 to 8 Credit Hours)
 - PEDS 5007 - Pediatric Research (4 to 8 Credit Hours)
 - PHRM 5004 - Pharmacology Research (4 Credit Hours)
 - PSIO 5011 - Research Elective in Physiology (4 Credit Hours)
 - PSRY 5040 - Research Elective in Psychotic Disorders (4 to 8 Credit Hours)
 - RADN 5013 - Radiology Research Elective (4 to 8 Credit Hours)
 - SURG 5002 - General Surgery Research (4 to 8 Credit Hours)
 - SURG 5203 - Neurosurgery Externship and Research (4 to 8 Credit Hours)
 - SURG 5292 - Orthopedic Surgery Research (4 to 8 Credit Hours)
 - SURG 5352 - Urologic Research (4 to 8 Credit Hours)

Electives: 16 Hours

Required Electives - 8 weeks (combination of 4 and 2 week electives totaling 16 Hours) (Select courses from Elective list above)

Four-Year Curriculum Degree Total: 420 Hours

Doctor of Medicine and Doctor of Philosophy

Program Overview

The University System of Georgia MD/PhD Program trains students in the research and clinical skills that will enable graduates to translate research findings into clinical outcomes. The synergy created between the outstanding clinical environment of the Medical College of Georgia at Augusta University and an uncommon breadth and depth of nationally ranked PhD programs is what makes this a truly unique educational experience.

This seven- to eight-year program prepares a diverse group of students who have a passion for medical research and a dedication to serving others for rewarding careers in biomedical research or in academic medicine.

Our highly personalized program was founded in 1995 and our graduates have become faculty members and are pursuing academic careers at The Mayo Clinic, Emory University, Yale University and the National Institutes of Health. Others are completing residencies or fellowships at the Cleveland Clinic, Yale University, Stanford University, Emory Healthcare, Johns Hopkins Hospital, Wellstar MCG Health and other prestigious institutions.

Unlike many MD/PhD programs, which adhere to a fixed entry schedule, our curriculum offers greater flexibility, allowing students to enter at various stages of their medical education.

Located in a region famous for its hospitality, you will enjoy a warm and welcoming atmosphere which fosters interaction among physicians, professors, researchers and students.

Program Information

- Attribute: MDPH

Doctor of Medicine and Master of Business Administration

Program Overview

The MD/MBA Dual Degree Program provides medical students with advanced business education and prepares them to assume responsible management and professional positions in private practice, corporate healthcare industry such as hospital management (i.e., Chief Medical Officer), HMOs, or academic medicine. Students enter residency with enhanced competencies, improved professional networks, and increased employment opportunities.

Admissions Information

To apply and continue in the MD/MBA Dual Degree Program, MD students must be in good academic standing per MCG MD standards. MD students must then apply and be accepted by the MBA program which includes the submission and approval of a program of study.

Prior to applying to the MD/MBA Dual Degree Program, students must have submitted a letter of intent by April 15 of their first year in the MD program. Students must apply to the MD/MBA Dual Degree Program MCG by April 30 of their second year in the MD program.

with the understanding that acceptance and enrollment in the MBA program is contingent upon approval of The Medical College of Georgia, The Hull College of Business, and The Graduate School.

Progression and Graduation Requirements

The MD-MBA Dual Degree Program includes both a period of time in which students enroll in the MD program only and then enroll in courses in the MD and MBA programs concurrently. Students accepted into the Dual Degree program will start their MBA program toward the end of their first two years of the MD program. In the standard plan of study/schema, the MBA program courses will be spread over two years. The expectation is that the MD-MBA Dual Degree Program will be completed within four years from the start of the MD program.

Students must complete all degree requirements of each program before Augusta University can confer separately these two degrees upon the students.

Program Information

- Attribute: MDMB

Degree Requirements

As part of the application process, students will review the plan of study/schema with the MD program to carefully select clerkships and electives to best accommodate the MBA courses. The plan of study/schema will be reviewed and approved by the MBA program representative, MD program representative, and The Graduate School. Students must complete all degree requirements for both the MD and MBA programs.

Doctor of Medicine (MD) Requirements

- Doctor of Medicine (Athens Campus)
- Doctor of Medicine (Main Campus)

Master of Business Administration (MBA) Requirements

- Master of Business Administration

Doctor of Medicine and Master of Public Health

Program Overview

The MD/MPH Dual Degree Program provides medical students with advanced education in public health and preventative medicine and prepare them to assume responsible management and professional positions in public health units or in academic medicine. These additional skills benefit the people of Georgia and elsewhere by staffing the physician workforce with well-trained providers who bring additional valuable skills to their practices. Students enter residency with enhanced competencies, improved professional networks, and increased employment opportunities.

cfly@augusta.edu

Sarah Wackerbarth, PhD
swackerbarth@augusta.edu

Program Accreditation

- LCME for the Medical College of Georgia's Dual Degree Programs
- CEPH for the MPH program

Admissions Information

Students applying to the MD/MPH Dual Degree Program must be currently enrolled MD students in good standing (academically and professionally) with the Medical College of Georgia as determined by the MCG Deanery. Students must submit all required application materials and documentation including the approved application, a copy of their JagTrax, and a signed program of study/schema. Admission requirements for the MPH are posted online and include a minimum overall GPA of 2.8 at the Baccalaureate level, a bachelor's degree, and official transcripts. Requirements for letters of recommendation and interviews are waived for medical students.

Detailed information on admissions requirements, can be found on The Graduate School's website.

Progression and Graduation Requirements

Currently enrolled (Augusta University) MD students must apply to and be accepted into the MPH program. MD students must submit their letter of intent by March 30 of their first year in the MD program, and must submit a dual degree application by March 30 of their second year in the MD program with the understanding that acceptance and enrollment in the MPH program are contingent upon approval of The Medical College of Georgia, The School of Public Health, and The Graduate School.

Both MD and MPH degrees are awarded at the same time if both degree requirements are completed. The MPH degree will not be awarded prior to completion of the MD degree. If the requirements for the MD degree are completed before the MPH, then the MD is conferred, and the MPH degree will be conferred when those requirements are completed.

- Master of Public Health with a Concentration in Health Informatics
- Master of Public Health with a Concentration in Health Management
- Master of Public Health with a Concentration in Social and Behavioral Sciences
- Master of Public Health with a Concentration in Epidemiology

Doctor of Medicine and Master of Science in Epidemiology

Program Overview

Medical students are in a unique position to take advantage of obtaining a Master of Science degree in Epidemiology. A dual Doctor of Medicine and Master of Science in Epidemiology (MD/MS in epidemiology) degree will enhance the utilization of their medical knowledge in research topic areas of interest, allow for learning a skill set that enhances their medical education, have a better understanding of the literature as it relates to their patients and determine whether a change in clinical practice is warranted, and determine where gaps in the current population research exist that they would like to fill as an epidemiologic researcher. The combined MD/MS in epidemiology, with an emphasis on the practical application and interpretation and less emphasis on theoretical issues, will allow medical students to work with established epidemiologists and biostatisticians. The MD/MS in epidemiology dual degree program will give medical students the opportunity to develop their own area of research and a competitive edge during the residency application process.

Program Accreditation

Augusta University is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) to award one-year and advanced certificates and degrees at the associate's, bachelor's, master's, specialist's, first professional, and doctoral levels.

Admissions Information

Students will already be admitted and enrolled in MCG. The MS in epidemiology admissions requirements will be determined by the MS in Epidemiology Director. The MCG Dual Degree Program Director will administer the application process, communicate with the Director of the MS in epidemiology program, and make applications available through a shared Box folder. To be eligible to apply for the MD/MS in epidemiology Dual Degree Program, students must be in good academic standing at MCG as determined by MCG's Curriculum Office. The MS in epidemiology requirements include a 3.0 cumulative undergraduate GPA minimum and bachelor's degree.

Detailed information on admissions requirements, can be found on The Graduate School's website.

Progression and Graduation Requirements

The proposed **MD-MS in Epidemiology Dual Degree Program** is part of the Dual Degree Pathway offered by MCG. The Dual Degree Pathway takes four years to complete and includes both time in which students enroll in the MD program only and then, after completing two years of MD requirements, enroll in the **MD/MS in Epidemiology Dual Degree Program**. This arrangement allows students to take courses in the MD and MCTS programs concurrently. Students must complete all degree requirements of each program before Augusta University can confer separately these two degrees upon the students. Doctor of Nursing Practice - Post-Master's Nurse Executive Track

Program Overview

The Nurse Executive Doctor of Nursing Practice (DNP) program prepares advanced nurse leaders, as well as aspiring nurse leaders, for expert practice in leadership in a large health care system, public health departments, or rural health practice. The program provides the student with requisite skills and competencies related to executive leadership, strategic planning, business acumen, collaboration, while navigating the pressures of today's competitive local and global health care environments. Entry to the program requires a master's degree in nursing or another approved health-related field. The program is approved by the Georgia Board of Regents as a web-based program with one or two required visits.

Doctor of Nursing Practice with a Concentration in Adult Gerontology Acute Care Nurse Practitioner

Program Overview

The DNP-Adult Gerontology Acute Care Nurse Practitioner (DNP-AGACNP) concentration offers education to become board-eligible as an Adult Geriatric Acute Care Nurse Practitioner (AGACNP). This concentration prepares nurses to provide advanced patient-family centered care in settings with acute and/or chronically ill patients across the adult lifespan. Committed to addressing the health care needs of adults who are acutely and critically ill, this program is designed to prepare nurses to provide the "5 Cs": coordinated care, collaborative care, comprehensive care, consistent care, and cost-effective care. Full-time and part-time schedules are available. The program is approved by the Georgia Board of Regents as a web-based program with greater than 50 percent of the program taught online. Cohort locations are on our Augusta campus.

augusta.edu/nursing/dnp/agacnp

Program Accreditation

The program is fully accredited by Commission on Collegiate Nursing Education (CCNE). Graduates are prepared to meet the eligibility requirements for the certification exam offered by the American Nurses Credentialing Center and the American Association of Critical Care Nurses.

Doctor of Nursing Practice with a Concentration in Nursing Anesthesia

Program Overview

The DNP-Nursing Anesthesia program educates advanced nurse clinicians for expert practice in leadership and clinical roles with focus on care of patients during anesthesia. This doctoral-level education provides the clinical, policy, leadership expertise to improve health care outcomes. The program enables nurses to become expert nurse leaders and collaborators in solving health care problems in systems. Students administer sedation, regional and general anesthesia to pediatric and adult patients for a wide variety of surgical

specialties including general surgery, orthopedics, otolaryngology, obstetrics, thoracic, vascular, cardiac and neurology. Students administer on average more than 800 anesthetics over at least 2,000 clinical hours. Graduates are eligible for the National Certification Examination required to practice as a nurse anesthetist. The program has a 100% overall national certification pass rate and over 90% first-time-taken pass rate.

Admissions Requirements

Prerequisite: Applicants must have completed a 3-credit hour undergraduate or graduate statistics or biostatistics course with a grade of B or higher.

Program Information

- Program Length: 3 Years Full-Time or 4 Years Part-Time
- CIP Code: 51.3808
- Program Code: DNP_DNP

Degree Requirements

Major Courses: 56 Hours

- MINF 6620 - Management of Information Technology (3 Credit Hours)
- NURS 7150 - Evidence-Based Practice: Principles and Process (3 Credit Hours)
- NURS 7257 - Health Care Management (3 Credit Hours)
- NURS 7425 - Advanced Pathophysiology (4 Credit Hours)
- NURS 7430 - Pharmacology for Advanced Practice Nurses (4 Credit Hours)
- NURS 7450 - Advanced Practice Nursing Roles in Society (3 Credit Hours)
- NURS 7460 - Diagnostic and Clinical Reasoning for Advanced Practice Nurses (3 Credit Hours)
- NURS 7470 - Advanced Health Assessment (3 Credit Hours)
- NURS 7475 - Population Health and Emerging Disease (2 Credit Hours)
- NURS 7550 - Leadership in Interprofessional Collaboration and Health Care (2 Credit Hours)
- NURS 8250 - Health Care Policy: Implications for the Advanced Practice Nurse (2 Credit Hours)
- NURS 8550 - Evidence-Based Practice: Translation and Application (4 Credit Hours)
- NURS 8551 - Complex Issues in Health Care Delivery (2 Credit Hours)
- NURS 9050 - Strategies for Effective Practice Change - Proposal (2 Credit Hours)
- NURS 9060 - Practice Inquiry and Change Design (2 Credit Hours)
- NURS 9061 - Practice Inquiry and Change Implementation (3 to 8 Credit Hours) *(taken for 3 credit hours)*
- NURS 9062 - Practice Inquiry and Change Dissemination (2 to 8 Credit Hours) *(taken for 2 credit hours)*
- NURS 9191 - APRN Practice Synthesis (2 Credit Hours)
- NURS 9192 - Advanced Practice Nursing Program Practicum - for DNP Program (4 Credit Hours)
- STAT 6300 - Introduction to Epidemiology and Biostatistics (3 Credit Hours)

Concentration Courses: 22 Hours

- NURS 7465 - Advanced Studies in Lifespan Development (2 Credit Hours)
- NURS 8321 - PNP I: Health Promotion and Supervision: Birth through Adolescence (3 Credit Hours)
- NURS 8322 - PNP Practice I: for the DNP Program (4 Credit Hours)
- NURS 8324 - PNP II: Management of Acute and Common Health Problems of Children from Birth through Adolescence (3 Credit Hours)
- NURS 8325 - PNP Practice II: for the DNP Program (3 Credit Hours)
- NURS 8327 - PNP III: Management of Chronic Health Problems of Children from Birth through Adolescence (3 Credit Hours)
- NURS 8328 - PNP Practice III: for the DNP Program (4 Credit Hours)

Elective Courses

The following electives are optional:

- NURS 7251 - Advanced Psychopharmacology (2 Credit Hours)
- NURS 7486 - Global Rural Health (3 Credit Hours)
- NURS 7487 - Empowering DNPs: Finance, Innovation and Systems Thinking (2 Credit Hours)

Degree Total: 78 Hours

Clinical Hours Total: 1200 Hours

Term-by-Term Pathway

To outline and visualize the path from start to finish in this program, refer to the suggested Term-by-Term Pathway.

Doctor of Nursing Practice with a Concentration in Psychiatric Mental Health Nurse Practitioner

Program Overview

The DNP-PMHNP concentration prepares advanced nurse clinicians to provide psychiatric and mental healthcare to clients, families, and communities. Coursework emphasizes the care of adult, pediatric, and geriatric patients and their families. The doctoral-level education provides the clinical and management expertise to improve health care outcomes. The program enables nurses to become expert nurse leaders and collaborators in solving health care problems in systems. Full-time and part-time schedules are available. The program is approved by the Georgia Board of Regents as a web-based program with greater than 50 percent of the program taught online. Cohort locations are on our Augusta campus.

augusta.edu/nursing/dnp/pmhnp

Program Accreditation

This program is fully accredited by Commission on Collegiate Nursing Education (CCNE). Graduates are prepared to meet the eligibility requirements for the certification exam offered by the American Nurses Credentialing Center, as well as the American Academy of Nurse Practitioners.

Degree Total: 80 Hours

Clinical Hours Total: 1200 Hours

Term-by-Term Pathway

To outline and visualize the path from start to finish in this program, refer to the suggested Term-by-Term Pathway.

Doctor of Philosophy and Master of Business Administration

Program Overview

This is a dual degree program permitting biomedical science PhD students to enroll in and obtain their PhD and MBA degrees concurrently. The PhD-MBA program is designed to provide biomedical science PhD students with advanced business education and prepare them to assume responsible management and professional positions in private and public organizations. Business administration and its areas of specialization are of particular benefit to biomedical research students with an interest in pursuing a

position in industry, pharmaceutical companies, administration and as a principal investigator of their own laboratory. Students will enter the workforce with enhanced competencies, improved professional networks and increased employment opportunities.

augusta.edu/hull/mba

Program Contacts

Patricia L. Cameron, PhD

706-721-9516

biomed@augusta.edu

Matt Brocato

706-667-4542

HullMBA@augusta.edu

Progression and Graduation Requirements

- Currently enrolled (Augusta University) biomedical science PhD students must apply to and be accepted into the MBA program. Students enrolled in the Biomedical Science PhD program are eligible for the PhD/MBA dual degree program enrollment once they have entered candidacy for the PhD program but no later than the 10th semester of enrollment in the PhD program (Fall of 4th year in PhD program). Students must fulfill all degree requirements for both programs. As part of the dual degree program, students are able to enroll in PhD and MBA courses concurrently. During the application process, a plan of study is developed, and every effort is made to ensure that MBA coursework is completed within two years (six semesters) after the student achieves PhD candidacy. Continuance in the MBA program is contingent upon making satisfactory and timely progress towards both the MBA and PhD degree.
- The PhD program is not a lockstep program but requires a minimum of three years and maximum of seven years of study. On average, students complete the PhD program in five years. For most students, the MBA program requirements will be spread over a minimum of two years (six semesters). Since students start their MBA program after they have entered PhD candidacy (typically at the end of year three), it is anticipated the combined PhD-MBA program will take a minimum of five years from start of PhD program. The maximum time for completion of the dual degree program is seven years.
- Students must apply to graduate for both degrees at the same time, if the MBA degree is completed before or at the same time as the PhD degree. In this case, students will receive a PhD and an MBA degree simultaneously. Students may apply to graduate from the PhD degree first, if the PhD degree is completed before the MBA degree and the MBA degree would not be granted at the same time as the PhD degree.

Program Information

- Attribute: PHMB

Program Requirements

MBA Program Requirements

- Master of Business Administration

Doctor of Philosophy Program Requirements

- Doctor of Philosophy in Biochemistry and Cancer Biology
- Doctor of Philosophy in Cellular Biology and Anatomy
- Doctor of Philosophy in Genomic Medicine
- Doctor of Philosophy in Molecular Oncology and Immunology
- Doctor of Philosophy in Neuroscience
- Doctor of Philosophy in Oral Biology and Maxillofacial Pathology

- Doctor of Philosophy in Pharmacology
- Doctor of Philosophy in Physiology
- Doctor of Philosophy in Vascular Biology

Doctor of Philosophy in Applied Health Sciences

Program Overview

A PhD degree in Applied Health Sciences is an advanced research-focused program of study that examines various aspects of population health, emphasizing interdisciplinary approaches. The degree is designed for individuals seeking to deepen their understanding of public health and health services research (HSR) through advanced coursework, rigorous research, and the completion of a doctoral dissertation.

HSR studies the end results of public health interventions and health services, to identify the most effective programs, policies, and interventions to improve the health of individual patients and populations. It can also play an important role in identifying disparities among different populations and guiding equitable resource allocation, policy formulation, and intervention strategies.

Key Highlights:

- Offers a strong research methods-oriented, didactic program combined with opportunities to conduct advanced health services research.
- Trains graduates to identify and frame public health and healthcare problems and analyze data from diverse sources, apply appropriate analytic methods, and contribute to the population health improvements in various settings.
- Equips students with the skills and knowledge needed to conduct rigorous original research and contribute to the advancement of health services and health policy research.
- Prepares doctoral students to make meaningful contributions to population health improvement through original research, critical analysis, and the application of their expertise in various professional settings.

Progression and Graduation Requirements

- APHS 9300 must be taken every semester until completion of dissertation (minimum 2 semesters and 18 credits). Dissertation must be completed within three years.

Program Information

- Program Length: minimum 3 years to maximum 7 years
- CIP Code: 51.9999
- Program Code: DPHIL_AHSC
- Major Code: APHS

Degree Requirements: 72 Hours

Major Courses: 36 Hours

- APHS 8012 - Scientific Communication and Commercialization (1 Credit Hour)
- APHS 8130 - Grant Writing (3 Credit Hours)
- APHS 8503 - Research Process (4 Credit Hours)
- APHS 9010 - Doctoral Seminar - Research in Public Health (1 Credit Hour)

- APHS 9020 - Qualitative Research Methods (3 Credit Hours)
- APHS 9030 - Methods in Health Outcomes Research (3 Credit Hours)
- APHS 9040 - Methods in Health Services Research (3 Credit Hours)
- EPID 7130 - Introduction to Epidemiology (3 Credit Hours)
- EPID 7370 - Intermediate Epidemiology (3 Credit Hours)
- MPHC 8011 - Ethical Conduct in Research (1 Credit Hour)
- MPHS 8300 - Social Determinants of Health and Health Disparities (3 Credit Hours)
- STAT 7010 - Biostatistics I (3 Credit Hours)
- STAT 7020 - Biostatistics II (3 Credit Hours)

Electives: 12 Hours

Select 12 hours from the following:

- APHS 7001 - Educating for Public Health: Theory, Objectives, and Assessment (3 Credit Hours)
- APHS 7002 - Determining Learning Objectives and Competencies in Health Professions Education (1 Credit Hour)
- APHS 7003 - Assessment Methods in Health Professions Education (1 Credit Hour)
- APHS 7120 - Interprofessional Education and Practice (2 Credit Hours)
- APHS 9001 - Advanced Topics (2 to 5 Credit Hours) (*taken for 3 credit hours*)
- APHS 9050 - Methods of Economic Evaluation of Health Projects, Programs, and Policies (3 Credit Hours)
- MPHC 8600 - Fundamentals of Health Promotion (3 Credit Hours)
- MPHS 8200 - Integration Social and Behavioral Theory into Public Health (3 Credit Hours)
- MPHS 8400 - Social Behavioral Change at Individual, Household, and Community Levels (3 Credit Hours)
- STAT 7260 - Design Analysis and Observational Studies (3 Credit Hours)
- STAT 7360 - Systematic Reviews (3 Credit Hours)

Other Requirements: 24 Hours

- APHS 9210 - Investigation of a Problem (1 to 12 Credit Hours) (*6-18 Hours required*)
- APHS 9300 - Dissertation Research (1 to 9 Credit Hours) (*minimum 18 Hours required**)

**APHS 9300 must be taken every semester until completion of dissertation (minimum 2 semesters and minimum 18 credits).*

Degree Total: 72 Hours

Term-by-Term Pathway

To outline and visualize the path from start to finish in this program, refer to the suggested Term-by-Term Pathway.

Doctor of Philosophy in Biochemistry and Cancer Biology

Program Overview

Biochemistry and Cancer Biology is a large and rapidly growing biomedical science program in The Graduate School. The core curriculum trains students to be competitive internationally by providing broad scientific expertise, and excellence in grantsmanship, communication and professionalism. The program is integrated with the Georgia Cancer Center, so that students engaged in cancer-related projects will participate in cutting-edge training that will prepare them to be world class cancer investigators.

augusta.edu/gradschool/biomed/phd-bcb

augusta.edu/mcg/bmb/bmb-bgm

Program Contact

Progression and Graduation Requirements

- Students are admitted via a common admissions process to the Biomedical Sciences PhD program, not to a specific biomedical major. After completing the first-year common core course work and laboratory rotations, students choose a dissertation research mentor and enter one of nine Doctor of Philosophy majors.
- The Doctor of Philosophy curriculum is not lock-step; students do not graduate as a class at the end of a specific semester. The average time to degree is approximately 5 years of full-time, year-round study; acceptable duration of the program is a minimum of 3 and maximum of 7 years. The number and type of advanced (2nd year and beyond) or elective courses vary, and may include courses within the Biochemistry and Cancer Biology program as well as courses in other disciplines.
- In addition to specific course requirements, students must complete additional PhD degree requirements, including satisfactory performance on the comprehensive examination, development and approval of a research proposal, writing and approval of the doctoral dissertation, and satisfactory performance on the Final Oral Examination (dissertation defense). See PhD Student Guide for additional requirements and details.

Program Information

- Program Length: Maximum of 7 Years
- CIP Code: 26.0210
- Program Code: DPHIL_BCCB

Degree Requirements

Biomedical Sciences PhD Year One Core Curriculum: 33 Hours

Required Courses: 29 Hours

- BIOM 8011 - Responsible Conduct of Research (1 Credit Hour)
- BIOM 8012 - Scientific Communications (1 Credit Hour)
- BIOM 8021 - Biochemistry and Gene Regulation (5 Credit Hours)
- BIOM 8022 - Molecular Cell Biology (5 Credit Hours)
- BIOM 8033 - Integrated Systems Biology (6 Credit Hours)
- BIOM 8040 - Introduction to Faculty Research (2 Credit Hours)
- BIOM 8050 - Introduction to Research I (2 Credit Hours)
- BIOM 8060 - Introduction to Research II (4 Credit Hours)
- STAT 7070 - Biomedical Statistics (3 Credit Hours)

Electives: 4 Hours

Select four credit hours from the following:

- BIOM 8030 - Experimental Therapeutics (2 Credit Hours)
- BIOM 8080 - Neuroscience I (4 Credit Hours) *(Required for Neuroscience major)*
- BIOM 8085 - Fundamentals of Aging (2 Credit Hours)
- BIOM 8090 - Fundamentals of Genomic Medicine (2 Credit Hours) *(Required for Genomic Medicine major)*
- BIOM 8200 - Selected Topics (for Partial Course Enrollment) (1 to 6 Credit Hours)
- BIOM 8215 - Fundamentals of Oncology I (2 Credit Hours)
- BIOM 8230 - Biology of Proteins in Disease (2 Credit Hours)
- BIOM 8240 - Introduction to Immunology and Infectious Disease (2 Credit Hours)

Major Courses

- BCMB 8201 - Current Topics and Techniques in Molecular Biology (3 Credit Hours)
- BCMB 9010 - Seminar in Biochemistry and Molecular Biology (1 Credit Hour)
Upon entering the Biochemistry and Cancer Biology major, this course must be taken every Fall and Spring semester until admission to candidacy and dissertation requirements are complete.
- BCMB 9210 - Investigation of a Problem (1 to 12 Credit Hours)
Standard enrollment is 12 credit hours per semester.
Upon entering the Biochemistry and Cancer Biology major, this course must be taken every semester until admission to candidacy requirements are complete.
- BCMB 9300 - Research (1 to 12 Credit Hours)
Standard enrollment is 12 credit hours per semester.
Must be taken every semester after admission to candidacy until dissertation requirements are met.

Electives: 2 Hours Minimum

- BCMB 8310 - Advanced Topics in Microbiology and Infectious Disease I (2 Credit Hours)
- BCMB 8320 - Advanced Topics in Microbiology and Infectious Disease II (2 Credit Hours)
- BCMB 8340 - Elements of Scientific Presentation (2 Credit Hours)

Upper level courses in another discipline or biomedical science major not included on the pre-approved elective listing may be taken as an elective with formal, advanced approval from mentor, program director, The Graduate School (and Office of the Registrar) per the official approval and course substitution process and form submission.

Degree Total: 114-252 Hours

Term-by-Term Pathway

To outline and visualize the path from start to finish in this program, refer to the suggested Term-by-Term Pathway.

Doctor of Philosophy in Biostatistics

Program Overview

The doctoral program prepares students to understand the mathematical and theoretical basis of statistical methodology; collaborate on the design of research studies in the health sciences; provide advice on the proper collection, entry, storage, retrieval, and manipulation of data; and take primary responsibility for the analysis, interpretation and dissemination of data in a research study using state-of-the-art statistical methods and software. Doctoral students are also prepared to carry out original methodological research in statistics and apply the resulting methodology to health-related research problems.

Doctoral students entering Fall 2021 or after will be placed in one of three pathways to complete their degree requirements. Students who enter the program with a BS or MS in fields other than Biostatistics will be placed on Pathway 1. Students on Pathway 1 will be awarded both MS and PhD degrees in Biostatistics after they successfully defend their PhD dissertations. Students who enter the program with an MS in Biostatistics from other institutions will be placed on Pathway 2. Students who enter the program with an MS in Biostatistics from Augusta University will be placed on Pathway 3.

All current Biostatistics doctoral students (entered prior to Fall 2021) who fulfill the requirements of Pathway 1 will also be awarded both MS and PhD degrees in Biostatistics after they successfully defend their PhD dissertations.

Term-by-Term Pathways

To outline and visualize the path from start to finish in this program, refer to the suggested Term-by-Term Pathway options below:

Doctor of Philosophy in Biostatistics Pathway 1 (Program Pathway)

This pathway follows standard PhD curriculum; eligible for the MS on the way to the PhD; requirements are completed for the MS degree when student officially enters candidacy. Both the MS and PHD will be awarded together upon completion of PHD degree requirements. Students must complete 2 full semesters after entering candidacy before they can defend their dissertation. If students complete the MS degree requirements (officially enter candidacy) but do not complete the PHD degree, then they are awarded the MS degree.

Doctor of Philosophy in Biostatistics Pathway 2 (Program Pathway)

This pathway follows the standard PhD curriculum; not eligible for a MS on the way to the PhD as they already have a MS-Biostatistics degree elsewhere. Must complete 2 full semesters after entering candidacy before they can defend their dissertation.

Doctor of Philosophy in Biostatistics Pathway 3 (Program Pathway)

This pathway follows abbreviated PhD curriculum (since already completed AU PhD courses as part of AU MS degree program); MS thesis cannot be used as PhD proposal. Must complete 2 full semesters after entering candidacy before they can defend their dissertation.

Doctor of Philosophy in Cellular Biology and Anatomy

Program Overview

Our graduate program offers excellent research training opportunities in the dynamic field of cell biology. Faculty members are eager to engage energetic pre- and post-doctoral fellows in research that covers a broad spectrum of cell biological research from development through normal processes, disease/degeneration and death. The developmental biologists within our department investigate polarity and patterning in organisms, while other faculty members study mechanisms of protection, repair and regeneration related to diseases of the kidney, musculoskeletal, breast, and visual systems. A broad array of genetic, molecular, cell biological, and biochemical tools are applied to in vivo and in vitro studies using multiple model systems including rodents, zebrafish, and *Drosophila*. The department has strong collaborative ties with many of the research institutes and centers on campus and offers a rich environment for scientific discovery and dissemination of new knowledge. There are numerous substantive interactions with clinicians offering myriad opportunities for translational research.

After completing the first-year common core course work and laboratory rotations, students choose a dissertation research mentor and enter one of nine Doctor of Philosophy majors.

- The Doctor of Philosophy curriculum is not lock-step; students do not graduate as a class at the end of a specific semester. The average time to degree is approximately five years of full-time, year-round study; acceptable duration of the program is a minimum of three and maximum of seven years. The number and type of advanced (2nd year and beyond) or elective courses vary, and may include courses within the Cellular Biology and Anatomy program as well as courses in other disciplines.
- In addition to specific course requirements, students must complete additional PhD degree requirements, including annual advisory committee meetings, individual development plans (IDP's) satisfactory performance on the comprehensive examination, development and approval of a research proposal, writing and approval of the doctoral dissertation, and satisfactory performance on the final oral examination (dissertation defense). Publication of at least one first-authored original research article in an approved peer-reviewed journal is required for students entering the CBA Graduate Program in 2016 and beyond. A CBA Program Handbook is available online and updated at least once yearly in August to reflect any changes that have occurred during the academic year. See PhD Student Guide for additional requirements and details.

- BIOM 8085 - Fundamentals of Aging (2 Credit Hours)
- BIOM 8090 - Fundamentals of Genomic Medicine (2 Credit Hours) *(Required for Genomic Medicine major)*
- BIOM 8200 - Selected Topics (for Partial Course Enrollment) (1 to 6 Credit Hours)
- BIOM 8215 - Fundamentals of Oncology I (2 Credit Hours)
- BIOM 8230 - Biology of Proteins in Disease (2 Credit Hours)
- BIOM 8240 - Introduction to Immunology and Infectious Disease (2 Credit Hours)

Major Courses

- ANAT 8050 - Graduate Histology (5 Credit Hours) or ANAT 8051 - Histology for Graduate Studies I (3 Credit Hours) and ANAT 8052 - Histology of Graduate Studies II (3 Credit Hours)
- ANAT 8090 - Current Topics in Cellular Biology (1 Credit Hour)

Upon entering the Cellular Biology and Anatomy major, this course must be taken every Fall and Spring semester until dissertation requirements are complete.

- ANAT 9010 - Seminar in Cellular Biology and Anatomy (1 Credit Hour)
Upon entering the Cellular Biology and Anatomy major, this course must be taken every Fall semester until dissertation requirements are complete.
- ANAT 9020 - Seminar in Cellular Biology and Anatomy (1 Credit Hour)
Upon entering the Cellular Biology and Anatomy major, this course must be taken every Spring semester until dissertation requirements are complete.
- ANAT 9210 - Investigation of a Problem (1 to 12 Credit Hours)
Standard enrollment is 12 credit hours per semester.
Upon entering the Cellular Biology and Anatomy major, this course must be taken every semester until admission to candidacy requirements are complete.
- ANAT 9300 - Research (1 to 12 Credit Hours)
Standard enrollment is 12 credit hours per semester.
Must be taken every semester after admission to candidacy until dissertation requirements are met.

Electives: 3 Hours Minimum

Select three credit hours from the following courses:

- ANAT 7030 - Neuroscience I (3 Credit Hours)
- ANAT 8030 - Fundamentals of Vision Science (3 Credit Hours)
- ANAT 8040 - Current Topics in Vision Science (3 Credit Hours)
- ANAT 8060 - Visual Neuroscience (2 Credit Hours)
- ANAT 8070 - Progress in Vision Research (1 Credit Hour)
- ANAT 8080 - Cellular Mechanisms in Development and Disease (2 Credit Hours)
- ANAT 8120 - Investigative Techniques in Cell Biology (3 Credit Hours)
- CAHS 7400 - Human Gross Anatomy (6 Credit Hours)
- ANAT 7110 - Foundations in Anatomy Teaching and Learning (2 Credit Hours)
- ANAT 7120 - Advanced Strategies in Anatomical Education (1 Credit Hour)
- ANAT 7130 - Supervised Anatomy Teaching Practicum (4 Credit Hours)
- ANAT 8022 - Teaching Practicum in Molecular Cell Biology (2 Credit Hours)

Upper level courses in another discipline or biomedical science major not included on the pre-approved elective listing may be taken as an elective with formal, advanced approval from mentor, program director, The Graduate School (and Office of the Registrar) per the official approval and course substitution process and form submission.

Degree Total: 114 - 252 Hours

Term-by-Term Pathway

To outline and visualize the path from start to finish in this program, refer to the suggested Term-by-Term Pathway.

Doctor of Philosophy in Computer and Cyber Sciences

Program Overview

The doctoral degree (PhD) in Computer and Cyber Sciences prepares individuals to deeply understand both foundational and applied aspects of the field of computing and cyber sciences. Students are prepared to carry out original research in computer and cyber sciences by learning how the existing state-of-the-art technology is advanced and how new ideas are developed, evaluated, and presented. Students are prepared for research, teaching, and/or advanced development positions in academia, industry, or government.

Program Contact

Dr. Gursimran Walia

706-721-1109

gwalia@augusta.edu

Admissions Information

For additional information regarding admissions requirements, please visit the Office of Academic Admissions website.

Progression and Graduation Requirements

- Coursework meeting the PhD-specific program requirements (breadth classes and electives)
- Passing Research-Project Examination
- Passing Comprehensive Examination
- PhD dissertation proposal as per the guidelines by The Graduate School
- PhD dissertation and its defense as per the guidelines by The Graduate School

Program Information

- Program Length: 7 Years
- CIP Code: 11.0101
- Program Code: 1DPHIL-CSCS
- Major Code: CSCS

Degree Requirements

Doctoral students must earn a minimum of 72 credit hours during the course of the program. This is comprised of a minimum of 36 credits for coursework, including breadth classes, introduction to research classes, problems classes, research exposure, and electives, and a minimum of 36 credits for dissertation research. To complete the program, students are required to complete course requirements, pass a research proficiency examination, defend a thesis proposal, and have an approved dissertation.

Breadth Requirements: 18 Hours

Doctoral students are expected to demonstrate competency in Computer and Cyber Sciences by taking courses within at least 3 of the following areas.

- Area A: Theoretical Foundations
- Area B: Computer Systems
- Area C: Applications
- Area D: Cybersecurity
- Area E: Human-Centered Computing

To satisfy the Breadth Requirements, students must take 6 courses totaling 18 credit hours among the 5 areas A-E. Students choose, based on their interests and in consultation with their academic or dissertation advisor. The following rules must be followed:

1. Courses must come from at least 3 areas
2. Students must take at least 2 courses from 2 areas

Based on these rules, potential course options across areas are 2-2-1-1, 2-2-2, and 3-2-1. Students must complete their breadth requirements in a manner that supports their research emphasis. Their plan (i.e., number of courses they will take in each of the areas) must be approved by the program director and a member of the graduate committee.

To have the courses satisfy the Breadth Requirements, students must receive a grade of B or better in each of the 6 courses and have more A's than B's in the 6 courses. Area courses taken beyond the 6 required Breadth Requirements will be considered electives.

Area A: Courses in Theoretical Foundations

- CSCI 7100 - Algorithm Analysis (3 Credit Hours)
- CSCI 7300 - Programming Languages (3 Credit Hours)
- CSCI 7350 - Network and Distributed Algorithms (3 Credit Hours)
- CSCI 7500 - Theory of Computation (3 Credit Hours)
- CSCI 7951 - Advanced Topics in Theoretical Foundations (3 Credit Hours)
- CSCI 8250 - Quantum Computing (3 Credit Hours)
- CSCI 8310 - Proof Theory (3 Credit Hours)
- CSCI 8320 - Verification of Software (3 Credit Hours)

Area B: Courses in Computer Systems

- CSCI 7110 - Cyber-physical Systems (3 Credit Hours)
- CSCI 7240 - Internet of Things and Embedded Systems (3 Credit Hours)
- CSCI 7410 - Operating Systems (3 Credit Hours)
- CSCI 7580 - Computer Architecture and Parallel Processing (3 Credit Hours)
- CSCI 7585 - High Performance Computing (3 Credit Hours)
- CSCI 7654 - Communication in Networks (3 Credit Hours)
- CSCI 7952 - Advanced Topics in Computer Systems (3 Credit Hours)

Area C: Courses in Applications

- CSCI 7150 - Natural Language Processing (3 Credit Hours)
- CSCI 7170 - Applications of Cloud Computing (3 Credit Hours)
- CSCI 7210 - Introduction to Statistical Learning (3 Credit Hours)
- CSCI 7230 - Topics in Optimization (3 Credit Hours)
- CSCI 7340 - Machine Learning (3 Credit Hours)
- CSCI 7420 - Human-Computer Interaction (3 Credit Hours)
- CSCI 7620 - Data Science (3 Credit Hours)
- CSCI 7810 - Information Management (3 Credit Hours)
- CSCI 7953 - Advanced Topics in Applications (3 Credit Hours)

Area D: Courses in Cybersecurity

- AIST 7100 - Data Analytics in Cybersecurity (3 Credit Hours)
- AIST 8353 - Human Factors in Information Security (3 Credit Hours)
- CSCI 7130 - Software Engineering (3 Credit Hours)
- CSCI 7440 - Evaluating Cybersecurity (3 Credit Hours)
- CSCI 7520 - Principles of Cryptography (3 Credit Hours)
- CSCI 7954 - Advanced Topics in Cybersecurity (3 Credit Hours)
- CYBR 7100 - Ethical Hacking and Penetration Testing (3 Credit Hours)
- CYBR 7300 - Network Security (3 Credit Hours)
- CYBR 7500 - Cloud and Edge Security (3 Credit Hours)
- CYBR 7550 - IoT Security (3 Credit Hours)

Area E: Courses in Human-Centered Computing

- AIST 7110 - Qualitative Research Methods in Information Systems (3 Credit Hours)
- AIST 7120 - Quantitative Research Methods in Information Systems (3 Credit Hours)
- AIST 7130 - Advanced Quantitative Research Methods in Information Systems (3 Credit Hours)
- AIST 7140 - Foundational Theories in Information Systems Research (3 Credit Hours)

- AIST 7955 - Advanced Topics in Human-Centered Computing (3 Credit Hours)
- CSCI 7180 - Advanced Studies in Extended Reality (3 Credit Hours)

Preparation for Research: 3 Hours

In their first semester, all students take one of the following courses in consultation with their advisor. Subsequently, students register for CSCI 8720 under the supervision of a faculty member in the school. Students do not need to have a formal dissertation advisor at this stage.

- AIST 6900 - Introduction to Information Security Research (3 Credit Hours)
- CSCI 6900 - Introduction to Research (3 Credit Hours)

Problems Course: 3 Hours

- CSCI 8720 - Problems in Computer and Cyber Sciences (3 Credit Hours)

Research Exposure: 3 Hours

Students register for the following Research Colloquium course a minimum of three times during the program. This course is a venue to discuss contemporary problems in Computer and Cyber Sciences. While students can take this course more than 3 times during their program, a maximum of 3 credits will count toward the degree requirements.

- CSCI 7900 - Research Colloquium (1 Credit Hour)

Area F Electives: 9 Hours

Students take elective coursework adding another 9 credits across the breadth areas. Select from the following:

- AIST 8500 - Topics in Behavioral Research (3 Credit Hours)
- CSCI 7011 - Studies in Foundations of Computer and Cyber Sciences (3 Credit Hours)
- CSCI 7012 - Studies in Applications of Computer and Cyber Sciences (3 Credit Hours)
- CSCI 7140 - Side Channel Attacks (3 Credit Hours)
- CSCI 7200 - Emerging Sensing Technologies for Biometric Authentication (3 Credit Hours)
- CSCI 7950 - Selected Topics (3 Credit Hours)
- CSCI 8510 - Independent Study (1 to 3 Credit Hours)

Dissertation: 36 Hours

After students have a formal advisor and have passed the comprehensive exam, they may register for the Dissertation Research course. A minimum of 36 credits of this course need to be completed prior to graduation.

- CSCI 8940 - Dissertation Research (1 to 9 Credit Hours)

Degree Total: 72 Hours Minimum

Doctor of Philosophy in Genomic Medicine

Program Overview

The Genomic Medicine program provides an interdisciplinary and state-of-the-art research environment for genetic, genomic, proteomic and computational technologies to advance medicine. Faculty research interests' cross multiple disciplines, including diabetes, autoimmunity, obesity, computational biology, cancer, and bioinformatics. The core curriculum provides the foundation to address complex biological problems using integrated high-throughput technologies.

augusta.edu/centers/cbgbm/grad_welcome

Program Contact

Ashok Sharma, PhD
706-721-3433
biomed@augusta.edu

Progression and Graduation Requirements

- Students are admitted via a common admissions process to the Biomedical Sciences PhD program, not to a specific biomedical major. After completing the first-year common core course work and laboratory rotations, students choose a dissertation research mentor and enter one of nine Doctor of Philosophy majors.
- The Doctor of Philosophy curriculum is not lock-step; students do not graduate as a class at the end of a specific semester. The average time to degree is approximately five years of full-time, year-round study; acceptable duration of the program is a minimum of three and maximum of seven years. The number and type of advanced (2nd year and beyond) or elective courses vary, and may include courses within the Genomic Medicine program as well as courses in other disciplines.
- In addition to specific course requirements, students must complete additional PhD degree requirements, including satisfactory performance on the Comprehensive Examination, development and approval of a research proposal, writing and approval of the doctoral dissertation, and satisfactory performance on the Final Oral Examination (dissertation defense). See PhD Student Guide for additional requirements and details.

Program Information

- Program Length: Maximum of 7 Years
- CIP Code: 26.1201
- Program Code: DPHIL_GENO

Degree Requirements

Biomedical Sciences PhD Year One Core Curriculum: 33 Hours

Required Courses: 29 Hours

- BIOM 8011 - Responsible Conduct of Research (1 Credit Hour)
- BIOM 8012 - Scientific Communications (1 Credit Hour)
- BIOM 8021 - Biochemistry and Gene Regulation (5 Credit Hours)
- BIOM 8022 - Molecular Cell Biology (5 Credit Hours)
- BIOM 8033 - Integrated Systems Biology (6 Credit Hours)
- BIOM 8040 - Introduction to Faculty Research (2 Credit Hours)
- BIOM 8050 - Introduction to Research I (2 Credit Hours)
- BIOM 8060 - Introduction to Research II (4 Credit Hours)
- STAT 7070 - Biomedical Statistics (3 Credit Hours)

Electives: 4 Hours

Select four credit hours from the following:

- BIOM 8030 - Experimental Therapeutics (2 Credit Hours)
- BIOM 8080 - Neuroscience I (4 Credit Hours) (*Required for Neuroscience major*)
- BIOM 8085 - Fundamentals of Aging (2 Credit Hours)

- BIOM 8090 - Fundamentals of Genomic Medicine (2 Credit Hours) (*Required for Genomic Medicine major*)
- BIOM 8200 - Selected Topics (for Partial Course Enrollment) (1 to 6 Credit Hours)
- BIOM 8215 - Fundamentals of Oncology I (2 Credit Hours)
- BIOM 8230 - Biology of Proteins in Disease (2 Credit Hours)
- BIOM 8240 - Introduction to Immunology and Infectious Disease (2 Credit Hours)

Major Courses:

- GNMD 8050 - Computational Methods in Genomics and Genetics (4 Credit Hours)
- GNMD 8051 - Translational Genomics and Proteomics (3 Credit Hours)
- GNMD 8052 - Functional Genomics and Proteomics Using Animal Models (3 Credit Hours)
- GNMD 8060 - Genomic Medicine Seminar (1 Credit Hour)
Upon entering the Genomic Medicine major, this course must be taken every Fall and Spring semester until dissertation requirements are complete.
- GNMD 9210 - Investigation of a Problem in Genomic Medicine (1 to 12 Credit Hours)
Standard enrollment is 12 credit hours per semester.
Upon entering the Genomic Medicine major, this course must be taken every semester until admission to candidacy requirements are complete.
- GNMD 9300 - Research in Genomic Medicine (1 to 12 Credit Hours)
Standard enrollment is 12 credit hours per semester.
Must be taken every semester after admission to candidacy until dissertation requirements are met.

Electives:

- GNMD 8000 - Genetic Mechanisms of Hereditary Cancer (2 Credit Hours)

Degree Total: 114 - 252 Hours

Term-by-Term Pathway

To outline and visualize the path from start to finish in this program, refer to the suggested Term-by-Term Pathway.

Doctor of Philosophy in Intelligence, Defense, and Cybersecurity Policy

Program Overview

This program is an 84-credit-hour degree that focuses on enhancing practical, theoretical, doctrinal, and policy concerning the United States national security apparatus. The coursework is state-of-the-art and is designed to help the intelligence community seek new paths forward in areas such as combatting propaganda, cyberwar and cyberterrorism, influence and social media operations, great power competition, medical intelligence, and traditional coursework in security and national defense strategy and policy. Our curriculum offers extensive core work equipping students with a strong, broad-based understanding of security studies, especially as it pertains to the national security of the United States and its position in the international arena. Courses expose students to U.S. policy documents, military doctrine, and academic literature pertinent to the course of study. Students take two comprehensive exams. All students take a mandatory exam in Security Studies, then students take a comprehensive exam focused on their selected area of focus, choosing from either: Intelligence Studies, National Defense Studies, or Cybersecurity Policy. Eligible students may receive up to 30 credit hours if they have obtained a relevant master's degree before applying to the PhD Program. This will be evaluated on a case-by-case basis by the program director using the institution's transfer equivalency hours policy. Conversely, students are awarded their master's degree (if they have none) after completion of 36 hours of coursework. There is no thesis or capstone requirement for the awarding of a master's degree.

augusta.edu/programs/intelligence-defense-cybersecurity-policy-phd

Program Contact

Dr. Craig Douglas Albert, Program Director

706-737-1710

calbert@augusta.edu

Admissions Information

- An undergraduate degree with a minimum 3.25 GPA or a master's degree in a related field with a minimum 3.25 GPA
 - Students with an eligible master's degree can apply 30 hours toward the PhD coursework, essentially bypassing the first year of core/requirements
 - Students with only a bachelor's degree are expected to complete all 84 hours within the program
- No GRE required
- Three letters of recommendation (academic and military letters are allowed)
- Writing sample

Within your application, using an essay format, you will be prompted to discuss and elaborate in detail on the following questions: 1) Why do you think you are a good fit for a PhD in Intelligence, Defense, and Cybersecurity Policy 2) What are your Career objectives and how will this PhD help obtain them? 3) What skills and tools will you bring to the program in terms of the type of research you want to contribute to the field, and/or what type of practical experience do you bring that would benefit the program and discipline overall? (500 word limit)

For more information on admissions requirements, visit the Office of Admissions website.

In addition to standard graduate admissions requirements, applicants to this program must meet certain conditions. Because this program's courses are aligned with U.S. national security objectives and doctrines, applicants to the PhD in Intelligence, Defense, and Cybersecurity Policy program must be eligible for and have a reasonable expectation of receiving U.S. Department of Defense (DoD) security clearance to be admitted to the program. Applicants need not possess or apply for DoD security clearance prior to being admitted to the program but must be able to demonstrate that they meet the requirements to receive such a clearance.

DoD requirements to receive security clearance include the following:

1. United States Citizenship
2. Demonstrated loyalty to the United States
3. Demonstration of good character and conduct
4. Passing a background check
5. Completing a Personal Security Questionnaire (SF-86)
6. Undergoing Fingerprinting

Factors that can impact your ability to gain DoD security clearance include, but are not limited to:

- Criminal conduct
- Drug involvement
- Financial considerations
- Use of information technology systems
- Foreign influence
- Alcohol consumption
- Psychological conditions and personal behavior
- Handling protected information
- Dishonorably discharged from the military
- Illegal drug use
- Revocation of prior security clearances
- History of financial difficulties, such as unpaid bills

Progression and Graduation Requirements

- Students must maintain a 3.0 GPA throughout the duration of the program.
- After 24 earned hours (36 without prior hours applied), students must choose a Mentor/Dissertation Advisor and start discussing dissertation plans.
- After 36 hours (48 without prior hours applied), students must complete their prospectus, signed off by the appropriate advisor.

- After 36 hours (48 without prior hours approved), students must have taken their comprehensive exams, which are incorporated within the coursework for SECR 9900. Students take two exams.
- After the above requirements have been completed, students have the dissertation hours and the defense hours to complete the minimum required 84 hours of coursework (assuming no prior credit awarded).
- Students enter official candidacy for the PhD after comps and prospectus have been passed. University regulations then stipulate that students must complete at least two more semesters of research hours before being granted their PhD.

Program Information

- Program Length: 4 Years
- CIP Code: 45.0999 - International Relations and National Security Studies, Other.
- Program Code: DPHIL_IDCP
- Major Code: IDCP
- Campus Code: OLC
- College Code: 03

Degree Requirements

Major Courses: 24 Hours

Required Courses: 9 Hours

- SECR 6600 - Research Design and Writing for Intelligence and Security Studies (3 Credit Hours)
- SECR 6910 - International Relations Theory (3 Credit Hours)
- SECR 6911 - Introduction to Security Studies (3 Credit Hours)

Intelligence Studies Courses: 6 Hours

Select two of the following:

- SECR 6411 - Introduction to Intelligence Studies (3 Credit Hours)
- SECR 6412 - Intelligence Collection (3 Credit Hours)
- SECR 6415 - Intelligence Analysis (3 Credit Hours)

Strategic Cybersecurity Courses: 6 Hours

Select two of the following:

- SECR 6980 - Introduction to Cyber Intelligence and Cybersecurity Policy (3 Credit Hours)
- SECR 6981 - Cyber Conflict: History and Theory of Cyber War (3 Credit Hours)
- SECR 7301 - U.S. Cyber Strategy and Policy (3 Credit Hours)

Methods Courses: 3 Hours

Select one of the following:

- SECR 7601 - Introduction to Statistical Analysis for Security Studies (3 Credit Hours)
- SECR 7602 - Introduction to Qualitative Methods: Process-Tracing and Case-Study Analysis (3 Credit Hours)

Area Courses: 15 Hours

Select one of the following areas for comprehensive exams. Each student must have 15 hours in their selected area. Students must also take at least one class in the other two areas as well.

Area I: Intelligence Studies

Select from the following:

- SECR 7200 - U.S. Intelligence Theory and Practice (3 Credit Hours)
- SECR 7201 - Intelligence Analysis (3 Credit Hours)
- SECR 7202 - Advanced Intelligence Analysis (3 Credit Hours)
- SECR 7203 - Advanced Intelligence - Theory and Policy (3 Credit Hours)
- SECR 7204 - Legal and Ethical Issues In Intelligence Policy (3 Credit Hours)
- SECR 7205 - Social Media Intelligence (3 Credit Hours)
- SECR 7206 - Counterintelligence: Theory and Practice (3 Credit Hours)
- SECR 7208 - Strategic Intelligence (3 Credit Hours)
- SECR 7209 - Public Health Intelligence (3 Credit Hours)
- SECR 7210 - Emerging Technology, Artificial Intelligence, and Intelligence Analysis (3 Credit Hours)
- SECR 7211 - Psychology of Intelligence Analysis (3 Credit Hours)

Area II: National Defense Studies

Select from the following:

- SECR 7101 - U.S. Grand Strategy and Foreign Policy (3 Credit Hours)
- SECR 7102 - Homeland Defense and Security (3 Credit Hours)
- SECR 7103 - International Terrorism (3 Credit Hours)
- SECR 7104 - Domestic Terrorism (3 Credit Hours)
- SECR 7105 - Advanced Counterterrorism Strategies (3 Credit Hours)
- SECR 7106 - International Conflict and Security (3 Credit Hours)
- SECR 7107 - Nationalism and Ethnic Conflict (3 Credit Hours)
- SECR 7108 - Technology, Artificial Intelligence, and International Security (3 Credit Hours)
- SECR 7109 - Foreign Policy Analysis (3 Credit Hours)

Area III: Cybersecurity Policy

Select from the following:

- SECR 7300 - Theories of Cyberwar (3 Credit Hours)
- SECR 7301 - U.S. Cyber Strategy and Policy (3 Credit Hours)
- SECR 7302 - Comparative Cyber Policy: NATO (3 Credit Hours)
- SECR 7303 - Comparative Cyber Policy: U.S. Adversaries (3 Credit Hours)
- SECR 7304 - Cyber Intelligence: Policy and Theory (3 Credit Hours)
- SECR 7305 - Information Operations and Warfare (3 Credit Hours)
- SECR 7306 - Cyberterrorism and Cybercrime (3 Credit Hours)
- SECR 7307 - Legal and Ethical Issues in Cybersecurity Policy (3 Credit Hours)
- SECR 7308 - The Psychology of Cyberspace (3 Credit Hours)
- SECR 7309 - Social Media Psychology and Propaganda Operations (3 Credit Hours)
- SECR 7310 - Digital Surveillance and Control (3 Credit Hours)

Elective Courses: 15 Hours

Select from the following. Students may select any course not used in their area of concentration for electives, including classes in the same area, if not already counted toward area of emphasis.

Please note: The 15 hours of electives can be from any area. However, at least 3 hours from each of the other two areas of concentration must be taken.

- SECR 6411 - Introduction to Intelligence Studies (3 Credit Hours)
- SECR 6412 - Intelligence Collection (3 Credit Hours)
- SECR 6413 - Open-Source Intelligence (3 Credit Hours)
- SECR 6415 - Intelligence Analysis (3 Credit Hours)
- SECR 6980 - Introduction to Cyber Intelligence and Cybersecurity Policy (3 Credit Hours)
- SECR 6981 - Cyber Conflict: History and Theory of Cyber War (3 Credit Hours)
- SECR 7101 - U.S. Grand Strategy and Foreign Policy (3 Credit Hours)
- SECR 7102 - Homeland Defense and Security (3 Credit Hours)
- SECR 7103 - International Terrorism (3 Credit Hours)
- SECR 7104 - Domestic Terrorism (3 Credit Hours)
- SECR 7105 - Advanced Counterterrorism Strategies (3 Credit Hours)
- SECR 7106 - International Conflict and Security (3 Credit Hours)
- SECR 7107 - Nationalism and Ethnic Conflict (3 Credit Hours)
- SECR 7108 - Technology, Artificial Intelligence, and International Security (3 Credit Hours)
- SECR 7109 - Foreign Policy Analysis (3 Credit Hours)
- SECR 7150 - Current Topics in Security Studies (3 Credit Hours)
- SECR 7200 - U.S. Intelligence Theory and Practice (3 Credit Hours)
- SECR 7201 - Intelligence Analysis (3 Credit Hours)
- SECR 7202 - Advanced Intelligence Analysis (3 Credit Hours)
- SECR 7203 - Advanced Intelligence - Theory and Policy (3 Credit Hours)
- SECR 7204 - Legal and Ethical Issues In Intelligence Policy (3 Credit Hours)
- SECR 7205 - Social Media Intelligence (3 Credit Hours)
- SECR 7206 - Counterintelligence: Theory and Practice (3 Credit Hours)
- SECR 7208 - Strategic Intelligence (3 Credit Hours)
- SECR 7209 - Public Health Intelligence (3 Credit Hours)
- SECR 7210 - Emerging Technology, Artificial Intelligence, and Intelligence Analysis (3 Credit Hours)
- SECR 7211 - Psychology of Intelligence Analysis (3 Credit Hours)
- SECR 7300 - Theories of Cyberwar (3 Credit Hours)
- SECR 7301 - U.S. Cyber Strategy and Policy (3 Credit Hours)
- SECR 7302 - Comparative Cyber Policy: NATO (3 Credit Hours)
- SECR 7303 - Comparative Cyber Policy: U.S. Adversaries (3 Credit Hours)
- SECR 7304 - Cyber Intelligence: Policy and Theory (3 Credit Hours)
- SECR 7305 - Information Operations and Warfare (3 Credit Hours)
- SECR 7306 - Cyberterrorism and Cybercrime (3 Credit Hours)
- SECR 7307 - Legal and Ethical Issues in Cybersecurity Policy (3 Credit Hours)
- SECR 7308 - The Psychology of Cyberspace (3 Credit Hours)
- SECR 7309 - Social Media Psychology and Propaganda Operations (3 Credit Hours)
- SECR 7310 - Digital Surveillance and Control (3 Credit Hours)
- SECR 7601 - Introduction to Statistical Analysis for Security Studies (3 Credit Hours)
- SECR 7602 - Introduction to Qualitative Methods: Process-Tracing and Case-Study Analysis (3 Credit Hours)
- SECR 7603 - Advanced Statistical Analysis for Security Studies (3 Credit Hours)
- SECR 7604 - Machine Learning and Security Analysis (3 Credit Hours)
- SECR 7605 - Introduction to Data Analytics and Data Science (3 Credit Hours)
- SECR 7606 - Advanced Data Science (3 Credit Hours)
- SECR 7990 - Advanced Research in Security Studies (3 Credit Hours)

Research and Dissertation Courses: 30 Hours Minimum

- SECR 9900 - Integrated Research for Intelligence and Security Studies (3 Credit Hours)
- SECR 9901 - Dissertation Prospectus (3 Credit Hours)
- SECR 9902 - Dissertation Research (1 to 9 Credit Hours) (*taken for 21 Credit Hours total*)
- SECR 9903 - Defense Preparation and Presentation (3 Credit Hours)

Degree Total: 84 Hours

Doctor of Philosophy in Molecular Oncology and Immunology

Program Overview

The Molecular Oncology and Immunology program combines the resources of basic science and clinical medicine for an interdisciplinary approach to understanding disease processes. The program includes faculty members drawn from clinical and basic science departments. Focused on discovering the molecular basis of human disease, research opportunities are focused on cancer and immunological diseases.

- STAT 7070 - Biomedical Statistics (3 Credit Hours)

Electives: 4 Hours

Select four credit hours from the following:

- BIOM 8030 - Experimental Therapeutics (2 Credit Hours)
- BIOM 8080 - Neuroscience I (4 Credit Hours) *(Required for Neuroscience major)*
- BIOM 8085 - Fundamentals of Aging (2 Credit Hours)
- BIOM 8090 - Fundamentals of Genomic Medicine (2 Credit Hours) *(Required for Genomic Medicine major)*
- BIOM 8200 - Selected Topics (for Partial Course Enrollment) (1 to 6 Credit Hours)
- BIOM 8215 - Fundamentals of Oncology I (2 Credit Hours)
- BIOM 8230 - Biology of Proteins in Disease (2 Credit Hours)
- BIOM 8240 - Introduction to Immunology and Infectious Disease (2 Credit Hours)

Major Courses

- MOIM 9020 - Seminar in Molecular Oncology and Immunology (1 Credit Hour) *(Upon entering the Molecular Oncology and Immunology major, this course must be taken in every Fall semester until dissertation requirements are complete)*
- MOIM 9030 - Seminars in Molecular Oncology and Immunology (1 Credit Hour) *(Upon entering the Molecular Oncology and Immunology major, this course must be taken in every Spring semester until dissertation requirements are complete)*
- MOIM 9040 - Molecular Oncology and Immunology Journal Club (1 Credit Hour) *(Upon entering the Molecular Oncology and Immunology major, this course must be taken in every Fall and Spring semester until dissertation requirements are complete)*
- MOIM 9210 - Investigation of a Problem (1 to 12 Credit Hours) *(Standard enrollment is 12 credit hours per semester. Upon entering the Molecular Oncology and Immunology major, this course must be taken in every semester until dissertation requirements are complete.)*
- MOIM 9300 - Research (1 to 12 Credit Hours) *(Standard enrollment is 12 credit hours per semester. Must be taken every semester after admission to candidacy until dissertation requirements are met.)*

Electives: 6 Hours Minimum

Select six credit hours from the following:

- BCMB 8201 - Current Topics and Techniques in Molecular Biology (3 Credit Hours)
- BIOM 8130 - Scientific Grant Writing (1 Credit Hour)
- GNMD 8050 - Computational Methods in Genomics and Genetics (4 Credit Hours)
- GNMD 8051 - Translational Genomics and Proteomics (3 Credit Hours)
- GNMD 8052 - Functional Genomics and Proteomics Using Animal Models (3 Credit Hours)
- MOIM 8030 - Biological Signaling (3 Credit Hours)
- MOIM 8040 - Molecular Oncology and Immunology (3 Credit Hours)
- MOIM 8130 - Advanced Topics in Molecular and Cellular Immunology (3 Credit Hours)
- MOIM 9010 - Advanced Seminar in Molecular Oncology and Immunology (1 Credit Hour)

Upper level courses in another discipline or biomedical science major not included on the pre-approved elective listing may be taken as an elective with formal, advanced approval from mentor, program director, The Graduate School (and Office of the Registrar) per the official approval and course substitution process and form submission.

Degree Total: 114 - 252 Hours

Term-by-Term Pathway

To outline and visualize the path from start to finish in this program, refer to the suggested Term-by-Term Pathway.

Doctor of Philosophy in Neuroscience

Program Overview

The neuroscience program combines resources in clinical and basic neuroscience to teach psychiatric and neurological diseases, developmental neurobiology, sensory, motor and regulatory systems, cognitive neuroscience, and cellular and molecular neuroscience. Over 25 neuroscientists participate in the interdisciplinary graduate neuroscience program to provide research opportunities in neurodegeneration and regeneration, including spinal cord injury, Parkinson's Disease, traumatic brain injury, stroke and Alzheimer's Disease, depression, and sensory systems among other areas.

Progression and Graduation Requirements

- Students are admitted via a common admissions process to the Biomedical Sciences PhD program, not to a specific biomedical major. After completing the first-year common core course work and laboratory rotations, students choose a dissertation research mentor and enter one of nine Doctor of Philosophy majors.
- The Doctor of Philosophy curriculum is not lock-step; students do not graduate as a class at the end of a specific semester. The average time to degree is approximately five years of full-time, year-round study; acceptable duration of the program is a minimum of three and maximum of seven years. The number and type of advanced (2nd year and beyond) or elective courses vary, and may include courses within the Neuroscience program as well as courses in other disciplines.
- In addition to specific course requirements, students must complete additional PhD degree requirements, including satisfactory performance on the Comprehensive Examination, development and approval of a research proposal, writing and approval of the doctoral dissertation, and satisfactory performance on the Final Oral Examination (dissertation defense). See PhD Student Guide for additional requirements and details.

Program Information

- Program Length: Maximum of 7 Years
- CIP Code: 26.1501
- Program Code: DPHIL_NERO

Degree Requirements

Biomedical Sciences PhD Year One Core Curriculum: 33 Hours

Required Courses: 29 Hours

- BIOM 8011 - Responsible Conduct of Research (1 Credit Hour)
- BIOM 8012 - Scientific Communications (1 Credit Hour)
- BIOM 8021 - Biochemistry and Gene Regulation (5 Credit Hours)
- BIOM 8022 - Molecular Cell Biology (5 Credit Hours)
- BIOM 8033 - Integrated Systems Biology (6 Credit Hours)
- BIOM 8040 - Introduction to Faculty Research (2 Credit Hours)
- BIOM 8050 - Introduction to Research I (2 Credit Hours)
- BIOM 8060 - Introduction to Research II (4 Credit Hours)

- STAT 7070 - Biomedical Statistics (3 Credit Hours)

Electives: 4 Hours

Select four credit hours from the following:

- BIOM 8030 - Experimental Therapeutics (2 Credit Hours)
- BIOM 8080 - Neuroscience I (4 Credit Hours) *(Required for Neuroscience major)*
- BIOM 8085 - Fundamentals of Aging (2 Credit Hours)
- BIOM 8090 - Fundamentals of Genomic Medicine (2 Credit Hours) *(Required for Genomic Medicine major)*
- BIOM 8200 - Selected Topics (for Partial Course Enrollment) (1 to 6 Credit Hours)
- BIOM 8215 - Fundamentals of Oncology I (2 Credit Hours)
- BIOM 8230 - Biology of Proteins in Disease (2 Credit Hours)
- BIOM 8240 - Introduction to Immunology and Infectious Disease (2 Credit Hours)

Major Courses: 30 Hours

- NURO 8082 - Neuroscience II (4 Credit Hours)
- NURO 9010 - Neuroscience Seminar (1 Credit Hour)
Upon entering the Neuroscience major, this course must be taken every Fall and Spring until admission to candidacy and dissertation requirements are complete.
- NURO 9210 - Investigation of a Problem in Neuroscience (1 to 12 Credit Hours)
Standard enrollment is 12 credit hours per semester
Upon entering the Neuroscience major, this course must be taken every semester until admission to candidacy requirements are complete.
- NURO 9300 - Research in Neuroscience (1 to 12 Credit Hours)
Standard enrollment is 12 credit hours per semester
Must be taken every semester after admission to candidacy until dissertation requirements are met.

Electives: 2 Hours Minimum

- ANAT 7040 - Graduate Neuroscience I (4 Credit Hours)
- ANAT 8060 - Visual Neuroscience (2 Credit Hours)
- NURO 8080 - Foundations of Leadership (1 Credit Hour)
- NURO 8310 - Advanced Topics in Neuroscience (1 Credit Hour)
- PHRM 8301 - Neuropharmacology (4 Credit Hours)

Upper-level courses in another discipline or biomedical science major not included on the pre-approved elective listing may be taken as an elective with formal, advanced approval from mentor, program director, The Graduate School (and Office of the Registrar) per the official approval and course substitution process and form submission.

Degree Total: 114-252 Hours

Term-by-Term Pathway

To outline and visualize the path from start to finish in this program, refer to the suggested Term-by-Term Pathway.

Doctor of Philosophy in Nursing

Program Overview

The Doctor of Philosophy (PhD) program in Nursing is aligned with national recommendations to prepare nurse scientists who design and implement research focused on solving pressing health challenges to optimize health and advance health equity into the future.

Emphasis is placed on mentoring students into fundable programs of research while mastering work with interdisciplinary teams via experiential research and leadership opportunities, grant writing, and innovative dissemination skills. Mastery of these skills, and development of new knowledge in a substantive specialty area will be applied to translate their research to affect policy and practice at all levels.

augusta.edu/programs/nursing-phd

Program Contact

Julie Zadinsky, PhD, MSS, RN, CIP
jzadinsky@augusta.edu

Progression and Graduation Requirements

- The PhD curriculum is not lock-step; students do not graduate as a class at the end of a specific semester. A minimum of three years full-time attendance (at least nine credit hours per semester) or four years part-time attendance (less than nine credit hours per semester) is required. The order of courses may vary.
- Students take NURS 9250 from the third semester in the program until they officially enter candidacy; then they take NURS 9300 for 3-9 hours each semester until graduation. A minimum of 18 dissertation credit hours (NURS 9300) is required over two semesters.
- The student's advisory committee may require more than the minimum number of elective credit hours in the student's area of concentration (AOC; minimum 17 elective credit hours, with 15 hours being in the student's AOC). AOC courses include NURS 9240 - Independent Study and NURS 9020 - Special Topics.
- Students can request approval for transfer of doctoral level courses into the PhD program.

Program Information

- Program Length: 4 Years to 7 Years
- CIP Code: 51.3899 - Registered Nursing, Nursing Administration, Nursing Research and Clinical Nursing, Other.
- Program Code: DPHIL_NURS

Degree Requirements

Core Courses

- NURS 8100 - Seminar in Academic Career Development (2 Credit Hours)
- NURS 8140 - Responsible Conduct of Research (1 Credit Hour)
- NURS 8170 - Scientific Grant Writing (3 Credit Hours)
- NURS 8300 - Nursing Education Practicum (1 to 6 Credit Hours)
- NURS 8500 - Philosophical Foundations of Nursing Science (3 Credit Hours)
- NURS 8510 - Theory Development for Health Inquiry (3 Credit Hours)
- NURS 8610 - Quantitative Research Designs and Methods (3 Credit Hours)
- NURS 8620 - Measurement in Health Research (3 Credit Hours)
- NURS 8650 - Qualitative Design and Analysis (3 Credit Hours)
- NURS 8660 - Research Residency (4 Credit Hours)
- STAT 7010 - Biostatistics I (3 Credit Hours)
- STAT 7020 - Biostatistics II (3 Credit Hours)

Area of Concentration Electives: 15 Hours

Research and Dissertation: 33 Hours

- NURS 9250 - Investigation of a Research Problem (1 to 12 Credit Hours) (*taken for 15 hours*)

- NURS 9300 - Dissertation (3 to 9 Credit Hours) *(taken for 18 hours)*

Degree Total: 81 Hours

Term-by-Term Pathway

To outline and visualize the path from start to finish in this program, refer to the suggested Term-by-Term Pathway.

Doctor of Philosophy in Oral Biology and Maxillofacial Pathology

Program Overview

The Oral Biology and Maxillofacial Pathology program focuses on biological processes that contribute to normal development and disease processes of the oro-facial complex. Based in the Dental College of Georgia, this interdisciplinary program spans the spectrum of biomedical sciences specialties to include anatomy, physiology, biochemistry, microbiology, pharmacology and pathology. The oral biology investigators have a wide range of research interests including oral cancer, bone metabolism, tissue regeneration, properties and biocompatibility of biomedical materials, oxidative stress and inflammation, diabetes and hypertension.

Doctor of Philosophy in Pharmacology

Program Overview

In Pharmacology and Toxicology, biology is queried to identify targets, drugs, and off-target toxicities to improve human health and combat disease. The faculty biology research interests are wide-ranging from cardiovascular to nervous systems. In these systems, the faculty study how healthy biology devolves into disease through conditions of aging, neurotoxin/alcohol exposure, hemorrhagic injury, cardiovascular/pulmonary disease, and cognitive function/decline. The molecular targets studied relate to mechanisms that control G protein coupled receptors, mitochondrial function, and transcriptomics that are applied in cell, mouse, and human systems. Courses of study are designed to meet the needs of individual students as applied to the pharmacologic discipline. Graduates have had successful employment in academics (research/teaching), pharmaceutical and biotechnology industries, and the private sector.

- BIOM 8240 - Introduction to Immunology and Infectious Disease (2 Credit Hours)

Major Courses

- PHRM 8042 - Pharmacology and Therapeutics I (3 Credit Hours)
- PHRM 8043 - Pharmacology and Therapeutics II (3 Credit Hours)
- PHRM 8301 - Neuropharmacology (4 Credit Hours) *(required for students engaging in neuroscience projects)* **Or**
- PHRM 8120 - Cardiovascular Physiology and Pharmacology (3 Credit Hours)
(required for students engaging in cardiovascular projects)
- PHRM 9090 - Pharmacology Journal Club (1 Credit Hour)
(Must be taken every Fall and Spring semester after joining the Pharmacology program and until dissertation requirements are met.)
- PHRM 9020 - Seminar in Pharmacology (1 Credit Hour) *(Must be taken every Fall and Spring semester until admission to candidacy and dissertation requirements are complete.)*
- PHRM 9210 - Investigation of a Problem (1 to 12 Credit Hours) *(Standard enrollment is 12 credit hours per semester. Upon entering the Pharmacology major, this course must be taken every semester until admission to candidacy requirements are complete.)*
- PHRM 9300 - Research (1 to 12 Credit Hours) *(Standard enrollment is 12 credit hours per semester. Must be taken every semester after admission to candidacy until dissertation requirements are met.)*

Note: An appropriate upper-level course may substituted for PHRM 8120 or PHRM 8301 (e.g., for students not engaging in cardiovascular or neuroscience projects) with prior pre-approval from student's mentor, advisory committee, program director, The Graduate School (and through Office of the Registrar) per the official approval and course substitution process and form submission.

Electives: 8 Hours

- PHRM 8120 - Cardiovascular Physiology and Pharmacology (3 Credit Hours)
- or PHRM 8301 - Neuropharmacology (4 Credit Hours) *
- BIOM 8130 - Scientific Grant Writing (1 Credit Hour)
- PHRM 5003 - Pharmacology Tutorial (4 Credit Hours)

** PHRM 8120 and PHRM 8301 may be taken and counted as electives IF the course has been not taken as a required course above. These courses cannot be "double counted" to fulfill both required and elective requirements (e.g., if PHRM 8120 is taken to fulfill the required course, then PHRM 8031 can be taken as an elective).*

Note: Upper-level courses in another discipline or biomedical science major not included on the pre-approved elective listing may be taken as an elective with formal, advanced approval from mentor, program director, The Graduate School (and Office of the Registrar) per the official approval and course substitution process and form submission.

Degree Total: 114-252 Hours

Term-by-Term Pathway

Doctor of Philosophy in Physiology

Program Overview

The physiology program integrates concepts and principles from all areas of medical science to understand function at the cell and molecular, tissue, organ systems and whole-animal levels. Faculty members have expertise in cardiovascular neural and endocrine physiology and collaborate extensively with faculty in other departments on campus. Students and faculty maintain a high national and international profile, with publications, awards, extramural funding and regular presentations at scientific meetings. We foster a spirit of collaboration that provides a virtually limitless ability to answer the most important questions in biomedicine.

Doctor of Philosophy in Vascular Biology

Program Overview

The vascular biology program is based in an interdisciplinary research center, the Vascular Biology Center, that includes core and associate faculty members from many clinical and basic science departments on campus. Research projects encompass studies ranging from the molecular and genetic level, to the regulation of cellular processes, to multi-cellular and organ system regulation, as well as to human studies. Research interests include topics related the permeability function of the retinal microvasculature, responses of endothelial and smooth muscle cells to injury, growth and proliferation of vascular cells, endothelial dysfunction in hypertension and cardiomyopathy, roles of vasoactive mediators in mammalian cell function, and signal transduction in vascular endothelial cells.

- VBIO 9010 - Seminar in Vascular Biology (1 Credit Hour) *(Upon entering the Vascular Biology major, this course must be taken every semester until admission to candidacy and dissertation requirements are complete.)*
- VBIO 9020 - Vascular Biology Journal Club (1 Credit Hour) *(Upon entering the Vascular Biology major, this course must be taken every semester until admission to candidacy and dissertation requirements are complete.)*
- VBIO 9210 - Investigation of a Problem in Vascular Biology (1 to 12 Credit Hours) *(Standard enrollment is 12 credit hours per semester. Upon entering the Vascular Biology major, this course must be taken every semester until admission to candidacy requirements are complete.)*
- VBIO 9300 - Research in Vascular Biology (1 to 12 Credit Hours) *(Standard enrollment is 12 credit hours per semester. Research must be taken every semester after admission to candidacy until dissertation requirements are met.)*

Electives: 3 Hours Minimum

- VBIO 8130 - Modern Drug Discovery and Development (3 Credit Hours)
- VBIO 8140 - Cell Signaling in Vascular Biology (2 Credit Hours)
- Advanced course in another discipline or biomedical science major (selections require approval from mentor and program director)

Degree Total: 114 - 252 Hours

Term-by-Term Pathway

To outline and visualize the path from start to finish in this program, refer to the suggested Term-by-Term Pathway.

Doctor of Physical Therapy

Program Overview

Physical therapy is a dynamic profession with an established theoretical and scientific base and widespread clinical applications in the restoration, maintenance, and promotion of optimal physical function.

Physical therapists are healthcare professionals that diagnose and manage movement dysfunction and enhance physical and functional abilities. Physical therapists (PTs) treat individuals of all ages, from newborns to the very oldest, who have medical problems or other health-related conditions that limit their abilities to move and perform functional activities in their daily lives.

An education in physical therapy allows individuals the opportunity to choose from a wide variety of career settings (including hospitals, private practices, educational institutions, work settings, nursing homes, and more). Physical therapists must be licensed in the state where they wish to practice. After completing an accredited doctoral physical therapy program, individuals must pass the National Physical Therapy Examination to become licensed.

Augusta University offers an 8-semester doctoral program in Physical Therapy, which includes 30 weeks of clinical experience.

Program Accreditation

The Doctor of Physical Therapy program at Augusta University is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE), 3030 Potomac Ave, Suite 100, Alexandria, Virginia 22305-3085.

Phone: 703-706-3245

Email: accreditation@apta.org

Admissions Information

See the College of Allied Health Sciences website for specific admissions information.

In addition to specific academic requirements, candidates for admission to the Doctor of Physical Therapy program must have aptitude, abilities, and skills in the following five areas in order to meet the full requirements of the program's curriculum.

- Sufficient intellectual capacity to fulfill the curricular requirements of the program
- Ability to effectively communicate with patients, colleagues, instructors and other members of the healthcare community
- Physical ability to learn and implement the various technical skills required to prepare for the independent practice of physical therapy
- Sufficient emotional stability to withstand the stress, uncertainties and changing circumstances that characterize healthcare practice
- Social attributes and behaviors required for full use of intellectual abilities and the development of mature, sensitive and effective therapeutic relationships with patients and clients

Progression and Graduation Requirements

- In addition to demonstrating personal characteristics appropriate for a health professions career, students must satisfy general and specific technical standards for this program. Review these requirements on the Physical Therapy admissions webpage.

Program Information

- Program Length: 8 semesters
- CIP Code: 51.2308
- Program Code: DPT_PHTP
- Major Code: PHTP

Degree Requirements

- CAHS 7500 - Clinical Anatomy (4 Credit Hours)
- CAHS 7550 - Clinical Anatomy and Physiology II (4 Credit Hours)
- PTHP 7105 - Clinical Physiology I (4 Credit Hours)
- PTHP 7110 - Kinesiology for Physical Therapy Practice (3 Credit Hours)
- PTHP 7115 - Foundational Skills in Physical Therapy I (4 Credit Hours)
- PTHP 7120 - Personal and Professional Leadership Development (1 Credit Hour)
- PTHP 7125 - Physical Therapy Seminar I (0 Credit Hours)
- PTHP 7200 - The Musculoskeletal Movement System I (6 Credit Hours)
- PTHP 7205 - Movement System Case Application I (1 Credit Hour)
- PTHP 7210 - Foundational Skills in Physical Therapy II (2 Credit Hours)
- PTHP 7215 - The Cardiovascular and Cardiopulmonary Movement Systems (3 Credit Hours)
- PTHP 7220 - Seminar II (0 Credit Hours)
- PTHP 7300 - The Musculoskeletal Movement System II (6 Credit Hours)
- PTHP 7305 - Movement System Case Application II (1 Credit Hour)
- PTHP 7310 - Health Promotion and Wellness in Physical Therapy (3 Credit Hours)
- PTHP 7315 - Evidence-Based Practice I (2 Credit Hours)
- PTHP 7320 - Physical Therapy Seminar III (0 Credit Hours)
- PTHP 8005 - The Integumentary and Endocrine Movement Systems (3 Credit Hours)
- PTHP 8010 - Motor Control and Movement Analysis (3 Credit Hours)
- PTHP 8015 - Evidence-Based Practice II (1 Credit Hour)
- PTHP 8020 - Leading in Physical Therapy (1 Credit Hour)
- PTHP 8025 - Physical Therapy Clinical Experience I (8 Credit Hours)
- PTHP 8030 - Physical Therapy Seminar IV (0 Credit Hours)
- PTHP 8105 - The Nervous Movement System I (6 Credit Hours)
- PTHP 8110 - Movement System Case Application III (1 Credit Hour)
- PTHP 8115 - Interactions of Multiple Body Movement Systems (3 Credit Hours)
- PTHP 8120 - The Musculoskeletal Movement System III (2 Credit Hours)
- PTHP 8125 - Geriatric Considerations in Patient Management (2 Credit Hours)
- PTHP 8230 - Evidence-Based Practice III (1 Credit Hour)
- PTHP 8235 - Physical Therapy Seminar 5 (0 Credit Hours)
- PTHP 8300 - The Nervous Movement System II (2 Credit Hours)
- PTHP 8310 - Movement System Case Application IV (1 Credit Hour)
- PTHP 8320 - Integrated Patient Management of Individuals with Acute and Critical Illness (3 Credit Hours)
- PTHP 8330 - Pediatric Considerations in Patient Management (3 Credit Hours)
- PTHP 8335 - Physical Therapy Practice Management (4 Credit Hours)
- PTHP 8340 - Physical Therapy Seminar VI (0 Credit Hours)
- PTHP 9000 - Physical Therapy Leadership Synthesis (1 Credit Hour)
- PTHP 9005 - Physical Therapy Seminar VII (0 Credit Hours)
- PTHP 9010 - Movement System Case Application V (1 Credit Hour)
- PTHP 9015 - Physical Therapy Clinical Experience II (12 Credit Hours)
- PTHP 9100 - Physical Therapy Clinical Experience III (12 Credit Hours)
- PTHP 9105 - Physical Therapy Leadership Actualization (1 Credit Hour)

Degree Total: 115 Hours

Term-by-Term Pathway

To outline and visualize the path from start to finish in this program, refer to the suggested Term-by-Term Pathway.

General Education/Core IMPACTS

From the origins of intellectual study to the present, general education has been a key to a fulfilling life of self-knowledge, self-reflection, critical awareness, and lifelong learning. General education has traditionally focused on oral and written communication, quantitative reasoning and mathematics, studies in culture and society, scientific reasoning, and aesthetic appreciation. Today, general education also assists students in their understanding of technology, information literacy, diversity, and global awareness. In meeting all these needs, general education provides college students with their best opportunity to experience the breadth of human knowledge and the ways that knowledge in various disciplines is interrelated. In the University System of Georgia, the general education program is known as the Core Curriculum.

The USG Core Curriculum, Core IMPACTS, is designed to ensure that students acquire essential knowledge in foundational academic areas and develop career-ready competencies. The attainment of Core IMPACTS learning outcomes prepares responsible, reflective citizens who adapt constructively to change. The Core IMPACTS requirements impart knowledge, values, skills, and behaviors related to critical thinking, logical problem-solving, teamwork, time management, informational literacy, inquiry and analysis, intercultural competence, persuasion, and ethical reasoning. Core IMPACTS includes opportunities for interdisciplinary learning and experiences that increase intellectual curiosity, providing the basis for advanced study in the variety of fields offered by today's colleges and universities.

As an institution of the University System of Georgia, Augusta University's faculty have carefully designed undergraduate programs which incorporate 60 hours of general education requirements approved by the Board of Regents of the University System of Georgia. The Core Curriculum provides some flexibility in which courses the student takes based on their individual interests; therefore, substitutions of courses from outside core curriculum or from other areas of the core curriculum are generally not permitted except under extraordinary circumstances.

Students should confer with their academic advisor to select the courses best suited for their intended major.

General Education Learning Outcomes

There are seven Core IMPACTS areas: Institutional Priority; **M**athematics and Quantitative Skills; **P**olitical Science and US History; **A**rts, Humanities, and Ethics; **C**ommunicating in Writing; **T**echnology, Mathematics, and Sciences; and **S**ocial Sciences.

institutional Priority

- Students will demonstrate the ability to think critically and solve problems related to academic priorities at their institution.

mathematics and Quantitative Skills

- Students will apply mathematical and computational knowledge to interpret, evaluate, and communicate quantitative information using verbal, numerical, graphical, or symbolic forms.

political Science and U.S. History

- Students will demonstrate knowledge of the history of the United States, the history of Georgia, and the provisions and principles of the United States Constitution and the Constitution of Georgia.

arts, Humanities, and Ethics

- Students will effectively analyze and interpret the meaning, cultural significance, and ethical implications of literary/philosophical texts in English or other languages, or of works in the visual/performing arts.

communication in Writing

- Students will communicate effectively in writing, demonstrating clear organization and structure, using appropriate grammar and writing conventions.
- Students will appropriately acknowledge the use of materials from original sources.
- Students will adapt their written communications to purpose and audience.
- Students will analyze and draw informed inferences from written texts.

technology, Mathematics, and Sciences

- Students will use the scientific method and laboratory procedures or mathematical and computational methods to analyze data, solve problems, and explain natural phenomena.

social Sciences

- Students will effectively analyze the complexity of human behavior, and how historical, economic, political, social, or geographic relationships develop, persist, or change.

Core IMPACTS Requirements

Institutional Priority (Institution): 4 Hours

Academic Inquiry: 1 Hour

- INQR 1000 - Fundamentals of Academic Inquiry (1 Credit Hour)

Communication: 3 Hours

- COMM 1110 - Public Speaking (3 Credit Hours)

Mathematics and Quantitative Skills (Mathematics): 3 Hours

Students must enroll in a Mathematical and Quantitative Skills course, depending on placement, in their first semester at Augusta University unless they have received equivalent credit for a course via transfer or credit for prior learning. Students must continue to register for Mathematical and Quantitative Skills courses each successive semester until they have completed an appropriate course with a successful grade depending on degree requirements. Mathematical and Quantitative Skills courses should be completed within the first 30 hours of a student's undergraduate degree program.

Option I - Non-Science Majors:

Select one of the following:

- MATH 1001 - Quantitative Reasoning (3 Credit Hours) *(Not every Non-Science major can use this course. Please consult academic advisor for the appropriate course.)*
- MATH 1111 - College Algebra (3 Credit Hours)
- MATH 1113 - Precalculus Mathematics (3 Credit Hours)
- MATH 1401 - Elementary Statistics (3 Credit Hours)
- MATH 1401H - Honors: Elementary Statistics (3 Credit Hours)
- MATH 2011 - Calculus and Analytical Geometry I (4 Credit Hours) *(Note: 4th hour counted in non-core 60 hours.)*
- MATH 2011H - Honors: Calculus and Analytical Geometry I (4 Credit Hours) *(Note: 4th hour counted in non-core 60 hours.)*

Option II - Science Majors:

Applies to Biology, Chemistry, Computer Science, Mathematics, and Physics majors.

Select one of the following:

- MATH 1113 - Precalculus Mathematics (3 Credit Hours)
- MATH 2011 - Calculus and Analytical Geometry I (4 Credit Hours) *(Note: 4th hour counted in Field of Study Area or non-core 60 hours)*
- MATH 2011H - Honors: Calculus and Analytical Geometry I (4 Credit Hours) *(Note: 4th hour counted in Field of Study Area or non-core 60 hours)*

Option III - Health Science Majors:

Select one of the following:

- MATH 1111 - College Algebra (3 Credit Hours) *(Not every Health Science major can use this course; please consult with academic advisor for the appropriate course)*
- MATH 1113 - Precalculus Mathematics (3 Credit Hours)
- MATH 2011 - Calculus and Analytical Geometry I (4 Credit Hours) *(Note: 4th hour counted in Field of Study Area or non-core 60 hours)*
- MATH 2011H - Honors: Calculus and Analytical Geometry I (4 Credit Hours) *(Note: 4th hour counted in Field of Study Area or non-core 60 hours)*

Political Science and U.S. History (Citizenship): 6 Hours

Political Science: 3 Hours

- POLS 1101 - Introduction to American Government (3 Credit Hours)

History: 3 Hours

Select one of the following:

- HIST 2111 - United States to 1877 (3 Credit Hours)
- HIST 2112 - United States Since 1877 (3 Credit Hours)

Arts, Humanities, and Ethics (Humanities): 6 Hours

Select two of the following:

- ARAB 1001 - Elementary Modern Standard Arabic I (4 Credit Hours)
- ARAB 1002 - Elementary Modern Standard Arabic II (4 Credit Hours)
- ARAB 2001 - Intermediate Modern Standard Arabic I (4 Credit Hours)
- ARAB 2002 - Intermediate Modern Standard Arabic II (4 Credit Hours)
- ART 2010 - The Marvel of Art (3 Credit Hours)
- CHNS 1001 - Elementary Chinese I (3 Credit Hours)
- CHNS 1002 - Elementary Chinese II (3 Credit Hours)
- CHNS 2001 - Intermediate Chinese I (3 Credit Hours)
- CHNS 2002 - Intermediate Chinese II (3 Credit Hours)
- ENGL 2060 - Introduction to Literature (3 Credit Hours)
- ENGL 2111 - World Literature I (3 Credit Hours)
- ENGL 2112 - World Literature II (3 Credit Hours)
- ENGL 2121 - British Literature I (3 Credit Hours)
- ENGL 2122 - British Literature II (3 Credit Hours)
- ENGL 2131 - American Literature I (3 Credit Hours)

- ENGL 2132 - American Literature II (3 Credit Hours)
- FILM 1100 - Film Appreciation (3 Credit Hours)
- FREN 1001 - Elementary French I (3 Credit Hours)
- FREN 1002 - Elementary French II (3 Credit Hours)
- FREN 2001 - Intermediate French I (3 Credit Hours)
- FREN 2002 - Intermediate French II (3 Credit Hours)
- GRMN 1001 - Elementary German I (3 Credit Hours)
- GRMN 1002 - Elementary German II (3 Credit Hours)
- GRMN 2001 - Intermediate German I (3 Credit Hours)
- GRMN 2002 - Intermediate German II (3 Credit Hours)
- HUMN 2010 - Human Experience and Meaning (3 Credit Hours)
- MUSI 2320 - Rock n' Roll and Society (3 Credit Hours)
- MUSI 2340 - Music of the Spheres (3 Credit Hours)
- MUSI 2350 - The World of Film Music (3 Credit Hours)
- PHIL 2010 - Introduction to Philosophy (3 Credit Hours)
- PHIL 2020 - Introduction to Critical Thinking (3 Credit Hours)
- PHIL 2030 - Introduction to Ethics (3 Credit Hours)
- SPAN 1001 - Elementary Spanish I (3 Credit Hours)
- SPAN 1002 - Elementary Spanish II (3 Credit Hours)
- SPAN 2001 - Intermediate Spanish I (3 Credit Hours)
- SPAN 2002 - Intermediate Spanish II (3 Credit Hours)
- THEA 1100 - Theatre Appreciation (3 Credit Hours)

Communicating in Writing (Writing): 6 Hours

A grade of C or better is required in all Communicating in Writing area courses.

Students must enroll in ENGL 1101 in their first semester at Augusta University, unless they have received equivalent credit for the course via transfer or credit for prior learning. Students must continue to register for ENGL 1101 each successive semester until they have completed the course with a grade of C or better.

Students who complete ENGL 1101 must then enroll in ENGL 1102 no later than the first semester in which they enroll following completion of ENGL 1101. Students must continue to register for ENGL 1102 each successive semester until they have completed the course with a grade of C or better.

Both ENGL 1101 and ENGL 1102 should be completed within the first 30 hours of a student's undergraduate degree program.

- ENGL 1101 - College Composition I (3 Credit Hours) or ENGL 1101H - Honors College Composition I (3 Credit Hours)
- ENGL 1102 - College Composition II (3 Credit Hours) or ENGL 1102H - Honors College Composition II (3 Credit Hours)

Technology, Mathematics, and Sciences (STEM): 11 Hours

Option I - Non-Science Majors:

Laboratory Course Sequences: 8 Hours

Select two of the following:

- 1) ANTH 1105 - Introduction to Biological Anthropology (3 Credit Hours) and ANTH 1105L - Introduction to Biological Anthropology Laboratory (1 Credit Hour)
- 2) ASTR 1000 - Introduction to the Universe (4 Credit Hours)
- 3) BIOL 1101 - Fundamentals of Biology (3 Credit Hours) and BIOL 1101L - Fundamentals of Biology Laboratory (1 Credit Hour)
or BIOL 1107 - Principles of Biology I (3 Credit Hours) and BIOL 1107L - Principles of Biology I Laboratory (1 Credit Hour)
- 4) BIOL 1102 - Environmental Biology (3 Credit Hours) and BIOL 1102L - Environmental Biology Laboratory (1 Credit Hour)

- or BIOL 1108 - Principles of Biology II (3 Credit Hours) and BIOL 1108L - Principles of Biology II Laboratory (1 Credit Hour)
- 5) CHEM 1151 - Survey of Chemistry I (4 Credit Hours)
or CHEM 1211 - Principles of Chemistry I (3 Credit Hours) and CHEM 1211L - Principles of Chemistry I Laboratory (1 Credit Hour)
- 6) CHEM 1152 - Survey of Chemistry II (4 Credit Hours)
or CHEM 1212 - Principles of Chemistry II (3 Credit Hours) and CHEM 1212L - Principles of Chemistry II Laboratory (1 Credit Hour)
- 7) GEOG 1112 - Introduction to Weather and Climate (4 Credit Hours)
- 8) GEOL 1121 - Introductory Geosciences I: Physical Geology (4 Credit Hours)
- 9) GEOL 1122 - Introductory Geosciences II: Historical Geology (4 Credit Hours)
- 10) PHSC 1011 - Physical Science (4 Credit Hours)
- 11) PHYS 1111 - Introductory Physics I (3 Credit Hours) and PHYS 1111L - Introductory Physics I Laboratory (1 Credit Hour)
or PHYS 2211 - Principles of Physics I (4 Credit Hours)
- 12) PHYS 1112 - Introductory Physics II (3 Credit Hours) and PHYS 1112L - Introductory Physics II Laboratory (1 Credit Hour)
or PHYS 2212 - Principles of Physics II (4 Credit Hours)

Additional Technology, Mathematics, or Science Course: 3 Hours

Select one additional course from those listed above or from the following:

- CHEM 1100 - Introductory Chemistry: Selected Topics (3 Credit Hours)
- DATA 1501 - Introduction to Data Science (3 Credit Hours)
- MATH 1113 - Precalculus Mathematics (3 Credit Hours)
- MATH 1401 - Elementary Statistics (3 Credit Hours)
- MATH 2011 - Calculus and Analytical Geometry I (4 Credit Hours) *(Note: 4th credit hour counted in non-core 60 hours)*
- MATH 2012 - Calculus and Analytical Geometry II (4 Credit Hours) *(Note: 4th credit hour counted in non-core 60 hours)*
- PHYS 1010 - Fundamentals of Physics: Selected Topics (3 Credit Hours)

Option II - Science Majors:

Laboratory Course Sequence: 8 Hours

Select one of the following laboratory course sequences:

Principles of Biology

- BIOL 1107 - Principles of Biology I (3 Credit Hours)
- BIOL 1107L - Principles of Biology I Laboratory (1 Credit Hour)
- BIOL 1108 - Principles of Biology II (3 Credit Hours)
- BIOL 1108L - Principles of Biology II Laboratory (1 Credit Hour)

Principles of Chemistry

- CHEM 1211 - Principles of Chemistry I (3 Credit Hours)
- CHEM 1211L - Principles of Chemistry I Laboratory (1 Credit Hour)
- CHEM 1212 - Principles of Chemistry II (3 Credit Hours)
- CHEM 1212L - Principles of Chemistry II Laboratory (1 Credit Hour)

Introductory Physics

- PHYS 1111 - Introductory Physics I (3 Credit Hours)

- PHYS 1111L - Introductory Physics I Laboratory (1 Credit Hour)
- PHYS 1112 - Introductory Physics II (3 Credit Hours)
- PHYS 1112L - Introductory Physics II Laboratory (1 Credit Hour)

Principles of Physics

- PHYS 2211 - Principles of Physics I (4 Credit Hours)
- PHYS 2212 - Principles of Physics II (4 Credit Hours)

Mathematics Course: 3 Hours

Select one of the following:

- MATH 2011 - Calculus and Analytical Geometry I (4 Credit Hours) (Note: 4th hour counted in Field of Study Area or non-core 60 hours)
- MATH 2012 - Calculus and Analytical Geometry II (4 Credit Hours) (Note: 4th hour counted in Field of Study Area or non-core 60 hours)
- MATH 1401 - Elementary Statistics (3 Credit Hours) (This option is only available to Biology majors)

Option III - Health Science Majors:

For all health science majors, with the exception of the Bachelor of Science in Health Information Administration, which follows Option I.

Laboratory Course Sequence: 8 Hours

Select one of the following laboratory course sequences:

Introduction to Biology

- BIOL 1101 - Fundamentals of Biology (3 Credit Hours)
- BIOL 1101L - Fundamentals of Biology Laboratory (1 Credit Hour)
- BIOL 1102 - Environmental Biology (3 Credit Hours)
- BIOL 1102L - Environmental Biology Laboratory (1 Credit Hour)

Principles of Biology

- BIOL 1107 - Principles of Biology I (3 Credit Hours)
- BIOL 1107L - Principles of Biology I Laboratory (1 Credit Hour)
- BIOL 1108 - Principles of Biology II (3 Credit Hours)
- BIOL 1108L - Principles of Biology II Laboratory (1 Credit Hour)

Survey of Chemistry

- CHEM 1151 - Survey of Chemistry I (4 Credit Hours)
- CHEM 1152 - Survey of Chemistry II (4 Credit Hours)

Principles of Chemistry

- CHEM 1211 - Principles of Chemistry I (3 Credit Hours)
- CHEM 1211L - Principles of Chemistry I Laboratory (1 Credit Hour)
- CHEM 1212 - Principles of Chemistry II (3 Credit Hours)
- CHEM 1212L - Principles of Chemistry II Laboratory (1 Credit Hour)

Introductory Physics

- PHYS 1111 - Introductory Physics I (3 Credit Hours)
- PHYS 1111L - Introductory Physics I Laboratory (1 Credit Hour)
- PHYS 1112 - Introductory Physics II (3 Credit Hours)
- PHYS 1112L - Introductory Physics II Laboratory (1 Credit Hour)

Principles of Physics

- PHYS 2211 - Principles of Physics I (4 Credit Hours)
- PHYS 2212 - Principles of Physics II (4 Credit Hours)

Additional Mathematics or Science Course: 3 Hours

Select one additional course from those listed above or from the following:

- CHEM 1100 - Introductory Chemistry: Selected Topics (3 Credit Hours)
- MATH 1113 - Precalculus Mathematics (3 Credit Hours)
- MATH 1401 - Elementary Statistics (3 Credit Hours)
- MATH 2011 - Calculus and Analytical Geometry I (4 Credit Hours) (Note: 4th hour counted in non-core 60 hours)
- MATH 2012 - Calculus and Analytical Geometry II (4 Credit Hours) (Note: 4th hour counted in non-core 60 hours)
- PHYS 1010 - Fundamentals of Physics: Selected Topics (3 Credit Hours)

Social Sciences (Social Sciences): 6 Hours

First Social Science Course: 3 Hours

Select one of the following:

- ANTH 2011 - Cultural Anthropology (3 Credit Hours)
- ECON 1101 - Economics of Financial Literacy (3 Credit Hours)
- PSYC 1101 - Introduction to General Psychology (3 Credit Hours)
- SOCI 1101 - Introduction to Sociology (3 Credit Hours)

Second Social Science Course: 3 Hours

Select one of the following not already taken above:

- ANTH 1102 - Introductory Anthropology (3 Credit Hours)
- ANTH 2011 - Cultural Anthropology (3 Credit Hours)
- ECON 1101 - Economics of Financial Literacy (3 Credit Hours)
- ECON 1810 - Introduction to Economics (3 Credit Hours)
- ECON 2105 - Macroeconomics (3 Credit Hours)
- ECON 2106 - Microeconomics (3 Credit Hours)
- GEOG 1111 - World Geography (3 Credit Hours)
- HIST 1111 - Pre-Modern World Civilization (3 Credit Hours)
- HIST 1112 - Modern World Civilization (3 Credit Hours)
- HIST 2111 - United States to 1877 (3 Credit Hours)
- HIST 2112 - United States Since 1877 (3 Credit Hours)
- POLS 2401 - Introduction to Global Issues (3 Credit Hours)
- PSYC 1101 - Introduction to General Psychology (3 Credit Hours)
- PSYC 2150 - Introduction to Human Diversity (3 Credit Hours)
- SOCI 1101 - Introduction to Sociology (3 Credit Hours)

- SOCI 1160 - Social Problems Analysis (3 Credit Hours)
- SOCI 2241 - Social and Cultural Diversity (3 Credit Hours)
- SOWK 1101 - Introduction to Social Work Practices (3 Credit Hours)

Core IMPACTS Total: 42 Hours

Field of Study: 18 Hours

The "Field of Study" requirement refers to courses taken by students that are directly related to their chosen major and are part of their general education curriculum. These courses are usually taken during the first two years of their degree program, alongside the Core IMPACTS courses. See specific undergraduate degree programs for details and requirements.

Core IMPACTS + Field of Study Total: 60 Hours

Honors Program

Program Overview

The Augusta University Honors Program offers motivated students the opportunity to pursue a program of study that leads to recognition as either an Augusta University Honors Program graduate or an Augusta University Honors scholar. The honors program offers sections of core courses specifically designed for able and energetic learners, seminars that cross the boundaries of discipline and/or culture, the faculty and administrative support to produce an honors thesis in the student's academic field and support for the students to present their research at appropriate academic or professional venues. The honors program is not a separate degree program but is designed to augment the coursework required for a degree and to prepare capable students for graduate and professional schools and challenging career paths. In most cases, honors courses can be substituted for required credits.

The Honors Professional (HONP) track provides scholarly engagement for outstanding students who seek to graduate from majors that do not readily allow for a traditional honors thesis project, such as those in the Hull College of Business or the School of Computer and Cyber Sciences, or 2 + 2 programs such as Nursing, Clinical Laboratory Sciences, Dental Hygiene, Nuclear Medicine Technology and Respiratory Therapy. The goals of the HONP track are to promote students' intellectual development in these fields, to stimulate their scholarly creativity and to develop their communication, presentation and problem-solving skills.

augusta.edu/honors

Honors Program Classes

Honors classes differ in kind from other classes. They are usually smaller; they involve more interaction with primary materials; and they encourage both independent work and collaboration among students and between students and professors. Honors classes ask students to explore course work more actively and intensively, but students are not evaluated on a more demanding grading scale than in other courses, nor should they require more work than non-honors sections.

Recognition

The diplomas and transcripts of graduating honors students who complete all program requirements carry the designation of Honors Program Graduate, Honors Scholar, or Honors Professional. Honors Program graduates also receive an honors cord, an honors stole, an honors medallion, and an honors pin to wear at graduation. Honors scholars also receive honors cords and an honors stole to wear at graduation. Students who earn honors professional distinction also receive an honors stole and an honors pin to wear at graduation. All students who complete an honors track will be recognized in the graduation program.

Program Contact

Tim Sadenwasser, Director of Honors Program
706-729-2083
honorsprogram@augusta.edu

Program Affiliation

The honors program is affiliated with the National Collegiate Honors Council, the Southern Regional Honors Council, and the Georgia Collegiate Honors Council, making available to interested students a variety of honors opportunities locally and nationwide.

Admissions Information and Eligibility

Honors Program Graduate Track

Students may seek entry into the honors program by submitting a completed online application to the honors program.

Entering Freshmen are invited to apply to join the Augusta University Honors Program if they:

- Carry a cumulative high school GPA of 3.5 or better

Students Already Enrolled at Augusta University will be eligible to apply for admission to the honors program if they have:

- Completed 12 credit hours of academic work
- An overall GPA of 3.4

Transfer Students will be eligible to apply for admission to the honors program if they bring:

- An unadjusted 3.4 GPA on at least 12 credit hours of coursework from another institution

Once admitted to the honors program, students transferring from another institution's honors program may count honors program hours completed at their previous institution(s) toward completing honors requirements.

To be able to complete program requirements without taking several additional courses, students should seek acceptance into the program and begin taking honors courses early in their careers.

Honors Scholars Track

Students may seek entry into the Honors Scholars track by submitting a completed online application to the honors program.

Entering Freshmen are invited to apply to join the Honors Scholars track if they have:

- Completed 24 or more credit hours of academic work
- Cumulative high school GPA of 3.5 or better and a GPA of at least 3.3 in any college courses

Students Already Enrolled at Augusta University are invited to join the Honors Scholars track if they have:

- Completed between 24 and 45 credit hours of academic work
- Have an overall GPA of 3.4 or better

Transfer Students are eligible to apply for admission to the Honors Scholars Track if they have:

- An unadjusted overall GPA of 3.4 or better on between 24 and 45 semester hours of coursework from another institution

Once admitted to the honors program, students transferring from another institution's honors program may count honors program hours completed at their previous institution(s) toward completing honors requirements.

Honors Professional Track

Admission to the Honors Professional Track is open to students from majors that do not readily allow for a traditional honors thesis project, including 2 + 2 programs such as Nursing, Clinical Laboratory Sciences, Dental Hygiene, Nuclear Medicine Technology, and Respiratory Therapy.

Entering Freshmen who meet the following criteria are eligible for membership in the Honors Professional Track:

- Cumulative high school GPA of 3.5 or better and a GPA of at least 3.3 in any college courses
- Declared major in qualifying college or department

Transfer Students or **Students Already Enrolled** at Augusta University who meet the following criteria are eligible for membership in the Honors Professional Track:

- Overall college GPA of 3.3 or better
- Declared major in qualifying college or department

Progression and Graduation Requirements

Honors Program Graduate Track

To earn recognition as an Honors Program Graduate, a student accepted into the program must complete the requirements below—totaling at least 26 hours—and have an overall GPA of 3.3 or better. Should the GPA drop below the required 3.3, the student will be allowed to continue in the program on probationary status as long as the GPA does not drop below 3.0.

Freshman/Sophomore Requirement: 16 Hours

- 16 hours of honors sections of core courses
- Students may substitute one hour of a departmental undergraduate research course for one hour of honors core coursework.
- Students must earn a grade of "C" or better (or "S" for pass/fail courses) to gain honors credit for core coursework

Junior/Senior Requirement:

- HONR 3900H - Honors: Breaking Boundaries (2 to 3 Credit Hours)
- One upper division honors elective to be selected from the following: (3 semester hours)
 - a second section of HONR 3900H - Honors: Breaking Boundaries (2 to 3 Credit Hours),
 - a departmental honors course (a departmentally approved independent study or a regular departmental offering with an additional honors component), or
 - an approved honors alternative

Honors Thesis Sequence

Usually begun in the junior year and completed by the end of student's final semester:

- HONR 3999H - Honors: Thesis Prospectus (1 Credit Hour)
- HONR 4000H - Honors Thesis (2 to 3 Credit Hours)
- HONR 4500H - Honors Capstone (1 Credit Hour)

Honors Scholars Track

To earn recognition as an Honors Scholar, a student accepted into the program must complete the requirements below—totaling at least 18 hours—and have an overall GPA of 3.3 or better. Should the GPA drop below the required 3.3, the student will be allowed to continue in the program on probationary status as long as the GPA does not drop below 3.0.

Freshman/Sophomore Requirement: 0-6 Hours

- Students may substitute one hour of a departmental undergraduate research course for one hour of honors core coursework.
- 0-6 hours of honors sections of core courses
- Students must earn a grade of "C" or better to gain honor credit for core coursework

Junior/Senior Requirement: 6-12 Hours

- HONR 3900H - Honors: Breaking Boundaries (2 to 3 Credit Hours)
- 1-3 upper division honors electives to be selected from the following (3-9 semester hours):
 - One or more additional section of HONR 3900H - Honors: Breaking Boundaries (2 to 3 Credit Hours)
 - One or more departmental honors option course (a departmentally approved independent study or a regular departmental offering with an additional honors component approved by the honors program)

- No more than one approved honors alternative

Undergraduate Research Requirement: 0-1 Hour

One hour of a departmental undergraduate research course or one semester of a CURS undergraduate research course.

Honors Thesis Sequence

Usually begun in the sophomore or junior year and completed by the end of student's final semester.

- HONR 3999H - Honors: Thesis Prospectus (1 Credit Hour)
- HONR 4000H - Honors Thesis (2 to 3 Credit Hours)
- HONR 4500H - Honors Capstone (1 Credit Hour)

Honors Professional Track

Students in good standing on the HONP track receive the following benefits:

- Retain priority registration privileges
- Receive upon graduation: Honors Professional track distinction on transcript and diploma, graduation regalia from the honors program, and recognition in the graduation program

To earn distinction as a graduate of the HONP track, a student must be a member in good standing of the Augusta University Honors Program, have an overall GPA of 3.30 or better and complete the requirements below.

Freshman/Sophomore Requirement: minimum 18 Hours

- 18 or more hours with a grade of "C" or better of honors coursework
 - At least 12 of these 18 hours must be from sections of honors sections of core courses or alternatives approved by the honors program
 - At least 3 of these 18 hours must be from HONR 3900H - Honors: Breaking Boundaries courses or alternatives approved by the honors program
 - 3 of these 18 hours may be from either honors sections of core courses, from HONR 3900H - Honors: Breaking Boundaries courses or from alternatives approved by the honors program
- One presentation at Georgia Collegiate Honors Council conference or similar academic or professional presentation venue approved by the honors program

Junior/Senior Requirement:

- At least one presentation of major-related material at an honors, undergraduate research or professional conference approved by the honors program
- Submit the application to graduate from the HONP track to the honors program by midterm of the semester preceding the semester of graduation

Master of Arts in Intelligence and Security Studies

Program Overview

The Master of Arts in Intelligence and Security Studies (MAISS) prepares students and industry leaders to address the intelligence and security challenges in an interconnected world.

The coursework is focused on inter and intrastate conflict, terrorism and counter-terrorism, and national, regional, and global strategic security and cybersecurity threats. The program prepares students for careers in the areas of strategic security policy, intelligence analysis, and for advancement in military, law enforcement, and academia.

The program seeks to expose military members, future decision makers and analysts, and students considering a PhD to the security challenges inherent in a rapidly changing world. Our program has a special emphasis on the causes and effects of interstate and intrastate conflict, the sources of terrorism, terrorism and counterterrorism strategies, and security issues that affect national, regional, and global security.

It is the responsibility of the student to maintain contact with the program coordinator to insure the proper selection and sequence of courses and completion of the thesis/capstone for the MAISS program.

Program Information

- Program Length: 2 Years
- CIP Code: 45.1001
- Program Code: 1MA-INSC

Degree Requirements

Major Courses: 18 Hours

- SECR 6600 - Research Design and Writing for Intelligence and Security Studies (3 Credit Hours)
- SECR 6910 - International Relations Theory (3 Credit Hours)
- SECR 6911 - Introduction to Security Studies (3 Credit Hours)

- SECR 6351 - Homeland Security (3 Credit Hours)
- or SECR 6650 - National Security and Public Policy (3 Credit Hours)

- SECR 6411 - Introduction to Intelligence Studies (3 Credit Hours)
- or SECR 6980 - Introduction to Cyber Intelligence and Cybersecurity Policy (3 Credit Hours)

- SECR 6906 - Terrorism Studies (3 Credit Hours)
- or SECR 6809 - Ethnic Conflict and Political Violence (3 Credit Hours)
- or SECR 6810 - The Politics of Islam and International Security (3 Credit Hours)

Electives: 12 Hours

Select from the following:

- PADM 6020 - Geographic Information Systems for Public Management (3 Credit Hours)
- PADM 6150 - Leadership and Ethics (3 Credit Hours)
- SECR 6168 - Cross-Cultural Security and Psychology (3 Credit Hours)

- SECR 6412 - Intelligence Collection (3 Credit Hours)
- SECR 6413 - Open-Source Intelligence (3 Credit Hours)
- SECR 6414 - Public Health and Medical Intelligence: Security and Civilian Principles and Applications (3 Credit Hours)
- SECR 6415 - Intelligence Analysis (3 Credit Hours)
- SECR 6650 - National Security and Public Policy (3 Credit Hours)
- SECR 6809 - Ethnic Conflict and Political Violence (3 Credit Hours)
- SECR 6810 - The Politics of Islam and International Security (3 Credit Hours)
- SECR 6813 - Environmental Issues in International Security (3 Credit Hours)
- SECR 6814 - Space and International Security (3 Credit Hours)
- SECR 6815 - Weapons of Mass Destruction and International Security (3 Credit Hours)
- SECR 6912 - Counterterrorism Studies (3 Credit Hours)
- SECR 6913 - Critical Security Studies (3 Credit Hours)
- SECR 6914 - Future Wars (3 Credit Hours)
- SECR 6915 - The Economics of International Security (3 Credit Hours)
- SECR 6917 - Democracy and Conflict (3 Credit Hours)
- SECR 6918 - Stability and Peacekeeping Operations (3 Credit Hours)
- SECR 6919 - The Psychology of Terrorism (3 Credit Hours)
- SECR 6920 - Weaponizing Information: The History and Theory of Propaganda (3 Credit Hours)
- SECR 6950 - Selected Topics in Intelligence and Security Studies (3 Credit Hours)
- SECR 6980 - Introduction to Cyber Intelligence and Cybersecurity Policy (3 Credit Hours)
- SECR 6981 - Cyber Conflict: History and Theory of Cyber War (3 Credit Hours)
- SECR 6982 - Information Warfare (3 Credit Hours)
- SECR 6983 - Hybrid Warfare (3 Credit Hours)
- SECR 7000 - Directed Readings in Intelligence and Security Studies (0 to 6 Credit Hours)

Capstone/Thesis: 6 Credit Hours

Select one of the following options:

Option 1: Capstone

- SECR 6997 - Capstone (0 to 6 Credit Hours)

Option 2: Thesis

- SECR 6998 - Thesis I (3 Credit Hours)
- SECR 6999 - Thesis II (3 Credit Hours)

Option 3: SECR Courses

- SECR 6916 - The Causes and Prevention of War (3 Credit Hours)
- SECR 6XXX or 7XXX (3 Credit Hours)

Degree Total: 36 Hours

Master of Arts in Intelligence and Security Studies with a Concentration in Social Influence

Program Overview

This plan of study is for a specific concentration within the Master of Arts in Intelligence and Security Studies. It is meant to teach the student how social influence and persuasion works, specifically focusing on different aspects of information warfare and data collection. The concentration teaches how strategic adversaries have targeted propaganda campaigns against the United States as well as cross-

cultural comparisons. When possible, the courses will also focus on case-studies of US adversaries to understand strategic comparative advantage concerning social influence campaigns. This concentration is interdisciplinary and collaborative in nature, teaching the social science of influence campaigns combined with modules on communication, history, intelligence studies, and socio-psychological aspects of group behavior and decision-making. The concentration is aimed at understanding the human element of cyber-operations involving social influence including social media warfare.

Master of Arts in Intelligence and Security Studies with a Concentration in Technical Intelligence Analysis

Program Overview

The Technical Intelligence Analysis Concentration prepares students to analyze the full lifecycle of foreign and domestic intelligence threats using the most effective structured analytical techniques and data analysis tools. Skills learned include but are not limited to, open-source collection, social media intelligence, and data analytics. The concentration focuses on giving students the tools necessary to begin or enhance their careers in the United States Intelligence Community. Courses in this concentration rely on a practical approach to the curricula to better develop relevant skills; therefore, priority is given to using real-world case studies and curated data sets. Students will be able to apply these skills toward the production of innovative and cogent assessments to complex problems existing within the US geostrategic landscape. This concentration is fully online, asynchronous, and can be completed in one year. It is a 10-course, 30 credit-hour degree concentration offered by Augusta University Online.

Admissions Information

For more information on admissions requirements, please visit the Office of Admissions website.

Progression and Graduation Requirements

- Students must successfully pass BOTH Test I and Test II (001 & 002) of the GACE Content Assessments for Early Childhood prior to Culminating Residency
- If the State Certification Exam is passed and is deemed to be satisfactory. Areas of content weakness will be addressed as prerequisites as determined by the appropriate Pamplin College of Arts and Sciences departments.
- MATH 5241 must be completed prior to MATH 5242
- Must complete Ethics 360 Exit Assessment
- To graduate, students must have an overall 2.8 GPA and earn a C or better in all courses toward the degree

Program Information

- Program Length: 2 Years
- CIP Code: 13.0101
- Program Code: 1MAT-MAT
- Major Code: MAT
- Concentration Code: ELEM

Certification Requirements

- SPED 5002 - Instructional Strategies for Teaching Students with Disabilities in General Education Settings (3 Credit Hours)
- Successful completion of State Certification Exam (GACE II)

Degree Requirements: 39 Hours

Major Courses: 15 Hours

- EDTD 5364 - Planning for Instruction (3 Credit Hours)
- EDTD 5381 - Assessment and Differentiation (3 Credit Hours)
- EDTD 5491 - Classroom Management Techniques and Strategies (3 Credit Hours)
- EDTD 5910 - MAT Culminating Residency (4 Credit Hours) (*GACE II Content Tests must be successfully completed as a prerequisite*)

- EDTD 5940 - Foundations of Reading Seminar (2 Credit Hours)

Concentration Courses: 24 Hours

- EDTD 5221 - Best Practices in Language Arts Education (3 Credit Hours)
- EDTD 5231 - Best Practices in Social Science Education (3 Credit Hours)
- EDTD 5241 - Best Practices in Mathematics Education (3 Credit Hours)
- EDTD 5251 - Best Practices in Science Education (3 Credit Hours)
- EDTD 5274 - Introduction to Literacy (3 Credit Hours)
- EDTD 5275 - Introduction to Literacy Assessment (3 Credit Hours)
- MATH 5241 - Numbers and Operations for Teachers (3 Credit Hours)
- MATH 5242 - Geometry and Measurement for Teachers (3 Credit Hours)

Degree Total: 39 Hours

Master of Arts in Teaching with a Concentration in Middle Grades Education

Program Overview

Progression and Graduation Requirements

- Students must successfully pass BOTH GACE Content Exams (011, 013, 014, or 015) prior to Culminating Residency
- To graduate, students must have an overall 2.8 GPA and earn a C or better in all courses toward the degree

Program Information

- Program Length: 2 Years
- CIP Code: 13.0101
- Program Code: 1MAT-MAT
- Major Code: MAT
- Concentration Code: MIDD

Certification Requirements:

- SPED 3002 - Teaching Students with Disabilities in the Inclusive Classroom (3 Credit Hours)

Successful completion of State Certification Exams (GACE II) in one area of concentration:

- (011) Middle Grades Language Arts

- (013) Middle Grades Mathematics
- (014) Middle Grades Science
- (015) Middle Grades Social Studies

Degree Requirements: 36 Hours

Major Courses: 15 Hours

- EDTD 5364 - Planning for Instruction (3 Credit Hours)
- EDTD 5381 - Assessment and Differentiation (3 Credit Hours)
- EDTD 5491 - Classroom Management Techniques and Strategies (3 Credit Hours)
- EDTD 5910 - MAT Culminating Residency (4 Credit Hours) (*GACE II Content Tests must be successfully completed as a prerequisite*)
- EDTD 5940 - Foundations of Reading Seminar (2 Credit Hours)

Concentration Courses: 18 Hours

15 hours of undergraduate content in each concentration area are required, with at least nine of those hours at the junior (3000) level or higher. Areas of content weakness will be addressed as prerequisites.

State Certification Exams (GACE II) in one content area must be passed prior to student teaching.

- EDUC 5020 - Theories of Learning (3 Credit Hours)
- EDTD 5225 - Reading and Writing Across the Curriculum (3 Credit Hours)
- EDTD 5411 - Understanding and Teaching Early Adolescents (3 Credit Hours)
- EDTD 5412 - Theory Into Practice in Middle Grades (3 Credit Hours)
- Elective (3 Credit Hours) (Elective must be a graduate course in a related field)
- SPED 5002 - Instructional Strategies for Teaching Students with Disabilities in General Education Settings (3 Credit Hours)

Content Pedagogy Course: 6 Hours

Select two of the following pedagogy courses based upon program concentrations:

- EDTD 5222 - Best Practices in Language Arts Education for Middle/Secondary (3 Credit Hours)
- EDTD 5232 - Best Practices in Social Science Education for Middle/Secondary Teachers (3 Credit Hours)
- EDTD 5242 - Best Practices in Mathematics Education for Middle/Secondary Teachers (3 Credit Hours)
- EDTD 5252 - Best Practices in Science Education for Middle/Secondary Teachers (3 Credit Hours)

Total Hours for the Degree: 36 Hours

- Elective (3 Credit Hours)
- Elective (3 Credit Hours)
- Elective (3 Credit Hours)

Language Sequence

Select one of the following language sequences:

French

- FREN 6801 - Methods and Materials for Teaching World Languages I (3 Credit Hours)
- FREN 6802 - Methods and Materials for Teaching World Languages II (3 Credit Hours)

Spanish

- SPAN 6801 - Methods and Materials for Teaching World Languages I (3 Credit Hours)
- SPAN 6802 - Methods and Materials for Teaching World Languages II (3 Credit Hours)

Degree Total: 36 Hours

Master of Business Administration

Program Overview

The Master of Business Administration (MBA) degree program will provide advanced business education beyond the baccalaureate level and prepare students to assume responsible management and professional positions in private and public organizations. The curriculum has been designed to provide breadth of exposure to business administration disciplines rather than specialization in any single discipline. To accommodate students who have part-time or full-time careers, Hull MBA courses are offered online or in the evening, with face-to-face and hybrid formats.

- MKTG 6700 - Marketing Management (3 Credit Hours)
- QUAN 6600 - Business Analytics for Managers (3 Credit Hours)
- QUAN 6610 - Designing, Managing, and Improving Operations (3 Credit Hours)

Degree Total: 30 Hours

Master of Business Administration - Georgia WebMBA

Program Overview

The online program delivers an AACSB International accredited, accelerated MBA degree with the same quality and service offered on campus.

This online Master of Business Administration (MBA) degree is offered through the Georgia WebMBA®, a consortium of AACSB-accredited schools. Emphasis is placed upon global business, human behavior, organizations, accounting, operations, marketing, finance, management information systems, and their impact on managerial decision making. The program focuses on the practical application of these tools, techniques, and concepts.

The WebMBA is a 30-hour program, requiring a student to complete 10 graduate courses. The program opens three cohorts in fall and spring with students taking two courses each semester for five consecutive semesters. This degree is 100% online.

The program is delivered by seven University System of Georgia schools, all fully accredited by AACSB International. It was developed by a group of faculty, directors, and deans in the late 1990s to provide access to an MBA for potential students who could not attend campus programs because of driving distance, work schedule, or family obligations. The Board of Regents of the University System of Georgia approved the pilot program in 2000. Permanent status was granted in 2002.

Admissions Information

For more information on admissions, please see the Office of Admissions website.

Progression and Graduation Requirements

The Georgia WebMBA graduation requirements mirror the requirements of the home institution. Therefore, the graduation requirements are the same as those for the Hull MBA face-to-face program at AU.

- Hull MBA students are to maintain a 2.8 GPA or higher to remain in good academic standing, but will require a 3.0 for graduation.
- All requirements for the Hull MBA degree must be completed within five consecutive years.
- A grade of C or better required in all courses.

Additional progression requirements are listed under Additional Academic Policies in the WebMBA Student Handbook.

1. Once students are admitted into one university, they cannot move to another university.
2. Students in one cohort can take courses only in that cohort. Students admitted into one cohort cannot shift cohorts.
3. Students who fail a course have options to redo the course, if a faculty member is willing to do a directed study, and if the home institution's MBA Director approves it and the school policy allows it, or if there is another appropriate venue.
4. Students who cannot continue in the program (current cohort and team) and withdraw, and then seek to be re-admitted, must be re-admitted to the program under the guidelines of their home institution. Students cannot transfer back into the program after their third consecutive semester; i.e., a student cannot withdraw during or at the end of the fourth semester, then rejoin for the fourth and/or fifth semester. Students rejoining the program must attend the orientation (paying the orientation fee again) and must work with a new team.

Program Information

- Program Code: 1MBA-MBA
- Major Code: MBA

Degree Requirements

- WMBA 1000 - WebMBA Orientation (0 Credit Hours)
- WMBA 6000 - Human Behavior in Organizations (3 Credit Hours)
- WMBA 6010 - Managerial Accounting (3 Credit Hours)
- WMBA 6030 - Global and International Business (3 Credit Hours)
- WMBA 6040 - Managerial Decision Analysis Using Business Intelligence (3 Credit Hours)
- WMBA 6050 - Strategic Marketing (3 Credit Hours)
- WMBA 6060 - Managerial Finance (3 Credit Hours)
- WMBA 6070 - Entrepreneurship (3 Credit Hours)
- WMBA 6080 - Management Information System (3 Credit Hours)
- WMBA 6100 - Operations and Supply Chain Management (3 Credit Hours)
- WMBA 6110 - Business Strategic Management (3 Credit Hours)

Master of Business Administration with a Concentration in Healthcare Management

Program Overview

This program is designed for students pursuing a management role in the healthcare and health services industries, as well as students that already have a background in healthcare delivery, particularly clinical professionals. For example, physicians, nurses, pharmacists, dentists, and clinical technologists may be interested in the program as a path toward a more management-oriented role within their organization.

This program is ideal for students interested in advanced studies in healthcare management to advance students' knowledge and expertise in healthcare management theory and practice as well as prepare students for advanced careers in healthcare management, consulting, research and scholarship. After earning this degree, graduates are well-prepared to pursue a variety of positions in healthcare management and clinical practice management. Healthcare industry sectors include, but are not limited to, hospitals, private and public health sectors, physicians' offices, non-profit health organizations, and health insurance providers.

Program Accreditation

The Hull College of Business is accredited by the Association to Advance Collegiate Schools of Business (AACSB).

Admissions Information

For those with a bachelor's degree from an accredited university, the requirements will remain the same as those pursuing our traditional Master of Business Administration degree (i.e., transcripts, three letters of recommendation, and two years of professional business work experience; learn more about admissions requirements). For those already with or concurrently enrolled in attaining advanced degrees (e.g., MD, DMD, PhD, PharmD, DNP, MPH), we will consider a waiver request for letters of recommendation and two years of professional business work experience requirements.

For more information on admissions requirements, please visit the Office of Admissions website.

Master of Business Administration with a Concentration in Strategic Innovation and Technology Management

Program Overview

This MBA program with a concentration in strategic innovation and technology management equips business leaders with the knowledge and skills needed to align business strategy with technological advancement. The curriculum integrates core MBA foundations with specialized coursework in emerging technologies, data-driven decision-making, and technology-enabled organizational leadership.

The program aims to prepare graduates to be able to lead organizations through complex technology adoption processes, manage cross-functional innovation initiatives, and translate technical opportunities into sustainable business value.

Program Pathway

To outline and visualize the path from start to finish in this program, refer to the suggested Program Pathway.

Master of Education in Counselor Education with a Concentration in Clinical Mental Health Counseling

Program Overview

The Counselor Education Master of Education (M.Ed.) degree graduate program at Augusta University prepares students for professional careers as either counselors in K-12 educational settings or in community mental health and private practice settings. The school counseling program prepares students to become eligible for professional certification in school counseling according to the Georgia Professional Standards Commission (GaPSC). The Clinical Mental Health Counseling program prepares students to become eligible for licensure as professional counselors according to the Georgia Board of Professional Counselors, Social Workers, and Marriage & Family Therapists. Early in the program, students are assisted by faculty advisors as needed in determining which specialty area will most closely align with their career goals. Many courses require outside field experiences, coordinated by the faculty, to help students gain a sense of professional responsibilities and expectations in the field. The student body is quite diverse, and the program is committed to increasing and supporting diverse student enrollment in order to be representative of the surrounding community. Both the School Counseling and Clinical Mental Health Counseling concentrations are accredited by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP).

The counselor education program is designed to meet the needs of both traditional and non-traditional students. The program operates on a cohort system that requires enrollment in specific courses. However, with advisor approval, students are able to enroll in courses according to their abilities, circumstances, and pace, as long as the program is successfully completed within seven years from the acceptance date. Courses are generally offered on campus during evening hours to accommodate those who may already be working as teachers or in other professional career areas. It is not required, however, that applicants have a teaching certificate or work experience for acceptance into the program. Individuals with at least some work or educational experience may be considered more highly, but it is not required. Both the school counseling and the clinical mental health counseling concentration areas also require intensive practicum and internship experiences near the end of the course of study. For future school counselors, the practicum and internship placements are completed in school settings at the elementary or secondary levels. For those specializing in clinical mental health counseling, internships are held at local hospitals, mental health centers, and other community agencies. In addition, the program will offer field experiences in the Counselor Education Training Center (CETC) located on the Summerville Campus, beginning Summer 2026.

All full-time counselor education program faculty hold doctoral degrees and have professional experience in their particular subject areas. Faculty hold professional licensure (LPC) and certifications from national or state certification organizations. Also, faculty are meaningfully involved in the counseling profession as active members or leaders in organizations including but not limited to the American Counseling Association (ACA), the Association for Counselor Education and Supervision (ACES), Georgia American Counseling Association (GA ACA), Georgia School Counselor Association (GSCA), South Carolina School Counselor Association (SCSCA), and/or the South Carolina Counseling Association (SCCA). Faculty members frequently present at regional and national conferences, quite often in collaboration with counseling students, reporting on descriptive or experimental research conducted during the program.

Master of Education in Instruction

Program Overview

The Master of Education in Instruction degree at Augusta University is designed for educators who hold a valid teaching license, and who are interested in enhancing their professional practice through the study of advanced professional knowledge related to teaching, managing, and learning in P-12 schools.

The program is grounded on the National Board for Professional Teaching Standards five core propositions:

1. Teachers are committed to students and their learning.
2. Teachers know the subjects they teach and how to teach those subjects to students.
3. Teachers are responsible for managing and monitoring student learning.
4. Teachers think systematically about their practice and learn from experience.
5. Teachers are members of learning communities.

The program is aligned with and addresses the Georgia Department of Education's TAPS performance standards and the teacher evaluation system. The M.Ed. in Instruction is dedicated to:

- Empowering teachers to take control of their own professional development.
- Improving teaching practices leading to improved K-12 student learning.
- Integrating theory, research, and classroom data with advanced practical teaching strategies for classroom implementation.

Additionally, this program is dedicated to improving teaching practices in the areas of:

- Teaching and learning strategies
- Classroom management
- Instructional technology
- Teaching diverse learners in the local context
- Designing and implementing relevant classroom assessments
- Using data to inform and improve practice

Concentrations are available in:

- Elementary Education
- Middle Grades Education
- Secondary Education
- Special Education
- P-12 in Art Education
- P-12 in Health and Physical Education
- P-12 in Music Education
- P-12 in Drama Education

- General Education

This fully online program consists of 30 credit hours offered through Augusta University Online. Applicants must hold a valid teaching certification. All field assignments and content coursework will reflect existing certification areas. Georgia educators must hold a valid, level 4 or higher Induction, Professional, Advanced Professional, or Lead Professional teaching certificate, leadership certificate, service field certificate, or life certificate for program admission.

Master of Education in Leadership with a Concentration in School Administration

Program Overview

The graduate program in leadership is a performance-based program that is aligned with the Georgia Professional Standards Commission (PSC) standards. Information on educational leadership certification rules, as stipulated by the Georgia PSC, is available on the GAPSC website. Candidates seeking certification in school leadership are responsible for ensuring the MEd in Leadership is appropriate in their respective states.

Admissions Information

The candidate must successfully complete the Georgia Ethics for Educational Leadership Assessment #352 prior to admission to the program.

For more information on admissions requirements, please visit the Office of Admissions website.

Progression and Graduation Requirements

- Opportunities for observing highly skilled leaders for growth are documented at all levels (i.e., P-5, 6-8, 9-12, Central Office Administrator).
- The candidate has a coach with a current L5 (minimum) certificate to supervise the three residency classes.
- The candidate has developed an e-portfolio demonstrating knowledge, skills, and application of GAPSC Educational Leadership Standards and completed the required 250 (minimum) field experience hours.
- The candidate must have attempted the Educational Leadership GACE Test # 334 prior to completion of the MEd program and must pass the assessment to obtain an Educational Leadership Tier I certificate.
- To graduate, students must have an overall 2.8 GPA.

Program Information

- Program Length: 1 Year
- CIP Code: 13.0301
- Program Code: 1MED-INSW

Degree Requirements

Common M.Ed. Core: 21 Hours

- EDLR 6400 - Fundamentals of Leadership and Administration (3 Credit Hours)
- EDLR 6440 - Developing Professional Learning Communities (3 Credit Hours)
- EDLR 6550 - Instructional Supervision for Improving P-12 Learning (3 Credit Hours)
- EDLR 6650 - Grants Writing: Resources for P-12 Learning (3 Credit Hours)
- EDLR 6740 - Leading the Learning Environment (3 Credit Hours)
- EDUC 6021 - Introduction to Educational Research (3 Credit Hours)
- EDTD 6381 - Assessment and Differentiation (3 Credit Hours)

Educational Leadership Concentration: 12 Hours

- EDLR 6430 - School Law (3 Credit Hours)
- EDLR 6640 - Developing Trends in Educational Leadership (3 Credit Hours)
- EDLR 6720 - Leading School Operations and Resources (3 Credit Hours)
- EDLR 6730 - Leading Family and Community Partnerships in Schools (3 Credit Hours)

Educational Leadership Practicum: 3 Hours

- EDLR 6900 - Tier One Certification Clinical Residency I (1 Credit Hour)
- EDLR 6901 - Tier One Certification Clinical Residency II (1 Credit Hour)
- EDLR 6902 - Tier One Certification Clinical Residency III (1 Credit Hour)

Degree Total: 36 Hours

Master of Health Science in Clinical Laboratory Science

Program Overview

This is an entry-level degree and, upon graduation, the student would be eligible to sit for the national certification examination for Medical Laboratory Scientist (MLS), administered by the American Society for Clinical Pathology (ASCP). The program is five semesters long and culminates in a research or capstone project. This program will also offer courses in evidence-based practice, education, management, epidemiology, and statistics. This degree will prepare the student for practice in research, management, and education as well as practice as a clinical laboratory scientist.

For distance/WEB students, laboratories are conducted at a satellite laboratory in the Atlanta area or at the clinical affiliates. The clinical internships are conducted at affiliated clinical sites. Internet students are encouraged to identify possible internship sites convenient to them. The Clinical Laboratory Science program will contact these sites to explore a clinical affiliation. The program requires computer capability and Internet connectivity.

Admissions Information

Please see the Office of Admissions website for specific admissions information.

Progression and Graduation Requirements

In addition to demonstrating personal characteristics appropriate for a health professions career, students must satisfy general and specific technical standards for this program as posted on the website.

Program Information

- Program Length: 2 Years
- CIP Code: 51.1005
- Program Code: MHSCLS_CLS
- Major Code: MCLS

Fall 1st Year: 18 Credit Hours

- CLSC 6220 - Introduction to Clinical Laboratory Science Practice (3 Credit Hours)
- CLSC 6640 - Clinical Biochemistry (4 Credit Hours)
- CLSC 6645 - Clinical Biochemistry Laboratory (2 Credit Hours)
- CLSC 6840 - Clinical Hematology (4 Credit Hours)
- CLSC 6845 - Clinical Hematology Laboratory (2 Credit Hours)
- STAT 6300 - Introduction to Epidemiology and Biostatistics (3 Credit Hours)

Spring 1st Year: 18 Credit Hours

- CLSC 6440 - Clinical Microbiology (4 Credit Hours)
- CLSC 6445 - Clinical Microbiology Laboratory (2 Credit Hours)
- CLSC 6740 - Clinical Immunohematology (4 Credit Hours)
- CLSC 6745 - Clinical Immunohematology Laboratory (2 Credit Hours)
- CLSC 7540 - Clinical Immunology (4 Credit Hours)
- CAHS 6501 - Evidence-Based Practice (2 Credit Hours)

Summer 1st Year: 15 Credit Hours

- CLSC 7940 - Clinical Molecular Methods (3 Credit Hours)
- CLSC 7945 - Clinical Molecular Methods Laboratory (2 Credit Hours)
- CAHS 6503 - Research Process (3 Credit Hours)
- CLSC 7680 - Clinical Biochemistry/Immunology Internship (5 Credit Hours)
- MLIR 7320 - Principles of Education and Management (2 Credit Hours)

Fall 2nd Year: 9 Credit Hours

- CLSC 7480 - Clinical Microbiology Internship (3 Credit Hours) , or CLSC 7780 (3 Credit Hours) Immunohematology, or CLSC 7880 (3 Credit Hours) Hematology Internship **(6 Total Credit Hours)**
- CAHS 6524 - Project Development (2 Credit Hours)

- CAHS 7300 - Professional Issues and Ethics (1 Credit Hour)

Spring 2nd Year: 13 Credit Hours

- CLSC 7990 - Clinical Molecular Methods Internship (4 Credit Hours)
- CLSC 7480 - Clinical Microbiology Internship (3 Credit Hours) , or CLSC 7780 (3 Credit Hours) Immunohematology, or CLSC 7880 (3 Credit Hours) Hematology Internship **(Total of 3 Credit Hours)**
- CLSC 7903 - Clinical Laboratory Science Review (3 Credit Hours)
- CAHS 7523 - Research Project (3 to 6 Credit Hours)

Degree Total: 73 Hours

Master of Health Science in Occupational Therapy

Program Overview

Occupational therapy is a dynamic health care profession that promotes engagement in meaningful daily and routine occupations, those activities that give meaning and purpose to our lives. Occupations commonly addressed through occupational therapy include self-care activities, work or school tasks, driving, leisure, home maintenance and community activities. Occupational therapists work with clients, families, groups, and populations to promote health and wellness, prevent illness or injury, develop or restore functional and adaptation skills, facilitate social engagement, and create accessible and supportive environments. Occupational therapists work in a variety of settings including, but not limited to, hospitals, inpatient rehabilitation facilities, outpatient clinics, skilled nursing facilities, homes, school systems, and community programs.

Admissions Information

See the Department of Occupational Therapy website for specific admissions information and prerequisites.

Progression and Graduation Requirements

- The Department of Occupational Therapy does not accept any grade below a C (70%) in general coursework and Level I Fieldwork coursework. The Department of Occupational Therapy does not accept any grade below a B (80%) in intervention coursework and Level II Fieldwork coursework.
- Students must complete 89 hours of curriculum coursework -- including fieldwork experiences -- to graduate from the program.

Program Information

- Program Length: 2 Years
- CIP Code: 51.2306
- Program Code: MHSOT_OTHP
- Major Code: OTHP

Degree Requirements

- CAHS 7450 - Human Gross Anatomy for Occupational Therapists (6 Credit Hours)
- CAHS 7705 - Neuroscience Applications (3 Credit Hours)
- OTHP 6000 - Fieldwork I A (1 Credit Hour)
- OTHP 6001 - Fieldwork I B (1 Credit Hour)
- OTHP 6002 - Fieldwork I C (2 Credit Hours)
- OTHP 6003 - Fieldwork I D (2 Credit Hours)
- OTHP 6100 - Foundations of Occupational Therapy (3 Credit Hours)
- OTHP 6105 - Assessment Process and Documentation (3 Credit Hours)
- OTHP 6106 - Development of Lifespan Occupations (3 Credit Hours)
- OTHP 6203 - Occupational Adaptations and Assistive Technology (3 Credit Hours)
- OTHP 6205 - Applied Kinesiology (4 Credit Hours)
- OTHP 6310 - Conditions in Occupational Therapy (3 Credit Hours)
- OTHP 6501 - Introduction to Evidence Based Practice and Research Process (1 Credit Hour)
- OTHP 6505 - Research Process (2 Credit Hours)
- OTHP 6510 - Evidence Based Practice (3 Credit Hours)
- OTHP 6515 - Research Seminar I (2 Credit Hours)
- OTHP 6520 - Research Seminar II (2 Credit Hours)
- OTHP 6600 - Mental Health and Psychosocial Evaluation and Intervention (3 Credit Hours)
- OTHP 6602 - Adult Evaluation and Intervention II (3 Credit Hours)
- OTHP 6604 - Pediatric Evaluation and Intervention (4 Credit Hours)
- OTHP 6606 - Adult Evaluation and Intervention I (5 Credit Hours)
- OTHP 6609 - Community, Societal and Population Models of Practice (3 Credit Hours)
- OTHP 6706 - Future Directions in Occupational Therapy (2 Credit Hours)
- OTHP 6708 - Professional Issues and Service Management (3 Credit Hours)
- OTHP 6710 - Professional Development and Competencies (1 Credit Hour)
- OTHP 6854 - School Systems (3 Credit Hours)
- OTHP 7009 - Fieldwork II Experience A (9 Credit Hours)
- OTHP 7010 - Fieldwork II Experience B (9 Credit Hours)

Degree Total: 89 Hours

Master of Health Science in Speech-Language Pathology

Program Overview

The Master of Health Science in Speech-Language Pathology at Augusta University offers a comprehensive pedagogy of academic and clinical education for students interested to become a speech-language pathologist (SLP). The program is designed to prepare SLP graduate students to demonstrate clinical acumen necessary for employment in healthcare and education settings, private practice, or industry. The two-year program will cultivate educational innovation by combining didactic and experiential classroom learning opportunities with clinical education to optimize educational value. The program is a full-time, lock-step model spanning six consecutive semesters comprised of 27 courses and 72 credit hours. *The program's mission is to prepare students to become highly competent speech-language pathologists who demonstrate a well-rounded therapeutic skillset to improve the quality of life of patients with speech-language-swallowing therapy needs.*

Graduates from this program will improve community health by increasing the provision of highly qualified SLP graduates to fill the nationwide critical shortage. Graduates will be well prepared for the Praxis Exam in Speech-Language Pathology required for state licensure. In addition, graduates will obtain the minimum 400 clinical clock hours supervised by American Speech-Hearing Association (ASHA) certified clinical supervisors, a requirement for full eligibility to complete the Clinical Fellowship Year (CFY). Graduates will demonstrate professional practice competencies leading to eligibility for the Certificate of Clinical Competence (CCC-SLP), a professional credential awarded by the American Speech-Language-Hearing Association (ASHA). The program will assist graduates with professional state licensure by the Georgia Board of Speech-Language Pathology and the Georgia Educator Certificate in the field of speech-language pathology by the Georgia Board of Education.

Program Accreditation

The Master of Health Science (MHS) in Speech-Language Pathology {residential} at Augusta University is a Candidate for Accreditation by the Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA) of the American Speech-Language-Hearing Association, 2200 Research Boulevard, #310, Rockville, MD 20850, 800-498-2071. Candidacy is a "pre-accreditation" status with the CAA, awarded to developing or emerging programs for a maximum period of 5 years.

Admissions Information

For information on admissions requirements, visit the Office of Admissions website.

Progression and Graduation Requirements

Graduation requirements:

- Minimum 3.0 cumulative GPA (completion of 27 courses)
- Obtain the minimum 400 clinical clock hours of direct client/patient contact across the lifespan demonstrating clinical competencies in evaluation and intervention adhering to the ASHA Code of Ethics while supervised by American Speech-Hearing Association (ASHA) certified SLP clinical supervisors documented via the web-based application -Clinical Assessment of Learning Inventory of Performance Streamlined Office Operations (CALIPSO). CALIPSO documentation MUST be approved and signed by the Director of Clinical Education.
- Program Director/Chair approval and signature that all graduation requirements have been completed

Program Information

- Program Length: 2 Years

- CIP Code: 51.0203 - Speech-Language Pathology/Pathologist
- Program Code: MHS_SLPA
- Major Code: SLPA

Degree Requirements

Required Courses

- SLPP 5101 - Anatomy of the Head and Neck (3 Credit Hours)
- SLPP 5102 - Cognitive Communication and Language Disorders from Infancy through Adolescence (4 Credit Hours)
- SLPP 5103 - Articulation and Phonological Disorders (3 Credit Hours)
- SLPP 5104 - Pediatric Assessment and Intervention (with Diagnostic Lab) (2 Credit Hours)
- SLPP 5105 - The Role of the Speech-Language Pathologist in Special Education (2 Credit Hours)
- SLPP 5106 - Processes of Clinical Practicum and Interprofessional Education (2 Credit Hours)
- SLPP 5201 - Aerodigestive I (with Voice Lab) (3 Credit Hours)
- SLPP 5202 - Aerodigestive II (with Dysphagia Lab) (3 Credit Hours)
- SLPP 5203 - Aphasia and Other Neurogenic Disorders (3 Credit Hours)
- SLPP 5204 - Medical Aspects of Speech-Language Pathology (2 Credit Hours)
- SLPP 5205 - Clinical Practicum I (1 Credit Hour)
- SLPP 5206 - Clinical Practicum I Seminar (1 Credit Hour)
- SLPP 5301 - Professionalism, Ethics, and Counseling in Speech-Language Pathology (3 Credit Hours)
- SLPP 5302 - Head and Neck Cancer (1 Credit Hour)
- SLPP 5303 - Adult Assessment and Intervention (with Diagnostic Lab) (2 Credit Hours)
- SLPP 5304 - Fluency (1 Credit Hour)
- SLPP 5305 - SLP Research and Design I (1 Credit Hour)
- SLPP 5306 - Clinical Practicum II (1 Credit Hour)
- SLPP 5307 - Clinical Practicum II Seminar (1 Credit Hour)
- SLPP 6401 - Oral Motor, Feeding, and Neurologically Based Pediatric Dysphagia (with Lab) (3 Credit Hours)
- SLPP 6402 - Augmentative and Alternative Communication (AAC) and Hearing Rehabilitation (2 Credit Hours)
- SLPP 6403 - Cultural Responsiveness in Speech-Language Pathology (2 Credit Hours)
- SLPP 6404 - SLP Research and Design II (3 Credit Hours)
- SLPP 6405 - Clinical Practicum III (1 Credit Hour)
- SLPP 6406 - Clinical Practicum III Seminar (1 Credit Hour)
- SLPP 6501 - Pediatric Externship (11 Credit Hours)
- SLPP 6502 - Pediatric Externship Seminar (1 Credit Hour)
- SLPP 6601 - Adult Externship (8 Credit Hours)
- SLPP 6602 - Adult Externship Seminar (1 Credit Hour)

Degree Total: 72 Hours

Master of Physician Assistant

Program Overview

Established in 1972, the AU Physician Assistant (PA) Program is among the oldest in the nation, with a strong history of graduate success. The program's comprehensive curriculum and established reputation prepare graduates for competitive employment opportunities and advanced training, including postgraduate fellowships.

Our program emphasizes the development of strong foundational medical knowledge, a commitment to patient-centered care, professional competence, and robust clinical experience. Upon completion, students earn a Master of Physician Assistant (MPA) degree.

Master of Public Administration

Program Overview

The Master of Public Administration (MPA) at Augusta University is the preferred degree for professionals working in government and the nonprofit sector.

Accredited by the Network of Public Policy, Affairs, and Administration (NASPAA), the MPA degree is a versatile degree that allows students to advance their careers in numerous fields in the public sector, such as managing cybersecurity, economic development, criminal justice, city-county management, emergency management, and many others.

Our classes are scheduled to better accommodate the working professionals in our program and our faculty includes traditional academics, "pracademics" (academics with career experience in government or nonprofit organizations), and working professionals to offer you practical experience.

The fully online 36 credit hour program is offered through Augusta University Online. Along with earning their traditional MPA, students can pursue a Post-Baccalaureate Certificate in Nonprofit Leadership. Students wishing to expand their knowledge of criminal justice may pursue a concentration in criminal justice as part of their MPA degree program: Master of Public Administration with a Concentration in Criminal Justice.

Master of Public Health with a Concentration in Epidemiology

Program Overview

The Master of Public Health (MPH) program is a two-year program offering core public health courses with concentrations in Health Management, Health Informatics, Social and Behavioral Sciences, and Epidemiology. The Program also includes a public health internship and a Capstone research experience. This comprehensive educational experience is designed to prepare leaders with critical thinking, problem-solving, and information management skills needed to improve healthcare delivery and promote public health.

An MPH degree presents tremendous value to "clinicians" as well as "non-clinical professionals," with undergraduate preparation in any field. Clinicians are prepared to be leaders in evidence-based quality improvement, patient-centered care, and community health. They are equipped with research skills to critically evaluate clinical literature and promote evidence in diverse areas such as health services organization. Non-clinical professionals are prepared with knowledge and skills from multiple disciplines to create and manage information systems, improve healthcare delivery and thereby promote community health.

The MPH program is offered through Augusta University Online (AUO) and can be completed in two years. It is designed to support the working professional in pursuit of a graduate degree. Graduates are prepared to be leaders in healthcare organizations, public health agencies, the pharmaceutical and information technology industries, and research institutes.

Master of Public Health with concentration in Epidemiology concentration will equip students as future public health professionals with the skills to develop policy and objectives; design, plan and initiate epidemiological studies and surveys; implement data collection; and conduct field investigations.

Program Accreditation

The Master of Public Health (MPH) program is accredited by the Council on Education for Public Health (CEPH).

Admissions Information

Please refer to <https://www.augusta.edu/gradschool/mph-adm-reqs.php> for MPH Admission Requirements.

Note to International Applicants: The MPH program delivers approximately 90 percent of its content via online courses. The remaining 10 percent is delivered as on-campus courses which require the student to attend classes at the Health Science Campus. At this time, the MPH program does not offer sufficient on-campus course work for students with F-1 or J-1 student status to meet all study requirements. The university will not issue a Certification of Eligibility for F-2 Academic Students (Form I-20) or J-1 Exchange Visitors, Student Category (Form DS-2019) for MPH program enrollment.

Progression and Graduation Requirements

- Any student whose cumulative GPA for a degree program drops below 2.8 will be placed on academic probation. While on probation, the student must earn a minimum 3.0 GPA each semester until the cumulative GPA raises to at least 2.8. Students who fail to obtain at least a 3.0 GPA each semester while on probation will be considered for an academic dismissal from The Graduate School.
- Graduation requires the successful completion of 45 credit hours within a maximum of five years.
- STAT 7010 is the prerequisite for MPHM 8280.
- The Internship course MPHC 8722 should be taken after at least 12 credit hours of coursework is completed, but prior to the graduating semester. The Internship site MOU needs to be established before the internship can take place. Students are required to work on identifying their internship site one semester prior to the semester in which the internship will start.
- The Capstone course MPHC 8999 should be taken at the last semester of the student's program of study.

Program Information

- Program Length: 5 Years
- CIP Code: 51.2201
- Program Code: MPH_HINF
- Major Code: PUBH
- Concentration Code: MEPI

Degree Requirements

MPH Core Courses: 21 Hours

- EPID 7130 - Introduction to Epidemiology (3 Credit Hours)
- MPHC 7101 - Health Management and Policy (3 Credit Hours)
- MPHC 8600 - Fundamentals of Health Promotion (3 Credit Hours)
- MPHC 8700 - Introduction to Environmental Health (3 Credit Hours)
- MPHM 7210 - Health Care Performance Improvement (3 Credit Hours)
- MPHM 8280 - Research Methods in Public Health (3 Credit Hours)
- STAT 7010 - Biostatistics I (3 Credit Hours)

Concentration Courses: 9 Hours

- EPID 7370 - Intermediate Epidemiology (3 Credit Hours)
- EPID 7380 - Chronic Disease Epidemiology (3 Credit Hours)
- EPID 7390 - Infectious Disease Epidemiology: Theory and Methods (3 Credit Hours)

Electives: 9 Hours

Select 3 of the following:

- MPHC 7209 - Health Law and Ethics (3 Credit Hours)
- MPHI 8000 - Computerized Health Information Systems (3 Credit Hours)
- MPHI 8001 - Public Health Informatics (3 Credit Hours)
- MPHI 8400 - Health Data Management and Knowledge Discovery (3 Credit Hours)
- MPHM 7102 - Human Resource Management (3 Credit Hours)
- MPHM 7104 - Healthcare Financial Management (3 Credit Hours)
- MPHM 8220 - Strategic Management of Healthcare Organizations (3 Credit Hours)
- MPHS 8200 - Integration Social and Behavioral Theory into Public Health (3 Credit Hours)
- MPHS 8300 - Social Determinants of Health and Health Disparities (3 Credit Hours)
- MPHS 8400 - Social Behavioral Change at Individual, Household, and Community Levels (3 Credit Hours)

Research and Practice Courses: 6 Hours

- MPH 8011 - Ethical Conduct in Research (1 Credit Hour)
- MPH 8722 - Internship (2 or 5 Credit Hours)
- MPH 8999 - Capstone Course (3 Credit Hours)

Degree Total: 45 Hours

Master of Public Health with a Concentration in Health Informatics

Program Overview

The Master of Public Health (MPH) program is a two-year program offering core public health courses with concentrations in Health Management, Health Informatics, Social and Behavioral Sciences, and Epidemiology. The Program also includes a public health internship and a Capstone research experience. This comprehensive educational experience is designed to prepare leaders with critical thinking, problem solving, and information management skills needed to improve healthcare delivery and promote public health.

An MPH degree presents tremendous value to "clinicians" as well as "non-clinical professionals," with undergraduate preparation in any field. Clinicians are prepared to be leaders in evidence-based quality improvement, patient-centered care, and community health. They are equipped with research skills to critically evaluate clinical literature and promote evidence in diverse areas such as health services organization. Non-clinical professionals are prepared with knowledge and skills from multiple disciplines to create and manage information systems, improve healthcare delivery and thereby promote community health.

The MPH program is offered through Augusta University Online (AUO) and can be completed in two years. It is designed to support the working professional in pursuit of a graduate degree. Graduates are prepared to be leaders in healthcare organizations, public health agencies, the pharmaceutical and information technology industries, and research institutes.

Master of Public Health with concentration in Health Informatics prepares professionals with requisite knowledge and skills to create, analyze, and manage information system to improve health delivery.

The MPH Program is offered online through Augusta University Online (AUO) and can be completed in two years. It is designed to support the working professional pursuing a graduate degree. Graduates are prepared to be leaders in healthcare organizations, public health agencies, the pharmaceutical and information technology industries, and research institutes.

The Social and Behavioral Sciences in public health address the behavioral, social, and cultural factors related to individual, population, and health disparities over the life course. Research and practice in this area contributes to the development, administration, and evaluation of programs and policies in public health and health systems aimed at promoting and sustaining healthy environments and healthy lives for individuals and populations.

Master of Science in Biological and Computational Mathematics

Program Overview

The MS program in Biological and Computational Mathematics is a two-year program consisting of 36 hours of courses. Graduates of the program will be well-equipped to use a variety of methods to construct mathematical models in order to solve real-world problems, especially those problems of an interdisciplinary nature. The expertise of the faculty involved includes many applications in the biomedical fields. The nature and breadth of the curriculum allows students to enter jobs in industry or to enter PhD programs in Applied Mathematics. The program includes a strong experiential component in the form of seminars as well as a graduate project course where students have the opportunity to conduct original research in applied mathematics.

Admissions Information

For specific admissions information, please visit the Office of Admissions website.

Progression and Graduation Requirements

- The program requires 36 hours of graduate coursework, typically completed over four semesters.
- Students must maintain a cumulative 3.0 GPA in all graduate coursework.
- Comprehensive examinations spanning three courses of study in the program must be completed. Courses used for the comprehensive exam must be approved by the department's graduate committee.

Program Information

- Program Length: 2 Years
- CIP Code: 27.0199
- Program Code: 1MS-BCMA-MS
- Major Code: BCMA

Degree Requirements

Major Courses: 18 Hours

- MATH 6011 - Real Analysis I (3 Credit Hours)
- MATH 6200 - Applied Partial Differential Equations (3 Credit Hours)
- MATH 6350 - Numerical Analysis (3 Credit Hours)
- MATH 6580 - Computational Linear Algebra (3 Credit Hours)
- MATH 6610 - Mathematical Models (3 Credit Hours)
- MATH 6630 - Topics in Mathematical Biology (3 Credit Hours)

Graduate Project/Thesis: 3-6 Hours

Select one of the following options:

Option 1 - Graduate Project: 3 Hours

- MATH 6990 - Graduate Project (3 Credit Hours)

Option 2 - Thesis: Up to 6 Hours

- MATH 6999 - Master's Thesis (2 to 3 Credit Hours)

Option 3 - Approved Interdisciplinary Course: 3 Hours

Select one of the following:

- MPHI 8001 - Public Health Informatics (3 Credit Hours)
- QUAN 6610 - Designing, Managing, and Improving Operations (3 Credit Hours)
- STAT 7010 - Biostatistics I (3 Credit Hours)
- STAT 7020 - Biostatistics II (3 Credit Hours)
- STAT 7070 - Biomedical Statistics (3 Credit Hours)
- STAT 7110 - Statistical Models and Methods (3 Credit Hours)
- STAT 7130 - Introduction to Epidemiology (3 Credit Hours)
- STAT 7650 - Introduction to Stochastic Processes (3 Credit Hours)

Electives: 12-15 Hours

Select from the following:

- MATH 6120 - Statistical Theory I (3 Credit Hours)
- MATH 6130 - Statistical Theory II (3 Credit Hours)
- MATH 6220 - Dynamical Systems (3 Credit Hours)
- MATH 6370 - Numerical Partial Differential Equations (3 Credit Hours)
- MATH 6400 - Combinatorial Mathematics (3 Credit Hours)
- MATH 6420 - Introduction to the Theory of Graphs (3 Credit Hours)
- MATH 6440 - Applied Discrete Mathematics (3 Credit Hours)
- MATH 6620 - Optimization (3 Credit Hours)
- MATH 6640 - Stochastic Differential Equations and Applications (3 Credit Hours)
- MATH 6940 - Graduate Teaching Seminar (1 Credit Hour)
- MATH 6960 - Graduate Seminar (3 Credit Hours)
- MATH 6965 - Research Seminar (3 Credit Hours)
- MATH 6980 - Special Topics (3 Credit Hours)
- MATH 6990 - Graduate Project (3 Credit Hours) *(May be repeated a second time for an additional 3 hours if there is ongoing work which is likely to yield a peer-reviewed publication.)*
- MATH 6999 - Master's Thesis (2 to 3 Credit Hours)

Degree Total: 36 Hours

Term-by-Term Pathway

To outline and visualize the path from start to finish in this program, refer to the suggested Term-by-Term Pathway.

Master of Science in Biomolecular Science with a Concentration in Cell and Molecular Biology

Program Overview

The Master of Science in Biomolecular Science is a two-year, 36 credit-hour graduate program that provides education and training for careers in pharmaceutical, biotechnology, biomedical, and chemical industries or for entry into doctoral research or professional degree programs. Students develop transferable skills of data analysis, problem solving, critical evaluation of scientific literature, oral and written communication, experimental methods, and interdisciplinary knowledge of the biological systems and responses to bioactive compounds at a physiological, cellular, and molecular level. With a requirement to complete a mentored research project, the program prepares students to investigate a wide range of biomedical-related topics including study of the mechanism of disease and development of new drugs. Students select as a focus area of their studies: either the cell and molecular biology concentration or the medicinal chemistry concentration.

- BIOL 6170 - Techniques in Biomolecular Science (3 Credit Hours)
- or CHEM 6170 - Techniques in Biomolecular Science (3 Credit Hours)

- BIOL 6620 - Principles of Medicinal Chemistry (3 Credit Hours)
- or CHEM 6620 - Principles of Medicinal Chemistry (3 Credit Hours)
- or BIOL 6623 - Principles of Medicinal Chemistry Advanced Topics (1 Credit Hour) and BIOL 6990 - Biological Research (1 to 9 Credit Hours) (*taken for 2 credit hours*)
- or CHEM 6623 - Principles of Medicinal Chemistry Advanced Topics (1 Credit Hour) and CHEM 6990 - Master's Research (1 to 9 Credit Hours) (*taken for 2 credit hours*)

- BIOL 6720 - Principles of Pharmacology (3 Credit Hours)
- or CHEM 6720 - Principles of Pharmacology (3 Credit Hours)

- or BIOL 6723 - Pharmacology - Advanced Topics (1 Credit Hour) **and** [BIOL 6990 - Biological Research (1 to 9 Credit Hours) *(taken for 2 credit hours)*
- or CHEM 6723 - Pharmacology Advanced Topics (1 Credit Hour) **and** CHEM 6990 - Master's Research (1 to 9 Credit Hours) *(taken for 2 credit hours)*
- BIOL 6970 - Introduction to Research (2 Credit Hours)
- or CHEM 6970 - Introduction to Research (2 Credit Hours)
- BIOM 8011 - Responsible Conduct of Research (1 Credit Hour)

Concentration Courses: 24 Hours

Required Concentration Courses: 21 Hours

- BIOL 6980 - Research Proposal Development (3 Credit Hours)
- BIOL 6990 - Biological Research (1 to 9 Credit Hours) *(taken for 15 credit hours)*
- STAT 7010 - Biostatistics I (3 Credit Hours)

Elective Concentration Course: 3 Hours

Select one of the following options:

- BIOL 6680 - Pathophysiology (3 Credit Hours)
- BIOL 6683 - Pathophysiology - Advanced Topics (1 Credit Hour) and BIOL 6990 - Biological Research (1 to 9 Credit Hours) *(taken for 2 credit hours)*
- BIOL 6700 - Advanced Cell Biology (3 Credit Hours)
- BIOL 6703 - Advanced Cell Biology - Advanced Topics (1 Credit Hour) and BIOL 6990 - Biological Research (1 to 9 Credit Hours) *(taken for 2 credit hours)*
- BIOL 6780 - Molecular Carcinogenesis (3 Credit Hours)
- BIOL 6783 - Molecular Carcinogenesis - Advanced Topics (1 Credit Hour) and BIOL 6990 - Biological Research (1 to 9 Credit Hours) *(taken for 2 credit hours)*

Degree Total: 36 Hours

Master of Science in Biomolecular Science with a Concentration in Medicinal Chemistry

Program Overview

The Master of Science in Biomolecular Science is a two-year, 36 credit-hour graduate program that provides education and training for careers in pharmaceutical, biotechnology, biomedical, and chemical industries or for entry into doctoral research or professional degree programs. Students develop transferable skills of data analysis, problem solving, critical evaluation of scientific literature, oral and written communication, experimental methods, and interdisciplinary knowledge of the biological systems and responses to bioactive compounds at a physiological, cellular, and molecular level. With a requirement to complete a mentored research project, the program prepares students to investigate a wide range of biomedical-related topics including study of the mechanism of disease and development of new drugs. Students select a focus area of their studies: either the cell and molecular biology concentration or the medicinal chemistry concentration.

Program Information

- Program Length: 2 Years
- CIP Code: 26.0299
- Program Code: 1MS-BISC

Degree Requirements

Major Courses: 12 Hours

- BIOL 6170 - Techniques in Biomolecular Science (3 Credit Hours)
- or CHEM 6170 - Techniques in Biomolecular Science (3 Credit Hours)

- BIOL 6620 - Principles of Medicinal Chemistry (3 Credit Hours)
- or CHEM 6620 - Principles of Medicinal Chemistry (3 Credit Hours)
- or BIOL 6623 - Principles of Medicinal Chemistry Advanced Topics (1 Credit Hour) and BIOL 6990 - Biological Research (1 to 9 Credit Hours) (*taken for 2 credit hours*)
- or CHEM 6623 - Principles of Medicinal Chemistry Advanced Topics (1 Credit Hour) and CHEM 6990 - Master's Research (1 to 9 Credit Hours) (*taken for 2 credit hours*)

- BIOL 6720 - Principles of Pharmacology (3 Credit Hours)
- or CHEM 6720 - Principles of Pharmacology (3 Credit Hours)
- or BIOL 6723 - Pharmacology - Advanced Topics (1 Credit Hour) **and** BIOL 6990 - Biological Research (1 to 9 Credit Hours) (*taken for 2 credit hours*)
- or CHEM 6723 - Pharmacology Advanced Topics (1 Credit Hour) **and** CHEM 6990 - Master's Research (1 to 9 Credit Hours) (*taken for 2 credit hours*)

- BIOL 6970 - Introduction to Research (2 Credit Hours)
- or CHEM 6970 - Introduction to Research (2 Credit Hours)

- BIOM 8011 - Responsible Conduct of Research (1 Credit Hour)

Concentration Courses: 24 Hours

- CHEM 6450 - Advanced Organic Chemistry- Synthesis (3 Credit Hours)
- or CHEM 6453 - Advanced Organic Chemistry- Synthesis Advanced Topics (1 Credit Hour) and CHEM 6990 - Master's Research (1 to 9 Credit Hours) (*taken for 2 credit hours*)

- CHEM 6610 - Rational Drug Design (3 Credit Hours)
- or CHEM 6613 - Rational Drug Design Advanced Topics (1 Credit Hour) and CHEM 6990 - Master's Research (1 to 9 Credit Hours) (*taken for 2 credit hours*)

- CHEM 6980 - Research Proposal Development (3 Credit Hours)
- CHEM 6990 - Master's Research (1 to 9 Credit Hours) (*taken for 15 credit hours*)

Degree Total: 36 Hours

Master of Science in Biostatistics

Program Overview

The Master of Science (MS) in Biostatistics provides individuals with rigorous training in statistical methodology in order to prepare them for careers as biostatisticians to collaborate with and provide statistical support to scientists and research in biomedical, health sciences and other related areas of research. The MS program provides an intensive exposure to the wide range of methodologies and techniques needed to function and excel as a biostatistician, with expertise in designing data collection for experiments, observational studies, and clinical trials, extracting information stored in various forms, and analyzing, reporting and presenting the findings.

**New students may not apply to this program. Please refer to the program for more details.*

Progression and Graduation Requirements

- No summer courses are required. Enrolling in STAT 8890 is optional.
- Consulting Project or Thesis Research proposal due one week before midterm of fall.

Program Information

- Program Length: 2 Years
- CIP Code: 26.1102
- Program Code: MS_BIOS

Degree Requirements

Required Courses: 27 Hours

- DATS 7510 - Programming for Data Analysis (3 Credit Hours)
- STAT 7110 - Statistical Models and Methods (3 Credit Hours)
- STAT 7520 - Statistical Theory I (3 Credit Hours)
- STAT 7620 - Statistical Theory II (3 Credit Hours)
- STAT 7630 - Applied Linear Models (3 Credit Hours)
- STAT 7640 - Generalized Linear Models I (3 Credit Hours)
- STAT 7720 - Survival Analysis (3 Credit Hours)
- STAT 7870 - Biostatistical Consulting in Research (3 Credit Hours)
- STAT 7910 - Biostatistical Consulting Project (1 to 12 Credit Hours)
- or STAT 7920 - Thesis Research (1 to 12 Credit Hours)

Elective Courses: 9 Hours

Select three of the following:

- DATS 7860 - Statistical and Machine Learning for Big Data (3 Credit Hours)
- DATS 8170 - Advanced Computational Methods (3 Credit Hours)
- STAT 7130 - Introduction to Epidemiology (3 Credit Hours)
- STAT 7240 - Introduction to Clinical Trials (3 Credit Hours)

- STAT 7260 - Design Analysis and Observational Studies (3 Credit Hours)
- STAT 7350 - Epidemic Investigation (3 Credit Hours)
- STAT 7360 - Systematic Reviews (3 Credit Hours)
- STAT 7370 - Intermediate Epidemiology (3 Credit Hours)
- STAT 7650 - Introduction to Stochastic Processes (3 Credit Hours)
- STAT 7750 - Introduction to Genetic Analysis (3 Credit Hours)
- STAT 7850 - Omics Data Analysis (3 Credit Hours)
- STAT 7880 - Special Topics (1 to 3 Credit Hours)
- STAT 8150 - Advanced Genomic Data Analysis (3 Credit Hours)
- STAT 8160 - Analysis of Clustered and Correlated Data (3 Credit Hours)
- STAT 8231 - Nonparametric and Robust Statistical Methods (3 Credit Hours)
- STAT 8270 - Computational Genomics and Proteomics (3 Credit Hours)
- STAT 9120 - Theory of Linear Models (3 Credit Hours)
- STAT 9140 - Generalized Linear Models II (3 Credit Hours)
- STAT 9220 - Advanced Statistical Inference (3 Credit Hours)
- STAT 9240 - Bayesian Inference (3 Credit Hours)
- STAT 9280 - Advanced Special Topics (1 to 3 Credit Hours)

Degree Total: 36 Hours

Term-by-Term Pathway

To outline and visualize the path from start to finish in this program, refer to the suggested Term-by-Term Pathway.

Master of Science in Computer Science

Program Overview

The Master of Science in Computer Science (MS-CS) is a 30-credit program that may be completed either full-time or on a part-time basis. The program will provide students with graduate level coverage of algorithms, theory, systems, and an advanced topics course in cybersecurity. The electives will be chosen from courses on programming languages, cyber-physical systems, formal methods, machine learning, networked and distributed systems, and bioinformatics. The degree will have a thesis-based program and course based (non-thesis) version.

Augusta University's program will train graduate students to become capable of applying mainstream computer science knowledge to formulating and solving problems ranging from problems that are solved by routine applications of computer science to problems that require advancing the state-of-the-art in the discipline.

Admissions Requirements

For more information on admissions requirements, please visit the Office of Admissions website.

Progression and Graduation Requirements

- Satisfactory progress toward a MS-CS degree requires that a student maintain a cumulative grade point average (GPA) of at least 3.0 for all courses attempted.

- Failure to earn a minimum 3.0 GPA in any given semester results in immediate dismissal from the program.
- A minimum grade of B must be earned for each MS-CS course.
- All requirements for the MS-CS degree must be completed within five consecutive years.

Program Information

- Program Length: 2 Years
- CIP Code: 11.0101
- Program Code: 1MS-MCOS
- Major Code: MCOS

Degree Requirements

Required Courses: 9 Hours

- CSCI 7100 - Algorithm Analysis (3 Credit Hours)
- CSCI 7300 - Programming Languages (3 Credit Hours)
- CSCI 7340 - Machine Learning (3 Credit Hours)

Non-Thesis/Thesis Tracks: 21 Hours

Select one of the following track options:

Non-Thesis Track

Electives: 21 Hours

Select 21 hours from the following, with approval from the program director:

- CSCI 6XXX - Computer Science Elective (3 Credit Hours)
- CSCI 7XXX - Computer Science Elective (3 Credit Hours)
- CYBR 6XXX - Cyber Studies Elective (3 Credit Hours)
- CYBR 7XXX - Cyber Studies Elective (3 Credit Hours)

Thesis Track

Required Courses: 9 Hours

- CSCI 6900 - Introduction to Research (3 Credit Hours)
- CSCI 6910 - Master's Thesis Research (1 to 9 Credit Hours) *(taken twice for a total of 6 credit hours)*

Electives: 12 Hours

Select 12 hours from the following, in consultation with advisor:

- CSCI 6XXX - Computer Science Elective (3 Credit Hours)
- CSCI 7XXX - Computer Science Elective (3 Credit Hours)
- CYBR 6XXX - Cyber Studies Elective (3 Credit Hours)
- CYBR 7XXX - Cyber Studies Elective (3 Credit Hours)

Degree Total: 30 Hours

Master of Science in Cybersecurity Management and Technology

Program Overview

The Master of Science in Cybersecurity Management and Technology is a 30-hour master's program consisting of three core courses, a choice of a technical or managerial track, and two crosscutting courses. Students have the flexibility of choosing a track and still taking several courses from the other track. The managerial track is grounded in the eight domains of information security as articulated for the Certified Information Systems Security Professional (CISSP).

Admissions Information

For more information on admissions requirements, please visit the Office of Admissions website.

Progression and Graduation Requirements

- Satisfactory progress toward a degree requires that a student maintain a cumulative grade point average (GPA) of at least 3.0 for all courses attempted. A minimum grade of C must be earned for each course and students must have a 3.0 cumulative GPA at the time of graduation. All requirements for the degree must be completed within five consecutive years.
- Any student whose cumulative GPA falls below 3.0 is placed on academic probation. While on probation, the student must earn a minimum of 3.0 each grading period until the cumulative GPA is raised to at least 3.0. Students who fail to earn at least a 3.0 during a semester they are on probation shall be recommended for academic dismissal from The Graduate School.
- Where circumstances warrant, a student being considered for dismissal under the provisions of this policy may be permitted to continue as a student on probation. Failure to earn 3.0 GPA or higher in a semester when a student is on their second approved probation will result in a second and final dismissal from the program.

Program Information

- Program Length: 5 Years
- CIP Code: 11.1003
- Program Code: 1MS-CYMT
- Major Code: CYMT
- Campus Code: AUO

Degree Requirements

Core Courses: 9 Hours

- AIST 6510 - Information Systems Security I (3 Credit Hours)
- AIST 6515 - Information Systems Security II (3 Credit Hours)
- AIST 6359 - Legal Issues in Information Security (3 Credit Hours)

Track Courses: 15 Hours

Select one of the following tracks:

Technical Track: 15 Hours

Technical Track Required Courses: 6 Hours

- CSCI 5170 - Computer Organization (3 Credit Hours)
- CSCI 5371 - Low-Level Programming (3 Credit Hours)

Technical Track Elective Courses: 9 Hours

Select 3 of the following courses:

- AIST 5450 - Accelerated Introduction to Python (3 Credit Hours)
- CSCI 6100 - Cyber-Physical Systems (3 Credit Hours)
- CSCI 6531 - Malware Analysis and Reverse Engineering (3 Credit Hours)
- CSCI 6532 - Hardware and Embedded Systems (3 Credit Hours)
- CSCI 6540 - Digital Forensics and Machine Learning (3 Credit Hours)
- CSCI 7950 - Selected Topics (3 Credit Hours)
- CSCI 7954 - Advanced Topics in Cybersecurity (3 Credit Hours)
- CYBR 6250 - Scripting and Automation for Cybersecurity (3 Credit Hours)
- CYBR 6400 - Digital Forensics (3 Credit Hours)
- CYBR 7000 - Cryptography (3 Credit Hours)
- CYBR 7100 - Ethical Hacking and Penetration Testing (3 Credit Hours)
- CYBR 7300 - Network Security (3 Credit Hours)
- CYBR 7500 - Cloud and Edge Security (3 Credit Hours)
- CYBR 7550 - IoT Security (3 Credit Hours)

Management Track: 15 Hours

Management Track Required Courses: 6 Hours

- AIST 6353 - Human Factors in Information Security (3 Credit Hours)
- AIST 6357 - Information Risk Management (3 Credit Hours)

Management Track Elective Courses: 9 Hours

Select 3 of the following courses:

- AIST 6355 - Information Security Policy Development (3 Credit Hours)
- CYBR 5600 - Networking and Cybersecurity (3 Credit Hours)
- AIST 6361 - Principles of Incident Response and Disaster Recovery (3 Credit Hours)
- AIST 6363 - Cloud Computing Security (3 Credit Hours)
- AIST 6369 - Information Security and the Global Cyber Threat Environment (3 Credit Hours)
- AIST 6950 - Selected Topics in Information Security Management (3 Credit Hours)

Crosscutting Courses: 6 Hours

Select two additional courses not already taken from either the Technical or Management Track lists.

Degree Total: 30 Hours

Master of Science in Data Science

Program Overview

The Master of Science (MS) degree in Data Science provides individuals with rigorous training in data science methods in order to empower aspiring students with innovative data science methods to address complex problems facing the society and well-being of humankind. The program will give students a strong foundation and expertise in quantitative methods, machine learning tools and data management skills for optimally visualizing, summarizing and analyzing large and complex data.

The MS in Data Science program is offered by the School of Public Health through Augusta University Online and can be completed in two years. It is designed to support the working professional in pursuit of a graduate degree. Graduates will develop the specialized skills necessary for roles in business, finance, medical and public health jobs, health care and bioinformatics.

Master of Science in Epidemiology

Program Overview

The Master of Science (MS) in Epidemiology is a degree program for students who want to gain additional theoretical and applied knowledge, as well as the skills and credentials they need to advance in their career tracks. This program is designed to provide students with a solid foundation in epidemiology. Specifically, there is an emphasis on developing answerable clinical and research questions, generating testable hypotheses and applying sound study designs for research projects. This program is suitable for both recent college graduates and professionals working in academia or in a clinical setting, or at healthcare companies, health departments, federal agencies, hospitals, pharmaceutical companies, or in various other healthcare settings.

The MS in Epidemiology focuses on recruiting and training students who would like to increase their applied epidemiology knowledge, build research methodology and analytical skill sets, and earn an advanced degree, without disrupting their career. Therefore, the primary target population include physicians, healthcare administrators, project directors, and other healthcare professionals.

The MS in Epidemiology program is offered by the School of Public Health through Augusta University Online and can be completed in two years. The program requires 36 total credit hours, including 5 research capstone course credit hours. The program should take four semesters to complete and is delivered in an asynchronous online format.

Master of Science in Kinesiology

Program Overview

The Master of Science in Kinesiology (MSK) is designed to advance students' knowledge and experience in exercise science, health, physical activity and sports coaching. The degree is comprised of two distinct tracks/options: non-thesis (comprehensive exams and internship) and thesis (research paper and oral presentation/defense). The non-thesis track is offered 100% online and does not require students to be physically present on the Augusta University campus in order to complete the degree program. The thesis track is offered primarily online; however, it does require students to be physically present on the Augusta University campus for two semesters (typically the last two semesters of the degree program) to complete the applied research courses and related face-to face work.

The MSK degree provides the knowledge and experience to students who have a related degree (e.g., BSEd. in Health and Physical Education, BS in exercise science, exercise physiology, health science, allied health, etc.) to enhance their professional expertise. Programs of study will be based upon student career goals and aspirations with emphasis on exercise science-based topics at the advanced level, advanced quantitative and qualitative research classes and other areas of specialization (such as sports coaching) in relation to their academics and experience.

augusta.edu/education/kinesiology/kinesiology-ms

Program Contact

Dr. Maleah Winkler
706-737-1468
awinkler@augusta.edu

Admissions Information

For more information on admissions requirements, please visit the Office of Admissions website.

Progression and Graduation Requirements

- **Comprehensive Written Examinations:** Students interested in the sports coaching certificate program and practical hands-on experience would benefit more from the non-thesis option. Students on the non-thesis track will complete comprehensive written exams at the end of their final semester in the program. These exams will be administered by the MSK Graduate Program Director in consultation with the student and selected faculty members in the Department of Kinesiology. Three classes from the core program area of the degree will be selected for the examinations. The test-bank of questions associated with the three core classes will be shared with each student around midterm of their final semester. Questions generated from the test-bank for each exam will be open-ended in nature, with an emphasis on critical thinking and practical application. A pre-determined two-hour window will be strictly adhered to for completion of each of the three exams via the online platform. A total of no more than six hours will be given to complete the comprehensive exams in their entirety. After completion of each exam, the selected faculty member(s) will be asked to evaluate whether the responses to the exam questions demonstrate the required level of expertise to confer completion of the degree. Each exam will be pass/fail in nature, with the student having to pass all three sections of the comprehensive exams to complete the degree requirements. In the event that a student fails any part of the comprehensive exams, the MSK Graduate Program Director, in consultation with the relevant faculty member(s), will debrief the student, clarify the area(s) of weakness to be addressed by the student, and schedule another pre-determined window to modify and improve the submission via the online platform. This process and the subsequent re-evaluation and grading will take no more than one week to complete. If a student fails the re-take, (s)he must register for at least three credit hours in the next semester and re-apply to take it again then.
- **Thesis and Oral Presentation:** Students interested in pursuing a doctoral degree would benefit more from completing the thesis track in preparation for dissertation research. In order to complete the thesis, students must work directly with a faculty member in the Department of Kinesiology to facilitate the completion of the written document. This will require students to be physically present on campus for two semesters (typically the last two semesters of the degree program) to complete the applied research courses and related face-to-face work. The remaining courses required to complete the thesis track will be offered 100% online.
- Students selecting the thesis track will present their research and defend it to their committee as their final requirement for graduation. The MSK Graduate Program Director will oversee the selection and appointment of the thesis committee that will be comprised of a minimum of two faculty members from the Department of Kinesiology, with the MSK Graduate Program Director being one of them. The faculty member with expertise and research interests most closely aligned to the student's research area and methodology will be appointed the chair of the committee. After completion of the oral presentation, the committee will evaluate and deliberate about whether the research paper and presentation demonstrate the required level of expertise to confer completion of the degree. In the event that the thesis does not meet the necessary standard to confer degree completion, the student will be given one week to make the suggested modifications and improvements to satisfy the committee.
- **GPA Requirement:** To graduate, students must have an overall 2.8 GPA.

Master of Science in Medical Illustration

Program Overview

Medical illustration is an interdisciplinary field that combines visual arts, the health sciences, education, and communication. Its roots were clearly established by the Renaissance, as seen in the work of anatomical researchers and educators such as Andreas Vesalius, as well as in the artwork of master figurative artists such as Leonardo da Vinci.

Today, medical illustration involves the conceptualization, planning, design, production, implementation, and evaluation of visual solutions for complex communication and education problems in the life and health sciences. The field uses a wide range of media and techniques, including two dimensional artwork, three dimensional animation, anatomical drawing, instructional games, molecular modeling, and medical sculpture.

Medical illustrators are specially trained professionals who combine artistic skill with scientific knowledge to create visual solutions for complex communication and educational needs in healthcare. In short, medical illustrators visualize better health. Entry into this field requires strong ability in visual storytelling and graphic arts, along with a genuine interest in science.

The Medical Illustration graduate program is housed in the Department of Medical Illustration in the College of Allied Health Sciences.

augusta.edu/alliedhealth/medical-illustration

Program Accreditation

The program is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP). It is one of only four such accredited graduate programs in the country.

Admissions Information

Please see the Office of Admissions website for specific admissions information:

Progression and Graduation Requirements

- Students must earn a grade of C or higher in all courses taken to remain in the program.

- Students must complete 63 hours of curriculum coursework as well as pass the departmental comprehensive exam to graduate from the program.

Program Information

- Program Length: 21 Months
- CIP Code: 51.2703
- Program Code: MSIL_MILL
- Major Code: MILL

Degree Requirements

- ANAT 8050 - Graduate Histology (5 Credit Hours)
- MILL 6650 - Medical Illustration Techniques IA (3 Credit Hours)
- MILL 6651 - Medical Illustration Techniques IB (3 Credit Hours)
- MILL 6670 - Electronic Media I (3 Credit Hours)
- MILL 6671 - Electronic Media II (3 Credit Hours)
- MILL 6780 - Surgical Techniques (2 Credit Hours)
- MILL 7010 - Human Gross Anatomy for Medical Illustration, Part I (4 Credit Hours)
- MILL 7011 - Human Gross Anatomy for Medical Illustration, Part II (3 Credit Hours)
- MILL 7040 - Neuroanatomy for Medical Illustration (4 Credit Hours)
- MILL 7650 - Surgical Observation and Sketching I (3 Credit Hours)
- MILL 7651 - Surgical Observation and Sketching II (1 Credit Hour)
- MILL 7660 - Medical Illustration Techniques IIA (3 Credit Hours)
- MILL 7661 - Medical Illustration Techniques IIB (3 Credit Hours)
- MILL 7670 - Multimedia I (3 Credit Hours)
- MILL 7671 - Multimedia II (3 Credit Hours)
- MILL 8020 - Business and Resource Management I (2 Credit Hours)
- MILL 8021 - Business and Resource Management II (3 Credit Hours)
- MILL 9210 - Investigation of a Problem (1 to 4 Credit Hours)
- MILL 9211 - Investigation of a Problem II (2 Credit Hours)
- MILL 9250 - Master's Project (1 to 4 Credit Hours)
- PATH 6010 - Pathology for Medical Illustrators I (3 Credit Hours)
- PATH 6011 - Pathology for Medical Illustrators II (2 Credit Hours)

Degree Total: 63 Hours

Term-by-Term Pathway

To outline and visualize the path from start to finish in this program, refer to the suggested Term-by-Term Pathway.

Master of Science in Medical Physiology

Program Overview

The Master of Science (MS) in Medical Physiology program is directed toward individuals who wish to improve their academic credentials, and develop a solid foundation in physiology, before applying to medical school or other professional schools in the healthcare field. Physiology is the fundamental basis of medicine and a critical component of all healthcare professional school programs. This program provides a strong foundation and depth of knowledge in human physiology, which students can build upon as they matriculate into professional school programs. The unique curriculum in this program is designed to demonstrate academic strength in graduate-level, rigorous STEM courses, which can strengthen a student's application to professional schools.

The program totals 30 credit hours and is designed to be completed in two semesters. Coursework consists of a series of core classes in physiology, pathophysiology, anatomy, and histology, followed by electives consisting of more advanced coursework in physiology or a laboratory research elective.

Admissions Information

For information on admissions requirements, visit the Office of Admissions website.

Progression and Graduation Requirements

- The requirements for satisfactory progression in the program and graduation will be consistent with the Graduate Student Handbook guidelines, as laid out by The Graduate School.
- Satisfactory progress toward the MS in Medical Physiology requires that a student maintain a cumulative grade point average (GPA) of at least 2.8 for all courses attempted. A minimum grade of C or satisfactory in courses graded S/U (where S = satisfactory, U = unsatisfactory) must be earned for each non-repeatable course applying toward a graduate degree, and a 2.8 cumulative GPA in all courses attempted toward the degree is required for graduation. For repeatable S/U courses only, students may be allowed up to one U grade.
- Any student whose cumulative GPA falls below 2.8 is placed on academic probation. While on probation, the student must earn a minimum of 3.0 each grading period until the cumulative GPA is raised to at least 2.8. Students who fail to earn at least 3.0 each period while on probation shall be recommended for academic dismissal from the program.
- The minimum requirement for an MS in Medical Physiology degree is two (2) full academic semesters. All coursework and other requirements must be completed within five (5) consecutive years from the date of enrollment. Leaves of absence (withdrawals) do not extend the five year limit.
- The Graduate School requires a cumulative GPA of at least 2.8 to graduate. Students cannot graduate with a D or F grade in any course and must re-take the course to earn at least a C grade or higher. Students cannot graduate with a U grade in any non-repeatable S/U course and likewise must re-take the course to earn an S grade.

Program Information

- Program Length: 1 Year
- CIP Code: 260901
- Program Code: MS_MEDP

Degree Requirements

Required Courses: 24 Hours

- PSIO 6110 - Medical Physiology I (8 Credit Hours)
- PSIO 6410 - Medical Anatomy (2 Credit Hours)
- PSIO 6510 - Medical Histology (2 Credit Hours)
- PSIO 6610 - Seminar in Physiology (1 Credit Hour) *(taken twice; once in Fall, once in Spring)*
- PSIO 6710 - Pathophysiology I (2 Credit Hours)
- PSIO 6720 - Pathophysiology II (2 Credit Hours)
- PSIO 6810 - Medical Physiology II (6 Credit Hours)

Electives: 6 Hours

Select either the Advanced Coursework or Research Elective option:

Advanced Coursework Electives

- PSIO 7210 - Advanced Renal Physiology (2 Credit Hours)
- PSIO 7310 - Advanced Cardiovascular Physiology (2 Credit Hours)
- PSIO 7510 - Advanced Cell and Molecular Physiology (2 Credit Hours)

Research Elective

- PSIO 7410 - Independent Research (6 Credit Hours)

Degree Total: 30 Hours

Master of Science in Medical Science

Program Overview

The Master of Science in Medical Science provides a valuable credential for students who do not complete the Doctor of Medicine but who have completed substantial medical education. Students will be able to translate their advanced education into a recognized academic credential, ensuring their education yields tangible workforce value.

Program Contact

Dr. Chris Fly
cfly@augusta.edu

Admissions Requirements

This program is only open to students actively enrolled in the Doctor of Medicine program at the Medical College of Georgia.

Progression and Graduation Requirements

Completion of a Research Scholarly Project, as verified by the MCG curriculum office.

Program Information

- Program Length: 1.5 Years
- CIP Code: 51.1401
- Program Code: MS_MESC
- Major Code: MESC
- Campus Code: M, SAV
- College Code: 04

*New students may **not apply** to this program. Students may be transitioned into this program through designated academic pathways or institutional processes.*

Degree Requirements

- MEDI 6100 - Orientation to Medicine Module (3 Credit Hours)
- MEDI 6110 - Patient Centered Learning 1 (11 Credit Hours)
- MEDI 6120 - Foundations of Medicine Module (15 Credit Hours)
- MEDI 6130 - Musculoskeletal/ Skin Module (12 Credit Hours)
- MEDI 6150 - MCG YOU+ Learning Communities (4 Credit Hours)
- MEDI 6210 - Patient Centered Learning 2 (13 Credit Hours)
- MEDI 6220 - Cardiopulmonary/Renal (16 Credit Hours)
- MEDI 6230 - Healthcare Matters Module (4 Credit Hours)
- MEDI 6240 - GI/Endocrine/Reproduction/Lifespan Module (15 Credit Hours)
- MEDI 6300 - Career Paths in Medicine (0 to 15 Credit Hours)
- MEDI 6310 - Patient Centered Learning 3 (12 Credit Hours)
- MEDI 6320 - Brain, Behavior, and Movement Module (15 Credit Hours)
- MEDI 6340 - Capstone in Medicine 1 Module (12 Credit Hours)

Degree Total: 149 Credit Hours

Term-by-Term Pathway

To outline and visualize the path from start to finish in this program, refer to the suggested Term-by-Term Pathway.

Master of Science in Nursing in Clinical Nurse Leader (Prelicensure)

Program Overview

The Clinical Nurse Leader program (CNL) prepares nurses to be clinical leaders with the skills to thrive in the current and future health care system while striving to improve client outcomes and reduce health care costs. The program is a second-degree, accelerated nursing program integrating didactic and clinical instruction for individuals with a baccalaureate or higher degree in a non-nursing field. Students are prepared for the registered nurse licensure examination and graduate with a Master of Science in Nursing degree. The CNL is a generalist (not an advanced-practice nurse) with nursing knowledge, comprehension of the infrastructure of the health care system, clinical decision-making skills, resource management strategies and the ability to manage complex information. The CNL program has partnered with several healthcare institutions to support the program's educational efforts and provide possible career opportunities following graduation. The program and partnerships will enhance the role development of the CNL through the engagement of highly skilled clinicians, outcomes-based practice and quality improvement strategies while providing high-quality patient care in the surrounding communities throughout Georgia.

augusta.edu/nursing/msn

Program Accreditation

The CNL program has been fully approved by the Georgia Board of Regents and the Georgia Board of Nursing and accredited by the Commission on Collegiate Nursing Education (CCNE).

Master of Science in Nutrition and Dietetics

Program Overview

The MS-Dietetic Internship Program is a 21-month program accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND). The program has a medical nutrition therapy (clinical) concentration that maximizes the unique variety of medical and health care facilities in the Augusta area.

augusta.edu/alliedhealth/nutrition-dietetics

Program Contact

Nicole Moore
706-721-2320
nimoore@augusta.edu

Admissions Information

See the program website above for specific admissions information.

Progression and Graduation Requirements

In order to complete the program, all graduate student interns must complete 45 credit hours, achieve a letter grade of B or higher on all graduate courses, and complete a capstone project. Graduate students must complete 1152 hours of supervised practice, achieve all ACEND competencies, and score 80% or higher on supervised practice performance evaluations, projects, assignments, and other activities assigned by the preceptors and/or program director. Students are also required to complete 30 volunteer hours in the first year and 20 volunteer hours in the second year. Graduate student interns meeting the above criteria will also receive an ACEND Verification

Statement signed by the director. Graduate student interns (graduates) will then be eligible to take the Registered Dietitian Nutritionist Exam.

Program Information

- Program Length: 2 Years
- CIP Code: 51.3101
- Program Code: MS_NTDI
- Major Code: NTDI
- Campus Code: M

Degree Requirements

- CAHS 6501 - Evidence-Based Practice (2 Credit Hours)
- CAHS 7100 - Pathophysiology for Allied Health Professionals (3 Credit Hours)
- CAHS 7200 - Capstone Project (2 Credit Hours)
- FDNS 6500 - Special Topics in Nutrition and Foods (1 Credit Hour)
- FDNS 7200 - Advanced Nutrition- Macronutrients (3 Credit Hours)
- FDNS 7210 - Advanced Nutrition- Micronutrients (3 Credit Hours)
- FDNS 7300 - Advanced Nutritional Status Assessment Techniques Lab (2 Credit Hours)
- FDNS 7350 - Nutrition for Older Adults (2 Credit Hours)
- FDNS 7380 - Maternal, Infant, and Child Nutrition (2 Credit Hours)
- FDNS 7400 - Advanced Medical Nutrition Therapy (4 Credit Hours)
- FDNS 7500 - Obesity: Prevention, Treatment, and Management (2 Credit Hours)
- FDNS 7650 - Food, Culture, and Sustainability (2 Credit Hours)
- FDNS 7800 - Nutrition Independent Study (2 Credit Hours)
- FDNS 7850 - Dietetic Internship (3 Credit Hours) (*taken for a total of 9 hours*)
- FDNS 7900 - Nutritional Genomics (3 Credit Hours)
- STAT 6300 - Introduction to Epidemiology and Biostatistics (3 Credit Hours)

Degree Total: 45 Hours

Term-by-Term Pathway

To outline and visualize the path from start to finish in this program, refer to the suggested Term-by-Term Pathway.

Master of Science in Oral Biology

Program Overview

Our close-knit, interdisciplinary faculty allows research training that emphasizes an integrative approach and includes expertise in molecular, cellular, bioengineering, and in vivo research methodologies. The Master of Science (MS) in Oral Biology program was founded with the idea that its faculty would have dual degrees in clinical dentistry and basic science. Thus, many faculty hold dental and PhD degrees in basic biomedical science disciplines. Topics covered in the Oral Biology MS program include: wound healing and tissue regeneration; hard tissue biology; fluoride metabolism; muscle anatomy and physiology; taste; facial pain (including causes and management); management of complex dental patients; dental pharmacology; oral immunology; oral microbiology; molecular pathology; regulation of cell growth; and craniofacial development.

augusta.edu/programs/oral-biology-ms

Program Contact

Progression and Graduation Requirements

- The MS in Oral Biology curriculum is comprised of 36 total credit hours, which can be accomplished in a minimum of five semesters or maximum of 15 semesters.

Program Information

- Program Length: 2 Years
- CIP Code: 51.0503
- Program Code: MSOB_OBIO

Degree Requirements

- OBMP 8001 - Topics in Oral Biology 1 (2 Credit Hours)
- OBMP 8002 - Topics in Oral Biology II (2 Credit Hours)
- OBMP 8003 - Topics in Oral Biology III (2 Credit Hours)
- OBMP 8004 - Topics in Oral Biology 4 (2 Credit Hours)
- OBMP 8640 - Research Proposal Development (2 Credit Hours)
- OBMP 9010 - Graduate Oral Biology Seminar (1 Credit Hour)
Must be taken every spring until degree completion.
- OBMP 9100 - Journal Club in Oral Biology (1 Credit Hour)
Must be taken every fall until degree completion.
- OBMP 9210 - Investigation of a Problem (1 to 12 Credit Hours)
Must be taken until the research proposal is successfully defended.
- OBMP 9300 - Research (1 to 16 Credit Hours)
Must be taken until degree completion.

Degree Total: 36 Hours Minimum

Term-by-Term Pathway

To outline and visualize the path from start to finish in this program, refer to the suggested Term-by-Term Pathway.

Master of Science in Psychology with a Concentration in Applied Experimental

Program Overview

This track prepares students to work as a research assistant or associate immediately after graduation. Graduates of this track typically work under the direction of doctoral level researchers coordinating large research projects. Students gain intensive research experiences through a first-year research practicum with a faculty mentor and 450 hours of internship experiences. It is a 36-hour program completed over five semesters. Some students also use this degree to teach psychology at the college level and teaching internships are an option.

Military Science Curriculum

Program Overview

To recruit, educate, train, and commission leaders of character for the total army. To commission Second Lieutenants who demonstrate the potential to be agile, adaptive, and innovative tactical leaders capable of succeeding in complex situations.

augusta.edu/militaryscience

Admissions Information

A student enrolled in basic course classes incurs no obligation to the U.S. Army. Advanced course students are obligated to serve and will receive a subsistence allowance of \$420 per month for up to 20 academic months while in college. Other training opportunities such as Air Assault, Airborne School, Arctic Warfare School, and Cadet Troop Leadership Training (CTLT) in active units are available on a competitive basis with military subsistence and some paid benefits. A student in any major/minor field of study is eligible. During the senior year of study (MS IV), the student is offered the option to select the type of job that they desire to perform, the first permanent duty post, and the type of commission, either Regular Army or Army Reserve, that they prefer. The Army at no charge provides all necessary uniforms to the individual.

Progression and Graduation Requirements

- Academic credit, applicable toward graduation, is granted for all military science coursework.
- Any advanced course credits earned apply within the Minor in General Studies.
- All Military Science courses include a 2-hour lab instruction and 3 hours of physical training weekly.
- The principal element of the Professional Military Education (PME) requirement is the bachelor's degree. As an integral part of that undergraduate education, prospective officers are required to take at least one course in military history and consult the Department Chair of Military Science for approved courses.

Program Requirements

Basic Courses, Freshman Year (MS I)

- MILS 1011 - Foundations of Officership (3 Credit Hours)
- MILS 1021 - Basic Leadership (3 Credit Hours)

Basic Courses, Sophomore Year (MS II)

- MILS 2011 - Individual Leadership Studies (3 Credit Hours)
- MILS 2021 - Leadership and Teamwork (3 Credit Hours)

Leader's Training Course:

The Leader's Training Course is a 28-day "World-Class" leadership development experience qualifying and motivating college students to enter into the senior Army ROTC program. A student who did not participate in the basic program who has no more than two years remaining before graduation may qualify for the advanced program through the summer course given at Fort Knox, KY each year.

Graduate students are eligible for this program as well; those attending receive approximately \$800 with all meals, lodging, and transportation while attending the summer internship. This program enables the student to determine if he or she desires a career in the military and qualifies the student for the advanced course if he or she chooses. No obligation is incurred by attending Leader's Training Course, (MILS 3060 - Leadership Training Course Summer Internship (3 Credit Hours).) Successful completion of this course can qualify the student for a two year scholarship for the remaining two years.

Compression:

While the normal sequence of course work requires two full academic years, it is possible to compress the course work into less than two years by taking two Military Science courses during the same semester. Compression is not recommended or desired but will be considered on an individual basis by the Department Chair.

Exemption:

Credit for all or part of the basic course may be granted upon presentation of evidence that the student has had equivalent training. Examples of such training are active military service, Senior Division Navy or Air Force ROTC credit, or 3 years Junior ROTC credit. In every case, the credit exemption must be approved by the Department Chair. No academic credit is given for courses exempted under this program.

Eligibility Requirements for Advanced Course:

GPA of 2.00 or higher; completion or credit for completion of the basic course; meeting Army physical requirements; have no more than two years remaining until graduation; permission of the Department Chair.

Advanced Courses, Junior Year (MS III)

- MILS 3011 - Leadership and Problem Solving (3 Credit Hours)
- MILS 3021 - Leadership and Ethics (3 Credit Hours)
- MILS 3060 - Leadership Training Course Summer Internship (3 Credit Hours)

Advanced Courses, Senior Year (MS IV)

- MILS 4011 - Leadership Management (3 Credit Hours)
- MILS 4021 - Officership (3 Credit Hours)
- MILS 4060 - Leadership Development and Assessment (3 Credit Hours)
- MILS 4950 - Selected Topics (3 Credit Hours)

Leadership Development and Assessment Course:

A five-week summer course conducted at Fort Knox, KY. Only open to (and required of) students who have completed MILS 3011 and MILS 3021. Students will also receive half the base pay of a Sergeant for 5 weeks (approximately \$800). Travel, lodging and meal costs are defrayed by the U.S. Army. The Leader Development and Assessment Course environment is highly structured, demanding, and stresses leadership at small unit levels under varying, challenging conditions. Prior to attending this course students must demonstrate and be able to pass a swim test. This swim test consists of a 10-minute swim using any combination of strokes and 5 minutes of treading water.

Professional Military Education Requirements

The principal element of the Professional Military Education (PME) requirement is the bachelor's degree. As an integral part of that undergraduate education, prospective officers are required to take at least one course in Military History and consult the department chair of Military Science for approved courses.

Minor in Accounting

Program Overview

The Minor in Accounting gives students an opportunity to learn basic concepts to build a good accounting foundation.

augusta.edu/hull

Progression and Graduation Requirements

- A grade of B or better is required in ACCT 2101 and ACCT 2102
- A grade of C or better is required in all Upper Division courses
- Per USG policy, courses taken to satisfy Core IMPACTS requirements may not be counted as coursework in the minor

Minor Requirements

Lower-Division Courses: 6 Hours

Grade of B or better is required in all Lower-Division courses.

- ACCT 2101 - Principles of Accounting I (3 Credit Hours)
- ACCT 2102 - Principles of Accounting II (3 Credit Hours)

Upper-Division Courses: 12 Hours

Grade of C or better is required in all Upper-Division courses.

Select four of the following courses:

- ACCT 3311 - Intermediate Accounting I (3 Credit Hours)
- ACCT 3312 - Intermediate Accounting II (3 Credit Hours)
- ACCT 3321 - Cost Accounting (3 Credit Hours)
- ACCT 3331 - Individual Taxation (3 Credit Hours)
- ACCT 4350 - Accounting Information Systems (3 Credit Hours)
- ACCT 4380 - Governmental and Institutional Accounting (3 Credit Hours)

Minor Total: 18 Hours

Minor in Anthropology

Program Overview

Anthropology studies all past and present aspects of human culture, including human biological and cultural diversity, human origins, the origins and development of cultural complexity, analyzing material artifacts, preserving heritage, and understanding and solving problems related to globalization and the multicultural environments it creates in business, healthcare, education, government, NGOs, etc. that individuals and societies must negotiate in the modern world. As a field covering a broad range of topics, as a minor it is an excellent complement to other disciplines and career choices.

augusta.edu/pamplin/hist-anth-phil/anthropology

Progression and Graduation Requirements

- A grade of C or better is required in each course
- Courses taken to satisfy Core IMPACTS requirements may not be counted as coursework in the minor

Minor Requirements

Lower Division Courses: 3 Hours

- ANTH 1102 - Introductory Anthropology (3 Credit Hours)
- ANTH 2011 - Cultural Anthropology (3 Credit Hours)

Upper Division Courses: 15 Hours

Take five courses from the following; at least three courses must be taken in residence at this university:

- ANTH 3001 - Methods in Cultural Anthropology (4 Credit Hours)
- ANTH 3002 - Methods in Archaeology (4 Credit Hours)
- ANTH 3290 - Archaeology of the Americas (3 Credit Hours)
- ANTH 3411 - Native Americans (3 Credit Hours)
- ANTH 3535 - Medical Anthropology (3 Credit Hours)
- ANTH 3817 - African Cultural Issues (3 Credit Hours)
- ANTH 3831 - Archaeology (3 Credit Hours)
- ANTH 3841 - Biological Anthropology (3 Credit Hours)
- ANTH 3851 - Religion, Culture, and Society (3 Credit Hours)
- ANTH 3870 - Identity: Ethnicity, Gender, and Class (3 Credit Hours)
- ANTH 4210 - Historical Archaeology (3 Credit Hours)
- ANTH 4217 - Travelers, Migrants and Refugees (3 Credit Hours)
- ANTH 4541 - Food and Culture (3 Credit Hours)
- ANTH 4950 - Selected Topics (1 to 3 Credit Hours)
- ANTH 4960 - Internship (1 to 3 Credit Hours)
- ANTH 4990 - Undergraduate Research (1 to 3 Credit Hours)
- HIST 4111 - History of World Religions (3 Credit Hours)
- MUSI 3330 - Music of the World's Peoples (3 Credit Hours)

Minor Total: 18 Hours

Minor in Art

Program Overview

Students minoring in studio art have the opportunity to incorporate artistic passion with their academic pursuits. These students fulfill their art interests through courses in painting, ceramics, drawing, sculpture, printmaking and photography. These engaging studio classes provide creative experiences in fine arts.

augusta.edu/pamplin/art

Progression and Graduation Requirements

- A grade of C or better is required in Upper-Division Courses
- Courses taken to satisfy Core IMPACTS Requirements may not be counted as coursework in the minor

Minor Requirements

Lower Division Courses: 9 Hours

- ART 1211 - Drawing I: An Introduction to Techniques and Methods of Expression (3 Credit Hours)

- ART 1520 - Two-Dimensional Design (3 Credit Hours)
- ART 1530 - Three-Dimensional Design (3 Credit Hours)

Upper Division Courses: 9 Hours

Select 3 upper-division Studio Art or Art History courses.

Minor Total: 18 Hours

Minor in Biology

Program Overview

The Biology minor offers students a strong foundation in biological principles through coursework and hands-on lab experiences. It complements a variety of majors and enhances preparation for careers or advanced study in health, research, and environmental sciences.

augusta.edu/scimath/biological-sciences

Progression and Graduation Requirements

- Students minoring in biology should see a biology faculty member as early in their careers as possible. Major-minor combinations that combine biology and/or cell and molecular biology are not permitted.
- Courses taken to satisfy General Education/Core IMPACTS may not be counted as coursework in the minor.

Prerequisite Courses

Prerequisite courses do not count toward the minor, but they are required to be taken in order to enroll in courses that are included in the minor.

- BIOL 1107 - Principles of Biology I (3 Credit Hours)
- BIOL 1107L - Principles of Biology I Laboratory (1 Credit Hour)
- BIOL 1108 - Principles of Biology II (3 Credit Hours)
- BIOL 1108L - Principles of Biology II Laboratory (1 Credit Hour)

Minor Requirements

Upper-Division Courses: 15-18 Hours

In consultation with their major department and the Department of Biological Sciences, students select 15-18 hours from any upper-division biology courses. A grade of C or better is required in all courses toward the minor.

- BIOL 3XXX
- BIOL 4XXX

Minor Total: 15-18 Hours

Minor in Business Administration

Program Overview

The Minor in Business Administration provides students with a broad understanding of business practice and applications.

augusta.edu/hull

Progression and Graduation Requirements

- A grade of C or better required in all Lower and Upper Division courses.
- Per USG policy, courses taken to satisfy Core IMPACTS requirements may not be counted as coursework in the minor.

Minor Requirements

Lower-Division Courses: 9 Hours

A grade of C or better is required in all courses.

- ACCT 2101 - Principles of Accounting I (3 Credit Hours)
- MGMT 2106 - Legal and Ethical Environment of Business (3 Credit Hours)

Economics Elective

Select one of the following:

- ECON 1810 - Introduction to Economics (3 Credit Hours)
- ECON 2105 - Macroeconomics (3 Credit Hours)
- ECON 2106 - Microeconomics (3 Credit Hours)

Upper-Division Courses: 9 Hours

A grade of C or better is required in all courses.

- MGMT 3500 - Management Theory and Practice (3 Credit Hours)
- MKTG 3700 - Principles of Marketing (3 Credit Hours)
- FINC 3400 - Corporate Finance (3 Credit Hours)

Minor Total: 18 Hours

Minor in Chemistry

Program Overview

By earning a chemistry minor, you will learn foundational chemical principles and obtain practical laboratory skills that will enhance the value of any degree. There is also sufficient flexibility to explore a classic or specialized field of chemistry within the minor. A faculty advisor in chemistry can provide guidance for your best path. Employees with a chemistry background are employed in a very wide array of areas.

augusta.edu/scimath/chemistry

Progression and Graduation Requirements

- Courses taken to satisfy Core IMPACTS requirements may not be counted as coursework in the minor
- A grade of C or better is required in all chemistry courses
- All courses must be approved by the Chair of the Department of Chemistry and Biochemistry (prior approval is recommended)

Prerequisite Courses

Prerequisite courses do not count toward the minor, but they are required to be taken in order to enroll in courses that are included in the minor.

- CHEM 1211 - Principles of Chemistry I (3 Credit Hours)
- CHEM 1211L - Principles of Chemistry I Laboratory (1 Credit Hour)
- CHEM 1212 - Principles of Chemistry II (3 Credit Hours)
- CHEM 1212L - Principles of Chemistry II Laboratory (1 Credit Hour)
- CHEM 2810 - Quantitative Analysis (5 Credit Hours)

Minor Requirements

Required Courses: 9 Hours

- CHEM 2810 - Quantitative Analysis (5 Credit Hours)
- CHEM 3411 - Organic Chemistry I (3 Credit Hours)
- CHEM 3411L - Organic Chemistry I Laboratory (1 Credit Hour)

Elective Courses: 6-8 Hours

Select from the following:

- CHEM 3000 - Introduction to Nuclear Science (3 Credit Hours)
- CHEM 3412 - Organic Chemistry II (3 Credit Hours)
- CHEM 3412L - Organic Chemistry II Laboratory (1 Credit Hour)
- CHEM 3721 - Physical Chemistry I (3 Credit Hours)
- CHEM 4100 - Forensic Chemistry (4 Credit Hours)
- CHEM 4210 - Advanced Inorganic Chemistry (3 Credit Hours)
- CHEM 4450 - Advanced Organic Chemistry: Synthesis (3 Credit Hours)
- CHEM 4460 - Advanced Organic Chemistry: Mechanisms (3 Credit Hours)
- CHEM 4551 - Biochemistry I: Physical Biochemistry (3 Credit Hours)
- CHEM 4600 - Physical Chemistry II - Quantum Mechanics (3 Credit Hours)
- CHEM 4840 - Instrumental Analysis (4 Credit Hours)
- CHEM 4950 - Selected Topics (1 to 4 Credit Hours)

- CHEM 3990 - Undergraduate Research (0 to 3 Credit Hours) (*maximum 3 hours total*)
- or CHEM 4990 - Undergraduate Research (0 to 3 Credit Hours) (*maximum 3 hours total*)
- or CHEM 4993 - Research Thesis (1 Credit Hour) (*maximum 3 hours total*)

Minor Total: 15-17 Hours

Minor in Communication

Program Overview

Surveys show that employers want to hire graduates with excellent communication skills. The Communication minor is an excellent way to develop strong skills that will complement any major area of study.

augusta.edu/pamplin/communication

Progression and Graduation Requirements

- A grade of C or better is required for all work in the minor
- Courses taken to satisfy Core IMPACTS requirements may not be counted as coursework in the minor

Minor Requirements

Lower-Division Courses: 6 Hours

Select two of the following courses:

- COMM 2000 - Writing for Communication Professionals (3 Credit Hours)
- COMM 2010 - Media Literacy (3 Credit Hours)
- COMM 2020 - Introduction to Research (3 Credit Hours)

Upper-Division Courses: 12 Hours

Select four 3000-or 4000-level COMM courses.

Minor Total: 18 Hours

Minor in Computer Science

Program Overview

The School of Computer and Cyber Sciences offers a minor for students interested in achieving a fundamental understanding of the field of computer science. The computer science minor is open to all students at Augusta University, regardless of the student's degree program.

augusta.edu/ccs

Program Contact

Dr. Konstantin Busch

706-721-1100

ccs@augusta.edu

Progression and Graduation Requirements

- A grade of C or better is required for all work in the minor
- Courses taken to satisfy Core IMPACTS requirements may not be counted as coursework in the minor

Minor Requirements

Lower Division: 7 Hours

A grade C or better is required in all Lower Division courses.

- CSCI 1301 - Principles of Computer Programming I (4 Credit Hours)
- CSCI 1302 - Principles of Computer Programming II (3 Credit Hours)

Upper Division: 9 Hours

A grade of C or better is required in all Upper Division courses. Students must meet prerequisites before attempting courses.

Select nine hours from the following courses:

- CSCI 3030 - Mathematical Structures for Computer Science (3 Credit Hours)
- CSCI 3170 - Computer Organization (3 Credit Hours)
- CSCI 3271 - Operating System (3 Credit Hours)
- CSCI 3300 - Programming Languages Concepts (3 Credit Hours)
- CSCI 3370 - Assembly Language Programming (3 Credit Hours)
- CSCI 3400 - Data Structures (3 Credit Hours)
- CSCI 3410 - Database Systems (3 Credit Hours)
- CSCI 4420 - Distributed and Mobile Systems (3 Credit Hours)
- CSCI 3430 - Artificial Intelligence (3 Credit Hours)
- CSCI 3500 - Theory of Computation (3 Credit Hours)
- CSCI 3600 - Internet Programming (3 Credit Hours)
- CSCI 4711 - Software Engineering (3 Credit Hours)
- CSCI 4712 - Senior Capstone Project (3 Credit Hours)
- CSCI 4800 - Compiler Writing (3 Credit Hours)
- CSCI 4820 - Computer Graphics (3 Credit Hours)
- CSCI 4950 - Selected Topics (1 to 3 Credit Hours)
- CSCI 4990 - Undergraduate Research (1 to 3 Credit Hours)
- Any other Upper Division (3000-4000) CSCI course

Minor Total: 16 Hours

Minor in Criminal Justice

Program Overview

A Minor in Criminal Justice helps students learn about various aspects of the criminal justice systems and crime. Students may choose to focus on a particular part of the system or learn about many aspects to include law enforcement, corrections, and the administration of justice. The minor is a great addition for students whose careers may have them interact with those in the criminal justice system including biology, chemistry, english, political science, psychological sciences, social work, sociology, and more. Our minor is interdisciplinary and includes courses in criminal justice, sociology, political science, and psychology.

It is the responsibility of the student to initiate and maintain contact with an advisor to insure the proper selection and sequence of courses.

augusta.edu/pamplin/social-sciences/minors

Progression and Graduation Requirements

- A minimum grade of C is required in all prerequisites and upper division courses.
- Prerequisites to the Minor: CRJU 1103 is a prerequisite to all upper division courses; POLS 1101 is a prerequisite to all upper division POLS courses; SOCI 1101 is a prerequisite to all upper division SOCI courses.
- Courses taken to satisfy Core IMPACTS requirements may not be counted as coursework in the minor.

Program Contact

Dr. William Hatcher
706-737-1710
soscsci@augusta.edu

Minor Requirements

Upper-Division Courses: 15 Hours

In consultation with a criminal justice advisor, select five 3000/4000 courses from the specific courses used to satisfy the Criminal Justice major.

Minor Total: 15 Hours

Minor in Economics

Program Overview

The Minor in Economics gives students the opportunity to integrate economic analysis and modeling to address business and societal issues.

augusta.edu/hull

Progression and Graduation Requirements

- A grade of C or better is required for all work in the minor
- Courses taken to satisfy Core IMPACTS requirements may not be counted as coursework in the minor

Minor Requirements

Lower Division Courses: 6 Hours

A grade of C or better is required in all Lower-Division courses.

- ECON 2105 - Macroeconomics (3 Credit Hours)
- ECON 2106 - Microeconomics (3 Credit Hours)

Upper-Division Courses: 12 Hours

A grade of C or better is required in all Upper-Division courses.

- ECON 3105 - Intermediate Macroeconomics (3 Credit Hours)
- ECON 3106 - Intermediate Microeconomics (3 Credit Hours)

Upper-Division Electives: 6 Hours

Plus select two from the following:

- ECON 3130 - Healthcare Economics and Finance (3 Credit Hours)
- ECON 4106 - Firm and Industry Studies (3 Credit Hours)
- ECON 4110 - Economic Modeling and Forecasting (3 Credit Hours)

- ECON 4420 - Financial Markets and Institutions (3 Credit Hours)
- or FINC 4420 - Financial Markets and Institutions (3 Credit Hours)

- ECON 4820 - International Economics and Finance (3 Credit Hours)
- ECON 4990 - Undergraduate Research (1 to 3 Credit Hours)
- Other courses as determined by Economics faculty

Minor Total: 18 Hours

Minor in English Literature

Program Overview

The literature minor allows students to study American, British, and World literature. Working closely with faculty mentors, students acquire a foundation in great literary texts.

augusta.edu/pamplin/english-world-languages

Progression and Graduation Requirements

- Courses taken to satisfy the Core IMPACTS Curriculum may not be counted as coursework in the minor
- A grade of C or better required in each course
- Prerequisites to the Minor: (1) ENGL 1101 or ENGL 1101H and (2) ENGL 1102 or ENGL 1102H

Minor Requirements

Lower-Division English Literature Courses: 6 Hours

Select two of the following:

- ENGL 2060 - Introduction to Literature (3 Credit Hours)
- ENGL 2111 - World Literature I (3 Credit Hours)
- ENGL 2112 - World Literature II (3 Credit Hours)
- ENGL 2121 - British Literature I (3 Credit Hours)
- ENGL 2122 - British Literature II (3 Credit Hours)
- ENGL 2131 - American Literature I (3 Credit Hours)
- ENGL 2132 - American Literature II (3 Credit Hours)
- ENGL 2140 - African American Literature (3 Credit Hours)

Required Course: 3 Hours

- ENGL 3250 - Introduction to Theory and Method (3 Credit Hours)

Upper-Division English Literature Courses: 6 Hours

Select two of the following:

- ENGL 3110 - Topics in African American Literature and Culture (3 Credit Hours)
- ENGL 3120 - Southern Literature (3 Credit Hours)
- ENGL 3310 - Women's Literature (3 Credit Hours)
- ENGL 3320 - Children's Literature (3 Credit Hours)
- ENGL 3330 - Literature for Pre-Adolescents and Adolescents (3 Credit Hours)
- ENGL 4000 - Studies in British Literature (3 Credit Hours)
- ENGL 4100 - Studies in American Literature (3 Credit Hours)
- ENGL 4200 - Studies in Genre (3 Credit Hours)
- ENGL 4220 - Contemporary Theatre (3 Credit Hours)
- ENGL 4230 - Modern Poetry (3 Credit Hours)
- ENGL 4250 - The Modern American Novel (3 Credit Hours)
- ENGL 4261 - The English Novel to 1900 (3 Credit Hours)
- ENGL 4262 - The Modern British Novel (3 Credit Hours)
- ENGL 4310 - Studies in Feminism (3 Credit Hours)
- ENGL 4350 - Studies in Medieval Literature and Medievalism (3 Credit Hours)

- ENGL 4360 - Studies in World Literature (3 Credit Hours)
- ENGL 4410 - Chaucer (3 Credit Hours)
- ENGL 4420 - Shakespeare (3 Credit Hours)
- ENGL 4430 - Milton (3 Credit Hours)
- ENGL 4440 - Major British Authors (3 Credit Hours)
- ENGL 4450 - Major American Authors (3 Credit Hours)
- ENGL 4460 - Mythology and Folklore (3 Credit Hours)
- ENGL 4470 - Imagining Other Worlds (3 Credit Hours)
- ENGL 4950 - Selected Topics (3 Credit Hours)

Minor Total: 15 Hours

Minor in English Writing

Program Overview

A Minor in English Writing complements any major at Augusta University. After passing ENGL 1101 and ENGL 1102 with a C or better, students may select only four English courses from the 3000 and 4000 series.

augusta.edu/pamplin/english-world-languages/english

Progression and Graduation Requirements

- Prerequisites to the Minor: (1) ENGL 1101 or ENGL 1101H and (2) ENGL 1102 or ENGL 1102H
- Courses taken to satisfy the Core IMPACTS Curriculum may not be counted as coursework in the minor
- A grade of C or better is required in each course

Program Information

- Program Length: 0.5 Years

Minor Requirements

Introductory Writing Course: 3 Hours

Select one of the following:

- ENGL 2110 - Creative Writing (3 Credit Hours)
- ENGL 2680 - Professional and Technical Writing (3 Credit Hours)

Elective Courses: 12 Hours

Select four upper-level courses from the following:

- ENGL 3620 - Writing for the Theatre (3 Credit Hours)
- ENGL 3630 - The Art of Poetry (3 Credit Hours)
- ENGL 3640 - The Art of Fiction (3 Credit Hours)
- ENGL 3650 - Grant Writing (3 Credit Hours)
- ENGL 3660 - The Art of the Essay (3 Credit Hours)
- ENGL 3681 - Advanced Style and Editing (3 Credit Hours)
- ENGL 3686 - Introduction to Writing in the Sciences (3 Credit Hours)
- ENGL 3687 - User Research and Design (3 Credit Hours)

- ENGL 3700 - Introduction to Professional Writing and Rhetoric (3 Credit Hours)
- ENGL 3830 - Writing Center Theory and Practice (3 Credit Hours)
- ENGL 4630 - Advanced Poetry Workshop (3 Credit Hours)
- ENGL 4640 - Advanced Fiction Workshop (3 Credit Hours)
- ENGL 4660 - Advanced Creative Nonfiction Workshop (3 Credit Hours)
- ENGL 4670 - Sand Hills Literary Editing and Publishing (3 Credit Hours)
- ENGL 4680 - Special Topics in Writing (3 Credit Hours)
- ENGL 4690 - Rhetoric and Digital Media (3 Credit Hours)
- ENGL 4960 - Undergraduate Internship (1 to 3 Credit Hours)
- ENGL 4961 - Professional Writing Internship (3 Credit Hours)
- ENGL 4990 - Undergraduate Research (3 Credit Hours)

Minor Total: 15 Hours

Minor in French

Program Overview

The French minor is designed for students interested in the French language and French-speaking cultures. Students will develop reading, writing, speaking, and listening skills in French and be prepared to use the French language in their field of interest upon graduation.

augusta.edu/pamplin/english-world-languages/worldlanguages

Program Contact

Progression and Graduation Requirements

- Courses taken to satisfy the Core IMPACTS Curriculum may not be counted as coursework in the minor.
- Grade of C or better is required in all courses.
- For information on foreign language credit by examination through CLEP, the International Baccalaureate Program or the Defense Language Institute, visit the Office of Admissions website.

Program Information

- Program Length: 4 Years

Minor Requirements

Lower Division Courses: 6 Hours

- FREN 2001 - Intermediate French I (3 Credit Hours)
- FREN 2002 - Intermediate French II (3 Credit Hours)

Upper Division Courses: 12 Hours

Complete 12 hours of French courses at the 3000/4000* level, including at least one of the following courses:

*Note: FREN 4801 and FREN 4802 cannot be used for the French minor

- FREN 3100 - Oral Expression in French (3 Credit Hours)
- FREN 3300 - Written Expression in French (3 Credit Hours)
- FREN 3400 - French Phonetics (3 Credit Hours)

Minor Total: 18 Hours

Minor in General Studies

Program Overview

The student and the student's advisor should plan the minor around a theme appropriate to the student's educational goals. The advisor and the department chair for the student's major must approve the courses used for the minor, and the chair must sign the application for graduation as chair of the minor.

augusta.edu/pamplin

Progression and Graduation Requirements

- A grade of C or better is required for all work in the minor
- Courses taken to satisfy Core IMPACTS requirements may not be counted as coursework in the minor

Minor Requirements

Upper-Division Courses: 15 Hours

The minor requires 15 hours of coursework at the 3000 and 4000 level in at least two disciplines, with at most 9 hours from one discipline. At least 9 hours must be taken at this university. Courses may not be chosen from the student's major.

Minor Total: 15 Hours

Minor in German

Program Overview

The ability to communicate in more than one language has become a prized skill in the global marketplace. The foreign language minor prepares students for this changing marketplace. The German minor is designed for students interested in the German language and German-speaking cultures. Students will develop reading, writing, speaking, and listening skills in German and be prepared to use the German language in their field of interest upon graduation. The minor requires 18 hours of German courses.

- GRMN 2002 - Intermediate German II (3 Credit Hours)

Upper Division Courses: 12 Hours

Complete 12 hours of German courses at the 3000/4000 level, choosing 4 of the following courses.

- GRMN 3100 - Oral Communication in German (3 Credit Hours)
- GRMN 3220 - German Society and Culture (3 Credit Hours)
- GRMN 3300 - German Grammar and Written Communication (3 Credit Hours)
- GRMN 3510 - Introduction to German Literature (3 Credit Hours)
- GRMN 3520 - Studies in German Literature (3 Credit Hours)
- GRMN 4950 - Selected Topics (3 Credit Hours)
- SABR 3930 - Studies Abroad (1 to 3 Credit Hours)
- SABR 4930 - Studies Abroad (1 to 12 Credit Hours)

Minor Total: 18 Hours

Minor in Gerontology

Program Overview

A Minor in Gerontology helps prepare students for careers working with older adults or being advocates for the elderly. This minor is an excellent addition to a degree for anyone who will be helping people as they age including doctors, nurses, social workers, human service workers, and occupational therapists. As our population continues to age, the need for educated professionals in gerontology will continue to grow. Our minor includes courses in sociology, social work, and psychology and allows/encourages students to do an internship.

- SOSC 4960 - Social Science Undergraduate Internship (0 to 12 Credit Hours)
- SOWK 4960 - Undergraduate Internship (3 Credit Hours)
- SOWK 4990 - Undergraduate Research (1 to 3 Credit Hours)

Minor Total: 18 Hours

Minor in History

Program Overview

Our history program immerses students in the laboratory of the human past, under the guidance of a renowned faculty who teach courses about real people and their triumphs and failures. We show how humanity has shaped cultural, economic and political forces, both close to home and far-afield. Our history minor requires students complete one intro-level world civilizations course (either HIST 1111 or HIST 1112), and any five upper-level history courses. The Minor in History is a good complement to other disciplines.

augusta.edu/pamplin/hist-anth-phil

Progression and Graduation Requirements

- A grade of C or better is required for all work in the minor
- Courses taken to satisfy Core IMPACTS requirements may not be counted as coursework in the minor

Minor Requirements

Lower-Division Courses: 3 Hours

Select one of the following:

- HIST 1111 - Pre-Modern World Civilization (3 Credit Hours)
- HIST 1112 - Modern World Civilization (3 Credit Hours)

Upper-Division Courses: 15 Hours

Select five upper-division HIST 3XXX or HIST 4XXX courses. *Note: a concentration of more than two upper-division courses in any field of history is discouraged.*

Students may also count one of the following courses toward the minor:

- ANTH 3411 - Native Americans (3 Credit Hours)
- ANTH 3817 - African Cultural Issues (3 Credit Hours)
- ANTH 3831 - Archaeology (3 Credit Hours)
- ANTH 3851 - Religion, Culture, and Society (3 Credit Hours)
- PHIL 3010 - Ancient Political Philosophy (3 Credit Hours)
- PHIL 3095 - Major Philosophers in History (3 Credit Hours)
- PHIL 3601 - Modern Political Philosophy (3 Credit Hours)
- PHIL 4030 - Ancient Greek Philosophy (3 Credit Hours)
- PHIL 4031 - 19th Century European Philosophy (3 Credit Hours)
- PHIL 4032 - 20th Century Philosophy (3 Credit Hours)
- PHIL 4033 - 17th and 18th Century Philosophy (3 Credit Hours)

Minor Total: 18 Hours

Minor in International Studies

Program Overview

Do you know where Djibouti is...or want to learn? Declare a minor in International Studies and enroll in classes like International Relations, Intercultural Communication, US Foreign Policy, and Governments of Developing Nations.

augusta.edu/pamplin/social-sciences/minors

soscsci@augusta.edu

Progression and Graduation Requirements

- A grade of C or better is required for all work in the minor
- Courses taken to satisfy Core IMPACTS requirements may not be counted as coursework in the minor

Program Information

- Program Length: 1 Year

Minor Requirements

Required Courses: 9 Hours

- POLS 3801 - International Relations (3 Credit Hours)
- POLS 4902 - World Politics (3 Credit Hours)
- SOSC 3001 - Methods in Social Science (3 Credit Hours) *

- or SOSC 3002 - Quantitative Analysis in Social Sciences (3 Credit Hours) *
- or SOSC 3003 - Qualitative Analysis in Social Sciences (3 Credit Hours) *

Note:

** If the student's major has a required research methods course, SOSC 3001, SOSC 3002, or SOSC 3003 is NOT required. The student may substitute any other course listed below and numbered 3000 or above.*

Upper Division Elective Courses: 6 Hours

Select from the courses listed below, or select any foreign language course at the 3000 or 4000 level or any other upper level classes with an international focus with approval of the department chair.

- BUSA 4200 - International Business (3 Credit Hours)
- ECON 4820 - International Economics and Finance (3 Credit Hours)
- EURO 3234 - Introduction to the EU (3 Credit Hours)
- EURO 4090 - Selected Topics in EU Studies (3 Credit Hours)
- EURO 4130 - European Union Studies (3 Credit Hours)
- EURO 4160 - Federalism and Multilevel Governance in the EU (3 Credit Hours)
- EURO 4230 - Doing Business in the EU (3 Credit Hours)
- EURO 4260 - European Monetary Union (3 Credit Hours)
- EURO 4330 - European Union Science and Technology Policy (3 Credit Hours)
- EURO 4430 - EU Environmental Policy (3 Credit Hours)
- EURO 4530 - European Social Policy (3 Credit Hours)
- EURO 4630 - Communications and Media (3 Credit Hours)
- EURO 4730 - EU Foreign Policy (3 Credit Hours)
- EURO 4760 - United States - European Union Relations (3 Credit Hours)
- EURO 4830 - EU Studies Capstone Course (3 Credit Hours)
- ENGL 4360 - Studies in World Literature (3 Credit Hours)
- HIST 3211 - History and Culture of East Asia (3 Credit Hours)
- HIST 3311 - Modern Russia (3 Credit Hours)
- HIST 3531 - History of Mexico (3 Credit Hours)
- HIST 4391 - Twentieth Century Europe (3 Credit Hours)
- HIST 4950 - Selected Topics (1 to 4 Credit Hours)
- POLS 3101 - Comparative European Governments (3 Credit Hours)
- POLS 4701 - Governments of Developing Nations (3 Credit Hours)
- POLS 4809 - Identity, Nationalism and Ethnic Conflict (3 Credit Hours)
- POLS 4904 - Politics of Latin America (3 Credit Hours)
- POLS 4905 - United States Foreign Policy (3 Credit Hours)
- POLS 4906 - International Terrorism (3 Credit Hours)
- POLS 4911 - Introduction to Security Studies (3 Credit Hours)
- POLS 4912 - Counterterrorism (3 Credit Hours)
- POLS 4913 - The Politics of Islam (3 Credit Hours)
- POLS 4914 - Introduction to Middle Eastern Security Studies (3 Credit Hours)
- POLS 4915 - The Economics of Security (3 Credit Hours)
- POLS 4950 - Political Science Selected Topics (0 to 3 Credit Hours)
- SABR 4930 - Studies Abroad (1 to 12 Credit Hours) with prior approval of Department Chair
- SOSC 4960 - Social Science Undergraduate Internship (0 to 12 Credit Hours)

Minor Total: 15 Hours

Minor in Kinesiology

Program Overview

Kinesiology is the scientific study of the anatomy, physiology, and mechanics of body movement, especially in humans. Education in kinesiology leads to careers in exercise; fitness, wellness, and health promotion; sport; and rehabilitation.

augusta.edu/education/kinesiology

Progression and Graduation Requirements

- A grade of C or better is required for all work in the minor
- Courses taken to satisfy Core IMPACTS requirements may not be counted as coursework in the minor

Minor Requirements

A Minor in Kinesiology may be earned by successfully completing 18 upper-division credit hours with a grade of C or better. All courses toward the minor must be approved by an advisor in the Department of Kinesiology. *Select from the following:*

- KHNS 3XXX - Kinesiology Elective (3 Credit Hours)
- KHNS 4XXX - Kinesiology Elective (3 Credit Hours)

Minor Total: 18 Hours

Minor in Mathematics

Program Overview

A minor in mathematics is a great complement to any major, particularly majors in the sciences or business. A minor in mathematics trains students in challenging problem solving and logical thought processes, skills valuable to any employer.

augusta.edu/scimath/mathematics

Progression and Graduation Requirements

- A grade of C or better is required for all work in the minor
- Courses taken to satisfy Core IMPACTS requirements may not be counted as coursework in the minor

Prerequisite Course: 4 Hours

- MATH 2011 - Calculus and Analytical Geometry I (4 Credit Hours)

Minor Requirements: 7-8 Hours

Select one of the following:

- MATH 2012 - Calculus and Analytical Geometry II (4 Credit Hours)
- MATH 2013 - Calculus and Analytical Geometry III (4 Credit Hours) (*if MATH 2012 was used as part of the Core IMPACTS requirements*)

Select one additional course from the following:

- DATA 1501 - Introduction to Data Science (3 Credit Hours)
- MATH 1401 - Elementary Statistics (3 Credit Hours)
- MATH 2013 - Calculus and Analytical Geometry III (4 Credit Hours)

- MATH 2020 - Introduction to Discrete Mathematics (3 Credit Hours)
- MATH 2030 - Logic and Set Theory (3 Credit Hours)

Upper-Division Courses: 9 Hours

Select 9 hours from upper-division mathematics courses that are approved for the mathematics major.

Note: these courses may not be used for the minor: MATH 3210, MATH 3241, MATH 3242, MATH 3243, MATH 3261, MATH 3262, and MATH 3263.

Minor Total: 16-17 Hours

Minor in Military Science

Program Overview

The Minor in Military Science is primarily designed for students planning a career in the U.S. Army as commissioned Second Lieutenants who demonstrate the potential to be agile, adaptive, and innovative tactical leaders capable of succeeding in complex situations.

augusta.edu/militaryscience

Progression and Graduation Requirements

- Courses should be arranged in consultation with your major department and the Professor of Military Science.
- Courses taken to satisfy Core Areas A through E may not be counted as coursework in the minor.
- Cadets must maintain a 3.0 or higher each semester and cumulative GPA in Military Science classes.

Minor Requirements

- MILS 3011 - Leadership and Problem Solving (3 Credit Hours)
- MILS 3021 - Leadership and Ethics (3 Credit Hours)
- MILS 4011 - Leadership Management (3 Credit Hours)
- MILS 4021 - Officership (3 Credit Hours)
- MILS 4060 - Leadership Development and Assessment (3 Credit Hours)

Minor Total: 15 Hours

Minor in Music

Program Overview

The music minor is available to all university students who have interest and ability in music. The program requires 15 hours of coursework in applied music, ensembles, music literature, and music theory.

augusta.edu/pamplin/music/minor

Progression and Graduation Requirements

- As a music minor, students are required to declare a major performing area (voice, piano, trumpet, etc.). In addition to being proficient on their instrument, music minors must also demonstrate a knowledge of music literature.
- A grade of C or better is required for all work in the minor
- Courses taken to satisfy Core IMPACTS requirements may not be counted as coursework in the minor

- General Degree requirements for all music minors:
 - Applied Lessons: Lessons in applied music (principal performing medium) must be taken a minimum of three semesters for a total of five credit hours.
 - Major Ensembles: All music minors are required to participate for credit in a major ensemble for a minimum of four semesters, whether of full-time or part-time status. All students will be assigned to a major ensemble upon entrance to the minor. Major ensembles are defined as the following: 1. Augusta University Wind Ensemble (all woodwinds, brass and percussion), 2. Augusta University Orchestra (all string instruments), and Augusta University Singers (all voice types). Students who choose piano or guitar as their performing medium will be assigned to one of the three depending upon their experiences in secondary performing areas.
 - Recital Lab and Studio Class: Music minors are required to be enrolled and achieve a passing grade in Recital Laboratory (MUSI 1500) and Studio Class (MUSA 2XX5) for a minimum of three semesters. Recital Lab and Studio Class are required co-requisites for all applied lesson study.
 - Advising: All music minors are required to have an advisor on the full-time music faculty; a student's advisor is most often also their applied teacher. Self-advising for any program in music is not allowed.

Minor Requirements

Required Courses: 6 Hours

- MUSI 1101 - Aural Skills I (2 Credit Hours)
- MUSI 1211 - Music Theory I (2 Credit Hours)
- MUSI 2230 - Introduction to Western Music Literature (2 Credit Hours)

Major Ensembles: 4 Hours

- MUSI 36X0- Music Ensemble (1 Credit Hour)
- MUSI 36X0- Music Ensemble (1 Credit Hour)
- MUSI 36X0- Music Ensemble (1 Credit Hour)
- MUSI 36X0- Music Ensemble (1 Credit Hour)

Recital Experience: 0 Hours

- MUSI 1500 - Recital Laboratory (0 Credit Hours) (3 semesters minimum)
- MUSI 2XX5 - Studio Class (3 semesters minimum)

Applied Lessons: 5 Hours

- MUSA 3XX0 (1 Credit Hour)
- MUSA 3XX1 (2 Credit Hours)
- MUSA 3XX2 (2 Credit Hours)

Minor Total: 15 Hours

Minor in Neuroscience

Program Overview

By earning a minor in Neuroscience, students learn foundational principles from some of the multiple disciplines associated with Neuroscience. The required and elective courses for the minor emphasize cellular, molecular, and cognitive approaches to understanding the nervous system. This minor provides a good introduction for students considering advanced studies in neuroscience after the completion of their bachelor's degree.

Program Contact

Progression and Graduation Requirements

- Courses taken to satisfy Core IMPACTS course requirements may not be counted as coursework in the minor
- A grade of C or better is required in all courses applied to the minor

Prerequisite Courses

Prerequisite courses do not count toward the minor, but they are required to be taken in order to enroll in courses that are included in the minor. A grade of C or better is required in all coursework.

- BIOL 1107 - Principles of Biology I (3 Credit Hours)
- BIOL 1107L - Principles of Biology I Laboratory (1 Credit Hour)
- BIOL 1108 - Principles of Biology II (3 Credit Hours)
- BIOL 1108L - Principles of Biology II Laboratory (1 Credit Hour)
- CHEM 1211 - Principles of Chemistry I (3 Credit Hours)
- CHEM 1211L - Principles of Chemistry I Laboratory (1 Credit Hour)
- CHEM 1212 - Principles of Chemistry II (3 Credit Hours)
- CHEM 1212L - Principles of Chemistry II Laboratory (1 Credit Hour)
- CHEM 3411 - Organic Chemistry I (3 Credit Hours) CHEM 3411L - Organic Chemistry I Laboratory (1 Credit Hour), CHEM 3412 - Organic Chemistry II (3 Credit Hours), and CHEM 3412L - Organic Chemistry II Laboratory (1 Credit Hour) if you choose CHEM 4551 or CHEM 4620
- MATH 1113 - Precalculus Mathematics (3 Credit Hours)
- NSCI 2001 - Introduction in Neuroscience (3 Credit Hours)
- NSCI 2010 - Introduction to Neuropharmacology (3 Credit Hours)
- PSYC 1101 - Introduction to General Psychology (3 Credit Hours)

Minor Requirements

Required Courses: 9 Hours

- BIOL 3370 - Neurobiology (3 Credit Hours)
- BIOL 3400 - Cell Biology (3 Credit Hours)
- NSCI 3001 - Neuroscience Journal Club (1 Credit Hour)
- NSCI 3010 - Neuroscience Methods (2 Credit Hours)

Neuroscience Elective: 3 Hours

Select one of the following:

- NSCI 4120 - Neurobiology of Disease (3 Credit Hours)
- NSCI 4210 - Cognitive Neuroscience (3 Credit Hours)
- NSCI 4310 - Developmental Neurobiology (3 Credit Hours)

Science Electives: 6 Hours

Select two of the following:

- BIOL 4680 - Pathophysiology (3 Credit Hours)
- BIOL 4700 - Advanced Cell Biology (3 Credit Hours)

- BIOL 4720 - Principles of Pharmacology (3 Credit Hours)
- CHEM 4551 - Biochemistry I: Physical Biochemistry (3 Credit Hours)
- CHEM 4552 - Biochemistry II: Bioenergetics and Metabolism (3 Credit Hours)
- CHEM 4620 - Principles of Medicinal Chemistry (3 Credit Hours)
- PSYC 3143 - Mental Health and Psychopathology (3 Credit Hours)
- PSYC 3180 - Drugs and Behavior (3 Credit Hours)

Minor Total: 18 Hours

Minor in Nonprofit Management

Program Overview

Nonprofit organizations are essential to the health of our communities. They help shape public policy, contribute to the economy, deliver goods and services, and contribute to a free and open society through citizen mobilization and participation. The Minor in Nonprofit Management teaches students the skills needed to administer nonprofit organizations.

augusta.edu/pamplin/social-sciences/minors

Program Contact

Dr. William Hatcher
706-737-1710
soscsci@augusta.edu

Minor Requirements

Required Courses

- ENGL 3650 - Grant Writing (3 Credit Hours)
- or ENGL 3682 - Writing in the Community (3 Credit Hours)
- POLS 4050 - Nonprofit Management (3 Credit Hours)
- POLS 4051 - Financial Management for Nonprofits (3 Credit Hours)

Select two of the following:

- CRJU 3331 - Youth and Society (3 Credit Hours)
- PSYC 2103 - Introduction to Human Development (3 Credit Hours)
- SOCI 3331 - Youth and Society (3 Credit Hours)
- SOWK 3331 - Youth and Society (3 Credit Hours)
- SOWK 4421 - Gerontology (3 Credit Hours)

Select one of the following:

- ART 4961 - Undergraduate Internship: Art Museum Studies I (3 Credit Hours)
- ART 4962 - Undergraduate Internship: Art Museum Studies II (3 Credit Hours)
- ENGL 4960 - Undergraduate Internship (1 to 3 Credit Hours)
- SOSC 4960 - Social Science Undergraduate Internship (0 to 12 Credit Hours)
- POLS 4401 - Government Organization and Administrative Theory (3 Credit Hours)

Minor Total: 18 Hours

Minor in Philosophy

Program Overview

Philosophy is the art of thinking. As such, it provides an excellent foundation for today's students. Philosophy helps one to question his or her assumptions and point of view, understand other points of view on functional issues, and think critically, morally, and meaningfully. A minor in philosophy complements any major program and is applicable in any human endeavor where rational thought is required.

augusta.edu/pamplin/hist-anth-phil/philosophy

Progression and Graduation Requirements

- A grade of C or better is required for all work in the minor
- Courses taken to satisfy Core IMPACTS requirements may not be counted as coursework in the minor

Minor Requirements

Lower Division Courses: 3 Hours

Select one of the following courses (if not taken as part of Core IMPACTS Requirements):

- PHIL 2010 - Introduction to Philosophy (3 Credit Hours)
- PHIL 2020 - Introduction to Critical Thinking (3 Credit Hours)

Upper Division Courses: 12 Hours

Select four upper division courses with four courses in Philosophy numbered 3000 or above OR three courses in Philosophy numbered 3000 or above and one of the following courses:

- HIST 4111 - History of World Religions (3 Credit Hours)
- POLS 3501 - Ancient Political Thought (3 Credit Hours)
- POLS 3601 - Modern Political Thought (3 Credit Hours)
- POLS 3701 - Contemporary Political Thought (3 Credit Hours)

Minor Total: 15 Hours

Minor in Physics

Program Overview

The analytical and problem-solving abilities gained from the study of physics are valued widely. The American Institute of Physics provides information on the many opportunities afforded by an education in physics online at <https://jobs.physicstoday.org>.

A minor in physics is highly customizable from selection among a broad range of courses in the physics curriculum. A minor in physics adds employer recognized benefit to many science and non-science major degrees. This benefit is particularly respected in fields such as education, computer science, and business.

augusta.edu/scimath/physics

Progression and Graduation Requirements

- Courses taken to satisfy the Core IMPACTS Requirements may not be counted as coursework in the minor
- A grade of C or better is required in all Physics courses

- All courses must be approved by the Chair of the Department of Physics and Biophysics (prior approval is recommended)
- Prerequisites listed below

Prerequisite Courses

Prerequisite courses do not count toward the minor, but they are required to be taken in order to enroll in courses that are included in the minor.

Physics Courses: 8 Hours

Select one of the following options:

Physics Option I

- PHYS 1111 - Introductory Physics I (3 Credit Hours)
- PHYS 1111L - Introductory Physics I Laboratory (1 Credit Hour)
- PHYS 1112 - Introductory Physics II (3 Credit Hours)
- PHYS 1112L - Introductory Physics II Laboratory (1 Credit Hour)

Physics Option II

- PHYS 2211 - Principles of Physics I (4 Credit Hours)
- PHYS 2212 - Principles of Physics II (4 Credit Hours)

Minor Requirements

Required Course: 4 Hours

- MATH 2012 - Calculus and Analytical Geometry II (4 Credit Hours)

Elective Courses: 11-12 Hours Minimum

Select three or four PHYS 3XXX or PHYS 4XXX courses from approved courses in either of the Physics Major Concentrations (concentration includes courses "selected with faculty advisor assistance") (11-12 Credit Hours Minimum)

Minor Total: 15-16 Hours

Minor in Political Science

Program Overview

Would you like to know more about the exciting world of politics and the vital role government plays in our lives? Get a minor in Political Science and try classes like International Terrorism, Electoral Behavior, The Supreme Court, Ancient Political Thought, and World Politics.

augusta.edu/pamplin/social-sciences/minors

Program Contact

Will Hatcher, PhD
 706-737-1710
soscsci@augusta.edu

Progression and Graduation Requirements

- A grade of C or better is required for all work in the minor (including prerequisites)
- Courses taken to satisfy Core IMPACTS requirements may not be counted as coursework in the minor
- Prerequisite to the minor: POLS 1101

Minor Requirements

Social Science Course: 3 Hours

If the student's major has a required research methods course, SOSC 3001/3002/3003 is NOT required. The student may substitute any other Political Science course numbered 3000 or above.

Select one of the following courses:

- SOSC 3001 - Methods in Social Science (3 Credit Hours)
- SOSC 3002 - Quantitative Analysis in Social Sciences (3 Credit Hours)
- SOSC 3003 - Qualitative Analysis in Social Sciences (3 Credit Hours)

Upper-Division Courses: 12 Hours

In consultation with an advisor, select four courses from the following:

- EURO 3XXX - European Union Studies Elective (3 Credit Hours)
- EURO 4XXX - European Union Studies Elective (3 Credit Hours)
- POLS 3XXX - Political Science Elective (3 Credit Hours)
- POLS 4XXX - Political Science Elective (3 Credit Hours)

Minor Total: 15 Hours

Minor in Psychology

Program Overview

Psychology is the science of human behavior and mental processes. The minor in Psychology provides students with a background in scientific methods used to describe, predict, understand, and explain human behavior.

augusta.edu/pamplin/psychology

Progression and Graduation Requirements

- A grade of C or better is required for all work in the minor
- Courses taken to satisfy Core IMPACTS requirements may not be counted as coursework in the minor

Prerequisite Courses

Prerequisite courses do not count toward the minor, but they are required to be taken in order to enroll in courses that are included in the minor.

- PSYC 1101 - Introduction to General Psychology (3 Credit Hours)

Minor Requirements

Required Courses: 15 Hours

Select from the following with approval of an advisor:

- PSYC 3XXX (3 Credit Hours)
- PSYC 4XXX (3 Credit Hours)

Note:

The best combination of courses to take for the psychology minor varies depending upon one's career expectations. Always consult with an academic advisor and consider taking Psychological Careers (PSYC 3190), in which course selection issues are thoroughly examined.

Restrictions: Please note that PSYC 4000-level courses may not be taken unless PSYC 3121 has been completed with an earned grade of C or better. Additionally, no more than 3 credit hours to be counted in the minor may come from independent study (PSYC 4950), internship (PSYC 4960), and/or research (PSYC 4990). This policy does not apply to nonrepetitive special topics courses which might carry a PSYC 3950 or PSYC 4950 designation. Depending upon major requirements, students may be able to take additional psychology courses as electives.

Minor Total: 15 Hours

Minor in Sociology

Program Overview

Sociology is a great minor for any major! People with careers in health, non-profit, politics, business and more find sociology helps them understand how their work world is structured and how it functions. Sociology also helps all of us develop analytical abilities that are useful throughout life.

augusta.edu/pamplin/social-sciences/minors

Program Contact

Dr. William Hatcher
706-737-1710
soscsoci@augusta.edu

Progression and Graduation Requirements

- A grade of C or better is required for all work in the minor and prerequisites
- Courses taken to satisfy Core IMPACTS requirements may not be counted as coursework in the minor
- Prerequisite to the Minor: SOCI 1101

Minor Requirements

Upper-Division Courses: 15 Hours

In consultation with a sociology advisor, select five 3000/4000 courses from the specific courses used to satisfy the Sociology major.

Minor Total: 15 Hours

Minor in Spanish

Program Overview

The Spanish minor is designed for students interested in the Spanish language and Hispanic cultures. Students will develop reading, writing, speaking, and listening skills in Spanish and be prepared to use the Spanish language in their field of interest upon graduation.

augusta.edu/pamplin/english-world-languages/worldlanguages

Program Contact

Candis Bond, PhD
706-737-1500
ewl@augusta.edu

Progression and Graduation Requirements

- A grade of C or better is required for all work in the minor
- Courses taken to satisfy Core IMPACTS requirements may not be counted as coursework in the minor
- For information on foreign language credit by examination through CLEP, the International Baccalaureate Program or the Defense Language Institute, visit the Office of Admissions website.

Minor Requirements

Required Courses: 6 Hours

- SPAN 2001 - Intermediate Spanish I (3 Credit Hours)
- SPAN 2002 - Intermediate Spanish II (3 Credit Hours)

Upper-Division Courses: 12 Hours

Complete 12 Hours of Spanish courses at the 3000/4000* level, including at least one of the following courses:

*Note: SPAN 4801 and SPAN 4802 cannot be used for the Spanish minor

- SPAN 3100 - Conversational Spanish (3 Credit Hours)
- SPAN 3150 - Spanish for Heritage Speakers (3 Credit Hours)
- SPAN 3211 - Spanish-American Civilizations I (Pre-Columbian - 1821) (3 Credit Hours)
- SPAN 3212 - Spanish-American Civilizations II (1821 - Present) (3 Credit Hours)
- SPAN 3220 - The Culture and Civilization of Spain (3 Credit Hours)
- SPAN 3300 - Spanish Composition (3 Credit Hours)
- SPAN 3510 - Introduction to Literature (3 Credit Hours)

Minor Total: 18 Hours

Minor in Women's and Gender Studies

Program Overview

The interdisciplinary Women's and Gender Studies Minor is designed for students who wish to study how gender, as it intersects with other identities, influences everyday life; special consideration is given to the study of women's perspectives.

augusta.edu/pamplin/womens-gender-studies

Progression and Graduation Requirements

- Fifteen hours of course work is required, with at least nine hours of upper-division credit. Students should register for cross-listed courses under the WGST course heading.
- A grade of C or better is required for all work in the minor
- Courses taken to satisfy Core IMPACTS requirements may not be counted as coursework in the minor
- Before graduation, a student minoring in women's and gender studies will submit a portfolio for review to the Women's and Gender Studies Program Committee. The portfolio must contain work from three different disciplines and a reflective essay that reflects the student's mastery of women's and gender studies learning outcomes; it may also contain a project undertaken outside of a women's and gender studies class. The student will also participate in an exit interview.

Minor Requirements

Introductory Course: 3 Hours

- WGST 1101 - Introduction to Women's and Gender Studies (3 Credit Hours)

Upper-Division Courses: 9 to 12 Hours

Select 9-12 hours from the following courses, with courses from at least three different departments.

History, Anthropology, and Philosophy

- WGST 3870 - Identity: Ethnicity, Gender, and Class (3 Credit Hours) (*cross-listed with ANTH 3870*)
- WGST 4011 - History of Women (3 Credit Hours) (*cross-listed with HIST 4011*)
- WGST 4021 - Gender and Family History (3 Credit Hours) (*cross-listed with HIST 4021*)

English and World Languages

- WGST 3310 - Women's Literature (3 Credit Hours) (*cross-listed with ENGL 3310*)
- WGST 4310 - Studies in Feminism (3 Credit Hours) (*cross-listed with ENGL 4310*)

Communication

- WGST 4120 - Gender and Communication (3 Credit Hours) (*cross-listed with COMM 4120*)

Social Sciences

- WGST 3336 - Women, Crime, and the Criminal Justice System (3 Credit Hours) (*cross-listed with CRJU 3336 and SOCI 3336*)
- WGST 4336 - Gender and Victimization (3 Credit Hours) (*cross-listed with CRJU 4336 and SOCI 4336*)
- WGST 4442 - Gender and Society (3 Credit Hours) (*cross-listed with SOCI 4442*)

Approved WGST Courses: 0 to 3 Hours

You may select up to 3 Hours of other appropriate WGST courses to fulfill requirements for the minor. These may include:

- WGST 4950 - Selected Topics (3 Credit Hours)
- WGST 4960 - Undergraduate Internship (1 to 3 Credit Hours)
- WGST 4961 - Feminist Media Production Internship (1 to 3 Credit Hours)
- WGST 4990 - Undergraduate Research (3 Credit Hours)

Other Approved Courses: 0 to 3 Hours

You may select up to 3 Hours of other appropriate courses, provided they are approved by the Women's and Gender Studies Program Committee (WGPC).

Minor Total: 15 Hours

Post-Baccalaureate Certificate in English to Speakers of Other Languages (ESOL) Endorsement

Program Overview

The ESOL Endorsement is a series of three courses for certified teachers who want to add expertise in the area of English as a second language instruction. Field experiences are required in two of the three courses (EDTD 6276 and EDTD 6277). This is an embedded or standalone endorsement.

Certificate Requirements

Required Courses: 9 Hours

- EDTD 6276 - ESOL Methods, Materials, and Assessment in Content Classrooms (3 Credit Hours)
- EDTD 6277 - Understanding Cultural Issues and Ethics in ESOL Education (3 Credit Hours)
- ENGL 6620 - English Linguistics (3 Credit Hours)

Certificate Total: 9 Hours

Post-Baccalaureate Certificate in Epidemiological Intelligence

Program Overview

This Certificate in Epidemiological Intelligence is an interdisciplinary collaboration that cohesively integrates current courses offered by the MAISS program and the Master of Science in Epidemiology. Five total courses, 15 credits (three credits for each course) are required in both intelligence and security studies and epidemiology. The purpose of this graduate certificate is to help train and educate federal, state, local, and international organizations' employees within the discipline of public health intelligence. It capitalizes on synergistic opportunities needed for optimal public health preparedness and response to current and future threats.

Progression and Graduation Requirements

- Candidate must hold an initial certification
- Courses for the endorsement must be taken in succession
- Courses may not be taken concurrently

Program Information

- Program Length: 1 Year
- CIP Code: 13.1004
- Program Code: 1CERG-GEDE

Certificate Requirements

Required Courses: 9 Hours

The following courses must be taken in succession:

- EDUC 6271 - Introduction to Gifted Education (3 Credit Hours)
- EDUC 6272 - Assessment of Gifted Learners (3 Credit Hours)
- EDUC 6273 - Curriculum and Program Design for Gifted Learners (3 Credit Hours)

Certificate Total: 9 Hours

Post-Baccalaureate Certificate in Intelligence Studies

Program Overview

The Master of Arts in Intelligence and Security Studies (MAISS) prepares students and industry leaders to address intelligence and security challenges in an interconnected world. The graduate certificate in intelligence studies focuses on utilizing open-source tools of intelligence collection; illustrating the processes, roles, and functions of the five disciplines of intelligence collection; examining the roles of intelligence collection in order to achieve US national security objectives; demonstrating the evolution of US intelligence collection from inception to the cyber domain, and the program seeks to teach the motivations of actors in cyberspace. The certificate is being created for potential students that already have a master's degree and/or are already in the field, do not want to pursue a graduate degree, but are interested in furthering their education concerning intelligence collection. Rather than getting a degree for the concentration, especially for those already in the industry, this certificate will help them enroll in MAISS courses and to enhance their career and expertise in this area by completing a graduate certificate in the four courses. This is an embedded and standalone certificate.

Program Contact

Admissions Information

For more information on admissions requirements, please visit the Office of Admissions website.

Progression and Graduation Requirements

For students to obtain the certificate, they must maintain a 2.8 GPA in the four courses. There are no other requirements. Course substitutions are allowed as long as they are approved by the program director and are within the area of the certificate.

Program Information

- Program Length: 1 Year
- CIP Code: 29.0201 - Intelligence, General.
- Program Code: 1CERG-INSU

Certificate Requirements

Required Courses: 12 Hours

- SECR 6411 - Introduction to Intelligence Studies (3 Credit Hours)
- SECR 6412 - Intelligence Collection (3 Credit Hours)
- SECR 6413 - Open-Source Intelligence (3 Credit Hours)
- SECR 6980 - Introduction to Cyber Intelligence and Cybersecurity Policy (3 Credit Hours)

Certificate Total: 12 Hours

Post-Baccalaureate Certificate in Nonprofit Leadership

Program Overview

Nonprofit organizations are essential to the health of our communities. They help shape public policy, contribute to the economy, deliver goods and services, and contribute to free and open society through citizen mobilization and participation. The Nonprofit Leadership Certificate provides students with the skills specific to the nonprofit sector. It is designed to allow students to develop the necessary knowledge to manage and lead sustainable nonprofit organizations. The certificate is directed at individuals in the nonprofit field who already have a bachelor's degree and are seeking to further their knowledge and abilities. The certificate is a partnership between Augusta University's Master of Public Administration and Master of Business Administration programs. Currently, the certificate is reserved for students earning a degree in either one of these programs. This is an embedded certificate.

Certificate Total: 9 Hours

Post-Baccalaureate Certificate in Social Influence

Program Overview

The Master of Arts in Intelligence and Security Studies (MAISS) prepares students and industry leaders to address intelligence and security challenges in an interconnected world.

The program seeks to expose military members, future decision makers and analysts, and students considering a PhD, to the security challenges inherent in a rapidly changing world. Our program has a special emphasis on the causes and effects of interstate and intrastate conflict, the sources of terrorism, terrorism and counterterrorism strategies, and security issues that affect national, regional, and global security.

The coursework is focused on inter- and intrastate conflict; terrorism and counter-terrorism; organization, capabilities and roles of the U.S. Intelligence Community; and national, regional, and global strategic security and cybersecurity threats.

The Graduate Certificate in Social Influence focuses on four main areas of emphasis: cross-cultural in/out-group psychology; open-source intelligence collection with a special emphasis on social media intelligence collection (SOCMINT); information warfare through

the lens of the strategies and doctrine of adversaries; and the history and theory of propaganda, with particular emphasis on social media propaganda.

The certificate earner will have a well-rounded and innovative education with a nationally distinguished concentration in social influence.

The certificate is designed for students who already have a Master's degree and/or are already in the field, do not want to pursue a graduate degree, but are interested in the social influence concentration. Rather than getting a degree for the concentration, especially for those already in the industry, this certificate helps students enroll in MAISS courses and to enhance their career and expertise in this area by completing a graduate certificate in the four courses. This is an embedded and standalone certificate.

Post-Baccalaureate Certificate in Urban Education Endorsement

Program Overview

The Urban Education Endorsement is a three-course sequence that will equip certified teachers with knowledge and skills to successfully support students in settings with significant racial, socioeconomic, and cultural diversity. Within the increasingly globalized political contexts of cities, schools face challenges such as budgeting and staffing while needing to stay relevant and impactful for the students and their families and communities. Educators who receive this endorsement will acquire curricular, pedagogical, and policy knowledge useful to address these issues.

Post-First-Professional Certificate in Advanced Education in General Dentistry

Program Overview

The Advanced Education in General Dentistry program at Augusta University is a one-year program fulfilling the requirements for advanced training in general dentistry as outlined by the Commission on Dental Accreditation of the American Dental Association leading to a certificate. The program is designed to provide clinical and didactic experience at the postdoctoral level in all areas of dentistry with an emphasis on treatment planning complex cases, treating medically complex patients, and training in advanced techniques such as rotary endodontics, implants, and IV sedation.

Residents receive an advanced program of didactic and clinical training in implant, fixed, and removable prosthodontics with the support of highly trained laboratory technicians; instruction in the management of medically compromised patients, geriatric patients, phobic patients, and didactic and clinical experience in the implementation of IV sedation techniques.

The majority of time is spent providing comprehensive patient care in state of the art operatories staffed by dental assistants and clerks simulating a small group dental practice. The year of training includes a clinical rotation in anesthesiology. This is a standalone certificate.

Term-by-Term Pathway

To outline and visualize the path from start to finish in this program, refer to the suggested Term-by-Term Pathway.

Post-First-Professional Certificate in Advanced Practice: Physical Therapy Residency

Program Overview

The Augusta University Orthopedic Physical Therapy Residency Program is a collaboration between the Augusta University Department of Physical Therapy and Augusta University Health (AU Health). Both partners share administration of the residency. AU Health is the residency sponsor, and the AU Department of Physical Therapy provides the curriculum. All residency participants are employees of AU Health, where they complete their clinical practice.

The mission of the Augusta University Orthopedic Physical Therapy Residency Program is to develop physical therapists who demonstrate excellence in advanced clinical reasoning and specialty practice, utilizing a patient and family-centered approach to care for individuals with orthopedic conditions as demonstrated by successful completion of learning requirements.

The AU Orthopedic Physical Therapy Residency program is accredited by the American Board of Residency and Fellowship Education (ABPTRFE), recognized by the American Physical Therapy Association (APTA) as the agency for accreditation of physical therapy residency and fellowship education programs. An ABPTRFE-approved certificate is awarded upon successful completion of all program requirements.

Post-First-Professional Certificate in Endodontics

Program Overview

The Augusta University Dental College of Georgia offers an advanced education program leading to a Certificate in Endodontics. The philosophy of this program is to educate dentists to become competent endodontists who will serve the public and the profession at a high level of excellence. It stresses the importance of knowledge and skills in the diagnosis, prevention, and treatment of diseases associated with the dental pulp and related periapical tissues. The correlation of basic sciences and clinical sciences is an integral part of the program. Individuals who successfully complete this advanced education program will be awarded a Certificate in Endodontics. This is a standalone certificate.

The Advanced Education in General Practice Residency at Augusta University is a one-year program fulfilling the requirements for advanced training in general dentistry as outlined by the Commission on Dental Accreditation of the American Dental Association leading to a certificate. The program is designed to provide clinical and didactic experience at the postdoctoral level in all areas of dentistry with an emphasis on treatment planning complex cases, treating medically complex patients, and training in advanced techniques such as rotary endodontics, implants, and IV sedation.

Residents receive an advanced program of didactic and clinical training in implant, fixed, and removable prosthodontics with the support of highly trained laboratory technicians; instruction in the management of medically compromised patients, geriatric patients, phobic patients, and didactic and clinical experience in the implementation of IV sedation techniques.

The majority of time is spent providing comprehensive patient care in state-of-the-art operatories staffed by dental assistants and clerks simulating a small group dental practice. The year of training includes clinical rotations in emergency medicine, pedodontics and anesthesiology. This is a standalone certificate.

Post-First-Professional Certificate in Oral and Maxillofacial Surgery

Program Overview

The Oral and Maxillofacial Surgery Advanced Education program at Augusta University is a four-year program fulfilling the requirements for advanced training in oral and maxillofacial surgery as outlined by the Commission on Dental Accreditation of the American Dental Association. The residency program consists of didactic education in basic and clinical sciences, clinical rotations, and research.

The first year of training includes clinical rotations in oral and maxillofacial surgery, internal medicine, ICU, and anesthesia (6 months). Anesthesia rotations include instruction in adult, pediatric, and advanced anesthesia. The second year includes rotations in general surgery (6 months) that include plastic and reconstructive surgery, trauma, ICU, ENT, general surgery, and oral and maxillofacial surgery. An elective rotation exists for one month during the third year. The fourth year of training, or chief resident year, is spent entirely in oral and maxillofacial surgery.

The Dental College of Georgia program focuses on the advanced study of the diagnosis and intrusive and adjunctive treatment of diseases, injuries, and defects of the oral and maxillofacial regions, including functional and aesthetic aspects. It includes instruction in pharmacology, analgesia, anesthesia, anxiety control, surgical procedures and techniques, surgical instrumentation, exodontia, oral diseases and malfunctions, soft and hard tissue pathology, dentoalveolar surgery, infection management, prosthetic implantation, and exposure to craniofacial and cleft surgery, treatment of malignancy, and microsurgery. This is a standalone certificate.

Post-First-Professional Certificate in Orthodontics

Program Overview

The Advanced Education program in Orthodontics provides a comprehensive course of study in clinical and didactic orthodontics. In addition, a publishable paper on an approved orthodontic subject must be completed. Successful completion of the curriculum fulfills all the educational requirements for eligibility for the examination by the American Board of Orthodontics. This is a standalone certificate.

Post-First-Professional Certificate in Pediatric Dentistry

Program Overview

The Advanced Education Program in Pediatric Dentistry will provide dentists the guidance, experience, and models necessary to begin delivery of proficient primary and specialty oral health care to infants, children, and adolescents, including those with special needs. Residents will learn current scientifically-supported techniques and philosophies, and teaching will be conducted in a collegial atmosphere conducive to resident-faculty interaction. Graduates will be defined by the American Board of Pediatric Dentistry as educationally qualified. The program strives to instill in each resident the desire to become lifelong learners in the specialty. This is a standalone certificate.

Post-First-Professional Certificate in Periodontics

Program Overview

The Advanced Education Program in Periodontics is a course of study leading to the award of a Certificate in Periodontics. The program provides a comprehensive course of study in clinical and didactic periodontics, satisfying the requirements for eligibility for the American Board of Periodontology.

The program provides the residents with evidence-based biological, scientific and clinical information and experiences to diagnose and treat all forms of periodontal disease at a proficient level. The resident becomes thoroughly familiar with the periodontal literature and receives broad clinical experiences in examination, prognosis determination, and all accepted modes of periodontal therapy. Residents are encouraged to continue learning experiences after completion of the program by means of the critical review of the literature, active participation in continuing education, leadership in organized dentistry and clinical research. Hospital dentistry and a varied patient population are achieved through the Augusta University Medical Center and an affiliation with the Veterans Administration Medical Center Outpatient Dental Clinic. This is a standalone certificate.

Post-First-Professional Certificate in Prosthodontics

Program Overview

The Advanced Education Program in Prosthodontics at the Augusta University is a 35-month program leading to a certificate in prosthodontics. It consists of didactic work in the basic sciences, related clinical disciplines and all aspects of prosthodontics, to include fixed prosthodontics, removable prosthodontics, implant prosthodontics, and maxillofacial prosthetics. Graduates are qualified to take the examination of the American Board of Prosthodontics.

The Advanced Education Program in Prosthodontics at Augusta University is fortunate that the program director is committed full time to the program. The program draws upon the talents of both board-certified and trained prosthodontists, as well as other specialists who actively teach our residents through lectures, laboratories and daily clinical assignments. We also have an excellent working relationship with the U.S. Army's Prosthodontics Residency Program, housed at Fort Eisenhower, Georgia, only seven miles from the Dental College of Georgia. The related basic sciences and clinical disciplines, such as restorative dentistry, periodontics and endodontics are taught to our residents by equally qualified faculty. This is a standalone certificate.

Post-Master's Certificate in Adult Gerontology Acute Care Nurse Practitioner

Program Overview

The certificate program is designed for nurses who currently hold a nurse practitioner (NP) certification and would like to expand their scope of practice to provide care to the age spectrum of adults-older adults, who have acute and/or complex care needs. Upon completion, the students are eligible to take the Adult Geriatric Acute Care Nurse Practitioner (AGACNP) certification exam offered by the American Nurses Credentialing Center or the American Association of Critical Care Nurses. A minimum of 20 credit hours and 540 clinical hours are required, but individuals may be required to complete additional hours of up to 750 clinical hours based on an individualized gap analysis that is mandated by the National Taskforce Standards. This is an embedded or standalone certificate.

augusta.edu/gradschool/nurse-cert

Program Accreditation

This program is fully accredited by the Commission on Collegiate Nursing Education. Graduates are prepared to meet the eligibility requirements for the certification exam offered by the American Association of Critical Care Nurses and American Nurses Credentialing Center.

Program Contact

Program Information

- Program Length: 1 Year
- CIP Code: 51.3814
- Program Code: CERM_ACNP

Prerequisites

The following courses are required to be completed prior to the start of the certification program:

- NURS 7425 - Advanced Pathophysiology (4 Credit Hours)
- NURS 7430 - Pharmacology for Advanced Practice Nurses (4 Credit Hours)
- NURS 7450 - Advanced Practice Nursing Roles in Society (3 Credit Hours)
- NURS 7470 - Advanced Health Assessment (3 Credit Hours)
- NURS 9193 - Advanced Practice Nursing Practicum for Post-Graduate Certificate (3 Credit Hours)

Certificate Requirements

- NURS 8331 - Adult Gerontology ACNPI: Health Promotion and Management of Chronic Disease in the Adult and Older Adult (3 Credit Hours)
- NURS 8333 - Adult Gerontology ACNP Practice I: for Post-Graduate Certificate (3 Credit Hours)
- NURS 8334 - Adult Gerontology ACNP II: Evidence-Based Management for Urgent and Emergent Health Problems in Adult (3 Credit Hours)
- NURS 8337 - Adult Gerontology ACNP III: Advanced Concepts in Complex Illness (3 Credit Hours)
- NURS 8370 - Adult Gerontology Acute Care ACNP Practice II: for Post-Graduate Certificate (4 Credit Hours)
- NURS 8371 - Adult Gerontology Acute Care Practice III: for Post-Graduate Certificate (4 Credit Hours)

Certificate Total: 20 Hours

Clinical/Lab Hours Total: 630 Hours

Term-by-Term Pathway

Post-Master's Certificate in Educational Leadership - Tier One

Program Overview

The 21-hour Leadership Tier I Certification Only program offers candidates significant opportunities to apply knowledge and skills in real educational settings, which will be documented in the E-Portfolios in Anthology. Educators who complete the program will be eligible for Tier I Leadership Certification in Georgia. The degree may be completed in three consecutive semesters when you follow the class rotation schedule. This is an embedded or standalone certificate.

Program Contact

Dr. Renee Neal
706-737-1496
renneal@augusta.edu

Program Accreditation

The program is accredited by the Georgia Professional Standards Commission (GaPSC), the accrediting agency, as an integral part of the Educational Leadership Preparation Program in the College of Education and Human Development at Augusta University.

Admissions Information

For information on admissions requirements, visit the Office of Admissions website and the Department of Teaching and Leading website.

Progression and Graduation Requirements

- Observations of highly skilled leaders for growth are documented at all levels (i.e., P-5, 6-8, 9-12, Central Office Administrator)
- Coach (with a current L5 certificate) to supervise the three residency classes is identified
- Development of an e-portfolio demonstrating knowledge, skills, and application of Educational Leadership Standards and completion of the required field experience hours
- Obtain a passing score on the GACE 311 Leadership Content Assessment prior to July 1, 2025, or the GACE GT334 GACE Educational Leadership Tier I Assessment after July 1, 2025, to add leadership certification to your GAPSC educator certificate.

Program Information

- Program Length: 1 Year
- CIP Code: 13.0499
- Program Code: 1CERM-ELTO

Certificate Requirements

Required Courses: 21 Hours

- EDLR 6430 - School Law (3 Credit Hours)
- EDLR 6440 - Developing Professional Learning Communities (3 Credit Hours)
- EDLR 6550 - Instructional Supervision for Improving P-12 Learning (3 Credit Hours)
- EDLR 6640 - Developing Trends in Educational Leadership (3 Credit Hours)
- EDLR 6720 - Leading School Operations and Resources (3 Credit Hours)
- EDLR 6730 - Leading Family and Community Partnerships in Schools (3 Credit Hours)
- EDLR 6900 - Tier One Certification Clinical Residency I (1 Credit Hour)
- EDLR 6901 - Tier One Certification Clinical Residency II (1 Credit Hour)
- EDLR 6902 - Tier One Certification Clinical Residency III (1 Credit Hour)

Certificate Total: 21 Hours

Post-Master's Certificate in Educational Leadership - Tier Two

Program Overview

The 21-hour Tier II Certification-Only program is a performance-based program designed for educators who hold Tier I Educational Leadership certification and a Specialist degree or higher. It provides candidates with extensive opportunities to apply their knowledge and skills in authentic educational leadership settings. Upon successful completion of the required coursework and state assessments, candidates may be eligible for Tier II Leadership certification in Georgia. This is an embedded or standalone certificate (non-degree) program.

- CIP Code: 13.0499
- Program Code: 1CERM-ELTT

Certificate Requirements

Required Courses: 21 Hours

- EDLR 7351 - Tier II Clinical Residency for Educational Leaders - I (4 Credit Hours)
- EDLR 7352 - Tier II Clinical Residency for Educational Leaders - II (4 Credit Hours)
- EDLR 7353 - Tier II Clinical Residency for Educational Leaders - III (4 Credit Hours)
- EDLR 7430 - Improving Instructional Capacity Through Change (3 Credit Hours)
- EDLR 7470 - Managing Educational Operations to Support Teaching and Learning (3 Credit Hours)
- EDLR 7620 - Leading School Communities to Support Teaching and Learning (3 Credit Hours)

Certificate Total: 21 Hours

Post-Master's Certificate in Educational Leadership - Tier Two Extended Track

Program Overview

The Extended Tier-II Educational Leadership Program is designed to abridge the admission and progression processes for the Tier-I/Tier-II certification-only Educational Leadership Programs. It is for specific group of candidates. This is an embedded or standalone certificate.

The Extended Tier-II Program is for the following candidates:

- Candidates in the state of Georgia with Ed.S. degree and above, in verifiable official leadership position, holding a temporary Non-Renewable Professional Leadership Certificate in Educational Leadership, and seeking a one-step seamless admission and progression process for Tier-I/Tier-II Certification-only program completion.
- Candidates in the state of Georgia with Ed.S. degree seeking a seamless one-step admission and progression process for Tier-I/Tier-II Certification-only completion in Educational Leadership; with special permission from the school district/LUA.
- From other states (including S.C.) with Ed.S. degree seeking seamless process involving a one-step admission and progression process for Tier-I/Tier-II Certification-only completion.

whickman@augusta.edu

Program Accreditation

The program is accredited by the Georgia Professional Standards Commission (GaPSC), the accrediting agency, as an integral part of the Educational Leadership Preparation Program in the College of Education and Human Development at Augusta University.

Admissions Information

- Ed.S. degree in Education
- 3.0 GPA at graduate degree level
- Educator certificate with at least three years teaching experience
- School District/Local Unit of Education permission is required, as part of the application and admission processes

For more information on admissions requirements, visit the Office of Admissions website.

Progression and Graduation Requirements

- The Tier-I certificate section of the program is to be completed by the end of the first year; with satisfactory completion of minimum of 18 credit hours for the Tier-I section courses.
- Transition to the Tier-II section of the program by the beginning of the second year.
- The Tier-II section of the program to be completed by the end of the second year; with satisfactory completion of 21 credit hours of the Tier-II courses upon satisfactory completion of the Tier-1 section.

Candidates in this Extended Tier-II Program will not be allowed to register for any of the Tier-II Residency courses until they have completed and met all the requirements for Tier-1 certification in the Tier-I Section of the program. The requirements include the completion of the following:

(i) all Tier-I courses listed in the Program of Study for the Extended Tier-I-Tier-II Program, plus at least one of the Tier-II section courses (except for the residency courses), and

(ii) Take and pass the (a) GACE Tier-I Leadership Content test and (b) GACE Leadership Ethics test. Meeting these requirements is the only way a candidate can be entered into the GaPSC TPMS platform to be officially recognized as a Tier-II candidate by the GaPSC.

Candidates can apply for Tier-I Certification as soon as they complete all the courses in the Tier I section, plus at least one course in the Tier-II section (except for the residency courses) and fulfill all other GaPSC requirements for Tier-I Certification. Candidates can

only apply for Tier II Certificate after completing the whole program of study and meeting other state requirements, including taking and passing the GACE 347 for Tier II Certification.

To graduate, students must earn an overall 2.8 GPA.

- Program Length: 2 Years (includes two summer semesters)
- CIP Code: 13.0499
- Program Code: 1CERM-ELTT
- Major Code: ELTT

Certificate Requirements

Tier I Section: 18 Hours

- EDLR 6430 - School Law (3 Credit Hours)
- EDLR 6440 - Developing Professional Learning Communities (3 Credit Hours)
- EDLR 6550 - Instructional Supervision for Improving P-12 Learning (3 Credit Hours)
- EDLR 6640 - Developing Trends in Educational Leadership (3 Credit Hours)
- EDLR 6720 - Leading School Operations and Resources (3 Credit Hours)
- EDLR 6900 - Tier One Certification Clinical Residency I (1 Credit Hour)
- EDLR 6901 - Tier One Certification Clinical Residency II (1 Credit Hour)
- EDLR 6902 - Tier One Certification Clinical Residency III (1 Credit Hour)

Tier II Certification-Only Section: 21 Hours

- EDLR 7351 - Tier II Clinical Residency for Educational Leaders - I (4 Credit Hours)
- EDLR 7352 - Tier II Clinical Residency for Educational Leaders - II (4 Credit Hours)
- EDLR 7353 - Tier II Clinical Residency for Educational Leaders - III (4 Credit Hours)
- EDLR 7430 - Improving Instructional Capacity Through Change (3 Credit Hours)
- EDLR 7470 - Managing Educational Operations to Support Teaching and Learning (3 Credit Hours)
- EDLR 7620 - Leading School Communities to Support Teaching and Learning (3 Credit Hours)

Certificate Total: 39 Hours

Post-Master's Certificate in Psychiatric and Mental Health Advanced Nurse Practitioner

Program Overview

The Psychiatric and Mental Health (PMH) Advanced Nurse Practitioner certificate program is designed for a certified nurse practitioner (NP) with a master's or doctoral degree who would like to expand their scope of practice to provide psychiatric and mental healthcare to clients, families and communities. This certificate program is approved by the Georgia Board of Regents as a web-based program with greater than 50% of the program taught online. Due to the progressive nature of the specialty courses, the program is typically considered part-time (less than nine credit hours per semester). A minimum of 20 credit hours and 540 clinical hours are required, but individuals may be required to complete additional hours of up to 750 clinical hours based on an individualized gap analysis that is mandated by the National Taskforce Standards. This is an embedded or standalone certificate.

augusta.edu/gradschool/nurse-cert

Program Accreditation

This program is fully accredited by CCNE. Graduates are prepared to meet the eligibility requirements for national board certification by the American Nurses Credentialing Center.

Program Information

- Program Length: 1 Year
- CIP Code: 51.3810
- Program Code: CERM_PNUR

Prerequisites

The following courses are required to be completed prior to the start of the certificate program:

- NURS 7425 - Advanced Pathophysiology (4 Credit Hours)
- NURS 7430 - Pharmacology for Advanced Practice Nurses (4 Credit Hours)
- NURS 7465 - Advanced Studies in Lifespan Development (2 Credit Hours)
- NURS 7470 - Advanced Health Assessment (3 Credit Hours)

Certificate Requirements

- NURS 7251 - Advanced Psychopharmacology (2 Credit Hours)
- NURS 7465 - Advanced Studies in Lifespan Development (2 Credit Hours)
- NURS 8340 - Theoretical Foundations for Advanced Practice Psychiatric Mental Health Nursing Across the Lifespan (3 Credit Hours)
- NURS 8341 - Advanced Psychiatric Mental Health Nursing for Individuals Across the Lifespan (3 Credit Hours)
- NURS 8344 - Advanced Psychiatric Mental Health Nursing for Families and Groups Across the Lifespan (3 Credit Hours)
- NURS 8350 - PMHNP Practice I: for Accelerated Post-Graduate Certificate (3 Credit Hours)
- NURS 8351 - PMHNP Practice II: for Accelerated Post-Graduate Certificate (3 Credit Hours)
- NURS 8352 - PMHNP Practice III: for Accelerated Post-Graduate Certificate (3 Credit Hours)

Certificate Total: 22 Hours

Clinical/Lab Total: 540 Hours

Term-by-Term Pathway

To outline and visualize the path from start to finish in this program, refer to the suggested Term-by-Term Pathway.

Pre-Engineering and Regents Engineering Pathways Curriculum

Program Overview

Augusta University participates in the University System of Georgia Engineering Pathways program enabling our students to smoothly transfer to the engineering program in the state or complete a dual degree in physics and engineering. The Department of Chemistry and Biochemistry, Department of Mathematics, and Department of Physics and Biophysics offer many of the courses required of freshmen and sophomores to prepare students for transfer to engineering programs.

Because of the curriculum overlap with the physics programs, students generally declare a physics major with a pre-engineering concentration while completing prerequisite coursework. Our students are highly successful at completing programs following transfer to such institutions as Georgia Institute of Technology, University of Georgia, Georgia Southern University and Southern Polytechnic State University, as well as other programs outside the state of Georgia. There are many diverse programs to consider such as

mechanical, electrical or civil engineering or programs such as biochemical, computer systems, environmental, or biological engineering programs.

STEM areas are in high demand for employers, and growth in many engineering disciplines is anticipated to be high. Engineers will be trained to solve complex analytical problems with both computational and hands on techniques with real world applications.

The departments work with students to help select the best path through the coursework for their desired or intended program. It is advisable for students to research their specific program of interest so advisors can help design a custom curriculum. In addition to your advisor in the Academic Advising Center, you should also begin consulting with a faculty advisor early in your academic career. There is a broad diversity in specific requirements for each program.

Program Requirements

Core IMPACTS Courses: 42 Hours

For details on required courses, refer to the General Education/Core IMPACTS.

Core IMPACTS: Technology, Mathematics and Sciences

Select the following from the Technology, Mathematics and Sciences area of Core IMPACTS.

- CHEM 1211 - Principles of Chemistry I (3 Credit Hours)
- CHEM 1211L - Principles of Chemistry I Laboratory (1 Credit Hour)
- CHEM 1212 - Principles of Chemistry II (3 Credit Hours)
- CHEM 1212L - Principles of Chemistry II Laboratory (1 Credit Hour)
- MATH 2011 - Calculus and Analytical Geometry I (4 Credit Hours)

Core IMPACTS: Social Sciences

Select one of the following from the Social Sciences area of Core IMPACTS.

- ECON 1810 - Introduction to Economics (3 Credit Hours)
- ECON 2105 - Macroeconomics (3 Credit Hours)
- ECON 2106 - Microeconomics (3 Credit Hours)

Field of Study Courses: 18 Hours

- MATH 2012 - Calculus and Analytical Geometry II (4 Credit Hours)
- MATH 2013 - Calculus and Analytical Geometry III (4 Credit Hours)
- PHYS 2211 - Principles of Physics I (4 Credit Hours)
- PHYS 2212 - Principles of Physics II (4 Credit Hours)

Non-Core Courses: 9 Hours

- ENGR 2060 - Programming for Science and Engineering (4 Credit Hours) (*one hour can be used in the Field of Study Courses requirement*)
- MATH 3020 - Differential Equations (3 Credit Hours)
- MATH 3280 - Linear Algebra (3 Credit Hours)

Directed Electives: 0-11 Hours

One or more other courses may be required for transfer to engineering programs within the University System of Georgia, depending on the student's chosen engineering field. Students should consult their pre-engineering advisor in the Department of Chemistry and Biochemistry or Department of Physics and Biophysics for the proper selection of these courses.

Wellness Graduation Requirement: 1 Hour

Students who begin at or transfer to Augusta University with less than 60 credit hours must complete the Wellness Requirement.

- WELL XXXX - Activity Course (1 Credit Hour)

Total Hours: 70 - 81

Specialist in Education in Advanced Educational Studies

Program Overview

The Education Specialist in Advanced Educational Studies program allows candidates to build upon existing knowledge and skills as a practitioner. Education specialist degree completers possess advanced knowledge and skills to develop and design curriculum, implement instructional methods that are data-driven and responsive, and assess instructional practices that facilitate student learning. Also, candidates gain the ability to use fundamental applied research methods informed by theory and inquiry to address everyday, practical educational problems.

Admissions Information

This program requires a secondary admissions process. For more information on admissions requirements, please visit The Graduate School website.

Progression and Graduation Requirements

- To graduate, students must earn an overall 2.8 GPA.

Program Information

- Program Length: 3 Semesters

- CIP Code: 13.0301
- Program Code: 1EDS-ADES
- Major Code: ADES

Degree Requirements

Major Courses: 12 Hours

- EDCI 7110 - Curriculum Studies (3 Credit Hours)
- EDUC 7007 - Perspectives on U.S. Education in Context (3 Credit Hours)
- EDUC 7021 - Educational Research (3 Credit Hours)

Plus one of the following:

- EDUC 7004 - Philosophy of Education (3 Credit Hours)
- EDUC 7005 - History of American Education (3 Credit Hours)
- EDUC 7006 - Comparative Education (3 Credit Hours)

Concentration Courses: 9 Hours

Students select a concentration area that is currently on their teaching certificate:

- Art Education (P-12)
- Elementary Education (P-5)
- English Speakers of Other Languages (P-12)
- Health and Physical Education (P-12)
- Middle Grades Education (4-8)
- Music Education (P-12)
- Secondary Education (6-12) in the following subjects:
 - Biology, Chemistry, Earth Science, Economics, English, French, German, History, Mathematics, Physics, Political Science, Spanish, Science Education
- Special Education (P-12)

The concentration courses will focus assignments and projects on the student's current area of certification.

- EDCI 7224 - Content Literacy (3 Credit Hours)
- EDCI 7364 - Improving Instruction (3 Credit Hours)
- EDCI 7910 - Advanced Inquiry in Educational Studies (3 Credit Hours)

Electives: 9 Hours

Students work with advisors to select electives and may use these electives to add one of the following endorsements to their teaching certificate:

Department of Research, Counseling, and Curriculum

- Gifted Education
- Urban Education

Department of Teaching and Learning

- Reading
- English to Speakers of Other Languages (ESOL)
- Computer Science
- STEM

Electives must be selected in consultation with the advisor from the following:

- EDCI 6000-7000 level course (3 credit hours)

- EDUC 6000-7000 level course (3 credit hours)
- Gifted Endorsement Electives
- EDUC 6271 - Introduction to Gifted Education (3 Credit Hours)
- EDUC 6272 - Assessment of Gifted Learners (3 Credit Hours)
- EDUC 6273 - Curriculum and Program Design for Gifted Learners (3 Credit Hours)
- Urban Endorsement Electives
- EDUC 7010 - Critical Issues in Urban Education Policy and Practice (3 Credit Hours)
- EDUC 7011 - Youth in Urban Schools (3 Credit Hours)
- EDUC 7012 - Critical Praxis in Urban Educational Contexts (3 Credit Hours)
- Other Department Electives
- EDTD 6000-7000 level course (3 credit hours)
- ENGL 6620 - English Linguistics (3 Credit Hours)
- KNHS 6000-7000 level course (3 credit hours)
- SPED 6000-7000 level course (3 credit hours)

Degree Total: 30 Hours

Specialist in Education in Educational Leadership

Program Overview

The Specialist in Education in Educational Leadership is an approved graduate program in Georgia that prepares educators for Tier Two Educational Leadership Certification. Aligned to the Professional Standards for Educational Leadership, the 30-hour programs in offered online. Coursework is delivered 100% online.

augusta.edu/education/teaching-leading

Admissions Information

Progression and Graduation Requirements

- Valid Georgia T-5, L-5, S-5, T-6, T-7, S-6, S-7 or comparable Level 6 Georgia certificate and valid Standard Professional Educational Leadership Tier One.
- Individualized Educational Professional Practice Plan must be completed.
- Student must complete a pre/post self-evaluation rubric.
- Candidate MUST receive program approval to register for the GACE 347 Educational Leadership Tier II Assessment. Candidates are encouraged to take the assessment during their final semester prior to completion of the respective program. A passing score is required for GaPSC certification.
- Note: The Tier-I Section courses are only prerequisites within the Extended Ed.S. Program. To obtain a Tier-I Certification within the Extended Ed.S. Program, you must have taken, at a minimum, one more course in the Tier-II Section (excluding the Tier-II Clinical Practice Residency Course). This will make the 21 credit hours required for Tier-I Certification.
- To graduate, students must earn an overall 2.8 GPA and complete a minimum of 750 verified hours of field experience.

Program Information

- Program Length: 1 Year for the Ed.S./Tier-II Track II (30 credit hours) and 2 years for the Ed.S./Tier-I/Tier-II Track (48 credit hours)

- CIP Code: 13.0401
- Program Code: 1EDS-WLDR

Degree Requirements

Select one of the following tracks:

INQR 1000 - Fundamentals of Academic Inquiry (1 Credit Hour)

Discovery, exploration, and analysis of ideas that faculty members across a variety of disciplines, study and investigate.

Core IMPACTS Requirement(s) Satisfied: Institutional Priority (Institution)

Contact Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Freshman-Semester, Junior-Semester, Sophomore-Semester

Schedule Type (Primary): Seminar **Schedule Type (Additional):** Small Group, Asynchronous Instruction

INQR 1000H - Honors: Fundamentals of Academic Inquiry (1 Credit Hour)

Discovery, exploration, and analysis of ideas that faculty members across a variety of disciplines study and investigate. This is an honors course.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Freshman-Semester, Junior-Semester, Sophomore-Semester

Schedule Type (Primary): Seminar **Schedule Type (Additional):** Small Group, Asynchronous Instruction

ASII 1101 - Learning for Success (1 Credit Hour)

This course is structured as an active-learning experience and is focused on the exploration and practical applications of learning theories. Students engage in content designed to promote life-long learning habits, such as learning how to learn, building and sustaining motivation, developing and applying critical and creative thinking skills, and understanding the value of goal setting. The concepts, skills, and competencies included in the course facilitate both academic and professional success.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Campus Restrictions: Main Campus

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group

ASII 1201 - Teaching and Learning for Peer Educators (1 Credit Hour)

This is an intensive course that is structured as an active-learning experience focused on the exploration of evidence-based practices and communication skills embedded in peer learning contexts. Students engage in a two-day conference at the beginning of term then participate in two seminars over the course of the term to review and reflect on the teaching and learning process. The content is based on the College Reading and Learning Association Tutor Training Program that is designed to promote teaching and learning skills in a peer learning context. Topics include roles and responsibilities, communication strategies, learning styles, goal setting, active listening, study skills, and ethics. The concepts, skills and competencies included in the course facilitate both academic and professional success.

of participants.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group

ACCT 2101 - Principles of Accounting I (3 Credit Hours)

An introductory course in financial accounting. The focus is on accounting as a system for reporting business activity. It includes study of the accounting cycle, the preparation and interpretation of basic financial statements, and the study of fundamental accounting principles.

Prerequisite(s): MATH 1101 >=C or MATH 1111 >=C or MATH 1113 >=C or MATH 1220 >=C or MATH 2011 >=C or MATH 2012 >=C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ACCT 2102 - Principles of Accounting II (3 Credit Hours)

This is an introductory course in managerial accounting. The focus is on accounting as a system for providing information for organizational management. It includes the study of budgeting, cost-volume-profit analysis, and information for decision making.

Prerequisite(s): ACCT 2101 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ACCT 3311 - Intermediate Accounting I (3 Credit Hours)

This course is the first of three courses covering current accounting concepts, principles, theory, and techniques involved in the accounting process and preparation of financial statements. Emphasis is on accounting for most working capital assets, financial statements, the accounting standard-setting process, and economic consequences of accounting standards on a firm's stakeholders.

Prerequisite(s): ACCT 2101 >= B

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ACCT 3312 - Intermediate Accounting II (3 Credit Hours)

This is the second of three courses in intermediate financial accounting. In this course students will learn how to account for complex business transactions. Emphasis is on accounting for long-term assets, investments, current and long-term liabilities, stockholders' equity, and dilutive securities and earnings per share.

Prerequisite(s): ACCT 2101 >= B and ACCT 2102 >= B and ACCT 3311 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ACCT 3321 - Cost Accounting (3 Credit Hours)

This is a basic course in cost accounting for manufacturing and non-manufacturing sectors. The emphasis is on the development of cost systems for organizational planning and control. The course includes study of such areas as analysis of variances; determination of overhead rates; job order and process cost product costing; and capital, operating and financial budgets.

Prerequisite(s): ACCT 2102 >= B and MINF 2650 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ACCT 3331 - Individual Taxation (3 Credit Hours)

This course is a survey of theories and practices governing federal income taxation of individuals and sole proprietorship business entities.

Prerequisite(s): ACCT 2101 >= B

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ACCT 4322 - Cost Management (3 Credit Hours)

This course provides the student with an in-depth analysis of managerial-cost concepts and techniques required for developing, analyzing, and interpreting information for organizational planning and control.

Prerequisite(s): ACCT 3321 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ACCT 4332 - Corporate Taxation (3 Credit Hours)

This course presents an overview of federal tax law for corporations and partnerships, with an emphasis on tax research.

Prerequisite(s): ACCT 3331 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ACCT 4350 - Accounting Information Systems (3 Credit Hours)

The course introduces students to the design and operation of accounting information systems as affected by information theory, computer and behavioral concepts. This includes a study of internal controls in the design and analysis of systems. EDP audit concepts and techniques are considered.

Prerequisite(s): (MINF 2201 >= C or MINF 2650 >= C) and ACCT 3311 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ACCT 4360 - Auditing (3 Credit Hours)

This course provides basic coverage of financial statement audits and related attest, assurance and other services performed by certified public accountants. The emphasis is on audits of financial statements, including auditing standards and procedures as well as the auditor's professional responsibilities. The course also covers the use of analytical skills, the study and testing of internal controls, evidence accumulation and evaluation techniques, forensic accounting topics, and the ethical responsibilities of certified public accountants.

Prerequisite(s): ACCT 3312 >= C or ACCT 4350 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ACCT 4370 - Advanced Accounting (3 Credit Hours)

The emphasis of this course is on the application of accounting theory to business combinations and international operations.

Prerequisite(s): ACCT 3312 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ACCT 4380 - Governmental and Institutional Accounting (3 Credit Hours)

The emphasis of this course is on accounting for state and local governments. The accounting requirements and processes for hospitals, universities, and other not-for-profit organizations are also examined.

Prerequisite(s): ACCT 2101 >= B and ACCT 2102 >= B

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ACCT 4390 - Financial Statement Analysis (3 Credit Hours)

This course focuses on the analysis and interpretation of financial statements, including: 1) profitability and ratio analysis, 2) adjustment and restatement of financial statements, 3) cash flow analysis, 4) accounting-based equity valuation, 5) market impact of accounting choices, 6) earnings quality, 7) earnings management, mergers, and acquisitions, 8) intangibles, credit analysis, and credit ratings, and 9) financial statement forecasting.

Prerequisite(s): ACCT 2101 >=C and ACCT 2102 >=C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ACCT 4950 - Selected Topics in Accounting (3 Credit Hours)

This is a course and/or directed study of a major issue, practice, or problem in the area of accounting. Content is to be decided based on needs and professional objectives of students and the expertise and availability of faculty. Prerequisite(s): permission of the instructor.

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

ACCT 4960 - Accounting Internship (3 Credit Hours)

This course is a supervised, service-learning experience located within an organization emphasizing the completion of specific accounting related tasks or projects that require the application and acquisition of accounting knowledge.

Lecture Hours: 3 **Lab Hours:** 3 **Contact Hours:** 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BBA-ACCT-BBA-Accounting

Schedule Type (Primary): Asynchronous Instruction **Schedule Type (Additional):** Internship/Practicum

ACCT 6300 - Accounting for Managers (3 Credit Hours)

Provides an understanding of accounting for business and decision-making, including the preparation and interpretation of financial statements, the study of fundamental accounting principles, and interpreting information for organization planning and control.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: MBA **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ACCT 6332 - Advanced Federal Income Taxation (3 Credit Hours)

This course presents an overview of federal tax law for corporations, partnerships, estates, and trusts, with an emphasis on tax research. The course also includes a corporate tax return project. Students who have successfully completed ACCT 4332 may not take this course for credit.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: MBA **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ACCT 6350 - Accounting for Healthcare Managers (3 Credit Hours)

This course includes the study of healthcare accounting and financial management with a focus on cost, quality, and access and the roles they play developing a firm understanding of accounting and financial management in today's health care system. Topics include: financial environment of healthcare organizations, recording financial information, inventory costing, ratio analysis, investment analysis, capital structure (long-term debt and equity financing), and capital management.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Hull College of Business **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ACCT 6370 - Advanced Accounting (3 Credit Hours)

The emphasis of this course is on the application of accounting theory to business combinations and international operations. Partnership accounting will also be examined. This course also includes a term project on accounting for international operations. Students who have successfully completed ACCT 4370 may not take this course for credit.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: MBA **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ACCT 6380 - Governmental and Institutional Accounting (3 Credit Hours)

The emphasis of this course is on accounting for state and local governments. The accounting requirements and processes for hospitals, universities, and other not-for-profit organizations are also examined. This course also includes a paper comparing not-for-profit organizations within the same industry. Students who have successfully completed ACCT 4380 may not take this course for credit.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: MBA **Course Level Restrictions:** Graduate Semester
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ACCT 6950 - Selected Topics in Accounting (3 Credit Hours)

This is a variable content course individually designed to meet the needs, interests, and professional objectives in business administration.

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: MBA **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

ADBL 5211 - Basic Cardiac Life Support Training I (1 Credit Hour)

In this course the student completes the Basic Cardiac Life Support Healthcare Provider lessons according to the standards established by the American Heart Association. In addition, Augusta University Emergency Medical Protocol is reviewed.

Lecture Hours: 4 **Contact Hours:** 30

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

ADBL 5612 - Basic Cardiac Life Support Training II (1 Credit Hour)

CPRD 5002 includes BLS for Healthcare Providers (renewal course) according to the standards established by the American Heart Association and a review of Dental College of Georgia, Augusta University Emergency Medical Protocol.

Lecture Hours: 4 **Contact Hours:** 4

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

ADCL 5291 - Community Outreach I (1 Credit Hour)

This one credit hour course will run both semesters of the first year of the dental curriculum and will provide students with the opportunity to serve the oral health needs of the local community and the state in a variety of ways and venues. In the first year the students will be expected to accrue a minimum of 20 hours of public service and will receive one credit hour. (See under course requirements)

What is community service? In general, community service is any unpaid/uncompensated volunteer effort that benefits the community and/or special populations. It implies a selfless act of kindness that helps those less fortunate, but can also be interpreted as being for the "higher good", that is, the service provided goes beyond the selfish needs, desires or interests of the individual who performs it. Community service could, for example, benefit the environment or homeless pets. It is not limited to populations of people. Community service is not merely work without pay. Students should check with the course director to identify the parameters for their community service requirements.

Contact Hours: 30 to 40

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Supervised Lab/Clinic

ADCL 5492 - Community Outreach II (1 Credit Hour)

This one credit hour course will run both semesters of the first year of the dental curriculum and will provide students with the opportunity to serve the oral health needs of the local community and the state in a variety of ways and venues. In the first year the students will be expected to accrue a minimum of 20 hours of public service and will receive one credit hour. (See under course requirements)

Community service could, for example, benefit the environment or homeless pets. It is not limited to populations of people. Community service is not merely work without pay. Students should check with the course director to identify the parameters for their community service requirements.

Contact Hours: 80

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Supervised Lab/Clinic

ADCL 5693 - Community Outreach III (1 Credit Hour)

This one credit hour course will run both semesters of the first year of the dental curriculum and will provide students with the opportunity to serve the oral health needs of the local community and the state in a variety of ways and venues. In the first year the students will be expected to accrue a minimum of 20 hours of public service and will receive one credit hour. (See under course requirements)

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Supervised Lab/Clinic

ADCL 5794 - Community Outreach Clerkship I (6 Credit Hours)

These two, six-credit hour courses (Fall and Spring semesters) in the fourth year of the dental curriculum will provide students with the opportunity to serve the oral health needs of the local community and the state in a variety of ways and venues. In the fourth year the students will be expected to accrue 288 hours of community service, primarily by rotating through off-site clinics, for a total of eight weeks (12 credits). (See course requirements for options to accrue hours) The major goal of these courses is to sensitize students to the oral health needs of the state and to provide preventive, educational and clinical experience in public health community dentistry in a variety of ways at a variety of sites and to develop professionalism.

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Supervised Lab/Clinic

ADCL 5895 - Community Outreach Clerkship II (6 Credit Hours)

These two 6 credit hour courses (Fall and Spring semesters) in the 4th year of the dental curriculum will provide students with the opportunity to serve the oral health needs of the local community and the state in a variety of ways and venues. In the fourth year the students will be expected to accrue 288 hours of community service, primarily by rotating through off-site clinics, for a total of 8 weeks (12 credits). (See course requirements below for options to accrue hours) The major goal of these courses is to sensitize students to the oral health needs of the state and to provide preventive, educational and clinical experience in public health community dentistry in a variety of ways at a variety of sites and to develop professionalism.

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Supervised Lab/Clinic

ADFD 5591 - Clinical Ethics and Professionalism I (1 Credit Hour)

The series of patient services courses are designed to teach students to utilize clinic time effectively and manage patient records, oral disease and infection control in a professional manner.

Contact Hours: 30

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Supervised Lab/Clinic

ADFD 5692 - Clinical Ethics and Professionalism II (2 Credit Hours)

The series of courses are designed to teach students to utilize clinic time effectively and manage patient records, oral disease and infection control in a professional manner.

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Supervised Lab/Clinic

ADFD 5793 - Clinical Ethics and Professionalism III (3 Credit Hours)

The series of courses are designed to teach students to utilize clinic time effectively and manage patient records, oral disease and infection control in a professional manner.

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Supervised Lab/Clinic

ADFD 5894 - Clinical Ethics and Professionalism IV (3 Credit Hours)

The series of patient services courses are designed to teach students to utilize clinic time effectively and manage patient records, oral disease and infection control in a professional manner.

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Supervised Lab/Clinic

ADSN 5701 - Special Care Dentistry (1 Credit Hour)

Provides didactic material with case presentations necessary to introduce dental students to be able to recognize and manage the most common special needs patients they will encounter in the general dental practice. Emphasis is placed on developing the skills necessary for effective communication, diagnosis, treatment planning, and delivery of dental care to dental patients that need special care.

Lecture Hours: 1

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

RMAI 5000 - Medicine Subspecialty Allergy Immunology (27 Credit Hours)

Lecture Hours: 5 **Lab Hours:** 40 **Contact Hours:** 15

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Internship/Practicum

CAHS 3110 - Human Physiology (3 Credit Hours)

Introduction to the major systems of the body, how they are controlled in health, and the pathological effects of system dysfunction.

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci

Schedule Type (Primary): Lecture

CAHS 3610 - Ethics for Health Professionals (1 Credit Hour)

Prevailing philosophies and basic ethical principles will be presented and legal issues common to allied health professionals will be discussed. Clinical application of ethical theory and ethico-legal decision making will be emphasized. Each of the Departments will provide profession-specific content for discussion and application with their students.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Asynchronous Instruction

CAHS 3660 - U.S. Healthcare Delivery System (3 Credit Hours)

This course will allow allied health professionals to develop an understanding of the organization and structure of the healthcare industry as a whole and the healthcare facilities comprising the industry. Healthcare delivery systems in the areas of ambulatory care, home health, and long-term care are rapidly increasing in addition to the increasing demand for allied health professionals. The healthcare delivery systems in the twenty-first century will be faced with increased regulations and standards, with focus on cost containment, accessibility, and quality.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

CAHS 4300 - Professional Issues and Ethics (1 Credit Hour)

Introduction to current critical issues impacting allied health science; the role of the allied health professional within the healthcare system and its relationship to other healthcare disciplines.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Undergraduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CAHS 4451 - Child Life Clinic I (10 to 15 Credit Hours)

Child Life Clinic will expose students to the following: children's and families responses to experience in illness and hospitalization/injury from birth through adolescence, stress and coping issues, therapeutic and medical play, activity planning/coordination/implementation, psychological preparation for healthcare experiences and associated coping processes, parental interactions, and children's understanding of illness/death.

Lecture Hours: 3 **Lab Hours:** 27

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

CAHS 4452 - Child Life Internship (10 to 15 Credit Hours)

Child Life internship will provide students with the opportunity to be independent in a Child Life specialist role with an in-depth understanding and practice of the above mentioned skills. Documentation and advanced assessment skills will be utilized.

Lecture Hours: 2 **Lab Hours:** 20 to 40

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Internship/Practicum

CAHS 4453 - LIFE - Learning in Family Environments (1 to 3 Credit Hours)

This course will familiarize students with components and essentials of family centered care. Emphasis is placed on direct experiences with patients and families in various settings. Theories of development and family systems will be explored.

Lecture Hours: 1 **Contact Hours:** 39

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

CAHS 4470 - Public Health and Healthcare Small Business Governance and Financial Management (3 Credit Hours)

This course will focus of fostering student knowledge to understand the small-business and non-profit environment in the public health and healthcare field. The course will provide information on how to establish and set-up and manage small businesses and non-profit organizations focused on public health and healthcare with an aim to understand applicable State regulations, as well as governance structure(s), effective organizational development and management, and sustainable fundraising opportunities.

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Schedule Type (Primary): Asynchronous Instruction

CAHS 6501 - Evidence-Based Practice (2 Credit Hours)

Identification of a research project including the literature evaluation and review of current evidence in the profession. Resources to conduct a course of scholarly investigation is initiated. Examination of findings and the significance for practice is included.

Lecture Hours: 1 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci , The Graduate School **Course Level Restrictions:** Graduate Semester **Program**

Restrictions: MHSCLS_CLS-Clinical Laboratory Science, MHSMD_MDOS-Medical Dosimetry, MHSOT_OTHP-Occupational Therapy, MS_AHSC-Allied Health

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

CAHS 6503 - Research Process (3 Credit Hours)

Investigation of qualitative, quantitative, and applied statistical methods for clinical and professional studies or projects. Application of evidence based research and completion of HAC proposals and approval processes. Emphasis is placed on ethical and procedural requirements for responsible research/scholarship. Prerequisite: Successful completion of 2nd semester MHS courses or permission from the Chair.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MHSCLS_CLS-Clinical Laboratory Science, MHSOT_OTHP-Occupational Therapy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

CAHS 6524 - Project Development (2 Credit Hours)

Development of a scholarly research process including the HAC approvals. Engagement in an active scholarly pursuit. Research methods and applications are included. Prerequisite: Successful completion of 3rd semester MHS coursework; or permission of Chair.

Lab Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MHSOT_OTHP-Occupational Therapy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Supervised Lab/Clinic, Independent Study

CAHS 7005 - The Adult as a Learner (3 Credit Hours)

Assists healthcare practitioners in applying the body of knowledge related to adult learning to settings in which they will be teaching and practicing. Helps students analyze theories of adult learning, learning needs, goals, strategies and evaluation plans suitable for the adult learner.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit
Course Level Restrictions: Graduate Semester
Schedule Type (Primary): Lecture/Supervised Lab/Clinic

CAHS 7100 - Pathophysiology for Allied Health Professionals (3 Credit Hours)

Course will provide didactic learning opportunities in the pathophysiology of key disease processes and medical nutrition therapies. Principles of pathophysiology, pharmacology, and nutrition are presented in an integrated manner to provide a basis for the application of nutrition and pharmacology therapies to prevent, treat or manage diseases.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

CAHS 7110 - Principles of Human Physiology (3 Credit Hours)

Prerequisites: Admission to Physician Assistant Program or permission of instructor Basic concepts in human physiology will be presented in lecture and case study format.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Program Restrictions:** DPT_PHTP-Physical Therapy, MPA_PHAS-Physician Assistant

Schedule Type (Primary): Asynchronous Instruction

CAHS 7115 - Topics in Healthcare Delivery (2 Credit Hours)

This course will present an overview of topics concerning healthcare delivery in the United States and internationally with a primary focus on the evolution of the U.S. healthcare system.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CAHS 7200 - Capstone Project (2 Credit Hours)

Students will apply research design and research methodologies and the statistical procedures used to complete a research project. Students will have a hands-on experience in using software such as SPSS to analyze and interpret data and improve research writing skills.

Lecture Hours: 2

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit, In Progress

Program Restrictions: MS_AHSC-Allied Health

Schedule Type (Primary): Lecture

CAHS 7300 - Professional Issues and Ethics (1 Credit Hour)

Introduction to current critical issues impacting allied health science; the role of the allied health professional within the healthcare system and its relationship to other healthcare disciplines. The students will be expected to perform critical evaluations of clinical cases and/or scientific papers and additional advanced practice competencies in related content area.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Graduate Semester **Program Restrictions:** MHSCLS_CLS-Clinical Laboratory Science, MHSMD_MDOS-Medical Dosimetry

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CAHS 7400 - Human Gross Anatomy (6 Credit Hours)

This graduate level anatomy course is an introduction to specialized areas of the macroscopic structures of the human body through the use of lectures, laboratory dissection, and demonstrations. It is a study of the structure and function of human biology including cells, tissues and organs of the following systems: skull and cranial cavity, back & vertebral column, spinal cord and overview of the nervous system, brachial plexus and pectoral region, upper and lower extremities, thoracic cavity, heart and mediastinum, abdominal viscera, male and female pelvis. Health sciences students review major organ systems while understanding anatomical relationships and its application to clinical practice.

Lecture Hours: 4 **Lab Hours:** 12

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Anatomy Lab Supplies Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 400

CAHS 7450 - Human Gross Anatomy for Occupational Therapists (6 Credit Hours)

Gross anatomy of the human body presented with the systems approach, using lecture, laboratory, demonstration, and clinical application. The application of anatomical knowledge is achieved through cadaver pro-section, models, and digital resources. Systems include skeletal, muscular, nervous, vascular, sensory, and organ, with specific focus on understanding anatomical relationships and the application to occupational therapy clinical practice.

Lecture Hours: 4 **Lab Hours:** 2 **Contact Hours:** 8

Repeatability: May be repeated for credit one time.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Department Restrictions:** Allied Health: Dept. of Occupational Therapy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Anatomy Lab Supplies Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 400

CAHS 7500 - Clinical Anatomy (4 Credit Hours)

Provides students with the opportunity to develop foundational knowledge of the normal anatomy of the musculoskeletal system as a basis for physical therapy practice. Content includes, but is not limited to, anatomy of the musculoskeletal and peripheral nervous system, cardiovascular, pulmonary, gastrointestinal, and urologic systems. The application of anatomical knowledge is reinforced through cadaver dissection and/or pro-section. It is expected that the knowledge gained in this course is integrated into clinical application courses throughout the curriculum.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PTHP- Physical Therapy **Student Class**

Restrictions: Graduate **Course Level Restrictions:** GS Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy

Degree Restrictions: DPT- Doctor of Physical Therapy **Program Restrictions:** Doctor of Physical Therapy **Campus Restrictions:** M-Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Anatomy Lab Supplies Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 400

CAHS 7523 - Research Project (3 to 6 Credit Hours)

Completion of scholarly work that includes the application of research that affects practice and the provision of occupational therapy services. Prerequisite: Successful completion of the 4th semester MHS courses or permission of the chair.

Lecture Hours: 1 **Lab Hours:** 4 to 12

Repeatability: May not be repeated for credit.

Grade Mode: Normal, In Progress

College Restrictions: College of Allied Health Sci **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:**

Graduate Semester **Program Restrictions:** MHSCLS_CLS-Clinical Laboratory Science, MHSMD_MDOS-Medical Dosimetry, MHSOT_OTHP-Occupational Therapy

Schedule Type (Primary): Asynchronous Instruction **Schedule Type (Additional):** Thesis

CAHS 7550 - Clinical Anatomy and Physiology II (4 Credit Hours)

Provides students with the opportunity to develop foundational knowledge of the central nervous system. Introduces normal CNS development, anatomy, physiology, and pathophysiology from a clinical perspective. Emphasis is placed on the structures and functions that form sensory, motor, pain, perception, memory, emotion, cognition, and communication systems. Clinical application of localizing a lesion along the neuroaxis and of lesion etiology are discussed using foundational concepts of the neurologic screen.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PTHP- Physical Therapy **Student Class**

Restrictions: Graduate **Course Level Restrictions:** GS Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy

Degree Restrictions: DPT- Doctor of Physical Therapy **Program Restrictions:** Doctor of Physical Therapy **Campus Restrictions:** M-Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

CAHS 7705 - Neuroscience Applications (3 Credit Hours)

A study of neuroanatomy, neurophysiology, and applied neuroscience principles in the promotion of health and wellness and the recovery of illness and/or injury. Prerequisites: Successful completion of 1st semester MHS courses or permission from the chair.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MHSOT_OTHP-Occupational Therapy

Schedule Type (Primary): Lecture

CAHS 7990 - Independent Study (3 Credit Hours)

This course is designed to allow students to gain knowledge and skills in an area of special interest. Students will propose clearly defined individual personal learning objectives and learning activities to achieve those objectives which will be approved by their PhD mentor.

Contact Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Degree Restrictions: Doctor of Philosophy

Schedule Type (Primary): Independent Study

CAHS 9200 - Special Project (1 to 4 Credit Hours)

Repeatability: May not be repeated for credit.

Grade Mode: Normal

Schedule Type (Primary): Independent Study **Schedule Type (Additional):** Thesis

SAHS 6532 - Research Investigation (2 Credit Hours)

Prerequisites: Graduate admission to the MHS in OT degree program; permission of Chair or instructor Successful completion of fourth semester coursework.

Lab Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Program Restrictions:** MHS_OTHP-Occupational Therapy

Schedule Type (Primary): Asynchronous Instruction

SAHS 7533 - Research Thesis (3 Credit Hours)

Completion of research assignment and presentation of results to professionals and peers. Publication guidelines are examined.

Lecture Hours: 1 **Lab Hours:** 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Degree Restrictions:** Master of Health Science

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Thesis

SAHS 7541 - Data/Outcome Analysis (1 Credit Hour)

Methods and resources to analyze and interpret data are included. Implications of results are identified and prepared.

Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MHS_OTHP-Occupational Therapy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

ANAT 5002 - Research Elective in Anatomy (4 to 8 Credit Hours)

To provide the student an opportunity to learn fundamental methods and experimental design in research related to cellular biology and anatomy. The research activities shall have direct relevance to the clinical interests of the student.

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Directed Study (one-to-one)

ANAT 5004 - Teaching Skills Elective (7 Credit Hours)

Goal: To provide an anatomy teaching opportunity for senior medical students who are interested in anatomy, anatomically intensive fields of medicine, and/or academic medicine.

Lecture Hours: 2 **Contact Hours:** 16

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Asynchronous Instruction **Schedule Type (Additional):** Practice Teaching

ANAT 5005 - Clinical Anatomy and Teaching Skills (4 to 8 Credit Hours)

Students will: 1) review and expand anatomical knowledge relevant to a chosen field through dissection and independent study; 2) confidently teach regional gross anatomy; 3) explain the anatomical basis of common clinical findings and clinical practice; 4) implement sound pedagogical practices when teaching trainees and communicating with colleagues, including: content expertise, organization, non-verbal communication, providing feedback, and fostering active learning; and 5) model professionalism by working together as a team.

Contact Hours: 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia **Degree Restrictions:** Doctor of Medicine

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

ANAT 5085 - Essentials of Education (1 Credit Hour)

Essentials of Education is designed for students interested in teaching and assisting in summer courses or those interested in academic medicine. Students will learn from workshop style practical activities and interactions with each other. Topics include how to organize handouts and lectures, recognize and respond to various learning styles, produce coherent lectures for presentation, how to give feedback, and prepare quality exam questions.

Lecture Hours: 1 **Lab Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Practice Teaching

ANAT 5086 - Forensic Medicine (1 Credit Hour)

In this age of the "hollywood-ized" forensic dramas, this course has been designed to give students a true look at the ever-growing realm of forensic medicine. Participants will trace the path of typical forensic death investigations through the various forensic disciplines that aid in the death investigation. Ultimately, students will obtain a clear picture of the team effort of forensic death investigation and victim identification.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture

ANAT 7010 - Human Gross Anatomy for Medical Illustration I (4 Credit Hours)

Study of the Anatomy of the Human Body as applicable to Clinical Practice. Lectures, laboratory and demonstration materials are directed studies.

Lecture Hours: 2 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

ANAT 7011 - Human Gross Anatomy for Medical Illustration II (3 Credit Hours)

Study of the anatomy of the human body as applicable to clinical practice.

Prerequisite(s): ANAT 7010

Lecture Hours: 2 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

ANAT 7030 - Neuroscience I (3 Credit Hours)

Study of the central and peripheral nervous system as related to functional and clinical neurology.

Lecture Hours: 3 **Lab Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

ANAT 7040 - Graduate Neuroscience I (4 Credit Hours)

An in-depth study of the central and peripheral nervous system as related to functional and clinical neurology. Lectures are based on 18 units of the nervous system as covered in the course textbook. Laboratories consist of the study of the surface anatomy of the brain, spinal cord and peripheral nervous system. Internal structures of the brain and spinal cord are studied in coronal, sagittal and axial sections, as well as x-rays, CT-scans and MRI series. The second half of the laboratory is devoted to special dissections of nuclei, tracts and other internal structures of the brain and spinal cord.

Lecture Hours: 4 **Lab Hours:** 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate

Semester **Campus Restrictions:** Main Campus
Schedule Type (Primary): Lecture/Supervised Lab/Clinic

ANAT 7110 - Foundations in Anatomy Teaching and Learning (2 Credit Hours)

Foundational Teaching and Learning in Anatomy is a graduate level course designed to provide students with the knowledge and skills necessary to effectively begin to teach anatomical sciences at the collegiate and health professional level. This course covers key aspects of teaching and learning, including learning theories and pedagogies, instructional methods across various teaching formats, and principles of curriculum development and design. Students will develop course syllabi, instructional plans as well as practice effective presentation and facilitation skills. By the end of the course, students will have basic and practical skills to design, implement, and evaluate anatomy instruction that fosters deep understanding and learner success.

Prerequisite(s): CAHS 7400

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: The Graduate School **Department Restrictions:** DPHIL - Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture

ANAT 7300 - Human Gross Anatomy (6 Credit Hours)

Introduction to specialized areas of the macroscopic structures of the human body through the use of lectures, laboratory dissection, and demonstrations. Prerequisite: successful completion of 2nd semester MHS course work or permission of instructor/Chair.

Lecture Hours: 4 **Lab Hours:** 12

Repeatability: May not be repeated for credit.

Grade Mode: Normal

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Supervised Lab/Clinic

ANAT 8010 - Special Topics in Anatomy (1 to 4 Credit Hours)

Discussion and analysis of current research areas.

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy

Schedule Type (Primary): Seminar - Small Group

ANAT 8020 - Introduction to Research (2 Credit Hours)

Discussion and analysis of current research areas.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture

ANAT 8022 - Teaching Practicum in Molecular Cell Biology (2 Credit Hours)

Mentored practical experience in teaching cell biology at PhD level. Students are assigned to one of four modules in this course on a first-come, first-served basis. Practicum students attend lectures, work with the Course Director toward preparation and quality improvement of the lectures and exams, and tutor and deliver review instruction to first-year PhD students who are enrolled in the course. Consolidates knowledge of fundamental cell biology toward achieving future career goals.

Prerequisite(s): BIOM 8022 >= B

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Practice Teaching

ANAT 8030 - Fundamentals of Vision Science (3 Credit Hours)

Prerequisites: Satisfactory completion of the first year biomedical sciences core curriculum, or permission of the course director. This introductory course covers the fundamentals of the visual system including anatomy and development of the eye, biochemistry, cell biology and physiology of vision, general and ocular pharmacology, immunology and overview of pathology of the eye. This course is team-taught by MCG Vision Discovery Institute faculty.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Campus Restrictions:** Main Campus **Schedule Type (Primary):** Lecture

ANAT 8040 - Current Topics in Vision Science (3 Credit Hours)

This course will offer students an opportunity to familiarize themselves with recent discoveries in vision research and ophthalmic disease. The forums for interaction and learning include: formal journal clubs, ophthalmology grand rounds, the Vision Discovery Institute (VDI) seminar series, and VDI monthly group meetings. The course will include interactive discussions of recently published vision science papers and current research being pursued by the enrolled students. Students will develop their skills in reading the vision research literature critically and in effective presentations of scientific and clinical information. This course is team-taught by MCG Vision Discovery Institute faculty.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Course Level Restrictions: Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus **Schedule Type (Primary):** Lecture

ANAT 8050 - Graduate Histology (5 Credit Hours)

Prerequisite: Cell Biology, Biochemistry and/or Gross Anatomy, or permission of the course director. The microscopic anatomy and development of all human organ systems as well as the cellular biology of various tissues and organs are taught in detail. In addition, early human development and systemic development will be considered in detail. Cellular Biology, as it relates to anatomic structure, will be presented.

Lecture Hours: 3 **Lab Hours:** 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Campus Restrictions:** Main Campus **Schedule Type (Primary):** Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

ANAT 8051 - Histology for Graduate Studies I (3 Credit Hours)

This course is the first part of a comprehensive histology course that places a focus on basic structure and function of the various cells of the body incorporating basic disease mechanisms and pathologies to enhance functional understanding of histology. The course consists of lectures and complementary laboratories. During the first part of this course students will learn the basic organization and function of the cell, histology of the Musculoskeletal System and histology of the Cardiopulmonary system. This course is for two populations of students: graduate medical illustration students and graduate PhD biomedical research students who will be integrated with the first-year medical students for the entirety of the course.

Lecture Hours: 2 **Lab Hours:** 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Continuing Progress Courses, Audit

Degree Restrictions: Bachelor's Degree

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

ANAT 8052 - Histology of Graduate Studies II (3 Credit Hours)

The purpose of this course is to act as part 2 to a continuing progress course ANAT 8051 which will deliver appropriate histology content for graduate students and medical illustration students. At the end of this second part, students will receive a grade as a result

of grades accumulated from both ANAT 8051 and ANAT 8052. The graduate and medical illustration students will be integrated into the histology component of the first-year medical students curriculum for the entirety of the course. Since that content is split over the fall and spring semester, graduate and medical illustration students will be required to complete both ANAT 8051 and ANAT 8052 to gain the credit and grade for this histology course.

Prerequisite(s): ANAT 8051

Lecture Hours: 2 **Lab Hours:** 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Degree Restrictions: Bachelor's Degree

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

ANAT 8060 - Visual Neuroscience (2 Credit Hours)

This course will cover current topics of advanced research in visual information processing. It will focus on a thematic area of research, including, but not limited to neurological deficits in vision, visual prosthesis, 3-D vision, color vision, developmental disorders of vision, commercial aspects of vision, etc. Students will read relevant literature critically and present to fellow students under faculty guidance.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:**

DPHIL_UNDCL-Biomedical Sciences Undeclared **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture

ANAT 8070 - Progress in Vision Research (1 Credit Hour)

This course will cover current progress in all aspects of advanced vision research, including but not limited to, various aspects of eye development, ocular function in healthy vision, ocular disorders, dysfunction and therapies, neurological aspects of vision and visual dysfunction, rehabilitative treatments for low vision, visual prostheses, commercial and societal aspects of vision, etc. Students will read literature relevant to each upcoming seminar in both of the following two monthly seminar series of the Culver VDI: (i) the Culver VDI Group Meeting series and (ii) Culver VDI Distinguished External Speaker Seminar series, and interact with the speaker during the seminar presentation.

Contact Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Degree Restrictions: Doctor of Philosophy

Schedule Type (Primary): Seminar - Small Group

ANAT 8080 - Cellular Mechanisms in Development and Disease (2 Credit Hours)

This seminar course presents selected topics in the mechanisms underlying development of multi-cellular organisms. Correlations between developmental cell biology and disease/injury responses will be discussed by students and instructors using relevant journal articles.

Contact Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of

Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Seminar - Small Group

ANAT 8090 - Current Topics in Cellular Biology (1 Credit Hour)

This course will expose graduate students in the department to cutting edge research topics in the field of Cellular Biology. There will be two student-led lectures and discussions each month on a current and/or fundamental topic in cellular biology, including a background discussion on the topic, a discussion of the major research findings, and a discussion of the main conclusions of the paper. This course will help students develop their skills in reading research literature critically and preparing a comprehensive discussion of the paper to their colleagues.

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Degree Restrictions: Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Seminar - Small Group

ANAT 8120 - Investigative Techniques in Cell Biology (3 Credit Hours)

This course is designed to introduce Biomedical Sciences doctoral students to a wide array of methods used in cell biology applications. Faculty will use a mixture of lectures, demonstrations, and hands-on instruction to familiarize students with specialized methods used in their laboratories.

Prerequisite(s): BIOM 8011 = S and BIOM 8012 = S and BIOM 8021 >= C and BIOM 8022 >= C and BIOM 8033 >= C and BIOM 8040 = S and BIOM 8050 = S and BIOM 8060 = S and STAT 7070 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

ANAT 8300 - Thesis Research (1 to 12 Credit Hours)

This course requires permanent assignment to a specific lab with a faculty advisor and a defined research project. The student works under the mentorship of their faculty thesis advisor to define, develop, and carry out the basic study of a research problem of interest to both student and advisor. This course is designed to develop the experience, understanding, and skills to conduct and assess original, independent research in biomedical science. This course is typically taken more than one time and culminates in the final semester in the preparation and defense of a MS thesis.

Lab Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MS_CLBA-Cellular Biology & Anatomy

Schedule Type (Primary): Thesis

ANAT 9010 - Seminar in Cellular Biology and Anatomy (1 Credit Hour)

Forum for MCG faculty, visiting faculty, and graduate students to present their research.

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy

Schedule Type (Primary): Seminar - Small Group

ANAT 9020 - Seminar in Cellular Biology and Anatomy (1 Credit Hour)

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group

ANAT 9210 - Investigation of a Problem (1 to 12 Credit Hours)

The student works with individual faculty members on a specific investigative research problem. This provides an introduction to analytical techniques and the scientific method in action.

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: The Graduate School **Major Restrictions:** Cellular Biology & Anatomy **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Program Restrictions:** DPHIL_CLBA-Cellular Biology & Anatomy

Schedule Type (Primary): Supervised Lab/Clinic

ANAT 9300 - Research (1 to 12 Credit Hours)

Students work closely with their faculty thesis/dissertation advisor on an in-depth study of a research problem of interest to both student and advisor. The course culminates in the preparation of a PhD dissertation. Enrollment in this course requires official admission to candidacy.

Lab Hours: 17

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: The Graduate School **Major Restrictions:** Cellular Biology & Anatomy **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Program Restrictions:** DPHIL_CLBA-Cellular Biology & Anatomy

Schedule Type (Primary): Dissertation

ANES 5002 - Anesthesiology Research Elective (4 to 8 Credit Hours)

Prerequisite: ANES 5011 and acceptance by Department of Anesthesiology chair. The Department of Anesthesiology has an ongoing program in research. This area is available for student participation, depending on the student's background, and interests, as well as projects that are then current in the department. The student will attend all teaching seminars and conferences.

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Internship/Practicum

ANES 5003 - Anesthesiology Off-Campus Externship (4 to 8 Credit Hours)

Clinical experience in Anesthesiology in an off-campus hospital approved by the department chair.

Lecture Hours: 10 **Contact Hours:** 40

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Internship/Practicum

ANES 5008 - Pain Management Elective (4 to 8 Credit Hours)

Closely supervised clinical experience in the management of acute and chronic pain. The experience will take place within the structure of the MCG Multidisciplinary Pain Center and the inpatient wards of the Medical College of Georgia Hospital and will include diagnosis and treatment of chronic pain and the treatment of modalities for acute pain. The student will attend all scheduled teaching seminars and conferences.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

ANES 5011 - Anesthesiology Externship (4 to 8 Credit Hours)

Prerequisite: Senior Students Only. Students are introduced to the basic principles and practice of anesthesiology and perioperative medicine.

Lecture Hours: 6 **Lab Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia
Schedule Type (Primary): Lecture/Supervised Lab/Clinic

ANES 5014 - Respiratory Care Elective (4 to 8 Credit Hours)

The first three weeks of the rotation will focus on respiratory pathophysiology as related to the patients problems and on the appropriate treatment. Specifically, the first week involves oxygen, jet nebulizer, and chest physiology. The second and third week focus on mechanical ventilation. The last week is reserved for BLS and ACLS certification.

Lecture Hours: 96

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture

ANES 5015 - Anesthesia Critical Care (12 Credit Hours)

Goals: To educate and expose students to the general medical principles and management of critically ill surgical patients in the Intensive Care Unit environment. **Objectives:** Upon completion of the rotation, the student will have a better understanding of: 1. How to comprehend, apply and evaluate clinical information pertinent to the management of the critically ill. 2. Technical proficiency and skills required to monitor and treat the clinically ill. 3. Professional attitude and behavior needed to properly function in an ICU environment.

Activities Include: 1. Daily clinical rounds to evaluate clinical conditions, laboratory and radiologic information and psychosocial needs.

2. Education presentations. 3. Participation in procedural interventions. **Assessments Include:** 1. Periodic evaluations of clinical proficiency, technical skills and professional behavior. 2. Comprehensive written examinations.

Lecture Hours: 3 **Contact Hours:** 40

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

ANES 5016 - Anesthesiology Preceptorship (7 Credit Hours)

Must be a SW Regional Campus student Clinical experience in Anesthesiology at an off campus hospital introducing student to the basic principles of anesthesiology; critical care medicine or pain management and development of basic knowledge for the perioperative management of the patient.

Contact Hours: 40

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MD_MEDDD-Medicine **Campus Restrictions:** Southwest Campus

Schedule Type (Primary): Supervised Lab/Clinic

ANES 5018 - Pediatric Anesthesia Elective (4 to 8 Credit Hours)

This elective course is designed to provide medical students in their third and fourth year of training an immersive experience in the field of Pediatric Anesthesiology. In this elective, students work with Pediatric Anesthesiologist faculty members to evaluate and manage pediatric patients perioperatively. Students are involved with the care of patients from preoperative assessment and preparation, into intraoperative care, and through to postoperative assessments. They gain experience from seeing the care of a wide range of ages and patient conditions - both stable and critically ill. Students have the opportunity to develop insight into the field of pediatric anesthesiology and to create relationships for mentorship and career development.

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Campus Restrictions: Main Campus, Athens Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

ANES 5086 - Elective in Anesthesiology and Perioperative Medicine (1 Credit Hour)

Students will gain exposure to the field of anesthesiology through visits and shadowing in main operating room, preop holding, post anesthesia care unit, pediatric operating room, OB, critical care, and pain clinic, as well as have some hands on skills labs for intubation

and IV placement and two simulation sessions with a high fidelity sim mannequin.

Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Supervised Lab/Clinic

RANE 5000 - Anesthesiology (27 Credit Hours)

Lecture Hours: 4 **Contact Hours:** 50

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents **Major Restrictions:** Anesthesiology Residency

Schedule Type (Primary): Internship/Practicum

RANE 5001 - Anesthesiology Pain Management (27 Credit Hours)

Lecture Hours: 4 **Contact Hours:** 50

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents **Major Restrictions:** Anesthesiology Residency

Schedule Type (Primary): Internship/Practicum

ANTH 1102 - Introductory Anthropology (3 Credit Hours)

This is a general survey of the biological and cultural origins and development of human beings and their cultures. Based on archaeology, physical anthropology, cultural anthropology, and linguistics, this course emphasizes human adaptation through both biological and cultural evolution. Students will learn the four interrelated subfields of anthropology, have a broader perspective of how complex and diverse humans are over time, to question and understand the world through the lens of culture, and to recognize self as a global citizen.

Core IMPACTS Requirement(s) Satisfied: Social Sciences (Social Sciences)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ANTH 1105 - Introduction to Biological Anthropology (3 Credit Hours)

An examination of humans from a biological anthropology perspective. The course will introduce evolutionary theory, the origins and evolution of humanity and primates, primate behavior, and forensics. May be taken together with optional laboratory course ANTH 1105L.

Core IMPACTS Requirement(s) Satisfied: Technology, Mathematics, and Sciences (STEM)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

ANTH 1105L - Introduction to Biological Anthropology Laboratory (1 Credit Hour)

Laboratory course to accompany ANTH 1105. Students will develop safe lab practices, problem solving, and written communication skills.

Corequisite(s): ANTH 1105

Core IMPACTS Requirement(s) Satisfied: Technology, Mathematics, and Sciences (STEM)

Lab Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

Additional Course Fee: ANTH 1105 Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

ANTH 2011 - Cultural Anthropology (3 Credit Hours)

By investigating what is culture and how culture influences our lives, students will gain an appreciation and understanding of the differences and similarities in diverse societies including their own. Students will learn how to view other societies holistically, comparatively, and to see things from others' point of view. By gaining an appreciation of cultural differences, students in this class will also be more knowledgeable and better prepared for future multicultural experiences.

Core IMPACTS Requirement(s) Satisfied: Social Sciences (Social Sciences)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Directed Study (one-to-one), Asynchronous Instruction

ANTH 2011H - Honors: Cultural Anthropology (3 Credit Hours)

By investigating what is culture and how culture influences our lives, students will gain an appreciation and understanding of the differences and similarities in diverse societies including their own. Students will learn how to view other societies holistically, comparatively, and to see things from others' point of view. By gaining an appreciation of cultural differences, students in this class will also be more knowledgeable and better prepared for future multicultural experiences. This is an Honors Course.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Directed Study (one-to-one), Asynchronous Instruction

ANTH 2210 - Archaeology and Modern Society (3 Credit Hours)

How does archaeological knowledge about the past inform debates about social challenges that exist in the present? To explore this question, students will examine traditional subjects in world archaeology, including the origins of human culture and society, the rise and fall of civilizations, and the existence of social differences in the past. Within those subjects, topics covered may include war, political conflict, social stratification, migration, environmental change, resource management, and patterns of disease and illness, among others.

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ANTH 2950 - Selected Topics in Anthropology (1 to 3 Credit Hours)

This introductory course examines a special topic in Anthropology. Content of the course varies.

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Course Level Restrictions: US Undergraduate

Schedule Type (Primary): Lecture

Additional Course Fee: Seminar - Small Group, Independent Study, Directed Study (one-to-one), Asynchronous Instruction

ANTH 3001 - Methods in Cultural Anthropology (4 Credit Hours)

This course combines discussion of an overview of larger theoretical trends in cultural anthropology and provides an introduction to "doing" ethnography through the study and practice of fieldwork. In seminar-style discussions and workshop exercises, students

become familiar with qualitative research practices (like participant-observation and interviewing) and types of writing (like fieldnotes and ethnography); and develop their understanding of key ideas (like intersubjectivity, reflexivity, and interpretation).

Lecture Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Seminar **Schedule Type (Additional):** Small Group, Asynchronous Instruction

ANTH 3002 - Methods in Archaeology (4 Credit Hours)

An overview of how archaeologists use artifacts, human remains, and floral and faunal data to interpret lifeways in the past with a focus on scientific reading skills and presenting technical data in oral and written formats.

Lecture Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar Small Group, Asynchronous Instruction

ANTH 3003 - Research Design and Analysis in Anthropology (3 Credit Hours)

Students will be introduced to how anthropologists mix qualitative and quantitative research methods. Students will prepare for real-world fieldwork through hands-on activities, mini-projects, and critical reflection. Students will practice participant observation, in-depth interviews, oral histories, survey design, cultural consensus analysis, and Q methodology, while also learning essential data management techniques. Ethical research practices, including researcher positionality and responsibilities to communities, are foregrounded. Case studies from all four subfields of anthropology highlight the versatility of mixed methods. As part of the course, students will complete CITI training for human subjects research and develop their own mixed methods research proposal.

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

ANTH 3004 - Statistical Methods in Anthropology (3 Credit Hours)

In this course, students will explore how statistical methods are used to conduct quantitative analysis in anthropology. Students will gain skills in properly entering data and running exploratory analysis. Additionally, students will engage with more advanced quantitative analytical methods that are commonly employed in the social sciences. Statistical analysis will be conducted with the aid of a computer. Excel and SPSS will be used for quantitative analysis.

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

ANTH 3250 - CSI: The Science Behind the Crime Scene (3 Credit Hours)

Through a combination of lectures, case studies, laboratory exercises, and field-based simulations, students will explore criminalistics and how forensic science is applied at crime scenes and throughout laboratory procedures. Emphasis will be placed on the collection, preservation, and analysis of physical and biological evidence. Students will become familiar with multiple forensic subfields—including forensic anthropology, entomology, toxicology and odontology—and their roles in criminal investigations. Topics include crime scene processing, skeletal analysis, trauma interpretation, bloodstain pattern analysis, fingerprinting, trace evidence, and expert testimony. By the end of the term, students will be equipped with a working knowledge of forensic protocols, analytical techniques, and the scientific basis for evidence interpretation in criminalistics.

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Directed Study (one-to-one), Asynchronous Instruction

ANTH 3290 - Archaeology of the Americas (3 Credit Hours)

Examines the archaeology of the Americas from the arrival of the first peoples until European contact. Focuses on adaptations to a changing physical and social environment, including technological changes and the development of agriculture, the rise of large-scale societies and long-distance trade, and the emergence of social ranking systems. Examples are drawn primarily from North America, but may include Mesoamerican and South American case studies as well.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar Small Group, Asynchronous Instruction, Independent Study

ANTH 3330 - Forensic Anthropology Field School (3 Credit Hours)

This intensive, hands-on forensic anthropology field school provides students with training in the methods used to locate, document, recover, and analyze human skeletal remains in forensic contexts. Over five weeks, students will learn field recovery techniques, forensic mapping, proper excavation procedures, and evidence documentation through direct experience. Students will work in realistic field simulations, culminating in the excavation and analysis of staged burials. The course emphasizes professional ethics, data recording, and communication of findings in forensic contexts.

Other Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Internship/Practicum **Schedule Type (Additional):** Independent Study, Directed Study (one-to-one)

ANTH 3411 - Native Americans (3 Credit Hours)

This course examines the origins and cultures of native peoples of the U.S. and Canada as well as challenges that Native Americans have faced due to contact and continued interactions with Euro-Americans. Historical processes including population decline, culture change, and federal Indian policy will be considered along with modern cultural issues that affect the tribes today. Students will also be exposed to Native critiques of academic treatments of their cultures and histories.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

ANTH 3535 - Medical Anthropology (3 Credit Hours)

This course is designed to introduce students to two main aspects of the health care field, the structure considerations and the cultural considerations. Structural considerations include the way that health care is organized, funded and delivered throughout the cultural considerations. Structural considerations include the ways we create meaning of concepts of health and illness and the ways in which different cultures construct notions of what it means to be healthy and sick and how to maintain healthiness. This course may be taken more than once with permission if the culture of geographic focus is significantly different.

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ANTH 3550 - The Forensic Science of Sherlock Holmes: An Anthropological Approach (3 Credit Hours)

This course is inspired by The Forensics of Sherlock Holmes and explores the evolution of forensic science from the late 19th century to today. Through close reading of selected Sherlock Holmes stories and examination of historical forensic techniques referenced therein, students will investigate the development of crime scene investigation, trace evidence analysis, and death investigation. These topics will be grounded in forensic anthropology, emphasizing human biological evidence and cultural context.

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

ANTH 3817 - African Cultural Issues (3 Credit Hours)

This course seeks to introduce students to an understanding of Africa that reaches beyond the sound bites and stereotypes of the evening news as well as presents the diversity among African cultures. Students will explore both northern and sub-Saharan Africa. The course will consider the impact of colonialism on the formation of contemporary Africa's geographic political, economic, social and religious landscapes. Students will debate such topics as the relevance of circumcision, polygyny, sexual education, and religious syncretism.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

ANTH 3831 - Archaeology (3 Credit Hours)

A survey of world archaeology that examines the development of human culture from hominids through the emergence of complex societies. Also addresses contemporary social issues that can be approached through archaeological data.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction, Independent Study

ANTH 3841 - Biological Anthropology (3 Credit Hours)

This course will provide students with a background in human evolution from the biological and cultural standpoints by tracing behavior patterns we consider uniquely human back to non-human primates and our prehuman ancestors. The course will also consider how evolution still operates in modern human populations. Topics will include primatology, the human family tree, human variation and adaptation, and applied methods.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

ANTH 3851 - Religion, Culture, and Society (3 Credit Hours)

Examines the theories about the origins of religions and how religious belief shapes and is shaped by human behavior and thought. Explores basic concepts such as ritual, myth, and symbolism through consideration of a wide range of religious practices and beliefs. Case studies may address topics such as shamanism, cults, witchcraft, magic, healing, and the social power of religion.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction, Seminar Small Group, Independent Study

ANTH 3870 - Identity: Ethnicity, Gender, and Class (3 Credit Hours)

This course examines the processes through which identities are culturally constructed and experienced. The focus is on key ideas and theoretical debates surrounding race and ethnicity, gender and sexuality, and class through a cross-cultural perspective. These identities intersect with each other and with other identities such as religious, educational, parental, etc.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

ANTH 4021 - Violence and Warfare (3 Credit Hours)

This course examines the reasons for and patterns of violence and war in human and non-human primate societies along with anthropological approaches to human rights issues in our current globalized society.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ANTH 4200 - Anthropology and Popular Culture (3 Credit Hours)

Using various forms of media, examine how anthropological concepts are applied to analyzing modern social issues, how archaeology has been misused in the entertainment industry and in political arenas despite the ethical concerns of professional archaeologists, and how ethical heritage management impacts museums. Media examined include investigative journalism, tv, film, and museums and historical sites. Issues examined may include human rights, cultural misrepresentations and stereotypes, the illegal antiquities trade, international heritage rights, pseudoscience, and pseudohistory.

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: CP- Continuing Progress Courses, N- Normal (A, B, C, D, F), S- Satisfactory/Unsatisfactory

Schedule Type (Primary): Lecture

ANTH 4210 - Historical Archaeology (3 Credit Hours)

An overview of how written history and the archaeological record articulate to interpret material culture in the Americas since the arrival of Europeans. The roles historical archaeology plays in museums and historic preservation are also considered.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction, Seminar Small Group, Independent Study

ANTH 4217 - Travelers, Migrants and Refugees (3 Credit Hours)

The purpose of this course is to explore the movement of people and the impact of that movement on home and globalization. The course will discuss the meaning of home and the reasons why people travel. Each motivation affects people's perceptions of their destination and their attachments to home. These issues are global issues as well as localized (e.g., rural to urban). Students will discuss issues such as the impact of war, HIV/AIDS, political and religious policies, tourism, religious missions, fieldwork, etc. on people's movement. The course will consider how globalization and movement impacts identity and inter- and intra-group dynamics.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

ANTH 4230 - Archaeology of Death (3 Credit Hours)

Explore death and funerary customs in different cultures from prehistory to historic battlefields through examining the scientific importance of human skeletal remains and forensic anthropology.

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: CP- Continuing Progress Courses, N- Normal (A, B, C, D, F), S- Satisfactory/Unsatisfactory

Schedule Type (Primary): Lecture

ANTH 4300 - Human Origins (3 Credit Hours)

Explore the origins of humans through a biological lens with consideration of current trends in paleoanthropological research. Important fossil finds and sites are used to assess the evidence of human evolution, patterns of human evolution, and the phylogenetic relationships and behavior patterns of humans and our nearest relatives.

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: CP- Continuing Progress Courses, N- Normal (A, B, C, D, F), S- Satisfactory/Unsatisfactory

Schedule Type (Primary): Lecture

ANTH 4370 - Forensic Anthropology (3 Credit Hours)

Explores how to identify anatomical features of the human skeletal and how to apply these analyses in a medico-legal setting. Students learn how to interpret skeletal evidence and the context it was found in. The role of the forensic anthropologist as an expert witness is also examined.

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: CP- Continuing Progress Courses, N- Normal (A, B, C, D, F), S- Satisfactory/Unsatisfactory

Schedule Type (Primary): Lecture

ANTH 4440 - Plagues and Peoples: Biocultural Approaches to Historical and Emerging Epidemics (3 Credit Hours)

Students will explore the origins, spread, and impacts of epidemic diseases using a biocultural framework grounded in biological anthropology. We will investigate how major diseases—from bubonic plague to Ebola and HIV/AIDS—have affected human bodies, behaviors, and societies across time. Emphasis is placed on the historical, cultural, political, and ethical dimensions of public health responses, structural inequality, and human resilience. Students will critically analyze case studies and material culture, engage with ethical challenges in paleopathology, and reflect on human experiences of suffering, survival, and stigma.

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar Small Group, Directed Study (one-to-one), Asynchronous Instruction

ANTH 4541 - Food and Culture (3 Credit Hours)

Food provides a window onto the human experience: how we find the means to survive and meet our basic needs, how we form communities, how we give our lives meaning and express our identities. This course will consider what food, the ways we obtain and use it, and the meanings we give it tell us about being human and being in community.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ANTH 4730 - Human Osteology (3 Credit Hours)

Focuses on identifying the components of the human skeleton using proper nomenclature. Also explains bone biology and the various features and landmarks on human bones. Introduces analyzing osteometric and non-metric traits in the human skeleton that can be used in forensic identification.

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: CP- Continuing Progress Courses, N- Normal (A, B, C, D, F), S- Satisfactory/Unsatisfactory

Schedule Type (Primary): Lecture

ANTH 4950 - Selected Topics (1 to 3 Credit Hours)

A special topics course designed to examine theories, methods, and issues in the field of anthropology. The particular topic of the course may vary from semester to semester.

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Seminar Small Group, Independent Study, Directed Study (one-to-one), Asynchronous Instruction

ANTH 4960 - Internship (1 to 3 Credit Hours)

A service-learning experience based in an institution or agency, the internship requires the completion of a specific task and the acquisition of specific knowledge and skills under the supervision of the university and the cooperating institution or agency.

Prerequisite(s): ANTH 1102 >= C and ANTH 2011 >= C or ANTH 2011H >= C

Contact Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Internship/Practicum

ANTH 4990 - Undergraduate Research (1 to 3 Credit Hours)

A variable content, variable credit course offered by special arrangement and intended to meet the needs of anthropology minors. Students will carry out supervised independent research in a selected area of anthropology.

Prerequisite(s): ANTH 1102 >= C and ANTH 2011 >= C or ANTH 2011H >= C

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

ANTH 5411 - Native Americans (3 Credit Hours)

This course examines the origins and cultures of native peoples of the U.S. and Canada as well as the challenges that Native Americans have faced due to contact and continued interactions with Euro-Americans. Historical processes including population decline, culture change, and federal Indian policy will be considered along with modern cultural issues that affect the tribes today. Students will also be exposed to Native critiques of academic treatments of their cultures and histories.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

ANTH 5831 - Archaeology (3 Credit Hours)

This course will introduce students to the theories and methods used by modern archaeologists to investigate and understand the past. Prehistoric and historic examples will be used to illustrate how archaeologists use artifacts and other data to interpret the past. Students will be encouraged to think critically about the use of archaeological data and the interpretations of the past it produces.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

ANTH 5841 - Physical Anthropology (3 Credit Hours)

This course will provide students with a background in human evolution from the biological and cultural standpoints by tracing behavior patterns we consider uniquely human back to non-human primates and our prehuman ancestors. The course will also consider how evolution still operates in modern human populations. Topics will include primatology, the human family tree, human variation and adaptation, and applied methods.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Graduate-Semester **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

ANTH 5851 - Religion, Culture and Society (3 Credit Hours)

This course examines the theories about the origins of religions and how religious belief shapes and is shaped by human behavior and thought. The course will examine basic concepts such as ritual, myth, and symbolism through consideration of a wide range of religious practices and beliefs. Case studies may address topics such as shamanism, cults, witchcraft, magic, healing, and the social power of religion. Prerequisite(s): Permission of instructor.

Prerequisite(s): ANTH 1102 >=D or ANTH 2011 >=D or ANTH 2011H >=D

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

ANTH 5870 - Identity: Sex, Gender and Class (3 Credit Hours)

This course examines the processes through which identities are culturally constructed and experienced. The focus is on key ideas and theoretical debates surrounding race and ethnicity, gender and sexuality, and class through a cross-cultural perspective. These identities intersect with each other and with other identities such as religious, educational, parental, etc. Prerequisite(s): Permission of instructor.

Prerequisite(s): ANTH 1102 >=D or ANTH 2011 >=D or ANTH 2011H >=D

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum,

ANTH 6950 - Selected Topics (1 to 3 Credit Hours)

A variable content, variable credit course intended to meet the needs of students minoring in anthropology. Offered by special arrangement. Prerequisite(s): ANTH 1102 or ANTH 2011 or permission of instructor.

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

AIST 2110 - Principles of Scripting (3 Credit Hours)

An introductory programming course that teaches core principles using a contemporary scripting language. Students learn how to design, write, and test algorithms and basic computer programs.

Prerequisite(s): MATH 1111 >= C or MATH 1113 >= C or MATH 2011 >= C

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

AIST 2120 - Intermediate Scripting and Automation (3 Credit Hours)

An intermediate programming course focused on solving common Information Technology challenges interactively and automating them using a contemporary scripting language. Topics include: command line interfaces, applied data structures, structured and object-oriented script design, text processing, file management/input/output, and web service integration.

Prerequisite(s): AIST 2110 >= C or CSCI 1301 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

AIST 2220 - Introduction to Web Development (3 Credit Hours)

Students will be exposed to appropriate format and page layout, adding and manipulating visuals, images, and rich media, creating a navigation scheme and linking together multiple pages and sites, creating basic forms, building interactive features, and publishing/maintaining web sites. STEM GPA eligible course.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

AIST 2310 - Introduction to Computer Networking (3 Credit Hours)

Introduces networking technology to include networking standards, networking media, networking hardware, access methods, network operating systems, TCP/IP basics, network security and the fundamentals of local area network and wide area network technologies.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

AIST 2950 - Special Topics in Information Technology (3 Credit Hours)

A course or directed study in applied information systems and technologies. Content to be decided based upon instructor expertise and student interest. Prerequisite(s): Permission of instructor.

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

AIST 3120 - Applications Programming (3 Credit Hours)

An intermediate course in programming which focuses on developing code and structures for multi-tier applied information system solutions.

Prerequisite(s): AIST 3410 >= C or CSCI 1301 >= C or CSCI 2120 >= C or CSCI 3410 or MINF 3612 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

AIST 3310 - Advanced Networking (3 Credit Hours)

This course explores routing and switching protocols, and practical applications of enterprise network design. There is a lab component to the course.

Prerequisite(s): CYBR 2600 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Undergraduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

AIST 3320 - TCP/IP Protocol Analysis (3 Credit Hours)

Introduces network packet analysis and network traffic analysis techniques. Course provides in-depth coverage of the TCP/IP protocol suite. Popular diagnostic tools are used to monitor protocols in action and to understand how the network protocols work.

Prerequisite(s): CYBR 2600 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Cybersecurity, Computer Science, Cybersecurity Engineering, Cyber Operations, Information Technology

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

AIST 3360 - Cellular and Mobile Technology (3 Credit Hours)

This course explores mobile and cellular technologies. Students will gain a solid understanding of the key principles of wireless and mobile networks including security impact and mitigation techniques.

Prerequisite(s): CYBR 2600 >= C or CSCI 3520 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

AIST 3410 - Database Management Systems (3 Credit Hours)

Designing, developing, and maintaining database resources is treated, emphasizing application of established database development tools within a structured development method.

Prerequisite(s): AIST 2120 >= C and AIST 3610 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

AIST 3610 - System Analysis and Design (3 Credit Hours)

Introduces students to modern approaches for analyzing and designing information systems.

Prerequisite(s): MINF 2650 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Cybersecurity, Computer Science, Cybersecurity Engineering, Cyber Operations, Health Informatics, Information Technology

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

AIST 3620 - Principles of Human-Computer Interaction (3 Credit Hours)

This course will cover the fundamental concepts of human-computer interaction including user interface design principles, human capabilities, interface technology, interface design methods and interface evaluation.

Prerequisite(s): (AIST 2120 >= C and AIST 2220 >= C) or CSCI 3600 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

AIST 3720 - Operating System Concepts and Administration (3 Credit Hours)

An introduction to operating systems geared towards future administrators. Includes coverage of operating system roles, functions and services, hardware components, virtualization, and the installation, configuration, and administration of a secure operating system.

Prerequisite(s): AIST 2120 >= C and AIST 3610 >= C and CYBR 2600 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

AIST 4620 - Cloud Analytics (3 Credit Hours)

Students learn how to use cloud services to build an enterprise platform for data analytics and machine learning. Students develop skills with cloud services that are critical for conducting an analysis of big data problems. Through a series of tutorials, demonstrations and hands-on labs, students learn how to use cloud services and build a data pipeline to source data from other systems as well as streaming data, ingest, store, process, and visualize data. Additionally, students are able to select and apply machine learning services to resolve applied analytics problems.

Prerequisite(s): AIST 3410 >= C

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

AIST 4710 - Virtualization in the Enterprise (3 Credit Hours)

Virtualization tools and techniques commonly used in datacenters of small and large organizations. Technologies include, but are not limited to, server virtualization, hypervisors, data storage technologies, and data transfer technologies. Also addresses cost considerations, high availability design, systems monitoring, and security.

Prerequisite(s): AIST 3720 >= C

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

AIST 4720 - Enterprise System Architectures (3 Credit Hours)

A broader examination of operating systems as used in secure, large-scale enterprise environments. Includes coverage of virtualized/hosted/cloud-based systems and services, network storage, configuration & change management, distributed authentication, and other contemporary concepts.

Prerequisite(s): AIST 3720 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

AIST 4725 - Cyber Security in Healthcare Settings (3 Credit Hours)

This course conveys the foundational knowledge a healthcare information security and privacy practitioner (HCISPP) must understand. The course provides an in-depth look at the six domains of the HCISPP Common Body of Knowledge (CBK). Material covers the diversity of the healthcare industry, the types of technologies and information flows that require various levels of protection and the exchange of healthcare information within the industry, including relevant regulatory, compliance and legal requirements.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

AIST 4740 - Cloud Operations Engineering (3 Credit Hours)

The IT infrastructure to support the operation of a modern enterprise requires orchestrating an ever-changing set of software platforms, physical and virtualized hardware, and networks in a secure and reliable fashion. This course presents the tools and processes required to configure, test, deploy, validate, manage, and monitor a large-scale, software-defined infrastructure. Topics include: configuration management, code repositories, continuous integration/deployment solutions, container orchestration, monitoring and alerting as well as end-to-end cyber security concerns.

Prerequisite(s): AIST 4120 >= C and AIST 4710 >= C and AIST 4720 >= C

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

AIST 4820 - Information Technology Project (3 Credit Hours)

An individual or group project in software development. Emphasizes production of complete software solutions for a business or non-profit client. Can be taken a maximum of two times for credit.

Prerequisite(s): (AIST 3410 >= C or CSCI 3410 >= C) and (AIST 3610 >= C or CSCI 4711 >= C) and (AIST 2220 >= C or MINF 3618 >= C)

Lecture Hours: 3

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

AIST 4950 - Special Topics in Information Technology (3 Credit Hours)

A course or directed study in applied information systems and technologies. Content to be decided based upon instructor expertise and student interest.

Lecture Hours: 3

Repeatability: May be repeated for credit up to three times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

AIST 4960 - Undergraduate Internship (1 to 3 Credit Hours)

An applied professional learning experience in applied information systems and technologies emphasizing faculty oversight of a directed work experience.

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Independent Study **Schedule Type (Additional):** Directed Study (one-to-one), Asynchronous Instruction

AIST 5450 - Accelerated Introduction to Python (3 Credit Hours)

This course emphasizes analytical thinking and teaches problem solving through an introduction to basic programming structures. It covers design of well-structured algorithms using appropriate logic structures with simple data types and data structures.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

AIST 6330 - System and Network Administration (3 Credit Hours)

Methods and techniques for installing, configuring, providing enterprise infrastructure, and securing server systems and networks. Intended to provide technology managers with hands-on 'active learning' with key technologies, but with a focus on illuminating common vectors of technology compromise and methods for preventing, detecting, and correcting compromised systems.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Info Security Management, MBA **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

AIST 6353 - Human Factors in Information Security (3 Credit Hours)

This course investigates human factors in information security and how those factors impact security management. The human factor impacts many aspects of information security, such as password complexity, security policy formation and compliance, physical security, security education, training and awareness, and security culture. These aspects and others will be discussed from the security manager's perspective.

Cross-Leveled Course(s): AIST 8353

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Info Security Management, MBA **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Asynchronous Instruction

AIST 6355 - Information Security Policy Development (3 Credit Hours)

Overview of information security policies. Primary topics include why organizations need a well-documented information security framework, major elements of an information security policy framework, and how to successfully implement and enforce information security policies.

Prerequisite(s): AIST 6510 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Cybersecurity Management and Technology, MBA **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

AIST 6357 - Information Risk Management (3 Credit Hours)

Overview of information security risk management. Primary topics include information security risks, threats, vulnerabilities, information security risk assessments, and information security risk mitigation plans.

Prerequisite(s): AIST 6510 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Cybersecurity Management and Technology, MBA **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

AIST 6359 - Legal Issues in Information Security (3 Credit Hours)

Overview of information security legal issues. Primary topics include the legal system, laws that influence information security, and legal aspects of security and privacy in organizations.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

AIST 6361 - Principles of Incident Response and Disaster Recovery (3 Credit Hours)

Overview of information security incident response and disaster recovery. Primary topics include contingency strategies, incident response methods, disaster recovery methods, and crisis management.

Prerequisite(s): AIST 6510 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

AIST 6363 - Cloud Computing Security (3 Credit Hours)

This course focuses on building skills for understanding, assessing and solving cyber security threats within the environment of cloud computing. The course examines the methods and tools to approach cybersecurity issues and prepares for successful design and implementation of available countermeasures to help protect the operation of information systems within a cloud computing environment. This class also presents current trends and open problems related to cybersecurity within the environment of cloud computing.

Prerequisite(s): AIST 6510 >= C

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Student Class Restrictions:** Graduate-Semester **Program Restrictions:**

1MS-CYMT-MS Cybersecurity Management and Technology

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

AIST 6365 - Information Security Project Management (3 Credit Hours)

This course provides an integrated introduction to project management in the information security environment. Information security plays a critical role throughout the project management life cycle and is essential for achieving secure projects. Students will learn the fundamental aspects of modern project management, both managerial and technical, as well as becoming familiar with current software tools. Students will apply techniques learned to case studies and real-world applications.

Prerequisite(s): AIST 6510 >= C and AIST 6515 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1MS-ISM-MS Info Security Management

Schedule Type (Primary): Asynchronous Instruction

AIST 6367 - Information Security Project (3 to 6 Credit Hours)

In this course, students initiate and complete a real-life project that can be work, community, university, or experimental-based. Projects identify a real-life information security problem and work to solve that problem. Depending on the size of the project, students may work individually or within groups. Projects must be approved and guided by the instructor.

Prerequisite(s): AIST 6510 >= C and AIST 6515 >= C

Lecture Hours: 3 to 6

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Student Class Restrictions:** Graduate-Semester **Program Restrictions:**

1MS-ISM-MS Info Security Management

Schedule Type (Primary): Asynchronous Instruction

AIST 6369 - Information Security and the Global Cyber Threat Environment (3 Credit Hours)

This course introduces information security students to relevant geo-strategic topics meant to familiarize them with global cyber threat environment. The course begins with a discussion highlighting the role of WWII-era initiatives that eventually led to the development of the Internet while highlighting the role of culture and sociology in the development of technology. The course then moves to a discussion of the general vulnerabilities associated with the Internet resulting from interconnected nature of its design and introduces students to the concepts of determining "attribution" and using "deterrence" in cyberspace. Students will also be introduced to the history and organization of United States cyber offensive and defensive capabilities, as well as the U.S.'s four major adversaries in cyberspace (Russia, China, Iran, and North Korea). Finally, students will become familiar with the vulnerabilities inherent in the global supply chain, to include examples of how cyber technology has been used to attack the supply chain system.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Program Restrictions:** 1MS-CYMT-MS Cybersecurity Management and Technology

Schedule Type (Primary): Asynchronous Instruction

AIST 6410 - Data Management: Databases, Informatics, Data Science (3 Credit Hours)

Exposes students to concepts and techniques of managing databases (relational and 'no SQL'), informatics (processing data for storage and retrieval), and data science (processes and systems to extract knowledge or insights from data).

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Info Security Management, MBA **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

AIST 6510 - Information Systems Security I (3 Credit Hours)

Along with AIST 6515, this course provides a foundation in security of information systems as articulated by (ISC)2 in its Certified Information Systems Security Professional (CISSP) common body of knowledge. The two course sequence is also a preparation the internationally recognized CISSP certification exam.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Info Security Management, MBA **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

AIST 6515 - Information Systems Security II (3 Credit Hours)

Along with AIST 6510, this course provides a foundation in security of information systems as articulated by (ISC)2 in its Certified Information Systems Security Professional (CISSP) common body of knowledge. The two course sequence is also a preparation the internationally recognized CISSP certification exam.

Prerequisite(s): AIST 6510 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Info Security Management, MBA **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

AIST 6725 - Cyber Security in Healthcare Settings (3 Credit Hours)

This course focuses on building skills for understanding, assessing and solving cyber security threats within health care settings. The course examines the methods and tools to approach cyber security issues and prepares for successful design and implementation of available countermeasures to help protect the operation of the health care enterprises and to guard the confidentiality and privacy of patients' data. This class also presents current trends and open problems related to cyber security in health care settings. This class is offered online.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

AIST 6900 - Introduction to Information Security Research (3 Credit Hours)

In this course, students will be introduced to methods for conducting scientific research within information systems and security. Emphasis will be placed on research question formation, literature review, theory, hypothesis formation, data acquisition, and research methodology. Students will also be introduced to current streams of research in information systems and security. This course is intended for Ph.D. students with a research focus in information systems.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

AIST 6910 - Investigating Information Security (3 Credit Hours)

The student identifies current issues/problems in information security. Under faculty supervision, the student chooses a current issue and investigates how current research is addressing the issue. The student will write a paper describing the issue, detailing the research addressing the issue, and summarize the findings.

Prerequisite(s): AIST 6510 >= C and AIST 6900 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester **Program Restrictions:**

1MS-ISM-MS Info Security Management

Schedule Type (Primary): Asynchronous Instruction

AIST 6950 - Selected Topics in Information Security Management (3 Credit Hours)

This is the selected topics course for the Master of Science in Information Security Management program. Subject and course content will vary.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1MA-INSC-MA Intelligence & Sec. Studies

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

AIST 7100 - Data Analytics in Cybersecurity (3 Credit Hours)

Cyber threats are a major problem for organizations and being able to detect these threats is of primary importance. This course is an introduction to data analytics for cybersecurity. The course will introduce types of cyber-attacks, anomalies and their relationship to cyber threats, data analytics needed for cyber security data, methods for discovering anomalies, tools for data analytics malicious activities detection, and hands on exercises to uncover common and not-so-common challenges faced by cybersecurity researchers. Python will be utilized in this course.

Prerequisite(s): AIST6900 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1DPHIL-CSCS-Computer & Cyber Sciences
Schedule Type (Primary): Lecture

AIST 7110 - Qualitative Research Methods in Information Systems (3 Credit Hours)

This course gives students exposure to qualitative information systems research by reviewing high quality papers in the field. Students learn about structured and unstructured interviews, card sorting, Q-method, theory in qualitative research, mixed-methods, ethnographies, and case studies. Students also utilize machine learning for textual analysis.

Prerequisite(s): AIST 6900 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1DPHIL-CSCS-Computer & Cyber Sciences

Schedule Type (Primary): Lecture

AIST 7120 - Quantitative Research Methods in Information Systems (3 Credit Hours)

This course focuses on building skills for understanding and applying various quantitative statistical methods commonly used in the research literature in the information systems discipline. Students will be taught the types of quantitative data, data management, and appropriate method selection.

Prerequisite(s): AIST 6900 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1DPHIL-CSCS-Computer & Cyber Sciences

Schedule Type (Primary): Lecture

AIST 7130 - Advanced Quantitative Research Methods in Information Systems (3 Credit Hours)

This course focuses on building skills for understanding, and applying the various quantitative statistical methods commonly used in the research literature of the information systems discipline. This course extends the set of methods to include advanced structured path model methods.

Prerequisite(s): AIST 7120 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1DPHIL-CSCS-Computer & Cyber Sciences

Schedule Type (Primary): Lecture

AIST 7140 - Foundational Theories in Information Systems Research (3 Credit Hours)

Given that impactful information systems research often combines novelty with existing knowledge, this seminar is a combination of foundational IS theories and current research on contemporary IS phenomena. As such, this course covers foundational theories used in the information systems discipline. It then covers current topics in information systems from a theoretical approach.

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

AIST 7955 - Advanced Topics in Human-Centered Computing (3 Credit Hours)

Advanced topics in human-centered computing. Topics may include: qualitative and quantitative research methods in information systems, advanced quantitative research methods in information systems, foundational theories and contemporary phenomena in information systems, and extended reality systems.

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

AIST 8353 - Human Factors in Information Security (3 Credit Hours)

People have often been considered the weakest link in information security. No matter how well an organization uses technology to secure their systems, one click on a malware link or phone call from a scammer can cripple the organization. This course discusses human factors in information security and the psychological aspects of humans in relation to information security. Students learn how to create effective awareness, education, and training programs. The course also discusses the importance of creating a strong security culture and how to achieve security compliance with properly written security policies.

Prerequisite(s): AIST 6900 >= C

Cross-Leveled Course(s): AIST 6353

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1DPHIL-CSCS-Computer & Cyber Sciences

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

AIST 8500 - Topics in Behavioral Research (3 Credit Hours)

This course introduces PhD students to topics in behavior research. Topics are chosen by the professor and are typically guided by the professor's research expertise. Students investigate the topic through an extensive literature review, present their findings, and write a high-quality paper. Topics may vary from semester to semester as faculty vary, but each iteration will provide a similar experience based on the student learning objectives.

Lecture Hours: 3

Repeatability: May be repeated for credit up to five times.

Grade Mode: Normal, Audit

Program Restrictions: 1DPHIL-CSCS-Computer & Cyber Sciences

Schedule Type (Primary): Seminar **Schedule Type (Additional):** Small Group, Asynchronous Instruction

APHS 7001 - Educating for Public Health: Theory, Objectives, and Assessment (3 Credit Hours)

Educating for Public Health: Theory, Objectives, and Assessment is a 3-credit course designed to study foundational learning theories, learning objectives, and assessment methods that inform effective teaching and learning in public health education. The course examines how individuals acquire knowledge and skills through the lens of key learning theories, with a focus on their application in public health contexts. Emphasis is placed on the development of well-structured learning goals, objectives, competencies, and student learning outcomes, and how these elements guide instructional strategies, assessment design, and course development. Additionally, students will critically evaluate a variety of assessment tools and exam formats, including multiple-choice items, essay questions, checklists, rubrics, multi-source feedback, and classroom assessment techniques to determine their appropriateness and effectiveness in measuring learning outcomes in public health education settings.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: N-Normal (A,B,C,D,F)

Program Restrictions: DPHIL_AHSC - DPHIL-Applied Health Sciences

Schedule Type (Primary): Seminar - Small Group

APHS 7002 - Determining Learning Objectives and Competencies in Health Professions Education (1 Credit Hour)

This course provides an introduction to learning objectives and learner outcomes of teaching and learning. The focus of this course is on the exploration and development of learning objectives and learner outcomes, how they influence instructional methods, assessment, and design. By examining a variety of learning objectives and learner outcomes, students will identify a range of principles, perspectives, and tools that will be useful in developing appropriate instructional engagements and assessments.

Prerequisite(s): APHS 7001 >= B

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_AHSC - DPHIL-Applied Health Sciences

Schedule Type (Primary): Seminar - Small Group

APHS 7003 - Assessment Methods in Health Professions Education (1 Credit Hour)

This online course provides a critical examination of the variety of assessments available in health professions education. Topics include but are not limited to multiple choice questions, rating scales, checklists, simulations, observations, objective structured clinical exams, essay questions, peer assessments, self-assessments, reflection, and portfolios.

Prerequisite(s): APHS 7002 >= B

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_AHSC - DPHIL-Applied Health Sciences

Schedule Type (Primary): Seminar - Small Group

APHS 7120 - Interprofessional Education and Practice (2 Credit Hours)

This course will introduce the practice of interprofessional collaborative process (IP) based on the "Core Competencies for Interprofessional Collaborative Practice". These core competencies include: collaboration, communication, values and ethics in an IP setting. Outcomes include increasing knowledge, skills/behaviors and clarifying attitudes and beliefs.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_AHSC - DPHIL-Applied Health Sciences

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group

APHS 8012 - Scientific Communication and Commercialization (1 Credit Hour)

This course will develop important, concentration specific competencies: (1) communication and interpersonal skills, (2) understand and describe how science produces valuable results for public health and society in general, and (3) understand the basics of patenting and assessing the commercial potential of scientific discoveries.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_AHSC - DPHIL-Applied Health Sciences

Schedule Type (Primary): Lecture

APHS 8130 - Grant Writing (3 Credit Hours)

Introduces the methods of scientific, education, and community engagement grant writing. Explores the different sections of a grant proposal and the role of a grant reviewer. Students will be able to appreciate the importance of understanding how the missions of funding agencies determine the types of grant submissions, as well as how to write a grant based on reviewer grading criteria. The ultimate goal is to prepare the doctoral students to begin to think about what their research interests are and what types of projects they need to design to write a scientific or education grant for their doctoral training and future employment.

Prerequisite(s): APHS 8503 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_AHSC - DPHIL-Applied Health Sciences

Schedule Type (Primary): Lecture

APHS 8503 - Research Process (4 Credit Hours)

Introduces the research process to entry level PhD students. Includes exploring the essentials of research from philosophical foundations, to framing the problem and conducting a literature review. Finally, numerous study design types and analysis are covered to provide a foundation for the students future research experiences in the program.

Contact Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_AHSC - DPHIL-Applied Health Sciences
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group

APHS 9001 - Advanced Topics (2 to 5 Credit Hours)

This course is designed to provide students with in-depth knowledge related to their area of proposed research that falls outside the current graduate course offerings. May be repeated with change of topic and objectives.

Contact Hours: 2 to 5

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_AHSC - DPHIL-Applied Health Sciences

Schedule Type (Primary): Seminar - Small Group

APHS 9010 - Doctoral Seminar - Research in Public Health (1 Credit Hour)

This course is intended to teach students how to critically review research publications dealing with healthcare topics.

Contact Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: DPHIL_AHSC - DPHIL-Applied Health Sciences

Schedule Type (Primary): Seminar **Schedule Type (Additional):** Small Group, Asynchronous Instruction

APHS 9020 - Qualitative Research Methods (3 Credit Hours)

Focuses on advanced qualitative research theory, methodology, and practice, engaging public health and health outcomes questions and settings. Techniques include interviews, observation, focus groups, and document analysis data in formal and informal public health sites. The course builds on previous experiences students have gained using qualitative data collection and analysis, with the expectation that students gain a deeper understanding of the philosophical underpinnings and practical application of these skills.

Lecture Hours: 3 **Lab Hours:** 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Degree Restrictions: DPHIL

Schedule Type (Primary): Lecture

APHS 9030 - Methods in Health Outcomes Research (3 Credit Hours)

Explores how to plan and conduct rigorous health outcomes research studies at the clinic and population levels. Students learn how to formulate health outcomes research questions, design a study to investigate selected research questions, evaluate the validity and reliability of health outcomes measures, and identify appropriate statistical analyses.

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Degree Restrictions: DPHIL

Schedule Type (Primary): Lecture

APHS 9040 - Methods in Health Services Research (3 Credit Hours)

Students develop skills related to health services research, including: research logic, analytic strategies and approaches, scientific writing and scientific presentations. Students are required to propose and carry out a secondary data analysis project related to a health services research question, as well as prepare a journal-ready paper suitable for publication in a peer-reviewed health services research journal.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Degree Restrictions: DPHIL

Schedule Type (Primary): Lecture

APHS 9050 - Methods of Economic Evaluation of Health Projects, Programs, and Policies (3 Credit Hours)

This is an introductory course to economic evaluation that provides an applied framework for analysis and evaluation of health policies, programs, and interventions. The overall goal of the course is to provide students with conceptual foundations and practical skills and tools to succeed in various careers involving health policy and program analysis and evaluations. The course starts with an introduction to the concepts and principles of economic evaluation and then focuses on applications of various evaluation techniques to the real-world issues and problems (e.g., cost-effectiveness, cost-utility, cost-benefits, decision modeling). The course provides a significant exposure and practice to the methods and approaches of defining and measuring costs, benefits, and effectiveness of health policies and programs

Prerequisite(s): Permission of the instructor.

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Degree Restrictions: DPHIL

Schedule Type (Primary): Lecture

APHS 9210 - Investigation of a Problem (1 to 12 Credit Hours)

The student works with individual faculty members on a specific investigative research problem. This provides an introduction to analytical techniques and the scientific method in action. It forms the basis or continuation of learning regarding a topic central to the student's focus within the program.

Contact Hours: 1 to 12

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Degree Restrictions: DPHIL

Schedule Type (Primary): Supervised Lab/Clinic

APHS 9300 - Dissertation Research (1 to 9 Credit Hours)

Students work closely with their faculty thesis/dissertation advisor on an in-depth study of a research problem of interest to both student and advisor. This course culminates in the preparation of a PhD dissertation. Enrollment in this course requires successful pass of Dissertation Proposal (successful acceptance in to Candidacy).

Lab Hours: 1 to 9

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit, In Progress

Schedule Type (Primary): Dissertation

ARAB 1001 - Elementary Modern Standard Arabic I (4 Credit Hours)

This course covers the fundamentals of listening, speaking, reading, and writing Modern Standard Arabic in a proficiency-based classroom and introduces students to Arabic cultures. Designed for students who have never studied Written Arabic. Not open to native speakers. Heritage speakers and students who had Arabic in school should contact the Department of English and World Languages for an evaluation to determine which Arabic course best suits their current proficiency. Students must earn a C or better in order to take ARAB 1002.

Core IMPACTS Requirement(s) Satisfied: Arts, Humanities, and Ethics (Humanities)

Lecture Hours: 4

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ARAB 1002 - Elementary Modern Standard Arabic II (4 Credit Hours)

This course provides students with beginning level skills in speaking, listening, reading, and writing Modern Standard Arabic (MSA), building on the skills developed in ARAB 1001. The course will be taught using a communicative and student-centered approach. Not open to native speakers. Heritage speakers and students who had Arabic in high school should contact the Department of English and

World Languages for an evaluation to determine which Arabic course best suits their current proficiency. Students must receive a grade of C or better in order to continue with ARAB 2001.

Prerequisite(s): ARAB 1001 >= C

Core IMPACTS Requirement(s) Satisfied: Arts, Humanities, and Ethics (Humanities)

Lecture Hours: 4

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ARAB 2001 - Intermediate Modern Standard Arabic I (4 Credit Hours)

This course provides students with intermediate level skills in speaking, listening, reading, and writing Modern Standard Arabic (MSA), building on the skills developed in ARAB 1002. The course will be taught using a communicative and student-centered approach. Not open to native speakers. Heritage speakers and students who had Arabic in high school should contact the Department of English and World Languages for an evaluation to determine which Arabic course best suits their current proficiency. Students must receive a grade of C or better in order to continue with ARAB 2002.

Prerequisite(s): ARAB 1002 >= C

Core IMPACTS Requirement(s) Satisfied: Arts, Humanities, and Ethics (Humanities)

Lecture Hours: 4

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ARAB 2002 - Intermediate Modern Standard Arabic II (4 Credit Hours)

This course provides students with intermediate level skills in speaking, listening, reading, and writing Modern Standard Arabic (MSA), building on the skills developed in ARAB 2001. The course will be taught using a communicative and student-centered approach. Not open to native speakers. Heritage speakers and students who had Arabic in high school should contact the Department of English and World Languages for an evaluation to determine which Arabic course best suits their current proficiency. Students must receive a grade of C or better in order to continue Arabic at AU.

Prerequisite(s): ARAB 2001 >= C

Core IMPACTS Requirement(s) Satisfied: Arts, Humanities, and Ethics (Humanities)

Lecture Hours: 4

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ARAB 2150 - Arabic for Heritage Speakers (3 Credit Hours)

This is an intensive course that combines the curriculum of elementary Arabic (ARAB 1001 and ARAB 1002) and focuses on the productive skills (speaking and writing) in Modern Standard Arabic (Fusha). Designed for students who have acquired Arabic in informal contexts. Students are exposed intensively to grammar and vocabulary of a high register. This course is for heritage and native speakers of Arabic only. Students may not receive credit for ARAB 1001 or ARAB 1002 in addition to ARAB 2150.

Prerequisite(s): Permission of instructor

Lecture Hours: 3 **Lab Hours:** 3 **Contact Hours:** 6

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

ART 1000 - Ceramics I for Non-Art Majors and Non-Art Minors (3 Credit Hours)

Students are introduced to the fundamentals of working with clay as an art medium. Through the creation of personally expressive ceramic works, they learn the structural and tactile qualities making ceramics unique and rewarding. Introductory clay bodies, glazing, hand-building, and firing techniques will be explored.

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 1001 - Oil Painting for Non-Art Majors and Non-Art Minors (3 Credit Hours)

The act of painting can be as rewarding as the resulting self-expression. Students explore painting techniques and practices such as basic use of color and application of media, developing the facility to render painterly works of art. Life models may be used (nudes and occasionally costumed). This course will not substitute for the painting course designed for art majors and art minors.

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 1002 - Photography I for Non-Art Majors and Non-Art Minors (3 Credit Hours)

In our world, image-capturing seamlessly integrates into the fabric of society. Students are introduced to compositional concerns and photographic processes as ways to enhance personal expression. Students learn both digital and film-based processes as well as digital editing through industry standard software. A limited number of digital cameras are available for rent at no charge.

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Asynchronous Instruction

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 1003 - Watercolor for Non-Art Majors (3 Credit Hours)

The free flowing, expressive qualities of watercolor make it a favorite medium of many painters. Students explore watercolor techniques in the rendering of expressive works of art. Traditional and experimental techniques using opaque and transparent watercolor media help students appreciate the incredible range of this unique medium. Life model may be used.

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 1211 - Drawing I: An Introduction to Techniques and Methods of Expression (3 Credit Hours)

Learning to draw is essential for artistic self-expression. Students explore fundamental techniques of drawing through a variety of black and white media to enhance visual communication. Emphasis is placed on drawing from observation in the depiction of space and form. Through experimentation and preliminary work, students understand drawing as a tool for creativity and concept development.

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 1520 - Two-Dimensional Design (3 Credit Hours)

Visual language is based in the elements and principles of design. Utilizing these fundamental methods of communication, students learn the creative and technical skills for creating dynamic images on a two-dimensional surface. Experimenting with a range of media, students understand the creative processes related to image making. Additionally, fundamental relationships of color theory are introduced. Presentation and craft are stressed as a component of successful communication.

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 1530 - Three-Dimensional Design (3 Credit Hours)

Working in the three-dimensional realm expands one's ability to problem solve visually and express ideas. Students use a broad range of fabrication techniques and tools to construct works addressing the relationships of height, width and depth. Through active making and experimentation students transform materials into artistic constructs. Critique methods and vocabulary are stressed as tools to further the analysis and evaluation of art making.

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 2010 - The Marvel of Art (3 Credit Hours)

This course engages students through the exploration of a variety of traditional and new art media. Students respond to art through form and content and learn to interpret art through its relationship to world cultures. Students also recognize the values and human moral aspirations embodied in the marvels of art.

Core IMPACTS Requirement(s) Satisfied: Arts, Humanities, and Ethics (Humanities)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ART 2010H - Honors: The Marvel of Art (3 Credit Hours)

This course engages students through exploration of a variety of traditional and new art media. Students respond to art through form and content and learn to interpret art through its relationship to world cultures. Students also recognize the values and human moral aspirations embodied in the marvels of art. This is an honors course.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Undergraduate Semester

Schedule Type (Primary): Lecture

ART 2100 - Art Education, K-8; Teaching (2 Credit Hours)

Teaching methodology and projects for teaching art in the elementary school classroom.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic

Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 2212 - Drawing II (3 Credit Hours)

Expressive mark making is developed through technique and experimentation. Students engage a variety of subject matter including the human figure with a range of media as they develop higher-level creative, expressive, interpretive, and observational skills. Building on skills developed in Drawing One, students learn anatomy and color on their journey toward self-expression.

Prerequisite(s): (ART 1211 >= C) and (ART 1520 >= C or ART 1530 >= C)

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 2611 - Art History I: Art of the Ancient World (3 Credit Hours)

This survey course provides a global perspective on art and architecture from prehistory to the Gothic era, highlighting significant monuments, objects, and visual traditions. Students will consider how materials, techniques, and contexts shape the diverse appearance and function of art across civilizations. Emphasis is placed on understanding the cultures, religions, and philosophical frameworks that shaped the ancient world.

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ART 2612 - Art History II: Art of the Modern World (3 Credit Hours)

This course surveys art and architecture from the Renaissance to the mid-20th century, charting the rise of multiple artistic modernisms. Students will examine how scientific discovery, colonialism, industrialization, and patterns of cultural exchange transformed artistic production and circulation. Special attention is given to the transnational movement of people, objects, and ideas, shaping both continuity and change in the history of art.

Prerequisite(s): ART 2611 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ART 2700 - Color Experience and Theory (3 Credit Hours)

Color impacts the viewer on many levels in the expression of form and content. Students learn about color identity and relationships with an awareness of how they apply to composition and symbolism. Using additive and subtractive color processes, students express themselves through both printed and digital media.

Prerequisite(s): ART 1520 >= C or ART 1530 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 3000 - Humanities Studio Experience (3 Credit Hours)

The course is designed for the non-art major student desiring a studio experience. Media choice and class time must be arranged with the individual instructor. Prerequisite(s): Permission of the instructor.

Lecture Hours: 0 to 3 **Lab Hours:** 0 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 3005 - Digital Tools (3 Credit Hours)

This hands-on studio course introduces students to industry-standard software for visual communication. Students will learn core tools and workflows in Adobe Illustrator, Photoshop, and InDesign, applying them to creative projects that integrate technical skill with conceptual thinking.

Prerequisite(s): ART 1520

Lecture Hours: 2.5 **Lab Hours:** 2.5 **Other Hours:** 0 **Contact Hours:** 5

Grade Mode: Normal (A, B, C, D, F)

Department Restrictions: Department of Art and Design

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

ART 3212 - Drawing II (3 Credit Hours)

Expressive mark making is developed through technique and experimentation. Students engage a variety of subject matter including the human figure with a range of media as they develop higher-level creative, expressive, interpretive, and observational skills. Building on skills developed in Drawing One, students learn anatomy and color on their journey toward self-expression.

Prerequisite(s): (ART 1211 >= C) and (ART 1520 >= C or ART 1530 >= C)

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 3213 - Drawing III: Figure Drawing (3 Credit Hours)

Studying the figure is deeply imbedded in the history of art making. In this course students learn to accurately sight and measure while making careful anatomical observations from both nude and clothed models. Continuing to build on foundational skills, students create methodical drawings from sustained poses and gestural drawings from short poses. While accuracy in proportion and scale are the basis of this course, creative expression is further developed through experimental media application and mark making.

Prerequisite(s): ART 2212 >= C or ART 3212 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 3221 - Painting I for Art Majors and Art Minors (3 Credit Hours)

Painting is a contemporary medium steeped in technique and history. This course introduces many of the practices used by painters to create dynamic works of visual communication. With an emphasis on observation as a means to depict form, students use color and design to develop visually engaging aesthetic works. Through critiques and presentations, students learn painting's relevance to the

history of art and its status as a contemporary art medium. Life models may be used in addition to working from still life.

Prerequisite(s): ART 1211 >= C) and ART 1520 >= C and ART 1530 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 3222 - Painting II (3 Credit Hours)

Refining skills developed in Painting I, students learn a range of methods related to the manipulation of paint. Developing greater competency in using paint to render illusionistic space and content, students further understand the medium's capacity for expression. With greater compositional understanding, students become more independent, developing a personal aesthetic.

Prerequisite(s): ART 3221 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 3231 - Photography I for Art Majors and Art Minors (3 Credit Hours)

Photographic platforms increase the artists' ability to express themselves on a scale hard to imagine. Students learn to effectively communicate through photographic processes, using both digital and film formats. Students will also gain an introduction to Photoshop as a tool for artistic expression. This course offers a limited number of digital cameras are available for rent at no charge.

Prerequisite(s): ART 1211 >= C and ART 1520 >= C and ART 1530 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 3232 - Photography II (3 Credit Hours)

Students expand their photographic skills and process as a means of creative expression. Issues of subject, aesthetics, content and context are explored as students create a portfolio demonstrating an understanding of photography.

Prerequisite(s): ART 3231 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 3233 - Photography III (3 Credit Hours)

Translated from Greek, photography means "painting with light." This course explores various lighting techniques in the creation of dynamic photographic imagery. Students create portfolios demonstrating a personal aesthetic.

Prerequisite(s): ART 3232 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 3234 - Photography IV (3 Credit Hours)

To successfully communicate their skill and vision to others, photographers build portfolios. Students develop a cohesive series of photographic works with a high degree of craft and individual aesthetic. This course utilizes skills and processes developed in previous courses to assist students in presenting themselves as professionals in the field.

Prerequisite(s): ART 3233 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 3251 - Printmaking I (3 Credit Hours)

Printmaking continues to be a pertinent means for visual communication in the twenty-first century. Students learn the essentials of fundamental printmaking methods, such as serigraphy and relief. Methods are explored as fundamental printmaking practices.

Prerequisite(s): ART 1211 >= C and ART 1520 >= C and ART 1530 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 3261 - Water-Based Media Painting (3 Credit Hours)

Basic experience in transparent watercolor. Other water-based media such as gouache or egg tempera may be introduced. Life model may be used.

Prerequisite(s): ART 1211 >= C and ART 1520 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 3262 - Watercolor II (3 Credit Hours)

Continuation of Watercolor I. Life model may be used.

Prerequisite(s): ART 3261 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 3263 - Watercolor III (3 Credit Hours)

Advanced level instruction of Watercolor II. Life model may be used.

Prerequisite(s): ART 3262 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 3311 - Sculpture: Carving I (3 Credit Hours)

Students learn the subtractive method of carving material to create a series of sculptural forms. Using materials such as plaster, clay, and wood, students gain an understanding of a range of tools and their role in the creative process. The semester includes in-class demonstrations, time for independent work and regular group critiques designed to assist in the resolution of projects.

Prerequisite(s): ART 1211 >= C and ART 1520 >= C and ART 1530 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 3312 - Sculpture: Advanced Carving (3 Credit Hours)

Students learn additional techniques involved in wood carving and fabrication processes. The class also introduces students to conceptual development as creative expression. Through group and individual critiques, students articulate and analyze works of peers and professionals in the field. Students build on techniques learned in beginning carving as they further their understanding of carving and fabrication.

Prerequisite(s): ART 3311 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 3313 - Sculpture: Advanced Techniques in Carving (3 Credit Hours)

Students design and fabricate a series of carved projects with a more advanced understanding of the subtractive process. During this course, students develop a personal aesthetic as they improve their carving abilities. Students develop an understanding of how the creative process and revision relate to finished projects.

Prerequisite(s): ART 3312 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 3331 - Sculpture: Figure Modeling I (3 Credit Hours)

Applied studies in proportion and articulation of the figure, using life models, typically nudes. All work from the model is a required part of the course. Materials include oil-based and water-based clay.

Prerequisite(s): ART 1211 >= C and ART 1520 >= C and ART 1530 >= C and ART 3401 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 3332 - Sculpture: Figure Modeling II (3 Credit Hours)

Continuation of applied studies in proportion and articulation of the human figure using life models, typically nudes. All work from the model is a required part of the course. Materials include oil-based and water-based clay.

Prerequisite(s): ACCT 3331 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 3401 - Ceramics I for Art Majors and Art Minors (3 Credit Hours)

Ceramics is a contemporary medium which has been at the core of art making practice throughout history. Students learn the fundamentals of working with clay through a variety of methods. Through hand-building, wheel-throwing and sculptural methods, students use clay as means for artistic expression. Additionally, basic glazing and firing techniques are introduced. Students address design problems involving aesthetic value and procedure in the making of ceramic objects.

Prerequisite(s): ART 1211 >= C and ART 1520 >= C and ART 1530 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 3402 - Ceramics II (3 Credit Hours)

Students expand their individual artistic approach through more specified development of techniques and a greater emphasis on artistic vision. Emphasis is placed on material understanding, creativity and presentation. Students are more self-guided and begin developing a body of work. This course offers continued development of the skills and concepts introduced in ART 3401 with an introduction to glaze and clay formulation.

Prerequisite(s): ART 3401 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 3403 - Ceramics III (3 Credit Hours)

Students learn more about the discipline of ceramics and how loading and firing kilns affects the final product. Advanced techniques in building and glazing help students understand ceramics as a vehicle for creative expression. Students continue the building of their personal portfolios.

Prerequisite(s): ART 3402 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 3540 - Graphic Design I: Exploring Design Processes, Materials, and Methods (3 Credit Hours)

An introduction to the principles, processes, and tools of graphic design. Students explore visual communication through research, concept development, and application of design fundamentals. Projects emphasize typography, imagemaking, and layout as students learn to plan, analyze, and create solutions to communication challenges. Focus is placed on developing technical proficiency, critical thinking, and a foundation for professional design practice.

Prerequisite(s): ART 1520 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Department Restrictions: Department of Art and Design

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 3543 - Graphic Design II: Deconstructing Typography, Lettering, and Layout (3 Credit Hours)

This studio course emphasizes a professional approach to creative problem solving. Students develop a refined body of work that demonstrates cumulative mastery of design skills. Projects move from concept to execution with an emphasis on clarity, craftsmanship, and industry-level outcomes. Completed work will contribute to a professional portfolio.

Prerequisite(s): ART 3540 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Department Restrictions: Department of Art and Design

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Animation Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 3545 - Illustration - From Traditional to Digital Media (3 Credit Hours)

The design process uses an array of image generation techniques to engage and communicate with the viewer. This course explores the role of illustration methodologies related to contemporary graphic design. Students learn digital and analog techniques through problem based assignments forming conceptual rich spaces. Portfolios developed in this course will include cultural, societal, and environmental contexts.

Prerequisite(s): ART 3540 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Independent Study

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 3550 - Design Thinking: The Power of Creativity and Collaboration (3 Credit Hours)

Most aspects of contemporary life include creative competencies. Examples of these are idea development, abstract problem solving and working in groups. Design Thinking is about using creativity to find innovative solutions for human centered problems. Through project based assignments, students learn about the creative process and how it applies to all facets of life.

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

ART 3555 - Tactile Graphics: Printed Surface for Books and Limited Edition (3 Credit Hours)

As design is further embedded in daily printed and digital environments, tactile surfaces continue to gain importance because of the experience it creates for the viewer. A survey of techniques include paper engineering, sequential surfaces, movable type, relief, and digitally produced photopolymer plates. Each one of these processes has a unique interaction with various types of paper. Students in this course create limited edition prints exploring composition and media in the development of technical skills utilizing the wide range of tactile applications including book making. With these skills, students further develop their understanding of relationships between digital and printed artifacts.

Prerequisite(s): ART 1211 >= C and ART 1520 >= C and ART 1530 >= C

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 3565 - Motion Graphics: Moving Imagery and Type Motion (3 Credit Hours)

The contemporary domain of visual communication consists of a series of interactions between branded entities and users as they exist in an experience-oriented world. Motion and identity design considers characteristics of form, content, and context as they relate to an audience through a range of interactions. This class embraces design experience from different graphic spaces from motion and packaging to instillation based approaches.

Prerequisite(s): ART 3543 >= C or ART 3600 >= C

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 3575 - Intro to UX and UI Design (3 Credit Hours)

Websites and mobile applications are virtual environments connecting people across space and time. Graphic designers utilize elements including image, interaction, sound, and sequence to create dynamic spaces. This course is an introduction to the principles and elements of web and applications design, interactive spaces, and sequential graphics using type and image. Specific emphasis will be given to UX and UI Design as they are some of the most important design fields in the digital global market of today. Students will go beyond visual appearance to study subjects such as human behavior, human factors, color theory and psychology of visual perception to and accurate solutions to design problems. In addition, students explore relationships between typography, imagery and principles of interactive motion as they apply to web and mobile applications in visual communication.

Prerequisite(s): ART 3543 >= C

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Independent Study

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 3580 - Typography (3 Credit Hours)

A studio-based study of typography exploring type design fundamentals, history, and expressive potential. Students will examine letterform anatomy, typographic systems, and the role of type in visual communication. The course culminates in the creation of an original typeface and its application in design projects.

Prerequisite(s): ART 3540 >= C

Lecture Hours: 2.5 **Lab Hours:** 2.5 **Other Hours:** 0 **Contact Hours:** 5

Grade Mode: Normal (A, B, C, D, F)

Department Restrictions: Department of Art and Design

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

ART 3600 - Animation History and Fundamentals (3 Credit Hours)

Animation is a medium with a broad array of techniques, history, and terminology. From early 2D animation to modern day CGI and video games, students will explore a worldview of fundamental animation concepts, language, and context in today's media. Using examples of animated short films through history and all over the world, students will view and discuss their impact and value to today's media landscape. Additionally, students will explore and apply key animation techniques in 2D animation, 3D animation, and stop motion.

Prerequisite(s): ART 1211 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Animation Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 3605 - 2D Animation (3 Credit Hours)

2D animation is the art of bringing two-dimensional drawings to life through motion and performance. Students will learn and apply key 2D animation techniques in frame-by-frame and cut-out style techniques. Students will learn the principles of animation and analyze real-world movement as they engage in exercises that explore motion, timing, and performance.

Prerequisite(s): ART 1211 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Animation Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 3610 - Previsualization (3 Credit Hours)

Every great project starts with great ideas. Previsualization is the art of conceptualizing and planning a production. Students will explore and apply techniques for the pre-visualization process, including the creation of detailed concept art and storyboards for sequential storytelling. Students will also utilize sound, editing techniques, visuals, and timing to create a finished animatic that is ready for production.

Prerequisite(s): ART 1211 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Animation Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 3615 - 3D Modeling (3 Credit Hours)

3D modeling is the act of sculpting 3D hard surface and organic models for animation and visualization purposes. Students will apply techniques involving low-polygon game models and high-polygon detailed models. Emphasis will be placed on implementing clean topology and UVs while also sculpting appealing & accurate forms.

Prerequisite(s): ART 1211 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Animation Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 3620 - 3D Animation (3 Credit Hours)

3D animation is the art of using three-dimensional digital forms to simulate stylized and real-world motion and performance. Students will learn and apply key 3D animation techniques, including blocking out keyframes, animating a character rig, and splining a motion graph. Emphasis will be placed on the principles of animation and the analysis of real-world movement as they engage in exercises that explore motion, timing, and performance.

Prerequisite(s): ART 3605 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Animation Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 3625 - Technical Animation and Rigging (3 Credit Hours)

Technical animation is the art of using simulations and character rigs to create compelling and accurate motion. Students will create character rigging systems that include bones, skinning, and controls. Students will also explore simulation techniques, including particles, cloth, dynamics, and fur.

Prerequisite(s): ART 3615 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Animation Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 3700 - Color Experience and Theory (3 Credit Hours)

Color impacts the viewer on many levels in the expression of form and content. Students learn about color identity and relationships with an awareness of how they apply to composition and symbolism. Using additive and subtractive color processes, students express themselves through both printed and digital media.

Prerequisite(s): ART 1520 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 3721 - Aesthetics and the Philosophy of Art (3 Credit Hours)

This upper-division course explores philosophies of art through major debates in contemporary art theory. Students will examine how philosophical discourse illuminates the changing role of art and artists in society today. Key topics include ways of defining art, aesthetic judgment, distinguishing art from other forms of expression, and the impact of technological innovation on the work of art.

Prerequisite(s): ART 2612 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Department Restrictions: Department of Art and Design

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ART 3900 - Studio Printmaking Lab (0 Credit Hours)

Printmaking Studio Lab is designed to provide studio lab access for students who have taken the beginning printmaking course and need continued access to the lab to pursue upper-level research. Prerequisite(s): Permission must be granted by printmaking professor overseeing the studio lab to be used.

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 3901 - Studio Photography Lab (0 Credit Hours)

Photography Studio Lab is designed to provide studio lab access for students who have taken the beginning photography course and need continued access to the lab to pursue upper-level research. Prerequisite(s): Permission must be granted by photography professor overseeing the studio lab to be used.

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 3902 - Studio Ceramics Lab (0 Credit Hours)

Studio Ceramics Lab is designed to provide studio lab access for students who have taken the beginning ceramics course and need continued access to the lab to pursue upper-level research. Prerequisite(s): Permission must be granted by ceramics professor overseeing the studio lab to be used.

Repeatability: May be repeated for credit up to ten times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Major Restrictions: Art

Schedule Type (Primary): Supervised Lab/Clinic

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 4214 - Drawing IV (3 Credit Hours)

Continuation of the Drawing course sequence with emphasis on advanced problems. Life models, nudes and occasionally costumed, may be used and, if so, are a required part of the course.

Prerequisite(s): ART 3213 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 4223 - Painting III (3 Credit Hours)

In this course, students learn more advance methods related to painting. Students are encouraged to use their current skills and knowledge of painting as a stepping-stone for continued exploration. Historical and contemporary painters/issues are examined for reference. Engaging in regular discussion and critiques, students develop a higher level of awareness, skill, etc.

Prerequisite(s): ART 3222 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 4224 - Painting IV (3 Credit Hours)

Students gain greater independence and develop more complex imagery in their painting projects. Using a range of applications and compositional approaches, students develop a more personal sense of creative expression. Group and individual critiques continue as an integral part of student development. Emphasis is placed on contemporary art and criticism.

Prerequisite(s): ART 4223 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 4225 - Painting V (3 Credit Hours)

Students become more professionally directed as they complete their body of undergraduate work. Discussions emphasize exhibitions, graduate programs and documentation of work.

Prerequisite(s): ART 4224 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 4261 - Printmaking II (3 Credit Hours)

The range of visual possibilities for printmaking is vast, providing endless opportunities for artists. Students expand their knowledge of fundamental printmaking methods by learning additional techniques such as intaglio and planographic.

Prerequisite(s): ART 3251 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervi

Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 4262 - Printmaking III (3 Credit Hours)

With a general understanding of print media, students work towards building personalized portfolios. Attention is focused on developing a personal aesthetic and artistic vision through individualized exploration and discovery. Students continue to use matrices and various print methods to produce a body of work that develops a personal vision.

Prerequisite(s): ART 4261 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 4263 - Printmaking IV (3 Credit Hours)

Students work toward a senior exhibition or the equivalent through highly self-directed, proposal-based projects. Students continue to investigate print media and concepts by designing projects that purposefully explore and discover methods in producing work suitable for exhibition.

Prerequisite(s): ART 4262 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 4321 - Sculpture: Casting I (3 Credit Hours)

Students use both traditional and modern techniques to produce a series of cast metal sculptural forms. They are introduced to an array of hand/power tools related to the melting, pouring, and refining of bronze and aluminum for fine art casting. In addition, students also work with wax, clay, plaster and various chemical patinas as process materials in producing finished cast artworks.

Prerequisite(s): ART 1211 >= C or ART 1520 >= C or ART 1530 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervi

Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 4322 - Sculpture: Casting II (3 Credit Hours)

Students move beyond basic casting processes in creating forms that reflect a considered aesthetic/conceptual approach to using bronze and/or Aluminum as materials. Through greater involvement in metal pours, students develop an historical and technical awareness of the medium of casting.

Prerequisite(s): ART 4321 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervi

Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 4323 - Sculpture: Casting III (3 Credit Hours)

Advanced methods of metal casting/refining skills help students to create sophisticated sculptural works. Through larger-scale, self-directed projects, students explore a variety of approaches to casting such as combining materials and creating multiple copies of an original.

Prerequisite(s): ART 4322 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 4331 - Sculpture: Installation I (3 Credit Hours)

Installation art is the creation of temporary sculptural artworks that function as aesthetic environments. Students create such projects using the campus as their studio. This class explores the designing and making a series of site-specific projects. Through group critiques and visual research projects, students develop awareness of audience, environment, and scale. Students will use a wide range of sculptural construction materials and approaches.

Prerequisite(s): ART 1211 >= C and ART 1520 >= C and ART 1530 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 4332 - Sculpture: Installation II (3 Credit Hours)

Students deepen their understanding of audience, environment, and scale in the design and creation of temporary artworks on the University campus. Students experiment with multiple approaches to this genre through audience interaction, community-based projects, and social engagement to explore a range of audience responses. Students work with both actual projects and design proposals for other larger venues.

Prerequisite(s): ART 4331 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 4333 - Sculpture: Installation III (3 Credit Hours)

Students explore newer trends in sculptural installation while investigating possible application to other fields such as communications, marketing, business, politics, or design. Students engage with the aesthetic environment as part of society. Projects may include internships or working with outside organizations in the designing and creation of projects.

Prerequisite(s): ART 4332 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 4341 - Sculpture: Mixed Media I (3 Credit Hours)

Students work with a concept-based approach to sculpture emphasizing more than one sculptural medium and/or method within a single body of artwork. Through group critiques and material research students will identify and explore a range of materials and

techniques for sculptural expression.

Prerequisite(s): ART 1211 >= C and ART 1520 >= C and ART 1530 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 4342 - Sculpture: Mixed Media II (3 Credit Hours)

Students develop more sophisticated concept-based approaches to sculpture with an emphasis on using more than one sculptural medium and/or method within a single body of artwork. Through group critiques and material research, students identify and explore a range of materials and techniques for sculptural expression, finding and expanding a personal aesthetic and/or approach to combining materials.

Prerequisite(s): ART 4341 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 4343 - Sculpture: Mixed Media III (3 Credit Hours)

Students use advanced concept-based approaches to sculpture with an emphasis on using more than one sculptural medium and/or method within a single body of artwork. Through group critiques, material research, and self-directed selection of materials and approaches, students will create cohesive projects which reflect a multi-material aesthetic.

Prerequisite(s): ART 4342 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 4404 - Ceramics IV (3 Credit Hours)

Building on the previous levels of ceramics, students are responsible for developing a personal artistic relationship to clay as an art medium. This course emphasizes more advanced firing techniques and glaze development.

Prerequisite(s): ART 3403 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 4405 - Ceramics V (3 Credit Hours)

This course emphasizes an independent and personal approach to working with clay as defined and directed through individual creative endeavors and research. Students are responsible for developing personal artistic direction to clay as an art medium. This course emphasizes advanced firing techniques and glaze development.

Prerequisite(s): ART 4404 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 4406 - Ceramics VI (3 Credit Hours)

Students pursue the development of a cohesive body of ceramic works. This course continues in the learning of advanced firing techniques and glaze development. The previous level of Ceramics class or permission of instructor. This course includes preparation for senior show.

Prerequisite(s): ART 4405 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 4530 - Graphic Design III (3 Credit Hours)

This upper-level studio builds upon previous coursework to explore advanced concepts, methods, and applications in graphic design. Students undertake projects that emphasize research, conceptual development, and refined execution. Focus is placed on producing professional-quality work that demonstrates both technical mastery and a developed design perspective. Coursework prepares students for more specialized, self-directed projects in the senior year.

Prerequisite(s): ART 3543 >= C and ART 3565 >= C

Lecture Hours: 2.5 **Lab Hours:** 2.5 **Other Hours:** 0 **Contact Hours:** 5

Repeatability: May be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Department Restrictions: Department of Art and Design

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

ART 4545 - Graphic Design through History: from Caves to the Computer (3 Credit Hours)

From prehistory to the digital age, visual communication has transformed with technical advancement and the evolution of the human condition. Through project-based assignments, this course explores historical relationships between social and cultural events that have shaped society and in result the field of graphic design.

Prerequisite(s): ART 1520 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

ART 4555 - Design Factory (3 Credit Hours)

A senior-level studio course emulating a professional design environment in which students act as designers and the instructor serves as client or creative director. Projects may involve collaboration with a real client or stakeholder, providing opportunities to address authentic design needs. Students conceive and develop a substantial design project that synthesizes advanced skills, creative problem-solving, and strategic thinking. Emphasis is placed on research, concept development, and industry-level execution, integrating the full range of abilities acquired throughout the program.

Prerequisite(s): ART 4530 >=C

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Department Restrictions: Department of Art and Design

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 4600 - Production Animation I (3 Credit Hours)

Production Animation simulates a real-world team environment for animated storytelling. Students will collaborate to create a complete commercial or technical visualization and a complete narrative animation. Using intermediate techniques explored in previous classes, students will work together to produce cohesive projects for their portfolio.

Prerequisite(s): ART 3620 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Animation Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 4605 - Look Development (3 Credit Hours)

Look Development is the art of iterating on a design to create unique and compelling aesthetics. Students will analyze and apply techniques to create unique materials, lighting, and composited renderings. Students will simulate real and stylized aesthetics to create unique visual styles.

Prerequisite(s): ART 3615 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Animation Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 4610 - Animation Studio (3 Credit Hours)

The animation industry is full of specialized skillsets. From rigging to performance to 3D modeling to concept art, students pick their area of concentration and focus a body of work on this. Students pitch and execute a series of projects that push them further in their chosen specialty. By the end of the course, students will have several completed pieces with polished visuals and audio to add to their portfolio.

Prerequisite(s): ART 3620 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Animation Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 4615 - Production Animation II (3 Credit Hours)

Production Animation simulates a real-world team environment for animated storytelling. Students will collaborate to create a complete commercial or technical visualization and a complete narrative animation. Using intermediate techniques explored in previous classes, students will work together to produce cohesive projects for their portfolio.

Prerequisite(s): ART4600 >= C and ART4610 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture/Unsupervi Lab/Clinic

Additional Course Fee: Animation Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 4620 - Art Since WWII (3 Credit Hours)

This course surveys art from the post-1945 era to the present, beginning with Abstract Expressionism and continuing through the pluralism of global contemporary art. Students will study historical sources and interpretive methods for analyzing how art engages with the political, economic and cultural issues of its time. Case studies highlight the impact of events such as the Cold War, Civil Rights movement, and globalization on artistic expression.

Prerequisite(s): ART 2612 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Department Restrictions: Department of Art and Design

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ART 4630 - New Media (3 Credit Hours)

This course examines how artists have adopted emerging technologies—including film, photography, multimedia performance, the Internet, video games, A.I., and more—to reshape creative practice and expand the experience of art in the 21st century. The course embeds critical analysis of new media within diverse art-historical and theoretical frameworks.

Prerequisite(s): ART 2612 >= C

Lecture Hours: 2.5 **Contact Hours:** 2.5

Grade Mode: Normal (A, B, C, D, F)

Department Restrictions: Department of Art and Design

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ART 4640 - Raphael (3 Credit Hours)

For over three centuries, Raphael was the painter who commanded perhaps the greatest awe and admiration amongst artists, patrons, and connoisseurs. Students in this course learn why. Through in-depth study of Raphael's unparalleled pictorial inventions, students consider the enduring relevance of the art of a Renaissance painter who in his own day was venerated almost like a saint.

Prerequisite(s): ART 2612 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ART 4650 - Art of the Renaissance (3 Credit Hours)

This course presents a global survey of Renaissance artwork and architecture from the 14th through 17th centuries. Students will examine innovations in artistic techniques, the influence of early medical sciences, patronage systems, and cross-cultural exchange that shaped Renaissance creativity. Artists studied include Giotto, Leonardo da Vinci, Albrecht Dürer, Filippo Brunelleschi, Titian, Hans Holbein the Younger, Sofonisba Anguissola, Jan van Eyck, and more. The course emphasizes the period's enduring impact on global art history and visual culture.

Prerequisite(s): ART 2612 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Department Restrictions: Department of Art and Design

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ART 4950 - Selected Topics (1 to 3 Credit Hours)

Reserved for special study of techniques and media not normally covered in regular coursework. May be repeated with change of topics. **Prerequisite(s):** Permission of instructor.

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit up to three times.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction
Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 4960 - Undergraduate Internship (1 to 15 Credit Hours)

An internship is a service-learning experience based in an institution or agency emphasizing the completion of a specific task and the acquisition of specific skills under the supervision of the university and the cooperating institution or agency.

Lab Hours: 1 to 15

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

ART 4961 - Undergraduate Internship: Art Museum Studies I (3 Credit Hours)

This internship provides students a general understanding of the role of an art museum, the organization of staff, and the process of developing educational programming and interpretive materials, through a series of interviews, readings, essays, and hands-on experiences.

Prerequisite(s): ART 3950 >= C or ART 3960 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

ART 4962 - Undergraduate Internship: Art Museum Studies II (3 Credit Hours)

This internship provides students an understanding of a specific role or profession within an art museum setting through a series of interviews, readings, essays, and hands-on experiences. The internship requires students to apply lessons learned during their museum studies coursework in a real-world setting, explore vocational possibilities, and develop a thorough grasp of their chosen field while receiving on-the-job training.

Prerequisite(s): ART 3950 >= C and ART 3960 >= C and ART 4961 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

ART 4998 - Professional Practice (BA) (3 Credit Hours)

Students develop confidence, sophistication, and organizational skills as they complete undergraduate portfolios and work toward creative careers in the arts. In this capstone class, all assignments directly relate to success in art after graduation. Students produce an exit portfolio, public exhibition and artist's talk, and working documents needed to pursue professional opportunities and graduate programs in visual art.

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

ART 4999 - Professional Practice (BFA) (3 Credit Hours)

Students develop confidence, sophistication, and organizational skills as they complete undergraduate portfolios and work toward creative careers in the arts. In this capstone class, all assignments directly relate to success in art after graduation. Students produce an exit portfolio, public exhibition and artist's talk, and working documents needed to pursue professional opportunities and graduate programs in visual art.

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Art

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

ART 5100 - P-5 Methods for Teaching Art Education (3 Credit Hours)

Applying specific methodologies of teaching art to P-5 learners, specifically through age-appropriate research, planning, instruction techniques, and strategies; creative and contemporary art making; innovative concepts; and fair and authentic assessment.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 5150 - Secondary Methods for Teaching Art Education (3 Credit Hours)

Applying specific methodologies of teaching art to high school learners, specifically through age-appropriate research, planning, instruction techniques and strategies; creative and contemporary art making; innovative concepts; and fair and authentic assessment.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 5214 - Ideation and Expression through Drawing (3 Credit Hours)

Students engage in drawing's potential as a fine art medium. Advanced drawing-based portfolios are developed through ideation and analysis related to aesthetic and critical contexts. Students also perform reviews of the relevant literature in the field.

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 5225 - Methods and Content through Painting (3 Credit Hours)

Students create a portfolio of work examining the formal, conceptual, critical, and technical aspects of painting. With emphasis on critical and artistic growth, students understand the contemporary and historical relevance of painting. Through a variety of critique methods and analysis of relevant works of criticism, students imbue their personal artistic pursuit with content gained from the knowledge of the medium through time.

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 5234 - Contemporary Photographic Practices (3 Credit Hours)

Photography plays a role in almost every aspect of modern life. Students explore through technical, aesthetic, conceptual, and critical engagement, the medium of photography as a creative art form. Topics covered in this course will include mastery of using a camera, darkroom and digital printing, industry standard software, and the use of digital photography equipment. Students also evaluate historical and critical texts related to the photographic process.

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 5263 - Creative Practices in Printmaking (3 Credit Hours)

Students create works in print media expressing a historical, philosophical, and technical understanding of the medium. Students learn techniques in printmaking and develop strategies to implement or modify these techniques to create their own body of work. Through written reviews, students articulate an understanding of critical and aesthetic writings related to the evolution of print practices.

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 5343 - Contemporary Mixed Media (3 Credit Hours)

Students work in a variety of traditional and contemporary media and creative and technical processes in the production of a series of artworks. With an emphasis on the potential of contemporary mixed media, artworks address contextual issues such as site, spatial relationships, social settings, and the influence of visual/spatial art on social constructs. Through written reviews, students articulate an understanding of critical and aesthetic writings related to the evolution of sculptural practices.

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 5406 - Advanced Applications of Ceramics (3 Credit Hours)

Students develop a portfolio through the exploration of clay as an expressive art medium. Responsibility is placed on the individual to find meaningful content and an effective means to express that content within the ceramic arts. Emphasis is placed on the application of clay to design problems involving aesthetic value and procedure in the making of ceramic objects. Students review the relative contexts of both the theoretical and practical aspects of succeeding as a practicing artist.

Lecture Hours: 3 **Lab Hours:** 3 **Contact Hours:** 3

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ART 5542 - Visual Solutions in Graphic Design (3 Credit Hours)

The interpretation of visual communication challenges perception. Students develop visual solutions integrating formal and theoretical approaches to graphic design and fine art. Utilizing contemporary methodologies to deconstruct visual language and cultural systems, students challenge perception and create artifacts that transcend space and time.

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Studio Art Class Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

ASTR 1000 - Introduction to the Universe (4 Credit Hours)

A survey of the universe, examining the historical origins of astronomy; the motions and physical properties of the Sun, Moon, and planets; the formation, evolution, and death of stars; and the structure of galaxies and the expansion of the universe. Prerequisite(s): Recommended but not required: MATH 1001 or MATH 1111.

Core IMPACTS Requirement(s) Satisfied: Technology, Mathematics, and Sciences (STEM)

Lecture Hours: 3 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Asynchronous Instruction

Additional Course Fee: Physics/Biophysics Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

ASTR 1000H - Honors: Introduction to the Universe (4 Credit Hours)

A survey of the universe, examining the historical origins of astronomy; the motions and physical properties of the Sun, Moon, and planets; the formation, evolution, and death of stars; and the structure of galaxies and the expansion of the universe. Prerequisite(s): Recommended but not required: MATH 1001 or MATH 1111. This is an Honors Course.

Lecture Hours: 3 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Campus Restrictions: M- Main Campus

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic

Additional Course Fee: Physics/Biophysics Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

OAUO 0101 - AU Online Student Orientation (0 Credit Hours)

Helps students obtain the needed understandings of how Augusta University Online works, as well as the technical and non-technical skills necessary to be successful learners. Students learn how to navigate Augusta University Online courses, including how to perform necessary tasks within the Learning Management System related to communicating and completing various learning activities. Students become aware of their strengths and opportunities for improvement as online learners and how to avail themselves to academic and non-academic support services to increase their ability to succeed.

Repeatability: May not be repeated for credit.

Grade Mode: S- Satisfactory/Unsatisfactory

Schedule Type (Primary): Asynchronous Instruction

BCMB 5002 - Research in Biochemistry and Molecular Biology (4 to 8 Credit Hours)

Provides students with the opportunity to train in basic research with direct relevance to their clinical interests.

Repeatability: May be repeated for credit one time.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Internship/Practicum

BCMB 7450 - Medical Biochemistry (7 Credit Hours)

Covers the chemistry and reactions of the constituents of living matter, metabolism and control mechanisms at levels of biological organization from subcellular to organism. Emphasis on medical application.

Lecture Hours: 8

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture

BCMB 8201 - Current Topics and Techniques in Molecular Biology (3 Credit Hours)

Elective course for advanced graduate students (2nd year and up) across departments. Students will solve current problems in molecular biology using the various techniques.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture

BCMB 8300 - Thesis Research (1 to 12 Credit Hours)

This course requires permanent assignment to a specific lab with a faculty advisor and a defined research project. Students work under the mentorship of their faculty thesis advisor to define, develop, and carry out the basic study of a research problem of interest to both student and advisor. This course is designed to develop the experience, understanding, and skills to conduct and assess original, independent research in biomedical science. This course is typically taken more than one time and culminates in the final semester in the preparation and defense of a MS thesis.

Lab Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MS_MOLM-Molecular Medicine

Schedule Type (Primary): Thesis

BCMB 8310 - Advanced Topics in Microbiology and Infectious Disease I (2 Credit Hours)

This is a highly focused course designed to provide students with in-depth discussions of pathogenic bacteria and associated diseases. The emphasis of the course will be on the molecular mechanisms underlying the virulence of medically important bacterial pathogens. Class time will consist of student-led lectures and discussions, facilitated by Microbiology faculty. Students will present comprehensive backgrounds of the topics of discussion, followed by critical evaluation of scientific papers taken from recent primary literature. This course will provide students both with comprehensive knowledge of bacterial pathogenesis and increased experience with reading, presenting, and critically analyzing scientific literature.

Prerequisite(s): SGSS 8021 $\geq$ C and SGSS 8022 $\geq$ C

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

BCMB 8320 - Advanced Topics in Microbiology and Infectious Disease II (2 Credit Hours)

This is a highly focused course designed to provide students with in-depth discussions of pathogenic bacteria and associated diseases. The emphasis of the course will be on the molecular mechanisms underlying the virulence of medically important bacterial pathogens. Class time will consist of student-led lectures and discussions, facilitated by Microbiology faculty. Students will present comprehensive backgrounds of the topics of discussion, followed by critical evaluation of scientific papers taken from recent primary literature. This course will provide students both with comprehensive knowledge of bacterial pathogenesis and increased experience with reading, presenting, and critically analyzing scientific literature.

Prerequisite(s): SGSS 8021 $\geq$ C and SGSS 8022 $\geq$ C

Lecture Hours: 5

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

BCMB 8340 - Elements of Scientific Presentation (2 Credit Hours)

This course will provide graduate students in the Biochemistry and Molecular Biology program with the essential skills needed to give an effective oral presentation of academic material. Instructors will both discuss and demonstrate critical issues relevant to giving seminar or lecture. The course will provide students with multiple opportunities to practice their learned presentation skills to a large

audience. By peer-review of course presentations, students will be able to develop critical analysis skills as well as receive constructive feedback on their own work. On successful completion of this course, students will be experienced orators, and will be able to present their research or teaching material in a confident and effective manner. Prerequisite: Successful completion of the Biomedical Sciences core curriculum.

Lecture Hours: 1 Contact Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group

BCMB 9010 - Seminar in Biochemistry and Molecular Biology (1 Credit Hour)

Research presentations by the university's faculty, students and visiting research scientists.

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy

Schedule Type (Primary): Seminar - Small Group

BCMB 9210 - Investigation of a Problem (1 to 12 Credit Hours)

The student works with individual faculty members on a specific investigative research problem. This provides an introduction to analytical techniques and the scientific method in action.

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: The Graduate School **Major Restrictions:** Biochemistry and Cancer Biol, Biochemistry & Molecular Biol

Student Class Restrictions: Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Program Restrictions:** DPHIL_BCCB-Biochemistry & Cancer Bio, DPHIL_BCMB-Biochemistry & Molecular Bio

Schedule Type (Primary): Supervised Lab/Clinic

BCMB 9300 - Research (1 to 12 Credit Hours)

Prerequisites: Permanent assignment to a specific lab with a faculty advisor and a defined research project. Students work closely with their faculty thesis/dissertation advisor on an in-depth study of a research problem of interest to both student and advisor. This course culminates in the preparation of a PhD dissertation or MS thesis. Enrollment in this course requires official admission to candidacy.

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: The Graduate School **Major Restrictions:** Biochemistry and Cancer Biol, Biochemistry & Molecular Biol

Student Class Restrictions: Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Program Restrictions:** DPHIL_BCCB-Biochemistry & Cancer Bio, DPHIL_BCMB-Biochemistry & Molecular Bio

Schedule Type (Primary): Dissertation

BIOL 1101 - Fundamentals of Biology (3 Credit Hours)

Designed for the non-science/non-math major; topics covered include chemical foundations of biology, cell structure and function, cell division, genetics, animal organ systems and mechanisms of evolution. This course will not substitute for the BIOL 1107 course that is designed for science/math majors. BIOL 1101 and BIOL 1107 cannot both be used to satisfy the Technology, Mathematics, & Sciences section of the Core IMPACTS curriculum.

Corequisite(s): BIOL 1101L

Core IMPACTS Requirement(s) Satisfied: Technology, Mathematics, and Sciences (STEM)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

BIOL 1101L - Fundamentals of Biology Laboratory (1 Credit Hour)

Designed for the non-science/non-math major. Through a variety of exercises and experiments students will acquire and apply skills including scientific measurements, use of basic laboratory equipment, the scientific method, data analysis, and communication of results. BIOL 1101L and BIOL 1107L cannot both be used to satisfy the Technology, Mathematics, & Sciences section of the Core IMPACTS curriculum.

Corequisite(s): BIOL 1101

Core IMPACTS Requirement(s) Satisfied: Technology, Mathematics, and Sciences (STEM)

Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Undergraduate Semester

Schedule Type (Primary): Supervised Lab/Clinic

Additional Course Fee: Biology Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

BIOL 1102 - Environmental Biology (3 Credit Hours)

Designed for the non-science/non-math major; topics covered include organismal diversity and behavior, ecology, and environmental topics. This course will not substitute for the BIOL 1108 course that is designed for science/math majors. BIOL 1102 and BIOL 1108 cannot both be used to satisfy the Technology, Mathematics, & Sciences section of the Core IMPACTS curriculum.

Corequisite(s): BIOL 1102L

Core IMPACTS Requirement(s) Satisfied: Technology, Mathematics, and Sciences (STEM)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Supervised Lab/Clinic, Independent Study, Asynchronous Instruction

BIOL 1102L - Environmental Biology Laboratory (1 Credit Hour)

Designed for the non-science/non-math major. Through a variety of exercises and experiments students will acquire and apply skills including scientific measurements, observing demonstrations, communicating environmental topics, and joining other students on topic focused field trips.. BIOL 1102L and BIOL 1108L cannot both be used to satisfy the Technology, Mathematics, & Sciences section of the Core IMPACTS curriculum.

Corequisite(s): BIOL 1102

Core IMPACTS Requirement(s) Satisfied: Technology, Mathematics, and Sciences (STEM)

Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Undergraduate Semester

Schedule Type (Primary): Supervised Lab/Clinic

Additional Course Fee: Biology Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

BIOL 1107 - Principles of Biology I (3 Credit Hours)

A study of the unifying concepts of the biotic world including biochemistry, cell biology, energy and metabolism, genetics, and evolution. BIOL 1101 and BIOL 1107 cannot both be used to satisfy the Technology, Mathematics, & Sciences section of the Core IMPACTS curriculum. Normally offered each semester. STEM GPA Eligible Course.

Corequisite(s): BIOL 1107L

Core IMPACTS Requirement(s) Satisfied: Technology, Mathematics, and Sciences (STEM)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

BIOL 1107H - Honors: Principles of Biology I (3 Credit Hours)

A study of the unifying concepts of the biotic world including biochemistry, cell biology, energy and metabolism, physiological systems of both plants and animals, animal and plant diversity, animal and plant development, genetics, ecology and evolution, and animal behavior. This is an Honors Course. BIOL 1101 and BIOL 1107H cannot both be used to satisfy the Technology, Mathematics, & Sciences section of the Core IMPACTS curriculum. STEM GPA Eligible Course.

Corequisite(s): BIOL 1107L

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study

BIOL 1107L - Principles of Biology I Laboratory (1 Credit Hour)

Through a variety of exercises and experiments students will acquire and apply skills including scientific measurements, use of basic laboratory equipment, the scientific method, data analysis, and communication of results. STEM GPA Eligible Course. BIOL 1101L and BIOL 1107L cannot both be used to satisfy the Technology, Mathematics, & Sciences section of the Core IMPACTS curriculum.

Corequisite(s): BIOL 1107

Core IMPACTS Requirement(s) Satisfied: Technology, Mathematics, and Sciences (STEM)

Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Supervised Lab/Clinic

Additional Course Fee: Biology Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

BIOL 1108 - Principles of Biology II (3 Credit Hours)

A continuation of BIOL 1107 studying the unifying concepts of the biotic world including physiological systems of both plants and animals, animal and plant diversity, animal and plant development, ecology and evolution, and animal behavior. BIOL 1102 and BIOL 1108 cannot both be used to satisfy the Technology, Mathematics, & Sciences section of the Core IMPACTS curriculum. STEM GPA Eligible Course.

Prerequisite(s): (BIOL 1107 >= C or BIOL 1107H >= C) and BIOL 1107L >= C

Corequisite(s): BIOL 1108L

Core IMPACTS Requirement(s) Satisfied: Technology, Mathematics, and Sciences (STEM)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

BIOL 1108H - Honors: Principles of Biology II (3 Credit Hours)

A continuation of BIOL 1107. This is an Honors Course. BIOL 1102 and BIOL 1108H cannot both be used to satisfy the Technology, Mathematics, & Sciences section of the Core IMPACTS curriculum. STEM GPA Eligible Course.

Prerequisite(s): (BIOL 1107 >= C or BIOL 1107H >= C) and BIOL 1107L >= C

Corequisite(s): BIOL 1108L

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Independent Study

BIOL 1108L - Principles of Biology II Laboratory (1 Credit Hour)

Through a variety of exercises and activities students will examine biodiversity and how structure and function relate to the ecology of plants and animals. BIOL 1102L and BIOL 1108L cannot both be used to satisfy the Technology, Mathematics, & Sciences

section of the Core IMPACTS curriculum. STEM GPA Eligible Course.

Prerequisite(s): (BIOL 1107 >= C or BIOL 1107H >= C) and BIOL 1107L >= C

Corequisite(s): BIOL 1108

Core IMPACTS Requirement(s) Satisfied: Technology, Mathematics, and Sciences (STEM)

Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Supervised Lab/Clinic

Additional Course Fee: Biology Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

BIOL 2251 - Anatomy and Physiology I (3 Credit Hours)

This lecture course is the first course in a two-semester sequence designed to explore the biological and chemical processes underlying the structure and function of the human body at the cellular, tissue, organ, and whole-body level. Topics to be covered include, but are not limited to, biological chemistry; cellular structure and function; tissues; and the integumentary, skeletal, muscular, and nervous systems. This course is designed primarily for non-science majors, especially those pursuing majors in nursing and the allied health professions.

Prerequisite(s): (CHEM 1151 >= C) **OR** (CHEM 1211 >= C and CHEM 1211L >= C) **OR** (BIOL 1101 >= C and BIOL 1101L >= C) **OR** (BIOL 1107 >= C and BIOL 1107L >= C) **OR** (BIOL 1107H >= C and BIOL 1107L >= C)

Corequisite(s): BIOL 2251L

Lecture Hours: 3 **Lab Hours:** 0

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

Additional Course Fee: Biology Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

BIOL 2251L - Anatomy and Physiology I Lab (1 Credit Hour)

This laboratory course is the first course in a two-semester sequence designed to explore the biological and chemical processes underlying the structure and function of the human body at the cellular, tissue, organ, and whole-body level. Topics to be covered include, but are not limited to, biological chemistry; cellular structure and function; tissues; and the integumentary, skeletal, muscular, and nervous systems. This course includes laboratory exercises that supplement the material covered in the BIOL 2251 lecture course. This lab course is designed primarily for non-science majors, especially those pursuing majors in nursing and the allied health professions.

Prerequisite(s): ((CHEM 1151 >=C and CHEM 1151L>=C) or (CHEM 1211 >=C and CHEM 1211L >=C) or (BIOL 1101 >=C and BIOL 1101L >=C) or (BIOL 1107 >=C and BIOL 1107L >=C) or (BIOL 1107H >=C and BIOL 1107L >=C))

Corequisite(s): BIOL 2251

Lab Hours: 1 **Contact Hours:** 2

Repeatability: Not Repeatable

Grade Mode: Normal (A,B,C,D,F)

Course Level Restrictions: Undergraduate

Schedule Type (Primary): Supervised Lab/Clinic

Additional Course Fee: Biology Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

BIOL 2252 - Anatomy and Physiology II (3 Credit Hours)

This lecture course is the second course in a two-semester sequence designed to explore the biological and chemical processes underlying the structure and function of the human body at the cellular, tissue, organ, and whole-body level. Topics to be covered include, but are not limited to, the cardiovascular, endocrine, lymphatic and immune, respiratory, digestive, urinary, and reproductive systems. Metabolism and fluid, electrolyte, and acid-base balance will also be covered. This course is designed primarily for non-science majors, especially those pursuing majors in nursing and the allied health professions.

Prerequisite(s): BIOL 2251 >= C

Corequisite(s): BIOL 2252L

Lecture Hours: 3 **Lab Hours:** 0 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

Additional Course Fee: Biology Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

BIOL 2252L - Anatomy and Physiology II Lab (1 Credit Hour)

This laboratory course is the second course in a two-semester sequence designed to explore the biological and chemical processes underlying the structure and function of the human body at the cellular, tissue, organ, and whole-body level. Topics to be covered include, but are not limited to, the cardiovascular, endocrine, lymphatic and immune, respiratory, digestive, urinary, and reproductive systems. Metabolism and fluid, electrolyte, and acid-base balance will also be covered. This course includes laboratory exercises that supplement the material covered in the BIOL 2252 lectures. This lab course is designed primarily for non-science majors, especially those pursuing majors in nursing and the allied health professions.

Prerequisite(s): BIOL 2251 >=C and BIOL 2251L >=C

Corequisite(s): BIOL 2252

Lab Hours: 1 **Contact Hours:** 2

Repeatability: Not Repeatable

Grade Mode: Normal (A,B,C,D,F)

Course Level Restrictions: Undergraduate

Schedule Type (Primary): Supervised Lab/Clinic

Additional Course Fee: Biology Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

BIOL 2260 - Foundations of Microbiology (4 Credit Hours)

This integrated lecture and laboratory course provides an introduction to microbiology. This course introduces the student to the diversity and classification of medically significant microorganisms, their modes of pathogenesis and transmission, and the infectious diseases they cause. Topics to be covered include, but are not limited to, microbial cell biology and genetics; major classes of disease-causing microorganisms; host immune response; microbial control; aseptic technique; disinfection; and isolation, culture, staining, and identification of microorganisms. Select laboratory exercises will provide training in the basic laboratory techniques for culture and identification of microbes. This course is designed primarily for non-science majors, especially those pursuing majors in nursing and the allied health professions.

Prerequisite(s): (MATH 1001 >= C or MATH 1111 >= C or MATH 1113 >= C) **AND** [(BIOL 1108 >= C and BIOL 1108L >= C) or (BIOL 1108H >= C and BIOL 1108L >= C) or (BIOL 2252 >= C)]

Lecture Hours: 3 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Asynchronous Instruction

Additional Course Fee: Biology Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

BIOL 2950 - Special Topics in Biology (1 to 4 Credit Hours)

An examination of various biological topics with emphasis on relating biological principles to the understanding and solving of every day situations. Prerequisite(s): will vary depending upon the topics course offered. Permission of the instructor may also be required.

Prerequisite(s): BIOL 1102 >= C or BIOL 1108 >= C or BIOL 1108H >= C

Lecture Hours: 1 to 4

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

BIOL 2990 - Undergraduate Research (0 to 3 Credit Hours)

An introduction to research problems. May be taken for 0, 1, 2, or 3 hours. Normally offered each semester. Prerequisite(s): Permission of the instructor.

Lab Hours: 0 to 3

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

BIOL 3000 - General Botany (4 Credit Hours)

Introduction to plant function and development, evolution, diversity, ecology, and economic importance. Normally offered fall and spring.

Prerequisite(s): (BIOL 1108 >= C or BIOL 1108H >= C) and BIOL 1108L >= C

Lecture Hours: 3 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

Additional Course Fee: Biology Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

BIOL 3050 - Economic Botany (4 Credit Hours)

This course focuses on the economic impact of plants, algae, and fungi and their significant roles on Earth. Student will gain knowledge, particularly in ethnobotany and the medicinal properties of the many taxa of plants. Students will investigate the different aspects of plant biotechnology and have a greater appreciation for plants, which are an essential part of nutrition and environment for all living things.

Prerequisite(s): (BIOL 1108 >= C or BIOL 1108H >= C) and BIOL 1108L >= C

Lecture Hours: 3 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Undergraduate Semester

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Biology Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

BIOL 3100 - Zoology (4 Credit Hours)

An introduction to the morphology, physiology and life histories of representative animals with emphasis on taxonomy and systematics. STEM GPA Eligible Course

Prerequisite(s): (BIOL 1108 >= C or BIOL 1108H >= C) and BIOL 1108L >= C

Lecture Hours: 3 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-

one),Practice Teaching,Internship/Practicum,Thesis

Additional Course Fee: Biology Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

BIOL 3200 - Genetics (3 Credit Hours)

A detailed examination of molecular genetics, the flow and regulation of genetic information within cells, Mendelian and non-Mendelian inheritance patterns, and an introduction to genetic changes that occur in populations STEM GPA Eligible Course.

Prerequisite(s): (BIOL 1108 >= C or BIOL 1108H >= C) and BIOL 1108L >= C and CHEM 1212 >= C and CHEM 1212L >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study,Asynchronous Instruction

BIOL 3310 - Comparative Vertebrate Anatomy (4 Credit Hours)

A systematic survey of the morphology of vertebrates with emphasis on phylogenetic relationships among the major classes.

Prerequisite(s): BIOL 3100 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Practice Teaching

Additional Course Fee: Biology Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

BIOL 3320 - Comparative Vertebrate Physiology (4 Credit Hours)

A comprehensive study of vertebrate physiology, including adaptive mechanisms for specific environments.

Prerequisite(s): (BIOL 1108 >= C or BIOL 1108H >= C) and BIOL 1108L >= C and CHEM 1212 >= C and CHEM 1212L >= C

Lecture Hours: 3 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Practice Teaching

Additional Course Fee: Biology Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

BIOL 3350 - Histology (4 Credit Hours)

A detailed study of tissue types and their organization in the vertebrate body. Laboratory emphasis is given to morphological detail using prepared slide material.

Prerequisite(s): (BIOL 1108 >= C or BIOL 1108H >= C) and BIOL 1108L >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Practice Teaching

Additional Course Fee: Biology Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

BIOL 3370 - Neurobiology (3 Credit Hours)

An examination of the vertebrate nervous system, including its anatomy and physiology, the organization underlying higher brain functions, neuronal function, synaptic transmission, and neuropathology.

Prerequisite(s): BIOL 1108 >= C or BIOL 1108H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

BIOL 3380 - Animal Behavior (4 Credit Hours)

Ethology is the study of how behaviors of animals in their natural environments are influenced by natural selection, learning, and the transmission of learning. This course encompasses psychology and other disciplines in the biological sciences including evolution, ecology, molecular biology, genetics, development, neurobiology, and endocrinology.

Prerequisite(s): CHEM 1212 >= C and CHEM 1212L >= C and (BIOL 3000 >= C or BIOL 3100 >= C)

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Undergraduate Semester

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Biology Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

BIOL 3400 - Cell Biology (3 Credit Hours)

This course will be an overview of the basic structure and function of eukaryotic cells including biological molecules, enzymes, metabolism, membrane structure and function, intracellular communication, central dogma of molecular biology, and membrane trafficking.

Prerequisite(s): [(BIOL 1108 >= C and BIOL 1108L >= C) or (BIOL 1108H >= C and BIOL 1108L >= C) or (BIOL 1108 >= K and BIOL 1108L >= K)] and (CHEM 1212 >= C and CHEM 1212L >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

BIOL 3500 - Microbiology (4 Credit Hours)

An introduction to microbiology, including viruses, protozoans, fungi, prokaryotic anatomy and genetics, metabolism, growth, nutrition, immunology, biotechnology and genetic engineering, physical/chemical control and chemotherapy. Normally offered every 2-3 years. STEM GPA Eligible Course

Prerequisite(s): (BIOL 1108 >= C or BIOL 1108H >= C) and BIOL 1108L >= C and (MATH 1111 >= C or MATH 1113 >= C)

Lecture Hours: 3 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Internship/Practicum, Thesis, Dissertation

Additional Course Fee: Biology Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

BIOL 3700 - Molecular Biology Laboratory (3 Credit Hours)

This course will explore the fundamental principles and basic techniques of molecular biology. The lecture portion of this course will examine the background, theory, and application of each technique, and students will develop specific questions and formulate hypothesis. In the laboratory portion, students will conduct experiments using the appropriate laboratory equipment, reagents, and techniques. Finally, students will learn to analyze, interpret, and present their data.

Prerequisite(s): BIOL 3200 >= C or BIOL 3400 >= C

Lecture Hours: 1.25 **Lab Hours:** 3.5

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Biology Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

BIOL 3810 - Ecotoxicology (4 Credit Hours)

This course is an introduction to the field of ecotoxicology, or the study of harmful effects of chemicals on ecosystems. The course will explore chemical movement in the environment, uptake and accumulation in organisms, as well as effects on individuals, populations and ecosystems.

Prerequisite(s): (BIOL 1108 >= C or BIOL 1108H >= C) and BIOL 1108L >= C and CHEM 1212 >= C and CHEM 1212L >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Undergraduate Semester

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Biology Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

BIOL 3820 - Marine Pollution (4 Credit Hours)

This course introduces the student to the effects of pollutants on biota, mostly aquatic, but also the effects of biota on pollutants. By the end of the course, students should understand the principles of toxicology and ecotoxicology, eutrophication and climate change, appreciate the role of lab-based bioassays, field studies, and epidemiology, have a general understanding of risk assessment, and be able to read, understand, and evaluate primary literature in the field.

Prerequisite(s): (BIOL 1108 >= C or BIOL 1108H >= C) and BIOL 1108L >= C and CHEM 1212 >= C and CHEM 1212L >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Undergraduate Semester

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Biology Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

BIOL 4000 - Plant Physiology (4 Credit Hours)

A detailed study of plant development and environmental responses at the cellular and biochemical level. Successful completion of BIOL 3000 is recommended.

Prerequisite(s): (BIOL 1108 >= C or BIOL 1108H >= C) and BIOL 1108L >= C

Lecture Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

Additional Course Fee: Biology Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

BIOL 4100 - Principles of Ecology (4 Credit Hours)

This course is a study of the interactions among organisms and their environment. Topics covered include physiology, nutrient cycling, energy flow, trophic dynamics, populations, and community structure.

Prerequisite(s): CHEM 1212 >= C and CHEM 1212L >= C and (BIOL 3000 >= C or BIOL 3100 >= C or BIOL 3200 >= C or BIOL 3400 >= C)

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Biology Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

BIOL 4110 - Urban Ecology (4 Credit Hours)

Urban Ecology provides an examination of the ways in which humans and other animals interact in shared and contiguous environments. Topics covered in this course include species diversity and urbanization, physical aspects of the urban climate, and integration of nature values in urban planning and design.

Prerequisite(s): CHEM 1212 >= C and CHEM 1212L >= C and BIOL 3000 >= C or BIOL 3100 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Undergraduate Semester

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Biology Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

BIOL 4120 - Community Field Ecology (4 Credit Hours)

The study of the ecological world from the community perspective. The student will gain an understanding of the patterns and processes that shape a biological community along with large-scale community phenomena and the factors that influence interactions among species.

Prerequisite(s): BIOL 3000 >= C or BIOL 3100 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Biology Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

BIOL 4150 - Evolutionary Biology (4 Credit Hours)

This course is a study of the factors effecting change in the genetic composition of organisms.

Prerequisite(s): (BIOL 1108 >= C or BIOL 1108H >= C) and BIOL 1108L >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Biology Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

BIOL 4420 - Herpetology (4 Credit Hours)

An examination of amphibians and reptiles with emphasis on their structural and functional characteristics, geographical distribution, relation to the environment, behavior, speciation, and man's interaction with them.

Prerequisite(s): BIOL 3100 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Biology Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

BIOL 4430 - Ornithology (4 Credit Hours)

A study of taxonomy, ecology, morphology, physiology, behavior and field identification of birds.

Prerequisite(s): BIOL 3100 >= C

Lecture Hours: 3 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Biology Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

BIOL 4500 - Ichthyology (4 Credit Hours)

A treatment of the organ systems, life histories and taxonomic aspects of fishes of southeastern U.S.

Prerequisite(s): BIOL 3100 >= C

Lecture Hours: 2 **Lab Hours:** 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Biology Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

BIOL 4520 - Marine Biology (4 Credit Hours)

A study of marine organisms and their habitats in the Atlantic Ocean and the Gulf of Mexico. Ecosystem components are emphasized.

Prerequisite(s): BIOL 3100 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Biology Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

BIOL 4540 - Marine Ecology (4 Credit Hours)

The study of the ecological world from the marine perspective. The student will gain an understanding of the patterns and processes that shape marine communities and ecosystems along with the factors that influence interactions among species in the marine environment.

Prerequisite(s): BIOL 3000 >= C or BIOL 3100 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Biology Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

BIOL 4630 - Reproductive Physiology (4 Credit Hours)

An investigation of the physiological processes involved with the mammalian and non-mammalian reproductive systems. Topics addressed include embryological development and function of the reproductive system, conception and parturition.

Prerequisite(s): (BIOL 1108 >= C or BIOL 1108H >= C) and BIOL 1108L >= C and CHEM 1212 >= C and CHEM 1212L >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Biology Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

BIOL 4650 - Endocrinology (4 Credit Hours)

A systematic survey of the mammalian and non-mammalian endocrine systems including properties of hormones, methods of study, and regulation of physiological functions. For Biology majors, this course must be passed with a C or better.

Prerequisite(s): (BIOL 1108 >= C or BIOL 1108H >= C) and BIOL 1108L >= C and CHEM 1212 >= C and CHEM 1212L >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Biology Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

BIOL 4680 - Pathophysiology (3 Credit Hours)

Pathophysiology's focus is on pathological conditions encountered in clinical practice across the life span of patients. Emphasis is placed on the regulatory and compensatory mechanisms, signs and symptoms, appropriate diagnostic studies, as well as global concept of treatment as they relate to commonly occurring diseases.

Prerequisite(s): (BIOL 1108 >= C or BIOL 1108H >= C) and BIOL 1108L >= C and CHEM 1212 >= C and CHEM 1212L >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Undergraduate Semester **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture

BIOL 4700 - Advanced Cell Biology (3 Credit Hours)

This course pursues a detailed study of membrane trafficking, the cytoskeleton, intracellular communication, gene expression and cellular differentiation, the cell cycle, and apoptosis. How these processes are regulated at the molecular level is emphasized.

Prerequisite(s): BIOL 3400 >= C

Cross-Leveled Course(s): BIOL 6700

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

BIOL 4720 - Principles of Pharmacology (3 Credit Hours)

This course will examine the basic principles of drug action including receptor theory, pharmacodynamics, and pharmacokinetics. The basic physiology and pathophysiology of several organ systems will be examined, and the mechanisms of action of the most commonly used drugs to treat these conditions will be studied.

Prerequisite(s): BIOL 3400 >= C

Cross-Leveled Course(s): BIOL 6720

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

BIOL 4730 - Immunology (3 Credit Hours)

Immunology is designed to provide students with a fundamental understanding of human immune responses. Topics covered include the cells and tissues of the innate and acquired immune systems, recognition of antigen by B & T lymphocytes, development of mature lymphocyte receptors & antibody repertoires, lymphocyte activation and specificity, cell-mediated and humoral immune responses and the immune system in health and disease.

Prerequisite(s): BIOL 3200 >= C or BIOL 3400 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Undergraduate Semester

Schedule Type (Primary): Lecture

BIOL 4740 - Molecular Pathogenesis (4 Credit Hours)

This course will be an examination at the molecular level of how bacteria cause disease. Topics include the immune system, sensing and responding to the environment, regulation and function of virulence factors, and antibiotics. Completion of BIOL 3500 is strongly recommended.

Prerequisite(s): BIOL 3200 >= C or BIOL 3400 >= C

Lecture Hours: 3 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

Additional Course Fee: Biology Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

BIOL 4750 - Developmental Biology (4 Credit Hours)

This course will focus on the cellular and molecular mechanisms underlying animal development. Additionally, the course will provide students with basic experimental methods and laboratory models used in developmental biology research.

Prerequisite(s): BIOL 3200 >= C or BIOL 3400 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

Additional Course Fee: Biology Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

BIOL 4780 - Molecular Carcinogenesis (3 Credit Hours)

This course will explore the cellular and molecular mechanisms of cancer development by examining the mechanisms of growth regulation of normal vs. neoplastic cells. It will include an examination of the mechanisms that are responsible for maintaining DNA fidelity, signal transduction in cell cycle regulation and apoptosis. Students enrolled for graduate credit will be required to review scientific literature and case studies related to the course topics.

Prerequisite(s): BIOL 3200 >= C or BIOL 3400 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic

BIOL 4950 - Selected Topics (1 to 10 Credit Hours)

Designed to treat areas of biology not in the normal curriculum. These courses may include Animal Behavior, Economic Botany, Introduction to Toxicology, Introductory Araneology, Neurobiology, Phycology, Plant Physiology, Principles of Human Physiology, Techniques in Biology and Wildlife and Fisheries Techniques.

Prerequisite(s): (BIOL1108 >= C or BIOL1108 >= K or BIOL1108H >= C) and BIOL1108L >= C

Lecture Hours: 1 to 10

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Biology Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

BIOL 4990 - Undergraduate Research (1 to 10 Credit Hours)

An introduction to research problems. Only a single instance of the course taken for 3 or 4 hours may be counted as an elective course in the major. Additional instances of the course taken for 1, 2, 3, or 4 hours may count as upper division electives. Normally offered each semester.

Prerequisite(s): (BIOL1108 >= C or BIOL1108 >= K or BIOL1108H >= C) and BIOL1108L >= C

Lab Hours: 1 to 10

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Biology Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

BIOL 6170 - Techniques in Biomolecular Science (3 Credit Hours)

This course will introduce the main features and principles of operation of a variety of analysis techniques, but focus on the application of the technique and interpretation of data.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Master of Science

Schedule Type (Primary): Lecture

BIOL 6620 - Principles of Medicinal Chemistry (3 Credit Hours)

A study of the chemical interactions of the major drug classes, including those derived from natural products, with the drug targets. Drug uptake, distribution, metabolism and toxicity for the major drug classes is also studied. Students enrolled for graduate credit will be required to review scientific literature and case studies related to the course topics.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture

BIOL 6623 - Principles of Medicinal Chemistry Advanced Topics (1 Credit Hour)

This course is intended for graduate students who completed an appropriate advanced medicinal chemistry course as an undergraduate student. This course reviews chemical interactions of major drug classes, including bioavailability, pharmacodynamics, and pharmacokinetics. An emphasis of the course is the use of the chemical literature to understand drug classes and the relationship of drugs and drug classes to chemical structure.

Prerequisite(s): BIOL 6620 or CHEM 4620

Cross-Listed Course(s): CHEM 6623

Lecture Hours: 1 **Contact Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

BIOL 6680 - Pathophysiology (3 Credit Hours)

Pathophysiology's focus is on pathological conditions encountered in clinical practice across the life span of patients. Emphasis is placed on the regulatory and compensatory mechanisms, signs and symptoms, appropriate diagnostic studies, as well as global concept of treatment as they relate to commonly occurring diseases. Students enrolled for graduate credit will be required to review scientific literature and case studies related to the course topics.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Master of Science

Schedule Type (Primary): Lecture

BIOL 6683 - Pathophysiology - Advanced Topics (1 Credit Hour)

This course is intended for graduate students who have completed an appropriate pathophysiology course as an undergraduate. This course reviews scientific literature and case studies in pathophysiology.

Prerequisite(s): BIOL 4680 >= C

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Master of Science

Schedule Type (Primary): Lecture

BIOL 6700 - Advanced Cell Biology (3 Credit Hours)

This course pursues a detailed study of membrane trafficking, the cytoskeleton, intracellular communication, gene expression and cellular differentiation, the cell cycle, and apoptosis. How these processes are regulated at the molecular level is emphasized.

Cross-Leveled Course(s): BIOL 4700

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3

Grade Mode: N- Normal (A, B, C, D, F)

Program Restrictions: Master of Science with a Major in Biomolecular Science

Schedule Type (Primary): Lecture

BIOL 6703 - Advanced Cell Biology - Advanced Topics (1 Credit Hour)

This course is intended for graduate students who have completed an appropriate Advanced Cell Biology course as an undergraduate.

This course reviews scientific literature and case studies in Cell Biology.

Prerequisite(s): BIOL 4700

Lecture Hours: 1 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 1

Grade Mode: Normal (A, B, C, D, F)

Course Level Restrictions: GS Graduate

Schedule Type (Primary): Lecture

BIOL 6720 - Principles of Pharmacology (3 Credit Hours)

This course will examine the basic principles of drug action including receptor theory, pharmacodynamics and pharmacokinetics. The basic physiology and pathophysiology of several organ systems will be examined, and the mechanisms of action of the most commonly used drugs to treat these conditions will be studied. Students enrolled for graduate credit will be required to review scientific literature and case studies related to course topics.

Cross-Listed Course(s): CHEM 6720 **Cross-Leveled Course(s):** BIOL 4720

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Master of Science

Schedule Type (Primary): Lecture

BIOL 6723 - Pharmacology - Advanced Topics (1 Credit Hour)

This course is intended for graduate students who have completed an appropriate pharmacology course as an undergraduate. This course reviews scientific literature and case studies in pharmacology.

Prerequisite(s): BIOL 4720 >= C

Cross-Listed Course(s): CHEM 6723

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Master of Science

Schedule Type (Primary): Lecture

BIOL 6780 - Molecular Carcinogenesis (3 Credit Hours)

This course will explore the cellular and molecular mechanisms of cancer development by examining the mechanisms of growth regulation of normal vs. neoplastic cells. It will include an examination of the mechanisms that are responsible for maintaining DNA fidelity, signal transduction in cell cycle regulation and apoptosis. Students enrolled for graduate credit will be required to review scientific literature and case studies related to the course topics.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Master of Science

Schedule Type (Primary): Lecture

BIOL 6783 - Molecular Carcinogenesis - Advanced Topics (1 Credit Hour)

This course is intended for graduate students who have completed an appropriate carcinogenesis course as an undergraduate. This course reviews scientific literature and case studies in carcinogenesis.

Prerequisite(s): BIOL 4780 >= C

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Master of Science

Schedule Type (Primary): Lecture

BIOL 6950 - Selected Topics (1 to 4 Credit Hours)

A variable content course intended to meet the needs and interests of graduate students in selected areas of biology. In selected areas of biology we will remove the forty dollar lab fee.

Lecture Hours: 1 to 4

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Degree Restrictions:** Master of Arts in Teaching

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

BIOL 6970 - Introduction to Research (2 Credit Hours)

Foundational activities associated with pursuing biomolecular research including safety training, completing rotation process of selecting a research mentor, establishing a thesis committee, attending seminars conducted by faculty and external speakers, and presenting a seminar on a topic appropriate to biomolecular science.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Master of Science

Schedule Type (Primary): Lecture

BIOL 6980 - Research Proposal Development (3 Credit Hours)

Instruction in professional writing for research proposals. Development and defense of research problem and written proposal with oral defense to thesis committee. Conducting of research pilot studies and method development appropriate to thesis research.

Prerequisite(s): BIOL 6970 >= C or CHEM 6970 >= C

Lecture Hours: 1 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

BIOL 6990 - Biological Research (1 to 9 Credit Hours)

This course is designed to provide 1-9 hours of academic credit for graduate students engaged in research activities in the Department of Biology. Requires permission of instructor.

Lab Hours: 1 to 9

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

BMBS 5201 - Bioclinical Seminar I (1 Credit Hour)

Clinical case histories and reports appropriate to the basic science courses currently or previously taught and correlated to the students' level of clinical expertise will be provided to the class. One group will present a case study to the rest of the class, followed by a class discussion/Q/A session. Both basic and clinical science faculty moderators will be present for the entire seminar.

Contact Hours: 1

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Seminar - Small Group

BMBS 5302 - Bioclinical Seminar II (1 Credit Hour)

This is primarily a literature-based course and students should utilize credible search engines (e.g., PubMed) to prepare for each case. In addition, they can utilize their textbooks and notes in courses completed prior to this course.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Seminar - Small Group

BMBS 5403 - Bioclinical Seminar III (1 Credit Hour)

Clinical case histories and reports appropriate to the biomedical and clinical science courses currently or previously taught, and correlated to the students' level of clinical expertise, will be provided to the class. One group will present a case study to the rest of the class, followed by a class discussion session. Faculty moderators will be present for the entire seminar.

Lecture Hours: 18

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Seminar - Small Group

BMBS 5504 - Bioclinical Seminar IV (1 Credit Hour)

Clinical case histories and reports appropriate to the biomedical and clinical science courses currently or previously taught, and correlated to the students' level of clinical expertise, will be provided to the class. One group will present a case study to the rest of the class, followed by a class discussion session. Faculty moderators will be present for the entire seminar.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Seminar - Small Group

BMCC 5201 - Craniofacial Complex (6 Credit Hours)

The course provides students with the foundation and up-to-date knowledge of the development and functional anatomy of the craniofacial complex. The course of craniofacial complex also presents anatomical basis of common clinical problems that affect the craniofacial complex, prenatal and postnatal insults to the development of human craniofacial complex and how these lead to abnormalities that require treatment. In addition, the course describes the basics of advanced imaging in the form of cone beam computed tomography (CBCT), explain important challenging concepts in dental radiography, and provides students with anatomical basis of interpretation of normal and pathological radiological features. Lectures correlate the development and anatomy of the craniofacial complex to clinical problems, and also tie the regional approach of laboratory anatomy to systemic physiological anatomy. Students dissect the head region and the superficial and deep structures of the neck region. Models and movies of prosected materials supplement the cadaver dissection.

Lecture Hours: 6

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Anatomy Lab Supplies Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 400

BMCD 5201 - Craniofacial Development (2 Credit Hours)

This course will cover human development, with a focus on the head and neck structures, and clinical correlations.

Lecture Hours: 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

College Restrictions: Dental College of Georgia **Program Restrictions:** DMD_DENT-Dentistry

Schedule Type (Primary): Lecture

BMCR 5301 - Cardiovascular and Renal Systems (5 Credit Hours)

This course emphasizes the anatomical organization and pathological disorders of Cardiovascular and Renal systems. Dissection, models and movies of prosected material are used to study the human body on a systemic basis. Pathologic disorders, congenital anomalies and neoplastic entities, are presented. Clinicopathologic correlations along with case-based scenarios are emphasized. For this purpose, some clinical problems will be provided for discussion in the lecture room. Students are encouraged to read the clinical case and try to answer the questions before they attend the lecture.

Lecture Hours: 74

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

BMDM 5601 - Frontiers in Dental/Medical Science I (1 Credit Hour)

Cutting edge topics of relevance to dentistry and medicine will be highlighted through presentation of recent basic, translational and clinical research. Each session will be followed by a discussion of the topic and its impact on dental practice.

Lecture Hours: 22

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

BMDM 5702 - Frontiers in Dental/Medical Science II (1 Credit Hour)

Cutting edge topics of relevance to dentistry and medicine will be highlighted through presentation of recent basic, translational and clinical research. Each session will be followed by a discussion of the topic and its impact on dental practice.

Lecture Hours: 21

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

BMEN 5201 - Endocrine System (3 Credit Hours)

This is a course designed to present the endocrine system to dental students covering the histology, gross anatomy, physiology, pathology and pharmacology of the system, with special emphasis on concepts and principles related to dental practice. While the course discusses the endocrine system to provide dental students with integrated knowledge of the functional systems of the human body, it also covers specific topics unique to dental practice such as, pregnancy gingivitis, dental complications of diabetes and the relationship between calcium homeostasis and alveolar bone loss.

Lecture Hours: 56

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

BMEB 5101 - Biomedical Evidence-Based Dentistry (2 Credit Hours)

A small group, problem-based learning course that gives students the tools they need to understand how to conduct research, to develop into lifelong learners and to learn presentation skills. It is comprised of several learning modules, consisting of a brief orientation by the faculty, then followed by self-paced learning by the students in randomly generated small groups. There is only one mid-term online quiz to evaluate progression on general concepts given during class, and there is only one final 10-minute presentation after the development of a VIRTUAL research proposal (and the execution with virtual data analysis) by each team. The ultimate goal is to provide specific tools for the dental student to become a lifelong learner dentist (with a clear understanding of evidence-based dentistry and the scientific method) with a fundamental critical approach to the dental literature.

Lecture Hours: 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: 02 Dental College of Georgia

Schedule Type (Primary): Lecture

BMFN 5101 - Biomedical Foundations I (4 Credit Hours)

Cutting edge topics of relevance to dentistry and medicine will be highlighted through presentation of recent basic, translational and clinical research. Each session will be followed by a discussion of the topic and its impact on dental practice.

Lecture Hours: 4

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

BMFN 5102 - Biomedical Foundations II (4 Credit Hours)

This course presents lectures on microbiology and immunology including microbial physiology, metabolism, genetics, Pharmacology and mechanisms of pathogenesis and basic principles of immunology and immunological responses. Further, current materials presented in this course will provide information concerning the fundamental processes of the oral micro flora and the underlying principles of host defense which are critical to the students in dental medicine and dentistry in general.

Lecture Hours: 4

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

BMGH 5301 - Gastrointestinal and Hepatobiliary Systems (3 Credit Hours)

This course is designed to present the histology, gross anatomy, physiology, pathology and pharmacology of the gastrointestinal and hepatobiliary system to dental students, with special emphasis on relevance to dental practice.

Lecture Hours: 40

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

BMHS 5401 - Hematopoietic System (2 Credit Hours)

A comprehensive study of the hematopoietic system, including the development, structure and function of the hematopoietic system cells and tissues, and the associated abnormalities. Students learn about the roles of bone marrow, thymus, spleen and liver in the production and function of blood cells, as well as the clotting system. The use of blood transfusions, tissue transplantation and laboratory methods for measuring hematopoietic system functions is presented. These topics are followed by discussion of clinically important disorders of blood cells, hemostasis, and hematopoietic organs, including deficiencies and neoplasias, and the pharmacologic management of conditions pertaining to this system. In order to enhance understanding of the system and the clinical implications of abnormalities for dental patients, students apply didactic information in case-based seminars that emphasize oral and maxillofacial manifestations. The Bioclinical Seminar is also used for analysis of cases relevant to the topics covered in this course.

Lecture Hours: 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

BMHD 5101 - Host Defense, Pathogenesis, and Management of Infection (5 Credit Hours)

This course presents lectures on microbiology, immunology and pharmacology. Mechanisms of bacterial pathogenesis, clinical features and diagnosis of bacterial, viral, rickettsial, and mycotic infections, particularly those that present with oral manifestations are discussed, along with host immunological responses and infection control. The students will be provided with a working understanding of pharmacology and pharmacotherapeutics of antimicrobials as applied to dental practice.

Lecture Hours: 5

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

BMMS 5301 - Integumentary and Musculoskeletal Systems (2 Credit Hours)

The course provides students with the basis of knowledge related to the anatomical organization, physiology and pathology of the skin and musculoskeletal system. This course provides lectures, laboratories and clinical conferences on the histology, anatomy and pathology of the skin and musculoskeletal system with highlighting the Physiology related to this system. This course provides dental students with an integrated knowledge of the functional systems with a special emphasis placed on concepts and principles specifically related to dental practice. In addition, the course include Lectures correlate the anatomy and pathology of the musculoskeletal system to clinical problems, and also tie the regional approach of laboratory anatomy to systemic physiological anatomy. Students dissect the back region, axilla and upper extremities. Models, movies and X-rays of prosected materials supplement the cadaver dissection. Scope: Anatomy, histology, physiology and pathology related to skin and musculo-skeletal system.

Lecture Hours: 24

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

BMMS 5402 - Integumentary and Musculoskeletal Systems II (2 Credit Hours)

The course provides students with the basis of knowledge related to the anatomical organization, physiology and pathology of the skin and musculoskeletal system. This course provides lectures, laboratories and clinical conferences on the histology, anatomy and pathology of the skin and musculoskeletal system with highlighting the Physiology related to this system. This course provides dental students with an integrated knowledge of the functional systems with a special emphasis placed on concepts and principles specifically related to dental practice. In addition, the course includes lectures that correlate the anatomy and pathology of the musculoskeletal system to clinical problems, and also tie the regional approach of laboratory anatomy to systemic physiological anatomy. Students dissect the back region, axilla and upper extremities. Models, movies and X-rays of prosected materials supplement the cadaver

dissection. Scope: Anatomy, histology, physiology and pathology related to skin and musculoskeletal system.

Lecture Hours: 28

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

BMNN 5101 - Nervous System and Neuroscience (4 Credit Hours)

Introduces the basic structure and function of the nervous system through lectures and laboratories. This is an integrated course aimed at the study of the structure and function of the Nervous System. It includes selected subjects from Neuroembryology, Neurocytology, Neurophysiology, Neuropathology, Neurology, and Neuropharmacology.

Lecture Hours: 4

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

BMNN 5202 - Applied Neuropharmacology for Dentistry (4 Credit Hours)

This course is dedicated to central nervous system (CNS) pharmacology. It includes discussion of pharmacological properties of medications that are indicated for the management of pain and anxiety in dentistry and prescription writing exercises for such medications. Further, pharmacological management of chronic orofacial pain disorders will be discussed. In addition, pharmacological properties of medications that are used for treatment of seizure disorders, depression and psychiatric disorders as well as treatment of Parkinsonism is covered. Other topics include: drug abuse, CNS stimulants, and pharmacological properties of general anesthetic agents.

Lab Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

BMNT 5101 - Nutrition and Community Health (1 Credit Hour)

This course is designed to provide all entering first year dental students with the introduction and overview of basic concepts in health promotion and community health. In this course, current USDA nutrition guidelines are discussed, various aspects of nutritional counseling with patients are addressed. Major nutritional problems encountered in the clinical practice of dentistry are discussed. A philosophy of wellness emphasizes health promotion and disease prevention as an integral component of dental practice. A total of 28 hours of lectures, seminar and community service activities are provided so that students will gain the necessary knowledge and skill regarding the philosophy, modalities, rationale and evaluation of oral health promotion and disease prevention activities in community and public health.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

BMOM 5101 - Introduction to the Oral Microenvironment (5 Credit Hours)

In this module, the student will learn the microscopic structure of mineralized tissues of the oral cavity and how the structure reflects on the oral micro-environment.

Lecture Hours: 5

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

BMRS 5301 - Respiratory System (3 Credit Hours)

In this module, the student will learn the essential histology, gross anatomy, physiology, pathology, and pharmacology of the respiratory system with special emphasis placed on dental relevance.

Lecture Hours: 3

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

BIOM 8011 - Responsible Conduct of Research (1 Credit Hour)

Course will provide an overview, via lecture and discussion, of critical issues related to the responsible conduct of research. In addition, it will fulfill the requirements established by the Office of Research Integrity and the Public Health Service for ensuring that PHS-supported researchers are provided adequate instruction in conducting responsible research and ensuring integrity of the research record.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy

Schedule Type (Primary): 10- Lecture **Schedule Type (Additional):** 57- Asynchronous Instruction

BIOM 8012 - Scientific Communications (1 Credit Hour)

Course focuses on writing and presentations skills needed for a career in biomedical sciences. It provides basic instruction in writing abstracts, curriculum vitae, and grant applications as well as how to organize and give oral scientific presentations. Also covered are basic aspects related to teaching skills needed in the biomedical classroom and laboratory.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

BIOM 8021 - Biochemistry and Gene Regulation (5 Credit Hours)

One semester course includes metabolism: enzyme structure, kinetics and mechanisms; RNA, DNA, and protein biogenesis; DNA repair and recombination; cell cycle control, cancer genetics. Classroom time includes lectures, discussion, and demonstrations using traditional and alternative teaching methods.

Lecture Hours: 4 **Contact Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture

BIOM 8022 - Molecular Cell Biology (5 Credit Hours)

One semester course focuses on the study of the cell as the fundamental structural and functional unit of which all living organisms are constructed. Cell biology serves as a bridge between molecular biology, basic biochemistry, physiology, and morphology at the gross anatomical level and is increasingly a principal area of focus for biomedical research. In this course, the properties of cells are analyzed initially by viewing the structural organization, functional interactions, and biogenesis of cellular components with particular emphasis on understanding of processes involved in regulating the specific composition and interactions of cellular organelles. This understanding forms a basis for the subsequent consideration of cell-cell interactions at the cellular and the tissue level.

Lecture Hours: 4 **Contact Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture

BIOM 8030 - Experimental Therapeutics (2 Credit Hours)

Analysis of concepts and methods used in the discovery and validation of biomedical therapeutics.

Prerequisite(s): BIOM 8021

Lecture Hours: 25 **Contact Hours:** 5

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture

BIOM 8033 - Integrated Systems Biology (6 Credit Hours)

One semester course includes basic anatomy, physiology, and pharmacology of all the organ systems. Special topics also covered include integrated biosystems and feedback, physiological genomics, modern drug discovery, and hot research topics. Classroom time includes lectures, discussion, and demonstrations using traditional and alternative teaching methods.

Lecture Hours: 5 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic

BIOM 8040 - Introduction to Faculty Research (2 Credit Hours)

An introduction to all research topics currently being conducted by biomedical sciences graduate faculty.

Contact Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture

BIOM 8050 - Introduction to Research I (2 Credit Hours)

Individualized instruction in research or core laboratories. Students should master at least one laboratory technique and become familiar with the various activities of the laboratories.

Lab Hours: 10

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Supervised Lab/Clinic

BIOM 8060 - Introduction to Research II (4 Credit Hours)

Individualized instruction in two research or core laboratories. For each laboratory, students should master at least one laboratory technique and become familiar with the various activities of the laboratory. Students will spend half of the semester in each laboratory.

Prerequisite(s): BIOM 8050 >= C

Lab Hours: 10

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Supervised Lab/Clinic **Schedule Type (Additional):** Unsupervised Lab/Clinic

BIOM 8080 - Neuroscience I (4 Credit Hours)

Prerequisites: For PhD students: Satisfactory completion of BIOM 8022 is required. For MD/PhD students: Satisfactory completion of first two years of medical school is required. Neuroscience I will cover the cell and molecular biology of neurons and synapses, motor systems, somatosensory, vision, audition, chemical senses, tastes and olfaction, glia and neuroimmunology, regulatory, autonomic and neuroendocrine systems.

Prerequisite(s): BIOM 8022 >= C

Lecture Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture

BIOM 8085 - Fundamentals of Aging (2 Credit Hours)

As the lifespan and proportion of the global human population of advanced age increase, the need to understand and address the mechanism of the aging process is becoming a major public health priority. Hence, research on aging is growing exponentially. This multidisciplinary graduate course on aging is intended to convey up-to-date developments in the aging field and to prepare the students for a new era of research and targeted clinical interventions. Every class is taught by a Graduate School faculty member with relevant expertise in a given topic. In addition to the usual didactic lecture format, two or more journal-club format classes will discuss and evaluate recent research publications.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

College Restrictions: The Graduate School **Degree Restrictions:** DPHIL - Doctor of Philosophy

Schedule Type (Primary): Lecture

BIOM 8090 - Fundamentals of Genomic Medicine (2 Credit Hours)

This course will provide a theoretical framework for understanding the fundamental concepts of mammalian genetics, functional genomics and bioinformatics as well as advanced technical and biological tools used in today's biomedical research environment. The course will provide lectures on a wide range of classical and modern topics such as classical genetics, linkage analysis, genetic mapping, positional cloning, genomics, and bioinformatics. The focus of the course will be to understand the experimental identification of genes responsible for disease and modern applications of genomics to understanding biological processes as well as their impact on modern medicine.

Prerequisite(s): (COGS8021 or BIOM8021 and COGS8022 or BIOM8022)

Lecture Hours: 30

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture

BIOM 8130 - Scientific Grant Writing (1 Credit Hour)

Prerequisites: Satisfactory completion of the first year biomedical sciences core curriculum, or permission of the course director.

Practical course on grant writing. Specific steps in writing a grant application, from the hypothesis and specific steps through the final product, are presented and discussed as the student writes an application that will be submitted to a granting agency.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

BIOM 8200 - Selected Topics (for Partial Course Enrollment) (1 to 6 Credit Hours)

This course allows graduate students enrolled in one of the Biomedical Science PhD programs to attend a subset of lectures within a given Augusta University graduate level course to earn partial course credit hours. The Graduate School will work with appropriate course directors to identify lectures, course requirements, and subsequent credit hours for the course. Each schedule is unique to the particular student. Appropriate permission and approvals must be obtained before a student can register for the course.

Lecture Hours: 1 to 6

Repeatability: May be repeated for credit up to 30 hours.

Grade Mode: Normal (A, B, C, D, F), Satisfactory/Unsatisfactory

College Restrictions: THE GRADUATE SCHOOL **Student Class Restrictions:** Graduate **Course Level Restrictions:** GS Graduate

Department Restrictions: Biomedical Sciences **Degree Restrictions:** Doctor of Philosophy

Schedule Type (Primary): Lecture

BIOM 8215 - Fundamentals of Oncology I (2 Credit Hours)

Covers fundamental aspects of cancer biology with emphasis on the etiology, natural history, epidemiology of cancer, host-tumor relationships, immunobiology and principles of chemotherapy and radiotherapy.

Prerequisite(s): BIOM 8021

Lecture Hours: 25 **Contact Hours:** 5

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture

BIOM 8216 - Advanced Oncology: Challenges in Translation from Basic to Clinic (3 Credit Hours)

The objective of the course is to educate students on the clinical and translational aspects of cancer research. The course will consist of four modules, each emphasizing the principal aspects of cancer management: prevention, diagnosis & surveillance, primary treatment, and the management of recurrent cancers. Each module will be comprised of four sessions followed by four discussion classes. In cancer prevention, topics covered will be an overview of cancer prevention strategy (e.g., education, community outreach, intervention, and incentivization), dietary prevention, prevention of tobacco-related cancers, and how the efficacy of each effort is evaluated. In the cancer diagnosis and surveillance classes, emphasis will be on how cancer is detected using biochemical and genetic markers, and imaging technologies. The surveillance topics will include how clinical follow-up tests are designed, and how the landscape of diagnostic markers changes with different stages of the disease. The module on primary treatment will include how common malignant cancers are initially treated for example prostate, lung, breast and colorectal cancers. The clinicians outlining their experience and the challenges they face in their practice will teach the module on the management of recurrent cancers. Every effort will be made to involve practicing clinicians (pathologists, surgical oncologists, medical oncologists, and radiologists) along with full time research scientists.

Prerequisite(s): BIOM 8215 >= B

Lecture Hours: 2 **Contact Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal

Schedule Type (Primary): Seminar - Small Group **Schedule Type (Additional):** Directed Study (one-to-one)

BIOM 8230 - Biology of Proteins in Disease (2 Credit Hours)

Advanced study of protein function in cell biology and how this relates to the pathogenesis of disease.

Prerequisite(s): BIOM 8021 and BIOM 8022

Lecture Hours: 25 **Contact Hours:** 5

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture

BIOM 8240 - Introduction to Immunology and Infectious Disease (2 Credit Hours)

Basic instruction on fundamentals of immunology, microbiology, and virology.

Prerequisite(s): BIOM 8021 and BIOM 8022

Lecture Hours: 25 **Contact Hours:** 5

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture

BIOM 9210 - Investigation of a Problem (1 to 12 Credit Hours)

The student works with individual faculty members on a specific investigative research problem. This provides an introduction to analytical techniques and the scientific method in action. Prerequisites: Satisfactory completion of the first two semesters of the biomedical sciences core curriculum or permission of the course director.

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Program Restrictions:** DPHIL_UNDCL-Biomedical Sciences Undeclared

Campus Restrictions: Main Campus

Schedule Type (Primary): Supervised Lab/Clinic

BIOM 9500 - Current Topics in Translational Medicine Research (1 Credit Hour)

Instruction on how to evaluate reports in the current translational medicine literature.

Contact Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

GRAD 8030 - Experimental Therapeutics (2 Credit Hours)

Analysis of concepts and methods used in the discovery and validation of biomedical therapeutics.

Lecture Hours: 25 **Contact Hours:** 5

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture

GRAD 8033 - Integrated Systems Biomedics (6 Credit Hours)

One semester course includes basic anatomy, physiology, and pharmacology of all the organ systems. Special topics also covered include integrated biosystems and feedback, physiological genomics, modern drug discovery, and hot research topics. Classroom time includes lectures, discussion, and demonstrations using traditional and alternative teaching methods.

Lecture Hours: 5 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic

GRAD 8040 - Introduction to Faculty Research (2 Credit Hours)

An introduction to all research topics currently being conducted by biomedical sciences graduate faculty.

Contact Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus
Schedule Type (Primary): Lecture

GRAD 8050 - Introduction to Research I (2 Credit Hours)

Individualized instruction in research or core laboratories. Students should master at least one laboratory technique and become familiar with the various activities of the laboratories.

Lab Hours: 10

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Supervised Lab/Clinic

GRAD 8060 - Introduction to Research II (4 Credit Hours)

Individualized instruction in research or core laboratories. Students should master at least one laboratory technique and become familiar with the various activities of the laboratories.

Prerequisite(s): GRAD 8050 >= C

Lab Hours: 10

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Supervised Lab/Clinic **Schedule Type (Additional):** Unsupervised Lab/Clinic

GRAD 8080 - Neuroscience I (4 Credit Hours)

Prerequisites: For PhD students: Satisfactory completion of GRAD 8022 Molecular Cell Biology is required. For MD/PhD students: Satisfactory completion of first two years of medical school is required. Neuroscience I will cover the cell and molecular biology of neurons and synapses, motor systems, somatosensory, vision, audition, chemical senses, tastes and olfaction, glia and neuroimmunology, regulatory, autonomic and neuroendocrine systems.

Prerequisite(s): GRAD 8022 >= C

Lecture Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture

GRAD 8090 - Fundamentals of Genomic Medicine (2 Credit Hours)

This course will provide a theoretical framework for understanding the fundamental concepts of mammalian genetics, functional genomics and bioinformatics as well as advanced technical and biological tools used in today's biomedical research environment. The course will provide lectures on a wide range of classical and modern topics such as classical genetics, linkage analysis, genetic mapping, positional cloning, genomics, and bioinformatics. The focus of the course will be to understand the experimental identification of genes responsible for disease and modern applications of genomics to understanding biological processes as well as their impact on modern medicine.

Prerequisite(s): GRAD 8012 >= C and GRAD 8022 >= C

Lecture Hours: 30

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture

GRAD 8120 - Cardiovascular Physiology and Pharmacology (3 Credit Hours)

Prerequisites: Satisfactory completion of the first year biomedical sciences core curriculum, or permission of the course director. Integrative study of the cardiovascular system and how drugs are used to treat cardiovascular disease. Cardiac, vascular and renal physiology will be studied in detail, and also will be integrated into an overall scheme for control of the circulation. The use of drugs as cardiovascular research tools also will be interwoven into this approach.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Supervised Lab/Clinic

GRAD 8130 - Scientific Grant Writing (1 Credit Hour)

Prerequisites: Satisfactory completion of the first year biomedical sciences core curriculum, or permission of the course director. Practical course on grant writing. Specific steps in writing a grant application, from the hypothesis and specific steps through the final product, are presented and discussed as the student writes an application that will be submitted to a granting agency.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

GRAD 8210 - Fundamentals of Oncology I (4 Credit Hours)

Prerequisites: Satisfactory completion of the first year biomedical sciences core curriculum, or permission of the course director. As the first semester of a two-semester course sequence, this course covers fundamental aspects of cancer biology with emphasis on the etiology of cancer, natural history of neoplasia, epidemiology of human malignancies, host-tumor relationships, immunobiology and principles of chemotherapy and radiotherapy.

Lecture Hours: 3 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic

GRAD 8215 - Fundamentals of Oncology I (2 Credit Hours)

Covers fundamental aspects of cancer biology with emphasis on the etiology, natural history, epidemiology of cancer, host-tumor relationships, immunobiology and principles of chemotherapy and radiotherapy.

Prerequisite(s): GRAD 8021 >= C and GRAD 8022 >= C

Lecture Hours: 25 **Contact Hours:** 5

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture

GRAD 8230 - Biology of Proteins in Disease (2 Credit Hours)

Advanced study of protein function in cell biology and how this relates to the pathogenesis of disease.

Prerequisite(s): GRAD 8021 >= C and GRAD 8022 >= C

Lecture Hours: 25

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus
Schedule Type (Primary): Lecture

GRAD 8240 - Introduction to Immunology and Infectious Disease (2 Credit Hours)

Basic instruction on fundamentals of immunology, microbiology, and virology.

Prerequisite(s): GRAD 8021 >= C and GRAD 8022 >= C

Lecture Hours: 25 **Contact Hours:** 5

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture

GRAD 9210 - Investigation of a Problem (1 to 12 Credit Hours)

The student works with individual faculty members on a specific investigative research problem. This provides an introduction to analytical techniques and the scientific method in action. **Prerequisites:** Satisfactory completion of the first two semesters of the biomedical sciences core curriculum or permission of the course director.

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Program Restrictions:** DPHIL_UNDCL-Biomedical Sciences Undeclared

Campus Restrictions: Main Campus

Schedule Type (Primary): Supervised Lab/Clinic **Schedule Type (Additional):** Independent Study

BMSE 1901 - Introduction to Biomedical System Engineering (3 Credit Hours)

This course presents an introduction to the systems engineering process and the development lifecycle as a foundation for solving complex problems in the health care setting. The course focuses on the systems engineering lifecycle process that includes design, concurrent engineering, software engineering, and the concepts of reliability, maintainability, and availability. The course also includes a review of Model-Based Systems Engineering (MBSE) methodologies.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Undergraduate Semester **Program Restrictions:** 1BS-BSEN-BS-Biomedical Sys. Engineering

Schedule Type (Primary): Lecture

BMSE 2101 - Overview of Health Systems and Processes (3 Credit Hours)

This course is to introduce you to the fundamental organization, behavior, financing, and challenges of the health system of the United States. The course treats the entire edifice of American health care as "the American health system," and intends to examine it in toto, including by comparing it to other national health systems, and in part, by examining critical components of the system.

Prerequisite(s): BMSE 1901 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Undergraduate Semester **Program Restrictions:** 1BS-BSEN-BS-Biomedical Sys. Engineering

Schedule Type (Primary): Lecture

BMSE 2201 - Biomedical Visualization (3 Credit Hours)

This course is an introduction to 3-D biomedical visualization. Various technologies are introduced, including UltraSound, MRI, CAT scans, PET scans, etc. Students will learn about spatial data structures, computational geometry and solid modeling with applications in

3-D molecular and anatomical modeling.

Prerequisite(s): BMSE 2101 >= C and CSCI 1301 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Undergraduate Semester **Program**

Restrictions: 1BS-BSEN-BS-Biomedical Sys. Engineering

Schedule Type (Primary): Lecture

BMSE 3101 - Biomechanics (3 Credit Hours)

An introduction to mechanical properties of biological tissues and organs. Analysis of deformation and dynamics through the application of simple static, dynamic and kinematic models.

Prerequisite(s): BMSE 2101 >= C and MATH 2012 >= C and PHYS 2211 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Undergraduate Semester **Program**

Restrictions: 1BS-BSEN-BS-Biomedical Sys. Engineering

Schedule Type (Primary): Lecture

BMSE 3201 - Biomedical Signal Processing (3 Credit Hours)

Fundamental principles and applications of noninvasive imaging modalities in medicine (X-rays, tomography, magnetic resonance, ultrasound); computer methods and algorithms for image processing, enhancement and analysis.

Prerequisite(s): BMSE 2101 >= C and ENGR 2060 >= C and MATH 3020 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Undergraduate Semester **Program**

Restrictions: 1BS-BSEN-BS-Biomedical Sys. Engineering

Schedule Type (Primary): Lecture

BMSE 3202 - Biomedical Applications of AI + ML (3 Credit Hours)

This course covers the fundamentals of heuristic problem-solving using search techniques, knowledge representation, and expert systems. It includes a survey of machine learning with a focus on biomedical information systems.

Prerequisite(s): BMSE 2101 >=C and CSCI 1301 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Undergraduate Semester **Program**

Restrictions: 1BS-BSEN-BS-Biomedical Sys. Engineering

Schedule Type (Primary): Lecture

BMSE 3501 - Biomedical System Security (3 Credit Hours)

Review of cybersecurity concerns in the healthcare field. Students learn about healthcare computer security, security threats, network vulnerabilities, access controls, HIPAA, and ways to prepare for cyberattacks.

Prerequisite(s): BMSE 2101 >= C and CYBR 2600 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Undergraduate Semester **Program**

Restrictions: 1BS-BSEN-BS-Biomedical Sys. Engineering

Schedule Type (Primary): Lecture

BMSE 3601 - Biomedical Instrumentation (3 Credit Hours)

Analysis and design of biomedical instrumentation including electronics, laboratory sensors, biopotentials, amplifiers, measurement systems and safety.

Prerequisite(s): BMSE 2101 >= C and PHYS 3011 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Undergraduate Semester **Program**

Restrictions: 1BS-BSEN-BS-Biomedical Sys. Engineering

Schedule Type (Primary): Lecture

BMSE 3602 - Biomedical Data Analytics (3 Credit Hours)

Exploration of data science knowledge needed in the biomedical field including an overview of biomedical data science and exploration of tools and programming languages used in analytics.

Prerequisite(s): BMSE 2101 >= C and MATH 3250 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Undergraduate Semester **Program**

Restrictions: 1BS-BSEN-BS-Biomedical Sys. Engineering

Schedule Type (Primary): Lecture

BMSE 3901 - Modeling and Simulation of Biomedical Systems (3 Credit Hours)

The general field of biomedical engineering is reviewed with the introduction of conservation and modeling concepts. Introduction of computational systems biology, including the modeling process, various types of models, standard analysis and simulation of systems, and applications in real-world biological systems.

Prerequisite(s): BIOL 2251 >= C and BMSE 2101 >= C and MATH 3250 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Undergraduate Semester **Program**

Restrictions: 1BS-BSEN-BS-Biomedical Sys. Engineering

Schedule Type (Primary): Lecture

BMSE 4601 - Biomedical Imaging (3 Credit Hours)

An introduction to biomedical imaging concepts and modalities including the underlying physical principles involving magnetic resonance, acoustic energy, and electromagnetic radiation. General principles of imaging (image quality, sampling, etc.), image processing, enhancement, and analysis are introduced. Topics include: x-ray-based imaging including conventional x-ray, mammography, breast tomosynthesis, and computerized tomography (CT); nuclear medicine techniques including positron emission tomography (PET) and single photon emission computed tomography (SPECT); ultrasound; and magnetic resonance imaging (MRI).

Prerequisite(s): BMSE 3201 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Undergraduate Semester **Program**

Restrictions: 1BS-BSEN-BS-Biomedical Sys. Engineering

Schedule Type (Primary): Lecture

BMSE 4711 - Senior Design 1 (3 Credit Hours)

An individual or group project in the application of biomedical systems engineering. Emphasis is on the production of real-world systems and may be conducted in cooperation with an external organization such as a commercial company or public agency.

Prerequisite(s): BMSE 2101 >= C and HINF 3209 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Undergraduate Semester **Program**

Restrictions: 1BS-BSEN-BS-Biomedical Sys. Engineering

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

BMSE 4712 - Senior Design 2 (2 Credit Hours)

An individual or group project in the application of biomedical systems engineering. Emphasis is on the production of real-world systems and may be conducted in cooperation with an external organization such as a commercial company or public agency.

Prerequisite(s): BMSE 4711 >= C

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Student Class Restrictions:** Senior **Course Level Restrictions:** Undergraduate Semester **Program Restrictions:** 1BS-BSEN-BS-Biomedical Sys. Engineering

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

BUSA 1105 - Introduction to Business and Professional Skills (3 Credit Hours)

This course is designed as an introduction to business for first and second year business and non-business students to learn about different business functions, career opportunities, and successful business people and organizations. Major concepts include the competitive business environment, business ethics, business communication, leadership and teamwork skills, and an overview of functional business areas and their related career opportunities. This course will also address professional development topics such as internships, study abroad, ethics and social responsibility. Students will be introduced to the business school faculty, curricula requirements, and professional development opportunities. Guest lecturers for each academic discipline and related industries will contribute to the course and student participation in campus/community activities may be required.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Student Class Restrictions: Freshman-Semester, Sophomore-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

BUSA 4200 - International Business (3 Credit Hours)

This course covers all aspects of international business including, but not limited to international politics, culture, economics, finance, technology, marketing, ethical decision-making, strategic planning and management, and human resource development in a global environment.

Prerequisite(s): MGMT 3500 >= C and MKTG 3700 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

BUSA 4950 - Selected Topics (3 Credit Hours)

A course and/or directed study of a major issue, practice, or problem in the area of business administration. Content to be decided based on needs and professional objectives of students and the experience and availability of faculty. Prerequisite(s): Permission of instructor.

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

BUSA 4960 - Undergraduate Internship (3 Credit Hours)

An internship is a service learning experience based on an institution or agency, emphasizing the completion of a specific task and the acquisition of specific knowledge and skills under the supervision of the university and the cooperating institution or agency.

Prerequisite(s): Permission of Hull College of Business.

Contact Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Asynchronous Instruction **Schedule Type (Additional):** Internship/Practicum

BUSA 4990 - Undergraduate Research (1 to 3 Credit Hours)

Faculty supervised research on a business topic of interest to the student or faculty supervisor. Research agreement must be made between students and faculty member prior to enrolling in the course. A minimum of three hours of work per week for each semester hour of credit.

Repeatability: May be repeated for credit up to three times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Independent Study

BUSA 5000 - Analytical Tools for Executive Decision Making (5 Credit Hours)

This course introduces a number of quantitative models and tools that are commonly used for managerial decision making. The emphasis of this course is on the applications of these quantitative models and tools to business problems arising in diverse industries and functional areas including operations, finance, and marketing. The course will introduce subject matter in macro and micro-economic theory, finance, accounting information, and statistical inference as it relates to executive level decision making.

Lecture Hours: 5

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: MBA **Program Restrictions:** 1MBA-Master of Bus. Administration

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

BUSA 5001 - Executive Management Foundations (4 Credit Hours)

This course examines business from the perspective of an executive management team. The emphasis will be on planning, leading, organizing, and controlling in order to effectively manage organizations in a dynamic environment. The legal, ethical, competitive, and market forces in which firms operate also will be examined. The operational use of strategic decision making will be introduced in the context of strategic and tactical marketing, management, and production decision making.

Lecture Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: MBA **Program Restrictions:** 1MBA-Master of Bus. Administration

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

BUSA 6950 - Current Issues in Business Administration (3 Credit Hours)

A variable content course individually designed to meet the needs, interests, and professional objectives of students in the MBA Program.

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: MBA **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

BEFD 5101 - Business Ethics Foundations I (3 Credit Hours)

Being able to draw on a range of resources including professional codes, regulatory law, business principles, and ethical theories is essential to development professional behaviors. These resources will pertain to academic environment, patient care, practice management, and research. Each of the Business and Ethics Foundations courses will give students tools to guide judgment and action for complex, novel, ethically arguable, divisive, or of public concern. Specific topics for Business and Ethics Foundations I will focus on American College of Dentists Core Values, Ethics Principles, and ethical decision making exercises as well as wellness and resiliency. These concepts will be delivered through the use of online and live presentations, as well as assignments such as reading assignments, games, polls, surveys and discussions.

Lecture Hours: 3

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

BEFD 5202 - Business Ethics Foundations II (1 Credit Hour)

Being able to draw on a range of resources including professional codes, regulatory law, business principles, and ethical theories is essential to development professional behaviors. These resources will pertain to academic environment, patient care, practice management, and research. Each of the Business and Ethics Foundations courses will give students tools to guide judgment and action for complex, novel, ethically arguable, divisive, or of public concern. Specific topics for Business and Ethics Foundations II will introduce business concepts such as budgeting, finance, scheduling, and retirement planning and will continue on leadership development. These concepts will be delivered through the use of online and live presentations, as well as assignments such as reading assignments, games, polls, surveys and discussions.

Lecture Hours: 22

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

BEFD 5303 - Business Ethics Foundations III (1 Credit Hour)

Being able to draw on a range of resources including professional codes, regulatory law, business principles, and ethical theories is essential to development professional behaviors. These resources will pertain to academic environment, patient care, practice management, and research. Each of the Business and Ethics Foundations courses will give students tools to guide judgment and action for complex, novel, ethically arguable, divisive, or of public concern. Specific topics for Business and Ethics Foundations III will focus on business, ethical, and leadership concepts. These concepts will be delivered through the use of online and live presentations, as well as assignments such as reading assignments, games, polls, surveys and discussions.

Lecture Hours: 20

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

BEFD 5504 - Business Ethics Foundations IV (1 Credit Hour)

Being able to draw on a range of resources including professional codes, regulatory law, business principles, and ethical theories is essential to development professional behaviors. These resources will pertain to academic environment, patient care, practice management, and research. Each of the Business and Ethics Foundations courses will give students tools to guide judgment and action for complex, novel, ethically arguable, divisive, or of public concern. Specific topics for Business and Ethics Foundations IV will focus on development of leadership skill and practice management. These concepts will be delivered through the use of online and live presentations, as well as assignments such as reading assignments, games, polls, surveys and discussions.

Lecture Hours: 20

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

BEFD 5605 - Business Ethics Foundations V (3 Credit Hours)

Being able to draw on a range of resources including professional codes, regulatory law, business principles, and ethical theories is essential to development professional behaviors. These resources will pertain to academic environment, patient care, practice management, and research. Each of the Business and Ethics Foundations courses will give students tools to guide judgment and action for complex, novel, ethically arguable, divisive, or of public concern. Specific topics for Business and Ethics Foundations V will focus on development of leadership skills and practice management. These concepts will be delivered through the use of online and live presentations, as well as assignments such as reading assignments, games, polls, surveys and discussions.

Lecture Hours: 43

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

BEFD 5706 - Business Ethics Foundations VI (1 Credit Hour)

Being able to draw on a range of resources including professional codes, regulatory law, business principles, and ethical theories is essential to development professional behaviors. These resources will pertain to academic environment, patient care, practice management, and research. Each of the Business and Ethics Foundations courses will give students tools to guide judgment and action for complex, novel, ethically arguable, divisive, or of public concern. Specific topics will focus on applying leadership skills and practice management as well as presentations of the Capstone projects. These concepts will be delivered through the use of online and live presentations, as well as assignments such as reading assignments, games, polls, surveys and discussions.

Lecture Hours: 17

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

BEFD 5807 - Business Ethics Foundations VI (1 Credit Hour)

Being able to draw on a range of resources including professional codes, regulatory law, business principles, and ethical theories is essential to development professional behaviors. These resources will pertain to academic environment, patient care, practice management, and research. Each of the Business and Ethics Foundations courses will give students tools to guide judgment and action for complex, novel, ethically arguable, divisive, or of public concern. Specific topics for Business and Ethics Foundations VI will focus on applying leadership skills and practice management as well as presentations of the Capstone projects. These concepts will be delivered through the use of online and live presentations, as well as assignments such as reading assignments, games, polls, surveys and discussions.

Lecture Hours: 17

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

RCAR 5000 - Cardiology (27 Credit Hours)

Lecture Hours: 5 **Lab Hours:** 40 **Contact Hours:** 15

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Internship/Practicum

RCAR 5001 - Clinical Cardiac Electrophysiology (27 Credit Hours)

Clinical Cardiac Electrophysiology

Lecture Hours: 5 **Lab Hours:** 40 **Contact Hours:** 15

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Internship/Practicum

RCAR 5002 - Interventional Cardiology (12 Credit Hours)

This program provides comprehensive subspecialty training to physicians who have completed both a residency and fellowship in Cardiovascular Disease. The focus of our program is training, as follows, to include formal instruction, weekly lectures, clinical experience and competence in prevention, evaluation and management of both inpatients and outpatients with disorders including but not limited to chronic ischemic heart disease, acute ischemic syndrome, valvular and structural heart disease, and bleeding disorders or complications associated with percutaneous intervention of drugs.

Lecture Hours: 3 **Lab Hours:** 3 **Contact Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

CHEM 1000 - Chemistry Orientation (1 Credit Hour)

An introduction to chemistry and its subdisciplines. Major concepts and perspectives will be introduced through projects and case studies that illustrate the utility and role of chemistry both in modern times and in the past. Additional topics shall include scientific ethics and careers in chemistry. Students will be introduced to the tools of library research.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

CHEM 1100 - Introductory Chemistry: Selected Topics (3 Credit Hours)

An exploration of principles, conceptual understanding, and problem-solving in chemistry oriented around a single theme. Does not include a laboratory component.

Prerequisite(s): MATH 1001 >= D or MATH 1111 >= D

Core IMPACTS Requirement(s) Satisfied: Technology, Mathematics, and Sciences (STEM)

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Practice Teaching

CHEM 1100L - Introductory Chemistry: Selected Topics Laboratory (1 Credit Hour)

A laboratory course to accompany CHEM 1100 to explore principles, apply concepts, and problem-solve in chemistry; oriented around a central theme.

Prerequisite(s): MATH 1001 >= D or MATH 1111 >= D

Corequisite(s): CHEM 1100

Lab Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Supervised Lab/Clinic **Schedule Type (Additional):** Unsupervised Lab/Clinic

Additional Course Fee: Chemistry/Biochemistry Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

CHEM 1151 - Survey of Chemistry I (4 Credit Hours)

First course designed for pre-allied health students and non-majors. Topics include: elements, compounds, stoichiometry, solutions, equilibrium, acid-base and nomenclature. Students with existing credit in CHEM 1211 or CHEM 1212 are not eligible to take this course. Students may not use both CHEM 1151 and either CHEM 1211 or CHEM 1212 to satisfy the Technology, Mathematics and Sciences area of Core IMPACTS requirements. STEM GPA Eligible Course.

Prerequisite(s): MATH 1001 >= D or MATH 1111 >= D or MATH 1113 >= D

Core IMPACTS Requirement(s) Satisfied: Technology, Mathematics, and Sciences (STEM)

Lecture Hours: 3 Lab Hours: 2

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Chemistry/Biochemistry Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

CHEM 1152 - Survey of Chemistry II (4 Credit Hours)

Organic and biochemistry designed for allied health students; covers common classes of organic compounds including uses and chemical and physical properties and introduction to structure and function of biological molecules. STEM GPA Eligible Course

Prerequisite(s): CHEM 1151 >= C or CHEM 1211 >= C

Core IMPACTS Requirement(s) Satisfied: Technology, Mathematics, and Sciences (STEM)

Lecture Hours: 3 Lab Hours: 2

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Chemistry/Biochemistry Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

CHEM 1211 - Principles of Chemistry I (3 Credit Hours)

First course in a sequence designed for science majors. Topics include: composition of matter, stoichiometry, periodic relations, gas laws, molecular geometry and nomenclature. Students may not apply both CHEM 1151 and CHEM 1211 to satisfy the Technology, Mathematics and Sciences or Field of Study areas of Core IMPACTS requirements. STEM GPA Eligible Course.

Prerequisite(s): MATH 1111 >= C or MATH 1113 >= C or MATH 2011 >= C or MATH 2011H >= C

Corequisite(s): CHEM 1211L and CHEM 1211R

Core IMPACTS Requirement(s) Satisfied: Technology, Mathematics, and Sciences (STEM)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Asynchronous Instruction

CHEM 1211H - Honors: Principles of Chemistry I (3 Credit Hours)

First course in a sequence designed for science majors. Topics include: composition of matter, stoichiometry, periodic relations, gas laws, molecular geometry and nomenclature. Students may not apply both CHEM 1151 and CHEM 1211 to satisfy Core IMPACTS (Technology, Mathematics and Sciences; or Social Sciences) requirements. This is an Honors course. STEM GPA Eligible Course.

Prerequisite(s): MATH 1111 >= C or MATH 1113 >= C or MATH 2011 >= C or MATH 2011H >= C

Corequisite(s): CHEM 1211L

Cross-Listed Course(s): CHEM 1211

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Program Restrictions: Honors Program, Honors Scholars Track **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic

CHEM 1211L - Principles of Chemistry I Laboratory (1 Credit Hour)

Laboratory course to accompany CHEM 1211. Students develop experimental techniques, safe lab practices, problem-solving, data analysis, recordkeeping, and written communication skills. STEM GPA Eligible Course.

Prerequisite(s): MATH 1111 >= C or MATH 1113 >= C or MATH 2011 >= C or MATH 2011H >= C

Corequisite(s): CHEM 1211 and CHEM 1211R

Core IMPACTS Requirement(s) Satisfied: Technology, Mathematics, and Sciences (STEM)

Lab Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

Additional Course Fee: Chemistry/Biochemistry Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

CHEM 1211R - Recitation – General Chemistry I (0 Credit Hours)

In General Chemistry I Recitation, students improve their understanding of chemistry through practice problems, quizzes, and group discussion. This course is designed as a supplement to the lecture course to help students further grasp the material through problem solving and interaction with their fellow students. No new material is introduced in this recitation, as it is designed for student success and review. Attendance and participation are required.

Prerequisite(s): MATH 1111

Corequisite(s): CHEM 1211 and CHEM 1211L

Lecture Hours: 0 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 1

Repeatability: May be repeated for credit up to 2 times.

Schedule Type (Primary): Lecture

CHEM 1212 - Principles of Chemistry II (3 Credit Hours)

Second course in a sequence for science majors. Topics include: solutions, acid-base, colligative properties, equilibrium, electrochemistry, kinetics, and descriptive chemistry. Students may not apply both CHEM 1151 and CHEM 1211 to satisfy the Technology, Mathematics and Sciences or Field of Study areas of Core IMPACTS requirements. Prerequisite includes meeting the departmental standard on the national ACS exam. STEM GPA Eligible Course.

Prerequisite(s): (MATH 1113 $\geq$ C or MATH 2011 $\geq$ C or MATH 2011H $\geq$ C) and CHEM 1211 $\geq$ C and CHEM 1211L $\geq$ C

Corequisite(s): CHEM 1212L and CHEM 1212R

Core IMPACTS Requirement(s) Satisfied: Technology, Mathematics, and Sciences (STEM)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

CHEM 1212H - Honors: Principles of Chemistry II (3 Credit Hours)

Second course in a sequence for science majors. Topics include: solutions, acid-base, colligative properties, equilibrium, electrochemistry, kinetics, and descriptive chemistry. Students may not apply both CHEM 1151 and CHEM 1211 to satisfy Core IMPACTS (Technology, Mathematics and Sciences; or Social Sciences) requirements. Prerequisites include meeting the departmental standard on the national ACS exam. This is an Honors course. STEM GPA Eligible Course.

Prerequisite(s): (MATH 1113 $\geq$ C or MATH 2011 $\geq$ C or MATH 2011H $\geq$ C) and CHEM 1211 $\geq$ C and CHEM 1211L $\geq$ C

Corequisite(s): CHEM 1212L

Cross-Listed Course(s): CHEM 1212

Lecture Hours: 3

Grade Mode: N - Normal (A, B, C, D, F)

Program Restrictions: Honors Program, Honors Scholars Track

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic

CHEM 1212L - Principles of Chemistry II Laboratory (1 Credit Hour)

Laboratory course to accompany CHEM 1212. Students develop experimental techniques, safe lab practices, problem-solving, data analysis, recordkeeping, and written communication skills. STEM GPA Eligible Course.

Prerequisite(s): CHEM 1211 $\geq$ C and CHEM 1211L $\geq$ C and (MATH 1113 $\geq$ C or MATH 2011 $\geq$ C or MATH 2011H $\geq$ C)

Corequisite(s): CHEM 1212 and CHEM 1212R

Core IMPACTS Requirement(s) Satisfied: Technology, Mathematics, and Sciences (STEM)

Lab Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

Additional Course Fee: Chemistry/Biochemistry Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

CHEM 1212R - Recitation – General Chemistry II (0 Credit Hours)

In General Chemistry II Recitation, students improve their understanding of chemistry through practice problems, quizzes, and group discussion. This course is designed as a supplement to the lecture course to help students further grasp the material through problem solving and interaction with their fellow students. No new material is introduced in this recitation, as it is designed for student success and review. Attendance and participation are required.

Prerequisite(s): CHEM 1211 and MATH 1113

Corequisite(s): CHEM 1212 and CHEM 1211L

Lecture Hours: 0 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 1

Repeatability: May be repeated for credit up to 2 times.

Schedule Type (Primary): Lecture

CHEM 1213 - Principles of Chemistry II Supplement (1 Credit Hour)

An introductory course focused on problem-solving skills covering topics addressed in general chemistry. This course is offered to support Principles of Chemistry II (CHEM 1212). Study methods and effective learning strategies are also explored.

Corequisite(s): CHEM1212

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

CHEM 1950 - Selected Topics (1 to 4 Credit Hours)

Concepts/topics in special areas of chemistry. **Prerequisite(s):** Permission of the instructor.

Lecture Hours: 1 to 4

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

CHEM 2410 - Chemistry of Organic and Biomolecules (4 Credit Hours)

A systematic examination of the properties and reactions of the major classes of organic compounds and their relevance to the metabolic roles of carbohydrates, lipids and proteins. Modern spectroscopic methods of structure determination will be included. STEM GPA Eligible Course

Prerequisite(s): CHEM 1211 $\geq$ C and CHEM 1212 $\geq$ C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Chemistry/Biochemistry Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

CHEM 2810 - Quantitative Analysis (5 Credit Hours)

Theories, principles and practice of volumetric, gravimetric and elementary instrumental analysis. STEM GPA Eligible Course

Prerequisite(s): CHEM 1212 >= C

Lecture Hours: 3 **Lab Hours:** 6

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

Additional Course Fee: Chemistry/Biochemistry Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

CHEM 2950 - Selected Topics (0 to 4 Credit Hours)

Concepts/topics in special areas of chemistry. Prerequisite(s): Permission of the instructor.

Lecture Hours: 0 to 4

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

CHEM 2990 - Introduction to Undergraduate Research (0 Credit Hours)

A course to introduce undergraduates to experience of research through a faculty mentored introductory project.

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Supervised Lab/Clinic

CHEM 3000 - Introduction to Nuclear Science (3 Credit Hours)

An introduction to nuclear models and structure, natural and artificial radioactivity, interactions of radiation with matter, nuclear reactions, neutron physics and reactors. Credit may not be earned for both CHEM 3000 and PHYS 3000.

Prerequisite(s): (MATH 2011 >= C or MATH 2011H >= C) and (PHYS 1112 >= C or PHYS 2212 >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

CHEM 3010 - Introduction to Nuclear Measurements (3 Credit Hours)

An introductory course on scintillation counters, semiconductor detectors, nuclear electronics, nuclear spectroscopy, counting statistics and shielding. Credit may not be earned for both CHEM 3010 and PHYS 3010.

Prerequisite(s): CHEM 3000 >= C or PHYS 3000 >= C

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-

one),Asynchronous Instruction,Practice Teaching,Internship/Practicum,Thesis,

Additional Course Fee: Chemistry/Biochemistry Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

CHEM 3020 - Application of Nuclear Science (3 Credit Hours)

A study of applications of nuclear science to include characterization of radiation, the effects of radiation and radioactive materials, dosimetry and dose calculations, radiation exposure and basic nuclear safety. Other topics may include nuclear reactors, criticality, poisons, neutron life cycle, isotopic dating, nuclear medicine and imaging, neutron activation work/tracers, and environmental radioactivity. Credit may not be earned for both CHEM 3020 and PHYS 3020.

Prerequisite(s): CHEM 3000 >= C or PHYS 3000 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervi Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Asynchronous Instruction,Practice Teaching,Internship/Practicum,Thesis,

CHEM 3411 - Organic Chemistry I (3 Credit Hours)

A study of the structure, nomenclature, properties, and reactivity of organic compounds with an emphasis on modern electronic and mechanistic theories. Spectroscopy is introduced. The associated lab course, CHEM 3411L, is a mandatory corequisite. STEM GPA Eligible Course.

Prerequisite(s): CHEM 1212 >= C and CHEM 1212L >= C

Corequisite(s): CHEM 3411L and CHEM 3411R

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CHEM 3411L - Organic Chemistry I Laboratory (1 Credit Hour)

A laboratory course that accompanies CHEM 3411 that explores common reactions and laboratory techniques, including spectroscopy.

Prerequisite(s): CHEM 1212 and CHEM 1212L

Corequisite(s): CHEM 3411 and CHEM 3411R

Lab Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Supervised Lab/Clinic

Additional Course Fee: Chemistry/Biochemistry Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

CHEM 3411R - Recitation – Organic Chemistry I (0 Credit Hours)

In Organic Chemistry I Recitation, students improve their understanding of chemistry through practice problems, quizzes, and group discussion. This course is designed as a supplement to the lecture course to help students further grasp the material through problem solving and interaction with their fellow students. No new material is introduced in this recitation, as it is designed for student success and review. Attendance and participation are required.

Prerequisite(s): CHEM 1212

Corequisite(s): CHEM 3411 and CHEM 3411L

Lecture Hours: 0 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 1

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: CP- Continuing Progress Courses

Schedule Type (Primary): Lecture

CHEM 3412 - Organic Chemistry II (3 Credit Hours)

A continuation of Organic Chemistry I. Mechanisms, synthesis, and spectroscopy are emphasized.

Prerequisite(s): CHEM 3411 >= C and CHEM 3411L >= C

Corequisite(s): CHEM 3412L and CHEM 3412R

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

CHEM 3412L - Organic Chemistry II Laboratory (1 Credit Hour)

The synthesis and characterization of organic compounds using advanced laboratory techniques. Students become familiar with synthetic techniques and characterization methods used in organic chemistry, and improve and extend their laboratory skills in handling solids and liquids. Students carry out stoichiometric calculations and perform standard laboratory procedures, such as weighing, quantitative liquid transfer, reflux procedures, gravity and suction filtration, recrystallization, and the determination of melting point and/or decomposition temperature of organic materials.

Prerequisite(s): CHEM 3411 >=C and CHEM 3411L >=C

Corequisite(s): CHEM 3412 and CHEM 3412R

Lab Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Supervised Lab/Clinic

Additional Course Fee: Chemistry/Biochemistry Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

CHEM 3412R - Recitation – Organic Chemistry II (0 Credit Hours)

In Organic Chemistry II Recitation, students improve their understanding of chemistry through practice problems, quizzes, and group discussion. This course is designed as a supplement to the lecture course to help students further grasp the material through problem solving and interaction with their fellow students. No new material is introduced in this recitation, as it is designed for student success and review. Attendance and participation are required.

Prerequisite(s): CHEM 3411

Corequisite(s): CHEM 3412 and CHEM 3412L

Lecture Hours: 0 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 1

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: CP- Continuing Progress Courses

Schedule Type (Primary): Lecture

CHEM 3551 - Introductory Biochemistry (3 Credit Hours)

Emphasizes the structure and function of biological molecules, enzymology, metabolism, and bioenergetics.

Prerequisite(s): (CHEM 3411 >= C and CHEM 3411L >= C) and (BIOL 1107 >= C and BIOL 1107L >= C)

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

CHEM 3600 - Introduction to Medicinal Chemistry (3 Credit Hours)

A study of the chemical mechanisms of action of the major drug classes, including those derived from natural products, with a particular emphasis on the organic chemistry that controls drug-receptor interactions, as well as drug uptake, distribution, metabolism, and toxicity. Modern drug discovery process from bench to clinical trials to manufacturing will also be examined.

Prerequisite(s): CHEM 3412 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

CHEM 3721 - Physical Chemistry I (3 Credit Hours)

A study of gases, first, second, and third laws of thermodynamics, thermochemistry, and chemical equilibria, followed by an introduction to solutions, electrolytes, and electrochemical cells.

Prerequisite(s): (PHYS 1112 >= C or PHYS 2212 >= C) and MATH 2012 >= C and CHEM 3411 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

CHEM 3723 - Physical Chemistry Laboratory (1 Credit Hour)

Introduction to the principles of physical chemistry in the laboratory. Topics covered typically encompass fundamentals of measurements, thermodynamics, chemical kinetics, and spectroscopy.

Prerequisite(s): CHEM 3411 >= C

Corequisite(s): CHEM 3721

Lab Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Supervised Lab/Clinic

Additional Course Fee: Chemistry/Biochemistry Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

CHEM 3810 - Advanced Organic Chemistry (3 Credit Hours)

An examination of the principles of modern physical and synthetic organic chemistry with an emphasis on mechanism, mechanism elucidation methods, chemoselective, regioselective, and stereoselective transformations.

Prerequisite(s): CHEM 3412 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

CHEM 3820 - Laboratory Management and Safety (2 Credit Hours)

Formal instruction and practical experience in all phases of assisting with instructional laboratories. Safety instruction includes proper use of protective equipment and fire extinguishers, and CPR training.

Prerequisite(s): CHEM 2410 >= D or CHEM 3411 >= C

Lecture Hours: 1 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

CHEM 3950 - Selected Topics (1 to 4 Credit Hours)

Concepts/topics in special areas of chemistry. Prerequisite(s): Permission of the instructor.

Lecture Hours: 1 to 4

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching

CHEM 3990 - Undergraduate Research (0 to 3 Credit Hours)

Faculty mentored undergraduate research at an intermediate level.

Lab Hours: 0 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

Additional Course Fee: Chemistry/Biochemistry Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

CHEM 4100 - Forensic Chemistry (4 Credit Hours)

Application of chemical principles to forensic science including acquisition, interpretation, and validation of data and communication of results to nonscientists. Topics include legal, statistical, and quality control principles in the discipline; drugs and poisons, fire/explosion; firearm analysis; fingerprint analysis; and fiber/hair analysis.

Prerequisite(s): CHEM 2810 >= C or CHEM 3412 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

Additional Course Fee: Chemistry/Biochemistry Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

CHEM 4130 - Water Chemistry (3 Credit Hours)

Study of how water quality is monitored and maintained and the effect of water quality in the home, industry, and the environment. The course includes a study of typical impurities, including how these impurities are detected, removed or mitigated, and how these impurities are related to problems such as corrosion and toxicity.

Prerequisite(s): CHEM 1212 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

CHEM 4210 - Advanced Inorganic Chemistry (3 Credit Hours)

A study of advanced topics in inorganic chemistry including molecular orbital theory, coordination chemistry, descriptive chemistry of the elements, and atomic structure.

Prerequisite(s): CHEM 3412 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

CHEM 4410 - Heterocyclic and Natural Product Chemistry (3 Credit Hours)

An in-depth exploration of the structure, synthesis, nomenclature, and reactivity of heterocyclic compounds, focusing on key classes such as azoles (including pyrazoles, imidazoles, and triazoles), pyridines, indoles, quinolines, and other vital heterocyclic frameworks. Emphasis is placed on understanding the mechanisms and applications of name reactions in heterocyclic synthesis, including the Fischer indole synthesis, Hantzsch pyridine synthesis, Conrad-Limpach synthesis, and Knorr pyrrole synthesis. The course also comprehensively studies natural products, examining their biosynthetic pathways, structural diversity, and critical role in drug discovery and development. In the laboratory component, students synthesize, purify, and characterize heterocyclic and natural product compounds, gaining hands-on experience with modern synthetic techniques and advanced analytical methods.

Prerequisite(s): CHEM 3412 >= C and CHEM 3412L >= C

Lecture Hours: 2 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Chemistry/Biochemistry Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

CHEM 4450 - Advanced Organic Chemistry: Synthesis (3 Credit Hours)

This course will examine the techniques and reactions commonly applied to the design of synthesis of complex organic compounds. This will include retrosynthetic analysis, common synthons, masked functionalities, umpolung strategies, functional group transformations, bond-forming reactions, and conformational and stereochemical aspects. Emphasis will be placed on application to medicinally important targets.

Prerequisite(s): CHEM 3412 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

CHEM 4460 - Advanced Organic Chemistry: Mechanisms (3 Credit Hours)

An examination of the principles of modern physical organic chemistry with an emphasis on mechanism, mechanism elucidation methods, chemoselective, regioselective, and stereoselective transformations.

Prerequisite(s): CHEM 3412 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

CHEM 4551 - Biochemistry I: Physical Biochemistry (3 Credit Hours)

The physical chemistry of macromolecules. An examination of the chemical behavior of amino acids, proteins, lipids, carbohydrates, and nucleic acids, emphasizing the relationship between structure and physiological function. BIOL 1107 highly recommended.

Prerequisite(s): CHEM 1212 >= C and CHEM 3412 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

CHEM 4552 - Biochemistry II: Bioenergetics and Metabolism (3 Credit Hours)

A study of the metabolism of carbohydrates, lipids, amino acids, nucleotides, and related compounds; the regulation and energetics of the metabolic pathways; and oxidative and photophosphorylation.

Prerequisite(s): CHEM 4551 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

CHEM 4553 - Biochemistry Laboratory (1 Credit Hour)

A laboratory course exploring research techniques and principles of biological chemistry.

Prerequisite(s): CHEM 4551 >= C

Lab Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

Additional Course Fee: Chemistry/Biochemistry Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

CHEM 4600 - Physical Chemistry II - Quantum Mechanics (3 Credit Hours)

Introduction to the theories and applications of chemical kinetics. Introduction to quantum mechanics with applications to simple systems. Principles of measurements in quantum theory through spectroscopy and the origin of selection rules.

Prerequisite(s): CHEM 3721 >= C and MATH 3020 >= C

Cross-Listed Course(s): PHYS 4600

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

CHEM 4610 - Rational Drug Design (3 Credit Hours)

An introduction to drug target selection, lead compound discovery, and application of structure-activity relationships and computational chemistry towards design and optimization of lead compounds and their derivatives. Includes synthesis and optimization of lead compounds, case studies, high throughput screening assays, and quantitative cell line based bioassays.

Prerequisite(s): (CHEM 3412 >= C) and (CHEM 4620 >= C or CHEM 4551 >= C or BIOL 3400 >= C)

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

CHEM 4620 - Principles of Medicinal Chemistry (3 Credit Hours)

A study of the chemical interactions of the major drug classes, including those derived from natural products, with the drug targets. Drug uptake, distribution, metabolism and toxicity for the major drug classes is also studied.

Prerequisite(s): CHEM 3412 >= C and CHEM 3412L >= C and CHEM 4410 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

CHEM 4640 - Modern Drug Discovery and Development (3 Credit Hours)

The modern drug discovery process including introductory fundamentals, high throughput screening-assisted target/lead discovery and validation, preclinical trials, Investigational New Drug (IND) applications, clinical trials and commercialization will be reviewed.

Prerequisite(s): CHEM 3412 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

CHEM 4700 - Integrated Laboratory (3 Credit Hours)

A laboratory course combining computational, synthetic, and analytical skills commonly used in physical chemistry, organic chemistry and inorganic chemistry.

Prerequisite(s): CHEM 2810 >= C and CHEM 3412 >= C and (MATH 2011 >= C or MATH 2011H >= C)

Lecture Hours: 1 **Lab Hours:** 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

Additional Course Fee: Chemistry/Biochemistry Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

CHEM 4723 - Computational Chemistry (3 Credit Hours)

The foundations for the application of computational simulations based on physical concepts to investigate and understand biological systems at the molecular level. Topics include: various areas of physics, with emphasis on classical mechanics and molecular quantum mechanics. While the mathematics is not onerous, students should have a working understanding of quantum and classical mechanics, electrostatics and magnetism, as well as linear algebra and calculus. No prior knowledge of biology or biochemistry is required, only a commitment to learning fundamental principles and an alternative approach for thinking of complex systems. Emphasis is on fundamental Quantum and Classical methods behind the simulation procedures and simulation methods. At the completion of the course, students will: 1) Understand and perform molecular simulations with Quantum Mechanics methods; 2) Understand and perform molecular simulations with Molecular Mechanics methods; 3) Perform calculations on small molecules and biomolecules; and 4) Become familiar with high performance computing (HPC) environments.

Prerequisite(s): CHEM 3721

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3

Repeatability: May be repeated for credit one time.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

CHEM 4800 - Advanced Seminar (1 Credit Hour)

An oral presentation of topics of current chemistry interests and an introduction to preparation of technical chemistry presentations using chemical databases to retrieve the scientific information.

Prerequisite(s): CHEM 3721 >= C or CHEM 4551 >= C

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

CHEM 4840 - Instrumental Analysis (4 Credit Hours)

Theories and applications of instrumental methods of analysis. Spectroscopic techniques (including atomic absorption, ultraviolet/visible, infrared, and fluorescence spectroscopy), separations and electrochemistry will be discussed.

Prerequisite(s): CHEM 2810 >= C and CHEM 3412 >= C

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Chemistry/Biochemistry Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

CHEM 4950 - Selected Topics (1 to 4 Credit Hours)

Designed to explore areas of chemistry not in the normal curriculum. Topics may include heterocyclic, organometallic, medicinal, or forensic chemistry.

Prerequisite(s): CHEM 3412 >= C

Lecture Hours: 1 to 4

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

CHEM 4990 - Undergraduate Research (0 to 3 Credit Hours)

Faculty mentored undergraduate research at an advanced level. Generally the course should be taken for 1-2 credits except for extenuating circumstances.

Lab Hours: 0 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Chemistry/Biochemistry Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

CHEM 4993 - Research Thesis (1 Credit Hour)

Continuation of directed undergraduate research experiences and independent study in a specialized area of chemistry that results in a comprehensive, written, formal document disseminating research results that is evaluated by a faculty panel using a departmental rubric. Instructor permission for this course assumes a suitable agreement between the faculty member and student concerning the remaining expected research outcomes necessary for the comprehensive report.

Prerequisite(s): CHEM 4990 >= C

Lab Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit, In Progress

Schedule Type (Primary): Directed Study (one-to-one)

Additional Course Fee: Chemistry/Biochemistry Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

CHEM 6170 - Techniques in Biomolecular Science (3 Credit Hours)

This course will introduce the main features and principle of operation of a variety of analysis techniques, but focus on the application of the technique and interpretation of data.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

CHEM 6450 - Advanced Organic Chemistry- Synthesis (3 Credit Hours)

This course will examine the techniques and reactions commonly applied to the design of synthesis of complex organic compounds. This will include retrosynthetic analysis, common synthons, masked functionalities, umpolung strategies, functional group transformations, bond-forming reactions, and conformational and stereochemical aspects. Emphasis will be placed on application to medically important targets. Students enrolled for graduate credit will design multistep synthetic schemes, interpret primary chemical literature related to synthesis and effectively utilize professional resources and databases.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

CHEM 6453 - Advanced Organic Chemistry- Synthesis Advanced Topics (1 Credit Hour)

This course is intended for graduate students who completed an appropriate advanced organic synthesis course as an undergraduate. This course reviews chemical literature, professional resources, and characteristic reactions in advanced organic synthesis to fill the gap to a graduate level experience.

Prerequisite(s): CHEM 4450

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

CHEM 6610 - Rational Drug Design (3 Credit Hours)

An introduction to drug target selection, lead compound discovery, and application of structure-activity relationships and computational chemistry towards design and optimization of lead compounds and their derivatives. Includes synthesis and optimization of lead compounds, case studies, high throughput screening assays, and quantitative cell line based bioassays. Students enrolled for graduate credit will be required to review scientific literature and case studies related to the course topics.

Lecture Hours: 2 **Lab Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

CHEM 6613 - Rational Drug Design Advanced Topics (1 Credit Hour)

This course is intended for graduate students who completed an appropriate advanced drug design course as an undergraduate. This course reviews chemical literature and case studies in drug design and provides a hands-on environment to use modern computational tools for drug design.

Prerequisite(s): CHEM 4610

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

CHEM 6620 - Principles of Medicinal Chemistry (3 Credit Hours)

A study of the chemical interactions of the major drug classes, including those derived from natural products, with the drug targets. Drug uptake, distribution, metabolism and toxicity for the major drug classes is also studied. Students enrolled for graduate credit will be required to review scientific literature and case studies related to the course topics.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

CHEM 6623 - Principles of Medicinal Chemistry Advanced Topics (1 Credit Hour)

This course is intended for graduate students who completed an appropriate advanced medicinal chemistry course as an undergraduate. This course reviews chemical interactions of major drug classes including bioavailability, pharmacodynamics, and pharmacokinetics. An emphasis of the course is the use of the chemical literature to understand drug classes and the relationship of drugs and drug classes to chemical structure.

Prerequisite(s): BIOL 6620 or CHEM 4620

Cross-Listed Course(s): BIOL 6623

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

CHEM 6630 - Natural Product Chemistry (3 Credit Hours)

An introduction to natural product chemistry; source of natural products, classification based on secondary metabolites, identification and isolation techniques. This course will complement the basic knowledge necessary to students in diverse fields, such as organic chemistry, agricultural chemistry, biochemistry, health sciences and pharmacy.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

CHEM 6720 - Principles of Pharmacology (3 Credit Hours)

This course will examine with basic principles of drug action including receptor theory, pharmacodynamics and pharmacokinetics. The basic physiology and pathophysiology of several organ systems will be examined, and the mechanisms of action of the most commonly used drugs to treat these conditions will be studied. Students enrolled for graduate credit will be required to review scientific literature and case studies related to course topics.

Cross-Listed Course(s): BIOL 6720

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Degree Restrictions:** Master of Science

Schedule Type (Primary): Lecture

CHEM 6723 - Pharmacology Advanced Topics (1 Credit Hour)

This course is intended for graduate students who have completed an appropriate pharmacology course as an undergraduate. This course reviews scientific literature and case studies in pharmacology.

Prerequisite(s): BIOL 4720 >= C

Cross-Listed Course(s): BIOL 6723

Lecture Hours: 1 **Contact Hours:** 1

Grade Mode: Normal (A, B, C, D, F)

Degree Restrictions: MS-Master of Science with a Major in Biomolecular Science

Schedule Type (Primary): Lecture

CHEM 6800 - Graduate Analytical and Bioanalytical Core (3 Credit Hours)

This course is to emphasize the instrumental and theory of instrumentation within the field of analytical and bioanalytical chemistry. The topics of the course include statistical treatment of data, electronics, chemical equilibrium, mass spectrometry, spectroscopy, and general instrumental analysis. This course will emphasize and determine structure, and chemical function of biological molecules utilizing current instrumental techniques and methods. The topics of the course include analytical instrumental methods, biological chemical function, structure related to function of biological chemistries, and instrumentation and methods in chemical biology.

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

CHEM 6950 - Selected Topics (1 to 4 Credit Hours)

A variable content course intended to meet the needs and interests of graduate students in selected areas of chemistry.

Prerequisite(s): Permission of instructor.

Lecture Hours: 1 to 4

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervi

Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

CHEM 6970 - Introduction to Research (2 Credit Hours)

Foundational activities associated with pursuing biomolecular research including safety training, completing rotation process of selecting a research mentor, establishing a thesis committee, attending seminars conducted by faculty and external speakers, and presenting a seminar on a topic appropriate to biomolecular science.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

CHEM 6980 - Research Proposal Development (3 Credit Hours)

Instruction in professional writing for research proposals. Development and defense of research problem and written proposal with oral defense to thesis committee. Conducting of research pilot studies and method development appropriate to thesis research.

Prerequisite(s): BIOL 6970 or CHEM 6970

Lecture Hours: 1 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Seminar - Small Group

CHEM 6990 - Master's Research (1 to 9 Credit Hours)

Research while enrolled for a masters degree under the direction of faculty members. This course is typically taken more than one time and culminates in the final semester in the preparation and defense of a MS thesis.

Prerequisite(s): BIOL 6980 or CHEM 6980

Lab Hours: 1 to 9

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Supervised Lab/Clinic

CHNS 1001 - Elementary Chinese I (3 Credit Hours)

This course is an elementary Mandarin Chinese course designed for students with no prior knowledge of Chinese. It provides a foundation for all four language skills, (i.e., listening, speaking, reading, and writing). Not open to native speakers. Heritage speakers and students who had Chinese in high school should take the placement exam. Students must earn a C or better in order to take CHNS 1002.

Core IMPACTS Requirement(s) Satisfied: Arts, Humanities, and Ethics (Humanities)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

CHNS 1002 - Elementary Chinese II (3 Credit Hours)

A continuation of CHNS 1001. This course offers continued intensive study of modern spoken and written Chinese, stressing the four basic language skills of speaking, reading, writing, and listening comprehension. Not open to native speakers. Heritage speakers and students who had Chinese in high school should take the placement exam. Students must earn a C or better in order to take CHNS 2001.

Prerequisite(s): CHNS 1001 >= C

Core IMPACTS Requirement(s) Satisfied: Arts, Humanities, and Ethics (Humanities)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

CHNS 2001 - Intermediate Chinese I (3 Credit Hours)

This course is an intermediate course designed for students who have successfully completed CHNS 1001 and CHNS 1002. This course will continue the development of speaking, writing, reading, and listening skills. No native speakers allowed in the class. Heritage speakers should take the placement exam. Students must earn a C or better in order to take CHNS 2001.

Prerequisite(s): CHNS 1002 >= C

Core IMPACTS Requirement(s) Satisfied: Arts, Humanities, and Ethics (Humanities)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

CHNS 2002 - Intermediate Chinese II (3 Credit Hours)

This course is an intermediate course that will continue to intensify the development of speaking, writing, reading, and listening skills and cultural awareness. Not open to native speakers. Heritage speakers should take the placement exam. Students must earn a C or better in order to take courses at the 3000/4000 level.

Prerequisite(s): CHNS 2001 >= C

Core IMPACTS Requirement(s) Satisfied: Arts, Humanities, and Ethics (Humanities)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

CHNS 2950 - Chinese Studies (3 Credit Hours)

This course is a variable content course taught in English that will center on China, or a specific issue dealing with Chinese culture. It is an interdisciplinary introduction to Chinese society and culture from earliest times to the present. Focus is on the formative thoughts and the overall development of Chinese culture and society. May not be used to satisfy foreign language requirement.

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

CTRS 7100 - Grant Writing for Clinical and Translational Science (2 Credit Hours)

This course is designed to offer an overview of scientific grant writing for clinical and translational science professionals. Topics covered will include an introduction of clinical and translational research, types of funding and funding agencies, determination of key personnel, elements of a proposal, budget development, necessary forms and formatting, biosketch creation, grantsmanship, and the review process.

Lecture Hours: 2

Repeatability: May be repeated for credit one time.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MCTS_CTS, MSEPD_EPID

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CTRS 7210 - Methods for Decision Making in Clinical Practice (3 Credit Hours)

This course is designed to aid in the determination and application of appropriate statistical methods for decision making in clinical practice including logistic regression, survival analysis, and reliability and validity analyses; use of statistical software for application of the statistical methods and correct interpretation of the results; and review of applicable literature and understanding of the methods, results and conclusions presented.

Prerequisite(s): STAT 7020 >= C

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Program Restrictions: MCTS_CTS, CERM_CTS

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CTRS 7220 - Economic Approaches to Clinical Decision Making (3 Credit Hours)

This course will provide learners with an in-depth exposure to qualitative and quantitative approaches to the role health economics plays in clinical decision making at a local and global level. Students will be exposed to contemporary approaches to clinical decision making informed not only by clinical evidence, but also by health economic and policy perspectives. This course will provide learners with an in-depth exposure to qualitative and quantitative approaches to the role health economics plays in clinical decision making at a local and global level. Students will be exposed to contemporary approaches to clinical decision making informed not only by clinical evidence, but also by health economic and policy perspectives.

Prerequisite(s): STAT 7020 >= C

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Program Restrictions: MCTS_CTS, CERM_CTS

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CTRS 7900 - Capstone Project (1 to 3 Credit Hours)

The student will apply research design and methodology for a clinical and translational research question of interest. The course may be repeated as necessary until the student completes the research.

Contact Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MCTS_CTS

Schedule Type (Primary): Directed Study (one-to-one)

CLSC 3220 - Introduction to Clinical Laboratory Science Practice (3 Credit Hours)

Provides an introduction to the clinical laboratory science profession. This course covers lab safety, laboratory mathematics, basic lab equipment, lab information systems, quality control, laboratory accreditation and regulation, phlebotomy, and urinalysis and body fluids.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Undergraduate Semester **Program Restrictions:** BSCLS_CLS-Clinical Laboratory Sciences

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

CLSC 3312 - Medical Terminology (2 Credit Hours)

The knowledge of medical terminology is fundamental for health professionals. This course is offered at the beginning of this curriculum so that it may be used as a tool in other advanced coursework. The degree of competency required will be related to the main objectives of the course: spelling, use of correct word forms in context (English as well as medical terms), and using resource materials with ease when unfamiliar terms are encountered.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: BS in Clinical Lab Science

Schedule Type (Primary): Asynchronous Instruction

CLSC 3640 - Clinical Biochemistry (4 Credit Hours)

Provides theoretical knowledge of the principles of analytical techniques and methodologies used in the clinical chemistry laboratories. Emphasizes biochemical aspects, clinical correlation and significance with respect to cellular processes.

Lecture Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Undergraduate Semester **Program Restrictions:** BSCLS_CLS-Clinical Laboratory Sciences, BSMT_MEDT-Medical Technology

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CLSC 3645 - Clinical Biochemistry Laboratory (2 Credit Hours)

Provides students with practical experience of various methodologies used in the clinical chemistry and immunology laboratories in the analysis of blood and other body fluids. Such methodologies include spectrophotometric analysis, electrophoresis, immunoassays, and chromatography.

Lab Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Undergraduate Semester **Program Restrictions:**

BSCLS_CLS-Clinical Laboratory Sciences

Schedule Type (Primary): Supervised Lab/Clinic

Additional Course Fee: Clinical Laboratory Science Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 200

CLSC 4440 - Clinical Microbiology (4 Credit Hours)

An in-depth study of the clinically relevant infectious agents (bacteria, fungi, parasites, and viruses) encountered in the clinical microbiology laboratory. Special emphasis on the infectious disease process, identification procedures, and epidemiological significance of these infectious agents.

Lecture Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sciences **Major Restrictions:** CLS- Clinical Laboratory Science **Course Level Restrictions:** Undergraduate Semester **Department Restrictions:** Department of Allied Health Professions **Degree Restrictions:**

BSCLS- Bachelor of Science in Clinical Laboratory Science **Program Restrictions:** BSCLS_CLS-Clinical Laboratory Sciences

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CLSC 4445 - Clinical Microbiology Laboratory (2 Credit Hours)

Emphasis on procedures and techniques used to isolate and identify clinically important infectious agents, including bacteria, fungi, parasites, and viruses.

Corequisite(s): CLSC4440

Lab Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Undergraduate Semester **Program Restrictions:**

BSCLS_CLS-Clinical Laboratory Sciences

Schedule Type (Primary): Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

CLSC 4480 - Clinical Microbiology Internship (3 Credit Hours)

Practical application of clinical microbiology techniques including areas of quality assurance, safety practices, data interpretation, instrumentation, library research, professional behavior, and introduction to management practices.

Prerequisite(s): CLSC 4440 and CLSC 4445

Contact Hours: 160

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Undergraduate Semester **Degree Restrictions:** BS in Clinical Lab Science

Schedule Type (Primary): Internship/Practicum

CLSC 4501 - Seminar in CLS Evidence-Based Practice (1 Credit Hour)

This course examines how to perform a literature evaluation of current research in the profession. The resources needed to conduct a scholarly investigation are studied including the examination of findings and the significance for practice.

Contact Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Undergraduate Semester **Program Restrictions:** BSCLS_CLS-Clinical Laboratory Sciences
Schedule Type (Primary): Seminar **Schedule Type (Additional):** Small Group, Asynchronous Instruction

CLSC 4540 - Clinical Immunology (4 Credit Hours)

Clinical immunology is the study of diseases caused by disorders of the immune system. This course is designed to give students an understanding of the immune disease processes and immune responses in the context of infections, malignancies, and autoimmune disorders. It also involves diseases of other systems, where immune reactions play a part in the pathology and clinical features. Students will learn different laboratory testing procedures used to detect immune system disease and monitor the efficacy of treatment. A series of lectures covers course components; additional materials are presented through clinical laboratories that students perform coupled with clinical correlations that focus on clinically applied immunological concepts. An effort has been made to increase clinical relevance and problem-solving skills through an discussion board topics and other interactive classroom assignments.

Prerequisite(s): CLSC 3640 and CLSC 3645

Lecture Hours: 4

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Undergraduate Semester **Program Restrictions:** BSCLS_CLS-Clinical Laboratory Sciences

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CLSC 4680 - Clinical Biochemistry/Immunology Internship (5 Credit Hours)

Provides students practical experience of working in the clinical chemistry laboratory under the supervision of a medical technologist: specimen processing, analysis and reporting of patient test results.

Prerequisite(s): CLSC 3640 and CLSC 3645

Contact Hours: 240

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Undergraduate Semester **Program Restrictions:** BSCLS_CLS-Clinical Laboratory Sciences

Schedule Type (Primary): Internship/Practicum

CLSC 4740 - Clinical Immunohematology (4 Credit Hours)

Application of basic immunological concepts to the study of red cell antigens and antibodies in relation to compatibility testing for transfusion of blood products. Include discussions on Blood Bank organizations and regulations, genetic inheritance of blood groups, special techniques, AIHA, HDN, blood components, donors and blood collection, quality control, serological testing of blood products, and future trends in Blood Banking.

Prerequisite(s): CLSC 3640 and CLSC 3645

Lecture Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sciences **Major Restrictions:** CLS- Clinical Laboratory Science **Course Level Restrictions:** Undergraduate Semester **Department Restrictions:** Department of Allied Health Professions **Degree Restrictions:** BSCLS- Bachelor of Science in Clinical Laboratory Science **Program Restrictions:** BSCLS_CLS-Clinical Laboratory Sciences

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CLSC 4745 - Clinical Immunohematology Laboratory (2 Credit Hours)

Laboratories include red cell antigens and antibodies in relation to compatibility testing for transfusion of blood products, special techniques. AIHA, HDN, blood components, donors and blood collection, quality control, and serological testing of blood.

Corequisite(s): CLSC4740

Lab Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Undergraduate Semester **Degree Restrictions:** BS in

CLSC 4780 - Clinical Immunohematology Internship (3 Credit Hours)

Clinical course puts theory to continued practice performing tests on patient specimens and reporting results, completing cross matches, preparing components for issue, identifying multiple antibodies, processing blood components, and interviewing and drawing donors.

Prerequisite(s): CLSC 4740 >= C and CLSC 4745 >= C

Contact Hours: 160

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Undergraduate Semester **Degree Restrictions:** BS in Clinical Lab Science

Schedule Type (Primary): Internship/Practicum

CLSC 4840 - Clinical Hematology (4 Credit Hours)

Study of blood cell derivation, maturation, physiology, and function with emphasis on normal and abnormal blood and bone marrow morphology. Correlation of hematological and hemostasis tests with other clinical findings in the diagnosis of various blood dyscrasias and hemostatic disorders are discussed and emphasized with case study materials. Includes the study of body fluids.

Lecture Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Undergraduate Semester **Program Restrictions:** BSCLS_CLS-Clinical Laboratory Sciences, BSMT_MEDT-Medical Technology

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CLSC 4845 - Clinical Hematology Laboratory (2 Credit Hours)

Laboratory experiences are conducted in hematology and hemostasis. Test results are correlated with other clinical findings in the diagnosis of various blood dyscrasias and hemostatic disorders. Includes the study of body fluids with related laboratory exercises.

Corequisite(s): CLSC4840

Lab Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Undergraduate Semester **Program Restrictions:** BSCLS_CLS-Clinical Laboratory Sciences, BSMT_MEDT-Medical Technology

Schedule Type (Primary): Supervised Lab/Clinic

CLSC 4880 - Clinical Hematology Internship (3 Credit Hours)

Practical application in techniques utilized in a clinical hematology, fluids, and hemostasis laboratory, also including quality assurance issues, problem solving skills, phlebotomy, and relative management issues.

Prerequisite(s): CLSC 4840 >= C and CLSC 4845 >= C

Contact Hours: 160

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Undergraduate Semester **Degree Restrictions:** BS in Clinical Lab Science

Schedule Type (Primary): Internship/Practicum

CLSC 4903 - Clinical Laboratory Science Review (3 Credit Hours)

A comprehensive review of the clinical laboratory science profession.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Major Restrictions:** Clinical Laboratory Science **Course Level Restrictions:**

Undergraduate Semester **Degree Restrictions:** BS in Clinical Lab Science

Schedule Type (Primary): Asynchronous Instruction

CLSC 4940 - Clinical Molecular Methods (3 Credit Hours)

This course starts with a historical overview of some breakthrough discoveries that contributed to the establishment of molecular diagnostics. It focuses on molecular testing terminology and nucleic acids' qualities that are important in designing molecular procedures. The course covers applications of molecular testing by focusing on nucleic acids target and signal amplification techniques currently approved by the FDA for infectious disease testing, including blood donor screening. The course also focuses on molecular testing in cancer, pharmacogenomics, and high-throughput technologies.

Prerequisite(s): CLSC 3640 and CLSC 3645

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Undergraduate Semester **Program Restrictions:**

BSCLS_CLS-Clinical Laboratory Sciences

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CLSC 4945 - Clinical Molecular Methods Laboratory (2 Credit Hours)

This course provides students with practical experience of various techniques used in the molecular biology laboratory with emphasis on nucleic acid isolation procedures, quantification, PCR and gel electrophoresis. The focus is on quality control measures unique for the molecular laboratory and prescribed by the Clinical Laboratory Standards Institute. The goal is to develop manual and analytical skills which will prepare the students for molecular analysis on clinical samples.

Corequisite(s): CLSC4940

Lab Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Undergraduate Semester **Program Restrictions:**

BSCLS_CLS-Clinical Laboratory Sciences

Schedule Type (Primary): Supervised Lab/Clinic

CLSC 4999 - CLS Clinical Practicum (0 Credit Hours)

This course is for clinical students who need continued enrollment while completing clinical rotations required for their BS in Clinical Laboratory Science and there are no other remaining BS-CLS courses to register for during a particular semester.

Repeatability: May be repeated for credit up to three times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: College of Allied Health Sci **Program Restrictions:** BSCLS_CLS-Clinical Laboratory Sciences

Schedule Type (Primary): Internship/Practicum

CLSC 6220 - Introduction to Clinical Laboratory Science Practice (3 Credit Hours)

Provides an introduction to the clinical laboratory science profession. This course covers safety, laboratory mathematics, basic lab equipment, lab information systems, quality control, laboratory accreditation and regulation, phlebotomy and urinalysis and body fluids. Advance competencies are required in this course.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Graduate Semester **Program Restrictions:**

CLSC 6312 - Medical Terminology (2 Credit Hours)

The knowledge of medical terminology is fundamental for health professionals. This course is offered at the beginning of this curriculum so that it may be used as a tool in other advanced coursework. The degree of competency required will be related to the main objectives of the course: spelling, use of correct word forms in context (English as well as medical terms), and using resource materials with ease when unfamiliar terms are encountered.

Lecture Hours: 2

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Master of Health Sci in CLS

Schedule Type (Primary): Asynchronous Instruction

CLSC 6440 - Clinical Microbiology (4 Credit Hours)

An in-depth study of the clinically relevant infectious agents (bacteria, fungi, parasites, and viruses) encountered in the clinical microbiology laboratory. Special emphasis is placed on the infectious disease process, identification procedures, and epidemiological significance of these infectious agents. Students are expected to perform critical evaluations of clinical cases and/or scientific papers and additional advanced practice competencies in related content area.

Lecture Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Graduate Semester **Program Restrictions:**

MHSCLS_CLS-Clinical Laboratory Science

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CLSC 6445 - Clinical Microbiology Laboratory (2 Credit Hours)

Emphasis on procedures and techniques used to isolate and identify clinically important infectious agents, including bacteria, fungi, parasites, and viruses. The student will be expected to perform critical evaluations of clinical cases and/or scientific papers and additional advanced practice competencies in related content area.

Corequisite(s): CLSC6440

Lab Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Graduate Semester **Program Restrictions:**

MHSCLS_CLS-Clinical Laboratory Science

Schedule Type (Primary): Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

CLSC 6640 - Clinical Biochemistry (4 Credit Hours)

Prerequisites: Organic Chemistry, MHS program enrollment. Course provides theoretical knowledge of the principles of analytical techniques and methodologies used in the clinical chemistry laboratories. Emphasizes biochemical aspects, clinical correlation and significance with respect to cellular processes. The student will be expected to perform critical evaluations of clinical cases and/or scientific papers and additional advanced practice competencies in related content area.

Lecture Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Graduate Semester **Program Restrictions:**

MHSCLS_CLS-Clinical Laboratory Science

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CLSC 6645 - Clinical Biochemistry Laboratory (2 Credit Hours)

Provides students with practical experience of various methodologies used in the clinical chemistry and immunology laboratories in the analysis of blood and other body fluids. Such methodologies include spectrophotometric analysis, electrophoresis, immunoassays, and chromatography. The student will be expected to perform critical evaluations of clinical cases and/or scientific papers and additional advanced practice competencies in related content area.

Corequisite(s): CLSC6640

Lab Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Graduate Semester **Program Restrictions:**

MHSCLS_CLS-Clinical Laboratory Science

Schedule Type (Primary): Supervised Lab/Clinic

Additional Course Fee: Clinical Laboratory Science Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 200

CLSC 6740 - Clinical Immunohematology (4 Credit Hours)

Application of basic immunological concepts to the study of red cell antigens and antibodies in relation to compatibility testing for transfusion of blood products. Include discussions on blood bank organizations and regulations, genetic inheritance of blood groups, special techniques, AIHA, HDN, blood components, donors and blood collection, quality control, serological testing of blood products, and future trends in blood banking. The student will be expected to perform critical evaluations of clinical cases and/or scientific papers and additional advanced practice competencies in related content area.

Prerequisite(s): CLSC 6640 and CLSC 6645

Lecture Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sciences **Course Level Restrictions:** Graduate Semester **Program Restrictions:**

MHSCLS_CLS-Clinical Laboratory Science, MHS_CLS-Clinical Laboratory Science

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CLSC 6745 - Clinical Immunohematology Laboratory (2 Credit Hours)

Prerequisites: Concurrent enrollment in CLSC 6740. Laboratories include red cell antigens and antibodies in relation to compatibility testing for transfusion of blood products, special techniques. AIHA, HDN, blood components, donors and blood collection, quality control, and serological testing of blood. The students will be expected to perform critical evaluations of clinical cases and/or scientific papers and additional advanced practice competencies in related content area.

Corequisite(s): CLSC6740

Lab Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Graduate Semester **Program Restrictions:**

MHSCLS_CLS-Clinical Laboratory Science

Schedule Type (Primary): Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

CLSC 6840 - Clinical Hematology (4 Credit Hours)

Study of blood cell derivation, maturation, physiology, and function with emphasis on normal and abnormal blood and bone marrow morphology. Correlation of hematological and hemostasis tests with other clinical findings in the diagnosis of various blood dyscrasias and hemostatic disorders are discussed and emphasized with case study materials. Includes the study of body fluids. The student will be expected to perform critical evaluations of clinical cases and/or scientific papers and additional advanced practice competencies in related content area.

Prerequisite(s): CLSC 6640 and CLSC 6645

Lecture Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Graduate Semester **Program Restrictions:**

MHSCLS_CLS-Clinical Laboratory Science

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CLSC 6845 - Clinical Hematology Laboratory (2 Credit Hours)

Laboratory experiences are conducted in hematology and hemostasis. Tests results are correlated with other clinical findings in the diagnosis of various blood dyscrasias and hemostatic disorders. Includes the study of body fluids with related laboratory exercises. The student will be expected to perform critical evaluations of clinical cases and/or scientific papers and additional advanced practice competencies in related content area.

Corequisite(s): CLSC6840

Lab Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Graduate Semester **Program Restrictions:**

MHSCLS_CLS-Clinical Laboratory Science

Schedule Type (Primary): Supervised Lab/Clinic

CLSC 7480 - Clinical Microbiology Internship (3 Credit Hours)

Practical application of clinical microbiology techniques including areas of quality assurance, safety practices, data interpretation, instrumentation, library research, professional behavior, and management practices. The students will be expected to perform critical evaluations of clinical cases and/or scientific papers and additional advanced practice competencies in related content area.

Prerequisite(s): CLSC 6440 and CLSC 6445

Contact Hours: 160

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Graduate Semester **Program Restrictions:**

MHSCLS_CLS-Clinical Laboratory Science, MHS_CLS-Clinical Laboratory Science

Schedule Type (Primary): Asynchronous Instruction **Schedule Type (Additional):** Internship/Practicum

CLSC 7540 - Clinical Immunology (4 Credit Hours)

Clinical immunology is the study of diseases caused by disorders of the immune system. This course is designed to give students an understanding of the immune disease processes and immune responses in the context of infections, malignancies, and autoimmune disorders. It also involves diseases of other systems, where immune reactions play a part in the pathology and clinical features. Students will learn different laboratory testing procedures used to detect immune system disease and monitor the efficacy of treatment. A series of lectures covers course components; additional materials are presented through clinical laboratories that students perform coupled with clinical correlations that focus on clinically applied immunological concepts. An effort has been made to increase clinical relevance and problem-solving skills through an discussion board topics and other interactive classroom assignments. Advance competencies are required in this graduate level course.

Prerequisite(s): CLSC 6640 and CLSC 6645

Lecture Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Graduate Semester **Program Restrictions:**

MHSCLS_CLS-Clinical Laboratory Science, MHS_CLS-Clinical Laboratory Science

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CLSC 7680 - Clinical Biochemistry/Immunology Internship (5 Credit Hours)

Provides students practical experience of working in the clinical chemistry and immunology laboratories under the supervision of a medical technologist: specimen processing, analysis and reporting of patient test results. The students will be expected to perform critical evaluations of clinical cases and/or scientific papers and additional advanced practice competencies in related content area.

Prerequisite(s): CLSC 6640 and CLSC 6645

Contact Hours: 240

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Graduate Semester **Program Restrictions:**

MHSCLS_CLS-Clinical Laboratory Science, MHS_CLS-Clinical Laboratory Science

Schedule Type (Primary): Internship/Practicum

CLSC 7780 - Clinical Immunohematology Internship (3 Credit Hours)

Clinical course puts theory to continued practice performing tests on patient specimens and reporting results, completing cross matches, preparing components for issue, identifying multiple antibodies, processing blood components, and interviewing and drawing donors. The students will be expected to perform critical evaluations of clinical cases and/or scientific papers and additional advanced practice competencies in related content area.

Prerequisite(s): CLSC 6740 and CLSC 6745

Contact Hours: 160

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Graduate Semester **Program Restrictions:**

MHSCLS_CLS-Clinical Laboratory Science, MHS_CLS-Clinical Laboratory Science

Schedule Type (Primary): Asynchronous Instruction **Schedule Type (Additional):** Internship/Practicum

CLSC 7880 - Clinical Hematology Internship (3 Credit Hours)

Practical application in techniques utilized in a clinical hematology, fluids, and hemostasis laboratory, also including quality assurance issues, problem solving skills, phlebotomy, and relative management issues. The students will be expected to perform critical evaluations of clinical cases and/or scientific papers and additional advanced practice competencies in related content area.

Prerequisite(s): CLSC 6840 and CLSC 6845

Contact Hours: 160

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Graduate Semester **Program Restrictions:**

MHSCLS_CLS-Clinical Laboratory Science, MHS_CLS-Clinical Laboratory Science

Schedule Type (Primary): Internship/Practicum

CLSC 7903 - Clinical Laboratory Science Review (3 Credit Hours)

A comprehensive review of the clinical laboratory sciences profession. The student will be expected to perform critical evaluations of clinical cases, critical evaluations of scientific papers, or additional advanced practice competencies in related content area.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MHSCLS_CLS-Clinical Laboratory Science

Schedule Type (Primary): Asynchronous Instruction

CLSC 7940 - Clinical Molecular Methods (3 Credit Hours)

This course starts with a historical overview of some breakthrough discoveries that contributed to the establishment of molecular diagnostics. It focuses on molecular testing terminology and nucleic acids' qualities that are important in designing molecular procedures. The course covers applications of molecular testing by focusing on nucleic acids' target and signal amplification techniques currently approved by the FDA for infectious disease testing, including blood donor screening. The course also focuses on molecular testing in cancer, pharmacogenomics, and high-throughput technologies. The students will be expected to perform critical evaluations of clinical cases and/or scientific papers and additional advanced practice competencies in related content area.

Prerequisite(s): CLSC 6640 and CLSC 6645

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Graduate Semester **Program Restrictions:**

MHSCLS_CLS-Clinical Laboratory Science, MHS_CLS-Clinical Laboratory Science

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Directed Study (one-to-one), Asynchronous Instruction

CLSC 7945 - Clinical Molecular Methods Laboratory (2 Credit Hours)

Prerequisite: Concurrent enrollment in CLSC 7940. This course provides students with practical experience of various techniques used in the molecular biology laboratory with emphasis on nucleic acid isolation procedures, quantifications, PCR and gel electrophoresis. The focus is on quality control measures unique for the molecular laboratory and prescribed by the Clinical Laboratory Standards Institute. The goal is to develop manual and analytical skills which will prepare the students for molecular analysis on clinical samples.

The students will be expected to perform critical evaluations of clinical cases and/or scientific papers and additional advanced practice competencies in related content area.

Corequisite(s): CLSC7940

Lab Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Graduate Semester **Program Restrictions:**

MHSCLS_CLS-Clinical Laboratory Science, MHS_CLS-Clinical Laboratory Science

Schedule Type (Primary): Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

CLSC 7990 - Clinical Molecular Methods Internship (4 Credit Hours)

This course is an internship in a research and/or clinical environment where students further master their manual and analytical skills by performing molecular assays specific to the internship location with emphasis on understanding the underlying biochemical processes. The main focus is targeted on infectious disease testing of patients and/or blood donors, as well as cancer diagnosis and monitoring. Students will be expected to perform critical evaluations of clinical cases and/or scientific papers and additional advanced practice competencies in related content area.

Prerequisite(s): CLSC 7940 and CLSC 7945

Contact Hours: 200

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Graduate Semester **Program Restrictions:**

MHSCLS_CLS-Clinical Laboratory Science, MHS_CLS-Clinical Laboratory Science

Schedule Type (Primary): Asynchronous Instruction **Schedule Type (Additional):** Internship/Practicum

CLSC 7999 - CLS Clinical Practicum (0 Credit Hours)

This is a zero credit hour course. Students can register for this course to remain enrolled in their respective degree program while completing clinical internship rotations that were delayed due to the COVID-19 pandemic.

Repeatability: May be repeated for credit up to three times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: College of Allied Health Sci **Program Restrictions:** MHSCLS_CLS-Clinical Laboratory Science

Schedule Type (Primary): Internship/Practicum

COMM 1110 - Public Speaking (3 Credit Hours)

An introduction to public speaking, including systematic library research, preparation, delivery, and evaluation of presentations, and preparation and use of visual aids.

Core IMPACTS Requirement(s) Satisfied: Institutional Priority (Institution)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

COMM 1110H - Honors: Public Speaking (3 Credit Hours)

An introduction to public speaking, including systematic library research, preparation, delivery, and evaluation of presentations, and preparation and use of visual aids. This is an honors course.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

COMM 2000 - Writing for Communication Professionals (3 Credit Hours)

The course introduces students to writing for the communications professions. Students develop writing and information acquisition skills required in the various communications professions (print, digital, etc.).

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C or ENGL 1113H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C or ENGL 1114H >= C) and (COMM 1110 >= C or COMM 1110H >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

COMM 2010 - Media Literacy (3 Credit Hours)

A study of communication media in the United States. Students learn basic media concepts and how media influence and/or reflect cultural processes and products, social institutions, and human experience.

Prerequisite(s): COMM 1110 >= C or COMM 1110H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

COMM 2020 - Introduction to Research (3 Credit Hours)

An introduction to qualitative and quantitative methods of research in communication.

Prerequisite(s): COMM 1110 >= C or COMM 1110H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

COMM 2101 - Communication Practicum (1 to 2 Credit Hours)

Participation in communication practicum for speech and debate, research, or other instructor-led practical learning opportunity.

Prerequisite(s): Permission of instructor.

Lab Hours: 1 to 2

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Schedule Type (Primary): Internship/Practicum

COMM 2102 - Theatre Production Practicum (1 to 2 Credit Hours)

Participation as a crew member or shopworker in a university theater production. **Prerequisite(s):** Permission of instructor.

Lab Hours: 1 to 2

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Internship/Practicum

COMM 2960 - Preprofessional Internship (1 to 3 Credit Hours)

Allows new Communication majors to have preprofessional experience in communication fields earlier in their academic careers than the existing 4000-level internship course.

Repeatability: May not be repeated for credit.

Grade Mode: S- Satisfactory/Unsatisfactory

Program Restrictions: Bachelor of Arts with a major in Communication

Schedule Type (Primary): Internship/Practicum

COMM 3000 - Theoretical Perspectives (3 Credit Hours)

This course provides an overview of theories and key concepts in the communication discipline, and their relation to understanding human culture.

Prerequisite(s): COMM 2020 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

COMM 3010 - Advanced Public Speaking (3 Credit Hours)

This course provides further development of skills learned in the COMM 1110 course (or Core IMPACTS equivalent), including speech research, writing, and delivery, and additional development of skills for speaking in group formats.

Prerequisite(s): COMM 1110 >= C or COMM 1110H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

COMM 3020 - Writing for Multimedia Platforms (3 Credit Hours)

This course covers news gathering and disseminating content across platforms, including social media. The aim is to create publishable content in print and digital environments.

Prerequisite(s): COMM 2000 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

COMM 3030 - Audiovisual Media Production (3 Credit Hours)

This course covers the practical skills and associated technologies used in producing audiovisual media.

Prerequisite(s): COMM 2010 >= C or FITH 2001 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

COMM 3040 - Interpersonal Communication (3 Credit Hours)

This course addresses the theories and practice of interpersonal communication. Topics to be explored include family communication, friendship communication, communication in romantic relationships, and conflict in interpersonal relationships.

Prerequisite(s): COMM 2020 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

COMM 3060 - History of Mass Media (3 Credit Hours)

This course examines the development of American mass media and related industries and practices from colonial times to the present.

Prerequisite(s): COMM 2010 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

COMM 3100 - Communications for Professionals (3 Credit Hours)

A skill-building course in various forms of professional oral and written communication. Included are business memo and letter writing, short report writing, informal and formal oral presentations, and the use of modern technology to improve written and oral presentations. Students will learn and demonstrate skills in organizing, writing, and presenting factual, promotional, attitudinal, and technical materials for various audiences. Technology will include current library research methods for business, presentation software, and communication media.

Prerequisite(s): (COMM 1110 >= C or COMM 1110H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C) and (MINF 2201 >= C or CSCI 1301 >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

COMM 3120 - Television Production (3 Credit Hours)

This course is intended to help students develop familiarity with studio and program production covering single and multi-camera approaches.

Prerequisite(s): COMM 2010 >= C

Lecture Hours: 4 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

COMM 3170 - Small Group Communication (3 Credit Hours)

This course covers the concepts of group dynamics and interpersonal communicative behavior including group interaction; member characteristics that influence groups; the effects of the environment, group size, and structure; leadership and social influence; communication process; and conflict resolution and decision making. As a result of taking this course students will be able to evaluate small group decision making, interaction, process, and effectiveness.

Prerequisite(s): COMM 2000 >= C or COMM 2010 >= C or COMM 2020 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

COMM 3180 - Television History (3 Credit Hours)

This course surveys the development and influence of the television medium from its beginning in the late 1940s to the present day.

Prerequisite(s): COMM 2010 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

COMM 3200 - Communication and Popular Culture (3 Credit Hours)

This course provides an overview of the study of popular culture from a communication perspective. It examines mass media commercialization and commodification, the sociopolitical impacts of popular culture, and the relevance of popular cultural texts and practices to human identity and self-expression. Students will learn historical and contemporary perspectives on popular culture and apply them to the analysis of popular cultural texts, practices, and audiences.

Prerequisite(s): COMM 2010 >= C or COMM 2020 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study,Asynchronous Instruction

COMM 3220 - Public Relations Writing (3 Credit Hours)

Study of various forms of public relations writing used in both corporate and non-profit settings.

Prerequisite(s): COMM 3600 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study,Asynchronous Instruction

COMM 3250 - Persuasion (3 Credit Hours)

This course explores how communication influences perceptions, thoughts, and actions. Students learn the skills necessary to critically analyze persuasive communication in various contexts, including speeches, advertising, and popular culture.

Prerequisite(s): COMM 2020 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study,Asynchronous Instruction

COMM 3300 - Introduction to Visual Communication (3 Credit Hours)

Students will learn the basics of communicating visually. They will learn how to use form, color, shape, etc., to enhance written messages. They will learn the software and the basic techniques used to create common communications media such as fliers, brochures, magazines, annual reports, etc. They will learn how to create these media both in print and in online formats. They will also learn the software and basic techniques for image processing. Emphasis will be placed on the legalities of obtaining images from online sites.

Prerequisite(s): COMM 2010 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study,Asynchronous Instruction

COMM 3320 - Digital Editing (3 Credit Hours)

This course examines the theory and application of nonlinear video and audio editing.

Prerequisite(s): COMM 3030 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study,Asynchronous Instruction

COMM 3340 - Podcasting and Audio Communication (3 Credit Hours)

This course provides students with the basic skills of audio and podcast production, including how to write for broadcast, the development oral presentation technique, knowledge and application of production standards and ethics, and competence in production process, including proficiency in software applications.

Prerequisite(s): COMM 1110 >= C or COMM 1110H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study,Asynchronous Instruction

COMM 3430 - Cinematography (3 Credit Hours)

This course provides an overview of the art and craft of motion picture photography. Students will learn cinematographers' essential principles, tools, practices, and protocols, and how choices in their application affect creative outcomes, in a hands-on environment.

Prerequisite(s): COMM 2010 >= C

Lecture Hours: 4 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

COMM 3500 - Intercultural Communication (3 Credit Hours)

This course explores intercultural theories and research and examines the interactions of members of various cultures. Barriers to effective intercultural communication will be examined, as will methods of improving intercultural communication.

Prerequisite(s): COMM 2010 >= C or COMM 2020 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

COMM 3600 - Integrated Strategic Communication (3 Credit Hours)

This course examines common practices in the field of public relations, including study of the publics served and an evaluation of the effectiveness of public relations campaigns with emphasis on image building.

Prerequisite(s): COMM 2000 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

COMM 3650 - Health Communication (3 Credit Hours)

This course surveys the field of health communication, including rational communication in healthcare settings, the role of technology, message and campaign design, and how effective communication can promote wellness for individuals and society.

Prerequisite(s): COMM 2000 >= C or COMM 2020 >= C

Cross-Leveled Course(s): COMM 5650

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

COMM 4000 - Communication Law and Ethics (3 Credit Hours)

Introduction to the study of first amendment law and its associated areas that are relevant to communications professionals, including public relations, advertising, broadcasting, freedom of information, libel, privacy, and intellectual property. Consideration is also given to ethical concerns arising within these areas.

Prerequisite(s): COMM3000 >= C and COMM3010 >= C and COMM3020 >= C and (COMM3030 >= C or COMM3300 >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

COMM 4010 - Preparing and Producing Visual Media (3 Credit Hours)

This course develops the skills needed for effective video and television production, on the set and behind the scenes, including on-camera interviewing, anchoring, and producing video segments.

Prerequisite(s): (COMM2300 >= C or COMM3010 >= C or COMM3030 >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

COMM 4020 - Investigative Reporting (3 Credit Hours)

This course covers investigative news gathering and writing with an emphasis on reporting on public issues, using a full range of media platforms.

Prerequisite(s): COMM3020 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

COMM 4030 - Sports Photography (3 Credit Hours)

The basic concepts and practices in sports photography, including developing an artistic vision, telling a story, how to best capture action in both moving and still photography, lighting, and more. Students gain practical experience in photographing live sports events.

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Student Class Restrictions: Junior, Senior

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study

COMM 4120 - Gender and Communication (3 Credit Hours)

This course explores gendered communication patterns in a variety of contexts and examines how communication creates and reinforces gender. Theories that explain how culture shapes gendered communication and how gendered communication shapes culture will be examined.

Prerequisite(s): (COMM3000 >= C or COMM3040 >= C or WGST1101 >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

COMM 4300 - Visual Storytelling (3 Credit Hours)

This course provides advanced work in visual communication. Students will learn to use images to tell stories in non-text-based-forms, such as infographics, photo essays, data visualization, and moving images.

Prerequisite(s): COMM3300 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

COMM 4320 - Public Relations and Social Media Campaigns (3 Credit Hours)

The primary tool of a public relations practitioner is advocacy – aiding clients or employers in gaining access and influence in the marketplace of ideas. Advocacy is built upon ideas and images, persuasion and information, strategy and tactics, grounded in theory and research. It employs any and all public media – print, analog, digital, visual – what ever is determined to be the best means of connecting with the target audience. In this course, students will learn the techniques PR practitioners most commonly use in their work as advocates. Instruction will be via case studies, instruction in communication campaign planning and budgeting, and hands-on projects.

Prerequisite(s): (COMM2010 >= C and COMM2000 >= C and COMM3600 >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

COMM 4330 - Sports Event Communication and Media Relations (3 Credit Hours)

This course provides a comprehensive exploration of communication strategies and media relations in the context of sports events. Students will learn essential techniques for planning, executing, and managing communications before, during, and after sports events. The course emphasizes the integration of traditional media and social media platforms to maximize event visibility and engage with diverse audiences.

Prerequisite(s): COMM 1110

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

COMM 4340 - Sports Communication (3 Credit Hours)

In Sports Communication, students will develop the skills, attitudes and expectations of sports journalism (including broadcasting), sports media relations, and sports marketing. It is a course designed to teach students how to write event, feature, and explanatory stories, and to tell these stories in several platforms—including print, podcasting, and still photography, as well as how to develop stories with social media. Students will create traditional game stories; construct profiles of athletes or coaches; and produce an enterprise story about a major issue in contemporary sports.

Prerequisite(s): COMM 1110

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester **Course Level Restrictions:** Undergraduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

COMM 4350 - Sports Media Production Practicum (3 Credit Hours)

This hybrid course introduces students to exploring the core elements of live sports broadcasting, including on-air presentation, camera operation, audio mixing, live switching, graphics integration, and replay systems. Training will incorporate the use of professional-grade equipment such as Hitachi cameras, the TriCaster video switcher, and NewTek 3Play replay systems. Through immersive, experiential learning, students will develop a strong understanding of industry-standard 2 workflows and technologies, equipping them for careers in sports media and live event production. The course also includes an academic exploration of the history of sports broadcasting, media rights partnerships, and current trends shaping the future of sports coverage.

Prerequisite(s): COMM 1110

Lecture Hours: 3 **Contact Hours:** 3

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Internship/Practicum **Schedule Type (Additional):** Lecture, Asynchronous Instruction

COMM 4360 - Advanced Sports Podcasting (3 Credit Hours)

Students will develop the skills, attitudes, and expectations of sports podcasting/radio. This course is designed to teach students how to write scripts; participate in and edit a weekly sports podcast; distribute and market the podcast; and promote the podcast through social media.

Prerequisite(s): COMM 1110

Lecture Hours: 3 **Contact Hours:** 3

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Internship/Practicum

COMM 4370 - Esports Communication (3 Credit Hours)

Esports (Electronic Sports) is one of the fastest growing areas of entertainment in the world. This course will explore the television production and history of Esports. The focus of the course is on learning the foundational skills needed to produce a live n Esports event. During the course students will learn to work as a production crew for live Esports competitions within Augusta University's new

Varsity Esports Program. During the semester, students will not only learn about the E-Sports industry, but they will also engage in the production of Esports competitions and gain a deeper insight into the esports ecosystem, which includes a major component of communication. An emphasis will be placed on creative thinking, critical thinking, and teamwork. Roles include producer, director (TriCaster operator), sound engineering, shoutcasters, camera operators, graphics designer, on-camera reporter, esports journalist, and social media specialist, etc.

Prerequisite(s): COMM 1110

Lecture Hours: 3 **Contact Hours:** 3

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar Small Group, Internship/Practicum, Asynchronous Instruction

COMM 4400 - Media Editing and Production (3 Credit Hours)

This course provides skills development in media strategy, leadership, team building, planning, editing, and promoting media organizations and products.

Prerequisite(s): COMM3020 >= C or COMM3030 >= C

Lecture Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Seminar - Small Group

COMM 4950 - Advanced Special Topics in Communications (3 Credit Hours)

Advanced study of various topics in communications.

Prerequisite(s): COMM2000 >= C and COMM2010 >= C and COMM2020 >= C

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

COMM 4960 - Professional Internship (3 to 6 Credit Hours)

This course provides additional preprofessional training in a professional workplace and the chance to apply formal education to a real-world experience. Students will apply skills and concepts, clarify career goals, and benefit from professional networking.

Prerequisite(s): COMM3000 >= C and COMM3010 >= C and COMM3020 >= C and (COMM3030 >= C or COMM3300 >= C)

Lecture Hours: 3 to 6 **Contact Hours:** 3

Repeatability: May be repeated for credit one time.

Grade Mode: Satisfactory/Unsatisfactory, Audit, Normal

Schedule Type (Primary): Asynchronous Instruction **Schedule Type (Additional):** Internship/Practicum

COMM 4970 - Capstone (3 Credit Hours)

This course represents a capstone experience, and should be taken during the student's final semester, after successful application. Students will develop, produce, and distribute media using skill-sets acquired in earlier coursework. Relevant skills include print and digital journalism and public relations, performance, and visual media. Prerequisite(s): Permission of Instructor.

Prerequisite(s): (COMM3000 >= C and COMM3010 >= C and COMM3020 >= C and COMM3030 >= C and COMM3600 >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Senior-Semester

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

COMM 4990 - Undergraduate Student Research (3 Credit Hours)

This course provides an undergraduate experience in communication research. Focus is split among scholarly creative work, professional research, and academic research. Students will develop a research project appropriate for presentation or exhibition in an

academic or professional venue.

Prerequisite(s): COMM2000 >= C and COMM2010 >= C and COMM2020 >= C and COMM3000 >= C

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Schedule Type (Primary): Directed Study (one-to-one)

COMM 5650 - A Survey of Health Communication (3 Credit Hours)

A broad overview of health communication. Explores health communication within interpersonal, group and organizational, global, and digital contexts. Additionally, students develop skills to understand and critically reflect on how human sense-making, communication, and social practices construct, challenge, and negotiate health and healthcare.

Cross-Leveled Course(s): COMM 3650

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

COHP 5001 - Community Oral Health Promotion (1 Credit Hour)

This course is designed to provide all entering first year dental students with the introduction and overview of basic concepts in health promotion and community health. A philosophy of wellness emphasizes health promotion and disease prevention as an integral component of dental practice. Twelve hours of lecture as well as 2 hours of seminar and 2 hours of community service activities are provided so that students will gain the necessary knowledge and skill regarding the philosophy, modalities, rationale, and evaluation of oral health promotion and disease prevention activities in community and public health.

Lecture Hours: 1 **Contact Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DMD_DENT-Dentistry

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

CDCL 5001 - Complete Dentures (3 Credit Hours)

This course extends the previously taught didactic and laboratory procedures to the clinic. A complete maxillary and mandibular denture is fabricated for an edentulous patient with major emphasis on correlating for the patient's biological milieu with the clinical aspects of complete prosthodontics.

Lecture Hours: 1 **Lab Hours:** 1 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Dental College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

CDPR 5001 - Preclinical Completed Dentures (1 to 6 Credit Hours)

Lecture and laboratory sessions on the philosophy and technique in the fabrication of complete dentures are presented. Material includes, oral examinations, preliminary and final impressions, maxillomandibular records, denture tooth selection, factors and philosophies of denture occlusion, setting teeth in a non-balanced and a balanced lingualized occlusion, verifying maxillomandibular records, denture processing, correction of processing errors, completion and insertion of complete dentures and effective cusp angles.

Lecture Hours: 0 to 1 **Lab Hours:** 0 to 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Dental College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

CMPC 5701 - Comprehensive Care (5 to 19 Credit Hours)

The course is designed to equip the student with the necessary skills and knowledge to deliver comprehensive care and be competent in all aspects of general dentistry. It is intended to allow the student the opportunity to complete the needed experiences in order to challenge competency examinations which assess the ability of the student to make independent clinical decisions.

Contact Hours: 28

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Continuing Progress Courses

Major Restrictions: Advanced Standing DMD

Schedule Type (Primary): Supervised Lab/Clinic

CMPC 5702 - Comprehensive Care (15 Credit Hours)

The course is designed to equip the student with the necessary skills and knowledge to deliver comprehensive care and be competent in all aspects of general dentistry. It is intended to allow the student the opportunity to complete the needed experiences in order to challenge competency examinations which assess the ability of the student to make independent clinical decisions.

Contact Hours: 30

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Major Restrictions: Advanced Standing DMD

Schedule Type (Primary): Supervised Lab/Clinic

CMPC 5901 - Comprehensive Care (5 to 17 Credit Hours)

The course is designed to equip the student with the necessary skills and knowledge to deliver comprehensive care and be competent in all aspects of general dentistry. It is intended to allow the student the opportunity to complete the needed experiences in order to challenge competency examinations which assess the ability of the student to make independent clinical decisions.

Contact Hours: 21

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Continuing Progress Courses, Audit

College Restrictions: Dental College of Georgia

Schedule Type (Primary): Supervised Lab/Clinic

CMPC 5902 - Comprehensive Care (13 Credit Hours)

The course is designed to equip the student with the necessary skills and knowledge to deliver comprehensive care and be competent in all aspects of general dentistry. It is intended to allow the student the opportunity to complete the needed experiences in order to challenge competency examinations which assess the ability of the student to make independent clinical decisions.

Contact Hours: 20

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Dental College of Georgia

Schedule Type (Primary): Supervised Lab/Clinic

CSCI 1200 - Introduction to Computers and Programming (3 Credit Hours)

This course emphasizes analytical thinking and teaches problem solving through an introduction to basic programming structures. It covers design of well-structured algorithms using appropriate logic structures with simple data types and data structures. STEM GPA eligible course.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

CSCI 1210 - Introduction to Java Programming (3 Credit Hours)

An introduction to the basic concepts, logic, and syntax of the Java programming language. The use of elementary programming techniques and algorithms is presented. Topics include: arithmetic operations, input/output, data types, variables, selection and control

statements, applications, applets, and event-driven programming. STEM GPA eligible course.

Prerequisite(s): MATH 1001 >= D or MATH 1111 >= D or MATH 1113>= D

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 1301 - Principles of Computer Programming I (4 Credit Hours)

A rigorous study of the principles of computer programming with emphasis on problem solving methods which result in correct, well-structured programs. Other topics: an introduction to data representation, data types and control structures, functions, and structured data types. STEM GPA eligible course.

Prerequisite(s): MATH 1001 >= C or MATH 1111 >= C or MATH 1113>= C MATH 1220 >= C or MATH 2011 >= C

Lecture Hours: 3 **Lab Hours:** 2 **Contact Hours:** 5

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

CSCI 1302 - Principles of Computer Programming II (3 Credit Hours)

A continuation of problem solving methods and algorithm development. Topics include data structures and their implementation, algorithm development and programming. The emphasis is on program development and style. STEM GPA eligible course.

Prerequisite(s): CSCI 1301 >= C or ENGR 2060 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 2120 - Introduction to C# Programming (3 Credit Hours)

This course introduces the fundamental principles of object-oriented programming using C#. The focus is on applications development using object-oriented design and implementation techniques. Topics include: objects, classes, inheritance, interfaces, GUI components, layout managers, events, multimedia, exception handling, and I/O files. STEM GPA eligible course.

Prerequisite(s): MATH 1111 >= D or MATH 1113 >= D

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 2320 - Introduction to Computer Networking (3 Credit Hours)

Introduces networking technology to include networking standards, networking media, networking hardware, access methods, network operating systems, TCP/IP basics, network security and the fundamentals of local area network and wide area network technologies. STEM GPA eligible course.

Repeatability: May not be repeated for credit.

CSCI 2330 - System Administration (3 Credit Hours)

A basic study of the UNIX operating system geared towards the operating system user, future system administrator, and security officer. Topics include listing, finding, displaying and printing files; system security, command-line editing, handling backups, system resources, and file permissions; script programming, and other administrative tasks. STEM GPA eligible course.

Repeatability: May not be repeated for credit.

CSCI 2700 - Ethics in Computer Science (2 Credit Hours)

A study of the ethical, social, and legal impacts of computers and their applications. Specific attention is paid to professional responsibility, issues of privacy, property rights, legal issues, and real risks.

Prerequisite(s): CYBR 2600 >=C

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 2950 - Selected Topics (1 to 3 Credit Hours)

Modern concepts in special areas of computer science. Prerequisite(s): Permission of instructor.

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 2980 - Applications Seminar (1 Credit Hour)

Study and analysis of current computer applications, current computer hardware and computer-related careers.

Corequisite(s): CSCI 2301

Pre- or Corequisite(s): CSCI 1301 or ENGR 2060

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 3030 - Mathematical Structures for Computer Science (3 Credit Hours)

The course prepares computer science majors for advanced study by emphasizing components of discrete mathematics related to computer science. The topics include sets, functions and relations, logic, Boolean algebra, graph theory, proof techniques and matrices. Examples will emphasize computer science applications.

Prerequisite(s): CSCI 1301 >= C and (MATH 1220 >= C or MATH 2011 >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 3170 - Computer Organization (3 Credit Hours)

A study of logic circuits and computer organization. Topics include: Boolean algebra representation and minimization, logic gates, the design and analysis of combinational and sequential circuits, and registers, ALU and data paths.

Prerequisite(s): CSCI 1302 >= C

Cross-Leveled Course(s): CSCI 5170

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 3271 - Operating System (3 Credit Hours)

A study of computer operating systems and related computer architecture topics. Topics include process management, scheduling, synchronization, deadlock, memory management, virtual memory, disk management, file systems, I/O and protection.

Prerequisite(s): CSCI 3371 >= C and CSCI 3400 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 3300 - Programming Languages Concepts (3 Credit Hours)

This course is centered around the concepts of the design and advanced features of programming languages. The differences between functional, imperative, and object-oriented programming will be discussed. Syntax specification, program evaluation, typing, abstract data types, and recursion will be discussed.

Prerequisite(s): CSCI 3030 >= C and CSCI 3400 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1BS-CBSC-BS-Cybersecurity, 1BS-COSC-BS Computer Science, 1BS-CYBE-BS-Cybersecurity Eng, 1BS-CYOP-BS-Cyber Operations, 1BSIT-IT-BS Information Technology

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 3370 - Assembly Language Programming (3 Credit Hours)

A study of the fundamentals of assembly language programming concepts and techniques. Topics include the representation of instructions and data, the use of registers, the stack, and addressing techniques. In addition, translating high-level programming statements into well-structured assembly code is studied.

Prerequisite(s): CSCI 1302 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Cybersecurity, Computer Science, Cybersecurity Engineering, Cyber Operations, Information Technology

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 3371 - Low-Level Programming Languages (3 Credit Hours)

Study of computer systems and programming at the level of low-level programming languages. Students will have the opportunity to learn basic principles and fundamentals of machine language, assembly language and C. Topics include: pointers, bit operations, and system programming in the C# language, and register operations, control structures, bitwise operations, subprograms, and addressing techniques in assembly language.

Prerequisite(s): CSCI 3170 >= C

Cross-Leveled Course(s): CSCI 5371

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture

CSCI 3400 - Data Structures (3 Credit Hours)

A study of the techniques for representation and manipulation of structured data within a digital computer. Programming assignments illustrating a variety of data structures.

Prerequisite(s): CSCI1302 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 3410 - Database Systems (3 Credit Hours)

This course offers an introduction to database systems as a key concept in information management. The course covers logical and physical database organization, data models, file structures, indexing, hashing, query optimization, and design issues. This course will cover the design and implementation of databases.

Prerequisite(s): CSCI 3400 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 3430 - Artificial Intelligence (3 Credit Hours)

This course covers the fundamentals of heuristic problem solving using search techniques, genetic algorithms, knowledge representation, and expert systems.

Prerequisite(s): CSCI 3400 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 3500 - Theory of Computation (3 Credit Hours)

A study of the major theoretical topics needed for a well-rounded knowledge of computer science. These will include automata, formal languages, asymptotic, NP-completeness, formal verification and the design of algorithms.

Prerequisite(s): CSCI 3030 >= C and CSCI 3400 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 3600 - Internet Programming (3 Credit Hours)

An advanced course in internet programming for real-world business applications. The focus is on the complete application development cycle, including analysis and design, implementation, verification, and demonstration/support. Topics include: multi-tier application design, network programming, XML, web server and client programming, JavaScript, AJAX, and web services.

Prerequisite(s): CYBR 2600 >= C and (AIST 2120 >=C or CSCI 1302 >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 4100 - Analysis of Algorithms (3 Credit Hours)

Introduction to design and analysis of combinatorial algorithms. Use of asymptotics in evaluating algorithm's efficiency and scalability. Application of induction and other mathematical techniques for proving correctness of algorithms. Data structures for simplifying algorithm design, such as hash tables, heaps, binary search trees. Advanced design and analysis methods, such as greedy algorithms, dynamic programming, amortized analysis.

Prerequisite(s): CSCI 3400 >=C and CSCI 3030 >=C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

CSCI 4420 - Distributed and Mobile Systems (3 Credit Hours)

This course covers the fundamentals of distributed computing and mobile systems including techniques for creating distributed and mobile applications.

Prerequisite(s): CSCI 3271 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 4531 - Malware Analysis and Reverse Engineering (3 Credit Hours)

Introduces malware analysis and reverse engineering techniques. Course provides in-depth coverage of the malware types, techniques, and capabilities. Popular diagnostic tools are used to analyze malware, observe malware in action, and to understand how the malware works.

Prerequisite(s): CSCI 3371 >= C and CYBR 2600 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 4532 - Hardware and Embedded Systems (3 Credit Hours)

This course explores microcontroller design, embedded systems, and programmable logic devices (FPGAs). Hardware reverse engineering is introduced. Industrial Control Systems are examined as an implementation of embedded systems. There is a lab component to the course.

Prerequisite(s): CSCI 3170 >= C or PHYS 3012 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 4540 - Digital Forensics and Machine Learning (3 Credit Hours)

Overview of information security forensics activities. Topics include: digital forensics investigative basics and digital forensics examination criteria. Course includes hands-on lab activities where machine learning concepts are applied, and students learn the basics of digital forensics techniques and how machine learning could be used in the context of processing data.

Prerequisite(s): (CSCI 3371 >=C or CSCI 3271 >=C) and (MATH 3280 >=C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture/Unsupervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

CSCI 4600 - Full-Stack Internet Development (3 Credit Hours)

Building on the fundamentals of web development, this course exposes the student to contemporary, full-stack, web-based application development. Students gain experience developing secure, responsive, and reactive applications for both desktop and mobile users. Students become familiar with client-side frameworks, web services, and web-based data management, among other concepts. All stages of a typical team-based web development lifecycle are addressed.

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

CSCI 4711 - Software Engineering (3 Credit Hours)

The software development process is examined. Current tools and techniques of software system analysis, design, implementation, and maintenance are presented in conjunction with case studies and team-oriented projects. Topics include process modeling, logic modeling, object-oriented modeling, UML, software metrics, prototyping, and software security.

Pre- or Corequisite(s): CSCI 3410

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 4712 - Senior Capstone Project (3 Credit Hours)

An individual or group project in the application of computer science. Emphasis is on the production of real-world software systems and may be conducted in cooperation with an external organization such as a commercial company or public agency.

Prerequisite(s): CSCI 3410 >= C and CSCI 4711 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit, In Progress

Student Class Restrictions: Senior-Semester

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

CSCI 4800 - Compiler Writing (3 Credit Hours)

An examination of compiler techniques used in generating machine code. Topics covered include scanning and parsing, code generating, optimization and error recovery. Programming projects in compiler construction.

Prerequisite(s): CSCI 3500 >= C and CSCI 3370 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 4820 - Computer Graphics (3 Credit Hours)

An examination of the hardware and software components of graphics systems and their applications. Programming assignments to illustrate the creation and manipulation of graphic displays using a simple graphics package.

Prerequisite(s): CSCI 1302 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 4950 - Selected Topics (1 to 3 Credit Hours)

Modern concepts in special areas of computer science. Prerequisite(s): Permission of Instructor and approval by Computer Science Curriculum Committee.

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 4960 - Undergraduate Internship (1 to 5 Credit Hours)

An internship in a service-learning experience based in an institution or agency, emphasizing the completion of a specific task and the acquisition of specific knowledge and skills under the supervision of the university and the cooperating institution or agency.

Prerequisite(s): Permission of Department Chair.

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Asynchronous Instruction **Schedule Type (Additional):** Internship/Practicum

CSCI 4980 - Computer Science Seminar (1 to 2 Credit Hours)

To expose the students to current areas of computer research and advanced topics in computer science, such as artificial intelligence, nonprocedural languages, CASE tools and software engineering, parallel computing, computer modeling and expert systems.

Prerequisite(s): Permission of Instructor.

Lecture Hours: 1 to 2

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 4990 - Undergraduate Research (1 to 3 Credit Hours)

Individual research in computer science. A minimum of three hours per week for each semester hour credit. **Prerequisite(s):** Permission of Department Chair.

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Independent Study **Schedule Type (Additional):** Asynchronous Instruction

CSCI 5001 - Fundamentals of Computer Programming I (3 Credit Hours)

A comprehensive study of the principles of computer programming with emphasis on problem solving and algorithm development. Students learn control structures, functions, structured data types, program development, recursion, objects, file processing, classes, templates, and polymorphism.

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Asynchronous Instruction

CSCI 5002 - Data Structures and Algorithms (3 Credit Hours)

Advanced programming techniques using concepts from data structures and algorithms. Implementation of basic data structures such as lists, stacks, queues, trees, hash tables, heaps, and graphs. Asymptotic and amortized performance analysis, and correctness proofs of algorithms. Advanced algorithm design, greedy algorithms and dynamic programming.

Prerequisite(s): CSCI 5001 >= C

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Asynchronous Instruction

CSCI 5003 - Data Analytics Using Python (3 Credit Hours)

Discusses data analysis techniques, including math and statistics, and also programming techniques and tools for processing data based on Python. Students learn how to process and analyze data sets to perform statistical analysis and use tools to visualize data. The course also covers learning techniques to process data, including supervised and unsupervised learning.

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Asynchronous Instruction

CSCI 5004 - Computer Systems Programming (3 Credit Hours)

A comprehensive study of computer systems and programming, with concepts from operating systems and architectures. Low level programming concepts, including machine and assembly language, pointers, bit operations, addressing techniques. Higher level concepts including process management, scheduling, synchronization, deadlock, memory management, virtual memory, file systems, I/O, and protection.

Prerequisite(s): CSCI 5001 >= C and CSCI 5003 >= C

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Asynchronous Instruction

CSCI 5100 - Algorithm Analysis (3 Credit Hours)

This course teaches abstract techniques for analyzing and designing algorithms. Tools include cost models, run-time analysis, dynamic programming, and the study of upper and lower bounds. The goals are to understand and assess classical algorithms on various data structure (including graphs), as well as to sharpen problem solving skills and development of new algorithms.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1MS-MCOS-MS-Computer Science

Schedule Type (Primary): Lecture

CSCI 5110 - Theory of Computation (3 Credit Hours)

In this course we will seek to understand what is and is not possible with modern day computers by using mathematical models to fine-grainly study various forms of computation. We will study languages, Turing machines, undecidability, the time complexity classes such as P, NP, NP-complete, space complexity classes such as L and NL, the Cook-Levin theorem, reductions, poly-time hierarchy, randomized algorithms and randomized complexity classes such as BPP, approximation algorithms and hardness of approximation.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

CSCI 5120 - Advanced Topics in Computer Security (3 Credit Hours)

This course examines the foundational topics in computer security, such as cryptography, human computer interaction, virtualization, cloud computing, and network protocols. There is a lab component to the course.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Supervised Lab/Clinic

CSCI 5130 - Software Engineering (3 Credit Hours)

This course covers concepts in software engineering. The use of software engineering methodologies and tools as mechanisms for enhancing software quality attributes. The classification, evaluation and selection of software engineering techniques.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

CSCI 5170 - Computer Organization (3 Credit Hours)

A study of logic circuits and computer organization. Students learn how to execute machine level instructions and control the components of a CPU data path. The course covers Boolean algebra representation, basic digital logic circuit design, including combinational and sequential circuits, registers, ALU, data paths, instruction set architectures, memory hierarchy, and instruction level parallelism. Note: This course is a cross-leveled course with CSCI 3170. For Master's level programs, no more than 12 credits of didactic courses required for the program may be in cross-leveled courses. Students are ineligible to take the MS cross-leveled course if they took the undergraduate version previously. Graduate students are expected to complete a digital logic circuit design project utilizing advanced techniques that are beyond what would be expected of undergraduate students.

Cross-Leveled Course(s): CSCI 3170

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 5271 - Operating System (3 Credit Hours)

Design of a modern operating system is presented as a collection of modules providing disparate functionality. The techniques underlying these modules are presented and different methods are compared and contrasted. Students get experience implementing programs that implement these modules or involve interaction with low-level software.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture

CSCI 5300 - Programming Languages (3 Credit Hours)

Programming languages are a fundamental aspect of computer science, and as computer science and society evolve the need for more advanced programming languages rises. This course will provide the understanding of how to formally design and analyze programming languages using formal models. The student will gain an understanding of the syntax and semantics of programming languages to gain a deeper understanding of correctness of programs, software verification, and the wider notion of formal methods. Furthermore, through course projects the student will gain an understanding of programming in various paradigms, and in the implementation of programming languages.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

CSCI 5310 - Proof Theory (3 Credit Hours)

This course teaches the theory of proofs studied as a formal and mathematical object. The language of proofs emerged as a natural place where programming languages, category theory, and complexity meet, and is becoming increasingly popular in the study of type systems, denotational semantics, concurrency theory, implicit complexity, and higher-order model checking to name a few. Tools include mathematical abstraction, theorem provers, the representation of proofs in multiple formalisms (sequent calculus, natural deduction, proof nets and their semantics) and multiple systems, as well as studying their relative expressivity and complexity. The goals are to excel in formal reasoning, have a precise and actionable understanding of the expressivity of a system compared to others, improve mathematical reasoning and the capacity to navigate between multiple representations of the same proof.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

CSCI 5320 - Verification of Software (3 Credit Hours)

The course covers formal methods theory and practice, in particular as applied to the specification and verification of software.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

CSCI 5330 - Artificial Intelligence (3 Credit Hours)

Presentation of artificial intelligence as a coherent body of ideas and methods to acquaint the student with the basic programs in the field and their underlying theory. Concepts and methods include topics such as informed, adversarial, and probabilistic search, knowledge representation and symbolic reasoning, knowledge engineering and building problem solvers.

Prerequisite(s): CSCI 3400 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

CSCI 5340 - Machine Learning (3 Credit Hours)

This is a survey of machine learning theory and practice. The course covers the fundamental concepts and algorithms that allow computers to improve performance over time. Techniques enabling supervised learning, unsupervised learning and reinforcement learning will be covered.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

CSCI 5350 - Network and Distributed Systems (3 Credit Hours)

This is an introduction to algorithmic aspects of distributed computing and computation in networks. The topics considered are those that arise in systems comprised of loosely coupled, heterogeneous and failure-prone processing units, arranged in a connected structure that allows information exchange. The range of applications starts at wide-area networks, goes through clusters of workstations connected by local-area networks, to multi-processor shared-memory machines. The relevant properties of solutions reflect the communication mechanisms (message passing, shared memory), the algorithmic constraints (deterministic, randomized, quantum), the timing models (synchronous, asynchronous), and the types of failures (crashes, omissions, Byzantine). The algorithmic goals to achieve include: sharing resources in a fair manner, providing fault-tolerance and privacy, and maintaining global consistency of computations. The specific problems include: symmetry breaking, consensus, resource allocation and scheduling, renaming, and synchronization. Strong understanding of undergraduate-level distributed systems, discrete mathematics (especially graph theory) and algorithms are expected.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

CSCI 5371 - Low-Level Programming (3 Credit Hours)

Study of computer systems and programming at the low-level programming language level. Students will have the opportunity to learn basic principles and fundamentals about machine language, assembly language and C language. Students learn C pointers, bit operation, system programming in C Language, register operations, control structures, bitwise operations, subprograms, and addressing techniques in assembly language. Note: This course is a cross-leveled course with CSCI 3371. For Master's level programs, no more than 12 credits of didactic courses required for the program may be in cross-leveled courses. Students are ineligible to take the MS cross-leveled course if they took the undergraduate version previously. The graduate version of the course will expect advanced programming methods to be utilized in solving complex problems.

Prerequisite(s): CSCI 5170 >= C

Cross-Leveled Course(s): CSCI 3371

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 5420 - Mobile and Distributed Computing (3 Credit Hours)

The goal of this class is to study practical aspects in design and operation of distributed and mobile systems, while becoming familiar with ongoing research. Technologies for developing new applications on such studies are emphasized with student teams implementing a significant new application. Students enrolled in the class also develop ability to independently study research papers by picking a topic of interest and studying current research publications.

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 5430 - Artificial Intelligence (3 Credit Hours)

Presentation of artificial intelligence as a coherent body of ideas and methods to acquaint the student with the basic programs in the field and their underlying theory. A number of different techniques are covered, together with their practical applications. Students get experience implementing programs that address needs of applications.

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 5500 - Theory of Computation (3 Credit Hours)

This course introduces major theoretical topics needed for a well-rounded knowledge of computer science. Students learn to reason with major formal abstractions popular in computer science. Influential theoretical results that form the basis of the computer science field are discussed.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture

CSCI 5600 - Internet Programming (3 Credit Hours)

This course introduces the concepts as well as the tools and frameworks that underly today's modern Internet-based applications. This hands-on course will focus primarily on browser-based systems. In addition to gaining a broad understanding of the foundational concepts, students can expect to design, develop, document, deploy and present complete web-based applications both individually and as members of a team.

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 6100 - Cyber-Physical Systems (3 Credit Hours)

This course strives to identify and introduce the durable intellectual ideas of embedded systems as a technology and as a subject of study. The emphasis is on modeling, design, and analysis of cyber-physical systems, which integrate computing, networking, and physical processes.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

CSCI 6531 - Malware Analysis and Reverse Engineering (3 Credit Hours)

Introduces malware analysis and reverse engineering techniques. Course provides in-depth coverage of the malware types, techniques, and capabilities. Popular diagnostic tools are used to analyze malware, observe malware in action, and to understand how the malware works.

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 6532 - Hardware and Embedded Systems (3 Credit Hours)

This course explores the design of microcontrollers and how to define requirements for their application; develop an embedded system for a specific application; and program custom controllers when off-the-shelf products won't work. Hardware reverse engineering is

used to determine hardware functionality, inputs, outputs, and stored data. Industrial Control Systems and Critical Infrastructure sectors are introduced.

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 6540 - Digital Forensics and Machine Learning (3 Credit Hours)

This course will provide an overview of digital forensics investigation process with practical hands-on labs and exercises. Course includes labs and assignments where machine learning concepts will be applied, and students will learn the basics of digital forensics techniques and how machine learning could be used in the context of processing data. Note: This course is a cross-leveled course with CSCI-4540. For Master's level programs, no more than 12 credits of didactic courses required for the program may be in cross-leveled courses. Students are ineligible to take the MS cross-leveled course if they took the undergraduate version previously. Graduate students are expected to write a publishable scholarly paper about digital forensics using machine learning that is beyond what would be expected of undergraduate students.

Prerequisite(s): CSCI 3271 >= C or CSCI 3370 >= C and MATH 3280 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 6800 - Compiler Writing (3 Credit Hours)

This class examines how programs in existing high-level languages are translated to machine level so that they can correctly and efficiently execute on modern hardware. The class is centered around a significant project where students get hands-on experience implementing the techniques studied in the class. Most techniques studied will be for imperative languages.

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 6900 - Introduction to Research (3 Credit Hours)

In this course, students will be introduced to methods for conducting scientific research within computer science. Emphasis will be placed on research question formation, literature review, theory, data acquisition, and research methodology. Students will also be introduced to current streams of research in computer science. Instructor approval required for registration.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

CSCI 6910 - Master's Thesis Research (1 to 9 Credit Hours)

Students conduct research under the supervision of faculty, ultimately leading to the Master's thesis. The topics vary. Instructor approval required for admission.

Lecture Hours: 1 to 9

Repeatability: May be repeated for credit up to 6 times.

Grade Mode: Normal, Audit, In Progress

Schedule Type (Primary): Thesis

CSCI 6950 - Selected Topics (1 to 3 Credit Hours)

A variable content course intended to meet the needs and interests of graduate students in selected areas of computer science.

Prerequisite(s): Permission of Department Chair and Instructor.

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 7011 - Studies in Foundations of Computer and Cyber Sciences (3 Credit Hours)

Students undertake the study of a chosen foundational area of computer and cyber sciences under the supervision of their advisor or the graduate program director in preparation for more advanced courses. The mode of instruction is a combination of lectures and assigned readings. The students will demonstrate mastery of the selected material through homework assignments and examinations. The study culminates in a term paper in which the student demonstrates their knowledge of the material and the ability to identify potential research questions in the area of study.

Lecture Hours: 3

Repeatability: May be repeated for credit up to five times.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 7012 - Studies in Applications of Computer and Cyber Sciences (3 Credit Hours)

Students undertake the study of a chosen application area of computer and cyber sciences under the supervision of their advisor or the graduate program director in preparation for more advanced courses. The mode of instruction is a combination of lectures and assigned readings. The students will demonstrate mastery of the selected material through homework, programming assignments, and examinations. The study culminates in a term paper in which the student demonstrates their knowledge of the material and the understanding of the challenges in implementing systems in the area of study.

Lecture Hours: 3

Repeatability: May be repeated for credit up to five times.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 7100 - Algorithm Analysis (3 Credit Hours)

This course teaches abstract techniques for analyzing and designing algorithms. Tools include cost models, run-time analysis, dynamic programming, and the study of upper and lower bounds. The goals are to understand and assess classical algorithms on various data structure (including graphs), as well as to sharpen problem solving skills and development of new algorithms.

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 7110 - Cyber-physical Systems (3 Credit Hours)

This course introduces the durable intellectual ideas of embedded systems as a technology and as a subject of study. The emphasis is on modeling, design, and analysis of cyber-physical systems, which integrate computing, networking, and physical processes.

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 7130 - Software Engineering (3 Credit Hours)

This course covers concepts in software engineering. The use of software engineering methodologies and tools as mechanisms for enhancing software quality attributes. The classification, evaluation and selection of software engineering techniques.

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 7140 - Side Channel Attacks (3 Credit Hours)

Explores side-channel attacks, a significant threat to computerized systems. Students delve into the theoretical foundations, practical techniques, countermeasures, and real-world applications of side-channel attacks. Through lectures, readings, discussions, presentations, and hands-on projects, students develop a general understanding of the different types of side-channel attacks and familiarize themselves with the principles and methodologies underlying these attacks and strategies for mitigating their impact. Students should have the following prerequisite knowledge: Computer Science background; familiarity with operating systems concepts; familiarity with advanced computer architecture; and proficiency in a programming language, preferably C or C++.

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

CSCI 7150 - Natural Language Processing (3 Credit Hours)

Natural Language Processing (NLP) covers fundamental concepts and advanced techniques in processing human language using computational methods. Topics include: tokenization, sentiment analysis, machine translation, and ethical considerations. By the end of the program, students gain expertise in building NLP models and applications. Prerequisite knowledge: basic programming with Python.

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

CSCI 7170 - Applications of Cloud Computing (3 Credit Hours)

An in-depth look at cloud computing, which has transformed our work, social interactions, and learning by operating on a vast scale and altering the economics and assumptions of computing. The course covers crucial technical aspects of cloud systems, including the virtualization and management of compute, storage, and network resources. It also includes practical exercises using well-known public cloud platforms and an academic research cloud.

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

CSCI 7180 - Advanced Studies in Extended Reality (3 Credit Hours)

A comprehensive exploration of Extended Reality (XR), including Virtual Reality (VR), Augmented Reality (AR), and Mixed Reality (MR). Students learn foundational concepts, technologies, and the evolution of XR from its theoretical origins to advanced interface design development of XR prototypes. The curriculum also covers critical challenges in XR, such as health, social, privacy, and security issues and human factors that influence usability. Students explore the current research landscape and emerging trends and technologies in XR. The course culminates with a project that applies advanced XR concepts.

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

CSCI 7200 - Emerging Sensing Technologies for Biometric Authentication (3 Credit Hours)

Examines the cutting-edge world of biometric. Explore how novel sensing methods are revolutionizing the way we authenticate identities, extending far beyond traditional security authentication system. This course provides a comprehensive overview of both classical and emerging biometric modalities, analysis the security vulnerabilities and attack models, and introduces innovative approaches like voice and ear. Through a blend of theoretical insights and practical applications, students discover how these technologies are not only transforming security but are also increasingly used in other fields. Prerequisite knowledge: While not strictly

required, it is preferable for students to have a background in basic programming (MATLAB or Python), signal processing and basic understanding of machine learning models.

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

CSCI 7210 - Introduction to Statistical Learning (3 Credit Hours)

A thorough overview of statistical learning, combining practical labs and real-world datasets to deepen understanding. Topics include: linear regression, classification, resampling methods, linear model selection and regularization, exploring non-linear models, tree-based methods, support vector machines, deep learning, survival analysis with censored data, unsupervised learning, and multiple testing techniques. Through hands-on experience and theoretical learning, students master the fundamentals of data analysis and gain insightful knowledge of the evolving field in statistical learning. Prerequisite knowledge: Basic knowledge of programming with Python or R.

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

CSCI 7230 - Topics in Optimization (3 Credit Hours)

Examines the core concepts, techniques and algorithms in Linear Optimization, also called Linear Programming (LP). Linear Programming is so useful in solving real-world optimization problems that it should be in the toolbox of each Programmer, Software Engineer, Data Scientist and Data Analyst. Its broad applications span from two-player zero-sum strategic games, such as Matching Pennies, finding optimal flows in transportation networks, scheduling industrial production processes, machine learning, to auction design in computational economics.

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

CSCI 7240 - Internet of Things and Embedded Systems (3 Credit Hours)

This course delves into the latest advancements in connected intelligent things and embedded systems, covering topics such as the Internet of Things (IoT), edge computing, machine learning, mobile computing, and sensor applications. It combines hands-on projects (including mini and term projects), extensive reading, team discussions, and collaborative research to provide students with practical experience and theoretical insights into IoT design and system development. The course is a comprehensive platform for exploring the dynamic field of connected intelligent systems.

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

CSCI 7300 - Programming Languages (3 Credit Hours)

Programming languages are a fundamental aspect of computer science, and as computer science and society evolve the need for more advanced programming languages rises. This course will provide the understanding of how to formally design and analyze programming languages using formal models. The student will gain an understanding of the syntax and semantics of programming languages to gain a deeper understanding of correctness of programs, software verification, and the wider notion of formal methods. Furthermore, through course projects the student will gain an understanding of programming in various paradigms, and in the implementation of programming languages. Strong understanding of undergraduate-level mathematical structures in computer science and theory of computation are expected

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 7340 - Machine Learning (3 Credit Hours)

This is a survey of machine learning theory and practice. The course covers the fundamental concepts and algorithms that allow computers to improve performance over time. Techniques enabling supervised learning, unsupervised learning and reinforcement learning will be covered.

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 7350 - Network and Distributed Algorithms (3 Credit Hours)

This is an introduction to algorithmic aspects of distributed computing and computation in networks. The topics considered are those that arise in systems comprised of loosely coupled, heterogeneous and failure-prone processing units, arranged in a connected structure that allows information exchange. The range of applications starts at wide-area networks, goes through clusters of workstations connected by local-area networks, to multi-processor shared-memory machines. The relevant properties of solutions reflect the communication mechanisms (message passing, shared memory), the algorithmic constraints (deterministic, randomized, quantum), the timing models (synchronous, asynchronous), and the types of failures (crashes, omissions, Byzantine). The algorithmic goals to achieve include: sharing resources in a fair manner, providing fault-tolerance and privacy, and maintaining global consistency of computations. The specific problems include: symmetry breaking, consensus, resource allocation and scheduling, renaming, and synchronization. Strong understanding of undergraduate-level distributed systems, discrete mathematics (especially graph theory) and algorithms are expected.

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 7410 - Operating Systems (3 Credit Hours)

This class considers modern time-sharing uniprocessors, multiprocessors, and distributed system. The main underlying themes, concurrency and scale, are highlighted to focus on correct, efficient, and resilient execution of applications on these systems. Both practical and theoretical considerations are covered.

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 7420 - Human-Computer Interaction (3 Credit Hours)

This course covers the fundamental concepts of human-computer interaction (HCI) including user interface design principles, human capabilities, interface technology, interface design methods and interface evaluation. Students will become familiar with the principles and characteristics of HCI as well as the processes involved in creating user-centered designs. Interfaces to emerging computing paradigms such as virtual and augmented reality, robotics, and wearable devices as well as the ethical and security implications of interface design will also be examined.

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 7440 - Evaluating Cybersecurity (3 Credit Hours)

This course teaches students the underlying principles and many of the techniques associated with the cybersecurity practice known as penetration testing or ethical hacking. The course will provide the fundamental information associated with each of the methods employed and insecurities identified. In all cases, remedial techniques will be explored. Students will develop an excellent understanding of current cybersecurity issues and ways that user, administrator, and programmer errors can lead to exploitable

insecurities.

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 7500 - Theory of Computation (3 Credit Hours)

In this course we will seek to understand what is and is not possible with modern day computers by using mathematical models to fine-grain study various forms of computation. We will study languages, Turing machines, undecidability, the time complexity classes such as P, NP, NP-complete, space complexity classes such as L and NL, the Cook-Levin theorem, reductions, poly-time hierarchy, randomized algorithms and randomized complexity classes such as BPP, approximation algorithms and hardness of approximation. Strong understanding of undergraduate-level mathematical structures in computer science and theory of computation are expected.

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 7520 - Principles of Cryptography (3 Credit Hours)

This course explains the basics of modern cryptography that is started in the 1970s and rooted in mathematics. It covers studying and analyzing constructions and algorithms that provide data confidentiality, data integrity, and authentication in the presence of third parties or the public. Cryptography is an essential element of any secure software, secure communication, and database.

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 7580 - Computer Architecture and Parallel Processing (3 Credit Hours)

This class discusses the design of modern computer chips. Quantitative design principles are emphasized throughout the class. Techniques underlying different components and aspects of modern chips are discussed with simulation and quantitative ways of comparing between the design points.

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 7585 - High Performance Computing (3 Credit Hours)

This class focuses on extracting performance from modern systems. The type of systems considered include uniprocessors (where cache performance is crucial), modern chips that have shared memory parallelism and SIMD features, distributed memory parallel systems, and accelerators like GPUs. Programming model appropriate for each of these is presented. Application of concepts to scientific kernels and practical development are emphasized.

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 7620 - Data Science (3 Credit Hours)

This class focuses on methods for computer analysis of data with focus on gaining insights. A number of algorithm families (Clustering, Classification, Association Mining, Regression and Bayesian Models) are visited. Practical and efficient implementation of existing algorithms is emphasized together with application of developed implementations on actual datasets.

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 7654 - Communication in Networks (3 Credit Hours)

In this course, we trace the evolution of networks and identify the key concepts and functions that form the basis for layered architecture. We introduce examples of protocols and services and we explain how these services are supported by networks. We explore fundamental concepts in digital communication, and focus on error control techniques that include parity check, polynomial code, and Internet checksum. Sockets programming and security are also covered.

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 7810 - Information Management (3 Credit Hours)

This course presents database design and algorithms to students. There is a review of statistics and analytics as a background in data analysis. This course acquaints students with the principles of data analysis and mining, as well as reasoning about data security and privacy. There will be a discussion of case studies from application areas.

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 7900 - Research Colloquium (1 Credit Hour)

The Colloquium Series seeks to broaden the knowledge of graduate students in the latest research that falls within the areas of study relevant to the School of Computer and Cyber Sciences. This will be accomplished by hosting weekly presentations from leading researchers.

Lecture Hours: 1

Repeatability: May be repeated for credit up to ten times.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School

Schedule Type (Primary): Lecture

CSCI 7950 - Selected Topics (3 Credit Hours)

This is the selected topics course for the MS in Computer Science program. Subject and course content will vary.

Lecture Hours: 3

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School , School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 7951 - Advanced Topics in Theoretical Foundations (3 Credit Hours)

Advanced topics in theoretical computer science. Topics may include: advanced algorithms, theory of computation, network algorithms, distributed and parallel algorithms, advanced optimization methods, software verification, cryptography theory, proof systems, and statistical learning.

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

CSCI 7952 - Advanced Topics in Computer Systems (3 Credit Hours)

Advanced topics in computer systems. Topics may include: advanced operating systems, computer architecture, high performance computing, cyber-physical systems, communication in networks, embedded systems, blockchain systems, and cloud computing.

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

CSCI 7953 - Advanced Topics in Applications (3 Credit Hours)

Advanced topics in computer and cyber science applications. Topics may include: machine learning, artificial intelligence, human-computer interaction, natural language processing, data science, optimization methods, information management, cloud computing, and statistical learning.

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

CSCI 7954 - Advanced Topics in Cybersecurity (3 Credit Hours)

In this course, students will study a variety of attacks on computer software and hardware. These attacks are caused by the vulnerabilities in the design and implementation of computer systems. The course emphasizes "learning by doing," and requires students to conduct a series of lab exercises. Through these labs, students can enhance their understanding of the principles, and be able to apply those principles to solve real problems.

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 8250 - Quantum Computing (3 Credit Hours)

This course is a presentation of quantum computing as an emerging computing paradigm based on quantum mechanics. The course acquaints the student with architecture of quantum computing built from quantum gates and circuits, as well as design and performance of quantum algorithms. The course formalizes the concepts of quantum complexity and information and presents quantum algorithms in cryptography and fault-tolerant information processing.

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 8310 - Proof Theory (3 Credit Hours)

This course teaches the theory of proofs studied as a formal and mathematical object. The language of proofs emerged as a natural place where programming languages, category theory, and complexity meet, and is becoming increasingly popular in the study of type systems, denotational semantics, concurrency theory, implicit complexity, and higher-order model checking to name a few. Tools include mathematical abstraction, theorem provers, the representation of proofs in multiple formalisms (sequent calculus, natural deduction, proof nets and their semantics) and multiple systems, as well as studying their relative expressivity and complexity. The goals are to excel in formal reasoning, have a precise and actionable understanding of the expressivity of a system compared to others, improve mathematical reasoning and the capacity to navigate between multiple representations of the same proof.

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 8320 - Verification of Software (3 Credit Hours)

The course covers formal methods theory and practice, in particular as applied to the specification and verification of software. The objective is to cover the current state of the art in formal methods theory and practice, and to impart, through intensive problem solving and hands-on work, competence and fluency in the use of formal methods to specify and analyze the behavior of large complex software systems.

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 8510 - Independent Study (1 to 3 Credit Hours)

This is a course where a student will work individually with the faculty advisor to design an individualized course of study, set course objectives and requirements, and designate student learning outcomes. It is designed to provide students with in-depth knowledge related to their area of research that falls outside the current graduate course offerings.

Contact Hours: 1 to 3

Repeatability: May be repeated for credit up to three times.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CSCI 8720 - Problems in Computer and Cyber Sciences (3 Credit Hours)

The student and the advisor identify a topic of mutual interest and establish a list of papers to be carefully studied. The student studies the papers, writes detailed and critical summary of the papers and synthesizes an understanding of the current state-of-the-art. This is followed by the formulation of open questions that will be worthy of future research. Interesting results are disseminated via presentation.

Contact Hours: 3

Repeatability: May be repeated for credit up to ten times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Directed Study (one-to-one) **Schedule Type (Additional):** Asynchronous Instruction

CSCI 8940 - Dissertation Research (1 to 9 Credit Hours)

This course, designed for students in a research-focused doctoral program, provides students the opportunity to complete dissertation work specific to their individual area of research under the supervision of their research mentors.

Contact Hours: 1 to 9

Repeatability: May be repeated for credit up to twenty times.

Grade Mode: Normal, In Progress, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Asynchronous Instruction **Schedule Type (Additional):** Dissertation

CSCI 8970 - Research Exposure (1 Credit Hour)

Presentations of selected recent research results. Students do required readings related to a presentation prior to the class and write a critical summary. Guest speakers and participants deliver the presentations. Every student conducts a thorough survey of one chosen topic of interest and writes a paper analyzing the current state-of-the-art and identifying directions for future work.

Lecture Hours: 1

Repeatability: May be repeated for credit up to six times.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

COOP 2000 - Alternating Cooperative Education (0 Credit Hours)

Student participate in a Co-op work experience related to their field of study and alternate between semesters of full-time work and enrollment in full-time school. Registration for this course during work semesters is equivalent to full-time student status. Alternating positions require a minimum of two work terms. Prerequisite(s): Minimum overall GPA (cumulative or adjusted) of 2.5, a declared major, with at least 24 credit hours complete toward a baccalaureate degree or one full semester (9 hours) toward a master's degree or post-baccalaureate work. Approval from the Career Services Office is required.

Repeatability: May be repeated for credit.

Grade Mode: Normal

Schedule Type (Primary): Directed Study (one-to-one)

COOP 2001 - Parallel Cooperative Education (0 Credit Hours)

A part-time, on-going work plan directly related to the student's field of study. Students must work a minimum of fifteen hours per week while continuing enrollment in school. The student can only maintain full-time academic status by being enrolled as a full-time student concurrent with their work plan. Prerequisite(s): Minimum overall GPA (cumulative or adjusted) of 2.5, a declared major, with at least 24 semester hours complete toward a baccalaureate degree or one full semester (9 hours) toward a master's degree or post-baccalaureate work. Minimum of two terms of work experience and approval from the Career Services Office.

Repeatability: May be repeated for credit.

Grade Mode: Normal

Schedule Type (Primary): Directed Study (one-to-one)

COOP 2002 - Cooperative Internship (0 Credit Hours)

A one semester, non-credit, paid work experience related to the student's field of study. The number of work hours is determined by the student's individual academic needs and the agency's needs. This course number is not used if the student is enrolled in an internship for credit with an academic department. Registration for this course is equivalent to full-time student status only if the internship is full-time and the student is not enrolled for course work concurrently during this period. Prerequisite(s): Minimum overall GPA (cumulative or adjusted) of 2.5, a declared major, with at least 24 semester hours complete toward a baccalaureate degree or one full semester (9 hours) toward a master's degree or post-baccalaureate work. Minimum of one term of work experience and approval from the Career Services Office.

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Directed Study (one-to-one)

COUN 3660 - Helping Skills for Personal and Professional Environments (3 Credit Hours)

An introduction to basic helping skills and their practical applications in a variety of personal and career settings. Students will learn and practice various helping techniques as well as how to apply these skills in work or personal environments.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

COUN 6620 - Human Growth and Development for Counselors (3 Credit Hours)

The course is designed to broaden understanding of human growth and development across the life span with emphasis on the interwoven domains of development (physical, cognitive, social, and emotional) and the contextual factors influencing each. Theoretical, practical, and research perspectives will be examined as they apply to the profession of counseling.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Counselor Education-EDS, Counselor Education **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Master of Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

COUN 6630 - Professional Orientation and Ethics (3 Credit Hours)

This course is an introduction to the role, responsibilities, identity, and functions of the professional counselor. It will also provide basic legal and ethical information for issues involving school and community counselors. Resources will be provided to assist students in processing and confronting a variety of professional and ethical issues that do not have specific or clear solutions. Ideas will be exchanged to help clarify individual positions on many current issues that must be met by counselors.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Counselor Education-EDS, Counselor Education **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Internship/Practicum, Thesis, Dissertation

COUN 6640 - Comprehensive Assessment in Counseling (3 Credit Hours)

This course will introduce the use of comprehensive assessment in counseling. Students will become familiar with various approaches used when conducting comprehensive assessments including, but not limited to- standardized tests, projective methods, self-report, behavioral observation, and clinical interviews. Students will also learn how to select, administer, score, interpret, report, and utilize assessment data in a variety of counseling settings.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Counselor Education **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Program Restrictions:** 1MED-COUNSEL-MED-Counselor Education

Schedule Type (Primary): Lecture

COUN 6650 - Research and Evaluation in Counseling (3 Credit Hours)

This course will introduce the basic principles and foundations of counseling research, including common research and program evaluation practices used in counseling and counselor education. Students will become familiar with the scholarly research process, understand basic psychometric concepts, and be able to perform various data analyses.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Counselor Education **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Program Restrictions:** 1MED-COUNSEL-MED-Counselor Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

COUN 6660 - Communication Skills in Counseling (3 Credit Hours)

A didactic and experiential study of the core dimensions of counseling practice that include verbal and non-verbal skills aimed at establishing an empathic relationship that facilitates the client's exploration of developmental problems and assists the client's transition to awareness and initiating steps toward cognitive/behavioral change.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Counselor Education-EDS, Counselor Education **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

COUN 6670 - Group Counseling (3 Credit Hours)

In this course, students will explore the fundamentals of group process and dynamics with an emphasis on group work in school and clinical mental health settings. The topics covered will include group theory, stages of development, ethics, methods, and group leadership. Practical approaches to group work with young people will also be addressed.

Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Graduate-Semester **Course Level Restrictions:** Graduate Semester **Program Restrictions:** 1MED-COUNSEL-MED-Counselor Education

Schedule Type (Primary): Seminar - Small Group

COUN 6680 - Theories and Techniques of Counseling (3 Credit Hours)

An introduction to the theoretical approaches to counseling and their practical applications in a variety of clinical settings. Students will examine the effects of different counselor roles and values, ethical and legal considerations, and professional organizations.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Counselor Education-EDS, Counselor Education **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

COUN 6700 - Couples and Family Counseling (3 Credit Hours)

An introduction to the principles of family systems theory and their applications in family therapy practice. Included are family life cycle development, stages of relationships, premarital assessment, marriage enrichment, intervention strategies, divorce adjustment, and issues such as codependency, single-parent families, and child, spouse, and elderly abuse. Specific techniques for conducting marriage and family therapy will be presented along with considerations of current issues and ethical practices.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Counselor Education-EDS, Counselor Education **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

COUN 6720 - Career Development Theories and Practice (3 Credit Hours)

This course will provide student counselors with the knowledge and skills necessary to conduct career counseling aimed at providing clients insight and direction related to their vocational goals. Students will examine theories of career development, sources of occupational and educational information, life-style and career decision-making processes, assessment instruments and program development.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Counselor Education-EDS, Counselor Education **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis

COUN 6760 - Counseling Across Client Backgrounds (3 Credit Hours)

This course is designed to introduce trainees to key considerations when working with individuals from varied backgrounds.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Counselor Education-EDS, Counselor Education **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching

COUN 6770 - Crisis Intervention Counseling (3 Credit Hours)

This course is designed to prepare students to respond effectively in critical situations, and to help counsel clients who are experiencing crisis events in their lives. Students will learn that crises interventions are founded on theory and be able to apply that theory to crisis intervention techniques. Special attention will be paid to counseling approaches for use with circumstantial and developmental life crisis.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Counselor Education-EDS, Counselor Education **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

COUN 6780 - Introduction to School Counseling (3 Credit Hours)

The course will provide an introduction to current concepts relative to the school counseling profession. Practical application of concepts of working with students and teachers within school environments will be covered. Structuring and implementation of a feasible, comprehensive school counseling program will be emphasized.

Prerequisite(s): COUN 6630 >= C and COUN 6660 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Counselor Education-EDS, Counselor Education **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

COUN 6790 - Clinical Mental Health Counseling (3 Credit Hours)

This course examines the practice of clinical mental health counseling and explores current issues and approaches in the field. Emphasis is placed on ethical standards and the counselor's role in supporting positive change. Students will learn how to plan and implement effective counseling programs, gain an understanding of the responsibilities of clinical mental health counselors, and become familiar with the services offered in community agencies and the settings where counseling is provided.

Prerequisite(s): COUN 6630 >= C and COUN 6660 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Counselor Education-EDS, Counselor Education **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

COUN 6800 - Diagnosis and Psychopathology in Counseling (3 Credit Hours)

This course focuses on the role of the DSM and diagnosis in counseling. Students will become familiar with the current classification system of psychopathology while studying common affective, cognitive, behavioral, and personality disorders from both etiological and treatment outcomes perspectives.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Counselor Education-EDS, Counselor Education **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

COUN 6820 - Administration and Consultation for School Counselors (3 Credit Hours)

This is a didactic/experiential course providing beginning counselors with the knowledge necessary to: 1) develop and administer a comprehensive counseling program in school or community settings, and 2) develop the skills necessary to function as a consultant in psycho-educational and organizational settings.

Prerequisite(s): COUN 6780 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Counselor Education-EDS, Counselor Education **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

COUN 6830 - Advanced Mental Health Practices for School Counselors (3 Credit Hours)

This advanced course prepares future school counselors to understand how childhood experiences and brain development influence student growth and adjustment. Emphasis is placed on the interaction of psychological, social, and emotional factors that shape overall well-being and learning. Students will explore theory, research, and applied practice to better recognize how life experiences affect development. Through case studies and practical strategies, participants will strengthen their ability to support students as they navigate challenges and build skills for success.

Prerequisite(s): COUN 6780 and COUN 6820 and COUN 6880

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Student Class Restrictions: Graduate **Course Level Restrictions:** GS Graduate

Schedule Type (Primary): Lecture

COUN 6840 - Introduction to Addictions Counseling (3 Credit Hours)

This course is specifically designed to function as a specialty course in the graduate counselor training program. The course experience provides an overview of the strategies, methods, and knowledge necessary for the effective identification and treatment of a broad range of addictive behaviors. The course will examine the biological, psychological, sociological, and behavioral components of addiction. As such, the course will focus on such issues as drug effects, assessment and diagnosis, counseling interventions, effects on family functioning and family interventions, relapse prevention, change maintenance strategies, primary prevention programming, and the related research.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Counselor Education-EDS, Counselor Education **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis

COUN 6850 - Treatment Planning in Clinical Mental Health Counseling (3 Credit Hours)

This course is advanced study in theoretical techniques and interventions in counseling to treat psychopathology as defined in the DSM 5. This course will provide students with an understanding of abnormal behavior including the etiology, diagnoses, and implications for treatment. Students will review topics associated with specific disorders including the prevalence, diagnostic symptoms, risk factors, psychosocial implications, psychopharmacological treatments, and best practice, evidence-based therapeutic interventions. Students will develop a treatment plan for specific diagnoses. Experiential in nature, the course will help students integrate diagnostic, case conceptualization, and treatment planning skills, and review empirically-supported treatments and best practices for measuring client outcomes in a managed care context.

Prerequisite(s): COUN 6680 >= C and COUN 6800 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Counselor Education-EDS, Counselor Education **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

COUN 6860 - Counseling Children and Adolescents (3 Credit Hours)

This course has been specifically designed for graduate students specializing in the school counseling track and for those students in the community mental health counseling specialty that hold a professional interest in working extensively with children and adolescents in a variety of community practice settings. The course is designed to address both theoretical and practical aspects of counseling children. The course will synthesize concepts from research and practice and will involve students in current methods for helping children and adolescents with specific developmental, social, or behavioral problems.

Prerequisite(s): COUN 6620 >= C and COUN 6630 >= C and COUN 6660 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Counselor Education-EDS, Counselor Education **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

COUN 6870 - Identity, Relationships, and the Counseling Process (3 Credit Hours)

This course seeks to explore the field of human identity and relationships through focused research. Students will conduct an in-depth examination of personal and interpersonal development, with attention to individual and societal factors that shape behavior and well-being. Emphasis is placed on theoretical approaches to counseling related to identity and relationships, along with applications for treatment planning and practice.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Counselor Education-EDS, Counselor Education **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

COUN 6880 - Practicum in School Counseling (3 Credit Hours)

Counseling Practicum is designed to meet certification and accreditation standards. This is a tutorial form of instruction designed to be completed in a K-12 school setting outside of the university. The practicum provides an opportunity for the student to perform a variety of professional counseling activities that a regularly employed counselor in the schools would be expected to perform. The program requires students to complete a clinically supervised field experience of 100 clock hours over the course of the semester.

Prerequisite(s): COUN 6630 >= C and COUN 6660 >= C and COUN 6680 >= C and PSYC 6147 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Counselor Education-EDS, Counselor Education **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Counselor Ed Clinical/Intern Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

COUN 6890 - Practicum in Clinical Mental Health Counseling (3 Credit Hours)

The Practicum in Clinical Mental Health Counseling is designed to function as students' first clinical skills-building experience with particular emphasis on helping each student develop their therapeutic skills with a range of client presenting concerns within a clinical mental health setting. Candidates are required to complete a supervised clinical experience that totals a minimum of 150 clock hours.

Prerequisite(s): COUN 6630 >= C and COUN 6660 >= C and COUN 6680 >= C and COUN 6850 >= C

Lecture Hours: 2 **Lab Hours:** 1 to 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Counselor Education-EDS, Counselor Education **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

Additional Course Fee: Counselor Ed Clinical/Intern Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

COUN 6900 - Internship I in School Counseling (3 Credit Hours)

Counseling Internship I is designed to meet certification and accreditation standards. This is a tutorial form of instruction designed to be completed in a K-12 school setting outside of the university. The internship provides an opportunity for the student to perform a variety of professional counseling activities that a regularly employed counselor in the schools would be expected to perform. The program requires students to complete a clinically supervised internship of 300 clock hours each semester.

Prerequisite(s): COUN6880 >= C

Lecture Hours: 2 **Lab Hours:** 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Counselor Education-EDS, Counselor Education **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Counselor Ed Clinical/Intern Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

COUN 6910 - Internship I in Clinical Mental Health Counseling (3 Credit Hours)

Clinical Mental Health Internship I is a tutorial form of instruction designed to be completed in a counseling facility outside of the university. The internship provides an opportunity for the candidate to perform, within a clinical mental health setting, a variety of professional counseling activities that a regularly employed staff member in the setting would be expected to perform. Students are required to complete two clinically supervised internships of 300 supervised clinical hours each semester across the full academic term for total of 600 hours). At least forty percent (120 hours per semester) of these hours must be direct services with clients. Students are required to lead or co-lead counseling or psychoeducational group by the end of Internship II (COUN 6910/COUN 6930).

Prerequisite(s): COUN 6880 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Counselor Education-EDS, Counselor Education **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

Additional Course Fee: Counselor Ed Clinical/Intern Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

COUN 6920 - Internship II in School Counseling (3 Credit Hours)

This course is designed to meet certification and accreditation standards. This is a tutorial form of instruction designed to be completed in a K-12 school setting outside of the university. The internship provides an opportunity for the student to perform a variety of professional counseling activities that a regularly employed counselor in the schools would be expected to perform. The program requires students to complete a clinically supervised internship of 300 clock hours each semester.

Prerequisite(s): COUN 6900 >= C

Lecture Hours: 2 **Lab Hours:** 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Counselor Education-EDS, Counselor Education **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Counselor Ed Clinical/Intern Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

COUN 6930 - Internship II in Clinical Mental Health Counseling (3 Credit Hours)

Clinical Mental Health Internship II is a tutorial form of instruction designed to be completed in a counseling facility outside of the university. The internship provides an opportunity for the candidate to perform, within a clinical mental health setting, a variety of professional counseling activities that a regularly employed staff member in the setting would be expected to perform. Students are required to complete two clinically supervised internships of 300 supervised clinical hours each semester across the full academic term for total of 600 hours. At least forty percent (120 hours per semester) of these hours must be direct services with clients. Students are required to lead or co-lead counseling or psychoeducational group by the end of Internship II (COUN 6910/COUN 6930).

Prerequisite(s): COUN 6910 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Counselor Education-EDS, Counselor Education **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

Additional Course Fee: Counselor Ed Clinical/Intern Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 100

COUN 6950 - Problems and Issues in the Practice of Counseling (1 to 3 Credit Hours)

The course is a variable credit, supervised independent study or seminar in contemporary problems and issues in the field of counseling. Students will receive instructor supervision and expertise, and complete a collaboratively developed research project.

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Counselor Education-EDS, Counselor Education **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

COUN 6960 - Introduction to Play Therapy (3 Credit Hours)

Play therapy is a course designed to introduce the student to play therapy and provide exposure to a wide variety of play therapy techniques that can be utilized with clients in a counseling setting. This course is highly experiential, and participation in the play activities is required.

Lecture Hours: 3 **Contact Hours:** 40 to 41.25

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

CPRD 5602 - Basic Cardiac Life Support II (1 Credit Hour)

In this course the student completes a Basic Cardiac Life Support Healthcare Provider course according to the standards established by the American Heart Association.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Major Restrictions: Advanced Standing DMD

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

CRJU 1103 - Introduction to Criminal Justice (3 Credit Hours)

The history and philosophy of law enforcement, criminal justice administration, and criminal rehabilitation. Criminal justice is examined as a product of social forces and as a modern institution which impacts upon other social institutions. Emphasis on criminal justice as a process involving many organizations and agencies with diverse clientele and purposes.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis

CRJU 2950 - Selected Topics (1 to 3 Credit Hours)

A variable content course. Either 1) a faculty-initiated course which allows students the opportunity to enroll in specifically titled courses, or 2) a student-initiated directed study at an introductory level. Prerequisite(s): Permission of instructor; and contractual agreement with department chair. Only one 2950 course may be included in the major.

Prerequisite(s): CRJU 1103 >= D

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

CRJU 3000 - Criminology (3 Credit Hours)

The study of criminal behavior and its treatment. The development of criminal behavior and societal reaction in contemporary society are addressed in terms of major social theories of crime and its causation. The treatment and rehabilitation of the offender by probation, imprisonment, and parole are addressed in terms of philosophy and policy.

Prerequisite(s): SOCI 3001 >= C or SOCI 3002 >= C or SOCI 3003 >= C or SOSC 3001 >= C or SOSC 3002 >= C or SOSC 3003

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group, Asynchronous Instruction

CRJU 3305 - Criminal Evidence (3 Credit Hours)

A thorough study of the rules of evidence with specific emphasis on the application of these rules in preparing reports and presenting evidence in the criminal justice system. This will include a history and development of evidentiary rules, both federal and state, including substitutes and general admissibility tests. Study of testimonial documentary, real (physical) evidence and exclusion of evidence based on constitutional requirements.

Prerequisite(s): CRJU 1103 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CRJU 3325 - Homeland Security and Counterterrorism (3 Credit Hours)

Provides a clear understanding of the principles of homeland security and counterterrorism, the roles and responsibilities of constituencies, and the implications for criminal justice fields. Explores the concept of terrorism, domestic and international terrorism, counterterrorism, and the role of homeland security. Students examine, analyze, and discuss law enforcement and security issues that relate to confronting terrorism such as: intelligence and warning, border and transportation security, domestic counterterrorism, protecting critical infrastructure, defending against catastrophic threats, and emergency preparedness and response.

Prerequisite(s): CRJU 1103 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CRJU 3327 - Crimes Against People (3 Credit Hours)

The course will analyze the various issues which arise in investigating crimes against persons, including the investigation of such crimes, along with special problems such as the growing problem of crimes against the elderly.

Prerequisite(s): CRJU 1103 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CRJU 3328 - Introduction to Police Science and Investigations (3 Credit Hours)

A comprehensive introduction and overview to the social scientific study of the police, criminal investigations, investigative techniques. The advent of the police and their changing role in American society are examined. Major topics include: the historical foundations of the American police, the variability in both police officers and the structure of law enforcement organizations, the nature and realities of police work, various issues confronting the police in a democratic context, and future trends and directions in policing practice and research.

Prerequisite(s): CRJU 1103 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CRJU 3330 - Social Deviance (3 Credit Hours)

Covers theoretical and empirical issues in the understanding and designations of deviant behavior; addresses the analysis or the social causes and consequences of deviance, conformity, and societal reactions.

Prerequisite(s): SOCI 1160 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Independent Study,Directed Study (one-to-one),Asynchronous Instruction

CRJU 3331 - Youth and Society (3 Credit Hours)

A study of the history of changing conceptions of childhood, the family, and childhood socialization; the invention of adolescence and the various attributions to childhood and adolescence; and a survey of major developmental schemes of adolescence with an emphasis on characteristics of American adolescence as conducive to delinquency.

Prerequisite(s): SOCI 1160 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Asynchronous Instruction,Practice Teaching,Internship/Practicum,Thesis,

CRJU 3332 - Juvenile Delinquency (3 Credit Hours)

The philosophy, theory, and history of juvenile delinquency, including its causes, preventions, and measurement from sociological perspectives.

Prerequisite(s): SOCI 1160 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Asynchronous Instruction,Practice Teaching,Internship/Practicum,Thesis,

CRJU 3333 - Introduction to Corrections (3 Credit Hours)

A survey of the correctional field, including probation, imprisonment, parole, and community corrections. Specific concern will be with the evolution of these programs, their present structure, and current problems.

Prerequisite(s): CRJU 1103 >= D

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis

CRJU 3334 - Institutional Corrections (3 Credit Hours)

A survey of institutional confinement or the punishment and rehabilitation of criminal offenders. Specific concerns will focus on the history of confinement, the philosophical, legal, and social justifications of incarceration, and the current problems and criticisms of correctional institutions.

Prerequisite(s): CRJU 1103 >= D or SOCI 1101 >= D or SOCI 1101H >= D

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis

CRJU 3335 - Community Corrections (3 Credit Hours)

A survey of non-institutional corrections in the American administration of justice including relevant legal and philosophical issues surrounding those practices. Specific concerns include the use of probation and parole in relation to institutional confinement, the variety of contemporary programs, and their presence in society.

Prerequisite(s): (CRJU 1103 >= D or SOCI 1101 >= D or SOCI 1101H >= D) and SOCI 1160 >= D

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis

CRJU 3336 - Women, Crime and the Criminal Justice System (3 Credit Hours)

A sociological analysis of women as criminal offenders and as workers in criminal justice fields. Examines the socio-historical construction of gender for its influences on criminal law and the practices of criminal justice agencies. Covers historical perspectives on women and crime, the adequacy of contemporary criminological perspectives for explaining female criminality.

Prerequisite(s): CRJU 1103 >= C or SOCI 1160 >= C or WGST 1101 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

CRJU 3341 - White Collar Crime (3 Credit Hours)

The study of criminal abuse of trust and power in corporations and government, including corporate abuse of power against owners, employees, public-in-contact, and the public-at-large, as well as official response to such crimes. Organized crime, computer crime, electronic crime, securities fraud, and relevant law enforcement strategies are analyzed and contrasted with street crime.

Prerequisite(s): CRJU 1103 >= D or SOCI 1101 >= D or SOCI 1101H >= D

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis

CRJU 3342 - Organized Crime (3 Credit Hours)

This course will provide students a clear understanding of organized crime from social, political and economic perspectives: what it is, how it has evolved, where it stands, where it is headed, and how societies can respond to it. This course will dispel long-standing myths surrounding organized crime and consider the phenomenon in all its forms. This course not only studies the origins of organized crime, it will also analyze current topics of drug trafficking, gangs and terrorism, as well as organized crime groups from South and Central America, Japan, Russia, Ireland, and the Italian mafia.

Prerequisite(s): CRJU 1103 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CRJU 3540 - Cyber Crime (3 Credit Hours)

An introduction to cyber crime from a criminological perspective. This course will cover the history of computer based crime; the legal, social, and technical impact of cybercrime; and the types of crimes committed with the assistance of a computer. Additional topics include investigating and policing the cyber world, punishment and jurisdiction issues, and victimization.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CRJU 3600 - Victimology and Victimization (3 Credit Hours)

An overview of the sociological approach to victimology and victimization. Topics include: situating victimization within the broader criminological sciences, classic and contemporary theoretical approaches to victimization, the social construction of victimization and "worthy victims," approaches to victimization within the criminal justice system, and impact of victimization on individuals and communities. The role of social inequalities is examined.

Prerequisite(s): CRJU 1103 >= C

Cross-Listed Course(s): SOCI 3600

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CRJU 3950 - Selected Topics (1 to 3 Credit Hours)

A variable content course. Either 1) a faculty-initiated course which allows students the opportunity to enroll in specifically titled courses, or 2) a student-initiated directed study at an introductory level. Prerequisite(s): Permission of instructor, and contractual agreement with department chair.

Prerequisite(s): SOCI 1160 >= D

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

CRJU 4010 - Hate Crimes (3 Credit Hours)

This course explores the contemporary social problem "hate crime." Hate and discrimination have long been part of our collective experience, but only recently has the term hate crime emerged to define very specific forms of discrimination that involve criminal acts motivated by bias. This course will seek to examine this emerging social phenomenon.

Prerequisite(s): SOCI 1160 >= D

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Directed Study (one-to-one),Asynchronous Instruction

CRJU 4162 - Race, Crime, and Justice (3 Credit Hours)

This course is designed to examine the complex inter-relationships between race, crime and the criminal justice system along with an overview of the contemporary response to race and crime in the United States. The study of race and crime must be grounded in a critical, reflexive framework that allows for—and encourages—rigorous debate, particularly about social inequality, its origins, and its consequences. Upon completing this course, students should have a clear understanding of the role that race and ethnicity play within the criminal justice system.

Prerequisite(s): CRJU 1103 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CRJU 4172 - Comparative Criminal Justice Systems (3 Credit Hours)

This course is designed to investigate differing policies, practices, and procedures of crime and justice internationally. The course will focus on the ways nations define and respond to criminal behavior. The historical development of criminal justice systems will be reviewed as well as important challenges currently facing criminal justice systems around the world. This course may be offered as a distance education option - see department of social sciences for details.

Prerequisite(s): CRJU 1103 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study,Directed Study (one-to-one),Asynchronous Instruction

CRJU 4336 - Gender and Victimization (3 Credit Hours)

A sociological analysis of crime victims and victim-service agencies. Traces the historical development of the field of victimology. Examines the influence of gender on victimization experiences and practices of criminal justice and victim-service agencies.

Prerequisite(s): (SOCI 3380 >= C) and (SOCI 3002 >= C or SOCI 3003 >= C or SOSC 3002 >= C or SOSC 3003 >=C or WGST 1101 >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Directed Study (one-to-one),Asynchronous Instruction

CRJU 4433 - Juvenile Delinquency and Justice (3 Credit Hours)

The philosophy, theory, and history of juvenile delinquency, including its causes, preventions, and measurement from sociological perspectives. The course examines the historical development of juvenile justice, including the establishment of the juvenile court and juvenile corrections in America. Topics include: the philosophical, social, and legal justifications of juvenile justice; contrasts the processing of juveniles with that of adult offenders; and focuses on contemporary issues and problems in juvenile justice.

Prerequisite(s): CRJU 1103 >= C

Cross-Listed Course(s): SOCI 4433

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CRJU 4436 - Obedience and Authority (3 Credit Hours)

An examination of the interactions among social structures, societal conditions and social selves that promote obedience to authority as well of those that build communities of dissent and resistance.

Prerequisite(s): (SOCI 3002 >= C or SOCI 3003 >= C) and SOCI 3380 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group, Directed Study (one-to-one), Asynchronous Instruction

CRJU 4441 - Violence and the South (3 Credit Hours)

Explores whether there is a relationship between the South and violence and examines different explanations for southern violence. Examines contemporary and historical studies about violence, including racial violence, homicide, violence against women, and violence in the criminal justice system.

Prerequisite(s): SOCI 1101 >= D or SOCI 1101H >= D or CRJU 1103 >= D

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis

CRJU 4540 - Law Enforcement in the Digital Age (3 Credit Hours)

This course provides an overview of current research and perspectives focusing on law enforcement issues in the digital age. We will cover and discuss current criminological concepts and understandings related to cybercrime, cyberdeviance, cyberterrorism, cyberwarfare, the deep web, as well as legal and jurisdictional issues for citizens and law enforcement.

Prerequisite(s): SOCI 1101 >= D or SOCI 1101H >= D or CRJU 1103 >= D

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CRJU 4950 - Selected Topics (1 to 3 Credit Hours)

A variable content course. Either as a faculty initiated course which allows students the opportunity to enroll in specifically titled courses, or as a student initiated directed study. Prerequisite(s): Junior or senior standing; 6 hours of advanced sociology or criminal justice; permission of instructor; and contractual agreement with department chair.

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis

CRJU 4960 - Undergraduate Internship (1 to 3 Credit Hours)

A service-learning experience based in an institution/agency, emphasizing the completion of specific tasks and the acquisition of specific knowledge, skills, and values under the supervision of the university, the academic supervisor, and the cooperating institution/agency. Prerequisite(s): Permission of instructor.

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

CRJU 4990 - Undergraduate Research (3 Credit Hours)

Independent research on a topic of student choice selected in consultation with an instructor, who will supervise the research. The student must submit a contract proposal for the research project prior to enrolling in the course. Prerequisite(s): Junior or Senior Standing; 12 hours of advanced criminal justice courses; and contractual agreement with department chair.

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

CRJU 6430 - Social Deviance (3 Credit Hours)

The purpose of this course is to provide a sociological analysis of "deviance" with an emphasis on the social construction of deviance and deviant behavior. The course explores major theoretical explanations for understanding and defining who and what gets defined as deviant and under what circumstances as well as the social organization of deviance. Prerequisite(s): Permission of the MPA Director.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture

CRJU 6432 - Juvenile Delinquency and Justice (3 Credit Hours)

This course uses an integrated approach to examine how theories of delinquency causation influence public policy responses. The course focuses on juvenile justice as a legal system, examines motives for the development of the juvenile court system, and analyzes the organization and processes of the contemporary juvenile court and correctional system. Prerequisite(s): Permission of the MPA Director.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture

CRJU 6436 - Intimate Partner Violence (3 Credit Hours)

This course uses a criminological and sociological perspective to understand the criminal justice system's response to intimate partner abuse and violence. The development of the field of victimology and the response of social service agencies to these issues is also explored, especially with regard to how victim service agencies intersect with the criminal justice system. Prerequisite(s): Permission of MPA Director.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture

CLAS 1301 - Adaptive Thinking and Learning (3 or 4 Credit Hours)

Designed to provide students with the academic skills necessary for a successful and fulfilling college career.

Lecture Hours: 3 or 4 **Contact Hours:** 3 or 4

Repeatability: Not Repeatable

Grade Mode: Normal (A,B,C,D,F)

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous

CENG 2001 - Introduction to Cybersecurity Engineering (3 Credit Hours)

The goals of this course are: to introduce basic concepts in cybersecurity engineering in an integrated manner; to motivate basic concepts in the context of real applications; to illustrate a logical way of thinking about problems and their solutions; and convey the excitement of the profession. STEM GPA Eligible Course

Prerequisite(s): CYBR 2600 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal

Program Restrictions: 1BS-CYBE-BS-Cybersecurity Eng

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

CENG 4100 - Critical Infrastructure Security (3 Credit Hours)

This course explores the principles, challenges, and strategies involved in protecting critical infrastructure systems. Students will examine threats from cyberattacks, natural disasters, and human error, and learn how to assess vulnerabilities, implement risk management frameworks, and apply security technologies.

Prerequisite(s): CSCI 4532 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal

Program Restrictions: 1BS-CYBE-BS-Cybersecurity Eng

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

CENG 4700 - Secure Design Engineering (3 Credit Hours)

This course addresses the engineering-driven actions necessary to develop more defensible and survivable systems- including the components that compose and the services that depend on those systems.

Prerequisite(s): CSCI 3400 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal

Program Restrictions: 1BS-CYBE-BS-Cybersecurity Eng

Schedule Type (Primary): Lecture/Supervised Lab/Clinic
