Grade Mode: N- Normal (A, B, C, D, F)
Schedule Type (Primary): Lecture

CYBR 2000 - Introduction to Cybersecurity (3 Credit Hours)

Overview of information security practices and needs. Topics include information security, types of attacks, risk analysis and management, security technologies, and basic information security implementation.

Prerequisite(s): AIST 2310 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

CYBR 2600 - Introduction to Networking and Cyber Security (4 Credit Hours)

Introduces networking technology and information security practices. Topics include: network models and protocols as well as information security fundamentals. The course includes hands-on lab activities where techniques and procedures are demonstrated and implemented. STEM GPA eligible course.

Prerequisite(s): AIST 2110 >=C or CSCI 1301 >=C

Lecture Hours: 3 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

CYBR 3100 - Introduction to Defensive Cyber Operations (3 Credit Hours)

Overview of network security activities and techniques. Heavy use of information security tools will be demonstrated and practiced.

Prerequisite(s): CYBR 2600 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Cybersecurity, Computer Science, Cybersecurity Engineering, Cyber Operations, Information Technology

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CYBR 3200 - Cyber Network Defense and Counter Measures (3 Credit Hours)

Emphasis placed on understanding the tools and devices used to secure a computer network (i.e. firewall, IDS, IPS). Course includes hands-on lab activities where techniques and procedures are displayed and tested.

Prerequisite(s): CYBR 2600 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Cybersecurity, Computer Science, Cybersecurity Engineering, Cyber Operations, Information Technology

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CYBR 4400 - Digital Forensics (3 Credit Hours)

Overview of information security forensics activities. Topics include digital forensics investigative basics, techniques, and digital forensics examination criteria. Course includes hands-on lab activities where techniques and procedures are displayed and tested.

Prerequisite(s): AIST 3720 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Cybersecurity, Computer Science, Cybersecurity Engineering, Cyber Operations, Information Technology

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CYBR 5001 - Fundamentals of Programming in Cybersecurity (3 Credit Hours)

This course emphasizes analytical thinking and teaches problem solving through an introduction to basic programming structures. It covers design of well-structured algorithms using appropriate logic structures with simple data types and data structures.

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Asynchronous Instruction

CYBR 5002 - Introduction to Networking and Cybersecurity (3 Credit Hours)

This course explores networking technology and information security practices. It includes hands-on lab activities where techniques and procedures are demonstrated and implemented. Students learn about network models, the protocols they utilize, and best security practices.

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Asynchronous Instruction

CYBR 5003 - Offensive and Defensive Cybersecurity (3 Credit Hours)

Introduction to offensive and defensive cybersecurity. Building upon foundational knowledge from the introduction to networking and cybersecurity course, students explore advanced concepts, tools, and techniques. The course emphasizes practical skills through hands-on lab exercises, enabling students to apply theoretical knowledge in real-world scenarios.

Prerequisite(s): CYBR 5002 >= C

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Asynchronous Instruction

CYBR 5004 - Fundamentals of Operating Systems (3 Credit Hours)

An introduction to operating systems geared towards future administrators. Includes coverage of operating system roles, functions and services, hardware components, virtualization, and the installation, configuration, and administration of a secure operating system.

Prerequisite(s): CYBR 5002 >= C

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Asynchronous Instruction

CYBR 5600 - Networking and Cybersecurity (3 Credit Hours)

This course explores networking technology and information security practices. The course includes hands-on lab activities where techniques and procedures are demonstrated and implemented. Students will learn about network models, the protocols they utilize, and best security practices.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CYBR 6250 - Scripting and Automation for Cybersecurity (3 Credit Hours)

This course provides students with the basic ability to create simple scripts/programs to automate and perform security operations, and to provide students with the skills necessary to implement algorithms using programming languages to solve problems. Special emphasis is placed on scripts related to attacking and defending, which includes basic security practices in developing scripts/programs.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CYBR 6400 - Digital Forensics (3 Credit Hours)

This course presents an overview of information security forensics activities. Topics include digital forensics investigative basics, techniques, and digital forensics examination criteria. The course includes hands-on lab activities where techniques and procedures are displayed and tested.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: School of Comp & Cyber Science **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CYBR 7000 - Cryptography (3 Credit Hours)

A comprehensive review of concepts and techniques of modern cryptography. Students explore the theoretical foundations and practical applications of cryptographic systems used to secure information in digital environments.

Lecture Hours: 3 **Other Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

College Restrictions: SCHOOL OF COMPUTER AND CYBER SCIENCES

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CYBR 7100 - Ethical Hacking and Penetration Testing (3 Credit Hours)

A comprehensive introduction to the principles and practices of ethical hacking and penetration testing. Students learn how to identify vulnerabilities in computer systems, networks, and applications, and develop the skills to assess and improve cybersecurity defenses.

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

College Restrictions: SCHOOL OF COMPUTER AND CYBER SCIENCES

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CYBR 7300 - Network Security (3 Credit Hours)

The principles and practices of network security, including the design and implementation of secure networks, intrusion detection and prevention, and secure communication protocols.

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

College Restrictions: SCHOOL OF COMPUTER AND CYBER SCIENCES

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CYBR 7500 - Cloud and Edge Security (3 Credit Hours)

This course focuses on securing cloud environments, addressing the unique challenges and best practices for cloud security, including architecture, data protection, and compliance.

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

College Restrictions: SCHOOL OF COMPUTER AND CYBER SCIENCES

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

CYBR 7550 - IoT Security (3 Credit Hours)

Examines the unique security challenges and solutions associated with the Internet of Things (IoT), including device security, network security, and data protection in IoT environments.

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

College Restrictions: SCHOOL OF COMPUTER AND CYBER SCIENCES

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

DASC 1301 - Data Science Programming I (4 Credit Hours)

An introduction to programming concepts and methodologies using Python. Students learn the basics of Python programming, including data types, control structures, functions, and modules, with a focus on data science applications.

Prerequisite(s): MATH 1001 >= C or MATH 1101 >= C or MATH 1111 >= C or MATH 1113 >= C or MATH 1220 >= C or MATH 2011 >= C

Lecture Hours: 3 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

DASC 1302 - Data Science Programming II (3 Credit Hours)

A continuation of Introduction to Data Science Programming I with Python. It covers more advanced programming concepts and techniques, including object-oriented programming, data structures, and algorithms, with an emphasis on data science applications.

Prerequisite(s): AIST 2110 >= C or CSCI 1301 >= C or DASC 1301 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

DASC 2030 - Mathematical Foundations of Data Science (3 Credit Hours)

Covers the mathematical foundations of data science using the Python programming language. Math topics include: matrices, linear algebra, calculus, and asymptotic analysis. The course also covers advanced topics such as: probabilities, statistics, trees, graphs, recursion, and Markov chains.

Prerequisite(s): CSCI 1302 >= C or DASC 1302 >= C

Lecture Hours: 3

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

DASC 3001 - Data Science Lifecycle (3 Credit Hours)

An overview of the data science lifecycle, including data collection, cleaning, exploration, analysis, and visualization. Students learn the methodologies and tools used throughout the lifecycle and apply them to real-world data science projects.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: School of Computer and Cyber Sciences **Program Restrictions:** BS in Data Science

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

DASC 3230 - Data Security and Privacy (3 Credit Hours)

An in-depth understanding of data security and privacy issues in the context of data science. Topics include: cryptographic techniques, data encryption, network security, privacy-preserving data mining, and legal and ethical issues related to data privacy.

Prerequisite(s): CYBR 2600 >= C and CSCI 2700 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

DASC 3400 - Data Structures and Algorithms (3 Credit Hours)

The implementation and analysis of data structures using Python. Students learn about various data structures such as arrays, linked lists, stacks, queues, trees, and graphs, and understand their applications in solving complex problems.

Prerequisite(s): CSCI 1302 >= C or DASC 1302 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

DASC 4260 - Computer Vision (3 Credit Hours)

The principles and techniques of computer vision. Students learn about image processing, feature detection, object recognition, and deep learning applications in computer vision.

Prerequisite(s): (CSCI 3400 >=C or DASC 3400 >=C) and MATH 3280 >=C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

DASC 4712 - Data Science Capstone (3 Credit Hours)

The capstone course is designed for students to apply their knowledge and skills in a comprehensive data science project. Students work in teams to solve real-world problems, present their findings, and demonstrate their proficiency in data science.

Prerequisite(s): (CSCI 3400 >=C or DASC 3400 >=C) and MATH 4251 >=C

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

DASC 4740 - Data Mining (3 Credit Hours)

The principles and techniques of data mining. Topics include: data preprocessing, association analysis, classification, clustering, and anomaly detection.

Prerequisite(s): CSCI 3430 >=C and MATH 3250 >=C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

DASC 4760 - Big Data and Analytics (3 Credit Hours)

Introduction to the concepts and techniques of big data and analytics. Students learn about big data technologies, data storage, processing frameworks, and analytics techniques used to handle and analyze large datasets.

Prerequisite(s): (CSCI 3400 >=C or DASC 3400 >=C) and MATH 4251 >=C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

DASC 4850 - Machine Learning (3 Credit Hours)

The fundamental concepts and algorithms of machine learning, including supervised and unsupervised learning, model evaluation, and feature selection. Students implement machine learning algorithms and apply them to real-world data.

Prerequisite(s): CSCI 3430 >=C and MATH 3250 >=C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

DASC 4851 - Deep Learning (3 Credit Hours)

An in-depth understanding of deep learning techniques and their applications. Topics include: neural networks, convolutional neural networks, recurrent neural networks, and deep learning frameworks such as TensorFlow and PyTorch.

Prerequisite(s): DASC 4850 >=C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

DATA 1501 - Introduction to Data Science (3 Credit Hours)

This course is intended to provide an introduction to the field of Data Science. Students will develop skills in appropriate technology and basic statistical methods by completing hands-on projects focused on real-world data and addressing the social consequences of data analysis and application.

Prerequisite(s): MATH 1001 >= D or MATH 1111 >= D or MATH 1113 >= D or MATH 2011 >= D or MATH 2011H >= D

Core IMPACTS Requirement(s) Satisfied: Technology, Mathematics, and Sciences (STEM)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

DATS 7100 - Introduction to Statistical Models (3 Credit Hours)

This course offers Data Science students an introduction to the basic statistical models for data science. It covers the descriptive statistics, common discrete and continuous distribution models. Emphasis is on utilizing these statistical models in making inference on parameter estimation and hypothesis testing for Data Science.

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 0

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Major Restrictions: DASC Data Science **Degree Restrictions:** MS Master of Science with a Major in Data Science **Campus**

Restrictions: AU Online

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

DATS 7510 - Programming for Data Analysis (3 Credit Hours)

Hands-on exposure to programming, data management and report generation with one of the most popular statistical software packages.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_BIOS, MS_BIOS, MS_DSCI **Campus Restrictions:** AU Online

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

DATS 7530 - Computing for Data Science (3 Credit Hours)

Provides students with hands-on experience of understanding the challenges in analyzing big data. Introduces a Linux-based environment for data scientists. A variety of topics are covered, including database management and manipulation, computation resource management, parallel computing and GPU-based computation. This is an object-oriented course, with students collaboratively

working on projects using shared resources. By running the computations on a cloud platform, students gain valuable first-hand experience of working in a computational environment. The course is primarily divided into four modules including Linux environment, Data manipulation, SQL database, and R module.

Prerequisite(s): DATS 7510 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_BIOS, MS_BIOS, MS_DSCI **Campus Restrictions:** AU Online

Schedule Type (Primary): Asynchronous Instruction

DATS 7760 - Data and Visual Analytics (3 Credit Hours)

Introduces students to high performance computing and statistical techniques used for visualizing high-dimensional and complex data. The course emphasizes how high performance parallel computing with CPUs and GPUs can be used for data analytics tasks, such as data cleaning and mining, dimension reduction and regularization, clustering, graph algorithms, decision trees, random forests, hierarchical models, and fitting other statistical and mathematical structures to both effectively visualize and analyze data. The course emphasizes how to utilize software to exploit the synergies between computation and visualization. Students work in small groups to complete a team project, which requires a poster presentation and final technical report.

Prerequisite(s): DATS 7510 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_BIOS, MS_BIOS, MS_DSCI **Campus Restrictions:** AU Online

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

DATS 7860 - Statistical and Machine Learning for Big Data (3 Credit Hours)

This course introduces students to many of the important contemporary topics in statistical and machine learning, with an emphasis on big data methods and applications. Both supervised and unsupervised learning techniques will be covered. Topics included in this course are penalized regression and classification procedures, cross-validation, basis expansions, kernel smoothing and regression, model selection, boosting, random forests, support vector machines, clustering, graphical models, and model ensembles. Upon completion of the course, students are expected to have acquired statistical learning techniques that are appropriate for big data applications and have a deep understanding on how to implement these methodologies with software, and more importantly, they will be able to propose data modeling strategies for prediction and/or exploratory analyses, to fit statistical learning models to data by using strategies for tuning and avoiding over fitting, and to combine models into a statistical ensemble.

Prerequisite(s): DATS 7100>=C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_BIOS, MS_BIOS, MS_DSCI **Campus Restrictions:** AU Online

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

DATS 7900 - Capstone Project in Data Science (3 to 6 Credit Hours)

Required course for Master of Data Science students. This course provides an opportunity for the student to integrate both technical and content knowledge into a project on a data science topic chosen by the student, and directed by a faculty member from the Division of Biostatistics and Data Science. A project formal write-up and a formal oral presentation or a poster presentation are required at the conclusion of the project.

Repeatability: May be repeated for credit up to five times.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_BIOS, MS_BIOS, MS_DSCI **Campus Restrictions:** AUO

Schedule Type (Primary): Directed Study (one-to-one) **Schedule Type (Additional):** Asynchronous Instruction

DATS 8170 - Advanced Computational Methods (3 Credit Hours)

This course introduces the computational aspect of statistics, expanding beyond the use of existing statistical packages. Topics covered in the course include random number generation, Monte Carlo integration, Markov chains, bootstrap techniques, expectation-

maximization algorithm and Markov chain Monte Carlo methods. Parallel computing using R, with emphasis on setting up simulation studies in a high-performance computing environment is also explored.

Prerequisite(s): STAT 7620 >= C and STAT 7630 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MS_DSCI

Schedule Type (Primary): Lecture

DRES 8111 - Clinical Dental Research Journal Club I (1 Credit Hour)

Immerses students into published clinical dental research. Each semester focuses on a particular clinical study design. Reading assignments are assigned weekly. Mentored group discussions aid student understanding of the methods, advantages, limitations, and implications of investigational methodology using relevant clinical dental examples. Students are expected to read the assigned papers and participate in the group discussion.

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Lecture

DRES 8170 - Dental Clinician-Scientist Seminar Series I (1 Credit Hour)

Immerses students into the work of current and historical figures in the dental profession who have made meaningful contributions to both the clinical and scientific spheres. Guest lecturers are a prominent feature of this course. Students are able to interact and learn from some of the same people whose scientific and clinical work they have learned (or will learn) from.

Lecture Hours: 1 **Contact Hours:** 1

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Seminar - Small Group

DRES 8210 - Research Project Development (1 Credit Hour)

Students learn how to design and develop a research project.

Lecture Hours: 1 **Contact Hours:** 1

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

DRES 8300 - Mentored Thesis Research I (1 Credit Hour)

This course provides time for students to design, execute, analyze, and write their thesis project.

Lecture Hours: 1 **Contact Hours:** 1

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Thesis

DHYG 3100 - Introduction to Clinic I (6 Credit Hours)

Fundamentals of infection control, patient assessment, and periodontal instrumentation.

Lecture Hours: 2 **Contact Hours:** 8

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSDH1_DHYG BSDH1- Dental Hygiene; BSDH1_DENH-Dental Hygiene

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

DHYG 3105 - Theory and Practice I (3 Credit Hours)

Concepts, principles, and skills essential for comprehensive patient assessment and education.

Lecture Hours: 3 **Contact Hours:** 8

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSDH1_DHYG BSDH1- Dental Hygiene; BSDH1_DENH-Dental Hygiene

Schedule Type (Primary): Lecture

DHYG 3110 - Dental Anatomy (2 Credit Hours)

Primary and permanent dentition, root morphology, function, anomalies, and comparative anatomy.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSDH1_DHYG BSDH1- Dental Hygiene; BSDH1_DENH-Dental Hygiene

Schedule Type (Primary): Lecture

DHYG 3115 - Applied Head and Neck Anatomy (2 Credit Hours)

Gross anatomy of head and neck, oral tissues, embryological development.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSDH1_DHYG BSDH1- Dental Hygiene; BSDH1_DENH-Dental Hygiene

Schedule Type (Primary): Lecture

DHYG 3120 - Introduction to Clinic II (4 Credit Hours)

An introduction to patient care, power instrumentation, and dental sealants.

Lab Hours: 2 **Contact Hours:** 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSDH1_DHYG BSDH1- Dental Hygiene; BSDH1_DENH-Dental Hygiene

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

DHYG 3125 - Theory and Practice II (3 Credit Hours)

Dental hygiene care for special populations including medically compromised patients.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSDH1_DHYG BSDH1- Dental Hygiene; BSDH1_DENH-Dental Hygiene

Schedule Type (Primary): Lecture

DHYG 3130 - Dental Radiology (3 Credit Hours)

Radiation physics, biology, infection control, radiograph exposure and processing.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSDH1_DHYG BSDH1- Dental Hygiene; BSDH1_DENH-Dental Hygiene

Schedule Type (Primary): Lecture

DHYG 3135 - Dental Microbiology (2 Credit Hours)

Microbiology of living cells and pathogenesis of bacteria, fungi, and viruses.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSDH1_DHYG BSDH1- Dental Hygiene; BSDH1_DENH-Dental Hygiene

Schedule Type (Primary): Lecture

DHYG 3140 - Periodontics Seminar (3 Credit Hours)

Study of the periodontium and clinical presentation of periodontal disease and treatment options.

Lecture Hours: 2 **Contact Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSDH1_DHYG BSDH1- Dental Hygiene; BSDH1_DENH-Dental Hygiene

Schedule Type (Primary): Lecture

DHYG 3150 - Dental Materials (1 Credit Hour)

Scientific principles of dental materials.

Lecture Hours: 1 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSDH1_DHYG BSDH1- Dental Hygiene; BSDH1_DENH-Dental Hygiene

Schedule Type (Primary): Lecture

DHYG 3155 - Pain Management for the Dental Hygiene Patient (3 Credit Hours)

Prepare dental hygiene students to administer local anesthesia to the dental hygiene patient. Includes the theory and psychological aspects of pain control, selection of pain control modalities, anatomy and neurophysiology, pharmacology of local anesthetics and vasoconstrictors, infection control, systemic complications, safe injection practices, and management of medical emergencies. Students learn and perform intraoral block and soft tissue infiltration anesthesia techniques. The course is taught using lecture and laboratory/clinical formats and includes 30 didactic hours, 15 laboratory hours, and 15 clinical hours in accordance with Georgia Rule 150-5-.07 Administration of Local Anesthetic by Dental Hygienist. The course also includes a wide variety of learning strategies including lectures, group work, hands-on laboratory work, and peer patient practice.

Lecture Hours: 2 **Lab Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Program Restrictions: BSDH1_DHYG BSDH1- Dental Hygiene; BSDH1_DENH-Dental Hygiene

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Supplies Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

DHYG 3200 - Patient Care I (6 Credit Hours)

Clinical application of the dental hygiene process of care.

Lab Hours: 12

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSDH1_DHYG BSDH1- Dental Hygiene; BSDH1_DENH-Dental Hygiene

Schedule Type (Primary): Supervised Lab/Clinic

DHYG 3205 - Theory and Practice III (3 Credit Hours)

Concepts, principles, and skills essential for rendering comprehensive dental hygiene care.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSDH1_DHYG BSDH1- Dental Hygiene; BSDH1_DENH-Dental Hygiene

Schedule Type (Primary): Lecture

DHYG 3220 - Dental Specialty Clinics I (1 Credit Hour)

Dental hygiene field experience at various dental specialty clinics.

Contact Hours: 81

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSDH1_DHYG BSDH1- Dental Hygiene; BSDH1_DENH-Dental Hygiene

Schedule Type (Primary): Supervised Lab/Clinic **Schedule Type (Additional):** Internship/Practicum

DHYG 3225 - Dental Materials Lab (1 Credit Hour)

Manipulation and use of selected dental materials.

Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSDH1_DHYG BSDH1- Dental Hygiene; BSDH1_DENH-Dental Hygiene

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Supervised Lab/Clinic

DHYG 3228 - Community Health and Research Design (3 Credit Hours)

Public health dentistry, epidemiology, program planning; research design, critique, decision-making.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: DENH - Dental Hygiene **Program Restrictions:** BSDH1_DHYG BSDH1- Dental Hygiene; BSDH1_DENH-Dental Hygiene

Schedule Type (Primary): Lecture

DHYG 3230 - Patient Care II (6 Credit Hours)

Clinical application of the dental hygiene process of care.

Lab Hours: 12

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSDH1_DHYG BSDH1- Dental Hygiene; BSDH1_DENH-Dental Hygiene

Schedule Type (Primary): Supervised Lab/Clinic

DHYG 3235 - Theory and Practice IV (3 Credit Hours)

Concepts, principles, and skills essential for rendering comprehensive dental hygiene care.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSDH1_DHYG BSDH1- Dental Hygiene; BSDH1_DENH-Dental Hygiene

Schedule Type (Primary): Lecture

DHYG 3240 - Pharmacology (3 Credit Hours)

Drugs used to treat diseases and disorders with emphasis on those used in dentistry.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSDH1_DHYG BSDH1- Dental Hygiene; BSDH1_DENH-Dental Hygiene

Schedule Type (Primary): Lecture

DHYG 3250 - Pathology (2 Credit Hours)

Principles and mechanisms of disease with emphasis on clinical aspects of oral disease.

Lecture Hours: 2 **Contact Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSDH1_DHYG BSDH1- Dental Hygiene; BSDH1_DENH-Dental Hygiene

Schedule Type (Primary): Lecture

DHYG 3255 - Dental Specialty Clinic II (1 Credit Hour)

Expanded opportunities to observe, assist, and provide care to patients in various specialty clinics.

Contact Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSDH1_DHYG BSDH1- Dental Hygiene; BSDH1_DENH-Dental Hygiene

Schedule Type (Primary): Internship/Practicum

DHYG 3260 - Patient Care III (1 to 6 Credit Hours)

Clinical application of the dental hygiene process of care towards completion of program requirements.

Lab Hours: 1 to 12

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSDH1_DHYG BSDH1- Dental Hygiene; BSDH1_DENH-Dental Hygiene

Schedule Type (Primary): Supervised Lab/Clinic

DHYG 3280 - Practice Management and Ethics (2 Credit Hours)

Dental practice management with focus on ethical and legal issues.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSDH1_DHYG BSDH1- Dental Hygiene; BSDH1_DENH-Dental Hygiene

Schedule Type (Primary): Lecture

DHYG 3285 - Dental Hygiene Practicum (2 Credit Hours)

Clinical dental hygiene field experience in a dental private practice setting.

Contact Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSDH1_DHYG BSDH1- Dental Hygiene; BSDH1_DENH-Dental Hygiene

Schedule Type (Primary): Internship/Practicum

DHYG 3301 - Patient Care IV (1 Credit Hour)

This course is a continuation of patient care experiences in dental hygiene clinics. Upon completion, the student clinician will be knowledgeable in both basic and advanced patient care procedures. The student will be able to assess each patient's oral health status, develop thorough problem lists and dental hygiene care plans based on this assessment, and then provide comprehensive dental hygiene patient care. Students will gain experience, confidence, and enhance clinical judgment skills.

Prerequisite(s): DHYG 3230 >= I

Lab Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: BSDH1_DHYG BSDH1- Dental Hygiene; BSDH1_DENH-Dental Hygiene

Schedule Type (Primary): Supervised Lab/Clinic

DHYG 4041 - Dental Hygiene Case Management (5 Credit Hours)

In professional practice, registered dental hygienists encounter several patient management issues. This course will allow dental hygienists to think more critically about the components involved in developing advanced care plans. Clinicians will synthesize prior knowledge of the dental hygiene process of care to address issues such as patient education, prescribed care, and insurance-based care as they relate to advanced care plans. Learning activities will include case presentation of involved dental hygiene care plans.

Lecture Hours: 5

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Major Restrictions: DNHC - Dental Hygiene Completion **Program Restrictions:** BSDH1_DHYG BSDH1- Dental Hygiene; BSDH1_DENH-Dental Hygiene

Schedule Type (Primary): Asynchronous Instruction

DHYG 4042 - Dental Informatics (5 Credit Hours)

Dental informatics explores how technology has changed how information is obtained, reviews coding/current dental terminology, digital processing, electronic health records, dental software, and current diagnostic testing.

Lecture Hours: 5

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Major Restrictions: DNHC - Dental Hygiene Completion **Program Restrictions:** BSDH1_DHYG BSDH1- Dental Hygiene; BSDH1_DENH-Dental Hygiene

Schedule Type (Primary): Asynchronous Instruction

DHYG 4043 - Public Health and Workforce Issues (5 Credit Hours)

This course will include an investigation of new healthcare reform affecting dentistry, access to care issues, alternative careers for dental hygienists, current and proposed workforce models, impact of state rules and laws on dental hygiene practice, interprofessional involvement in providing dental care, and other ethics/professional matters.

Lecture Hours: 5

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Major Restrictions: DNHC - Dental Hygiene Completion **Program Restrictions:** BSDH1_DHYG BSDH1- Dental Hygiene; BSDH1_DENH-Dental Hygiene

Schedule Type (Primary): Asynchronous Instruction

DHYG 4044 - Assessment of Recognized Dental Specialties (5 Credit Hours)

Traditionally, registered dental hygienists are employed in general dentistry practice settings. This course is designed to allow the exploration of other unique specialty areas. A specialty is an area of dentistry that has been formally recognized by the American Dental Association as meeting the specified Requirements for Recognition of Dental Specialties. The responsibilities of the different areas of specialization, the requirements and other information can be found here in Dental Specialties. Currently there are nine dental specialties recognized by the ADA: Dental Public Health, Endodontics, Oral and Maxillofacial Pathology, Oral and Maxillofacial Radiology, Oral and Maxillofacial Surgery, Orthodontics and Dentofacial Orthopedics, Pediatric Dentistry, Periodontics, and Prosthodontics.

Lecture Hours: 5

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Major Restrictions: DNHC - Dental Hygiene Completion **Program Restrictions:** BSDH1_DHYG BSDH1- Dental Hygiene; BSDH1_DENH-Dental Hygiene

Schedule Type (Primary): Asynchronous Instruction

DHYG 4045 - Current Issues in Periodontics (5 Credit Hours)

An exploration of current concepts in periodontics for the dental hygienist that includes in-depth review of the literature, overview of landmark studies that have shaped the current practice of periodontics, oral-systemic connections, non-surgical hand and power instrumentation update, and pain management modalities.

Lecture Hours: 5

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Major Restrictions: DNHC - Dental Hygiene Completion **Program Restrictions:** BSDH1_DHYG BSDH1- Dental Hygiene; BSDH1_DENH-Dental Hygiene

Schedule Type (Primary): Asynchronous Instruction

DHYG 4046 - Survey of Dental Sciences (5 Credit Hours)

An examination of essential aspects of dental sciences directly related to dental hygiene care including dental anatomy/occlusion, radiation biology, radiologic diagnosis, pharmacology, microbiology, pathology, and dental materials.

Lecture Hours: 5

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Major Restrictions: DNHC - Dental Hygiene Completion **Program Restrictions:** BSDH1_DHYG BSDH1- Dental Hygiene; BSDH1_DENH-Dental Hygiene

Schedule Type (Primary): Asynchronous Instruction

DHYG 7000 - Current Concepts in Periodontics (3 Credit Hours)

An exploration of current concepts in periodontics for the dental hygienist.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: GS - Graduate Semester

Schedule Type (Primary): Lecture

DHYG 7010 - Survey of the Dental Sciences (3 Credit Hours)

Overview of pertinent dental sciences that are essential for the future dental hygiene educator.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: GS - Graduate Semester

Schedule Type (Primary): Lecture

DHYG 7020 - Teaching Methodology (4 Credit Hours)

Development of the teaching qualities required to become an educator and leader in dental hygiene.

Lecture Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

DHYG 7030 - Teaching Practicum (5 Credit Hours)

Practical experience providing instruction to dental hygiene students in didactic, clinical and laboratory.

Lab Hours: 10

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: GS - Graduate Semester

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

DHYG 7040 - Leadership, Organization, and Administration (4 Credit Hours)

Preparation to implement the roles of a dental hygiene program director/coordinator.

Lecture Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: GS - Graduate Semester

Schedule Type (Primary): Lecture

DMAT 5601 - Dental Materials (2 Credit Hours)

This course is specifically designed to acquaint the third year student dentist with characteristic properties of polymers, ceramics and metals as they relate to the science of Materials Engineering. It is the specific goal of this course to relate these material concepts to their clinical applications, providing the student with the ability to discern differences between materials failure and technique problems, as well as to provide a basis for rational selection of restorative dental materials.

Lecture Hours: 2 **Lab Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Major Restrictions: Advanced Standing DMD

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

DPAT 5602 - Clinical Pathology Conferences (2 Credit Hours)

This course is comprised of clinico-pathologic conferences encompassing differential diagnosis of systemic diseases. These conferences include "case studies" of diseases with emphasis on pathogenesis relative to clinical manifestations with implications for patient management during treatment of oral disease. Fundamentally, this course is conducted in a problem-solving format.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Major Restrictions: Advanced Standing DMD

Schedule Type (Primary): Lecture

DPAT 5603 - Oral Pathology (5 Credit Hours)

This course examines the etiology and pathogenesis of oral and paraoral diseases in basic oral & maxillofacial pathology. The subject matter includes an introduction and biopsy techniques, developmental defects and anomalies, abnormalities of teeth, pupal/periapical diseases, periodontal diseases, bacterial infections, fungal and protozoal diseases, viral infections, physical and chemical injuries, allergies and immunologic diseases, oral cancer and epithelial pathology, and salivary gland pathology. The course is conducted via lectures coupled with clinico-pathology conferences which emphasize the development of a differential diagnosis and establishment of a final diagnosis.

Lecture Hours: 5

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Major Restrictions: Advanced Standing DMD

Schedule Type (Primary): Lecture

DPAT 5604 - Clinical Oncology (1 Credit Hour)

This course is comprised of lectures and clinico-pathologic conferences, which primarily emphasize the diagnosis and management of malignant and benign lesions of the oral/perioral regions. Clinico-pathologic conferences are integrated for establishment of a differential diagnosis of lesions in the oral/perioral region as well as oral manifestations of systemic neoplasms.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Major Restrictions: Advanced Standing DMD

Schedule Type (Primary): Lecture

RADD 5602 - Dental Radiologic Interpretation (2 Credit Hours)

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Major Restrictions: Advanced Standing DMD

Schedule Type (Primary): Lecture

CLCR 8005 - Dental Business Management (1 Credit Hour)

This course provides dental residents with a working knowledge of Personal Financial Management, Selection of Practice Mode and Location, Professional Career Options, Bank Loan Applications and Credit Rating, Professional and Personal Insurance Needs, and The First Years of a Dental Practice at advanced levels from the predoctorate program.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

CLCR 8006 - Oral and Maxillofacial Radiology (1 Credit Hour)

The major objectives of this course are to provide the student with an advanced course in oral and maxillofacial radiology. Oral and maxillofacial radiology interrelates with all clinical disciplines of dentistry with the exact nature of the relationship varying from one discipline to another. These relationships include a diagnostic role in identifying or confirming the presence of an abnormality; a treatment planning role such as determining the extent of a condition; being an integral part of a clinical technique in another discipline; and acting as a tool to monitor the progress of healing, the recurrence of previously treated disease, and the evaluation of the status of previous conditions.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Residents

Schedule Type (Primary): Seminar - Small Group

CLCR 8008 - Interdisciplinary Seminars: Esthetics and Function (1 Credit Hour)

This seminar course, calls for Orthodontics, Oral Surgery, Periodontic and Prosthodontic residents to discuss and treatment plan together comprehensive cases, common to each specialty and involving Functional and Esthetic Problems. Following presentation of the case, etiologic factors, prognosis, and treatment plans will be discussed by the participants. Evaluation of the treatment plan options will be conducted in group discussions with one faculty and one resident of each discipline per table. Each group will be provided with casts, radiographs and patient history Presentations will be critiqued and alternative therapy discussed by residents and faculty. Residents are expected to support their diagnoses and treatment approaches with references from the scientific literature, and to compare the results of their treatment with that reported previously in clinical trials. Emphasis will be placed on a comprehensive analysis and sequencing of treatment from a prosthodontic, periodontic, and orthodontic standpoint.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Residents

Schedule Type (Primary): Seminar - Small Group

CLCR 8010 - Practice Management (1 Credit Hour)

CLCR 8010 is a course in practice management for the graduate student. It is a focused study on various aspects relating to their setting up and operating a successful dental practice. It is broad based in that the selected topics must appeal to all specialties represented. An in-depth two hour seminar for each subject is presented to the residents by experts in the respective areas of business.

Lecture Hours: 1

Repeatability: May be repeated for credit up to four times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Residents

Schedule Type (Primary): Seminar - Small Group

CLCR 8011 - Basic Cardiac Life Support (CPR) (1 Credit Hour)

In this course the student completes a Basic Cardiac Life Support Healthcare Provider course according to the standards established by the American Heart Association.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Residents

Schedule Type (Primary): Seminar - Small Group

CLCR 8014 - Dental Implantology (3 Credit Hours)

This course is an introduction to dental implant therapy using a combination of lecture, laboratory and panel discussion sessions. Topics include materials science, histology of osseointegrated and failing dental implants, medical/psychological considerations, treatment planning the edentulous and partially edentulous patient, surgical and prosthetic dental implant treatment techniques, periodontal considerations, long-term maintenance of the dental implant, subperiosteal implants, occlusion and restorative options.

Lecture Hours: 2 **Lab Hours:** 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Residents

Schedule Type (Primary): Seminar - Small Group

CLCR 8016 - Cleft Palate and Craniofacial Anomalies (1 Credit Hour)

This course is an overview of normal and abnormal facial development and speech. Developmental and genetic aspects of facial growth and development are emphasized. A multidisciplinary approach to the recognition and the treatment of many aspects of patients with cleft lip and palate and/or other facial anomalies will be presented.

Lecture Hours: 1

Repeatability: May be repeated for credit up to four times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Residents

Schedule Type (Primary): Seminar - Small Group

CLCR 8020 - Ethics and Professionalism in Dental Practice (1 Credit Hour)

This web-based, self-paced course is designed to prepare advanced dental education students for the ethical challenges that they will encounter in the practice of dentistry and to encourage students to recognize and follow the high ethical standards required by the profession of dentistry. This course is designed to improve awareness of ethical and professional responsibility, promote ethical conduct and professionalism in dentistry, advance dialogue in ethical issues, and stimulate reflection on common ethical problems in dental practice.

Contact Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Residents **Course Level Restrictions:** Graduate Semester, Post Professional

Schedule Type (Primary): Asynchronous Instruction

DERM 5001 - Dermatology Externship (4 to 8 Credit Hours)

One month clerkship experience on the Dermatology service. Students will see inpatients and outpatients at the MCG Hospital and Clinics and also outpatients at Dermatology clinics at Fort Gordon and VA Hospitals. Students participate in Dermatopathology Conferences, Journal Clubs, and Basic Science Seminars. Supervision will be provided by the full time staff and clinical faculty of the Section of Dermatology and the Dermatology house staff.

Lecture Hours: 10 **Contact Hours:** 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

DERM 5002 - Dermatology Off-Campus Externship (4 to 8 Credit Hours)

Off-campus electives may be arranged, with prior approval of the faculty.

Contact Hours: 40

Repeatability: May be repeated for credit up to 3 times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Supervised Lab/Clinic

DERM 5003 - Advanced Dermatology (4 to 8 Credit Hours)

This elective is for students who plan to enter into dermatology residency training.

Lecture Hours: 10 **Contact Hours:** 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Directed Study (one-to-one)

RDER 5000 - Dermatology (27 Credit Hours)

Lecture Hours: 6 **Contact Hours:** 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents **Major Restrictions:** Internal Medicine Residency, Medicine Residency

Schedule Type (Primary): Internship/Practicum

READ 3110 - Foundations of Reading and Literacy (3 Credit Hours)

This course provides an overview of reading development and foundational skills, including phonemic awareness, phonics, fluency, vocabulary, and comprehension.

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Degree Restrictions: BSED - Bachelor of Science in Education in Special Education

Schedule Type (Primary): 57- Asynchronous Instruction

DSCP 5701 - Diagnostic Sciences Conference (2 Credit Hours)

This is a case-based advanced level course in diagnostic sciences for students in the fourth year of the dental curriculum. The course is divided into three types of seminars that focus on: 1) oral and maxillofacial pathology; 2) oral and maxillofacial radiology and 3) oral medicine/medically complex patient management. The purpose of the course is to reinforce and advance clinical diagnostic, critical thinking and problem solving skills. Each session will consist of a discussion of selected cases in the designated areas, presented by faculty and students. A final exam will consist of cases in each of the three areas, and include questions about diagnosis and management.

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Seminar - Small Group

DSOM 5301 - Oral Diagnostic Sciences I (5 Credit Hours)

This course introduces principles of general pathology, as well as soft tissue disorders of the oral and maxillofacial (OMF) area. The general pathology topics include cell and tissue injury, adaptation, and death; inflammation and repair, infectious disease, immunopathology, genetic disorders and neoplasia. These topics are necessary to facilitate the understanding of systemic abnormalities discussed in BMCR 5301, BMGH 5301, BMMS 5301, BMRS 5301, as well as specific OMF area disorders discussed in this course. The content and sequence are consistent with the Systems modules. Note that the musculoskeletal system is addressed in BMMS 5301, which ends in December, and the hematopoietic system is discussed in D2 Spring semester. Therefore, disorders of jaws

and blood are not discussed in this course. The etiology, pathogenesis and clinical manifestations of disorders affecting soft tissues of the OMF area are included in this course, such as developmental abnormalities, injuries, infections, non-infectious inflammatory conditions and neoplastic disorders. Review of selected normal structure-function materials from D1 coursework is also required. The didactic portion consists of lectures and online content, followed by case-based seminars to reinforce lecture material and facilitate the development of skills in diagnosis.

Lecture Hours: 5

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

DSOM 5402 - Oral Diagnostic Sciences II (4 Credit Hours)

This is a comprehensive course focused on the etiology, pathogenesis, clinical, radiographic and pathologic features of developmental, inflammatory, neoplastic and other disorders affecting jaws, temporomandibular joints and teeth, as well as their management in dental practice. This course builds upon, and reinforces, the principles of normal and abnormal structure-function covered in BMCC 5201, DSOM 5301, BMMS 5301 and BMMS 5402.* The didactic portion consists of lectures and online content, followed by case-based seminars to facilitate the development of a skills in differential diagnosis and management.

Lecture Hours: 4

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

DSOM 5591 - Oral Medicine Clinic I (1 Credit Hour)

This clinical course focuses on applying the principles in obtaining a health history/medical history for the medically compromised patients and performing a comprehensive soft tissue head and neck examination/oral cancer screening and risk assessment. Students will develop a clinical experience in taking medical history medication history ; learn clinical pharmacology and how patients' oral health is affected by medications. Develop a medical risk assessment and treatment approach for medically complex patient and learn to develop modifications to dental care tailored to the specific patient's need based on the medical risk assessment.

Lab Hours: 60

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Supervised Lab/Clinic

DSOM 5603 - Oral Diagnostic Sciences III (3 Credit Hours)

This case-based course provides the student with a practical approach to the dental management of patients with selected medical problems and patients with non-odontogenic facial pain. Instruction is designed to correlate the basic sciences with the dental relevance and dental management of patients with commonly occurring disease processes. A section with a special focus on older patients (geriatric dental patients) is also part of this course, and includes online modules with quizzes, followed by comprehensive seminars. Assignments and quizzes based upon these assignments will be due prior to the discussion of the related cases in class. Time spent in class will be a case based discussion of patients with medical problems and the modifications to treatment that would be necessary.

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

DSOM 5692 - Oral Medicine Clinic II (1 Credit Hour)

This is a clinical course which is divided into two sections: 1- Oral Medicine focuses on applying the principles in obtaining a health history/medical history and performing a comprehensive soft tissue head and neck examination/oral cancer screening. Students will develop a medication history; learn clinical pharmacology and how patients' oral health is affected by medications. Develop a medical risk assessment and treatment approach for medically complex patient and learn to implement modifications to dental care based on the medical risk assessment. 2- Oral Radiology focuses on both the technical aspect of obtaining a full mouth radiographic series and the skills involved with radiographic interpretation. This involves self-evaluation of radiographic technique, proper radiation hygiene, adequate patient management, selection criteria, and radiographic diagnosis of common oral diseases.

Lab Hours: 30

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit
Schedule Type (Primary): Supervised Lab/Clinic

TMDT 5601 - Diagnosis and Treatment of Temporomandibular Disorders (2 Credit Hours)

Diagnosis and treatment concepts of Temporomandibular Disorders will be presented.

Lecture Hours: 1 **Lab Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Major Restrictions: Advanced Standing DMD

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic

DSRD 5211 - Radiology (2 Credit Hours)

This is an introductory course in dental radiology for the first year dental student that includes a laboratory session in radiographic technique and error recognition. The didactic portion of the course covers the following subject matter: radiation physics, radiation biology & safety, radiographic technique & error recognition, infection control, digital radiography & image processing, Diagnostic quality of radiographic images, Special techniques and pediatric radiology, and patient management.

Lecture Hours: 18 **Lab Hours:** 28

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

DSRD 5591 - Radiology Clinic I (1 Credit Hour)

This is a clinical course pertaining to Radiographic techniques and Image interpretation. Oral Radiology focuses on both the technical aspect of obtaining a full mouth radiographic series and the skills involved with radiographic interpretation. This involves self-evaluation of radiographic technique, proper radiation hygiene, adequate patient management, selection criteria, and radiographic diagnosis of common oral diseases.

Contact Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Dental College of Georgia

Schedule Type (Primary): Supervised Lab/Clinic

DSRD 5692 - Radiology Clinic II (1 Credit Hour)

This is a clinical course pertaining to Radiographic techniques and Image interpretation. Oral Radiology focuses on both the technical aspect of obtaining a full mouth radiographic series and the skills involved with radiographic interpretation. This involves self-evaluation of radiographic technique, proper radiation hygiene, adequate patient management, selection criteria, and radiographic diagnosis of common oral diseases.

Contact Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Dental College of Georgia

Schedule Type (Primary): Supervised Lab/Clinic

DINT 5100 - Dietetic Internship I (4 Credit Hours)

Supervised dietetic internship with affiliated institutions offering specialty rotations in various areas of dietetics, including nutrition support, diabetes, wellness, and food service management for the achievement of skills development for entry-level practice in dietetics.

Lecture Hours: 2 **Contact Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MS_AHSC-Allied Health

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

DINT 5200 - Dietetic Internship II (5 Credit Hours)

Supervised dietetic internship with affiliated institutions offering specialty rotations in various areas of dietetics, including nutrition support, diabetes, pediatrics, wellness, and food service management for the achievement of skills development for entry-level practice in dietetics.

Prerequisite(s): DINT 5100 >= CP

Lecture Hours: 2 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MS_AHSC-Allied Health

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

DIVD 5601 - Diversity Issues and Language Skills for Dentistry (1 Credit Hour)

This is a lecture course which reviews opportunities in the profession of dentistry with emphasis on private practice, public health and opportunities in rural areas. This course also provides epidemiologic information on dentistry in Georgia as well as some training in cultural sensitivity.

Lab Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Major Restrictions: Advanced Standing DMD

Schedule Type (Primary): Lecture

ECED 6343 - K-5 Math Endorsement: Capstone (3 Credit Hours)

This is a capstone course intended for teachers who are pursuing the K-5 Mathematics Endorsement. It is designed to provide opportunities for teachers to implement, document, and reflect upon the implementation of their content and pedagogical knowledge.

Prerequisite(s): MATH 6341 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Specialist in Education, Master of Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervi

Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

ECON 1101 - Economics of Financial Literacy (3 Credit Hours)

Explores the microeconomic and macroeconomic principles that underpin financial literacy, emphasizing the importance of informed decision-making in personal finance. Students learn how to apply economic thinking to real-world financial situations and develop the skills necessary to make sound financial decisions. Specifically, students learn how to use economic theories and concepts to make informed decisions about budgeting, cash flow management, maximizing their earnings potential, tax planning, obtaining and using credit, saving and investments, insurance and risk management, and retirement. The course emphasizes the importance of understanding the broader economic context when developing and implementing financial plans.

Core IMPACTS Requirement(s) Satisfied: Social Sciences (Social Sciences)

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ECON 1810 - Introduction to Economics (3 Credit Hours)

A survey course for non-business majors. It covers both macro and micro-economics and is aimed at developing an understanding of economic policies and problems.

Core IMPACTS Requirement(s) Satisfied: Social Sciences (Social Sciences)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ECON 2105 - Macroeconomics (3 Credit Hours)

This introductory course explains the nature of the economic problems which any society must solve and how a mixed economy solves these problems. Topics covered include supply and demand, income and employment, money and banking, and fiscal policy.

Prerequisite(s): MATH 1001 $\geq$ C or MATH 1111 $\geq$ C or MATH 1113 $\geq$ D or MATH 1220 $\geq$ D

Core IMPACTS Requirement(s) Satisfied: Social Sciences (Social Sciences)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ECON 2106 - Microeconomics (3 Credit Hours)

The determination of prices and output levels and the explanation of economic equilibrium of individual economic units--the consumer, the firm, and the industry.

Prerequisite(s): MATH 1001 $\geq$ C or MATH 1111 $\geq$ C or MATH 1113 $\geq$ D or MATH 1220 $\geq$ D

Core IMPACTS Requirement(s) Satisfied: Social Sciences (Social Sciences)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ECON 3105 - Intermediate Macroeconomics (3 Credit Hours)

This course will explain, at an intermediate level, the major controversies and theories that have shaped macroeconomics. Students will learn to apply these theories in order to understand current international and national news.

Prerequisite(s): ECON2105 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ECON 3106 - Intermediate Microeconomics (3 Credit Hours)

This course develops modern microeconomic theory at an intermediate level and applies it to a large number of personal, business, and global public policy cases.

Prerequisite(s): ECON2106 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ECON 3130 - Healthcare Economics and Finance (3 Credit Hours)

The aim of this course is to provide students with core capabilities in understanding and applying financial concepts and techniques as well as the principles and tools of healthcare economics to inform the decision making of a health care manager. Topics include: fundamentals of health insurance; the relationship between population health and economics; the cost of chronic diseases and obesity; public sources of healthcare cost data and data sharing; life expectancy and health care decisions; volume-based versus value based payment systems; and the effects of industry consolidation.

Prerequisite(s): ECON 2106 $\geq$ C and MGMT 2106 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Hull College of Business **Course Level Restrictions:** Undergraduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ECON 4106 - Firm and Industry Studies (3 Credit Hours)

The aim of this course is to provide students with core capabilities in understanding and applying economic principles, tools and concepts to a variety of firms and industries. Emphasis will be placed on unique features of specific industries as well as their commonalities. Industries studied include sport and entertainment, manufacturing, healthcare, technology, primary products, energy, and wines and spirits.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ECON 4110 - Economic Modeling and Forecasting (3 Credit Hours)

Introduces the core capabilities in the theory and practice of economic modeling and forecasting. Emphasis is placed on relevant business and policy-related decision making using economic models, data, and forecasts.

Prerequisite(s): MATH 1401 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ECON 4420 - Financial Markets and Institutions (3 Credit Hours)

This course explores the role of financial markets and institutions in the economy. Topics include money and capital markets, the role of the Federal Reserve and the function and operating characteristics of financial institutions.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ECON 4820 - International Economics and Finance (3 Credit Hours)

The theory of international trade, balance of payments, exchange rates, monetary movements, capital markets, and commercial policy. Implications of international financial reforms and international economic integration.

Prerequisite(s): ECON 2105 >= C or ECON 2106 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ECON 4950 - Selected Topics in Economics (3 Credit Hours)

A course and/or directed study of a major issue, practice, or problem in the area of economics. Content based on needs and professional objectives of students and the experience and availability of faculty.

Lecture Hours: 3 **Lab Hours:** 3 **Contact Hours:** 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Hull College of Business

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Unsupervised Lab/Clinic, Independent Study, Asynchronous Instruction

ECON 4990 - Undergraduate Research (1 to 3 Credit Hours)

Faculty supervised research on an applied economic topic of interest to the student or faculty supervisor. Students will apply economic theory and statistical analysis to an economic topic. Research agreement must be made between students and faculty member prior to enrolling in the course. A minimum of three hours of work per week for each semester hour of credit.

Prerequisite(s): ECON 4110 >= C

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit up to three times.

Grade Mode: Normal, Audit

Degree Restrictions: Bachelor of Business Admin

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Directed Study (one-to-one), Asynchronous Instruction

ECON 6800 - National and International Economics for Management (3 Credit Hours)

This course demonstrates how economic theory is applied to national and international managerial decision-making.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: MBA **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ECON 6850 - Health Economics (3 Credit Hours)

Introduces broad content in health economics consisting of "supply" and "demand" side of health care markets. First, the "supply side" covers health production function, providers markets, health insurance, and health care reform and the Affordable Care Act (ACA). Next, the "demand side" covers the Grossman human capital model of health, socioeconomic status and health, health insurance and health, as well as economic models of addiction, smoking, alcohol, and obesity.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Hull College of Business **Course Level Restrictions:** Graduate Semester **Campus Restrictions:** AU Online

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ECON 6950 - Current Issues in Economics (3 Credit Hours)

A variable content course individually designed to meet the needs, interests, and professional objectives in business administration.

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: MBA **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

EDTD 6900 - Advanced Practicum: Leadership in Instruction, Mentoring, and Program Design (1 to 6 Credit Hours)

This graduate-level practicum equips students with advanced skills in instruction, mentoring, and instructional leadership across diverse learning settings, including schools, summer programs, community organizations, and other non-traditional settings. Students will apply evidence-based instructional strategies, mentor instructors or novice teachers, design and implement whole-group, small-group, or one-on-one learning plans, and reflect critically on their experiences.

Lecture Hours: 1 to 6 **Lab Hours:** 1 to 6 **Other Hours:** 1 to 6 **Contact Hours:** 1 to 6

Grade Mode: N-Normal (A,B,C,D,F)

Schedule Type (Primary): Internship/Practicum **Schedule Type (Additional):** Lecture, Unsupervised Lab/Clinic, Seminar Small Group, Supervised Lab/Clinic, Independent Study, Directed Study, Asynchronous, Practice Teaching

EDUC 2110 - Investigating Critical and Contemporary Issues in Education (3 Credit Hours)

The course is designed to engage students in observations, interactions, and analyses of critical and contemporary issues in education. Students will investigate issues influencing the social and political contexts of education settings in Georgia and the United States. Students will actively examine the teaching profession from multiple perspectives both within and outside the school. Students will also interpret the meaning of education and schooling in a diverse culture along with the moral and ethical responsibilities of teaching in a democracy. There will be a 10-hour field component to this course.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

EDUC 2120 - Exploring Social-Cultural Perspectives on Diversity (3 Credit Hours)

The course is designed to provide future educators with the fundamental knowledge of understanding cultures and teaching children from diverse backgrounds. Specifically, this course is designed to examine 1) the nature and function of culture; 2) the development of individual and group cultural identity; 3) definitions and implications of diversity; and, 4) the influences of culture on learning, development and pedagogy. There will be a 10-hour field component to this course.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group, Asynchronous Instruction

EDUC 2130 - Exploring Learning and Teaching (3 Credit Hours)

The course is designed to explore some of the major theories of learning and teaching. Students will examine their own learning processes and use them as a basis for exploring the learning processes of others. This course will also serve as a foundation for better understanding how to enhance the learning of all students across a variety of educational settings and contexts. There will be a 10-hour field component to this course.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

EDUC 2900 - Literacy Tutoring and Mentoring Leadership (1 to 3 Credit Hours)

Introduction to literacy training in mentoring and tutoring.

Lab Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching

EDUC 5000 - College of Education Graduate Education Orientation (0 Credit Hours)

This non-credit orientation course gives students newly admitted to a graduate program in the College of Education access to startup materials. The College of Education uses this course to provide critical information to new students and to distribute and collect important materials.

Repeatability: May be repeated for credit up to four times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: The Graduate School, College of Ed & Human Dev

Schedule Type (Primary): Asynchronous Instruction

EDUC 5020 - Theories of Learning (3 Credit Hours)

This course is designed to explore some of the major theories of learning and teaching, as well as theories of child development. Students will examine their own learning processes and use it as a basis for exploring the learning processes of others. This course will serve as a foundation to enhance the learning of all students across a variety of educational settings.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Ed & Human Dev **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Master of Arts in Teaching

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

EDUC 6020 - Foundations of Education (3 Credit Hours)

This course is designed to help advanced students develop a connected array of perspectives on the development of educational thought including philosophical and historical perspectives; society's great expectations of the school; contemporary schooling patterns and the foundations of curriculum; pressing issues of finance, cultural diversity, accountability, and control of the schools; and a look at the future of American education.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

EDUC 6021 - Introduction to Educational Research (3 Credit Hours)

Through this core research course students should understand basic concepts of educational research, including research design options. Students should understand data analysis protocols and should be able to perform various data analyses. Students will be able to interpret and evaluate published research.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

EDUC 6030 - Qualitative Research in Education (3 Credit Hours)

The course will include an overview of the qualitative research process, its methods, goals and foundations. Students will then employ several of the strategies in a mini-action research project aimed at improved practice within their classrooms/schools.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

EDUC 6040 - Tests and Measurement (3 Credit Hours)

This course is concerned with practical methods and procedures involved in the construction and evaluation of teacher-made tests and the interpretation of test scores, as well as with the considerations involved in the selection and use of standardized tests.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

EDUC 6140 - Advanced Educational Psychology (3 Credit Hours)

This course involves the application of psychological theories of learning and scientific findings to learning activities of the classroom as well as to the more complex problems of the educational process. The main focuses are on the learner, the learning process, and the learning condition. In addition to examining the science of learning, the art of teaching will also be discussed.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis

EDUC 6271 - Introduction to Gifted Education (3 Credit Hours)

This course provides an examination of the nature of gifted children and youth having high potential in multiple areas. The course will include consideration of characteristics of gifted/talented/creative learners as reflected in historical and current content, theory, and research. This course requires a 10-hour field component.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

EDUC 6272 - Assessment of Gifted Learners (3 Credit Hours)

Addresses the selection and use of a variety of assessment procedures for identifying unique cognitive, social, and emotional needs of gifted/talented/creative learners. This course requires a 10-hour field component.

Prerequisite(s): EDUC 6271

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

EDUC 6273 - Curriculum and Program Design for Gifted Learners (3 Credit Hours)

An investigation into a variety of gifted program delivery models and conceptual designs for providing qualitatively differentiated curricula for gifted/talented/creative learners. This course requires a 10-hour field component.

Prerequisite(s): EDUC 6272

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

EDUC 6400 - Literacy in the Family and Community (3 Credit Hours)

This experiential, project-based learning course is designed to prepare graduate students to serve in a leadership/mentorship capacity by examining issues related to family and community literacy as well as locating and applying evidence-based practices in an actual hands-on community literacy initiative.

Lecture Hours: 3

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Lecture/Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one)

EDUC 6950 - Selected Topics (1 to 3 Credit Hours)

This course examines problems in the light of recent knowledge and research in foundational education. The focus is on specifically designated areas of foundational education.

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

EDUC 7001 - Education Specialist Seminar (3 Credit Hours)

The course involves developing skills of self-analysis, goal setting and building fundamental communication and leadership qualities. A personal/ interpersonal approach will be used to examine themes related to developing leadership/change agent skills. Themes addressed include the change process, leadership, collaboration, and context issues.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Degree Restrictions:** Specialist in Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

EDUC 7002 - Education Specialist Seminar II (3 Credit Hours)

School will be examined as a political institution within various contexts and constraints which affect leaders in the school community. Themes will include the change process, leadership, collaboration, context and policy issues. Prerequisite(s): EDUC 7001.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Degree Restrictions:** Specialist in Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

EDUC 7003 - Education Specialist Seminar III (3 Credit Hours)

Students will work with their "mentor leader" to apply knowledge and skills gained within their own role and workplace. These experiences will allow students to further develop, directly apply, and demonstrate their knowledge and skills related to leadership. Prerequisite(s): EDUC 7001 and EDUC 7002.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Degree Restrictions:** Specialist in Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

EDUC 7004 - Philosophy of Education (3 Credit Hours)

The content of this course includes descriptions of the following branches of philosophy: epistemology, metaphysics, ethics, and aesthetics. The focus is on philosophical concepts and questions which have special relevance to education in the 21st century.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Internship/Practicum, Thesis, Dissertation

EDUC 7005 - History of American Education (3 Credit Hours)

The course is intended for graduate level students interested in the area of historical foundations of education in the M.Ed. and Ed.S. programs. The intellectual examination of the content is education-specific history.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Internship/Practicum, Thesis, Dissertation

EDUC 7006 - Comparative Education (3 Credit Hours)

This course offers an in-depth examination of school systems around the world. Emphasis is placed on the role of education in economic development, governance, and structure. The course considers how population characteristics and local contexts affect educational experiences.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Internship/Practicum, Thesis, Dissertation

EDUC 7007 - Perspectives on U.S. Education in Context (3 Credit Hours)

To enhance their ability to effectively engage with a wide range of learners, students in this course will examine the historical and societal factors that shape contemporary education in the United States. Framed within the context of U.S. global political and economic systems, the course guides students in analyzing the changing contexts within which educational policy and practice operate. Students will examine from multiple perspectives the strengths and limitations of theories, empirical research, and policies most relevant to educators, students, and families in the U.S.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

EDUC 7008 - Disability Studies and Classroom Practice (3 Credit Hours)

Students in this course will explore enduring questions about K-12 differences in learners in their schools and classrooms. The differentiation between special education and disability studies will be explored along with the theoretical models of normality, and the medical deficit and social model of disability. Theories of disability studies will be applied in practice through coursework in classrooms. This course is open for both special educators and general educators who work with specialized populations.

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

College Restrictions: COLLEGE OF EDUCATION AND HUMAN DEVELOPMENT **Degree Restrictions:** EDS Specialist in Education
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

EDUC 7010 - Critical Issues in Urban Education Policy and Practice (3 Credit Hours)

This course introduces the historical and sociocultural forces that shape contemporary US urban educational structures. Within an increasingly globalized political and economic system, this course will examine theories, empirical research, and policy documents relevant to the cultural, social, legal, and political issues surrounding urban educators, students, and families in the United States.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School , College of Ed & Human Dev **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

EDUC 7011 - Youth in Urban Schools (3 Credit Hours)

This course is part of the Urban Education Endorsement. In this course, we will explore the identities that youth take part in and belong to. This includes analyzing the roles of teachers, families, and community members within the institutions and neighborhoods where the students live and study.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School , College of Ed & Human Dev **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

EDUC 7012 - Critical Praxis in Urban Educational Contexts (3 Credit Hours)

This course is part of the sequence that comprises the Urban Education Endorsement. In this course we will study varying pedagogies and what it means to nurture healthy, effective relationships with families, students, and communities. We will study effective curriculum design for student in urban communities.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School , College of Ed & Human Dev **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

EDUC 7013 - Media Literacy and Education (3 Credit Hours)

This course examines the role of media literacy in education and society. Students engage in inquiry-based analysis, evaluation, and production of media, exploring its principles and practices from multiple perspectives while considering media structures, strategies, and underlying assumptions. Topics include informal fallacies, social media, journalistic formats, and source validity. Students explore how media literacy can be applied in teaching and learning to support informed decision making, as well as explore international approaches to media literacy in public schooling.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Course Level Restrictions: GS Graduate

Schedule Type (Primary): Asynchronous Instruction

EDUC 7014 - Learning in Social and Natural Contexts (3 Credit Hours)

This course explores relationships between the natural world and education, with particular attention to how schools engage with issues of growth and development. Grounded in the Foundations of Education, topics include perspectives on interactions, social and institutional structures, global and local contexts, knowledge traditions, and approaches to teaching.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Course Level Restrictions: GS Graduate
Schedule Type (Primary): Asynchronous Instruction

EDUC 7017 - Writing and Presenting Qualitative Research (3 Credit Hours)

This course equips students with essential skills and strategies for writing high-quality research articles suitable for publication in academic and practitioner journals. Emphasizing the theoretical and practical aspects of research writing, the course guides students through the entire writing, revising, and publishing process. Students revise and expand coursework (final papers, research projects, lesson plans, etc.) completed in previous Ed.S. courses to prepare for submission to a journal and conference. Potential journals and conferences include both practitioner-focused and research-focused journals.

Prerequisite(s): EDUC 7021

Repeatability: May be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

College Restrictions: COLLEGE OF EDUCATION AND HUMAN DEVELOPMENT **Student Class Restrictions:** Graduate **Course Level Restrictions:** GS Graduate **Department Restrictions:** Education: Dept. of Research, Counseling, and Curriculum
Schedule Type (Primary): Asynchronous Instruction

EDUC 7018 - Human Development and Health Education for Teachers (3 Credit Hours)

For teachers across grade levels and subject areas, this course examines theories of child and adolescent development. Emphasis is placed on understanding how health, relationships, and family contexts influence student learning and engagement. The course prepares educators to respond to student questions with accuracy and incorporate developmentally appropriate perspectives into curriculum.

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

College Restrictions: THE GRADUATE SCHOOL

Schedule Type (Primary): Asynchronous Instruction

EDUC 7021 - Educational Research (3 Credit Hours)

This course explores the interface of research and practice in educational contexts. Students receive an introduction to research terminology, design, and methodology. Additionally, students learn how to utilize, interpret, evaluate, and leverage current educational research to problem-solve, inform practice, and improve issues within their own professional settings.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Asynchronous Instruction

EDUC 9999 - Noninstitutional Course (0 Credit Hours)

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

EDCI 7110 - Curriculum Studies (3 Credit Hours)

This course explores the theoretical frameworks that inform various instructional models, historical and contemporary issues in curriculum development, and the nature and purpose of curriculum change. In addition, theoretical constructs and philosophical frameworks that undergird modern classroom instruction and assessment practices will be examined. Candidates in this course will apply curriculum theory and conceptual frameworks to design and develop content-specific curriculum.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Adv Educational Studies **Degree Restrictions:** Specialist in Education
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

EDCI 7140 - Fundamental and Contemporary Theories of Learning (2 Credit Hours)

This course involves the application of psychological theories of learning and scientific findings to learning activities of the classroom as well as to the more complex problems of the educational process. The main focuses are on the learner, the learning process, and the learning condition. In addition to examining the science of learning, the art of teaching will also be discussed.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

EDCI 7160 - Curriculum Design (1 Credit Hour)

This course will examine and analyze the following core elements of curriculum design: conceptual purpose, content, coherence, articulation within a subject area across grade levels, and across subjects, alignment with both achievement standards and achievement assessments. Program assessment will be examined with particular attention to how it differs from but is relevant to student performance assessment.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

EDCI 7224 - Content Literacy (3 Credit Hours)

This course will address literacy strategies and skills in content areas/disciplines to enhance learning and student understanding. Emphasis is placed on research-based instructional strategies that facilitate cross-content literacy.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Adv Educational Studies **Degree Restrictions:** Specialist in Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

EDCI 7225 - Decoding Student Engagement (3 Credit Hours)

Students explore persistent questions about K-12 learner engagement in schools and classrooms. The nature of engagement and its role in meaningful learning are presented. Various challenges to learner engagement are unearthed and studied and solutions sought and applied to teaching contexts. Theoretical models and empirical research inform strategies teachers can use to enrich and enhance learner engagement across K-12 grade levels and content areas for the purpose of creating more satisfying experiences for teachers and their students.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Course Level Restrictions: GS Graduate Semester

Schedule Type (Primary): Asynchronous Instruction

EDCI 7226 - Centering Students in the Curriculum: Cultivating Instruction for Student and Community Culture (3 Credit Hours)

This course is part of the sequence that comprises the Ed.S. program. The course examines culturally relevant, responsive, and sustaining curricula and pedagogy to create lessons, learning, and products rooted in our students, their cultures, and their interests. Students also themselves to identify and unearth potential obstacles to designing and implementing curricula and pedagogy in this capacity because the development of these products is dependent upon positive student-teacher relationships and a willingness to engage with these approaches.

Lecture Hours: 3

Repeatability: May not be repeated for credit.
Grade Mode: Normal (A, B, C, D, F)
Course Level Restrictions: GS Graduate
Schedule Type (Primary): Asynchronous Instruction

EDCI 7227 - Innovating the World Language Classroom (3 Credit Hours)

This graduate-level course is designed for K-12 world language teachers seeking to transform their classrooms through contemporary pedagogies and innovative strategies. The course combines theoretical foundations with practical applications, allowing participants to immediately implement new strategies and assess their effectiveness. Participants explore methods to enhance student engagement, language fluency, and cultural development by integrating modern teaching practices into their world language curriculum. By the end of the course, participants are equipped with the tools to create dynamic, inclusive, and effective language-learning environments that foster both linguistic proficiency and intercultural competence.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Course Level Restrictions: GS Graduate

Schedule Type (Primary): Asynchronous Instruction

EDCI 7256 - Writing Theory (3 Credit Hours)

Examines general theories of writing instruction and composition. In addition, writing theory as it relates to classroom writing instruction is addressed, and the theories that undergird best instructional practices in writing are explored in detail.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Asynchronous Instruction

EDCI 7258 - Assessment in Writing (3 Credit Hours)

Examines assessment as it relates to writing instruction. Candidates evaluate and develop writing rubrics, review standardized test prompts and accompanying rubrics, differentiate between formal and informal assessment in writing, and identify different ways to assess writing.

Prerequisite(s): EDTD 6257

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Asynchronous Instruction

EDCI 7259 - Applications of Effective Writing Instruction (3 Credit Hours)

This course is the culminating component of the Writing Certificate. It examines best writing practices in schools, implementation of these practices in classrooms, assessment in writing, and writing theory as it relates to practice. Educational theory and practice come together to enable students to develop strategies and employ best writing practices.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Ed & Human Dev **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Asynchronous Instruction

EDCI 7364 - Improving Instruction (3 Credit Hours)

This course involves the application of theories of learning in conjunction with a variety of instructional techniques and strategies that promote content and skill-based knowledge acquisition and critical thinking. The practicality and applicability of various instructional strategies will also be addressed.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Specialist in Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

EDCI 7910 - Advanced Inquiry in Educational Studies (3 Credit Hours)

Students will carry out empirical research, action research, and/or theoretical inquiry that represents the application of theory, the extension of research, or the development of creative approaches to aspects of teaching and learning.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Seminar-Small Group,Independent Study,Directed Study (one-to-one),Asynchronous Instruction,Thesis

EDEI 8000 - Introduction to Scholarly Practitioner Learning Communities (1 Credit Hour)

This introduction to the Ed.D. in Educational Innovation program orients students to the necessary resources for successful completion of the degree.

Lecture Hours: 1 **Contact Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Course Level Restrictions: Graduate Semester **Program Restrictions:** 1EDD-EDEI EDD-Educational Innovation

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Asynchronous Instruction

EDEI 8001 - Fairness and Difference in Educational Contexts (3 Credit Hours)

In the context of teaching and learning for life, this course explores the psychological, affective, cognitive, and environmental growth of students. Students examine fairness and the variety of perspectives that construct situations and circumstances for these students and the impact on educational practice and innovation.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Program Restrictions:** 1EDD-EDEI-EDD-Educational Innovation

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Asynchronous Instruction

EDEI 8020 - Advanced Educational Research Design (3 Credit Hours)

This course focuses on the foundations of designing educational research and the philosophical assumptions that guide inquiry. The course emphasizes alignment between research elements including identifying a research problem, ethical obligations as a researcher, reviewing the literature, specifying a purpose, and writing research questions.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Program Restrictions:** 1EDD-EDEI-EDD-Educational Innovation

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Asynchronous Instruction

EDEI 8021 - Advanced Practice in Applied Quantitative Research (3 Credit Hours)

This course is designed to develop a foundation for students to use statistics as a tool to analyze and interpret data in applied research settings. This course focuses on descriptive and inferential statistics relevant to educational data including: frequency distributions, central tendency, variability, correlations, bivariate linear regression, and hypotheses testing via t-test, chi-square, and analysis of variance.

Prerequisite(s): EDUC 7021 >= B or EDEI 8020 >= B

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Program Restrictions:** 1EDD-EDEI-EDD-Educational Innovation

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Asynchronous Instruction

EDEI 8022 - Advanced Practice in Applied Qualitative Research (3 Credit Hours)

This course discusses qualitative methodologies from various traditions including, but not limited to ethnography, case study, phenomenology, and narrative inquiry, along how they are applied through design and data collection. Methods include the collection of interview, observation, and artifact data in both formal and informal educational settings. Issues of trustworthiness and positionality are additionally emphasized.

Prerequisite(s): EDEI 8020 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Program Restrictions:** 1EDD-EDEI-EDD-Educational Innovation

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Asynchronous Instruction

EDEI 8025 - Advanced Quantitative Data Analysis in Education (3 Credit Hours)

This course focuses on advanced quantitative analytical methods relevant to educational data. The course will additionally focus on the presentation of findings and discussion of results in a quantitative research report.

Prerequisite(s): EDEI 8021

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Program Restrictions:** 1EDD-EDEI-EDD-Educational Innovation

Schedule Type (Primary): Seminar - Small Group **Schedule Type (Additional):** Directed Study (one-to-one),Asynchronous Instruction

EDEI 8026 - Advanced Qualitative Data Analysis in Education (3 Credit Hours)

This course covers advanced qualitative data analysis and addresses multiple approaches to analysis, interpretation, and representation. The course will specifically focus on the development of the findings and discussion sections of a qualitative research report with reflexivity and ethical considerations in mind.

Prerequisite(s): EDEI 8022

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Program Restrictions:** 1EDD-EDEI-EDD-Educational Innovation

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Directed Study (one-to-one),Asynchronous Instruction

EDEI 8160 - Curriculum Theory (3 Credit Hours)

This course examines the various philosophical and theoretical traditions in curriculum theory to support educational innovation in various settings. The class addresses theoretical framework used to investigate, analyse, and critique theories, policies, and practices associated with curriculum.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Program Restrictions:** 1EDD-EDEI-EDD-Educational Innovation

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Asynchronous Instruction

EDEI 8162 - Advanced Principles of Pedagogy and Learning (3 Credit Hours)

This course addresses researched-based pedagogical models and instruction techniques using current research in learning theory to inform and guide innovation in different educational settings.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Program Restrictions:** 1EDD-EDEI-EDD-Educational Innovation

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Asynchronous Instruction

EDEI 8163 - Seminar in Place-Based Education (3 Credit Hours)

This course addresses the theory and practice of place-based education to support educational innovation.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Program Restrictions:** 1EDD-EDEI-EDD-Educational Innovation

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Asynchronous Instruction

EDEI 8165 - Curriculum Inquiry (3 Credit Hours)

This course addresses the skills and knowledge of curriculum research methodologies. Through investigation of methodologies used in curriculum research, students develop the ability to analyze, conceptualize, and effectively research issues in curriculum for educational innovation.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Program Restrictions:** 1EDD-EDEI-EDD-Educational Innovation

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Asynchronous Instruction

EDEI 8166 - Curriculum Models (3 Credit Hours)

This course addresses a variety of curricular models in education, engaging students in the analysis and potential viability of curricula in educational settings. Focusing on alternative methods of designing curriculum, schooling, and instruction, students will investigate the application of alternative models as drivers of innovation in current educational systems.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Program Restrictions:** 1EDD-EDEI-EDD-Educational Innovation

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Asynchronous Instruction

EDEI 8167 - Educational Technology to Transform Practice (3 Credit Hours)

This course addresses the design, implementation, and evaluation of educational technology to affect innovation in professional learning programs. Topics include assessing technology needs, designing effective learning and reflection using innovative technology, and evaluating technology tools for curriculum, instruction, and assessment.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Program Restrictions:** 1EDD-EDEI-EDD-Educational Innovation

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Asynchronous Instruction

EDEI 8200 - Leading Innovation in Higher Education (3 Credit Hours)

This course will provide an overview of the landscape of higher education and focus on leading innovation within the context of higher education. Utilizing historical and contemporary case studies, students will explore the intricacies of planning and decision-making in higher education with an emphasis on established norms, federal and state regulations, and the evolving role of postsecondary education in society.

Contact Hours: 3

Grade Mode: Normal (A,B,C,D,F)

Program Restrictions: 1EDD-EDIN EDD-Educational Innovation **Campus Restrictions:** AU Online

Schedule Type (Primary): 57- Asynchronous Instruction

EDEI 8210 - Legal and Ethical Decision Making in Higher Education (3 Credit Hours)

This course will explore the laws and court rulings that shape the legal structure of higher education. Emphasis will be given to adapting to the constantly changing policy landscape that administrators navigate. Students will evaluate case studies and frameworks for ethical decision making, then develop a personal philosophy for ethical decision making in higher education.

Contact Hours: 3

Grade Mode: Normal (A,B,C,D,F)

Program Restrictions: 1EDD-EDIN **Campus Restrictions:** AU Online

Schedule Type (Primary): 57-Asynchronous Instruction

EDEI 8220 - Theoretical Foundations of Higher Education (3 Credit Hours)

This course will introduce theoretical perspectives on the structure, administration, and functioning of higher education. Topics will include organizational theories, leadership theories, and student development theories. Students will explore these theories and develop an applied project based on theories of their choice.

Contact Hours: 3

Grade Mode: Normal (A,B,C,D,F)

Major Restrictions: EDEI-Educational Innovation **Program Restrictions:** 1EDD-EDIN **Campus Restrictions:** AU Online

Schedule Type (Primary): 57-Asynchronous Instruction

EDEI 8420 - Economics of Education (3 Credit Hours)

For decades, practitioners, policymakers, and researchers have paid attention to the generation, distribution, and effective use of P-12 educational resources at local, state, and federal levels. Given the political scrutiny of federal funds and the variation across state education budgets, educational leaders and policymakers must understand how funding affects educational opportunity, identify possible resource reallocation to improve student learning, and discern the costs and benefits of financial investments in schooling. The central goal of this course is to introduce students to the economic concepts and theoretical frameworks necessary to address issues in education finance with attention to current policy debates such as teacher compensation and distribution, school vouchers, and funding formulas. Of note, this course welcomes graduate students with various backgrounds, experiences, and knowledge related to education finance.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A,B,C,D,F)

Course Level Restrictions: GS Graduate **Program Restrictions:** Doctor of Education with a Major in Educational Innovation

Schedule Type (Primary): Asynchronous Instruction **Schedule Type (Additional):** Seminar-Small Group

EDEI 8430 - Philanthropic Development for Leading Innovation (3 Credit Hours)

The course encompasses an ethical framework for addressing the roles of educational leaders in regards to leading, managing, and overseeing philanthropic development and fundraising activities that support educational innovation.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Program Restrictions:** 1EDD-EDEI-EDD-Educational Innovation

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Asynchronous Instruction

EDEI 8450 - Leading Innovations in Teaching and Learning (3 Credit Hours)

This course explores evolving trends in instructional leadership practices for aligning curriculum with instruction and the effective assessment of teaching and learning processes. Approaches to innovation measures of effectiveness in the evaluation of teaching and learning are also examined.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Program Restrictions:** 1EDD-EDEI-EDD-Educational Innovation

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Asynchronous Instruction

EDEI 8460 - Leadership and Interpersonal Dynamics (3 Credit Hours)

This course explores leadership in relation to work groups and teams in organizational settings. Group and team dynamics, facilitation skills, and leader behaviors necessary for leading innovation are addressed.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Program Restrictions:** 1EDD-EDEI-EDD-Educational Innovation

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

EDEI 8461 - Educational Change (3 Credit Hours)

This course addresses change theories, how they apply to reform measures in schools, and the impact of change on teaching and learning. Candidates apply strategies for leading and managing change in schools.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Program Restrictions:** 1EDD-EDEI-EDD-Educational Innovation

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Asynchronous Instruction

EDEI 8470 - Education Policy Analysis and Research (3 Credit Hours)

Education policy is a dynamic and rapidly evolving field that has transformed significantly over the past three decades. The primary goal of this course is to introduce students to the concepts, methods, and tools of education policy analysis, while providing opportunities to apply these approaches to pressing, real-world policy issues. Students will engage with topics such as school choice, charter schools, teacher evaluation, accountability, equality in access, and the intersections of education policy with broader social policies, including health and housing. The course is structured in three parts. The first part introduces policy analysis as an analytic tool, with a focus on the steps in conducting a formal policy analysis. The second part emphasizes the application of social science research methods to evaluate the effectiveness and consequences of educational policies. The third part provides students the opportunity to explore and critique contemporary education policy issues in depth.

Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

College Restrictions: COLLEGE OF EDUCATION AND HUMAN DEVELOPMENT **Major Restrictions:** EDEI- Educational Innovation

Degree Restrictions: EDD Doctor of Education

Schedule Type (Primary): Asynchronous Instruction

EDEI 8950 - Special Topics (3 Credit Hours)

This is the selected topics course in the Doctor of Education in Educational Innovation with a Concentration in Educational Leadership. Subject and course content will vary.

Lecture Hours: 3

Repeatability: May be repeated for credit up to 3 times.

Grade Mode: Normal, Audit

Program Restrictions: 1EDD-EDEI-EDD-Educational Innovation

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

EDEI 8998 - Educational Innovation Dissertation in Practice Preparation (1 to 6 Credit Hours)

The Educational Innovation Dissertation in Practice is required of all Ed.D. candidates. Candidates demonstrate the capability to conduct and apply research outcomes to make strategic decisions and affect educational innovation. This course addresses preparation and defense of a formal dissertation in practice research proposal.

Lecture Hours: 1 to 6

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit, In Progress

Course Level Restrictions: Graduate Semester **Program Restrictions:** 1EDD-EDEI-EDD-Educational Innovation

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Asynchronous Instruction

EDEI 8999 - Educational Innovation Dissertation in Practice (1 to 6 Credit Hours)

Dissertation in Practice for Ed.D. candidates enrolled in this course implement, report, and defend approved Educational Innovation Dissertation in Practice research.

Prerequisite(s): EDEI 8998 >= S

Contact Hours: 1 to 6

Repeatability: May be repeated for credit up to three times.

Grade Mode: Satisfactory/Unsatisfactory, Audit, In Progress

Course Level Restrictions: Graduate Semester **Program Restrictions:** 1EDD-EDEI-EDD-Educational Innovation

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction,Dissertation

EDLR 2900 - Literacy Tutoring and Mentoring Leadership (1 to 3 Credit Hours)

This course introduces university students to literacy training in mentoring and tutoring.

Lab Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Practice Teaching,Internship/Practicum,Thesis

EDLR 6205 - Capstone in Leadership (3 Credit Hours)

A culminating leadership project and a personal portfolio prepared by the candidate (electronic and/or hard copy) to synthesize the concepts and content learned in the leadership program. The project and portfolio will be presented in a public forum.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Practice Teaching,Internship/Practicum,Thesis

EDLR 6400 - Fundamentals of Leadership and Administration (3 Credit Hours)

This course is an introduction to the theory and practice of leadership and administration. Major concepts such as change, conflict management, communication, decision-making, and organizational culture are addressed. School/district/workplace-level performance-based field and lab exercises required.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Asynchronous Instruction,Practice Teaching,Internship/Practicum,Thesis,Dissertation

EDLR 6430 - School Law (3 Credit Hours)

This course examines the legal and fiduciary roles and responsibilities of the school leaders in a performance-based school leadership context. Candidates will examine and demonstrate an understanding of federal, state, and local laws necessary to create a supportive learning environment focused on success for all learners. Ethical and legal issues in communication and relationship-building are integral parts of the course. School/district-level performance-based field exercises are required.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Thesis

EDLR 6440 - Developing Professional Learning Communities (3 Credit Hours)

This course prepares educational leadership candidates to develop and implement professional learning communities in their schools. School-level performance-based field/lab exercises are required.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Independent Study, Asynchronous Instruction, Dissertation

EDLR 6550 - Instructional Supervision for Improving P-12 Learning (3 Credit Hours)

This course is designed to introduce students to an understanding of their supervisory role to all personnel in the school/district setting. Students will develop the awareness, understanding, and capability related to the concepts of supervisory leadership, employ adult learning theory, encourage human relations, provide staff development, apply administrative functions, and organize for change in a collaborative mode with the administrator, teaching staff, adjunct faculty, non-contractual school personnel and community. School/district-level performance-based field and lab exercises required.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Thesis, Dissertation

EDLR 6610 - The Principalship (3 Credit Hours)

This course addresses the roles and responsibilities of the school principal in a performance-based leadership context. Candidates will examine the knowledge, dispositions, and skills required to lead and manage an effective school, focused on success for all students. School/district-level performance-based field exercises are required.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

EDLR 6620 - Human Resources and Group/Community Dynamics (3 Credit Hours)

This course addresses leadership knowledge, performance, and attitudinal competencies as they relate to the principles of human relations, group dynamics, and community relations. Topics include communication, motivation, attitudes, conflict resolution, positive energy, and group leadership. School/district/workplace-level performance-based field and lab exercises required.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

EDLR 6630 - Leading Literacy Programs P-12 (3 Credit Hours)

This course addresses theories and practices relevant for creating and supervising literacy programs. School/district/workplace-level performance-based field and lab exercises required.

Lecture Hours: 1 Lab Hours: 2

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

EDLR 6640 - Developing Trends in Educational Leadership (3 Credit Hours)

This course provides opportunities for educational leadership candidates to explore and synthesize developing trends and issues in school leadership practices through a variety of sources and resources. Performance-based field/clinical exercises are required.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

EDLR 6650 - Grants Writing: Resources for P-12 Learning (3 Credit Hours)

This course is designed to allow students the opportunity to learn methods/processes of grants writing, i.e., project development, funding source development, and proposal writing. School/district-level performance-based field and lab exercises required.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group, Independent Study, Asynchronous Instruction

EDLR 6720 - Leading School Operations and Resources (3 Credit Hours)

Topics covered in the course include physical plant operations, school budget development, operating within legal mandates, recruiting and evaluating personnel, working with administrative staff, and development of effective individual and group communication.

Performance-based field activities are required.

Lecture Hours: 2 Contact Hours: 2

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Thesis, Dissertation

EDLR 6730 - Leading Family and Community Partnerships in Schools (3 Credit Hours)

This course addresses the school leader's role in improving and nurturing collaborative relationships between schools, families, and community stakeholders to support student achievement. Leaders will develop skills in designing comprehensive engagement strategies, facilitating partnerships, and welcoming stakeholders. Thirty-five hours of performance-based field activities are required.

Lecture Hours: 2 Contact Hours: 2

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

EDLR 6740 - Leading the Learning Environment (3 Credit Hours)

This course introduces educational leadership candidates to the beginning knowledge, skills, and dispositions needed to lead a productive teaching and learning environment. Candidates will develop the knowledge, skills, and dispositions to lead effective practices for instructional efficacy and buffering of the learning environment from disruptive and distractive forces. Performance-based field clinical exercises and experiences are required.

Lecture Hours: 2 Contact Hours: 2

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

EDLR 6900 - Tier One Certification Clinical Residency I (1 Credit Hour)

This course is designed to provide students with leadership opportunities in the solution of an administrative or leadership problem at the school site. In collaboration with the building level coach, performance based, building level projects will be identified, planned, designed, implemented, and evaluated. Prerequisite(s): none.

Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Internship/Practicum

Additional Course Fee: Educational Leadership Superv **Fee Type:** Flat Fee **Fee Amount:** \$ 35

EDLR 6901 - Tier One Certification Clinical Residency II (1 Credit Hour)

This course is designed to provide students with leadership opportunities in the solution of an administrative or leadership problem at the school site. In collaboration with the building level coach, performance based, building level projects will be identified, planned, designed, implemented, and evaluated.

Prerequisite(s): EDLR 6900 >= C

Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Internship/Practicum

Additional Course Fee: Educational Leadership Superv **Fee Type:** Flat Fee **Fee Amount:** \$ 35

EDLR 6902 - Tier One Certification Clinical Residency III (1 Credit Hour)

This course is designed to provide students with leadership opportunities in the solution of an administrative or leadership problem at the school site. In collaboration with the building level coach, performance based, building level projects will be identified, planned, designed, implemented, and evaluated.

Prerequisite(s): EDLR 6900 >= C and EDLR 6901 >= C

Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction, Internship/Practicum

Additional Course Fee: Educational Leadership Superv **Fee Type:** Flat Fee **Fee Amount:** \$ 35

EDLR 6950 - Selected Topics in Leadership (1 to 3 Credit Hours)

This course examines leadership trends, issues, and problems in the light of recent knowledge and research. This is a variable content course intended to meet the needs and interests of graduate students in selected areas of leadership. School/district/workplace-level performance-based field and lab exercises required.

Lecture Hours: 0 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

EDLR 6990 - Practices in Teacher Leadership I (2 Credit Hours)

This course examines the role of teacher leaders in guiding and supporting instructional planning to improve academic achievement for all students. The course emphasizes field-based coaching and mentoring experiences that allow the teacher leader to demonstrate the content expertise, pedagogical knowledge, interpersonal skills, planning skills, and supervision skills needed to successfully guide the

process of effective teaching and learning in a school setting.

Contact Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Leadership **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

EDLR 6991 - Practices in Teacher Leadership II (2 Credit Hours)

This course is the second residency in which teacher leaders synthesize and apply the knowledge, skills, and practices identified in Teacher Leadership standards. The course requires advanced field-based coaching and mentoring experiences. Candidates guide and support school improvement plans to improve academic achievement for all students. The course requires knowledge, skills, and dispositions for facilitating collaboration and leading specific components of school improvement plans. Field hours must be completed in multiple settings: P-2, 3-5, 6-8, and 9-12. Candidates continue to work on Individualized Growth Plan. An e-portfolio is presented at the conclusion of the residency.

Prerequisite(s): EDLR 6990 >= S

Contact Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** MED in Teacher Leadership

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction, Internship/Practicum

EDLR 6992 - Practices in Teacher Leadership III (2 Credit Hours)

This course examines the role of teacher leaders in guiding and supporting instructional planning to improve academic achievement for all students. The course emphasizes field-based coaching and mentoring experiences that allow the teacher leader to demonstrate the content expertise, pedagogical knowledge, interpersonal skills, planning skills, and supervision skills needed to successfully guide the process of effective teaching and learning in a school setting.

Prerequisite(s): EDLR 6990 >= S and EDLR 6991 >= S

Contact Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: College of Ed & Human Dev **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Program Restrictions:** 1MED-LEADER-MED-Educational Leadership

Schedule Type (Primary): Internship/Practicum

EDLR 7000 - Special Topics in Educational Leadership (3 Credit Hours)

This course examines problems in the light of recent knowledge and research in educational leadership. Focus is on specifically designated areas of educational leadership. School/district-level performance-based field and lab exercises required.

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

EDLR 7031 - Educational Program Evaluation (3 Credit Hours)

Candidates explore theories, concepts, practices and processes in educational program evaluation, effectiveness measures, and alignment to vision, mission, and stated educational goals. Skills in conducting, using, and communicating evaluation findings are an integral part of this course. Performance-based experiences constitute substantial parts of this course.

Prerequisite(s): EDUC 6021 >= C
Lecture Hours: 2 **Contact Hours:** 1
Repeatability: May not be repeated for credit.
Grade Mode: Normal, Audit
Course Level Restrictions: Graduate Semester
Schedule Type (Primary): Asynchronous Instruction

EDLR 7351 - Tier II Clinical Residency for Educational Leaders - I (4 Credit Hours)

This is the first of the consecutive three-series residency courses designed to provide Tier-II leadership candidates with increasing and evolving leadership opportunities and responsibilities at the school/district levels. In collaboration with a field coach/mentor and supervising instructor, performance-based assignments, activities, and projects are identified, planned, designed, implemented, evaluated, and reported for the purposes of improving school/district and student performance. The course final grade U or S. Candidates must complete a minimum of 250 hours of field experience during this course.

Contact Hours: 12
Repeatability: May not be repeated for credit.
Grade Mode: Satisfactory/Unsatisfactory, Audit
Course Level Restrictions: Graduate Semester
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis
Additional Course Fee: Educational Leadership Superv **Fee Type:** Flat Fee **Fee Amount:** \$ 35

EDLR 7352 - Tier II Clinical Residency for Educational Leaders - II (4 Credit Hours)

This is the second of the consecutive three-series residency courses designed to provide Tier-II leadership candidates with increasing and evolving leadership opportunities and responsibilities at the school/district levels. In collaboration with a field coach/mentor and supervising instructor, performance-based assignments, activities, and projects are identified, planned, designed, implemented, evaluated, and reported for the purposes of improving school/district and student performance. The course final grade U or S. Candidates must complete a minimum of 250 hours of field experience during this course.

Prerequisite(s): EDLR 7351 >= C
Contact Hours: 12
Repeatability: May not be repeated for credit.
Grade Mode: Satisfactory/Unsatisfactory, Audit
Course Level Restrictions: Graduate Semester
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis
Additional Course Fee: Educational Leadership Superv **Fee Type:** Flat Fee **Fee Amount:** \$ 35

EDLR 7353 - Tier II Clinical Residency for Educational Leaders - III (4 Credit Hours)

This is the third of the consecutive three-series residency courses designed to provide Tier-II leadership candidates with increasing and evolving leadership opportunities and responsibilities at the school/district levels. In collaboration with a field coach/mentor and supervising instructor, performance-based assignments, activities, and projects are identified, planned, designed, implemented, evaluated, and reported for the purposes of improving school/district and student performance. The course final grade U or S. Candidates must complete a minimum of 250 hours of field experience during this course.

Prerequisite(s): EDLR 7351 >= C and EDLR 7352 >= C
Contact Hours: 12
Repeatability: May not be repeated for credit.
Grade Mode: Satisfactory/Unsatisfactory, Audit
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,
Additional Course Fee: Educational Leadership Superv **Fee Type:** Flat Fee **Fee Amount:** \$ 35

EDLR 7430 - Improving Instructional Capacity Through Change (3 Credit Hours)

This course provides opportunity for educational leadership candidates to explore perspectives on managing change and building instructional capacity in schools. The course examines critical factors that drive change in schools and the types of changes schools face in contemporary times. Domains of school and instructional performance, in change contexts, are examined and used to inform instructional capacity building. Performance-based field clinical exercises, assessments, and experiences constitute substantial parts of this course.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Asynchronous Instruction

EDLR 7450 - Public School Finance (3 Credit Hours)

The course will examine the equity and efficiency of tax supported public education, current trends in funding of public education and administrative tasks of the budget process such as determining needs, establishing cost, compensating personnel, purchasing, accounting, auditing, inventorying, warehousing, and paying the bills will be studied. School/district-level performance-based field and lab exercises required.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

EDLR 7460 - Leadership Styles (3 Credit Hours)

This course provides the opportunity for students to study leadership theory and effective management practices in American and International organizations. School/district-level performance-based field and lab exercises required.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

EDLR 7470 - Managing Educational Operations to Support Teaching and Learning (3 Credit Hours)

This course introduces candidates to effective practices in sourcing, allocating, and utilizing educational resources and facilities to effectively support the teaching/learning process and meet the needs of all students. Performance-based field clinical exercises, assessments, and experiences constitute substantial parts of this course.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

EDLR 7500 - Organizational Development in Education (3 Credit Hours)

This course will introduce the student to the unique organizational behaviors of educational institutions. The processes of leadership, organization, development, theory, decision-making, and administrative processes will be studied. The overarching goal will be to develop leadership traits that will directly facilitate and impact levels of teaching and learning. School/district-level performance-based field and lab exercises required.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Program Restrictions:** 1EDS-LEADER-EDS-Educational Leadership

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Internship/Practicum, Thesis, Dissertation

EDLR 7570 - Policy and Issues in Educational Leadership (3 Credit Hours)

Candidates will examine current and emerging federal, state, and local educational issues and policies affecting governance. Policy evaluation, issue advocacy and policy articulation related to promoting school improvement are integral parts of this course. Performance-based field clinical exercises, assessments, and experiences constitute substantial parts of this course.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching

EDLR 7620 - Leading School Communities to Support Teaching and Learning (3 Credit Hours)

This course prepares educational leaders to analyze school context, organize people and resources, and foster a positive learning environment that advances achievement for all students. Emphasis is placed on collaborative problem solving with teachers, staff, families, and community partners, as well as aligning school culture, instruction, and operations to support continuous improvement. Candidates engage in evidence-based decision making, leadership of team routines, and constructive partnerships. Performance-based clinical exercises, assessments, and field experiences are integral to the course.

Lecture Hours: 2 **Contact Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Asynchronous Instruction

EDLR 7630 - Improving Instructional Capacity Through Change (3 Credit Hours)

This course provides opportunity for educational leadership candidates to explore perspectives on managing change and building instructional capacity in schools. The course examines critical factors that drive change in schools and the types of changes schools face in contemporary times. Domains of school and instructional performance, in change contexts, are examined and used to inform instructional capacity building. Performance-based field clinical exercises, assessments, and experiences constitute substantial parts of this course.

Lecture Hours: 2 **Contact Hours:** 2

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Asynchronous Instruction

EDLR 7960 - School Performance Analysis and Evaluation (3 Credit Hours)

This course is designed to provide candidates with an understanding of the relevant domains of school performance (DoSP). The course introduces candidates to the identification, measurement, analysis, synthesis and evaluation of relevant DoSP and the implications for school improvement.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

EMED 5001 - Emergency Medicine Clerkship (12 Credit Hours)

This month rotation is structured to give the student an introduction to the specialty of emergency medicine. The rotation is designed to provide an opportunity for the student to gain experience in dealing with conditions routinely seen in the practice of emergency medicine. Clinical instruction in the initial evaluation and stabilization of the acutely ill and injured patient will be provided by working alongside emergency medicine faculty who are present 24 hours a day. The rotation provides ample clinical experience and patient contact. The schedule includes approximately 40 hours of patient contact a week and EMS experience. There is assigned reading and

a final exam. Students will rotate at one of several sites, including MCG, Ft. Gordon, Aiken, and Tifton.

Contact Hours: 40

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

EMED 5002 - Emergency Medicine Externship (4 to 8 Credit Hours)

Students will serve as a sub-intern in the emergency department seeing patients primarily and staffing with an attending physician. The student assumes the primary medical care responsibilities for patients in the emergency department and is supervised by emergency medicine faculty. The sub-intern will work independent of EM resident input, working with specified EM faculty over the Sub-I month. Students will present a lecture to the residency class during the grand rounds. Students will rotate on a local ambulance service for two shifts.

Prerequisite(s): EMED 5001

Lecture Hours: 3 **Contact Hours:** 45

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia **Degree Restrictions:** Doctor of Medicine

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

EMED 5004 - Research in Emergency Medicine (4 to 8 Credit Hours)

Prerequisite: Approval by faculty member with whom research will be done. Opportunity to participate in research projects in conjunction with members of the faculty of the Department of Emergency Medicine. Arrangements to be made by the student with a member of the faculty. Students will be required to submit a summary of their research findings in abstract form to receive credit for the elective. If the duration of the work is more than one month, students only receive credit for a one month elective.

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Directed Study (one-to-one)

EMED 5005 - Emergency Medicine Externship Off-Campus (4 to 8 Credit Hours)

This special off-campus rotation will be arranged by the student with an off-site hospital which accepts off-campus students for an emergency medicine rotation. The rotation will include nine hours of patient contact in addition to didactic sessions offered by the site. Teaching materials will be provided by the chosen faculty and an examination at the end of the rotation may be required depending on the selected site.

Prerequisite(s): EMED 5001 or EMED 5002

Contact Hours: 40

Repeatability: May be repeated for credit up to 3 times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Supervised Lab/Clinic

EMED 5008 - Emergency Ultrasound (4 to 8 Credit Hours)

Prerequisites: EMED 5001 1) Familiarization of the principles of Emergency US 2) Demonstration of the clinical utility of EUS 3) Learn the basic principles and physics of sonography 4) Introduction to the basic emergency ultrasound exams.

Lecture Hours: 10.75 **Contact Hours:** 28

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

EMED 5010 - Emergency Medicine Clerkship for Visiting Civilian Students (4 to 8 Credit Hours)

The goals of the course are to attain an overview of the specialty of emergency medicine and gain insight into the assessment and management of emergent patients.

Lecture Hours: 13 **Lab Hours:** 40

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Medical College of Georgia **Course Level Restrictions:** Professional Semester

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

EMED 5011 - Emergency Medicine Clerkship for Military Applicants (4 to 8 Credit Hours)

The goals of the course are to attain an overview of the specialty of emergency medicine and gain insight into the assessment and management of emergent patients.

Lecture Hours: 13 **Lab Hours:** 40

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Medical College of Georgia **Course Level Restrictions:** Professional Semester

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

EMED 5013 - Rural Emergency Medicine (4 to 8 Credit Hours)

The rotation will provide ample clinical experience, patient contact, and procedures. The schedule includes approximately 34-36 hours of patient care contact per week. Students will spend at least one session with a triage nurse in the ED. Students will ride one shift with EMS and one with paramedics during this rotation. Clinical instruction in the initial evaluation and stabilization of the acutely ill and injured patient will be provided by working alongside emergency medicine faculty who are present 24 hours a day. Students will work a variety of shifts including days, evenings and nights, including some weekends, comprising a total of 15 nine-hour shifts.

Contact Hours: 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MD_MEDD-Medicine

Schedule Type (Primary): Supervised Lab/Clinic

EMED 5014 - Emergency Medicine Services (EMS) Elective for Medical Students (4 to 8 Credit Hours)

M3 or M4 students will observe, assist, and learn from EMS personnel who respond to 911 calls.

Contact Hours: 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Degree Restrictions: Doctor of Medicine

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

EMED 5016 - Transition to Residency Elective (4 to 8 Credit Hours)

The intention of this course is to serve as a preparation for residency. Participants will review topics covering clinical and procedural knowledge and skills as well as review ethical principles, personal wellness recommendations, and financial proficiency. Clinical and procedural review will encompass such topics as high-yield pharmacology, reading an EKG, reading a CXR, performing basic procedures, basic ultrasound, etc. Students will participate in simulations to prepare them for emergent situations they are likely to encounter as interns. They will also be introduced to skills that will be required of them as interns, including returning pages, handling cross-cover emergencies, managing team dynamics, dealing with medical error, handling patient deaths, and recognizing and intervening when biased care is experienced. Additionally, participants will discuss increasing self-awareness and develop skills to maintain personal wellness during residency.

Lecture Hours: 6 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

EMED 5018 - Emergency Medicine Medical Simulation (4 to 8 Credit Hours)

The intention of this course is to allow students to gain a better understanding of the capabilities and limitations of simulation in healthcare education. During this elective, students will become familiar with simulation equipment such as high-fidelity mannequins, procedural task trainers, ultrasound machines, and ultrasound phantoms. Students will be involved in simulation case creation, simulation and procedural session setup, controlling the high-fidelity mannequins during simulations, and debriefing sessions.

Lecture Hours: 2 **Lab Hours:** 6

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Supervised Lab/Clinic

EMED 5019 - Imaging in Clinical Emergency Medicine Elective (4 to 8 Credit Hours)

In this course, students will learn to identify and correlate anatomical structure with radiographic images; demonstrate basic interpretation skills in evaluating images of the human body; recognize the most frequent imaging manifestations of common diseases in multi-modalities; define terms commonly used in radiology reports; describe the basic principles of radiation exposure and radiation risk exposure; compare & contrast the benefits & limitations of different radiologic modalities; and use the ACR appropriateness criteria to select appropriate radiographic diagnostic studies based on a patient presentation. For each imaging test, students will identify what is being imaged, how the results are interpreted, how accurate are these results, how safe are these tests, and when and in whom these tests should or should not be used. During this course the student will complete Aquifer Radiology's 19 interactive virtual patient cases, learn to recognize each of the conditions in the American College of Radiology's Diagnostic Short List for medical students, and complete assigned patient care scenario assignments.

Lecture Hours: 6 **Contact Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

EMED 5085 - Phase I Elective: Freshman Elective in Emergency Medicine (1 Credit Hour)

Prerequisite: None. Students will shadow a senior student or emergency medicine resident in the initial assessment and management of undifferentiated patients. There will be interaction with the attending physician on all patients. Activities will be entirely clinical.

Contact Hours: 10

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Supervised Lab/Clinic

EMED 5086 - Phase I Elective: Introduction to Wilderness Medicine (1 Credit Hour)

Weekly seminars will be conducted by the emergency medicine physicians on a wide variety of topics encompassed by the expanse of wilderness medicine. Subjects covered will include envenomations, altitude illness, heat and cold injuries, water purification, traveler's diarrhea, and dive medicine, etc. Subjects covered can be tailored to group interest and experience.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture

EMED 5089 - Wilderness Medicine Elective (1 Credit Hour)

Students will demonstrate proficiency in developing, directing, and instituting CME wilderness medicine course (WM). Students will demonstrate knowledge of wilderness medicine skills by developing and directing case simulations. Students will demonstrate knowledge of wilderness search and rescue, safety and medical plan development and implementation for WM course of approximately 200 participants.

Lecture Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia **Course Level Restrictions:** Professional Semester

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

EMED 5091 - Emergency Medical Services (EMS) and Disaster Medicine (1 Credit Hour)

A two-hour interactive course that includes lecture, seminar, hands on education on EMS, and disaster medicine. This course offers an introduction to out-of-hospital management of EMS and disaster care to include: fire and air EMS response, critical prehospital emergency conditions, tactical medicine, disaster and mass gathering support and management. EMS is a medical subspecialty that involves prehospital emergency patient care, including initial patient stabilization, treatment, and transport in specially equipped ambulances or helicopters to hospitals. The purpose of EMS subspecialty certification is to standardize physician training and qualifications for EMS practice, improve patient safety, and enhance the quality of emergency medical care provided to patients in the prehospital environment, and facilitate further integration of pre-hospital patient treatment into the continuum of patient care.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Seminar - Small Group

EMED 5092 - Introduction to Emergency Ultrasound and Emergency Procedures (1 Credit Hour)

Develop a foundation with emergency point-of-care ultrasound, learning image acquisition and image interpretation of the liver, heart, gall bladder, soft tissue structure as well as US guided procedures. Learn and practice common ER procedures (airway protection, line placement, suturing, and splinting).

Lab Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

EMED 5093 - Adventures in Global Health- A Virtual Medical Trip (1 Credit Hour)

Over the course of nine weeks, students will be led on a virtual medical trip by several faculty members with extensive experience leading medical teams in the developing world. Students will help plan and execute a simulated medical outreach trip in an area of need. Topics will range from travel preparation to dealing with on the ground emergencies, and the challenge of patient care in resource limited settings. Sessions will be interactive and focused on group discussion with minimal time spent on didactic lectures. Hands on activities are also planned such as setting up and running a mobile laboratory.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Degree Restrictions: Doctor of Medicine

Schedule Type (Primary): Lecture

EMED 5999 - Emergency Medicine Clerkship Remediation (1 Credit Hour)

Emergency Medicine Clerkship Remediation

Contact Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Program Restrictions: MD_MEDD-Medicine

Schedule Type (Primary): Independent Study

MEDI 5007 - International and Travel Medicine (4 to 8 Credit Hours)

Prerequisite: Successful completion of third year of medical school This will be a supervised clinical experience with students engaging in patient care under the direct supervision of faculty trained and familiar with travel medicine, clinical tropical medicine, and medicine in the developing world.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Internship/Practicum

REMD 5000 - Emergency Medicine (27 Credit Hours)

Lecture Hours: 14 **Contact Hours:** 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents **Major Restrictions:** Emergency Medicine

Schedule Type (Primary): Internship/Practicum

ENDO 5411 - Fundamentals of Endodontics (4 Credit Hours)

This course will introduce the student to the field of endodontics through lecture sessions and laboratory projects. At the conclusion of the course, the student shall be competent in the performance of endodontic procedures on extracted teeth. The student then will be scheduled in the Endodontic Block Clinic for endodontic treatment on extracted teeth mounted in the endodontic dentiform (endodontic simulations). There are 30 sessions that include: 15 hours of lecture, 12 four hour sessions of lab, two four hour laboratory practical examinations, and one two hour final written examination. The purpose of the course is to introduce the student to endodontic biology, pathosis, diagnosis, and treatment.

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

ENDO 5602 - Endodontic Seminar (1 Credit Hour)

Seminars cover such topics as alternative endodontic techniques, endodontic surgery, rationale for case referral, and endodontic diagnosis. Students are also introduced to the endodontic literature with assignments of written reports of articles in the Journal of Endodontics.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Major Restrictions: Advanced Standing DMD

Schedule Type (Primary): Lecture

ENDO 5701 - Endodontic Seminar (0 to 1 Credit Hour)

This course consists of the successful completion of the following procedures: 1. Diagnostic testing exercise which includes performing endodontic diagnostic testing on a classmate. 2. Apex locator simulation practical seminar. 3. Simulated clinical procedures on five extracted teeth mounted in the endodontic dentiform.

Contact Hours: 0 to 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Normal, Continuing Progress Courses

Major Restrictions: Advanced Standing DMD

Schedule Type (Primary): Supervised Lab/Clinic

ENDO 5702 - Endontic Clinic (0 to 2 Credit Hours)

This course consists of the performance of endodontic procedures that are indicated for patients. Each case must be treatment planned to include the endodontic therapy as well as the definitive restoration.

Contact Hours: 0 to 2

Repeatability: May not be repeated for credit.
Grade Mode: Satisfactory/Unsatisfactory
Major Restrictions: Advanced Standing DMD
Schedule Type (Primary): Supervised Lab/Clinic

ENDO 5903 - Honors Endodontics (1 Credit Hour)

This is an elective honors course that provides qualified students the opportunity to treat advanced and more challenging endodontic cases. The course consists of a four-hour seminar on a variety of advanced endodontic topics and the performances of endodontic procedures that are indicated for patients.

Contact Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DMD_DENT-Dentistry

Schedule Type (Primary): Supervised Lab/Clinic

ENDR 7021 - Advanced Clinical Literature Seminar / Journal Club (10 Credit Hours)

The purpose of Journal Club and Advanced Clinical Literature Seminar is to increase the resident's ability to develop a scientific rationale for their clinical diagnosis and treatment and to be discriminative when reading the dental and medical literature. This activity will also enable the resident to gain experience with the different databases that are available at the campus library. Each resident will be required to survey all of the articles in assigned journals on a weekly basis and, in addition, pertinent articles on selected topics will be reviewed.

Lecture Hours: 7 **Contact Hours:** 3

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

ENDR 7025 - Case Presentation Seminar (10 Credit Hours)

The purpose of the Case Presentation Seminar is to increase the resident's ability to provide an oral presentation discussing the diagnosis and treatment of their cases and to develop a scientific rationale for their treatment. This course will also prepare the residents to complete their case portfolio in the American Board of Endodontics (ABE) format.

Lecture Hours: 7 **Contact Hours:** 3

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

ENDR 7031 - Advanced Clinical Literature Seminar / Journal Club (10 Credit Hours)

The purpose of Journal Club and Advanced Clinical Literature Seminar is to increase the resident's ability to develop a scientific rationale for their clinical diagnosis and treatment and to be discriminative when reading the dental and medical literature. This activity will also enable the resident to gain experience with the different databases that are available at the campus library. Each resident will be required to survey all of the articles in assigned journals on a weekly basis and, in addition, pertinent articles on selected topics will be reviewed.

Lecture Hours: 7 **Contact Hours:** 3

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

ENDR 7035 - Case Presentations Seminar (10 Credit Hours)

The purpose of the Case Presentation Seminar is to increase the resident's ability to provide an oral presentation discussing the diagnosis and treatment of their cases and to develop a scientific rationale for their treatment. This course will also prepare the residents to complete their case portfolio in the American Board of Endodontics (ABE) format.

Lecture Hours: 10 **Contact Hours:** 10

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit
Schedule Type (Primary): Seminar - Small Group

ENDR 7040 - Endodontic Research I (4 Credit Hours)

Each resident will develop a research protocol and have an active role in conducting a research project. The research project will be compiled into a document and submitted for publication to a refereed journal. The resident will also typically submit an abstract of the research and present via oral or poster presentation at the annual session of the AAE.

Lab Hours: 4

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

ENDR 7041 - Endodontic Research II (4 Credit Hours)

Each resident will develop a research protocol and have an active role in conducting a research project. The research project will be compiled into a document and submitted for publication to a refereed journal. The resident will also typically submit an abstract of the research and present via oral or poster presentation at the annual session of the AAE.

Lab Hours: 4

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

ENDR 7120 - Clinical Endodontics I (21 Credit Hours)

Lab Hours: 21

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Supervised Lab/Clinic

ENDR 7130 - Clinical Endodontics II (23 Credit Hours)

Lab Hours: 22

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Supervised Lab/Clinic

ENDR 8021 - Advanced Clinical Literature Seminar / Journal Club (10 Credit Hours)

The purpose of Journal Club and Advanced Clinical Literature Seminar is to increase the resident's ability to develop a scientific rationale for their clinical diagnosis and treatment and to be discriminative when reading the dental and medical literature. This activity will also enable the resident to gain experience with the different databases that are available at the campus library. Each resident will be required to survey all of the articles in assigned journals on a weekly basis and, in addition, pertinent articles on selected topics will be reviewed.

Lecture Hours: 7 **Lab Hours:** 3

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

ENDR 8025 - Case Presentation Seminar (10 Credit Hours)

The purpose of the Case Presentation Seminar is to increase the resident's ability to provide an oral presentation discussing the diagnosis and treatment of their cases and to develop a scientific rationale for their treatment. This course will also prepare the residents to complete their case portfolio in the American Board of Endodontics (ABE) format.

Lecture Hours: 10 **Contact Hours:** 10

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

ENDR 8031 - Advanced Clinical Literature Seminar / Journal Club (10 Credit Hours)

The purpose of Journal Club and Advanced Clinical Literature Seminar is to increase the resident's ability to develop a scientific rationale for their clinical diagnosis and treatment and to be discriminative when reading the dental and medical literature. This activity will also enable the resident to gain experience with the different databases that are available at the campus library. Each resident will be required to survey all of the articles in assigned journals on a weekly basis and, in addition, pertinent articles on selected topics will be reviewed.

Lecture Hours: 10 **Contact Hours:** 10

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

ENDR 8035 - Case Presentation Seminar (10 Credit Hours)

The purpose of the Case Presentation Seminar is to increase the resident's ability to provide an oral presentation discussing the diagnosis and treatment of their cases and to develop a scientific rationale for their treatment. This course will also prepare the residents to complete their case portfolio in the American Board of Endodontics (ABE) format.

Lecture Hours: 10 **Contact Hours:** 10

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

ENDR 8040 - Endodontic Research III (2 Credit Hours)

Each resident will develop a research protocol and have an active role in conducting a research project. The research project will be compiled into a document and submitted for publication to a refereed journal. The resident will also typically submit an abstract of the research and present via oral or poster presentation at the annual session of the AAE.

Contact Hours: 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

ENDR 8041 - Endodontic Research IV (1 Credit Hour)

Each resident will develop a research protocol and have an active role in conducting a research project. The research project will be compiled into a document and submitted for publication to a refereed journal. The resident will also typically submit an abstract of the research and present via oral or poster presentation at the annual session of the AAE.

Contact Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

ENDR 8121 - Clinical Endodontics 3 (23 Credit Hours)

This is a clinical course given each semester of the program that provides the resident with supervised clinical experience in the management and treatment of all types of complex nonsurgical and surgical endodontic cases. Residents gain experience in the management and treatment of cases which are the same types of complex nonsurgical and surgical cases treated in a specialty practice of endodontics.

Lab Hours: 23

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Supervised Lab/Clinic

ENDR 8131 - Clinical Endodontics 4 (23 Credit Hours)

This is a clinical course given each semester of the program that provides the resident with supervised clinical experience in the management and treatment of all types of complex nonsurgical and surgical endodontic cases. Residents gain experience in the management and treatment of cases which are the same types of complex nonsurgical and surgical cases treated in a specialty practice of endodontics.

Lab Hours: 23

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Supervised Lab/Clinic

ENGR 2020 - Statics (3 Credit Hours)

Elements of statics in two and three dimensions, centroids, friction, distributed loads, free-body diagrams.

Prerequisite(s): PHYS 2211 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

ENGR 2040 - Dynamics (3 Credit Hours)

Kinematics and dynamics of particles and rigid bodies in one, two, and three dimensions. Work-energy and impulse-momentum concepts.

Prerequisite(s): ENGR 2020 $\geq$ C

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

ENGR 2060 - Programming for Science and Engineering (4 Credit Hours)

An introduction to computer programming using a high-level language supporting scientific programming suitable for engineering, physical sciences, and mathematics. Students will learn to write computer programs with the goal of solving numerical problems relevant to engineering and applied sciences. STEM GPA Eligible Course.

Prerequisite(s): MATH 2011 or MATH 2011H

Lecture Hours: 3 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

ENGL 1101 - College Composition I (3 Credit Hours)

Composition I focuses on skills required for effective writing in a variety of contexts, with emphasis on exposition, analysis, and argumentation. This course also includes introductory use of a variety of research skills. The course provides instruction in word processing and in computer-based research. Students must continue to register for English 1101 each successive semester until they have completed the course with a grade of C or better. Both ENGL 1101 and ENGL 1102 should be completed within the first 30 hours of a student's undergraduate degree program.

Core IMPACTS Requirement(s) Satisfied: Communicating in Writing (Writing)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Independent Study,Asynchronous Instruction

ENGL 1101H - Honors College Composition I (3 Credit Hours)

Composition I focuses on skills required for effective writing in a variety of contexts, with emphasis on exposition, analysis, and argumentation. This course also includes introductory use of a variety of research skills. The course provides instruction in word processing and in computer-based research. Students must continue to register for ENGL 1101 each successive semester until they have completed the course with a grade of C or better. Both ENGL 1101 and ENGL 1102 should be completed within the first 30 hours of a student's undergraduate degree program.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Asynchronous Instruction

ENGL 1102 - College Composition II (3 Credit Hours)

College Composition II is a writing-based course where students refine their writing skills through themed courses with in-depth source material around a particular topic. Students read and write in variety of genres surrounding the theme of the course, and they compose a major academic research paper with independent research. Students who complete ENGL 1101 must enroll in ENGL 1102 no later than the first semester they enroll following completion of ENGL 1101. Students must continue to register for English 1102 each successive semester until they have completed the course with a grade of C or better. Both ENGL 1101 and ENGL 1102 should be completed within the first 30 hours of a student's undergraduate degree program.

Prerequisite(s): ENGL 1101 >= C or ENGL 1101H >= C

Core IMPACTS Requirement(s) Satisfied: Communicating in Writing (Writing)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Asynchronous Instruction

ENGL 1102H - Honors College Composition II (3 Credit Hours)

Literature-based, Composition II develops writing skills beyond the levels of proficiency required in ENGL 1101. Interpretation and evaluation are emphasized, and more advanced research methods are incorporated. The course includes instruction in composition of a research paper. Students who complete ENGL 1101 must enroll in ENGL 1102 no later than the first semester they enroll following completion of ENGL 1101. Students must continue to register for ENGL 1102 each successive semester until they have completed the course with a grade of C or better. Both ENGL 1101 and ENGL 1102 should be completed within the first 30 hours of a student's undergraduate degree program.

Prerequisite(s): ENGL 1101H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Asynchronous Instruction

ENGL 1113H - Honors Freshman Composition I (3 Credit Hours)

This is an Honors Course. This course develops more advanced skills in critical reading, thinking, and writing than is possible in ENGL 1101. The course incorporates study of texts by some of the world's most influential thinkers into a framework which develops skills in critical reading, critical thinking, and writing at a level more advanced than is possible in ENGL 1101. The course also includes basic instruction in word-processing and in computer-based research. A grade of C or better is required. A student who fails to make a C or better in ENGL 1113H must take ENGL 1101. Prerequisite(s): Eligibility for honors English/Invitation of the Department.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

ENGL 1114H - Honors Freshman Composition II (3 Credit Hours)

A literature-based composition course, this course emphasizes research, analysis, interpretation, and evaluation. Based in literature which reflects cultural diversity, the course explores a greater variety of literature and of theoretical approaches to literature than is possible in ENGL 1102. This course includes instruction in library and computer-based research and correct reporting and documenting of research in a lengthy paper. A grade of C or better is required. A student who fails to make a C or better in this honors course must take ENGL 1102. Prerequisite(s): Eligibility for honors English/Invitation of the Department.

Prerequisite(s): ENGL 1113H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

ENGL 2060 - Introduction to Literature (3 Credit Hours)

A themed survey course on basic literary concepts and genres, including poetry, short fiction, drama, and the novel.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1113H >= C) and (ENGL 1102 >= C or ENGL 1114H >= C)

Core IMPACTS Requirement(s) Satisfied: Arts, Humanities, and Ethics (Humanities)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 2110 - Creative Writing (3 Credit Hours)

An introduction to the fundamental features of fiction, poetry, creative nonfiction and drama. Students will read a variety of genres and styles and practice techniques to generate original pieces. This course offers a basis for deeper study in creative writing and develops storytelling skills for writing-focused professions.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Asynchronous Instruction

ENGL 2111 - World Literature I (3 Credit Hours)

A themed survey course on important works of world literature from ancient times through the mid-seventeenth century.

Prerequisite(s): ENGL 1101 >= C and ENGL 1102 >= C

Core IMPACTS Requirement(s) Satisfied: Arts, Humanities, and Ethics (Humanities)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 2112 - World Literature II (3 Credit Hours)

A themed survey course on important works of world literature from the mid-seventeenth century to the present.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C)

Core IMPACTS Requirement(s) Satisfied: Arts, Humanities, and Ethics (Humanities)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment
Grade Mode: Normal, Audit
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 2121 - British Literature I (3 Credit Hours)

A survey of British literatures from Beowulf to Milton, including major genres and works of the period. Includes study and application of literary terminology with a specific emphasis on close reading and literary analysis.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C)

Core IMPACTS Requirement(s) Satisfied: Arts, Humanities, and Ethics (Humanities)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 2122 - British Literature II (3 Credit Hours)

A survey of British literature from the Restoration to the present day, including major genres and works of the period. Includes study and application of literary terminology with a special emphasis on close reading and literary analysis.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C)

Core IMPACTS Requirement(s) Satisfied: Arts, Humanities, and Ethics (Humanities)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 2131 - American Literature I (3 Credit Hours)

A themed survey course on American literature from the pre-colonial age to the mid-nineteenth century.

Prerequisite(s): ENGL 1101 >= C and ENGL 1102 >= C

Core IMPACTS Requirement(s) Satisfied: Arts, Humanities, and Ethics (Humanities)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 2132 - American Literature II (3 Credit Hours)

A themed survey course on American literature from the mid-nineteenth century to the present.

Prerequisite(s): ENGL 1101 >= C and ENGL 1102 >= C

Core IMPACTS Requirement(s) Satisfied: Arts, Humanities, and Ethics (Humanities)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 2140 - African American Literature (3 Credit Hours)

A survey of important works of African American literature from the 18th century to the present. Students read, analyze, and interpret texts within their historical and social contexts, considering the aesthetic, cultural, and ethical values they reflect.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C or ENGL 1113H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C or ENGL 1114H >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 2680 - Professional and Technical Writing (3 Credit Hours)

A core-level introduction to the concepts, strategies, and practices essential for writing procedures, proposals, and multiple forms of business correspondence. Students will communicate complex subject matter to specific audiences, lay and technical, in print and digital formats. Attention will be given to effective use of format. Documents will undergo a thorough revision process.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Asynchronous Instruction

ENGL 2950 - Selected Topics (3 Credit Hours)

A study of various literary developments, including movements, authors, and genres of interest to the lower-division undergraduate student.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C)

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 3110 - Topics in African American Literature and Culture (3 Credit Hours)

A variable topics course that examines African American literature using interdisciplinary intellectual approaches.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 3120 - Southern Literature (3 Credit Hours)

A survey of works by southern writers, with emphasis on twentieth-century prose writers.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 3210 - Film Appreciation (3 Credit Hours)

An introduction to the art of the motion picture, including a consideration of camera movement, camera angles, lighting, editing, mise en scene, acting, plot and story.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 3250 - Introduction to Theory and Method (3 Credit Hours)

This course is an introduction to research methods and scholarly standards in literary studies, with an introduction to major schools of theory and their associated terminology. Students produce a research paper. Students must enroll in this course before completing ENGL 3681.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 3310 - Women's Literature (3 Credit Hours)

An examination of a wide range of women writers, both classic and contemporary, with an emphasis on multicultural and/or multidisciplinary approaches.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 3320 - Children's Literature (3 Credit Hours)

A survey of literature for children, including poetry, picture books, fiction, and non-fiction for use across the curriculum.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 3330 - Literature for Pre-Adolescents and Adolescents (3 Credit Hours)

A survey of types of literature primarily read by pre-adolescents and adolescents.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 3605 - Literature for the Creative Writer: Creative Nonfiction (3 Credit Hours)

An examination of the reading and writing of creative nonfiction designed specifically for creative writers. Students will discuss ways in which creative nonfiction writers utilize elements of craft. Students will also write creative nonfiction and critical essays in response to readings.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C or ENGL 1113H >= C) and (ENGL 1102 >= C or ENGL 1102H >=C or ENGL 1114H >=C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Bachelor of Arts

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Asynchronous Instruction

ENGL 3610 - Literature for the Creative Writer: Fiction (3 Credit Hours)

An examination of the reading and writing of fiction designed specifically for creative writing students. Students will discuss ways in which fiction writers utilize elements of craft. Students will also write fiction and critical essays in response to their readings.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C or ENGL 1113H >= C) and (ENGL 1102 >= C or ENGL 1102H >=C or ENGL

1114H >=C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Asynchronous Instruction

ENGL 3615 - Literature for the Creative Writer: Poetry (3 Credit Hours)

An examination of the reading and writing of literature designed specifically for creative writing students. Students will discuss ways in which poets utilize elements of craft. Students will also write poetry and critical essays in response to their readings.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 3620 - Writing for the Theatre (3 Credit Hours)

A workshop in the writing of one-act and full-length plays. Topics include dramatic theory, plot structure, character, dialogue, naturalism, symbolism, theme, production problems, and manuscript format. Students will write a one-act play or a short screenplay.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Asynchronous Instruction

ENGL 3630 - The Art of Poetry (3 Credit Hours)

An introduction to the basic concepts and strategies important to the processes of creating poetry. Students will write in various popular forms, review and critique the poems of other students, and analyze selected texts representing the genre and focusing on the craft of poetry.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C) and ENGL 2110 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Asynchronous Instruction

ENGL 3640 - The Art of Fiction (3 Credit Hours)

An introduction to the aesthetics and craft of short fiction writing. Students will read and analyze published works in multiple genres (i.e., literary, magic realism, horror, sci-fi, and fantasy) studying the techniques and strategies that underscore successful fiction. Students will then write and workshop their own original short fiction in class while learning how to critique and review their peers' work.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C) and ENGL 2110 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Asynchronous Instruction

ENGL 3650 - Grant Writing (3 Credit Hours)

An introduction to the concepts, strategies, and practices essential for producing effective grant proposals. Students will study grant-writing theory and format and complete assignments that enable them to apply this knowledge in practical form.

Prerequisite(s): ENGL 1102 >= C or ENGL 1102H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Asynchronous Instruction

ENGL 3660 - The Art of the Essay (3 Credit Hours)

An introduction to the basic concepts and procedures important to writing creative nonfiction, with an emphasis on the essay. Students will write various forms (personal essays, memoirs, op-eds, reviews, and/or lyric, braided essays), critique the work of other students, and analyze selected texts representing the genre and focusing on the craft of creative nonfiction.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C) and ENGL 2110 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Bachelor of Arts

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Asynchronous Instruction

ENGL 3681 - Advanced Style and Editing (3 Credit Hours)

A workshop-based course in intensive editing of writing projects with a focus on academic style and conventions. Students will develop and edit their writing for future use, publication and/or inclusion in portfolio. Prerequisite(s): Junior standing; or permission of instructor.

Prerequisite(s): ENGL 1102 >= C or ENGL 1102H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Asynchronous Instruction

ENGL 3682 - Writing in the Community (3 Credit Hours)

A service-learning-based writing course in which students will collaborate with local community- and campus-based organizations to generate usable documents appropriate to the organization's needs. Students will be required to write within a local exigency for a public audience. Project details must be specified in a written agreement between the organizations and student groups in consultation with the course instructor.

Prerequisite(s): ENGL 1102 >= C or ENGL 1102H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic

ENGL 3684 - Rhetorical Genre Studies (3 Credit Hours)

This course introduces students to rhetorical genre studies, including rhetorical genre theory and applications. Rhetorical genre studies aims to understand the connection between texts, social activities, and social institutions. By reading genre theory and research, and by practicing rhetorical reading themselves, students will consider how genres come to exist, how they change, and how they can both limit and advance our ability to be actors within discourse communities.

Prerequisite(s): ENGL 1102 >= C or ENGL 1102H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 3685 - Digital Rhetoric (3 Credit Hours)

This course will instruct students in the emerging field of digital rhetoric, including a review of the major works and theories of digital rhetoric, digital writing, and technology-supported communication. Students will learn about how classical and contemporary rhetorical theories inform digital rhetoric and writing in digital environments. Students will produce analyses and assessments of digital rhetoric and create a research-based project involving digital environments.

Prerequisite(s): ENGL 1102 >= C or ENGL 1102H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 3686 - Introduction to Writing in the Sciences (3 Credit Hours)

This course takes a rhetorical approach to scientific communication by grounding principles of scientific style and STEM genre conventions within the contexts of purpose, audience, and discourse community. Students will be exposed to a variety of scientific texts in order to become familiar with the principles of effective scientific communication for both expert and lay audiences. Through rhetorical reading, students will learn about audience needs and expectations for scientific texts. Students will also compose in disciplinary and popular scientific genres to improve their skills and gain rhetorical awareness.

Prerequisite(s): ENGL 1102 >= C or ENGL 1102H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 3687 - User Research and Design (3 Credit Hours)

This course introduces students to the theories, methods, and practices in user research and design. Students will focus on applying learned methods and practices to real-world situations, and will create personas, portfolios, tests, and experiences for public audiences. Students will learn about the field of user research and design, including jobs, associations, and other opportunities in applied rhetoric.

Prerequisite(s): ENGL 1102 >= C or ENGL 1102H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 3688 - Theory and History of Rhetoric (3 Credit Hours)

This course introduces rhetorical theory, criticism, method, and history through the examination of writing and speaking traditions; social and cultural issues; and contemporary discourse concerns. Focus will be on both ancient rhetorical practices beginning with Aristotle and ending with 21st century rhetorical practices, including discussion of new and social media. Both western and non-western rhetorical traditions will be explored.

Prerequisite(s): ENGL 1102 >= C or ENGL 1102H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 3700 - Introduction to Professional Writing and Rhetoric (3 Credit Hours)

This survey course introduces students to key concepts and skills in professional writing with a focus on rhetorical theories of genre, methods, and careers in the field. Assignments will provide students practice in research, editing, design, and writing for a variety of rhetorical situations and a variety of audiences. Students will work collaboratively on hands-on assignments to help them understand what professional writing and audience-centered communication entails.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 3830 - Writing Center Theory and Practice (3 Credit Hours)

A course in which students study major scholarship on writing center theory and practice, as well as observe and discuss writing center sessions to learn best tutoring practices. Students wishing to enroll in course must meet all job requirements for writing center tutors (3.0 GPA in writing courses, clean background check, references, and acceptable writing samples) and be employed in the Writing Center during the semester in which they take the course.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Asynchronous Instruction

ENGL 4000 - Studies in British Literature (3 Credit Hours)

An intensive study of selected topics in the literature of the British Isles. The course may focus on periods, literary movements, or genres.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 4001 - Oral Proficiency for ESL Speakers (1 Credit Hour)

This 1-credit course provides cross-language comparison of the phonological system in English and some other languages to help ESL (English as a Second Language) speakers improve their oral proficiency skills in English in terms of intelligibility and effectiveness, with less accented English. This course does not count toward the English major. This course does not count toward F-1 visa minimum hour requirements.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Undergraduate Semester

Schedule Type (Primary): Lecture

ENGL 4002 - Academic English for ESL Speakers (1 Credit Hour)

This 1-credit course combines the format of lecture, workshop and online teaching to help ESL writers improve their writing skills in English for academic purposes. The focus of instruction is on essay structure, information presentation and appropriate/correct use of grammar and sentence structures. This course does not count toward the English major. This course does not count toward F-1 visa minimum hour requirements.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Undergraduate Semester

Schedule Type (Primary): Lecture

ENGL 4020 - History of the Book (3 Credit Hours)

An introduction to the history of the book, from its origins in manuscript tradition to the rise of digital media.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

ENGL 4100 - Studies in American Literature (3 Credit Hours)

An intensive study of selected topics in American literature. The course may focus on literary movements, periods or genres, e.g. the Harlem Renaissance, Southern drama, or the literature of New England.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 4200 - Studies in Genre (3 Credit Hours)

An intensive examination of a particular genre (e.g., epic, tragedy, or satire).

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 4220 - Contemporary Theatre (3 Credit Hours)

A survey of major world dramatists and their works, from the end of the nineteenth century to the present.

Prerequisite(s): (HUMN 2002 >= D or HUMN 2002H >= D) and (HUMN 2001 >= D or HUMN 2001H >= D) and (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 4230 - Modern Poetry (3 Credit Hours)

A study of the major movements in English and American poetry from World War I to the present. Emphasis is placed on Eliot, Yeats, Pound, Frost, and Auden.

Prerequisite(s): (HUMN 2002 >= D or HUMN 2002H >= D) and (HUMN 2001 >= D or HUMN 2001H >= D) and (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 4250 - The Modern American Novel (3 Credit Hours)

A study of several major American novels written since World War I, including works by such novelists as Hemingway, Fitzgerald, Faulkner, Morrison, and Bellow.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Asynchronous Instruction

ENGL 4261 - The English Novel to 1900 (3 Credit Hours)

A survey of the English novel, emphasizing the novels of Defoe, Richardson, Fielding, Austen, Bronte, Dickens, and Hardy.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 4262 - The Modern British Novel (3 Credit Hours)

A study of several modern British novels, with emphasis on works by Conrad, Woolf, Lawrence, Forster, Greene, and Joyce.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 4310 - Studies in Feminism (3 Credit Hours)

A course which uses feminist scholarship to analyze selected texts and topics.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 4330 - Studies in Popular Culture (3 Credit Hours)

An examination of selected topics in popular culture.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 4350 - Studies in Medieval Literature and Medievalism (3 Credit Hours)

An intensive study of selected topics in medieval literature and how medieval narratives, themes, and/or genres have been adapted in later eras.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C)

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 4360 - Studies in World Literature (3 Credit Hours)

An intensive study of selected topics in world literature. The course may focus on major figures, periods, literary movements, or genres.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 4410 - Chaucer (3 Credit Hours)

A study of Troilus and Criseyde, The Canterbury Tales, and some minor poems.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 4420 - Shakespeare (3 Credit Hours)

The major Shakespearean histories, comedies, and tragedies within the context of the Elizabethan theater.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 4430 - Milton (3 Credit Hours)

The major and minor poems and selected prose of Milton.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 4440 - Major British Authors (3 Credit Hours)

An intensive examination of the works of a major British writer (e.g., Blake, Joyce, or Woolf).

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 4450 - Major American Authors (3 Credit Hours)

An intensive examination of the works of a major American writer (e.g., Faulkner, Melville, or Morrison).

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 4460 - Mythology and Folklore (3 Credit Hours)

A study of mythology, folklore, and their adaptations in literature from pre-modern times to the present. Readings may include myths and/or folktales from the Mediterranean, sub-Saharan Africa, the Americas, Europe, Asia, or the Pacific.

Prerequisite(s): (ENGL 1102 >= C or ENGL 1102H >= C or ENGL1114 >= C) and (ENGL 1101 >= C or ENGL 1101H >= C or ENGL1113 >= C)

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 4470 - Imagining Other Worlds (3 Credit Hours)

A study of science fiction and/or fantasy literature exploring how and why writers construct alternate worlds, including utopias and/or dystopias.

Prerequisite(s): (ENGL 1102 >= C or ENGL 1102H >= C or ENGL1114 >= C) and (ENGL 1101 >= C or ENGL 1101H >= C or ENGL1113 >= C)

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 4510 - Literary Theory (3 Credit Hours)

A study of the major critics from Aristotle to the present, with emphasis on the development of various twentieth-century critical positions.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 4520 - Research in Writing (3 Credit Hours)

A course on research methods in writing studies culminating in a major research project. Research projects will be grounded in major theories of writing, including perspectives offered by linguistics, psychology, communications, rhetoric, and literary theory. Presentation and publication opportunities will be explored.

Prerequisite(s): ENGL 1102 >= C or ENGL 1102H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

ENGL 4530 - Studies in Theory (3 Credit Hours)

An intensive examination of selected topics in critical theory and practice; the course may focus on major theorists, periods, or movements.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 4630 - Advanced Poetry Workshop (3 Credit Hours)

An intensive practicum in the writing of poetry, with an emphasis on free verse. Students will write and revise their own poems, collaborate in workshops of evaluation and criticism, and read extensively in the canon of contemporary poetry. This course prepares students for a dedicated practice in sharpening and sharing their writing and reading and evaluating the works of others.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C) and ENGL 2110 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Asynchronous Instruction

ENGL 4640 - Advanced Fiction Workshop (3 Credit Hours)

An intensive practicum in the craft of writing fiction. Students will write and share original works composed in various fiction genres (literary, magic realism, horror, sci-fi, and fantasy). There will be substantial reading and critique of both published and peer work. Through an exploration of process, style, and technique, students will cultivate a sustainable writing practice and original voice.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C) and ENGL 2110 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Asynchronous Instruction

ENGL 4650 - Advanced Theory of Professional Writing and Rhetoric (3 Credit Hours)

This course introduces students to advanced theories, methods, and issues in professional writing and rhetoric (PWR). Students will explore contemporary rhetorical theory as defined through PWR, the role of experimental PWR, public issues of PWR, and the role of future technology in PWR applications. Students will be asked to theorized the place of PWR in both disciplinary and interdisciplinary studies.

Prerequisite(s): ENGL 1102 >= C or ENGL 1102H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 4660 - Advanced Creative Nonfiction Workshop (3 Credit Hours)

An intensive practicum in the writing of creative nonfiction. Students will write and revise their own creative nonfiction, participate in workshops of evaluation and criticism, and read extensively in the canon of contemporary and classic creative nonfiction.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C) and (ENGL 2110 >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Asynchronous Instruction

ENGL 4670 - Sand Hills Literary Editing and Publishing (3 Credit Hours)

An introduction to literary editing and publishing. Students will work on an editorial team that produces the digital and print editions of *Sand Hills*, Augusta University's literary magazine. Students will study, explore, and practice the many editorial roles within a literary publication, including editing, design and layout, advertising and marketing, circulation, and basic web design. This class prepares students for a career in editing and publishing.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C) and (ENGL 2110 >= C)

Lecture Hours: 3

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic

ENGL 4680 - Special Topics in Writing (3 Credit Hours)

An intensive study of selected topics in professional and/or creative writing.

Prerequisite(s): ENGL 1102 >= C or ENGL 1102H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Asynchronous Instruction

ENGL 4690 - Rhetoric and Digital Media (3 Credit Hours)

This course instructs students in the practice in critical reading of digital media texts and creation of a variety of technological-enhanced rhetorical genres. Students will learn about writing for various digital media and Internet-based genres through hypertext, multimedia, and interactive digital production. Students will produce analyses, assessments, and content for an original digital magazine developed as part of the course.

Prerequisite(s): ENGL 1102 >= C or ENGL 1102H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 4711 - Introduction to Linguistics (3 Credit Hours)

The fundamentals of descriptive and structural linguistics; phonemes and phonemic transcription; morphology and syntax; and transformational grammar.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 4712 - Modern Grammatical Systems (3 Credit Hours)

An examination of modern grammatical systems, with emphasis on a description of the grammatical structure of English.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 4720 - The Story of the English Language (3 Credit Hours)

A study of how speakers have dynamically adapted English throughout its history, beginning with its proto-Indo-European roots and concluding with varieties of English currently spoken throughout the world.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 4800 - Capstone Seminar (3 Credit Hours)

In this course, students will develop and demonstrate critical reading and thinking skills, advanced research and writing skills, and ability to explore a specialized topic in depth and in context. The capstone culminates in a capstone project.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C) and ENGL 3250 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Senior-Semester

Schedule Type (Primary): Seminar - Small Group

ENGL 4801 - Methods and Materials for Teaching English to Speakers of Other Languages I (2 Credit Hours)

Methods and materials for listening, speaking, reading, writing, and cultural activities appropriate for teaching English to speakers of other languages. Introduction to first and second language acquisition theories, a review of English language teaching methods, testing procedures, and teacher preparation and evaluation. A field experience of 25 clock hours is a required component of the course. ENGL 4801/FREN 4801/SPAN 4801 are equivalent courses; a student may only receive credit for one.

Lecture Hours: 2 **Lab Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Nursing , Hull College of Business, College of Ed & Human Dev, College of Science/Mathematics, College of Arts, Hum, Soc Sci **Student Class Restrictions:** Junior-Semester, Senior-Semester **Course Level Restrictions:** Undergraduate Semester

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

ENGL 4802 - Methods and Materials for Teaching English to Speakers of Other Languages II (2 Credit Hours)

Methods and materials for listening, speaking, reading, writing, and cultural activities appropriate for teaching English to speakers of other languages. Advanced instruction in first and second language acquisition theories, a review of English language teaching

methods, testing procedures, and teacher preparation and evaluation. A field experience of 25 clock hours is a required component of the course. ENGL 4802/FREN 4802/SPAN 4802 are equivalent courses; a student may only receive credit for one.

Lecture Hours: 2 **Lab Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Nursing , Hull College of Business, College of Ed & Human Dev, College of Science/Mathematics, College of Arts, Hum, Soc Sci **Student Class Restrictions:** Junior-Semester, Senior-Semester **Course Level Restrictions:** Undergraduate Semester

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

ENGL 4810 - Creative Writing Capstone (3 Credit Hours)

In this course, students will develop and demonstrate skills in critique and revision, pitching and submissions for publication, and public speaking. The capstone culminates in a professional, creative portfolio.

Prerequisite(s): (ENGL 1102 >= C or ENGL 1102H >= C or ENGL1114 >= C) and (ENGL 1101 >= C or ENGL 1101H >= C or ENGL1113 >= C) and (ENGL 2110 >=C) and (ENGL 3250 >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Seminar Small Group **Schedule Type (Additional):** Lecture, Asynchronous Instruction

ENGL 4950 - Selected Topics (3 Credit Hours)

Seminar in a particular author, period, style, subject or movement, often conducted on an interdisciplinary basis.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C)

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Independent Study,Asynchronous Instruction

ENGL 4960 - Undergraduate Internship (1 to 3 Credit Hours)

An internship is a service-learning experience based in an off-campus agency or organization. The experience entails the completion of a specific task and the acquisition of specific knowledge and skills under the supervision of faculty and the cooperating organization or agency.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C)

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Internship/Practicum

ENGL 4961 - Professional Writing Internship (3 Credit Hours)

In-service learning experience in the field of professional writing.

Prerequisite(s): ENGL 2680 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Internship/Practicum

ENGL 4990 - Undergraduate Research (3 Credit Hours)

A major research project exploring a specific topic under the close direction of the supervising instructor. Emphasis is placed on the student's learning research techniques. The student should produce a work of near-publishable quality. **Prerequisite(s):** Permission of the instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Directed Study (one-to-one)

ENGL 6001 - Oral Proficiency for ESL Speakers in Academic Context (1 Credit Hour)

This 1-credit course helps ESL (English as a Second Language) speakers improve their oral proficiency skills in English in academic and professional contexts. Topics include linguistic issues such as different sound systems, sound articulation, rhythm, stress, sound change in articulation, intonation, and pragmatic language use. This course does not count towards the MAT or MEd degree. This course does not count toward F-1 visa minimum hour requirements.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

ENGL 6002 - Research-Oriented Writing for ESL Writers (1 Credit Hour)

This one-credit course combines the format of lecture, workshop and online teaching to help ESL (English as a Second Language) academic writers improve research-oriented writing and literature review for academic purposes in professional fields. The focus of instruction is on essay structure, information presentation and appropriate/correct use of grammar and sentence structures. This course does not count toward the MAT or MEd degrees. This course does not count toward F-1 visa minimum hour requirements.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

ENGL 6010 - Special Topics in World Literature (3 Credit Hours)

An intensive study of selected topics in world literature. The course may focus on major figures, periods, literary movements, or genres, and will usually include non-Western as well as Western texts. Prerequisite(s): Admission to the graduate program and permission of the instructor.

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group, Asynchronous Instruction

ENGL 6110 - Special Topics in Genre (3 Credit Hours)

A comparative study of a particular genre, such as comedy, tragedy, or satire. Prerequisite(s): Admissions to the graduate program and permission of the instructor.

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group, Independent Study, Asynchronous Instruction

ENGL 6125 - Literature for Children (3 Credit Hours)

A critical study of literature for children. Topics include the history of children's literature, a survey of types of children's literature, and problems in teaching. Prerequisite(s): Admission to the graduate program and permission of the instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group, Asynchronous Instruction

ENGL 6130 - Topics in Pre-Adolescent and Adolescent Literature (3 Credit Hours)

A critical study of literature appropriate for middle grades students. Topics include major genres and major authors in the context of critical perspectives. Prerequisite(s): Admission to the graduate program and permission of the instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Asynchronous Instruction

ENGL 6230 - Studies in African American Literature (3 Credit Hours)

Study of major texts in African American literature, beginning with early slave narratives. Prerequisite(s): Admission to the graduate program and permission of the instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Asynchronous Instruction

ENGL 6250 - Studies in Women's Literature (3 Credit Hours)

An examination of a wide range of women writers, with an emphasis on multicultural and/or multidisciplinary approaches.

Prerequisite(s): Admission to the graduate program and permission of the instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Asynchronous Instruction

ENGL 6310 - Literature of the English Middle Ages (3 Credit Hours)

Intensive study of the literature of the English Middle Ages, from Beowulf through Mallory. Prerequisite(s): Admission to the graduate program and permission of the instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Asynchronous Instruction

ENGL 6315 - Literature of the English Renaissance (3 Credit Hours)

Intensive study of English literature from 1485 to the Restoration, excluding Shakespeare. Prerequisite(s): Admission to the graduate program and permission of the instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Asynchronous Instruction

ENGL 6320 - English Neoclassical and Romantic Literature (3 Credit Hours)

Intensive study of English literature from the Restoration to 1830. Prerequisite(s): Admission to the graduate program and permission of the instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Asynchronous Instruction

ENGL 6325 - English Literature: Victorian Through the 1900s (3 Credit Hours)

Intensive study of English Literature from 1830 to 1945. Prerequisite(s): Admission to the graduate program and permission of the instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Asynchronous Instruction

ENGL 6350 - Topics in British Literature (3 Credit Hours)

Selected topics in the literature of the British Isles, including periods, literary movements, or genres. Prerequisite(s): Admission to the graduate program and permission of the instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Asynchronous Instruction

ENGL 6410 - American Literature to 1875 (3 Credit Hours)

Intensive study of major writers, movements, and historical periods in American literature to 1875. Prerequisite(s): Admission to the graduate program and permission of the instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Asynchronous Instruction

ENGL 6420 - American Literature Since 1875 (3 Credit Hours)

Intensive study of major writers, movements, and historical periods in American literature since 1875. Prerequisite(s): Admission to the graduate program and permission of the instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Asynchronous Instruction

ENGL 6440 - Studies in Southern Literature (3 Credit Hours)

An intensive study of works by Southern writers, with emphasis on the twentieth century. Prerequisite(s): Admission to the graduate program and permission of the instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Asynchronous Instruction

ENGL 6450 - Topics in American Literature (3 Credit Hours)

An intensive study of selected topics in American literature, including literary movements, periods or genres. Prerequisite(s): Admission to the graduate program and permission of the instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group, Asynchronous Instruction

ENGL 6500 - Second-Language Acquisition Theories (3 Credit Hours)

Theories of second language acquisition from the linguistics, cognitive, sociolinguistics and sociocultural perspectives.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

ENGL 6520 - Research in Writing (3 Credit Hours)

A course on research methods in writing studies culminating in a major research project. Research projects will be grounded in major theories of writing, including perspectives offered by linguistics, psychology, communications, rhetoric and literary theory. Presentation and publication opportunities will be explored. Graduate students will design and conduct an original primary research project.

Prerequisite(s): Admission to the graduate program and permission of the instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Asynchronous Instruction

ENGL 6550 - Studies in Major British Authors (3 Credit Hours)

An intensive examination of the works of one or two major British writers (e.g. Blake, Joyce, or Woolf). Prerequisite(s): Admission to the graduate program and permission of the instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group, Asynchronous Instruction

ENGL 6560 - Studies in Major American Authors (3 Credit Hours)

An intensive examination of the works of a major American writer (e.g., Faulkner, Melville, or Morrison). Prerequisite(s): Admission to the graduate program and permission of the instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group, Asynchronous Instruction

ENGL 6610 - English Language: History and Structure (3 Credit Hours)

Studies in the nature of linguistic change and the development of the English language from Old English to the present. Prerequisite(s): Admission to the graduate program and permission of the instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Asynchronous Instruction

ENGL 6620 - English Linguistics (3 Credit Hours)

Introduction to English linguistics: studies in the nature of language, phonology, morphology, syntax, semantics, and language variation.

Prerequisite(s): Admission to the graduate program and permission of the instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ENGL 6625 - Contemporary English Grammar and Usage (3 Credit Hours)

Modern grammar and usage. Prerequisite(s): Admission to the graduate program and permission of the instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Asynchronous Instruction

ENGL 6650 - Grant Writing (3 Credit Hours)

Advanced study in the concepts, strategies and practices essential for producing effective grant proposals. Students will study grant-writing theory and format and complete assignments that enable them to apply this knowledge in practical form. Graduate students will work extensively on grant proposals. Prerequisite(s): Admission to the graduate program and permission of the instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Asynchronous Instruction

ENGL 6680 - Professional and Technical Writing (3 Credit Hours)

Advanced study in the concepts, strategies, and practices essential for writing procedures, proposals, manuals, reports, process descriptions and multiple forms of business correspondence. Students will communicate complex subject matter to specific audiences, lay and technical, in print and digital formats. Attention will be given to effective use of format, layout, headings, tables of contents, appendices and supporting graphics. Documents will undergo a thorough revision process that emphasizes vocabulary, syntax and content. Graduate students will serve as project leaders. Prerequisite(s): Admission to the graduate program and permission of the instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Asynchronous Instruction

ENGL 6681 - Advanced Style and Editing (3 Credit Hours)

A workshop-based course in intensive editing of writing projects with a focus on academic style and conventions. Graduate students will develop and edit their writing for publication. Prerequisite(s): Admission to the graduate program and permission of the instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Asynchronous Instruction

ENGL 6682 - Writing in the Community (3 Credit Hours)

A service-learning-based writing course in which students will collaborate with local community- and campus-based organizations to generate usable documents appropriate to the organization's needs. Students will be required to write within a local exigency for a public audience. Project details must be specified in a written agreement between the organizations and student groups in consultation with the course instructor. Graduate students will serve as project leaders. Prerequisite(s): Admission to the graduate program and permission of the instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic

ENGL 6700 - Special Topics in Writing (3 Credit Hours)

An intensive study of selected topics in professional and/or creative writing. Graduate students will complete a substantial theory-based project. Prerequisite(s): Admission to the graduate program and permission of the instructor.

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Seminar-Small Group, Asynchronous Instruction

ENGL 6800 - Issues in Literary Criticism (3 Credit Hours)

Selected topics in professional or creative writing, appropriate for graduate study. The course may focus on issues of craftsmanship, technique, or genre. Prerequisite(s): Admission to the graduate program and permission of the instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group, Asynchronous Instruction

ENGL 6801 - Methods and Materials for Teaching English to Speakers of Other Languages (3 Credit Hours)

Methods and materials for listening, speaking, reading, writing, and cultural activities appropriate for second language learners of English. Second language acquisition theories, a review of language teaching methods, testing procedures, and teacher preparation and evaluation.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

ENGL 6950 - Special Topics (1 to 3 Credit Hours)

Seminar in a particular author, period, style, subject, or movement, often conducted on an interdisciplinary basis. Prerequisite(s): Admission to the graduate program and permission of the instructor.

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Seminar - Small Group **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

ELED 3151 - Elementary Curriculum (3 Credit Hours)

Students will be expected to demonstrate knowledge of theory and practices necessary to plan and implement curriculum for individual children and groups; to systematically develop and conduct assessments of individual children; and to engage in reflection about their practices.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Elementary Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

ELED 3161 - Classroom Management for Learning (3 Credit Hours)

Management and family involvement fosters the attitudes, skills, and knowledge necessary for the effective management of productive learning environments. Issues such as management of students' behavior, classroom procedures, and classroom organization, situated within and related to the larger framework of successful planning and conduct of instruction, are addressed.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Elementary Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

ELED 3212 - Literacy I: Basic Literacy for Elementary Education (3 Credit Hours)

This course is designed to help beginning elementary education teachers learn how to teach reading, writing, oral language development, and listening in their classrooms. It will focus on the best practice supported by research in these fields and will emphasize how the teacher can set up a classroom that fosters literacy learning for students aged 5-12.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

ELED 3231 - Elementary Science Education (3 Credit Hours)

This course will engage prospective teachers in active learning that will address issues, events, problems, and process skills in science in grades Pre-K through five. The students will be expected to integrate knowledge of science, learning, and pedagogy and apply that knowledge to science teaching.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

ELED 3241 - Elementary Social Studies Education (3 Credit Hours)

This course is designed for students to develop an understanding of the disciplines in Social Studies with an emphasis on history, civics and government, geography, and economics concepts appropriate for the elementary grades. Emphasis will be placed on active learning, critical thinking, and developmentally appropriate practices.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

ELED 3252 - Language Arts Curriculum (3 Credit Hours)

The development of listening, speaking, and writing skills of children along with effective uses of language in oral/written communication are stressed.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1BSED-ELEM-BSED-Elementary Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study,Asynchronous Instruction

ELED 3271 - Using Children's Literature to Teach Reading (3 Credit Hours)

The theoretical and practical aspects of literacy will be presented with particular emphasis on teaching literacy to all populations. In addition, the role of family and community involvement and the use of technology for literacy development will be stressed. Instructional approaches and materials for teaching literacy will be an integral component of the class.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study,Asynchronous Instruction

ELED 4313 - Literacy II: Advanced Literacy Instruction for Elementary Education (3 Credit Hours)

This course will examine reading and writing difficulties encountered in the classroom. It will emphasize diagnostic/prescriptive teaching through experience with informal diagnostic assessment tools. Students will then use results of these assessments to design and implement instructional interventions for children experiencing difficulties with reading and writing.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study,Asynchronous Instruction

ELED 4322 - Elementary Mathematics Education (3 Credit Hours)

This course will focus on mathematics as a conceptual approach enabling children to acquire clear and stable concepts by constructing meanings in the context of physical situations and allows mathematical abstractions to emerge from empirical experiences. The students will be expected to integrate knowledge of mathematics, learning, pedagogy, students and assessment, and apply that knowledge to teaching mathematics in grades Pre-K through five in the context of the recommendations of the National Council of Teachers of Mathematics (NCTM) and the Georgia Performance Standards (GPS).

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study,Asynchronous Instruction

ELED 4332 - STEAM Education (3 Credit Hours)

ELED 4332 will help prepare preservice elementary teachers to plan and teach in an integrative manner. Students will learn the definitions of STEM/STEAM literacy and integrative STEM/STEAM education. Students will work collaboratively to design and build design-based lesson plans that give the learner explicit opportunities to apply standards-based knowledge and build enduring understandings in the context of engineering and/or art. Additionally, students will begin to participate in an active learning community of educators and STEAM professionals. Finally, students will demonstrate their own understandings of integrative STEM/STEAM education by completing a culminating design project.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Bachelor of Science in Education **Program Restrictions:** 1BSED-ELEM-BSED-Elementary Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study,Asynchronous Instruction

ELED 4342 - Elementary Social Studies Education II (3 Credit Hours)

This course will develop an understanding of the national social studies standards. Special emphasis will be placed on instructional approaches that actively engage young learners in concept formulation, skill introduction and development, performance assessment.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

ELED 4352 - Educational Assessment for Learning (3 Credit Hours)

This course prepares the elementary educator to develop appropriate assessments for students in grades Pre-K through five. Topics include but are not limited to formative and summative assessment strategies, assessment of learning vs. assessment for learning, interpreting and using standardized test results, and choosing appropriate assessment tools. Particular focus will be upon assessment results to make instructional decisions. Candidates will also practice communication of assessment results to students, parents, and other educators.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1BSED-ELEM-BSED-Elementary Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

ELED 4381 - The Creative Arts (3 Credit Hours)

Designed to meet the unique needs of the elementary regular classroom teacher; this course, based on the arts infusion model, will emphasize aesthetic perception, creative expression, cultural heritage, and aesthetic valuing as reflected in the content areas of music, creative dramatics, movement and the visual arts.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

ELED 4491 - Elementary Culminating Residency (13 Credit Hours)

Students are placed with selected master teachers for an entire semester during which they teach in the curriculum areas for which they are seeking certification. During the semester, the apprentice teacher, under the supervision of the master teacher, assumes the responsibilities of professional teaching practice. Students reflect on and synthesize the conceptual and theoretical constructs of pedagogy with the complexity of practice.

Corequisite(s): EDTD 4940

Lab Hours: 26 **Contact Hours:** 26

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Subject Restrictions: EDTD - Teacher Education **Program Restrictions:** 1BSED-ELEM BSED-Elementary Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Independent Study, Asynchronous Instruction, Practice Teaching, Internship/Practicum

Additional Course Fee: Student Teaching Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 200

MPHE 8900 - Fundamentals of Air Pollution with a Lab (4 Credit Hours)

This course provides an overview of a broad array of topics related to air pollution, including sources, emissions and properties of air pollutants, sampling and analytical approaches, impacts of air pollutants (including to visibility, tropospheric and stratospheric ozone, and involving climate change), regulatory aspects, human exposures and effects (including as examined via toxicology and epidemiology), risk assessment, and ethical considerations.

Lecture Hours: 3 **Lab Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_AHSC, MPH_HINF

Schedule Type (Primary): Asynchronous Instruction

MPHE 8902 - Environmental Toxicology (3 Credit Hours)

The toxicology of chemical compounds of wide industrial use; carcinogens in the workplace; chemical hazards and their interaction with man by class of compound; criteria for threshold limit values.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_AHSC, MPH_HINF

Schedule Type (Primary): Asynchronous Instruction

MPHE 8903 - Occupational and Environmental Hygiene (3 Credit Hours)

Regulatory controls and occupational safety in the use of ionizing and non-ionizing radiation.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPH_HINF

Schedule Type (Primary): Asynchronous Instruction

MPHE 8904 - Environmental Aquatic Sciences (3 Credit Hours)

The course addresses multiple fundamental aspects of aquatic sciences relevant to public health, including an overview of hydrology, aquatic ecosystems, aquatic chemistry, chemical transport and fate, water-related microorganisms and disease, monitoring, wastewater and drinking water treatment, climate change, water and health, and approaches to addressing water problems, including via federal and state policies in the U.S.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPH_HINF

Schedule Type (Primary): Asynchronous Instruction

MPHE 8905 - Environmental Impact Risk and Exposure Assessment (3 Credit Hours)

This course will present topics in the study of national policies and methodologies in identifying synergistic effects and biological markers.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPH_HINF

Schedule Type (Primary): Asynchronous Instruction

EPID 7040 - Epidemiology Capstone Project (2 to 5 Credit Hours)

Required course for Master of Science in Epidemiology students. This course provides an opportunity for the student to integrate both technical and content knowledge into a project on an epidemiology topic chosen by the student. It consists of one capstone project write-up, directed by a faculty member from the Division of Epidemiology. A formal oral presentation is required at the conclusion of the project.

Contact Hours: 2 to 5

Repeatability: May be repeated for credit one time.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MSEPD_EPID

Schedule Type (Primary): Asynchronous Instruction **Schedule Type (Additional):** Internship/Practicum

EPID 7130 - Introduction to Epidemiology (3 Credit Hours)

Introduces the basic principles and methods of epidemiology and demonstrates its applicability in the field of public health. Topics include: uses of epidemiology, measures of morbidity and mortality, descriptive epidemiology, epidemiology data sources, study designs, screening, sensitivity and specificity, causation, and ethical issues. Students learn how to design epidemiologic data, identify sources of data, and interpret findings. An emphasis is placed on applications of epidemiology and understanding how to read and critique epidemiological studies in the published literature.

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_AHSC, MSEPD_EPID, MS_BIOS, DPHIL_BIOS, MPH_HINF, MS_DSCI, MCTS_CTS, CREM_CTS

Schedule Type (Primary): Asynchronous Instruction

EPID 7370 - Intermediate Epidemiology (3 Credit Hours)

Intermediate-level instruction in epidemiology study design and quantitative methods. Topics include: the design, conduct, and analysis of case-control, cohort study, and randomized controlled trials.

Prerequisite(s): EPID 7130 >= B

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: MS **Program Restrictions:** MSEPD, MS_BIOS, DPHIL_BIOS **Campus Restrictions:** Web

Schedule Type (Primary): Asynchronous Instruction

EPID 7380 - Chronic Disease Epidemiology (3 Credit Hours)

This course will examine the epidemiology of chronic diseases to assess etiology, prevention and control. It will analyze details of epidemiologic studies in cardiovascular disease, cancer and other major chronic diseases. Content will include definitions, social and biological origins, pathological, and clinical aspects of chronic diseases; an introduction to information sources and methods in chronic disease epidemiology; the national burden of chronic diseases; descriptive epidemiology and major risk factors for various forms of chronic diseases; strategies for disease prevention and the role of epidemiology developing and evaluating those strategies. Pertinent literature will be critically reviewed.

Prerequisite(s): EPID 7130 >= C or STAT 7130 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MSEPD_EPID

Schedule Type (Primary): Asynchronous Instruction

EPID 7390 - Infectious Disease Epidemiology: Theory and Methods (3 Credit Hours)

This course provides graduate students and health professionals with an understanding of the principles and methods of infectious disease epidemiology. Topics include infectious diseases, diagnostic techniques, immune responses, and microbial adaptations, disease transmission, disease burden and transmission patterns in population.

Prerequisite(s): STAT 7130 >= B

Lecture Hours: 3 **Contact Hours:** 0 to 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MSEPD_EPID

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

ESTD 5601 - Esthetic Restorative Dentistry (3 Credit Hours)

Lecture Hours: 1 **Lab Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Major Restrictions: Advanced Standing DMD

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

ESTD 9001 - Esthetic Seminar I (1 Credit Hour)

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Residents

Schedule Type (Primary): Seminar - Small Group

ESTD 9002 - Esthetic Seminars II (2 Credit Hours)

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Residents

Schedule Type (Primary): Seminar - Small Group

ESTD 9003 - Esthetic Seminars III (2 Credit Hours)

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Residents

Schedule Type (Primary): Seminar - Small Group

ESTD 9901 - Esthetic Fellowship Clinic I (6 Credit Hours)

Clinical patient treatment

Lab Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Residents

Schedule Type (Primary): Internship/Practicum

ESTD 9902 - Esthetic Fellowship Clinic II (13 Credit Hours)

Clinical patient treatment

Contact Hours: 13

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Residents

Schedule Type (Primary): Internship/Practicum

ESTD 9903 - Esthetic Fellowship Clinic III (18 Credit Hours)

Clinical patient treatment

Contact Hours: 18

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Residents

Schedule Type (Primary): Internship/Practicum

ETHD 5002 - Ethics, Jurisprudence and Dentistry (1 Credit Hour)

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Dental College of Georgia

Schedule Type (Primary): Lecture

ETHD 5602 - Ethics, Jurisprudence, and Dentistry (1 Credit Hour)

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Major Restrictions: Advanced Standing DMD

Schedule Type (Primary): Lecture

EURO 3234 - Introduction to the EU (3 Credit Hours)

An introduction to the history, institutions, and policies of the European Union. The course also examines the role of the EU as a global actor, including its relations with the United States.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

EURO 4090 - Selected Topics in EU Studies (3 Credit Hours)

An examination of selected topics in European Union studies. May be repeated for credit with change of topic.

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Asynchronous Instruction

EURO 4130 - European Union Studies (3 Credit Hours)

A study of the legal institutions that constitute the European Union and the legal processes of those institutions in the context of international law and in comparison to the United States. The course examines the body of law, both static and dynamic, on which these institutions rest and that have been produced by the institutions themselves. This law includes the several treaties that provide the legal basis of the EU; the body of statutory law enacted by the Parliament, the council, and the commission; the judicial decisions adjudicated by the Court of Justice and the Court of First Instance; and finally, the administrative rulings issued by the European Ombudsman.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Asynchronous Instruction

EURO 4160 - Federalism and Multilevel Governance in the EU (3 Credit Hours)

An examination of multilevel governance in the European Union and the United States, comparing American federalism to the EU's less centralized, more confederal system. The origins and development of each system are examined, as are the complex relationships between the different levels of government in each. The course also asks whether and how each system is evolving - towards greater centralization, or more decentralization?

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Asynchronous Instruction

EURO 4230 - Doing Business in the EU (3 Credit Hours)

A study of the challenges of doing business in the European Union compared to the United States. It focuses on institutions and rules in both systems which impact the business environment for domestic and international firms. It also addresses how political decisions affect the business environment in both the EU and US.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Asynchronous Instruction

EURO 4260 - European Monetary Union (3 Credit Hours)

An examination of the history and evolution of European Economic and Monetary Union (EMU) and its impact on the United States and the global economy. Key topics include the origins and creation of EMU, the institutions and functioning of EMU, the relationship between EMU and the European Union, and the impact of EMU on the United States and transatlantic relations. The course also examines the Eurozone debt crisis and its implications for the US and world economy.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Asynchronous Instruction

EURO 4330 - European Union Science and Technology Policy (3 Credit Hours)

An examination of science and technology policy, with particular attention to the European Union and (for comparison) the United States. The course begins with an overview of technical innovation and the current state of science and policymaking in the EU and the US. It then examines how governments can encourage technological innovation, and concludes by asking whether government and society can (or should) try to limit or control technological innovation. It also examines US-EU cooperation and dissension on science and technology issues.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Asynchronous Instruction

EURO 4430 - EU Environmental Policy (3 Credit Hours)

A survey of critical issues in European Union environmental policy, including the historical origins of environmental policy, the difficulties of implementing changing regulations, the role of EU governance in policy implementation, and the future prospects for EU success in environmental regulation. These issues are examined in comparative context, using the United States as the other case. The course looks at how environmental policies are made in both the US and EU in the context of multilevel governmental systems of different types. It also examines how the US and EU have addressed similar environmental problems, and the extent of transatlantic cooperation in dealing with global environmental issues.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Asynchronous Instruction

EURO 4530 - European Social Policy (3 Credit Hours)

An examination of social policy in the European Union. The course focuses on the history of social policy in Europe, and on current social policy arrangements in Europe and the EU. It describes the context of policy making and EU social welfare model(s). It also examines gender policy, education, child care, elder care, and other policies in the context of improving social conditions in the domestic policy arena.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Asynchronous Instruction

EURO 4630 - Communications and Media (3 Credit Hours)

An examination of communications and the media in the European Union and the United States. Key topics include: 1) basic concepts and principles in the EU and US law, 2) broadcasting, 3) voice telephony, 4) the Internet and social media, 5) the consequences of EU enlargement, 6) and media policies and practices. The course examines how decisions about communications and media are essentially political in nature, and how those decisions affect politics in general. It also asks whether developments in media and communications are a force for greater unity or fragmentation in the EU and US. Finally, the course examines US-EU cooperation and influence on global media and communications issues.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Asynchronous Instruction

EURO 4730 - EU Foreign Policy (3 Credit Hours)

An examination of the foreign policy of the European Union. This course explores the institutional and practical challenges facing the EU as it attempts to pursue a more integrated and coherent common foreign policy in the context of a constantly shifting process of regionalization. It explores the institutional framework of the EU foreign policy apparatus as well as the interactions between the EU and its member states' foreign policy institutions. These issues are examined in the context of several key issue areas in which the EU exercises (or attempts to exercise) a common foreign policy.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Asynchronous Instruction

EURO 4760 - United States - European Union Relations (3 Credit Hours)

An examination of relations between the United States and the European Union. Topics include history of the US-EU relations and US views on the European integration project, the economic and security dimensions of the US-EU relationship, and the place of US-EU relations in the broader transatlantic relationship. The course also examines US-EU cooperation on global issues and the future of transatlantic relations in the context of emerging powers and a changing world order.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Asynchronous Instruction

EURO 4830 - EU Studies Capstone Course (3 Credit Hours)

A capstone course for students in the EU Studies certificate program. It explores various selected topics in a way that allows students to synthesize their knowledge of the EU.

Lecture Hours: 3

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Asynchronous Instruction

FMPC 5000 - Basic Clerkship Family Medicine (18 Credit Hours)

Prerequisite: Successful completion of Preclerkship curriculum. This six week clerkship is a supervised experience in the evaluation and management of patients seen primarily in the ambulatory family medicine practice setting. Many of the patients have undifferentiated health problems. Evaluation and management of health problems are emphasized. Students may draw assignments at various practices throughout the state and the following Georgia Family Medicine Residency Programs: Medical College of Georgia, Atrium Health Floyd, Piedmont Columbus Regional, Phoebe Putney, Wellstar Kennestone, Wellstar Douglas

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

FMPC 5003 - Family Medicine Sub-I (12 Credit Hours)

The student may choose from Preceptors in various communities across the state who have agreed to assist in medical student teaching. These Preceptors, who have been screened by the Joint Board of Family Practice, have undergone training for their teaching roles. This elective provides the student with a supervised experience in the evaluation and management of patients with undifferentiated clinical problems encountered in the practice of Family Medicine. The student will participate in the office practice, hospital rounds, house calls, emergency room visits, and selected community activities. (Participation in the elective must be arranged and approved by the Department of Family Medicine; contact Medical Student Coordinator, Ext. 4075.)

Lecture Hours: 5 **Contact Hours:** 50

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

FMPC 5007 - Family Medicine Off-Campus Externship (4 to 8 Credit Hours)

Prerequisite: Completion of Core Curriculum. This elective with the Family Practice Residency Training Program of the Floyd Medical Center in Rome, Georgia, provides the student with clinical experience in both ambulatory and inpatient settings of Family Practice. Concepts of comprehensive and longitudinal healthcare are emphasized. In addition to the clinical exposure, students also participate in daily group and individual teaching sessions.

Lecture Hours: 5 **Contact Hours:** 50

Repeatability: May be repeated for credit up to 3 times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

FMPC 5008 - Family Medicine Externship (4 to 8 Credit Hours)

Prerequisite: Core Curriculum The student will develop the skills necessary to function as a successful extern in the inpatient and ambulatory setting of family medicine.

Lecture Hours: 5 **Contact Hours:** 50

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

FMPC 5009 - Family Medicine Research (4 to 8 Credit Hours)

Prerequisite: Core Curriculum This elective at the Family Practice Residency Training Program of the Memorial Medical Center in Savannah, Georgia, provides the student with clinical experience in both ambulatory and inpatient settings of Family Medicine. In addition to the clinical exposure, the student also participates in daily group and individual teaching sessions. The student also participates in the provision of longitudinal and comprehensive healthcare.

Lecture Hours: 5 **Contact Hours:** 50

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

FMPC 5015 - Primary Care Sports Medicine (4 to 8 Credit Hours)

Prerequisite: None The primary care sport medicine elective is a clinical rotation for students interested in sports medicine. Through this rotation the student will be exposed to the wide range of sports medicine problems managed by a family practice sports medicine physician. The student will receive clinical experience in the Sports Medicine Clinic at MCG as well as participating in the field-side medical coverage of various sporting events in the community. Following this rotation the student should be able to perform a thorough musculoskeletal physical examination and be familiar with the management of common sports medicine injuries. The student will be evaluated on their ability to perform the musculoskeletal examination and their evaluation of patients during the rotation. (Participation in this elective must be arranged through and approved by the Department of Family Medicine Student Curriculum Coordinator, ext.

4075.)

Lecture Hours: 5 **Contact Hours:** 50

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

FMPC 5017 - Rural Family Medicine (4 to 8 Credit Hours)

Family medicine, or family practice, is a medical specialty devoted to comprehensive health care for people of all ages. With the broadest scope of all specialties, family physicians have more office visits and practice in more settings than physicians in any other specialty. As a primary care physician in Nashville, Georgia, Dr. O'Kane cares for patients of all demographics and all ages where each patient is unique and the rural setting can have its own challenges. As the student on this elective you will work one on one with Dr. O'Kane and her staff. You will see the patients, take the history, do the exam, discuss the patient and assist in the care management. There may be times when you could be called on to draw blood, give shots, and take vitals. You will be expected to be with the office team every working day and accompany Dr. O'Kane if out of clinic visits are needed for her patients. The SGMC Berrien Health Campus has been a part of the Nashville, GA community since 1965. The hospital has 51 acute care beds and 12 geriatric/psychiatric beds to serve the Berrien County region. The hospital provides general medical for inpatient, outpatient, and emergency room services. On occasion patients may be admitted there, however Dr. O'Kane does not normally see them while they are inpatients.

Contact Hours: 0 to 8

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

FMPC 5018 - Vulnerable Populations Elective (4 to 8 Credit Hours)

Provides students with an understanding of the problems facing the homeless population and their healthcare.

Lecture Hours: 1 **Contact Hours:** 30

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

FMPC 5019 - Family Medicine Procedures (4 to 8 Credit Hours)

Prerequisite: Successful completion of Core Rotations. This is a clinical elective offered in the Department of family Medicine at MCG with special emphasis on procedural medicine. This rotation is designed for medical students with an interest in Family Medicine and a desire to learn more about procedures commonly performed by family physicians. Students will be assigned on half day clinic per week in each of the following: flexible sigmoidoscopy, upper endoscopy, minor surgery, treadmill evaluations and osteopathic manipulations. Remaining time will be spent evaluations patients in the Family Medicine Center. (Participation in this elective must be approved by the Department of Family Medicine, MCG.)

Lecture Hours: 10 **Contact Hours:** 30

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

FMPC 5020 - Health Policy and Advocacy (4 to 8 Credit Hours)

An introduction to the field of primary care sports medicine. Activities include hands on responsibility for the evaluation and continuing care of patients with sports medicine related injuries and conditions in the sports medicine clinic and training room settings. Students are closely supervised by our sports medicine staff that is fellowship trained and hold Certificates of Advanced Qualifications in Sports Medicine. Throughout the school year, there are opportunities for students to participate in local high school and college event coverage. They also participate in weekly sports medicine journal club meetings and have an opportunity to interact with orthopedic surgeons, physical therapists, and athletic trainers with sports medicine expertise. Objectives of the course: 1. To introduce the student to the field of primary sports medicine. 2. To provide the student a clinical experience in Sports Medicine. 3. To provide the student with

an appreciation of the broad scope of problems commonly managed by primary care sports medicine physicians and the clinical and procedural skills involved. 4. To become familiar with the utilization of consultants in the management of certain sports medicine related injuries and conditions. 5. To gain a better understanding of the role of the primary care sports medicine physician as part of the multidisciplinary team that provides care to athletes. 6. To provide an opportunity for the student to explore their own interest in primary care sports medicine through direct observation and participation during the rotation. 7. Additional objectives may be added depending on the particular needs and desires of the student.

Lecture Hours: 4 Contact Hours: 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

FMPC 5021 - Osteopathic Manipulative Medicine in Family Medicine Practice (4 to 8 Credit Hours)

This hands-on elective provides medical students with an immersive experience in Osteopathic Manipulative Medicine (OMM) within the context of Family Medicine. Open to both osteopathic (DO) and allopathic (MD) students, the course emphasizes integrating osteopathic principles and manipulative techniques into primary care practice. Students will gain exposure to diagnosing and managing musculoskeletal complaints, sports injuries, and systemic dysfunctions with hands-on OMT techniques. Students will: (1) Participate in continuity clinics and didactics; (2) Practice OMT under supervision using techniques such as muscle energy, counterstrain, and myofascial release; and (3) Learn to incorporate osteopathic models of care in real-world outpatient settings. This elective is valuable for students pursuing osteopathic training or seeking to improve their physical examination and manual treatment skills.

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: MEDICAL COLLEGE OF GEORGIA - ATHENS CAMPUS, MEDICAL COLLEGE OF GEORGIA - MAIN CAMPUS, MEDICAL COLLEGE OF GEORGIA - SAVANNAH CAMPUS

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

FMPC 5022 - Georgia War Geriatrics and Palliative Care Elective (8 Credit Hours)

This enrichment phase elective, located at the Georgia War Veterans Nursing Home (GWVNH) in Augusta, Georgia, consists of direct clinical care of Georgia veterans under the supervision of the GWVNH clinical director in coordination with assigned residents, student peers and interdisciplinary learners. Activities include interdisciplinary service through clinical care and performance of comprehensive geriatric assessments of new admissions, participation in daily rounds with the medical team, attendance at Family Medicine morning reports and other structured learning opportunities as time permits, completion of assigned readings, and presentation of a geriatrics or palliative care topic to the medical team and nursing staff.

Lecture Hours: 1 Other Hours: 7 Contact Hours: 8

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Campus Restrictions: Main Campus, Athens Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

FMPC 5999 - Basic Clerkship Remediation in Family Medicine (1 Credit Hour)

Remediation of the Basic Core Clerkship in Family Medicine.

Prerequisite(s): FMPC 5000

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Independent Study

FMPC 6000 - Population Health/Business in Medicine (4 to 8 Credit Hours)

Students will rotate with the AU population health department in order to gain an understanding of the new models of health care. This will be an interdisciplinary four-week elective during the fourth year of medical school. Medical students will work with the population health team, pharmacy students, Nursing/DNP students, Physician Assistant (PA) students and other members of the healthcare team. The goal of the four-week elective would be for the students to identify and solve real problems facing hospitals and clinics today. Students will understand why the payment structure for healthcare is shifting from fee for service to pay for performance or Value

Based Care. Students will understand and be able to explain key terms such as Population Health, Per Member Per Month (PMPM), Shares Savings, Hospital Value-Based Purchasing Program (VBP), Pay for Performance (P4P), and the Medicare Access Chip Reauthorization Act of 2015 (MACRA) or the Quality Payment Program (QPP). The students will gain a deeper understanding of the transformation of healthcare to meet the Quadruple Aim of the Institute of Healthcare Improvement (IHI), which is improving the patient experience of care, improving the health of populations, reducing the per capita cost of health care, and improving healthcare wellness.

Lecture Hours: 7

Repeatability: May be repeated for credit one time.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Degree Restrictions: Doctor of Medicine

Schedule Type (Primary): Lecture

FMPC 6001 - Bioethics Scholarly Activity (7 Credit Hours)

This course will provide bioethics graduate certificate candidates with a practical experience in learning and practicing bioethics. Students will read sentinel papers from the primary literature in bioethics, discuss clinical cases with ethical dilemmas in small groups, participate in ethics consults and end of life conversations with consultants and teach learned ethical topics to fellow students.

Prerequisite(s): PHIL 5004

Lecture Hours: 7

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia **Student Class Restrictions:** Professional **Course Level Restrictions:**

Professional Semester **Degree Restrictions:** Doctor of Medicine **Program Restrictions:** MD_MEDD-Medicine **Campus Restrictions:** Main Campus

Schedule Type (Primary): Directed Study (one-to-one)

FMPC 6002 - Bioethics Capstone Course (3 Credit Hours)

This course will provide bioethics graduate certificate candidates the opportunity to present their completed research at a regional bioethics conference. Students will attend the two day annual Georgia Healthcare Ethics Consortium at Emory University in the spring of the academic year. They will go as attendees, and will present their completed research at the annual bioethics research poster competition.

Prerequisite(s): PHIL 5004

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Campus Restrictions: Main Campus

Schedule Type (Primary): Seminar - Small Group

FMPC 6004 - Food As Medicine: Addressing Diet-Related Illnesses Affected by Poverty (4 to 8 Credit Hours)

Students gain a first-hand understanding of the barriers to health - especially as they influence diet - in an impoverished urban neighborhood. Attend nutrition education lectures, help conduct and attend nutrition-based cooking classes with a professional chef during the month, attend a bariatric information session with a health psychologist, work with members of the American Culinary Federation and the Augusta District Dietetic Association, and conduct a home-based study of one or two families to analyze the connections between poverty and diet-related illnesses.

Lecture Hours: 7

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Degree Restrictions: Doctor of Medicine

Schedule Type (Primary): Supervised Lab/Clinic

FMPC 6599 - M4 Student Chief (8 Credit Hours)

Provides peer support to M3 students transitioning into the Family Medicine Primary Care clerkship. Student Chiefs orient M3 students to expectations of the FMPC clerkship and student roles. The chiefs are expected to be available to the M3 students on the FMPC rotation for support with knowledge and skills required in the clerkship. Students interested in being a Student Chief need to apply and are selected by the faculty. Students selected to be chiefs must attend a training session during the first week of the rotation. This elective is available for Rotation 1 and 2 only.

Prerequisite(s): FMPC 5000 >= B

Lab Hours: 8

Repeatability: May be repeated for credit one time.

Grade Mode: S- Satisfactory/Unsatisfactory

College Restrictions: 04 Medical College of Georgia

Schedule Type (Primary): Internship/Practicum

RFAP 5000 - Family Practice (27 Credit Hours)

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents **Major Restrictions:** Family Medicine Residency

Schedule Type (Primary): Internship/Practicum

FILM 1100 - Film Appreciation (3 Credit Hours)

This course emphasizes the historical, cultural, commercial, and aesthetic contexts that influence film. The course also develops the student's understanding of a film's narrative and visual structure and its place within established theoretical traditions.

Core IMPACTS Requirement(s) Satisfied: Arts, Humanities, and Ethics (Humanities)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

FILM 1100H - Honors: Film Appreciation (3 Credit Hours)

This course emphasizes the historical, cultural, commercial, and aesthetic contexts that influence film. The course also develops the student's understanding of a film's narrative and visual structure and its place within established theoretical traditions. This is an Honors Course.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

FILM 2000 - The Art of Film (3 Credit Hours)

This recommended gateway course introduces students to multifarious approaches, practices, protocols, and theories related to film production. This course emphasizes classical tenets and their creative outcomes, preparing students for the filmmaking process.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

FILM 3010 - Screenwriting (3 Credit Hours)

This course examines the craft and development of short-form and/or feature-length screenplays.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

FILM 3030 - Cinematography (3 Credit Hours)

This course provides an overview of the art and craft of motion picture photography. Students will learn cinematographer's essential principles, practices, and protocols, and how choices in the application affect creative outcomes, in a hands-on environment.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

FILM 4000 - Short Film Production (3 Credit Hours)

The Certificate in Film culminates in this required course that finds committed students synthesizing their acquired skills into a substantive, fully-realized documentary or narrative film production.

Prerequisite(s): FILM2000 >= C and FILM3010 >= C and COMM3020 >= C and FILM3030 >= C

Lecture Hours: 4 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

FITH 2000 - Approaches to Acting (3 Credit Hours)

An introduction to the craft of the actor, including training in voice, movement, emotional sensitivity, improvisation, and scene study.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

FITH 2001 - The Art of Film (3 Credit Hours)

This recommended gateway course introduces students to multifarious approaches, practices, protocols, and theories related to film production. This course emphasizes classical tenets and their creative outcomes, preparing students for the filmmaking process.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

FITH 2010 - Performance Composition (3 Credit Hours)

An introduction to composing and performing original texts for the stage.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

FITH 3000 - Voice and Movement (3 Credit Hours)

This course helps students develop advanced performance skills in voice and movement, including breathing, kinesthetic awareness, vocal placement and resonance, physical performance, and integration of vocal and physical elements of performance.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

FITH 3001 - History of Performance I (3 Credit Hours)

This course provides a survey of a particular era or event in theater and/or performance history.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

FITH 3002 - History of Performance II (3 Credit Hours)

This course provides a survey of significant developments, movements, artists, and genres in visual storytelling with emphasis on cinema.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

FITH 3010 - Writing for the Stage (3 Credit Hours)

This course examines the craft and development of writing for live performance. Students are immersed in a workshop environment to produce a performance-based script.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

FITH 3011 - Screenwriting (3 Credit Hours)

This course examines the craft and development of writing for the screen. Students are immersed in a workshop environment to produce short- and long-form narrative screenplays.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

FITH 3020 - Directing for the Stage (3 Credit Hours)

This course explores the theory and practice of directing diverse texts for the stage.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

FITH 3021 - Directing for Film (3 Credit Hours)

This hands-on production course explores the styles, techniques, and strategies essential to film direction. This course will advance understanding of how the specifics of camera placement, narrative point of view, and communication with actors contribute to successfully achieving a director's storytelling goals.

Prerequisite(s): FITH2001 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

FITH 3030 - Cinematography (3 Credit Hours)

This hands-on course introduces students to the art and craft of motion picture photography. Students explore the essential principles, tools, and practices of cinematography, including how choices in their application affect creative outcomes.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

FITH 3050 - Post-Production (3 Credit Hours)

This course offers an in-depth introduction to the theory, techniques, and aesthetics of narrative film editing. Using Adobe Premiere Pro, students will complete a series of hands-on assignments that reflect the real-world challenges faced by narrative film editors.

Lecture Hours: 3

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

FITH 3101 - Performance Practicum (1 to 3 Credit Hours)

Students participate as performers in a university theatre or film production.

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit up to eight times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

FITH 3102 - Production Practicum (1 to 3 Credit Hours)

Students participate in the backstage/technical aspects of a university theatre or film production.

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit up to eight times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Internship/Practicum

FITH 3200 - Place and Context (3 Credit Hours)

This hands-on course explores theoretical, practical, and technical elements of production design and scenography. Students learn how to build and arrange spaces to enhance the efficacy of visual storytelling.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

FITH 3300 - Combat for Stage and Screen (3 Credit Hours)

An introduction to single sword and unarmed combat for performance.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

FITH 4000 - Theory and Practice (3 Credit Hours)

This course entails advanced study of theories and practitioners of film, theatre, or performance. Students learn the methodologies of various practitioners and apply those to their own creative work.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

FITH 4150 - Performance Art (3 Credit Hours)

This course explores the history, theory, criticism, and practice of contemporary performance art. Students are challenged to experiment with alternative approaches to performance and expression.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

FITH 4500 - Short Film Production (3 Credit Hours)

In this course, students synthesize their acquired skills into a substantive, fully-realized documentary or narrative film production for public presentation or exhibition.

Prerequisite(s): FITH 2001 >= C and FITH 3011 >= C and FITH 3030 >= C and COMM 3320 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

FITH 4510 - Feature Film Production (3 Credit Hours)

This hands-on production course immerses students in the pre-production, production, and post-production processes of feature film production. Working with a pre-existing script or pre-developed concept, students will work collaboratively in a number of capacities to realize a long-form narrative or documentary film.

Prerequisite(s): FITH 2001 >= C and FITH 3011 >= C and FITH 3030 >= C and COMM 3320 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

FITH 4520 - Music Video Production (3 Credit Hours)

This hands-on production course immerses students in the pre-production, production, and post-production processes of producing music videos. Students will work collaboratively to deliver substantive and polished promotional films for established or emerging recording artists.

Prerequisite(s): FITH 3030 >= C and (COMM 3320 >= C or FILM 3030 >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

FITH 4530 - Experimental Film Production (3 Credit Hours)

This hands-on production course challenges students to develop and produce non-traditional film narratives from personal points of view. Beginning with a statement of intent, students will develop a personal film utilizing multifarious techniques in the manipulation of sound and image to deliver their intended message.

Prerequisite(s): FITH 3030 >= C and (COMM 3320 >= C or COMM 3030 >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

FITH 4600 - Research in Performance (3 Credit Hours)

This course immerses students in theatre and performance research and creative scholarship. Students develop and produce a theatre performance project for public presentation or exhibition.

Prerequisite(s): FITH 3000 >= C and (FITH 3010 >= C or FITH 3020 >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

FITH 4610 - Advanced Acting Styles (3 Credit Hours)

This course enables students to gain advanced practice in selected approaches to acting.

Prerequisite(s): FITH 2000 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

FITH 4620 - Place, Performance, and Authenticity (3 Credit Hours)

Students conduct a performance-centered study of place and its influence on identity and culture.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

FITH 4630 - Visual Culture as Performance (3 Credit Hours)

This course challenges students to apply performance theory and practice to visual culture (e.g. objects, imagery, spaces, cultural artifacts). Students learn to understand visual culture as performative.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

FITH 4800 - Creative Expression through Multiple Media (3 Credit Hours)

This course challenges students to communicate effectively through film and stage, with emphasis on adaptation of creative vision for particular media. The course culminates in a public showcase of student work.

Prerequisite(s): FITH 4500 >= C or FITH 4600 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

FITH 4920 - Study Abroad: Topics in International Film and Theatre (3 Credit Hours)

In this course, students conduct research and travel abroad to examine and experience significant aspects of international film, theatre, or performance. Activities may include visits to significant locations, practitioners, festivals, and/or archives associated with film and theatre outside of the United States.

Lecture Hours: 3

Repeatability: May be repeated for credit up to three times.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

FITH 4950 - Special Topics (3 Credit Hours)

Students will engage in advanced study of a particular topic in cinema, theatre, and/or performance studies.

Lecture Hours: 3

Repeatability: May be repeated for credit up to three times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

FITH 4960 - Internship (3 Credit Hours)

Internship hours with an employer or community organization in a role that requires practice in interpersonal communication, collaboration, and presentation skills, as well as creative or technical skills that complement the learning outcomes of the BFA in Film and Theatre. A maximum of 3 hours of internship credit may be counted toward fulfillment of the degree.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

FINC 1410 - Personal Finance (3 Credit Hours)

Provides individuals with the tools necessary to manage their personal financial affairs. Topics covered include budgeting, debt management, investments, insurance, taxes, and real estate. This course may not be used to fulfill major requirements for business.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

FINC 3400 - Corporate Finance (3 Credit Hours)

This course deals with the fundamental tools of financial management: financial statement analysis, the time value of money, risk and return measurement, valuation of financial assets, capital budgeting decisions and cost of capital.

Prerequisite(s): ACCT 2101 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

FINC 3405 - Financial Planning (3 Credit Hours)

This course is designed to introduce the theory and practice of personal financial planning. The course coverage includes an overview of the financial planning process including insurance, education funding, cash management and budgeting, retirement, investment and tax planning.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

FINC 3410 - Risk Management (3 Credit Hours)

This course gives the student an understanding of pure risk, the nature of risk management, the role of risk managers, and the various tools of risk management with major emphasis on insurance.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

FINC 3420 - Real Estate (3 Credit Hours)

A fundamental coverage of real property rights and interests, mortgage financing, taxation, leasing and settlement. Course provides information for the consumer and/or investor on how to select, finance and manage real property.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

FINC 3421 - Investments (3 Credit Hours)

Introduces the various securities traded in the financial markets, investment theory and practice, portfolio construction and management, and investment strategies and tactics. Coverage includes risk and return, and financial and capital markets, and an introduction to various securities including equities, index funds, ETFs, corporate bonds, and government bonds.

Prerequisite(s): FINC 3400 >= C

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

FINC 4410 - Advanced Corporate Finance (3 Credit Hours)

This course is designed to further both theoretical and practical applications of corporate finance. Substantial emphasis will be placed on capital budgeting, cost of capital, capital structure, dividend policy, and financial planning.

Prerequisite(s): FINC 3400 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

FINC 4420 - Financial Markets and Institutions (3 Credit Hours)

This course explores the role of financial markets and institutions in the economy. Topics include money and capital markets, the role of the Federal Reserve and the function and operating characteristics of financial institutions.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

FINC 4430 - Advanced Investments (3 Credit Hours)

Expands the breadth and depth of investment theory and practice coverage. Topics include: modern portfolio theory, portfolio management, duration, inflation indexed securities, terminal wealth analysis, options, fundamental and technical analysis, and asset valuation.

Prerequisite(s): FINC 3400 >= C

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)
Schedule Type (Primary): Lecture

FINC 4450 - Case Studies in Finance (3 Credit Hours)

This course is designed to provide the student with an understanding of the role of finance in managerial decision making. Cases and/or supplemental readings are used to apply financial concepts.

Prerequisite(s): FINC 3400 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Asynchronous Instruction

FINC 4460 - Employee Benefits and Retirement Plans (3 Credit Hours)

A strong and rigorous foundation in retirement planning and employee benefits to begin preparation for the CFP Exam and for a career as a professional financial planner. More specifically, an overview of retirement planning needs, products, retirement plans, tools, and strategies used by financial professionals to help individuals, families, and companies (e.g., most commonly small business owners) choose and implement an effective retirement planning strategy. Student performance is assessed through exams, assignments, and projects in a variety of formats including written, verbal, visual, software/Excel analysis, and multiple choice/true false assessments.

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

FINC 4470 - Estate Planning (3 Credit Hours)

The application of estate planning methodologies and policies to personal financial planning. Emphasis is placed on developing skills required of a financial professional in advising clients regarding the importance of estate planning, the consequences of failure to plan, and techniques available to achieve the client's estate planning goals.

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

FINC 4950 - Selected Topics in Finance (3 Credit Hours)

A course and/or directed study of a major issue, practice, or problem in the area of finance. Content to be decided based on needs and professional objectives of students and the experience and availability of faculty.

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study,Asynchronous Instruction

FINC 6400 - Managerial Finance (3 Credit Hours)

This course is designed to provide the student with an understanding of the role of finance in managerial decision making. Cases and/or supplemental readings are used to apply financial concepts.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: MBA **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

FDNS 6500 - Special Topics in Nutrition and Foods (1 Credit Hour)

This course is a one-hour seminar that is repeated each semester that will provide students with in-depth study of selected topics of current interest in nutrition and dietetics. Students will hear from nutrition experts as well as make presentations on topics of interest.

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MS_AHSC-Allied Health

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group

FDNS 7200 - Advanced Nutrition- Macronutrients (3 Credit Hours)

An in-depth seminar of the key principles of cellular metabolism, nutritional, and clinical aspects of macronutrients. Major metabolic pathways and research findings are examined. The study includes the clinical applications of macronutrients in diseases.

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture

FDNS 7210 - Advanced Nutrition- Micronutrients (3 Credit Hours)

Biochemical and molecular aspects of vitamins and minerals; interrelationship of nutrients; principles of determining nutritional requirements of individuals and clinical applications.

Prerequisite(s): FDNS 7200 >= B

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

FDNS 7300 - Advanced Nutritional Status Assessment Techniques Lab (2 Credit Hours)

Provides in-depth hands-on training in nutrition status assessment; includes laboratory methods for collection and interpretation of physical, demographic, diet, anthropometric, biochemical and clinical data.

Corequisite(s): CAHS 7100

Lab Hours: 2

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Nutrition Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 150

FDNS 7350 - Nutrition for Older Adults (2 Credit Hours)

The study of the interrelationships between nutrition and aging and their impact on health and well-being. An in-depth discussion of concepts combining nutritional sciences and geriatrics.

Prerequisite(s): CAHS 7100 >= B

Lecture Hours: 2

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture

FDNS 7380 - Maternal, Infant, and Child Nutrition (2 Credit Hours)

A comprehensive study of factors affecting the nutritional status of pregnant women, infants, and children. Breastfeeding, current controversies and cultural practices will be examined.

Corequisite(s): CAHS7100

Lecture Hours: 2

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

FDNS 7400 - Advanced Medical Nutrition Therapy (4 Credit Hours)

The application of the Nutrition Care Process (NCP) and evidence-based practice to specific pathophysiological conditions - includes nutrition assessment, nutrition diagnosis, nutrition intervention, and nutrition monitoring and evaluation. Case studies and simulation will be used to integrate and apply to clinical nutrition.

Prerequisite(s): FDNS 7300 >= B and CAHS 7100 >= B

Corequisite(s): FDNS 7210 and CAHS 6501

Lecture Hours: 2 **Lab Hours:** 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Graduate-Semester

Schedule Type (Primary): Lecture

FDNS 7500 - Obesity: Prevention, Treatment, and Management (2 Credit Hours)

A comprehensive analysis of the prevalence, etiology, and pathophysiology of obesity. Evidence-based treatment of the disease with an emphasis on lifestyle (nutrition and physical activity).

Prerequisite(s): FDNS 7400 >= B

Lecture Hours: 2

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture

FDNS 7650 - Food, Culture, and Sustainability (2 Credit Hours)

The course examines the health, economic, and environmental impacts of our current food system with an emphasis on local and global sustainable food system, including cultural and religious practices and its impact on food availability and accessibility.

Prerequisite(s): FDNS 7400 >= B

Lecture Hours: 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Program Restrictions:** MS_AHSC-Allied Health

Schedule Type (Primary): Lecture

FDNS 7800 - Nutrition Independent Study (2 Credit Hours)

To develop the skill, knowledge, and areas of capstone project, which occurs outside the traditional classroom/laboratory setting under the supervision of a faculty member.

Contact Hours: 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: College of Allied Health Sci , The Graduate School **Student Class Restrictions:** Graduate-Semester **Program Restrictions:** MS_AHSC-Allied Health

Schedule Type (Primary): Independent Study **Schedule Type (Additional):** Asynchronous Instruction

FDNS 7850 - Dietetic Internship (3 Credit Hours)

Course will provide didactic and experiential learning opportunities in the area of medical nutrition therapy, community nutrition, patient food service, and institutional management. Weekly didactic course content will support the experiential learning.

Lecture Hours: 3

Repeatability: May be repeated for credit up to six times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Internship/Practicum

FDNS 7900 - Nutritional Genomics (3 Credit Hours)

The course is an overview of the principles of genetics and explores diet-genome interaction.

Prerequisite(s): FDNS 7210 >= B and CAHS 7100 >= B

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture

FREN 1001 - Elementary French I (3 Credit Hours)

Fundamentals of listening, speaking, reading, and writing French in a proficiency-based classroom. Introduction to French-speaking cultures. Designed for students who have never studied French. Not open to native speakers. Heritage speakers and students who had French in high school should take the placement exam. Students must earn a C or better in order to take FREN 1002.

Core IMPACTS Requirement(s) Satisfied: Arts, Humanities, and Ethics (Humanities)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

FREN 1002 - Elementary French II (3 Credit Hours)

A continuation of FREN 1001. Not open to native speakers. Heritage speakers and students who had French in high school should take the placement exam. Students must earn a C or better in order to take FREN 2001.

Prerequisite(s): FREN 1001 >= C

Core IMPACTS Requirement(s) Satisfied: Arts, Humanities, and Ethics (Humanities)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

FREN 2001 - Intermediate French I (3 Credit Hours)

This proficiency-centered course is designed to build on high school French or on FREN 1002. More emphasis will be placed on listening, speaking, and reading skills in practical situations. Students will learn how to "get around" in places where French is spoken natively. Not open to native speakers. Heritage speakers should take the placement exam.

Prerequisite(s): FREN 1002 >= C

Core IMPACTS Requirement(s) Satisfied: Arts, Humanities, and Ethics (Humanities)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

FREN 2002 - Intermediate French II (3 Credit Hours)

This proficiency-centered course includes a grammar review and more intensive work in listening comprehension, speaking, and reading, with more emphasis on writing than in FREN 2001. French-speaking cultures will be studied through music, art, film, literary and cultural readings, including current events. At the end of this course, students should have a basic competence in French. Students

who wish to take upper-division courses in French will need to demonstrate sufficient proficiency as determined by the world language faculty before enrolling in major/minor courses. Not open to native speakers. Heritage speakers should take the placement exam. Students must earn a C or better in order to take classes at the 3000/4000 level.

Prerequisite(s): FREN 2001 >= C

Core IMPACTS Requirement(s) Satisfied: Arts, Humanities, and Ethics (Humanities)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

FREN 2950 - Studies in Francophone Culture (3 Credit Hours)

A variable content course taught in English that will center on one Francophone country or area, or a specific issue dealing with Francophone culture. Counts towards the Field of Study courses for the French major.

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

FREN 3100 - Oral Expression in French (3 Credit Hours)

An intensive course in which students will learn strategies for communication on levels from conversing in everyday practical situations to discussing opinions on politics, culture, and the arts. May not be taken by native speakers of French.

Prerequisite(s): FREN 2002 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

FREN 3210 - Studies of Culture in French-Speaking World (3 Credit Hours)

Studies of culture in French-speaking world. May include multicultural approaches, food, fashion, travel, and music.

Prerequisite(s): FREN 2002 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

FREN 3221 - Studies of Culture in France: Hexagon (3 Credit Hours)

Historical overview of France emphasizing great moments in French history and the arts; a course designed in part to prepare students to visit French cathedrals, chateaux, monasteries, museums, and other historical and cultural sites of France. Paris will be highlighted. May include themes such as Black Paris, food, fashion, cultural travel and music.

Prerequisite(s): FREN 2002 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

FREN 3300 - Written Expression in French (3 Credit Hours)

An intensive course in which students will learn strategies for written communication on numerous levels and in varied styles: compositions based on personal topics, current events, literary readings; styles range from email messages, letters, creative writing, imitation of stylistic models. Course includes advanced grammar and stylistics. May include gamification and / or simulations (experiential learning).

Prerequisite(s): FREN 2002 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

FREN 3400 - French Phonetics (3 Credit Hours)

Students study the articulatory features of speech production of Modern Standard French, and ways of correcting and enhancing oral production. The course includes basic linguistic terminology of articulatory phonetics such as prosody, intonation and the bases of descriptive phonetics. Study includes learning the International Phonetic Alphabet (IPA), phonetic transcription and the reading aloud of short French passages. Designed for non-native speakers.

Prerequisite(s): FREN 2002 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

FREN 3510 - Introduction to French Literature (3 Credit Hours)

An introduction to literary reading and analysis. Readings of various authors, genres (including prose/graphic novel, theatre and poetry), and time periods.

Prerequisite(s): FREN 2002 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

FREN 3620 - French for Health and Medical Professions (3 Credit Hours)

This is a course for French students desiring to expand their French knowledge in the field of medicine and health. It will provide oral and written opportunities to practice an active vocabulary in health-related situations. Emphasis on the development of oral, listening, reading and writing skills.

Prerequisite(s): FREN 2002 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Unsupervi Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

FREN 3710 - French Cinema (3 Credit Hours)

Studies in contemporary, popular, and classical French and Francophone film using multicultural films, cinematic analysis and cultural / historical contexts.

Prerequisite(s): FREN 2002 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

FREN 4100 - Advanced Oral Expression (3 Credit Hours)

An intensive, advanced course in which students will use strategies for communication on levels from conversing in everyday practical situations to discussing opinions on politics, culture, and the arts. May not be taken by native speakers of French.

Prerequisite(s): FREN 2002 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

FREN 4300 - Advanced Written Expression (3 Credit Hours)

An intensive course at an advanced level in which students will learn strategies for written communication on numerous levels and in varied styles: compositions based on personal topics, current events, literary readings; styles range from email messages, letters, creative writing, imitation of stylistic models. May include gamification and / or simulations (experiential learning).

Prerequisite(s): FREN 2002 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

FREN 4560 - The Novel in French (3 Credit Hours)

Literary analysis of French novels. May include graphic novel and / or autobiography as its focus.

Prerequisite(s): FREN 2002 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

FREN 4590 - Literature in Translation (3 Credit Hours)

Special course, with varying content, cross-listed with Humanities, English and/or other languages. Readings of major French literary works in English translation; classroom discussions and writing assignments also in English. French majors may take no more than two courses in translation for major credit.

Prerequisite(s): HUMN 2002 >= C or HUMN 2002H >= C

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

FREN 4801 - Methods and Materials for Teaching World Language I (2 Credit Hours)

Methods and materials for listening, speaking, reading, writing, and cultural activities appropriate for world language learners. First and second language acquisition theories, a review of world language teaching methods, testing procedures and teacher preparation and evaluation. A field experience of 25 clock hours is a required component of the course. ENGL 4801/FREN4801/SPAN4801 are equivalent courses; a student may only receive credit for one.

Lecture Hours: 2 **Lab Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Asynchronous Instruction

FREN 4802 - Methods and Materials for Teaching World Language II (2 Credit Hours)

Methods and materials for listening, speaking, reading, writing, and cultural activities appropriate for world language learners. Advanced instruction in first and second language acquisition theories, a review of world language teaching methods, testing procedures and teacher preparation and evaluation. A field experience of 25 clock hours is a required component of the course. ENGL 4802/FREN 4802/SPAN 4802 are equivalent courses; a student may only receive credit for one.

Lecture Hours: 2 **Lab Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Asynchronous Instruction

FREN 4950 - Selected Topics in French (3 Credit Hours)

Various themes, for instance, monsters in French literature, contemporary French and francophone autobiography; short story; and graphic novel, etc. Questions involving identity, trauma, crisis, and social justice and other topics possible. Sometimes offered in translation for non-French majors. French majors required in that case to do written assignments in French.

Prerequisite(s): FREN 2002 >= C

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Independent Study,Asynchronous Instruction

FREN 6560 - The Novel in French (3 Credit Hours)

Literary analysis of French novels. May include graphic novel and / or autobiography as its focus.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Degree Restrictions:** Master of Arts in Teaching

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Asynchronous Instruction

FREN 6801 - Methods and Materials for Teaching World Languages I (3 Credit Hours)

Methods and materials for listening, speaking, reading, writing, and cultural activities appropriate for elementary and middle school learners. First and second language acquisition theories, a review of world language teaching methods, testing procedures, and teacher preparation and evaluation. A field experience of 45 clock hours is a required component of the class.

Cross-Listed Course(s): SPAN 6801

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Student Class Restrictions: Graduate-Semester **Degree Restrictions:** MAT - Master of Arts in Teaching

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Asynchronous Instruction

FREN 6802 - Methods and Materials for Teaching World Languages II (3 Credit Hours)

Methods and materials for listening, speaking, reading, writing, and cultural activities appropriate for secondary learners. First and second language acquisition theories, a review of world language teaching methods, testing procedures, and teacher preparation and evaluation. A field experience of 45 clock hours is a required component of the class.

Cross-Listed Course(s): SPAN 6802

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Student Class Restrictions: Graduate-Semester **Degree Restrictions:** MAT - Master of Arts in Teaching

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Asynchronous Instruction

FREN 6950 - Selected Topics in French (3 Credit Hours)

Various themes including monsters in French literature, contemporary French and francophone autobiography. Various forms as well, including short story and graphic novel, etc. Questions involving identity, trauma, crisis, and social justice and other topics possible. Sometimes offered in translation for non-French majors. French majors required in that case to do written assignments in French.

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Program Restrictions:** 1MAT-Master of Arts in Teaching

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Asynchronous Instruction

RGAS 5000 - Gastroenterology/Hepatology (27 Credit Hours)

Lecture Hours: 10 **Contact Hours:** 40

Repeatability: May not be repeated for credit.
Grade Mode: Satisfactory/Unsatisfactory
College Restrictions: Residents
Schedule Type (Primary): Internship/Practicum

AGDR 7023 - AEGD Didactics (13 Credit Hours)

This is a seminar course designed to enable the resident to apply scientific principles to learning and oral health care. Residents develop and employ skills in outcomes-based clinical decision-making, and technology-based information retrieval to enable the practice of evidence based dentistry and strengthen critical thinking.

Lecture Hours: 125 **Contact Hours:** 125

Repeatability: May be repeated for credit one time.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Dental College of Georgia **Major Restrictions:** Advanced Ed General Dentistry **Degree Restrictions:** Post-First-Professional Cert **Program Restrictions:** CERP_AEGD-Advanced Ed General Dentistry

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group

AGDR 7024 - Advanced General Dentistry Clinic - Patient Care (26 Credit Hours)

The resident acts as a primary care provider for patients who vary widely in treatment needs, demographic characteristics and overall health status in this clinical course. Residents provide emergency and multidisciplinary comprehensive oral health care that is coordinated by the general practice resident and supervising faculty. Residents perform diagnostic assessments, develop treatment plans, direct health promotion and disease prevention activities, and perform palliative and comprehensive oral health care using advanced dental treatment modalities. This course also includes rotations through AU Hospital Anesthesiology, ENT and ER clinical services as well as ACLS and conscious sedation training.

Contact Hours: 26

Repeatability: May be repeated for credit one time.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Degree Restrictions: Post-First-Professional Cert **Program Restrictions:** CERP_AEGD-Advanced Ed General Dentistry

Schedule Type (Primary): Supervised Lab/Clinic

AGDR 7033 - AEGD Didactics (13 Credit Hours)

This is a seminar course designed to enable the resident to apply scientific principles to learning and oral health care. Residents develop and employ skills in outcomes based clinical decision-making, and technology-based information retrieval to enable them to practice evidence based dentistry and strengthen their critical thinking abilities.

Lecture Hours: 10 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

AGDR 7034 - AEGD Clinic (28 Credit Hours)

This is a clinical course in which the resident acts as a primary care provider for patients who vary widely in treatment needs, demographic characteristics and overall health status. Residents provide emergency and multidisciplinary comprehensive oral health care that is coordinated by the general practice resident and supervising faculty. Residents perform diagnostic assessments, develop treatment plans, direct health promotion and disease prevention activities, and perform palliative and comprehensive oral health care using advanced dental treatment modalities.

Lab Hours: 28

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Supervised Lab/Clinic

GDBC 5706 - Bioclinical Seminar VI (2 Credit Hours)

Clinical case histories and reports appropriate to the biomedical and clinical science courses currently or previously taught, and correlated to the students' level of clinical expertise, will be provided to the class. One group will present a case study to the rest of the

class, followed by a class discussion session. Faculty moderators will be present for the entire seminar.

Contact Hours: 24

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Seminar - Small Group

GDBC 5807 - Bioclinical Seminar VII (2 Credit Hours)

Clinical case histories and reports appropriate to the biomedical and clinical science courses currently or previously taught, and correlated to the students' level of clinical expertise, will be provided to the class. One group will present a case study to the rest of the class, followed by a class discussion session. Faculty moderators will be present for the entire seminar.

Lecture Hours: 24

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Seminar - Small Group

GDCC 5791 - Comprehensive Care Clinic I (13 Credit Hours)

This course is scheduled during the fall semester of the D4 year. It is designed to equip the student with the necessary skills and knowledge to deliver comprehensive care and be competent in all aspects of general dentistry. It is intended to allow the student the opportunity to complete the needed experiences in order to challenge competency examinations which assess the ability of the student to make independent clinical decisions.

Other Hours: 13

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Supervised Lab/Clinic

GDCC 5892 - Comprehensive Care Clinic II (11 Credit Hours)

GDCC 5892 is scheduled during the spring semester of the senior year. It is designed to equip the student with the necessary skills and knowledge to deliver comprehensive care and be competent in all aspects of general dentistry. It is intended to allow the student the opportunity to complete the needed experiences in order to challenge competency examinations which assess the ability of the student to make independent clinical decisions.

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Supervised Lab/Clinic

GDDL 5791 - Georgia Dental Licensure I (1 Credit Hour)

This course prepares students for the national dental examination that is required for the Georgia Dental License. It is specifically focused on the manikin portion that covers endodontics and prosthodontics. The major objective of this course is to facilitate students in preparation for the manikin-based examination.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: DMD_DENT-Dentistry

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

GDDL 5892 - Georgia Dental Licensure II (1 Credit Hour)

This course prepares students for the regional dental licensure examination that is required for the Georgia Dental License. Georgia Dental Rules and Laws, and the Georgia Dental Practice Act will be addressed. Note: This document is the best estimate of what will be scheduled to help prepare students for the examination. However, licensing boards and examination agencies can make last minute changes in the examination format. All involved departments will assess aspects of the currently available examination materials and grading models. Course changes may be made to help prepare the students for the exam.

Lecture Hours: 1 **Lab Hours:** 30

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

GADL 5902 - General Dentistry in Licensure in Georgia Part 2 (1 Credit Hour)

This course is designed to prepare students for the clinical portion of the national dental licensure examination (CRDTS) that is required for the Georgia Dental License. The course includes seven credit hours of lecture, and 12 hours of clinic. A clinical exam analogous to the patient-based CRDTS operative and periodontal exam is given for both the composite and amalgam operative dentistry section and the periodontal section. The patient-based periodontal exam is administered by the periodontics faculty on an individual basis for each student using students' assigned patients in the senior clinic.

Lecture Hours: 7 **Contact Hours:** 8

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Dental College of Georgia **Student Class Restrictions:** Professional **Course Level Restrictions:** Professional Semester **Degree Restrictions:** Doctor of Dental Medicine **Program Restrictions:** DMD_DENT-Dentistry

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

GDEN 5901 - Honors Esthetic and Implants Dentistry I (4 Credit Hours)

This is an elective, honors course that provides qualified students the opportunity to learn how to treatment plan more advanced and complex prosthodontic cases as a complement to their clinical curriculum in Comprehensive Care (CMPC5901). The course includes a variety of learning experiences for students interested in expanding their knowledge in areas such as diagnostics and treatment planning, case analysis, literature review, CAD/CAM and guided surgery. It is designed to give dental students a more solid foundation to apply for postgraduate residency programs or to increase their clinical experiences. The course consists in treatment planning seminars, Cone Beam interpretation, interdisciplinary care, CAD/CAM laboratory procedures, guided surgery, and participation in elective research.

Prerequisite(s): CMPC 5901 >= B and IMPL 5001 >= B

Lab Hours: 82 **Contact Hours:** 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DMD_DENT-Dentistry

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

GDEN 5902 - Honors Esthetic and Implants Dentistry II (2 Credit Hours)

This is an elective, honors course that provides qualified students the opportunity to learn how to treatment plan more advanced and complex prosthodontic cases as a complement to their clinical curriculum in Comprehensive Care (CMPC5901). The course includes a variety of learning experiences for students interested in expanding their knowledge in areas such as diagnostics and treatment planning, case analysis, literature review, CAD/CAM and guided surgery. It is designed to give dental students a more solid foundation to apply for postgraduate residency programs or to increase their clinical experiences. The course consists in treatment planning seminars, Cone Beam interpretation, interdisciplinary care, CAD/CAM laboratory procedures, guided surgery, and participation in elective research.

Prerequisite(s): GDEN 5901 >= C

Contact Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DMD_DENT-Dentistry

Schedule Type (Primary): Supervised Lab/Clinic

ADPD 5101 - Professional Development Foundations I (3 Credit Hours)

Specific topics for Professional Development Foundations I will focus on American College of Dentists Core Values, ethics principles, and ethical decision making exercises as well as community service, wellness and resiliency. These concepts will be delivered through the use of online and live presentations, as well as assignments such as reading assignments, games, polls, surveys and discussions.

Lecture Hours: 3

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

College Restrictions: Dental College of Georgia **Program Restrictions:** DMD_DENT-Dentistry
Schedule Type (Primary): Lecture

ADPD 5202 - Professional Development Foundations II (2 Credit Hours)

Specific topics for Professional Development Foundations II will introduce business concepts such as budgeting, finance, scheduling, and retirement planning and will continue on leadership development and community service. These concepts will be delivered through the use of online and live presentations, as well as assignments such as reading assignments, games, polls, surveys and discussions.

Lecture Hours: 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

College Restrictions: Dental College of Georgia **Program Restrictions:** DMD_DENT-Dentistry

Schedule Type (Primary): Lecture

ADPD 5303 - Professional Development Foundations III (1 Credit Hour)

Specific topics for Professional Development Foundations III will focus on business, ethics, community service, and leadership concepts. These concepts will be delivered through the use of online and live presentations, as well as assignments such as reading assignments, games, polls, surveys and discussions.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

College Restrictions: Dental College of Georgia **Program Restrictions:** DMD_DENT-Dentistry

Schedule Type (Primary): Lecture

ADPD 5404 - Professional Development Foundations IV (1 Credit Hour)

Each of the Professional Development Foundations courses will give students tools to guide judgment and action for complex, novel, ethically arguable, divisive, or of public concern. Specific topics for Professional Development Foundations IV will focus on development of social awareness as well as community service.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

College Restrictions: Dental College of Georgia **Program Restrictions:** DMD_DENT-Dentistry

Schedule Type (Primary): Lecture

ADPD 5505 - Professional Development Foundations V (1 Credit Hour)

Specific topics for Professional Development Foundations V will focus on ethical decisions, development of leadership skill and practice management as well as community service. These concepts will be delivered through the use of online and live presentations, as well as assignments such as reading assignments, surveys and discussions.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

College Restrictions: Dental College of Georgia **Program Restrictions:** DMD_DENT-Dentistry

Schedule Type (Primary): Lecture

ADPD 5606 - Professional Development Foundations VI (3 Credit Hours)

Development of leadership skills, practice management, professional etiquette, community services, and service projects. These concepts are delivered through the use of online and live presentations, as well as assignments such as reading assignments, games, polls, surveys and discussions.

Lecture Hours: 3

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

College Restrictions: Dental College of Georgia **Program Restrictions:** DMD_DENT-Dentistry

Schedule Type (Primary): Lecture

ADPD 5707 - Professional Development Foundations VII (1 Credit Hour)

Specific topics for Professional Development Foundations VII will focus on applying leadership skills, presentation skills, and practice management. These concepts will be delivered through the use of online and live presentations, as well as assignments such as reading assignments, games, polls, surveys and discussions.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

College Restrictions: Dental College of Georgia **Program Restrictions:** DMD_DENT-Dentistry

Schedule Type (Primary): Lecture

ADPD 5808 - Professional Development Foundations VIII (1 Credit Hour)

Specific topics for Professional Development Foundations VIII will focus on applying leadership skills, practice management, and community as well as presentations of the Capstone projects. These concepts will be delivered through the use of online and live presentations, as well as assignments such as reading assignments, games, polls, surveys and discussions.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

College Restrictions: Dental College of Georgia **Program Restrictions:** DMD_DENT-Dentistry

Schedule Type (Primary): Lecture

GPRR 7021 - General Practice Didactics (13 Credit Hours)

Case presentations and treatment planning topic in hospital dentistry topics in bone grafting/sinus augmentation topics in treatment of the medically compromised patient topics in special needs dentistry topics related to IV sedation topics in pharmacology topics in disease process radiology.

Lecture Hours: 10 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Seminar - Small Group

GPRR 7023 - General Practice Didactic Course (13 Credit Hours)

This is a seminar course designed to enable the resident to apply scientific principles to learning and oral health care. Residents develop and employ skills in outcomes based clinical decision-making, and technology-based information retrieval to enable them to practice evidence based dentistry and strengthen their critical thinking abilities.

Lecture Hours: 10 **Contact Hours:** 3

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

GPRR 7024 - General Practice Clinic (26 Credit Hours)

This is a clinical course in which the resident acts as a primary care provider for patients who vary widely in treatment needs, demographic characteristics and overall health status. Residents provide emergency and multidisciplinary comprehensive oral health care that is coordinated by the general practice resident and supervising faculty. Residents perform diagnostic assessments, develop treatment plans, direct health promotion and disease prevention activities, and perform palliative and comprehensive oral health care using advanced dental treatment modalities. This course also includes rotations through AU Hospital Anesthesiology, ENT and ER clinical services and ACLS and conscious sedation training.

Lab Hours: 26

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

GPRR 7031 - General Practice Didactics (22 Credit Hours)

Case presentations and treatment planning. Topics in hospital dentistry, topics in bone grafting/sinus augmentation, topics in treatment of the medically compromised patient. Topics in special needs dentistry, topics related to IV sedation, topics in pharmacology, topics in disease process.

Lecture Hours: 22

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Seminar - Small Group

GPRR 7033 - General Practice Didactics (13 Credit Hours)

This is a seminar course designed to enable the resident to apply scientific principles to learning and oral health care. Residents develop and employ skills in outcomes based clinical decision-making, and technology-based information retrieval to enable them to practice evidence based dentistry and strengthen their critical thinking abilities.

Lecture Hours: 10 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

GPRR 7034 - General Practice Clinic (28 Credit Hours)

This is a clinical course in which the resident acts as a primary care provider for patients who vary widely in treatment needs, demographic characteristics and overall health status. Residents provide emergency and multidisciplinary comprehensive oral health care that is coordinated by the general practice resident and supervising faculty. Residents perform diagnostic assessments, develop treatment plans, direct health promotion and disease prevention activities, and perform palliative and comprehensive oral health care using advanced dental treatment modalities.

Lab Hours: 28

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Supervised Lab/Clinic

GPRR 7213 - General Practice Didactics (13 Credit Hours)

This is a seminar course designed to enable the resident to apply scientific principles to learning and oral health care. Residents develop and employ skills in outcomes based clinical decision-making, and technology-based information retrieval to enable them to practice evidence based dentistry and strengthen their critical thinking abilities.

Lecture Hours: 13

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

GPRR 7214 - General Practice Clinic (29 Credit Hours)

This is a clinical course in which the resident acts as a primary care provider for patients who vary widely in treatment needs, demographic characteristics and overall health status. Residents provide emergency and multidisciplinary comprehensive oral health care that is coordinated by the general practice resident and supervising faculty. Residents perform diagnostic assessments, develop treatment plans, direct health promotion and disease prevention activities, and perform palliative and comprehensive oral health care using advanced dental treatment modalities.

Lab Hours: 29

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Supervised Lab/Clinic

GPRR 7233 - General Practice Didactics (13 Credit Hours)

This is a seminar course designed to enable the resident to apply scientific principles to learning and oral health care. Residents develop and employ skills in outcomes based clinical decision-making, and technology-based information retrieval to enable them to practice evidence based dentistry and strengthen their critical thinking abilities.

Lecture Hours: 10 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

GPRR 7234 - General Practice Clinic (29 Credit Hours)

This is a clinical course in which the resident acts as a primary care provider for patients who vary widely in treatment needs, demographic characteristics and overall health status. Residents provide emergency and multidisciplinary comprehensive oral health care that is coordinated by the general practice resident and supervising faculty. Residents perform diagnostic assessments, develop treatment plans, direct health promotion and disease prevention activities, and perform palliative and comprehensive oral health care using advanced dental treatment modalities.

Lab Hours: 29

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Supervised Lab/Clinic

GDTs 5701 - Indications-Based Treatment Solutions Seminar I (1 Credit Hour)

As part of your senior comprehensive care experience, you will have the unique opportunity to learn from world class clinicians through a new innovative lecture/participation series, Indication-Based Treatment Solution Seminar Series. This series of lectures will help expand your knowledge base and treatment planning skills from recognized experts in their respective fields. During group seminar/treatment planning sessions, master clinicians and technicians will be invited to present clinical experiences in their field of expertise and to lead IBTS seminars to discuss evidence-based treatment options. Prior to the seminars, students will have worked in small groups to analyze an implant/esthetic scenario and synthesize a treatment plan to be presented and then critiqued by the expert presenter. This course is complementary to OMD 5006, Senior Comprehensive Care Portfolio Series, in which you will use treatment planning concepts learned in this course to treat and document esthetic dentistry treatment on your own patients. Educational programs will include: - Diagnostic/treatment planning systems - All-ceramic crowns - Laminates - Fixed partial dentures - Implant systems

Lecture Hours: 8

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

GDTs 5802 - Indications-Based Treatment Solutions Seminar II (1 Credit Hour)

As part of your senior comprehensive care experience, you will have the unique opportunity to learn from world class clinicians through a new innovative lecture/participation series, Indication-Based Treatment Solution Seminar Series. This series of lectures will help expand your knowledge base and treatment planning skills from recognized experts in their respective fields. During group seminar/treatment planning sessions, master clinicians and technicians will be invited to present clinical experiences in their field of expertise and to lead IBTS seminars to discuss evidence-based treatment options. Prior to the seminars, students will have worked in small groups to analyze an implant/esthetic scenario and synthesize a treatment plan to be presented and then critiqued by the expert presenter. This course is complementary to OMD 5006, Senior Comprehensive Care Portfolio Series, in which you will use treatment planning concepts learned in this course to treat and document esthetic dentistry treatment on your own patients. Educational programs will include: - Diagnostic/treatment planning systems - All-ceramic crowns - Laminates - Fixed partial dentures - Implant systems

Lecture Hours: 16

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

GNMD 8000 - Genetic Mechanisms of Hereditary Cancer (2 Credit Hours)

Fifteen percent of human cancers have a monogenic, heritable basis. The initiating molecular event for these cancers is known, unlike sporadic cancers where the first event is rarely known. This course will investigate the mechanisms by which alterations in specific hereditary cancer genes generate molecular derangements leading to oncogenic transformation, employing examples from classic

conditions such as Lynch Syndrome due to mismatch repair deficiency. Lectures and evaluation of key literature in a discussion format will enhance skills in critical evaluation of the scientific approaches used in this field of study. Students will each present on one molecular mechanism or informatics approach related to one syndrome under consideration.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

GNMD 8050 - Computational Methods in Genomics and Genetics (4 Credit Hours)

This course covers computational methods applied to genomics and genetics. The course will cover Bayesian statistics, nonparametric inference, phylogenetic trees, sequence analysis, microarray analysis, networks, multivariate methods, linkage analysis, and association genetics. The focus of the course will be to understand the basic concepts underlying the various analyses used in modern genomic and genetic research, and to understand how to use software that is available for basic analyses. A large component of the course will be to provide students with hands-on experience with analysis of datasets.

Lecture Hours: 3 **Lab Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

GNMD 8051 - Translational Genomics and Proteomics (3 Credit Hours)

Focusing on how to use the modern high throughput technologies to answer biological questions.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture

GNMD 8052 - Functional Genomics and Proteomics Using Animal Models (3 Credit Hours)

The purpose of this course is to show how animal models of human diseases can be analyzed using genomic and proteomic technologies. The course will overview high throughput methods of generating disease models in mouse and describe ongoing efforts in this field. The focus of the course will be on mouse models of diseases affecting immune, cardiovascular and nervous system. Attempts to identify molecular mechanisms of the disease will be presented with particular emphasis on drug target discovery.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal

Schedule Type (Primary): Lecture

GNMD 8060 - Genomic Medicine Seminar (1 Credit Hour)

The Genomic Medicine Seminar course consists of research seminars by visiting and MCG researchers. Students will have an opportunity to talk to each speaker during a lunch meeting and to serve as hosts to visiting scientists.

Contact Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: The Graduate School **Major Restrictions:** Genomic Medicine **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Seminar - Small Group

GNMD 8300 - Thesis Research (1 to 12 Credit Hours)

This course requires permanent assignment to a specific lab with a faculty advisor and a defined research project. The student works under the mentorship of their faculty thesis advisor to define, develop, and carry out the basic study of a research problem of interest to both student and advisor. This course is designed to develop the experience, understanding, and skills to conduct and assess original, independent research in biomedical science. This course is typically taken more than one time and culminates in the final semester in the preparation and defense of a MS thesis.

Lab Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MS_GENO-Genomic Medicine

Schedule Type (Primary): Thesis

GNMD 9210 - Investigation of a Problem in Genomic Medicine (1 to 12 Credit Hours)

This is a laboratory rotation course where the student works with individual faculty members on a specific research topic. This provides an introduction to techniques utilized in that laboratory as well as in introduction to the scientific method.

Lab Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: The Graduate School **Major Restrictions:** Genomic Medicine **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Supervised Lab/Clinic

GNMD 9300 - Research in Genomic Medicine (1 to 12 Credit Hours)

Students work closely with their faculty dissertation mentor on an in-depth study of a research question of interest to both student and mentor. This course culminates in the preparation of a PhD dissertation. Enrollment in this course requires official admission to candidacy.

Lab Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: The Graduate School **Major Restrictions:** Genomic Medicine **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Dissertation

CBGM 5085 - Genomics and Personalized Medicine (1 Credit Hour)

Topics will include: genetic and environmental risk factors for complex diseases; next generation sequencing approaches in analysis of human genomes; genome-wide association studies; pharmacogenomics; use of personal genetic information in clinical medicine.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Normal

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture

GEOG 1111 - World Geography (3 Credit Hours)

A study of the world and its topography, political divisions, cultural development, cultural spheres, geographic spheres, and climatic regions; as well as cartography, geology, physics, and astronomy, as they pertain to the earth.

Core IMPACTS Requirement(s) Satisfied: Social Sciences (Social Sciences)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

GEOG 1112 - Introduction to Weather and Climate (4 Credit Hours)

Atmospheric composition and structure, clouds, precipitation, atmospheric motion and winds. Organized weather systems, including air masses, fronts and severe weather. Discussion of global climates includes circulation, wind systems and climate classification.

Prerequisite(s): MATH 1001 >= D or MATH 1111 >= D or MATH 1113 >= D

Core IMPACTS Requirement(s) Satisfied: Technology, Mathematics, and Sciences (STEM)

Lecture Hours: 3 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

Additional Course Fee: Physics/Biophysics Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

GEOL 1121 - Introductory Geosciences I: Physical Geology (4 Credit Hours)

The study of minerals and rocks; fundamentals of earth structure and processes including vulcanism, mountain-building, erosion, sedimentation and metamorphism. Laboratory includes study of common minerals and rocks, and interpretation of geologic maps and cross-sections. Prerequisite(s): Recommended but not required: MATH 1001 or MATH 1111.

Core IMPACTS Requirement(s) Satisfied: Technology, Mathematics, and Sciences (STEM)

Lecture Hours: 3 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Asynchronous Instruction

Additional Course Fee: Physics/Biophysics Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

GEOL 1122 - Introductory Geosciences II: Historical Geology (4 Credit Hours)

A study of geologic principles applicable to earth history. Includes basic stratigraphy and paleontology. Survey of geologic time periods, including geological and biological events during earth development.

Prerequisite(s): GEOL 1121 >= D

Core IMPACTS Requirement(s) Satisfied: Technology, Mathematics, and Sciences (STEM)

Lecture Hours: 3 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Physics/Biophysics Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

GFA 1000 - Introduction to On-Set Film Production (6 Credit Hours)

This course is the first of an 18-credit hour certification through the Georgia Film Academy which will provide an introduction to the skills used in on-set film production, including all forms of narrative media that utilize film industry standard organizational structure, professional equipment and on-set procedures. Students will learn film production organizational structure, job descriptions and duties in various film craft areas, and the names, uses, and protocols related to various pieces of professional on-set film equipment. Students will also learn how the various film crafts relate to one-another on a working set, and skills related to networking and self-marketing.

This course is the pre-requisite for all GFA courses.

Lecture Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

GFA 1040 - Introduction to Film and Television Post-Production (6 Credit Hours)

This course is the first of an 18-credit hour certification in "Film & Television Post-Production." Students will operate various professional non-linear editing (NLE) systems, with a focus on practical skills and essential knowledge of editing, including file management, footage logs, timecodes, proxies, edit decision lists (EDLs), synchronization, transitions, simple effects, basic audio mixing and file exports. Additionally, students will explore the terminology, department hierarchy, history and theory of editing and sound design through topics such as continuity style, montage, juxtaposition of images, development of sound design, and linear and flat-bed editing. Students will also develop an understanding and awareness of current post-production industry standards and workflow practices. This course is the prerequisite for ALL other GFA courses in the "Film & Television Post-Production" Certification Pathway.

The class includes creative video editing projects on various NLE systems that require the usage of the practical skills learned. The second project will utilize Avid editing programs, working with the industry-standard software.

Lecture Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

GFA 1500 - Introduction to Digital Entertainment, eSports, and Game Development (6 Credit Hours)

Students become oriented with the Digital Entertainment ecosystem and job families therein, including: Game Development, Game Publishing, Tournament and League Operation, Live Production, Event Management, Broadcast Distribution, On-Air Talent, Team Organization, Sponsorship, Marketing, Content Creation, and Social Media Management. Students learn the basic terminology across these functions and skills related to networking and self-marketing used within the digital entertainment, eSports, and game development industries. A team project allows students to design and execute a live-streamed event incorporating lessons learned during the course.

Lecture Hours: 6 **Contact Hours:** 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

GFA 2000 - Film and Television Production Internship (6 Credit Hours)

In this course, students will gain valuable "hands on" experiential learning at a film production company or film-related vendor that has unique and specialized knowledge, skills, and resources. Students will develop basic on-set film production skills, as well as knowledge and experience with film-industry standards, organizational structure, professional equipment, and on-set procedures through hands-on experience on the sets and offices of working film productions and film-related businesses. Students will also have an opportunity to network and to build resumes in order to help market themselves with the intention of integrating into the film industry as entry-level workers.

Prerequisite(s): (GFA 1000 >= B and GFA 2010 >= B) or (GFA 2020 >= B or GFA 2030 >= B or GFA 2040 >= B or GFA 2050 >= B or GFA 3010 >= B or GFA 3020 >= B or GFA 3040 >= B or GFA 3140 >= B)

Lecture Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Internship/Practicum

GFA 2010 - Set Construction and Scenic Painting (6 Credit Hours)

This course will provide students with knowledge and practical skills necessary to create and implement a production design through the stages of conceptualization, execution and presentation for a professional art department in the film industry. Students will learn entry-level skills and knowledge of set construction for the film and television industry. Students will participate in goal-oriented projects including research, mood-boards, drafting, reading blueprints, architectural models, set safety, and budgeting, and scheduling.

Prerequisite(s): GFA 1000 >= C

Lecture Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

GFA 2020 - Lighting and Electric (6 Credit Hours)

This course will equip students with the skills and knowledge of electrical distribution and operations of set lighting on a motion picture or episodic television set to facilitate their entry and advancement in the film business. Students will participate in goal-oriented class projects including power distribution, set protocol and etiquette, properly setting lamps, how to light a set to feature film standards, motion picture photography, and more. Students who complete this course will have a very solid and broad base of knowledge that includes, but is not limited to, the equipment, techniques, communications, specifications, and department lingo used in the set lighting department. They will also have an understanding of the behavior of light and how to manipulate and control it to feature film standards.

Prerequisite(s): GFA 1000 >= C

Lecture Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

GFA 2030 - Grip and Rigging (6 Credit Hours)

This course will introduce students to the practice of rigging and supporting grip equipment, cameras, vehicles and other physical/mechanical devices. With a focus on practical application for a professional film career as a Grip, students will develop skills in the physical engineering, logistical planning and safe execution of rigging and operation of equipment used in film and television production. Emphasis will be placed on understanding the hierarchical communication and essential expectations of a professional entry-level Grip. In addition to gaining a thorough knowledge of the equipment used in grip and rigging, students will engage in on-set exercises in inventory, maintenance, set-up, trouble-shooting, teamwork, set protocol and safety.

Prerequisite(s): GFA 1000 >= C

Lecture Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

GFA 2040 - Fundamentals of Editing with Avid Media Composer 100 (6 Credit Hours)

This course is designed to help students develop the skills needed to enter the film industry as a post-production PA, in assisting with preparing dailies, or as an assistant editor. The foundation of the curriculum is Avid's certified training contained in their most recent Fundamentals 1 (MC101) and Fundamentals 2 (MC110) courses, and students will have the opportunity to certify as an Avid Certified User. Students who complete this course will have a very solid and broad base of knowledge that will allow them to integrate with a post-production team. This includes knowledge of the equipment, techniques, communications, and specifications used in the post-production department, as well as post-production industry standards and the physical requirements and expectations the job will require.

Prerequisite(s): GFA 1000 >= C

Lecture Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

GFA 2050 - Introduction to Special Makeup Effects (6 Credit Hours)

This course is designed to provide students with entry-level skills and industry-standard based knowledge in practical Special Effects (SFX) makeup for major film and television production. Students will participate in goal-oriented hands-on class projects including fabrication, material safety, use casting materials, professional make-up, sculpting, airbrushing, and design. Particular emphasis will be placed on set etiquette, including, but not limited to, attitude, professionalism, and technique on and off set. Students will also attend open lab sessions to gain the additional practice needed to refine their SFX makeup creation skills. Students will design, create, sculpt and apply a finished SFX makeup piece as a final project.

Prerequisite(s): GFA 1000 >= C

Lecture Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

GFA 2060 - Production Accounting and Office Management (6 Credit Hours)

This course equips students with a broad understanding for working within the production accounting and production office departments in the film and television industry, with emphasis on the knowledge, skills, and work routines required for entry-level jobs. Students will learn to identify the key players in each department, define their responsibilities, and perform the essential functions. The production office component of this course will focus on the relationship between the production office and the overall production, as well as the importance of the communication hub that exists between the office, set, and post. The accounting component of this course will focus on the guidelines and reporting practices that are used to track and manage the finances of a production. This course is intended for students with little to no experience in television and film production who wish to understand the larger importance of how the

production office and production accounting departments affect production.

Prerequisite(s): GFA 1000 >= C

Lecture Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

GFA 2100 - Production Crew Externship (6 Credit Hours)

Students develop the practical skills and fundamental knowledge for entry-level job positions in professional film and television through hands-on experience when placed in a dedicated craft-specific Externship under the direction of a graduate thesis candidate from one of the GFC graduate programs. The course emphasizes career development through student-specific, on-the-job training and in required weekly lessons that include instructor-led resume and interview training sessions. GFA 2100 is the lower-level option of GFA 4100. Whenever possible, students should take the 3000/4000-level GFA course option. The 4000-level counterpart has additional academic rigor, including creative projects and the study of history and theory of the craft. Students cannot take both the 2000- and 3000/4000-level option of equivalent courses. Either the 2000- or 3000-level course would satisfy the prerequisite for its related 4000-level course. If pursuing the Nexus, the 3000/4000-level upper-division course is required. Pursuing the 2000-level course will not result in a Nexus degree, but may be used towards GFA certification.

Prerequisite(s): GFA 1000 and at least one of the following: GFA 2010, GFA 2020, GFA 2030, GFA 2040, GFA 2050, GFA 2060, GFA 2080, GFA 2140, GFA 2310, GFA 2510, GFA 2520, GFA 3010, GFA 3020, GFA 3040, GFA 3070, GFA 3080, GFA 3140, GFA 3310, GFA 3510, GFA 3520, GFA 4010, GFA 4020, GFA 4040, GFA 4140

Lecture Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

GFA 2140 - Fundamentals of Sound Design (6 Credit Hours)

The tools and techniques of post-production sound design are presented through lecture, demonstration, and hands-on exercises. The foundation of the curriculum is the industry-standard Avid Pro Tools Certified Training in the most recent Fundamentals 1 (PT101) and Fundamentals 2 (PT110) courses. Avid's certification training is supplemented with academic curriculum, including but not limited to: an historical overview of the sound design process and tools; current processes, procedures and terminology; project organization; audio sample rates and file types; audio manipulation; and introductory troubleshooting. Technical operations are covered, including: creating sessions; recording and importing audio and MIDI; multi-track recordings of live audio; editing session media; MIDI sequences and virtual instruments; navigating sessions and arranging media on tracks; and using basic processing and mixing techniques to finalize a production.

Prerequisite(s): GFA 1040 >= C

Lecture Hours: 6

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

GFA 3010 - Production Design I (6 Credit Hours)

This course provides students with the knowledge and practical skills required to create and implement a production design through the stages of conceptualization, execution, and presentation for a professional art department in the film industry. While examining the process of Production Design as it relates to the film and television industry, students will work on an assigned project and take it from concept to completion solving real-world challenges with the skills they have learned in class. Considerable emphasis will be placed on set etiquette, including but not limited to task completion, teamwork, attitude, professionalism, and punctuality.

Prerequisite(s): GFA 1000 >= C

Lecture Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

GFA 3020 - Motion Picture Set Lighting I (6 Credit Hours)

This course will equip students with the skills and knowledge of electrical distribution and set lighting on a motion picture or episodic television set to facilitate their entry and advancement in the film business. Students will participate in goal oriented class projects including power distribution, set protocol and etiquette, properly setting lamps, department lingo, lighting a set to feature film standards, motion picture photography, and more. Particular emphasis will be placed on set etiquette including, but not limited to, attitude, professionalism, and technique on and off set. Students who complete this course will be ready to enter the film industry at the feature film level as a freshman set lighting technician, with a very solid and broad base of knowledge that will allow them to integrate with the crew from the first day.

Prerequisite(s): GFA 1000 >= C

Lecture Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

GFA 3030 - Motion Picture Gripping (6 Credit Hours)

An introduction to the practice of rigging and supporting grip equipment for lighting, cameras, dollies, vehicles, and other physical/mechanical devices. The course also explores the mindset required to be a safe and effective grip on a film set and will illuminate the thought processes needed to interpret artistic ideals into actionable tasks.

Prerequisite(s): GFA 1000

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

GFA 3040 - Introduction to Editing with Avid Media Composer 100 (6 Credit Hours)

In this course, students learn the skills, tools, and techniques of post-production editing for careers as assistant editors. Students will participate in creative, narrative editing projects in order to demonstrate fundamentals of post-production theory and practice, and will have the opportunity to certify as an Avid Certified User. This course focuses on the professional work environment processes for picture editing, audio mixing, audio effects, visual effects, color correction, and digital file delivery. Technical operations are covered, including ingest, output, and media management, edit bay procedures, protocol, and best practices. Avid's curriculum will be supplemented with elemental post-production information including an historical overview of the editing process and tools; current processes, procedures and terminology; project organization, digital file codecs, audio sample rate, introduction to concepts and tools of color grading, and introductory troubleshooting. Students will also develop an understanding and awareness of post-production industry standards.

Prerequisite(s): GFA 1000 >= C

Lecture Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

GFA 3140 - Introduction to Sound Design with Avid ProTools 100 (6 Credit Hours)

This course will equip students with a unique skill set and knowledge of the digital audio editorial process to facilitate their entry and advancement in the industry of film and television post-production. Students will learn industry best practices for digital audio processes and workflows within a professional sound department, and will have the opportunity to certify as an Avid Certified ProTools User. Emphasis will be placed on the technical aspects of industry standard digital audio tools, including attitude, professionalism and technique in and out of the room. Students who complete this course will be ready to enter the film industry as a working digital audio technician and/or assistant digital audio technician, with a broad base of knowledge that will allow them to integrate with a digital audio team from the first day.

Prerequisite(s): GFA 1000 >= C

Lecture Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

GFA 3510 - Digital Entertainment and eSports Event Design (6 Credit Hours)

The advanced study and practice of digital entertainment and Esports events production, including tournament operation and administration, event management, talent management, live broadcast (aka "streaming"), on-air personality skills, social and community management, and post-production. With an emphasis on practical application, students have the opportunity to gain experience in these roles. Students have access to industry-standard software and equipment to gain a working familiarity with these tools, taught in a professional live digital entertainment and Esports production facility.

Prerequisite(s): GFA 1500

Lecture Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

GFA 4000 - Film and Television Production Apprenticeship (6 Credit Hours)

In this course, students will be placed on a working film or television production to participate in a guided experience in the operations and essential functions of an industry craft in a professional environment. Students will be assigned to appropriate opportunities offered by professional film and television productions or affiliated vendor companies to practice and enhance their skills in the designated department through practical experience. Students will be permitted to express their preferences for specific departments, pending availability. Students will be exposed to the unique and specialized knowledge, skills and resources for their designated department, and will also have opportunities to network and develop resumes.

Prerequisite(s): GFA 1000 >= B and (GFA 2010 >= B or GFA 2020 >= B or GFA 2030 >= B or GFA 2040 >= B or GFA 2050 >= B or GFA 2060 >= B or GFA 3010 >= B or GFA 3020 >= B or GFA 3040 >= B)

Lecture Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

GFA 4010 - Production Design II (6 Credit Hours)

This course equips students with advanced skills and knowledge of the creative, technical and logistical processes of the art department, with a focus on the design and construction of sets, props, and effects to professional standards. Students will assume key roles as crew members in completing the pre-production and production workflows within the art department. Working from assigned scripts, students will complete and present concept art, mood-boards, architectural drawings, and then manage logistics of building all sets, props and effects for that production. Upon completion of this course, students will have a camera-ready and fully dressed set that GFA film classes can shoot on.

Prerequisite(s): GFA 1000 >= C and (GFA 2020 >= C or GFA 3010 >= C)

Lecture Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

GFA 4020 - Motion Picture Set Lighting II (6 Credit Hours)

This course equips students with the skills and knowledge of set lighting on a motion picture or episodic television set, with a focus on the design, planning, and practical execution of lighting scenarios to a professional standard. Students will participate in goal-oriented class projects including lighting plots, location scouting, various stage and location sets, managing a crew, achieving proper exposure for camera settings, and aesthetic stylization. Specific focus is given to design and execution of lighting in common production scenarios. Emphasis is also placed on set etiquette, including, but not limited to, participation in exercises, attitude, professionalism and technique on and off set. Students will develop a thorough understanding of the behavior of light and how to manipulate and control it to feature film standards. This includes opportunities to prepare different types of locations that range from houses to retail areas to corporate and educational areas, as well as to rig and light the most common situations a set lighting crew faces: day exteriors, day interiors, night exteriors, and night interiors, on stage and on location.

Prerequisite(s): GFA 1000 >= C and (GFA 2020 >= C or GFA 3020 >= C)

Lecture Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

GFA 4040 - Advanced Editing with Avid Media Composer 200 (6 Credit Hours)

In this course, students develop the advanced skills, tools, and techniques of post-production editing for careers as assistant editors. Students who complete this course and pass the embedded AVID Media Composer Professional Editing I (MC 201) and Media Composer Professional Editing II (MC 210) exams will earn the industry post-production credential of Avid Certified Professional in Media Composer. Students will learn to optimize editing workflows, streamline and ingest process, and manage media. This course also covers advanced picture editing techniques, preparing for multi-cam editing, working with graphics and mattes, compositing with the 3D Warp effect, color correction, and an in-depth look at some of the wide range of audio tools and effects included in Media Composer, with emphasis on developing the higher level editing skills that help to distinguish professionals in the industry.

Prerequisite(s): GFA1000 >= C and (GFA2040 >= C or GFA3040 >= C)

Lecture Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

GFA 4100 - Production Crew Practicum (6 Credit Hours)

Students develop the practical skills and fundamental knowledge for entry-level job positions in professional film and television through hands-on experience when placed in a dedicated craft-specific Practicum under the direction of a graduate thesis candidate. Students document their acquired knowledge through journals and reports. The course emphasizes career development through student-specific, on-the-job training and in required weekly lessons that include instructor-led resume and interview training sessions. Because of the compressed and sometimes unusual scheduling nature of film productions, students must have flexibility in their own schedules to be able to work on these projects. A student must commit to working, as scheduled, the full term of the project and must follow all professional standards. Note: the thesis films are most likely shot on multiple weekends (Friday-Sunday) over the course of the semester. Production either occurs at Trilith Studios or within a 30-mile radius of Trilith (studio zone) on location; transportation to and from location shoots within this zone are the responsibility of the student. Students who cannot meet those standards will not be permitted to continue on the project. It is expected and required that all students in this course are present on set and willing to provide hands-on labor.

Prerequisite(s): GFA 1000 and at least one other GFA Specialty Craft Course in the Film & Television Production Pathway: (GFA 2010, GFA 2020, GFA 2030, GFA 2040, GFA 2050, GFA 2060, GFA 3010, GFA 3020, GFA 3040, GFA 3140, GFA 4010, GFA 4020, GFA 4040)

Lab Hours: 6 **Contact Hours:** 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Supervised Lab/Clinic

GFA 4140 - Advanced Sound Design with Avid Pro Tools 200 (6 Credit Hours)

The theory and practices of film and television sound design are presented through lecture, demonstration, and hands-on exercises. The curriculum is designed to incorporate the industry standard Avid Pro Tools Certified Training in the most recent Production 1 (PT201) and Production 2 (PT210) courses. Avid's certification training is supplemented with academic curriculum, including but not limited to: an historical immersion in the sound design process and tools; current processes, procedures and terminology; project development; file interchanges; multitrack mixing; and program automation. Technical operations are covered, including: optimizing and configuring sessions; managing audio and video media; editing and processing of audio; plug-in automation; requirements of various destination platforms; and exporting deliverable to finalize a production. Upon successful completion of this course, students will demonstrate the skills needed for advancing careers in film and television post-production. Emphasis is placed on understanding industry standards and employer expectations for professional film and television post-production. Rigorous study of the PT201 and PT210 books, combined with hands-on practice, in and outside of class, greatly aids in successfully passing Avid's two certification exams. While Avid certification is not required for successful completion of the course, passing the two certification exams earns students the credential of Avid Pro Tools Certified Professional, recognized worldwide as an industry standard for sound editors in feature film and broadcast television.

Prerequisite(s): (GFA 1040 and GFA 2140) or GFA 3140

Lecture Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

GERD 5601 - Introduction to Geriatric Dentistry (2 Credit Hours)

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Major Restrictions: Advanced Standing DMD

Schedule Type (Primary): Lecture

GRMN 1001 - Elementary German I (3 Credit Hours)

Fundamentals of listening, speaking, reading, and writing German in a proficiency-based classroom. Introduction to German-speaking cultures. Designed for students who have never studied German. Not open to native speakers. Heritage speakers and students who had German in high school should take the placement exam. Students must earn a C or better in order to take German 1002.

Core IMPACTS Requirement(s) Satisfied: Arts, Humanities, and Ethics (Humanities)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

GRMN 1002 - Elementary German II (3 Credit Hours)

A continuation of GRMN 1001. Not open to native speakers. Heritage speakers and students who had German in high school should take the placement exam. Students must earn a C or better in order to take GRMN 2001.

Prerequisite(s): GRMN 1001 >= C

Core IMPACTS Requirement(s) Satisfied: Arts, Humanities, and Ethics (Humanities)

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

GRMN 2001 - Intermediate German I (3 Credit Hours)

This proficiency-centered course is designed to build on high school German or on GRMN 1002. More emphasis will be placed on listening, speaking, and reading skills in practical situations. Students will learn how to "get around" in places where German is spoken natively. Not open to native speakers. Heritage speakers should take the placement exam.

Prerequisite(s): GRMN 1002 >= C

Core IMPACTS Requirement(s) Satisfied: Arts, Humanities, and Ethics (Humanities)

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

GRMN 2002 - Intermediate German II (3 Credit Hours)

This proficiency-centered course includes a grammar review and more intensive work in listening comprehension, speaking, and reading, with more emphasis on writing than in GRMN 2001. German-speaking cultures will be studied through music, art, film, literary and cultural readings, including current events. At the end of this course, students should have a basic competence in German. Students who wish to take upper-division courses in German will need to demonstrate sufficient proficiency as determined by the world language faculty before enrolling in courses for the minor. Not open to native speakers. Heritage speakers should take the placement exam. Students must earn a C or better in order to take classes at the 3000/4000 level.

Prerequisite(s): GRMN 2001 >= C

Core IMPACTS Requirement(s) Satisfied: Arts, Humanities, and Ethics (Humanities)

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Asynchronous Instruction

GRMN 3100 - Oral Communication in German (3 Credit Hours)

An intensive course designed to examine the codes of oral communication in German and to improve the student's productive and receptive skills in a variety of practical situations. Special emphasis given to oral communication. May not be taken by native speakers of German.

Prerequisite(s): GRMN 2002 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic

GRMN 3220 - German Society and Culture (3 Credit Hours)

A course designed to introduce the student to contemporary German society and culture and the historical dimensions of contemporary social, political and intellectual issues. Emphasis on the development of productive and receptive skills in German.

Prerequisite(s): GRMN 2002 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic

GRMN 3300 - German Grammar and Written Communication (3 Credit Hours)

An intensive course designed to teach the student the finer points of German grammar, examine the codes of written communication in German, and improve the student's productive and receptive skills in German.

Prerequisite(s): GRMN 2002 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic

GRMN 3510 - Introduction to German Literature (3 Credit Hours)

A course designed to introduce the student to literary reading and analysis using exemplary works from German literature. Emphasis on the development of productive and receptive skills in German.

Prerequisite(s): GRMN 2002 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic

GRMN 3520 - Studies in German Literature (3 Credit Hours)

A course designed around the study of a particular genre, period or theme in German literature. Emphasis on the development of productive and receptive skills.

Prerequisite(s): GRMN 2002 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic

GRMN 4950 - Selected Topics (3 Credit Hours)

A variable content course, intended to meet the interests of students studying German and desiring to make an intensive study of a specific area of German Studies. Emphasis on the development of productive and receptive skills.

Prerequisite(s): GRMN 2002 >= C

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Independent Study,Asynchronous Instruction

HEHP 7500 - Health Innovation and Entrepreneurship (3 Credit Hours)

This course is an introduction to design thinking, innovation, and entrepreneurship in the health sciences. Students will develop critical thinking and problem identification skills, understand the innovation process, and explore startup and small business communities through presentations and discussions with successful entrepreneurs. Students will also learn about commercialization pathways for products in the health sciences such as devices, digital technologies, diagnostics, and therapeutics. At the conclusion of the course, participants will be able to demonstrate a clear understanding of how to develop innovative solutions for healthcare and public health challenges.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Seminar - Small Group

HINF 3000 - Legal Aspects and Ethics (1 Credit Hour)

The purpose of this course is to provide the student with a broad understanding of the law and its administration and to apply this understanding to relevant questions of policy and procedure development for documentation requirements in a healthcare setting.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: CERHIA_HINA-Health Inform Administration

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HINF 3001 - Quality in Healthcare (1 Credit Hour)

This course introduces the health information management student to quality management. Quality management includes continuous quality improvement, utilization and risk management, outcomes management and credentialing activities. This course also familiarizes the student with the quality issues, compliance issues, and agencies in alternative healthcare settings.

Prerequisite(s): HINF 3206

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: CERHIA_HINA-Health Inform Administration

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HINF 3003 - Introduction to Health Information Systems (1 Credit Hour)

This course is designed to provide students with an introduction to database design and health information systems. An introduction to security issues regarding information systems is also included.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSHIA_HINA-Health Information Admin, CERHIA_HINA-Health Inform Administration

Schedule Type (Primary): Asynchronous Instruction

HINF 3004 - Systems Analysis and Design (1 Credit Hour)

This course is designed to introduce students to systems analysis and design concepts. Students will study principles of project management, as well as system planning, analysis, and design functions.

Prerequisite(s): HINF 3003 >= C) and HINF 3002 >= C
Lecture Hours: 3
Repeatability: May not be repeated for credit.
Grade Mode: Normal, Audit
Program Restrictions: CERHIA_HINA-Health Inform Administration
Schedule Type (Primary): Asynchronous Instruction

HINF 3101 - Principles of Healthcare Management (3 Credit Hours)

Applied study of the managerial functions of planning, organizing, leading and controlling. Students work through specific issues related to operational and strategic planning, organizational structures and relationships, decision making, motivation, leadership theories and application, as well as fiscal and non-fiscal control processes, work standards, work measurement, and productivity. Special attention is given to the concept of systems management and techniques of systems analysis. Includes office ergonomics, information management, and equipment procurement.

Lecture Hours: 3
Repeatability: May be repeated for credit one time.
Grade Mode: Normal, Audit
Program Restrictions: BSHIA_HINA-Health Information Admin, CERHIA_HINA-Health Inform Administration
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HINF 3102 - Human Resource Management for Healthcare (3 Credit Hours)

A comprehensive human resource management course which develops student understanding of the employer-employee relationship. Includes the major human resource management functions. Topics include job analysis, job descriptions, employee recruitment, selection, and training, salary administration, performance appraisals, and collective bargaining

Lecture Hours: 3
Repeatability: May not be repeated for credit.
Grade Mode: Normal, Audit
Program Restrictions: BSHIA_HINA-Health Information Admin, CERHIA_HINA-Health Inform Administration
Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

HINF 3107 - Principles of Healthcare Management for Health Services (3 Credit Hours)

Management is an essential component of the healthcare profession and includes planning, organizing, and leading organizational activities. This course will provide the student with a firm understanding of how the functions of management combine to define the manager's role in healthcare organizations.

Lecture Hours: 3
Repeatability: May be repeated for credit one time.
Grade Mode: Normal, Audit
Student Class Restrictions: Junior-Semester **Course Level Restrictions:** Undergraduate Semester **Program Restrictions:** BS_HLTS-Health Services
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HINF 3108 - Human Resources in Healthcare for Health Services (3 Credit Hours)

This course provides students with the opportunity to acquire the knowledge and develop the skills necessary for understanding the nature of human resources management and for recruiting, selecting, training, retaining, compensating, and relating to the organization's human capital.

Lecture Hours: 3
Repeatability: May be repeated for credit one time.
Grade Mode: Normal, Audit
Student Class Restrictions: Junior-Semester, Senior-Semester **Program Restrictions:** BS_HLTS-Health Services
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HINF 3209 - Principles of Health Informatics and Information Management (4 Credit Hours)

This course provides an overview of health informatics and information management from the capture of data to the use of information. Students will utilize methods such as collecting, summarizing, analyzing, presenting, and interpreting to transform health data into health information.

Lecture Hours: 4

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Student Class Restrictions:** Junior-Semester, Senior-Semester **Course Level**

Restrictions: Undergraduate Semester **Degree Restrictions:** BS Health Infor Administrat **Program Restrictions:** BSHIA_HINA-

Health Information Admin **Campus Restrictions:** Main Campus, Web

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HINF 3210 - Principles of Health Informatics and Information Management for Health Services (4 Credit Hours)

This course will introduce the concepts of health informatics and health information management. The student will become familiar with the importance of data governance, content, and usage in healthcare.

Lecture Hours: 4

Repeatability: May be repeated for credit up to three times.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester **Program Restrictions:** BS_HLTS-Health Services

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HINF 3213 - Healthcare Data Management and Analytics (4 Credit Hours)

This course will provide students with the skill set to apply performance improvement data analytics and determine the use of performance improvement presentation tools. Student will also demonstrate the core concepts of acquiring, managing, manipulating, and analyzing data.

Prerequisite(s): HINF 3209 >= C

Lecture Hours: 4

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Student Class Restrictions:** Junior-Semester **Course Level Restrictions:**

Undergraduate Semester **Degree Restrictions:** BS Health Infor Administrat **Program Restrictions:** BSHIA_HINA-Health Information

Admin **Campus Restrictions:** Main Campus, Web

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HINF 3312 - Medical Terminology (2 Credit Hours)

Introduction to the language used in healthcare. Emphasis on word components (combining forms, prefixes, and suffixes), pronunciation, and writing exercises.

Lecture Hours: 2

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Program Restrictions: BSCLS_CLS-Clinical Laboratory Sciences

Schedule Type (Primary): Asynchronous Instruction

HINF 3315 - Clinical Foundations in Health Informatics and Information Management (5 Credit Hours)

This course provides advanced medical terminology, introduces disease processes in the human body, diagnostic techniques and treatment methods, basic pharmacological concepts, drug classifications and commonly used drugs, and technologies used in clinical coding classification systems and clinical coding audits.

Prerequisite(s): BIOL 2111 >= C and BIOL 2112 >= C

Lecture Hours: 5

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Student Class Restrictions:** Junior-Semester **Course Level Restrictions:**

Undergraduate Semester **Degree Restrictions:** BS Health Infor Administrat **Program Restrictions:** BSHIA_HINA-Health Information Admin **Campus Restrictions:** Main Campus, Web
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HINF 3316 - Medical Terminology for Health Informatics and Information Management (3 Credit Hours)

Students will learn medical word elements, medical word building; anatomical and physiological terms; terms related to signs, symptoms and diseases; terms related to diagnostic, surgical and medical procedures; medical abbreviations, eponyms and symbols. Each body system is covered.

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Student Class Restrictions:** Junior-Semester, Senior-Semester **Program**

Restrictions: BSHIA_HINA-Health Information Admin **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HINF 3516 - Computer Fundamentals in Healthcare (4 Credit Hours)

Introduces students to computer concepts of hardware, software, the Internet, and uses of computers in healthcare. Students will demonstrate proficiency in use of word processing, spreadsheet, and graphics application software and the Internet through lab exercises and assignments.

Lecture Hours: 3 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSHIA_HINA-Health Information Admin

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

HINF 4106 - Health Informatics and Information Management Leadership Capstone (4 Credit Hours)

This course provides advanced concepts in healthcare leadership and guides students through activities designed to build leadership skills and creative problem solving.

Prerequisite(s): HINF 3101 >= C and HINF 3102 >= C and HINF 3209 >= C and HINF 3213 >= C and HINF 3214 >= C and HINF 4104 >= C and HINF 4209 >= C and HINF 4417 >= C and HINF 4520 >= C and MINF 3650 >= C

Corequisite(s): HINF 4723

Lecture Hours: 4

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Student Class Restrictions:** Senior-Semester **Course Level Restrictions:**

Undergraduate Semester **Degree Restrictions:** BS Health Infor Administrat **Program Restrictions:** BSHIA_HINA-Health Information Admin

Campus Restrictions: Main Campus, Web

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HINF 4107 - Healthcare Finance and Revenue Cycle Management (4 Credit Hours)

Students will learn the critical role healthcare finance and revenue cycle management play in the delivery of healthcare services in the United States. This course integrates information pertaining to healthcare finance and the complexity of reimbursement systems and revenue management processes that are used throughout the healthcare industry.

Prerequisite(s): ACCT 2101 and HINF 3315 and HINF 3316

Lecture Hours: 4

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Student Class Restrictions:** Senior-Semester **Course Level Restrictions:**

Undergraduate Semester **Degree Restrictions:** BS Health Infor Administrat **Program Restrictions:** BSHIA_HINA-Health Information Admin

Admin **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HINF 4209 - Health Law and Ethics (3 Credit Hours)

Overview of the law and its administration as it applies to questions of policy and procedure development for health data requirements in a healthcare setting. Includes basic ethical principles and situations of ethical dilemma, and ethical decision-making processes.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSHIA_HINA-Health Information Admin, CERHIA_HINA-Health Inform Administration **Campus Restrictions:** Main Campus, Web

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HINF 4416 - Principles of Healthcare Compliance (3 Credit Hours)

Students will be instructed in CPT/HCPCS coding. Student will learn the intricacies of the reimbursement process as they relate to coding, documentation, and regulations set forth by various federal agencies and managed care organizations

Prerequisite(s): HINF 3312 >= C and HINF 3314 >= C and HINF 3415 >= C

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSHIA_HINA-Health Information Admin

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

HINF 4418 - Coding Classifications and Compliance (4 Credit Hours)

Students will learn context and framework for medical coding through the critical thinking processes of abstracting medical documentation. Student will assign and sequence ICD-10-CM/PCS and CPT/HCPCS codes according to official coding guidelines. Coding compliance is also covered for inpatient versus outpatient coding based upon AHIMA's Coding Ethics for professional practice.

Prerequisite(s): HINF 3315 and HINF 3316

Lecture Hours: 4

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Major Restrictions:** Health Information Admin **Student Class Restrictions:** Senior-Semester **Course Level Restrictions:** Undergraduate Semester **Degree Restrictions:** BS Health Infor Administrat **Program Restrictions:** BSHIA_HINA-Health Information Admin **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HINF 4520 - Electronic Health Information Systems (4 Credit Hours)

This course introduces electronic health information systems and other technologies used in healthcare. Students will demonstrate the ability to participate in electronic health record (EHR) planning, selection, and the implementation process.

Prerequisite(s): MINF 2650 >= C and MINF 3650 >= C

Lecture Hours: 4

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Student Class Restrictions:** Senior-Semester **Course Level Restrictions:** Undergraduate Semester **Degree Restrictions:** BS Health Infor Administrat **Program Restrictions:** BSHIA_HINA-Health Information Admin **Campus Restrictions:** Main Campus, Web

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HINF 4521 - Advanced Health Information Systems (4 Credit Hours)

This course will introduce advanced health information systems topics. Topics will be based on current HIS issued in healthcare, particularly cyber security, health information exchanges, and information governance.

Prerequisite(s): MINF 3650 >= C and AIST 3610 >= C and HINF 4520 >= C

Lecture Hours: 4

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Student Class Restrictions:** Senior-Semester **Course Level Restrictions:** Undergraduate Semester **Degree Restrictions:** BS Health Infor Administrat **Program Restrictions:** BSHIA_HINA-Health Information Admin **Campus Restrictions:** Main Campus, Web

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HINF 4723 - Project Management in Healthcare (6 Credit Hours)

This course is project based. Students will demonstrate the ability to participate in health information projects utilizing basic project management techniques and processes. Students will be assigned projects by their faculty advisor.

Prerequisite(s): HINF 3101 >= C and HINF 3102 >= C and HINF 3209 >= C and HINF 3212 >= C and HINF 3214 >= C and HINF 4104 >= C and HINF 4209 >= C and HINF 4417 >= C and HINF 4520 >= C and MINF 3650 >= C

Corequisite(s): HINF4106

Lab Hours: 6

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Student Class Restrictions:** Senior-Semester **Course Level Restrictions:** Undergraduate Semester **Degree Restrictions:** BS Health Infor Administrat **Program Restrictions:** BSHIA_HINA-Health Information Admin **Campus Restrictions:** Main Campus, Web

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HINF 4725 - Cyber Security in Health Care Settings (3 Credit Hours)

This course focuses on building skills for understanding, assessing, and solving cyber security threats within health care settings. The course examines the methods and tools to approach cyber security issues and prepares for successful design and implementation of available countermeasures.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HINF 6312 - Medical Terminology (2 Credit Hours)

Introduction to the language used in healthcare. Emphasis on word components (combining forms, prefixes, and suffixes), pronunciation, writing exercises and case studies.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Graduate Semester **Program Restrictions:** MHSCLS_CLS-Clinical Laboratory Science

Schedule Type (Primary): Asynchronous Instruction

HINF 6725 - Cyber Security in Health Care Settings (3 Credit Hours)

This course focuses on building skills for understanding, assessing and solving cyber security threats within health care settings. The course examines the methods and tools to approach cyber security issues and prepares for successful design and implementation of available countermeasures to help protect the operation of the health care enterprises and to guard the confidentiality and privacy of patients' data. This class also presents current trends and open problems related to cyber security in health care settings. This class is offered on line.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1CERG-HEIS-Cert in Hlthcare Info Sec

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MPHI 8000 - Computerized Health Information Systems (3 Credit Hours)

Prerequisite: Acceptance to the Master of Public Health program or instructor permission. This course explores information systems theory, current and emerging technology, applications in the healthcare industry, health information systems strategic planning, and computer-based patient record theory.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPH_HINF, CERG_PHLT

Schedule Type (Primary): Asynchronous Instruction

MPHI 8001 - Public Health Informatics (3 Credit Hours)

An overview of the field of public health informatics, integrating themes from information sciences, public health, computer science and medical science. Topics include: utilization of health information services, organization and management of online current and emerging public health technology collections, automation of information technology, and public health professional knowledge as a component of evidence-based practice.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPH_HINF, CERG_PHLT

Schedule Type (Primary): Asynchronous Instruction

MPHI 8100 - Health Care Content, Standards, and Structure (3 Credit Hours)

Healthcare information standards are addressed with emphasis on current healthcare regulations and standards. The effective use of networks to share healthcare data is explored; emphasis is placed on developing the expertise to apply standards effectively in a healthcare facility to achieve full integration of organizational health information systems.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPH_HINF

Schedule Type (Primary): Independent Study **Schedule Type (Additional):** Asynchronous Instruction

MPHI 8400 - Health Data Management and Knowledge Discovery (3 Credit Hours)

This course focuses on the acquisition and use of patient level data to support population, administrative and clinical decision-making in healthcare organizations. Course emphasis is in data mining and knowledge discovery techniques including the advanced treatment of statistical analysis and methods of communicating the outcomes of health interventions.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPH_HINF, CERG_PHLT

Schedule Type (Primary): Asynchronous Instruction

MPHI 8500 - Health Information Systems Analysis and Project Management (3 Credit Hours)

This course explores the aspects of strategic planning, analysis, design, evaluation, and implementation of effective healthcare information systems. It teaches the principles, techniques, and tools for successful project management. Emphasis is placed on the skills required to lead technical and professional team members through work process design activities within a healthcare organization.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPH_HINF

Schedule Type (Primary): Asynchronous Instruction

MPHI 8800 - Health Decision Support Systems (3 Credit Hours)

This course presents an overview of automated decision systems used in clinical care, health administration and public health. The intensive format of the course allows for topic discussion, on-site observation of clinical, managerial, and population-based decision support systems.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPH_HINF

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MPHM 7102 - Human Resource Management (3 Credit Hours)

A comprehensive human resource management course which develops student understanding of the employer-employee relationship. Includes the major human resource management functions. Topics include job analysis, job descriptions, employee recruitment, selection, and training, salary administration, performance appraisals, and collective bargaining.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPH_HINF, CERG_PHLT

Schedule Type (Primary): Asynchronous Instruction

MPHM 7104 - Healthcare Financial Management (3 Credit Hours)

The purpose of this course is to provide the student with a practical understanding of the basic financial and budgeting concepts and tools used by healthcare organizations. The student will be provided with a basic refresher on accounting terminology and principles. Additionally the student will learn about cost concepts, the financial market, financial analysis, management of capital institutional budgeting, decision analysis, and emerging issues in healthcare finance.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPH_HINF

Schedule Type (Primary): Asynchronous Instruction

MPHM 7112 - Health Policy and Politics (3 Credit Hours)

This course provides an introduction to health policy and key features of the US healthcare system.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_AHSC, MPH_HINF

Schedule Type (Primary): Asynchronous Instruction

MPHM 7210 - Health Care Performance Improvement (3 Credit Hours)

Introduces concepts in quality management. Areas discussed include continuous quality improvement, utilization and risk management, accrediting functions, six-sigma and statistical process control, balanced scorecards, outcomes and disease management.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_AHSC, MPH_HINF, CERG_PHLT

Schedule Type (Primary): Asynchronous Instruction

MPHM 7220 - Current Topics in Public Health (3 Credit Hours)

This course examines major domains of public health and current trends & special topics within each domain.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPH_HINF

Schedule Type (Primary): Asynchronous Instruction

MPHM 8000 - Independent Study (1 to 3 Credit Hours)

This is an elective independent study course where a student will work individually with the faculty advisor to design an individualized course of study, set course objectives and requirements, and designate student learning outcomes. It is designed to provide students with in-depth knowledge related to their area of proposed research or professional interest that falls outside the current graduate course offerings. The course aims to develop the skill, knowledge, and areas of capstone project, which occurs outside the traditional classroom/laboratory setting under the supervision of a faculty member.

Lecture Hours: 1 to 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MPH_HINF

Schedule Type (Primary): Independent Study

MPHM 8110 - Leadership and Decision Making (3 Credit Hours)

This course provides an introduction and overview to leadership, management, decision making, and organizational behavior in healthcare.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_AHSC, MPH_HINF

Schedule Type (Primary): Asynchronous Instruction

MPHM 8220 - Strategic Management of Healthcare Organizations (3 Credit Hours)

This course introduces students to the principles and practices of strategic management within healthcare and public health organizations. Emphasizing real-world applications, students will explore environmental assessment, mission and vision development, strategic planning processes, and implementation frameworks tailored for dynamic healthcare and public health settings. Learners will engage in critical thinking, collaborative discussion, and project-based assignments that develop their ability to lead strategic initiatives and assess innovation viability in healthcare and public health administration.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPH_HINF

Schedule Type (Primary): Asynchronous Instruction

MPHM 8280 - Research Methods in Public Health (3 Credit Hours)

An introduction to research methods in public health, including research design and methods for data collection and data analysis. The course serves as an introduction to quantitative, qualitative, mixed-method, and community-based participatory approaches to research in public health, as well as ethical issues in conducting research. Through the mix of coursework, textbook readings, and articles from the public health literature, students acquire skills needed to develop a research proposal to address a public health problem, while developing competencies in: 1) conducting a literature review, 2) critically evaluating research designs, and 3) analyzing quantitative and qualitative data.

Prerequisite(s): STAT 7010 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPH_HINF, CERG_PHLT

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MPHM 8998 - Extended Capstone (3 Credit Hours)

Extends the required capstone course to provide additional research time.

Lecture Hours: 1 **Lab Hours:** 1 **Contact Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPH_HINF

Schedule Type (Primary): Asynchronous Instruction

HPEC 7001 - Introduction to Health Professions Education (1 Credit Hour)

This course provides a general introduction to health sciences education and research. Focus will be on terminology used in education research, including health sciences education, concepts in education science, finding and reading health science education research and an introduction to health science education and social science research methodology. This course also will provide a general overview of the culminating experience which will occur at the conclusion of the HPEC program.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

HPEC 7002 - Learning Theories in Health Professions Education (2 Credit Hours)

This course provides an introduction to general learning theories and medical education theory. The focus of this course is on the exploration of learning theories and how they apply to instructional methods and designs. By examining a variety of learning theories, students will identify a range of principles, perspectives, and tools that will be useful in understanding learning and teaching in a variety of contexts.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

HPEC 7003 - Contextual Factors in Health Professions Education (1 Credit Hour)

This course provides an introduction to contextual factors that influence teaching and learning. The focus of this course is on the exploration of a variety of contextual factors and how they impact and influence instructional methods and designs. By examining a variety of contextual factors, students will identify a range of principles, perspectives, and tools that will be useful in understanding learning and teaching in a variety of contexts. Some contextual factors that will be addressed include, but are not limited to: socioeconomic, environmental, and cultural influences.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

HPEC 7004 - Designing Research in Health Professions Education (1 Credit Hour)

This course provides a general introduction to planning and conducting research in health professions education. Focus will be on conducting a literature review, designing a study (quantitative or qualitative) including a sampling plan, instruments for data collection and data collection strategy.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

HPEC 7005 - Determining Learning Objectives and Competencies (1 Credit Hour)

This course provides an introduction to learning objectives and learner outcomes of teaching and learning. The focus of this course is on the exploration and development of learning objectives and learner outcomes, how they influence instructional methods, assessment, and design. By examining a variety of learning objectives and learner outcomes, students will identify a range of principles, perspectives, and tools that will be useful in developing appropriate instructional engagements and assessments.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

HPEC 7006 - Best Practices in Assessment Module (1 Credit Hour)

This online course provides a critical examination of best practices of assessments in health professions education. Topics include but are not limited to formative assessment, summative assessment, the relationship between learning outcomes (competencies) and assessment, validity and reliability, effective feedback, self-assessment, and reflection. In addition, the concepts of validity and reliability will be explored.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

HPEC 7007 - Assessment Methods Module (1 Credit Hour)

This online course provides a critical examination of the variety of assessments available in health professions education. Topics include but are not limited to multiple choice questions, rating scales, checklists, simulations, observations, objective structured clinical exams, essay questions, peer assessments, self-assessments, reflection, and portfolios.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HPEC 7008 - Online Teaching (1 Credit Hour)

This course provides a critical examination of various technology strategies to enhance learning experiences in health professions education. The course will focus on teaching and assessment methods that stimulate achievement of learners.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

HPEC 7009 - Clinical Teaching (1 Credit Hour)

This course provides a critical examination of various instructional strategies to enhance learning experiences in health professions education. Techniques will focus on teaching methods in a clinical setting and educator behaviors that stimulate achievement of learners.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

HPEC 7010 - Classroom Teaching (1 Credit Hour)

This course provides a critical examination of various instructional strategies to enhance learning experiences in health professions education. Techniques will focus on active learning methods in classroom teaching and educator behaviors that stimulate achievement of learners.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit
Schedule Type (Primary): Lecture

HPEC 7011 - Data Analysis for Health Profession Education (1 Credit Hour)

This course provides a basic instruction and practice in the analysis on qualitative and quantitative data especially as it relates to health professions education.

Prerequisite(s): HPEC 7001 and HPEC 7004

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

HPEC 7012 - Research Practicum in Health Professions Education (1 Credit Hour)

This course is designed to provide guidance to HPE Certificate students in the completion of a publishable research project in medical education.

Prerequisite(s): HPEC 7001 and HPEC 7002 and HPEC 7003 and HPEC 7004 and HPEC 7005 and HPEC 7006 and HPEC 7007 and HPEC 7008 and HPEC 7009 and HPEC 7010

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

BSHS 3100 - Seminar in Health Services (1 Credit Hour)

This course will provide an overview of health care through a variety of guest speakers and reading assignments. Speakers will engage students in aspects of health care including: leadership, technology, insurance/reimbursement, research, volunteerism and education.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BS_HLTS-Health Services

Schedule Type (Primary): Asynchronous Instruction

BSHS 3200 - Issue and Challenges in Public Health (3 Credit Hours)

This course offers a thorough, accessible overview of the expanding field of public health for students new to its concepts and actors. Students will be able to critically think about the challenges and issues in public health and use multi-disciplinary strategies and methods used to measuring, assessing, and promoting public health. It provides students with informative discussions of the current technical issues and practical obstacles facing public health practitioners and policymakers alike.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BS_HLTS-Health Services

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

BSHS 3660 - U.S. Health Care Delivery for Health Services (3 Credit Hours)

This course will allow health services professionals to develop an understanding of the organization and structure of the healthcare industry as a whole and the healthcare facilities comprising the industry. The four functions of health care (delivery, payment, financing and providers), health care policy and standards, technology, cost containment, accessibility, and health care quality will be addressed.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Program Restrictions: BS_HLTS-Health Services

Schedule Type (Primary): Asynchronous Instruction

BSHS 4100 - Innovation and Technology in Health Care (3 Credit Hours)

This course focuses on creating successful technological innovations in health care that can better meet consumer and societal needs. At its end, students will understand how to evaluate opportunities and the fundamentals of viable business models for different kinds of health care innovations.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

BSHS 4150 - Health Economics (3 Credit Hours)

This course examines the public health care system through the lens of economic theory. Through the use of numerous examples and profiles related to the field, students will learn the importance health economics and its relevance to more general analysis of health policy issues.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

BSHS 4200 - Healthcare Marketing and Commercialization (3 Credit Hours)

The healthcare industry continues to undergo enormous changes with new laws and policies, fresh innovations, and an increasingly educated health consumer. As such, healthcare administrators must be prepared to shift their strategies in order to meet the demands of this dynamic market. This course provides students with a foundational knowledge of the principles of marketing and their particular application in health care. Moreover, it offers a perspective on how these principles must shift in response to the changing environmental forces that are unique to this market.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

BSHS 4210 - Capstone Project (3 Credit Hours)

The goal of the course is to facilitate the student's transition from school to life as a health service professionals. The course takes two concurrent pedagogical methods to accomplish this goal: 1) Seminar lectures and exercises designed to aid the integration of public health practice principles to enhance job performance and future careers, and 2) the "capstone project" which provides an opportunity to integrate both technical and professional knowledge into comprehensive web-enabled oral and written reports on a student's selected health care topic.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit, In Progress

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

BSHS 4500 - Internship in Health Services (1 to 3 Credit Hours)

Under the direction of a preceptor, the instructor, and the program director, students develop a Work Proposal that bridges the students' career goals with Health Services Student Learning Objectives. Students must complete objectives defined in the Work Proposal and submit other reports/assignments specified in the course syllabus.

Prerequisite(s): BSHS 3660 >=C

Contact Hours: 1 to 3

Repeatability: May be repeated for credit up to four times.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Course Level Restrictions:** US Undergraduate **Department**

Restrictions: Allied Health: Dept. of Undergraduate Health Professions **Program Restrictions:** Bachelor of Science with a major in Health Services

Schedule Type (Primary): Internship/Practicum

BSHS 4540 - Research in Health Services (3 Credit Hours)

This course focuses on building basic skills for conducting health research and includes guidance on locating, utilizing, and evaluating sources. The course provides an introduction to ethical issues and research conduct involved with health research. The course examines the methods and tools of qualitative and quantitative health analysis and explores the mechanics of research writing and presentation.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BS_HLTS-Health Services

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

BSHS 4950 - Special Topics in Health Services (3 Credit Hours)

This course is designed to allow students to gain knowledge and skills in an area of special interest pertaining to health services. The course will be led by faculty in the Health Services program.

Lecture Hours: 3

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Program Restrictions: BS_HLTS-Health Services

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study

RHON 5000 - Hematology/Oncology (27 Credit Hours)

Lecture Hours: 12 **Contact Hours:** 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Internship/Practicum

HIST 1111 - Pre-Modern World Civilization (3 Credit Hours)

A survey of world history to early modern times. The course will examine the political, economic, social, and cultural aspects of various civilizations from ancient times to the Renaissance.

Core IMPACTS Requirement(s) Satisfied: Social Sciences (Social Sciences)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Asynchronous Instruction

HIST 1112 - Modern World Civilization (3 Credit Hours)

A survey of world history from early modern times to the present. An examination of the development of world civilization from the beginnings of European colonization to the present, including events, trends, institutions, and ideas that have had global impact.

Core IMPACTS Requirement(s) Satisfied: Social Sciences (Social Sciences)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group, Independent Study, Directed Study (one-to-one), Asynchronous Instruction

HIST 1113 - Issues in World Civilization (1 to 3 Credit Hours)

Study of a major theme in world history such as conflict, socioeconomic development, cultural interaction, or cultural/intellectual trends. Especially for majors and minors participating in study abroad with history faculty.

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Directed Study (one-to-one), Asynchronous Instruction

HIST 2111 - United States to 1877 (3 Credit Hours)

A survey of American history to the post-Civil War period. A satisfactory grade will exempt a student from the requirement of passing before graduation an examination on the history of the United States and the history of Georgia.

Core IMPACTS Requirement(s) Satisfied: Political Science and U.S. History (Citizenship); Social Sciences (Social Sciences)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HIST 2111H - Honors: United States to 1877 (3 Credit Hours)

A survey of American history to the post-Civil War period. A satisfactory grade will exempt a student from the requirement of passing before graduation an examination on the history of the United States and the history of Georgia. This is an honors course.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HIST 2112 - United States Since 1877 (3 Credit Hours)

A survey of the United States from the post-Civil War period to the present. A satisfactory grade will exempt a student from the requirement of passing before graduation an examination on the history of the United States and the history of Georgia.

Core IMPACTS Requirement(s) Satisfied: Political Science and U.S. History (Citizenship); Social Sciences (Social Sciences)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HIST 2112H - Honors: United States Since 1877 (3 Credit Hours)

A survey of the United States from the post-Civil War period to the present. A satisfactory grade will exempt a student from the requirement of passing before graduation an examination on the history of the United States and the history of Georgia. This is an honors course.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HIST 2950 - Special Topics in History (1 to 3 Credit Hours)

This introductory course examines a special topic in History. Content of the course varies.

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit up to two times.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

HIST 3001 - Historical Research Methods (4 Credit Hours)

A study of the methods of historical research and analysis as well as the generally accepted usages in historical composition and citation.

Lecture Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Health, Society, and Policy, History

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis

HIST 3012 - World History Seminar (3 Credit Hours)

Survey of modern world history, including major trends in politics, economics, and conflict. This class is especially designed for prospective teachers. Prerequisite(s): Junior Standing.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

HIST 3020 - Premodern Europe (3 Credit Hours)

This course will look at the history of medieval Europe from the foundational societies of the Ancient world to the Renaissance. This is a survey of medieval European society, examining the cultural, political, legal, philosophical, and artistic elements.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HIST 3030 - The Islamic World (3 Credit Hours)

A global survey of the history of the Islamic faith and Muslim communities. Through analysis of primary source material and secondary sources, students gain insight into the political, religious, and philosophical traditions of Muslim communities around the world.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching

HIST 3031 - Modern Middle East (3 Credit Hours)

A survey of the political, economic, social, and intellectual history of the Middle East from the First World War to the present including such subjects as Western imperialism, Arab nationalism, and the Arab-Israeli conflict and peace process. Prerequisite(s): Junior or Senior standing or permission of instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching

HIST 3060 - Introduction to Public History (3 Credit Hours)

This course is an introduction to the field of the public history field in its diverse venues and manifestations. Students will consider the ways in which historians engage various publics and will undertake projects to help understand and experience how public historians carry out their work and responsibilities.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HIST 3110 - African Civilizations (3 Credit Hours)

This course provides an introduction to African History prior to the early 19th century through a focus on Africa's major civilizations and global connections. It will begin with early efforts to domesticate crops and wild animals and move forward until changes in Africa's internal and external dynamics in the eighteenth and early nineteenth centuries.

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction, Directed Study (one-to-one)

HIST 3111 - Modern Africa (3 Credit Hours)

A survey of political, social, and cultural history of the African continent from the 19th century to the present. Prerequisite(s): Junior or Senior standing or permission of instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis

HIST 3140 - History of Canada (3 Credit Hours)

A survey of Canada's history from the arrival of indigenous peoples through the last 20th century. Topics include: indigenous civilizations, French and British colonialism, the influence of the United States, confederation and constitutional repatriation, Canada's changing role in world affairs, and the struggle to define Canadian identity.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HIST 3211 - History and Culture of East Asia (3 Credit Hours)

This course will introduce students to the history of East Asia and to the major cultural, economic, and political changes in the region.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group, Asynchronous Instruction

HIST 3220 - Modern China (3 Credit Hours)

A survey of the social, cultural, economic, and political transformations of China from the 17th century to the present.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior, Senior

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HIST 3250 - Modern Japan (3 Credit Hours)

This course offers an introduction to the modern history of Japan from Tokugawa times to the present. This course will engage the major themes in Japan's social, political, cultural, and economic development, and provides students with the historical background necessary for evaluating the emergence of modern Japan as a global power.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HIST 3311 - Modern Russia (3 Credit Hours)

Russia from the late nineteenth century to the present. Origins, development, and collapse of the Soviet state. Prerequisite(s): Junior or Senior standing or permission of instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching

HIST 3321 - Modern Europe: Revolutions (3 Credit Hours)

A study of causation, methodology, and effectiveness of revolutions as they occurred in Europe and America from the 1600s through 1917.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior, Senior

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching

HIST 3331 - Modern Europe: People (3 Credit Hours)

An examination of the transition of the European states from agricultural, semi-feudal monarchies to industrialized great powers.

Prerequisite(s): Junior or Senior standing or permission of instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis

HIST 3341 - Modern Europe: War and Diplomacy (3 Credit Hours)

Major trends in European history from the Russian Revolution of 1905 to the present. Prerequisite(s): Junior or Senior standing or permission of instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching

HIST 3381 - History of Britain (3 Credit Hours)

Introduction to the history of Britain, considering major cultural, economic, and political themes in its history.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior, Senior

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching

HIST 3471 - American Religious History (3 Credit Hours)

A narrative exploration of four centuries of religious change in the American experience, told as a contentious, competitive story of different groups and movements.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HIST 3491 - Military History of the US (3 Credit Hours)

Overview of American military history from colonization to the present, including major wars, campaigns, battles, institutional and organizational development, and strategy.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching

HIST 3510 - Latin American Civilizations (3 Credit Hours)

This is an introductory survey of Latin American civilizations from pre-European contact to the present covering social, cultural, economic, political, and geographical elements of historical impact.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HIST 3531 - History of Mexico (3 Credit Hours)

An examination of Mexico's history. Topics include: indigenous civilizations prior to European contact, Spanish conquest, colonial society, the independence period, and a social, political, and economic survey of the turbulent modern era. Prerequisite(s): Junior or Senior standing or permission of instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching

HIST 3561 - Latino/Hispanic USA (3 Credit Hours)

A survey of U.S. History from the perspective of Latinos and Hispanic populations in the U.S. through the early 2000s. Chronologically covers such themes as: immigration, education, health care, work/labor, civil rights, culture, and identity.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior, Senior

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HIST 3571 - Topics in Latin America (3 Credit Hours)

Examines the history of Latin America in a topical or thematic approach. Explores the role of race on nationbuilding and society, such as the African Heritage of Latin America or Indigenous Heritage of Latin America, or centers on a particular cross-regional theme, such as Latin America and the environment or health and society in Latin America.

Lecture Hours: 3

Repeatability: May be repeated for credit up to five times.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior, Senior

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HIST 3600 - Premodern Health and Medicine (3 Credit Hours)

This course investigates the history of medical practice and understanding of the human body and disease. The topics (including early notions of body and health) will begin from the earliest times and proceed chronologically to the end of the sixteenth century, with concentration on the period from CE 600 to 1600.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group, Independent Study, Asynchronous Instruction

HIST 3610 - History of Modern Health and Medicine (3 Credit Hours)

This course introduces the social, intellectual, and cultural history of western health and medicine from the eighteenth century to the present. The course will cover how health, medicine, and disease are framed within social, cultural, and institutional values, with an emphasis on the rise and complexities of scientific medicine.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HIST 3711 - Georgia History (3 Credit Hours)

A study of the history of Georgia that focuses on state and local history and shows the connections with national and world events. This course fulfills the legislative requirement for Georgia history.

Prerequisite(s): HIST 2111 >= C or HIST 2111H >= C or HIST 2112 >= C or HIST 2112H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis

HIST 3811 - Topics in the Islamic World (3 Credit Hours)

A survey of the political, economic, social, and intellectual history of the predominantly Muslim-populated regions in the Eastern Hemisphere from the seventh century to the present. Prerequisite(s): Junior or Senior standing or permission of instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis

HIST 4011 - History of Women (3 Credit Hours)

Examines the history of women in either a geographical or topical approach. Explores the female role of mother, daughter, sister, and leader in a particular society, such as America, Europe, Asia, Latin America, etc. Or, the course is centered on a particular cross-cultural topic, such as suffrage, family roles, leaders, religion, etc. In all cases, this course is intended to explore the paradox between the ideal woman and actual treatment of women in a given era, society, culture, or movement.

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior, Senior

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

HIST 4021 - History of Gender and Sexuality (3 Credit Hours)

An in-depth look at the relationship between men and women with particular emphasis on their roles in the family. Explores childhood, marriage, work, and cultural practices in a particular period from antiquity to modernity. Primary and secondary sources are provided for comparisons between men and women in both the elite and common sectors of society.

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior, Senior

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

HIST 4030 - Witchcraft, Law, and Culture (3 Credit Hours)

An examination of beliefs and practices related to witchcraft and popular magic, with an emphasis of cultural and legal responses to this alleged phenomenon. This course includes a special emphasis on gendered aspects and social consequences of witchcraft beliefs and persecutions. Course may be accepted for upper-level ANTH credit.

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HIST 4060 - Digital History (3 Credit Hours)

In this course, students learn hands-on techniques and platforms for new media, data mining, scholarly editing, and electronic teaching methods. Digital History, in many cases using the most basic digital materials, such as PowerPoint lectures, has now become a primary means of imparting materials in libraries and schools. This course will help prepare historians and social studies teachers for the digital future.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HIST 4111 - History of World Religions (3 Credit Hours)

This is a survey course introducing the study of religion. The students will define what "religion" is, examine why so many people in the history of the world find religion important, and try to understand some of the major tenets of the religions of the world. This course is designed with the theme of ethics and morals as defined by cultures and religions around which many of the readings and discussions will take place. Prerequisite(s): Junior or Senior standing or permission of instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

HIST 4151 - Peace and Conflict in Africa (3 Credit Hours)

This course focuses on issues of war and security in Modern Africa. Course content will cover the impact of warfare on African societies from the 1890s to the present, including global conflicts from World War I to the Cold War, as well as contemporary security disputes.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction, Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar Small Group, Independent Study, Directed Study (one-to-one)

HIST 4160 - Piracy and Seafaring in the Age of Sail (3 Credit Hours)

An overview of seafaring in the Atlantic world from the 16th through the 19th centuries, with an emphasis on various forms of piracy and its culture, social, economic, and military aspects.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HIST 4241 - Borderlands and Frontiers in Chinese History (3 Credit Hours)

This course surveys the history of interactions between "China" and the various peoples and states on the edge of the Chinese state. Time period may vary.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HIST 4310 - Celtic Peoples (3 Credit Hours)

Through analysis of primary source material and secondary source dialogues, students acquire a sense of the history of the Celtic peoples from the earliest proto-Celts in Central Europe of antiquity to the medieval homelands of Ireland, Wales, Cornwall, Scotland, and Brittany to the neo-Celtic movements of the nineteenth and twentieth centuries.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group, Independent Study, Asynchronous Instruction

HIST 4360 - The Culture of Absolutism and Revolution (3 Credit Hours)

A study of European politics in the late sixteenth to early nineteenth centuries through the lens of both elite and popular culture. This course considers community, national, and international politics through a variety of cultural forms, which may include theatre, art, dance, music, ritual, written and oral culture, among others.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group, Asynchronous Instruction

HIST 4361 - Age of Reason and Enlightenment (3 Credit Hours)

A study of European institutions and ideas in the seventeenth and eighteenth centuries with special attention to the growth of absolute monarchies, to discoveries in the sciences, and to the application of reason to the progress of human development.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior, Senior

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching

HIST 4391 - Twentieth Century Europe (3 Credit Hours)

Major trends in European history from the Russian Revolution of 1905 to the present. Prerequisite(s): Junior or Senior standing or permission of instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching

HIST 4401 - Colonial North America (3 Credit Hours)

A study of the colonial period of North America; the interaction of native peoples with newcomers; the political, economic, social, and cultural growth of North American colonies; the changing relationships between European powers and their colonies.

Prerequisite(s): HIST 2111 >= C or HIST 2111H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching

HIST 4411 - Revolutionary America (3 Credit Hours)

This course examines the revolutionary beginnings of the United States, exploring themes of social transformation, political experimentation, and cultural creativity during the early national period.

Prerequisite(s): HIST 2111 >= C or HIST 2111H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching

HIST 4421 - Civil War and Reconstruction (3 Credit Hours)

A study of the causes of the American Civil War, the major military campaigns and engagements, and the problems of the nation after the war.

Prerequisite(s): HIST 2111 >= C or HIST 2111H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching

HIST 4451 - U.S. National Security and Foreign Policy, 1898-Present (3 Credit Hours)

The emergence of the United States as a world power, the origins and impact of the Cold War, and the forces that have shaped America's relationship with the world. **Prerequisite(s):** Junior or Senior standing or permission of instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching

HIST 4471 - Old South/New South (3 Credit Hours)

A comparative analysis of two social orders--the antebellum South (1820-1860), and the New South (1880-1940)--with focus on race, economics, and religion, undergirded by the classic debate of continuity or change.

Prerequisite(s): HIST 2111 >= C or HIST 2111H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching

HIST 4481 - The Sunbelt South (3 Credit Hours)

A focused exploration of transformations in the post-1940 period, framed by the idea of region/regional identity: in light of sweeping changes from 1940, to 1975, to the present, is region--'the South'-- still a meaningful category of analysis?

Prerequisite(s): HIST 2112 >= C or HIST 2112H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching

HIST 4491 - The American West (3 Credit Hours)

An examination of the westward movement and those factors that defined the West as a land of opportunity; the significance of race, ethnicity, and gender in the West's creation; and the role of the West in shaping the identity and image of the United States.

Prerequisite(s): HIST 2112 >= C or HIST 2112H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

HIST 4501 - African Americans, Africa and the African Diaspora (3 Credit Hours)

This course offers an exploration of the experiences of and connections among Africans and members of this continent's diasporic communities. It examines this history prior to transatlantic contact and extends through African independence in 1960.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HIST 4511 - Black Internationalism (3 Credit Hours)

This course introduces students to the concept of Black/African American Internationalism from the 1890s through the 1970s. The course especially centers bottom-up histories and gender, class, and ethnic analyses.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HIST 4521 - The Long Civil Rights Movement (3 Credit Hours)

This course extends the traditional 1955-1964 arc of the modern civil rights movement. It considers various movements against exploitation, segregation, and discrimination throughout the nation rather than the U.S. South alone.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HIST 4710 - Premodern Science, Religion, and Magic (3 Credit Hours)

This course is designed to explore the clash between the ideas of faith, superstition, and early science from the 14th to the 17th centuries in Europe. The course explores the social challenges to science and the scientific challenges to some social conventions, as science pushes forward human understanding of the world.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

HIST 4820 - Medieval Castles, Fortifications, and War (3 Credit Hours)

This course will look at the design, purpose, and use of castles; town fortifications, including walls; and elements of conflict, such as diplomacy, crusades, and the role of religion, technology, and tactics. The course also examines connections between towns and castles and the people who worked in and on castles.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

HIST 4851 - Military History of the Western World (3 Credit Hours)

This course will examine topics in the history of warfare from ancient times to the present. Topics may include military strategy and operations, social and cultural aspects of warfare, and the causes and consequences of war.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis

HIST 4940 - Historiography (3 Credit Hours)

Study of historical writing and the approaches used to research and write history. Course is designed to examine the philosophy of historical research, major changes in historiographic trends, and major writers of history.

Prerequisite(s): HIST 3001 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

HIST 4950 - Selected Topics (1 to 4 Credit Hours)

Content of the course varies. Prerequisite(s): Junior or Senior standing or permission of instructor.

Lecture Hours: 1 to 4

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

HIST 4960 - Undergraduate Internship (1 to 12 Credit Hours)

A service-learning experience based in an institution or agency, the internship requires the completion of a specific task and the acquisition of specific knowledge and skills under the supervision of the university and the cooperating institution or agency.

Prerequisite(s): Permission of department chair.

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

HIST 4970 - Senior Thesis (3 Credit Hours)

The composition of an extended paper that employs the methods of historical research and analysis and that incorporates the generally accepted usages in historical composition and citation. Prerequisite(s): Senior standing.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

HIST 4980 - Seminar in History (3 Credit Hours)

The Seminar in History is designed to put the skills of the historian into action in research, exploration of new ideas, synthesis of ideas, discussions with colleagues, and presentations of work. This course will help students nearing the end of their undergraduate career to think of history in a broader context and in multiple ways, mobilizing what they have learned toward a career path, graduate school, or teaching among other pathways for the history graduate.

Prerequisite(s): HIST 3001 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HIST 4990 - Undergraduate Research in History (3 Credit Hours)

Broadly-based undergraduate research course with the topic tailored to the instructor's area of specialization or student preference. Course will give attention to historical research and writing. A formal paper may be required but other platforms -- websites, oral history interviews, or general research practices might be covered.

Prerequisite(s): HIST 1111 >= C and HIST 1112 >= C and (HIST 2111 >= C or HIST 2111H >= C) and (HIST 2112 >= C or HIST 2112H >= C) and HIST 3001 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

HIST 5111 - History and Culture of Africa (3 Credit Hours)

A survey of the political, economic, social, and intellectual history of the African continent from ancient times to the present.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis

HIST 5211 - History and Culture of East Asia (3 Credit Hours)

A survey of Asian civilizations emphasizing cultural institutions and reactions to Western encroachment.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HIST 5311 - Modern Russia (3 Credit Hours)

Russia from the late nineteenth century to the present. Origins, development, and collapse of the Soviet state.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

HIST 5371 - England to 1689 (3 Credit Hours)

A study of the origins and development of England politically, economically, socially, and culturally from the earliest settlements through the Revolution of 1688 establishing constitutional monarchy.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Practice Teaching

HIST 5381 - England Since 1689 (3 Credit Hours)

A study of the constitutional developments, rise of parliamentary supremacy, impact of the Industrial Revolution, and institutional and social reforms in the nineteenth and twentieth centuries.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Independent Study,Directed Study (one-to-one),Asynchronous Instruction

HIST 5391 - Colonialism and Nationalism of the British Empire (3 Credit Hours)

A survey of the political, economic, social, and intellectual history of the British Empire and commonwealth.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Independent Study,Directed Study (one-to-one),Asynchronous Instruction

HIST 5491 - Military History of the United States (3 Credit Hours)

Overview of American military history from colonization to the present, including major wars, campaigns, battles, institutional and organizational development, and strategy.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Practice Teaching

HIST 5531 - History of Mexico (3 Credit Hours)

An examination of Mexico's history. Topics include: indigenous civilizations prior to European contact, Spanish conquest, colonial society, the independence period, and a social, political, and economic survey of the turbulent modern era.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Independent Study,Directed Study (one-to-one),Asynchronous Instruction

HIST 5591 - United States and Latin American Relations (3 Credit Hours)

A study of the cultural, commercial, and diplomatic relations among the American republics.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Independent Study,Directed Study (one-to-one),Asynchronous Instruction

HIST 5610 - History of Modern Health and Medicine (3 Credit Hours)

This course covers the social, intellectual, and cultural history of Western health and medicine from the eighteenth century to the present. The course will cover how health, medicine, and disease are framed within social, cultural, and institutional values, with an emphasis on the rise and complexities of scientific medicine.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HIST 5711 - Georgia History (3 Credit Hours)

A study of the history of Georgia that focuses on state and local history and shows the connections with national and world events. This course fulfills the legislative requirement for Georgia history.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Independent Study,Directed Study (one-to-one),Asynchronous Instruction

HIST 5811 - Topics in the Islamic World (3 Credit Hours)

A survey of the political, economic, social, and intellectual history of the predominantly Muslim-populated regions in the Eastern Hemisphere from the seventh century to the present.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Independent Study,Directed Study (one-to-one),Asynchronous Instruction

HIST 5851 - Military History of the Western World (3 Credit Hours)

Warfare in the western world from ancient times through the eighteenth century. Attention will be given to military doctrine, technology, and style, and the effect of war on the development of the west.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Independent Study,Directed Study (one-to-one),Asynchronous Instruction

HIST 6011 - History of Women (3 Credit Hours)

This course will examine the history of women in either a geographical or topical approach. Or, the course will be centered on a particular cross-cultural topic, such as suffrage, family roles, leaders, religion, etc. In all cases, this course is intended to explore the paradox between the ideal woman and actual treatment of women in a given era, society, culture, or movement.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Independent Study,Directed Study (one-to-one),Asynchronous Instruction

HIST 6021 - Gender and Family History (3 Credit Hours)

This is an in-depth look at the relationship between men and women with particular emphasis on their roles in the family. The course will look at childhood, marriage, work, and cultural practices in a particular period from antiquity to modernity. Primary and secondary sources will provide comparisons between men and women in both the elite and common sectors of society.

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Independent Study,Directed Study (one-to-one),Asynchronous Instruction

HIST 6111 - History of World Religions (3 Credit Hours)

This is a survey course introducing the study of religion. The students will define what "religion" is, examine why so many people in the history of the world find religion important, and try to understand some of the major tenets of the religions of the world. This course is designed with the theme of ethics and morals as defined by cultures and religions around which many of the readings and discussions will take place.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Independent Study,Directed Study (one-to-one),Asynchronous Instruction

HIST 6211 - The Middle East 622-1914 (3 Credit Hours)

A survey of the political, economic, social, and intellectual history of the Middle East from the time of the Prophet Muhammad to the Ottoman Empire's entry into the first World War.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Independent Study,Directed Study (one-to-one),Asynchronous Instruction

HIST 6221 - The Modern Middle East (3 Credit Hours)

A survey of the political, economic, social, and intellectual history of the Middle East from the first World War to the present including such subjects as western imperialism, Arab nationalism, and the Arab-Israeli conflict and peace process.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Independent Study,Directed Study (one-to-one),Asynchronous Instruction

HIST 6361 - Age of Reason and Enlightenment (3 Credit Hours)

A study of European institutions and ideas in the seventeenth and eighteenth centuries with special attention to the growth of absolute monarchies, to discoveries in the sciences, and to the application of reason to the progress of human development.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Independent Study,Directed Study (one-to-one),Asynchronous Instruction

HIST 6371 - Age of Revolutions (3 Credit Hours)

A study of causation, methodology, and effectiveness of revolutions as they occurred in Europe and America from the 1600s through 1917.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Independent Study,Directed Study (one-to-one),Asynchronous Instruction

HIST 6381 - Nineteenth Century Europe (3 Credit Hours)

An examination of the transition of the European states from agricultural, semi-feudal monarchies to industrialized great powers.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Independent Study,Directed Study (one-to-one),Asynchronous Instruction

HIST 6391 - Twentieth Century Europe (3 Credit Hours)

Major trends in European history from the Russian Revolution of 1905 to the present.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Independent Study,Directed Study (one-to-one),Asynchronous Instruction

HIST 6401 - Colonial and Revolutionary America (3 Credit Hours)

A study of the colonization of North America by Europeans; the interaction of native peoples with the colonizers; the political, economic, social, and cultural growth of the colonies; the relationship between England and its colonies; and the American Revolution.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Independent Study,Directed Study (one-to-one),Asynchronous Instruction

HIST 6411 - United States from the Confederation to 1850 (3 Credit Hours)

An in-depth study of the political, economic, social, and cultural development of America during the Confederation, Federalist, Jeffersonian, and Jacksonian periods.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Independent Study,Directed Study (one-to-one),Asynchronous Instruction

HIST 6421 - Civil War and Reconstruction (3 Credit Hours)

A study of the causes of the American Civil War, the major military campaigns and engagements, and the problems of the nation after the war.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Independent Study,Directed Study (one-to-one),Asynchronous Instruction

HIST 6431 - U.S. from the Gilded Age to the Great Depression (3 Credit Hours)

An in-depth study of the political, economic, social, and cultural development of America and of American foreign relations during the Gilded Age, Progressive Era, World War I, and the 1920s.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Independent Study,Directed Study (one-to-one),Asynchronous Instruction

HIST 6451 - National Security and Foreign Policy, 1898- (3 Credit Hours)

The emergence of the United States as a world power, the origins and impact of the Cold War, and the forces that have shaped America's relationship with the world.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Independent Study,Directed Study (one-to-one),Asynchronous Instruction

HIST 6471 - The Old South (3 Credit Hours)

A study of the American South from the beginnings of European settlement to the Civil War with emphasis on slavery, the development of southern culture, and other topics.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Independent Study,Directed Study (one-to-one),Asynchronous Instruction

HIST 6481 - The New South (3 Credit Hours)

A study of the American South since Reconstruction with emphasis on race relations, the evolution of southern culture, and other topics.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Independent Study,Directed Study (one-to-one),Asynchronous Instruction

HIST 6491 - The American West (3 Credit Hours)

An examination of the westward movement and those factors that defined the west as a land of opportunity; the significance of race, ethnicity, and gender in the west's creation; and the role of the west in shaping the identity and image of the United States.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Independent Study,Directed Study (one-to-one),Asynchronous Instruction

HIST 6600 - Early Medical History (3 Credit Hours)

This course investigates the premodern history of medical practice and understanding of the human body and disease. The readings begin with some grounding in early Homo sapiens and proceed chronologically for the most part to the end of the sixteenth century. The course will look generally at the global and cultural exchange of ideas about the body and disease, differing views on the body and health, rationalities behind various methods of healing, practitioners of medicine, the role of faith and superstition, law and regulation surrounding the practice of medicine and distribution of drugs, and treatment (including prosthetics) of disabilities and the disabled.

Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study,Asynchronous Instruction

HIST 6950 - Selected Topics (1 to 4 Credit Hours)

Content of course varies.

Lecture Hours: 1 to 4

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Independent Study,Directed Study (one-to-one),Asynchronous Instruction,Practice Teaching,Internship/Practicum

BIOL 2252H - Honors: Anatomy and Physiology II (3 Credit Hours)

This lecture course is the second course in a two-semester sequence designed to explore the biological and chemical processes underlying the structure and function of the human body at the cellular, tissue, organ, and whole-body level. Topics to be covered include, but are not limited to, the cardiovascular, endocrine, lymphatic and immune, respiratory, digestive, urinary, and reproductive systems. Metabolism and fluid, electrolyte, and acid-base balance will also be covered. This is an Honors course.

Prerequisite(s): BIOL 2251 >= C or BIOL 2251H >= C

Corequisite(s): BIOL 2252L

Lecture Hours: 3 **Lab Hours:** 0 **Contact Hours:** 3

Grade Mode: Normal (A,B,C,D,F)

Course Level Restrictions: Honors Program **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Unsupervised Lab/Clinic; Supervised Lab/Clinic; Unsupervised Lab/Clinic; Asynchronous Instruction; Lecture/Supervised Lab/Clinic

HONR 1900 - Honors: Contemporary Issues (3 Credit Hours)

An interdisciplinary exploration of an important issue or theme at a level consistent with freshman or sophomore honors standing. Variable topics. Topic chosen by student/faculty committee. Prerequisite(s): Admission to the Honors Program or permission of the Honors Program Committee. Freshman or sophomore status.

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Freshman-Semester, Sophomore-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Practice Teaching,Internship/Practicum,Thesis

HONR 2950 - Selected Topics (3 Credit Hours)

A variable topics honors course that allows faculty to experiment with innovative lower division course offerings. These courses will be approved by the faculty member's department and by the Honors Committee. These courses can, with the approval of the department or departments responsible for core offerings, count in the core by course substitution. Prerequisite(s): Admission to the Honors Program or permission of the Honors Program Committee.

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

HONR 2999H - Honors: Project Proposal (0 to 1 Credit Hour)

A mentored project wherein students work closely with honors program leadership and a faculty panel to develop a suitable topic for an honors thesis and compose a thesis proposal that describes the project to be undertaken, the academic or artistic significance of the project, and the methods and procedures to be followed. All members of the panel must approve this proposal before the student may begin HONR 3999H: Honors: Thesis Prospectus. Hours credit determined by honors advisor and student.

Lecture Hours: 0 to 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Sophomore-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Thesis

HONR 3900H - Honors: Breaking Boundaries (2 to 3 Credit Hours)

An interdisciplinary and/or multicultural seminar which aims to cross boundaries between the disciplines and/or between cultures within the United States or within the world. The course provides an in-depth examination of variable selected topics at a level consistent with junior or senior honors standing. Topic chosen by student/faculty committee. Prerequisite(s): Junior or senior status and (1) admission to the Honors Program or (2) permission of the Honors Program committee.

Lecture Hours: 2 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

HONR 3999H - Honors: Thesis Prospectus (1 Credit Hour)

A directed project wherein the student works closely with an honors advisor, usually in their major department, to develop an acceptable honors thesis proposal. The proposal will include a description of the proposed honors project: its purpose, its extent, and its expected outcome; an assessment of materials needed and available for the proposed project; a calendar for work on the proposed thesis. The finished proposal will be submitted to the Honors Committee for comment and approval.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit, In Progress

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Thesis

HONR 4000H - Honors Thesis (2 to 3 Credit Hours)

A directed project wherein an individual works closely with an honors advisor, usually in their major department, to develop an acceptable honors thesis based on an approved thesis proposal designed in HONR 3999H. Depending on the field in which the work is being done, an honors thesis may take a variety of forms: e.g. traditional library research, an original piece of quantitative or qualitative research, a critical or appreciative essay, an exhibit or performance accompanied by a reflective, analytic essay, a substantial work of

fiction or poetry, or an analysis growing out of an internship. The thesis will be reviewed and discussed with members of a panel established by the Honors Committee who will share their comments and recommendations with the writer and advisor. The evaluation of the thesis and the awarding of credit are the responsibility of the advisor. Credit hours are determined on a case-by-case basis by honors advisor, department chair, and Honors panel chair.

Prerequisite(s): HONR 3999H >= C

Lecture Hours: 2 to 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit, In Progress

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Thesis **Schedule Type (Additional):** Lecture, Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction

HONR 4500H - Honors Capstone (1 Credit Hour)

An integrative course providing a vehicle for self-assessment and for program-assessment. Variable content defined by the graduating honors students. Provides opportunity for possible presentation of honors thesis and mentoring of other honors students.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

HUMN 2010 - Human Experience and Meaning (3 Credit Hours)

This course examines how significant forms of human expression relate to the beliefs and values of the culture that produced them and the broader human quest for meaning. This examination may include works of art, literature, music, film, philosophy, or sacred texts and rituals. Students learn to interpret the form and content of these expressions as contributions to a broader discussion—both within and among different cultures—about purpose, meaning, and value in the human experience.

Core IMPACTS Requirement(s) Satisfied: Arts, Humanities, and Ethics (Humanities)

Lecture Hours: 3

Repeatability: May be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

HUMN 2010H - Honors Human Experience and Meaning (3 Credit Hours)

This course examines how significant forms of human expression relate to the beliefs and values of the culture that produced them and the broader human quest for meaning. This examination may include works of art, literature, music, film, philosophy, or sacred texts and rituals. Students learn to interpret the form and content of these expressions as contributions to a broader discussion—both within and among different cultures—about purpose, meaning, and value in the human experience. This is an honors course.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group, Asynchronous Instruction

HUMN 2950 - Selected Topics (1 to 3 Credit Hours)

A variable-content interdisciplinary course which exploits the approach of two or more academic disciplines to explore topics of interest to lower-division undergraduate students.

Prerequisite(s): ENGL 1102 >= C or ENGL 1102H >= C or ENGL 1114H >= C

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

HUMN 4950 - Selected Topics (1 to 3 Credit Hours)

Variable topics focusing on (1) the intellectual and aesthetic movements of a particular period or culture; (2) critical-theoretical approaches to the study of literature, music, and art; and (3) interdisciplinary topics in the Humanities.

Lecture Hours: 0 to 3 **Lab Hours:** 0 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

IBTS 5601 - Indications-Based Treatment Solutions Seminar (0 to 1 Credit Hour)

Advanced treatment planning concepts will be presented to senior students.

Lecture Hours: 0 to 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Continuing Progress Courses

Major Restrictions: Advanced Standing DMD

Schedule Type (Primary): Lecture

RINF 5000 - Infectious Disease (27 Credit Hours)

Lecture Hours: 25 **Contact Hours:** 24

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Internship/Practicum

ILIT 1500 - Introduction to Information Literacy (3 Credit Hours)

Introduction to information literacy introduces students to information literacy concepts and practices relevant to academic and professional success. These concepts include understanding information in the twenty-first century, using communication and information technology to find information sources, evaluating information sources of all kinds, creating information, and communicating information in different modalities. Students will be exposed to both theoretical concepts and technical skills related to information literacy, with a focus on critical thinking and self-development.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

MINF 2201 - Microcomputer Applications (3 Credit Hours)

Hands-on introduction to microcomputer applications which support business functions; word processing, spreadsheets, graphics, and database management system. Also exposure to use of an operating system, electronic communication, and basic computing concepts. STEM GPA Eligible Course

Prerequisite(s): MATH 1001 >= D or MATH 1111 >= D or MATH 1113 >= D or MATH 1220 >= D or MATH 2011 >= D

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MINF 2650 - Principles of Data Management and Analysis (3 Credit Hours)

An introduction to information systems with a focus on the collection, manipulation and analysis of structured data. Students will utilize spreadsheets and relational databases to formulate solutions to common business challenges. In addition to fundamental data planning and modeling concepts, students will be introduced to data analysis and visualization techniques, as well as the use of structured programming to automate some data management tasks. STEM GPA Eligible Course

Prerequisite(s): MATH 1111 >= C or MATH 1113 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MINF 3618 - Business Introduction to Web Development (3 Credit Hours)

Business students will be exposed to appropriate format and page layout, adding and manipulating visuals, images, and rich media, creating a navigation scheme and linking together multiple pages and sites, creating basic forms, building interactive features, and publishing/maintaining web sites. Prerequisite(s): full admission into the Hull College of Business. Note: credit not allowed for both MINF 3618 and AIST 2220.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Hull College of Business

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

MINF 3625 - Project Management (3 Credit Hours)

Project management is the use of a standardized set of documented processes to control projects in an organization. This course addresses the life cycle of a project, the management of the project, how a project scope is written, how the time management is constructed and communicated.

Prerequisite(s): MINF 2201 >= D or MINF 2650 >= D or CSCI 1301 >= D

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

MINF 3650 - Information Systems (3 Credit Hours)

Develops a broad understanding of the role of information technology, systems, and resources, especially in business settings.

Prerequisite(s): MINF 2650 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MINF 4625 - Advanced Project Management (3 Credit Hours)

Provides the experiential training in the application of project management principles and practices by developing a capstone project and working on a team project. Both predictive and adaptive lifecycles are taught. Students are exposed to basic project management tools used in the planning and execution of scope, cost and schedule baselines. Students select a project at the beginning of the course

and submit a comprehensive project management plan at the end. Students will be prepared to obtain a Project Management Institute's certification at the end of the course.

Prerequisite(s): MINF 3625 >= C

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

MINF 4950 - Selected Topics in Management Information Systems (3 Credit Hours)

A course or directed study in management information systems. Content to be decided based upon instructor expertise and student interest. Prerequisite(s): Permission of instructor.

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Accounting, Business Administration, Finance, Information Technology, Management, Management Info Systems, Marketing

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

MINF 6620 - Management of Information Technology (3 Credit Hours)

Examines the issues of information technology, operations, competitive advantage, and leadership from management's perspective. Includes cross-functional issues, relationships with vendors and consultants, RFP's, contracts, hardware, software, communications, and ethics.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Degree Restrictions:** Doctor of Nursing Practice, Master of Business Admin

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MINF 6810 - Data Analytics for Strategic Decision Making (3 Credit Hours)

This course develops the analytical skills required for data-driven strategic decision-making. Students learn to translate business problems into structured analytical questions and apply descriptive, predictive, and prescriptive methods to generate insights from data.

Emphasis is placed on interpreting results, evaluating strategic alternatives, and communicating insights through effective data visualization and business intelligence tools. Through applied exercises and projects, students will develop the ability to transform data into actionable recommendations for organizational decision-making.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: College of Business **Major Restrictions:** Master of Business Administration

Schedule Type (Primary): 10- Lecture

MINF 6820 - Artificial Intelligence and Technology for Business (3 Credit Hours)

This course provides a hands-on exploration of artificial intelligence (AI) technologies and their application in business settings. Students will develop both conceptual understanding and practical skills related to core AI capabilities, including machine learning, generative AI, large language models, and prompt engineering. Emphasis is placed on how organizations leverage AI to enhance productivity, innovation, and decision-making across functional areas such as marketing, operations, finance, and strategy.

Through applied exercises, case discussions, and projects, students will engage in hands-on AI experimentation/prototyping using contemporary AI tools to solve real-world business problems, automate workflows, and generate actionable insights. The course also examines managerial, ethical, and governance considerations associated with AI, including issues of bias, privacy, and responsible implementation, preparing students to evaluate and design effective AI-enabled business solutions.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: College of Business **Major Restrictions:** MBA- Master of Business Administration

Schedule Type (Primary): 10- Lecture

MINF 6950 - Current Issues in MINF Systems (3 Credit Hours)

A variable content course individually designed to meet the needs, interests, and professional objectives in business administration.

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: MBA **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

IDSR 6040 - Orthodontic-Oral Maxillofacial Surgery Conference I (1 Credit Hour)

Orthodontic-Oral Maxillofacial Surgery Conference occurs monthly, normally on the third Thursday of each month. Cases are presented and discussed by residents and faculty. Additionally, Ortho/Orthognathic related didactic presentations/lectures are given.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

IDSR 6041 - Orthodontic-Oral Maxillofacial Surgery Conference II (1 Credit Hour)

Orthodontic-Oral Maxillofacial Surgery Conference occurs monthly, normally on the third Thursday of each month. Cases are presented and discussed by residents and faculty. Additionally, Ortho/Orthognathic related didactic presentations/lectures are given.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

IDSR 7001 - Esthetics and Ceramics Seminar (1 Credit Hour)

This is an interdisciplinary clinical seminar for dental residents in the AEGD, GPR and Prosthodontics advanced education certificate programs. The course is designed to enable residents to develop an in-depth knowledge and understanding of treatment planning and design of esthetic, fixed prosthodontic anterior dental restorations.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

IDSR 7002 - Esthetics and Ceramics Seminar (1 Credit Hour)

This is an interdisciplinary clinical seminar for dental residents in the AEGD, GPR and Prosthodontics advanced education certificate programs. The course is designed to enable residents to develop an in-depth knowledge and understanding of treatment planning and design of esthetic, fixed prosthodontic anterior dental restorations.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit, Normal

Schedule Type (Primary): Seminar - Small Group

IDSR 7009 - Periodontic – Prosthodontic Dental Implantology Seminar (1 Credit Hour)

This course is an interdisciplinary seminar for periodontic and prosthodontic postgraduate students that provides a thorough review and understanding regarding different aspects of dental Implant therapy. Presentations are developed and presented by each resident

every other week on selected topics associated with dental Implant therapy. Guest/faculty lectures on different related topics are included as well.

Lecture Hours: 1

Repeatability: May be repeated for credit up to four times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

IDSR 7032 - Periodontics/Pediatric Dentistry Seminar (1 Credit Hour)

This course is an interdisciplinary literature review seminar for periodontic and pediatric dentistry postgraduate students. Scientific literature pertinent to the clinical practice of both dental specialties is reviewed and discussed for the purpose of supporting evidence-based clinical practice. The residents are responsible for studying and discussing the literature on assigned topics.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

IDSR 7040 - Orthodontic-Oral Maxillofacial Surgery Conference III (1 Credit Hour)

Orthodontic-Oral Maxillofacial Surgery Conference occurs monthly, normally on the third Thursday of each month. Cases are presented and discussed by residents and faculty. Additionally, Ortho/Orthognathic related didactic presentations/lectures are given.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

IDSR 7041 - Orthodontic-Oral Maxillofacial Surgery Conference IV (1 Credit Hour)

Orthodontic-Oral Maxillofacial Surgery Conference occurs monthly, normally on the third Thursday of each month. Cases are presented and discussed by residents and faculty. Additionally, Ortho/Orthognathic related didactic presentations/lectures are given.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

IDSR 8001 - Esthetics and Ceramics Seminar (1 Credit Hour)

This is an interdisciplinary clinical seminar for dental residents in the AEGD, GPR and Prosthodontics advanced education certificate programs. The course is designed to enable residents to develop an in-depth knowledge and understanding of treatment planning and design of esthetic, fixed prosthodontic anterior dental restorations.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

IDSR 8002 - Esthetics and Ceramics Seminar (1 Credit Hour)

This is an interdisciplinary clinical seminar for dental residents in the AEGD, GPR and Prosthodontics advanced education certificate programs. The course is designed to enable residents to develop an in-depth knowledge and understanding of treatment planning and design of esthetic, fixed prosthodontic anterior dental restorations.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit, Normal

Schedule Type (Primary): Seminar - Small Group

IDSR 8008 - Esthetics and Function (1 Credit Hour)

This course is an interdisciplinary seminar for orthodontic, periodontic and prosthodontic residents. In this course, residents discuss and work together to treatment plan comprehensive cases, common to each specialty and involving functional and esthetic problems. Following presentation of the case, etiologic factors, prognosis, and treatment plans are discussed by the participants. Evaluation of the treatment plan options is conducted in group discussions with faculty and residents from each discipline. Presentations are critiqued and alternative therapy discussed by residents and faculty. Residents must support their diagnoses and treatment approaches with references from the scientific literature, and compare the results of their treatment with that reported previously in clinical trials. Emphasis is placed on a comprehensive analysis and sequencing of treatment from a prosthodontic, periodontic, and orthodontic standpoint.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

IDSR 8020 - Endodontics/Pediatric Dentistry Seminar (1 Credit Hour)

This course is an interdisciplinary seminar series for endodontic and pediatric dentistry postgraduate students provided every other fall semester. This course is designed to provide the resident with the instructional background necessary to diagnose and treat the pulpal problems of primary and young permanent teeth. The prevention and management of pulpal and periapical pathosis in the primary and young permanent dentitions is emphasized.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

IDSR 8040 - Orthodontic-Oral Maxillofacial Surgery Conference V (1 Credit Hour)

Orthodontic-Oral Maxillofacial Surgery Conference occurs monthly, normally on the third Thursday of each month. Cases are presented and discussed by residents and faculty. Additionally, Ortho/Orthognathic related didactic presentations/lectures are given.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

IDSR 8041 - Orthodontic-Oral Maxillofacial Surgery Conference VI (1 Credit Hour)

Orthodontic-Oral Maxillofacial Surgery Conference occurs monthly, normally on the third Thursday of each month. Cases are presented and discussed by residents and faculty. Additionally, Ortho/Orthognathic related didactic presentations/lectures are given.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

IDSR 9001 - Esthetics and Ceramics Seminar I (1 Credit Hour)

This is an interdisciplinary clinical seminar for dental residents in the AEGD, GPR and Prosthodontics advanced education certificate programs. The course is designed to enable residents to develop an in-depth knowledge and understanding of treatment planning and design of esthetic, fixed prosthodontic anterior dental restorations.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

IDSR 9002 - Esthetics and Ceramics Seminar II (1 Credit Hour)

This is an interdisciplinary clinical seminar for dental residents in the AEGD, GPR and Prosthodontics advanced education certificate programs. The course is designed to enable residents to develop an in-depth knowledge and understanding of treatment planning and design of esthetic, fixed prosthodontic anterior dental restorations.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit, Normal

Schedule Type (Primary): Seminar - Small Group

IDSR 9008 - Interdisciplinary Seminars: Esthetics and Function (1 Credit Hour)

This course is an interdisciplinary seminar for orthodontic, periodontic and prosthodontic residents. In this course, residents discuss and work together to treatment plan comprehensive cases, common to each specialty and involving functional and esthetic problems. Following presentation of the case, etiologic factors, prognosis, and treatment plans are discussed by the participants. Evaluation of the treatment plan options is conducted in group discussions with faculty and residents from each discipline. Presentations are critiqued and alternative therapy discussed by residents and faculty. Residents must support their diagnoses and treatment approaches with references from the scientific literature, and compare the results of their treatment with that reported previously in clinical trials. Emphasis is placed on a comprehensive analysis and sequencing of treatment from a prosthodontic, periodontic, and orthodontic standpoint.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

IDSR 9040 - Orthodontic-Oral Maxillofacial Surgery Conference VII (1 Credit Hour)

Orthodontic-Oral Maxillofacial Surgery Conference occurs monthly, normally on the third Thursday of each month. Cases are presented and discussed by residents and faculty. Additionally, Ortho/Orthognathic related didactic presentations/lectures are given.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

IDSR 9041 - Orthodontic-Oral Maxillofacial Surgery Conference VIII (1 Credit Hour)

Orthodontic-Oral Maxillofacial Surgery Conference occurs monthly, normally on the third Thursday of each month. Cases are presented and discussed by residents and faculty. Additionally, Ortho/Orthognathic related didactic presentations/lectures are given.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

ISCI 2001 - Life/Earth Sciences for Elementary Education (3 Credit Hours)

Provides early childhood education majors with hands-on experiences in the life sciences and earth sciences that can be incorporated into the P-4 classroom. Emphasis is placed on experimentation and activities, their use in the understanding of concepts in the life and earth sciences, and their direct application in the P-4 classroom.

Prerequisite(s): MATH 1111 $\geq$ C or MATH 1113 $\geq$ C or MATH 1001 $\geq$ C

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic

ISCI 2002 - Foundations of Physical Science (3 Credit Hours)

A Field of Study course for Early Childhood Education majors that focuses upon the most fundamental aspects of physics and chemistry. Conceptual understanding through exploration and experimentation is employed to develop long-term connections to the formulaic components of the physical sciences.

Prerequisite(s): MATH 1111 $\geq$ C or MATH 1113 $\geq$ C or MATH 1001 $\geq$ C

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Science Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 40

INTS 4970 - Integrated Studies Culminating Experience (3 Credit Hours)

This course serves as a culminating experience for students majoring in Integrated Studies. The course is intended to help students reflect on the interdisciplinary academic pathway they have chosen. By exploring the challenges and advantages presented by earning an interdisciplinary degree, students will learn how to effectively equip themselves in a professional manner as they head toward graduation and a future career. The integrated studies graduation portfolio items are embedded within the assignments for this course.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Senior-Semester **Program Restrictions:** 1BA-INTS-BA-Integrated Studies

Schedule Type (Primary): Independent Study **Schedule Type (Additional):** Asynchronous Instruction

KNHS 2100 - Introduction to Nutrition (3 Credit Hours)

This course provides an introduction to the science of nutrition with emphasis on essential nutrients, needs throughout the life span, nutritional assessment of individuals and populations, nutritional aspects of disease, food policies, regulatory agencies, and current issues regarding these topics.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

KNHS 2200 - CPR, First Aid and Sport Safety (1 Credit Hour)

This course introduces students to adult, infant and child CPR; First Aid, automated external defibrillation training, and sports related injury prevention.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

KNHS 2300 - Introduction to Medical Terminology (3 Credit Hours)

This course will enable students to identify and explain the function of specific word parts; describe how medical compound terms (words) are constructed; interpret and understand medical course content, literature, records, and research from a wide variety of academic disciplines.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

KNHS 2350 - Health and PE at Early Childhood (2 Credit Hours)

This course presents the Early Childhood teacher education candidate with a guide for teaching health and physical education. In addition, this course may be used as a supplement for implementing a sound program.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

KNHS 3100 - Introduction to Kinesiology and Health Science (3 Credit Hours)

An overview of the foundations of the various dimensions of kinesiology and health science in the concentrations of exercise and sports science, pre-physical therapy, health science, nutrition, and teaching health and physical education. Course will include exposure to ethical professional behavior.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

KNHS 3210 - Motor Behavior (3 Credit Hours)

The theory and application of motor skill development and the behavioral characteristics of participants in motor activities will be discussed.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

KNHS 3220 - Structural Kinesiology (3 Credit Hours)

A study of the structural basis underlying human motion, with emphasis on the skeletal, muscular, and nervous systems. An analysis of the mechanical principles which apply to the techniques used in physical activity, sport, and dance, including principles of kinetics and kinematics.

Prerequisite(s): BIOL 2111 >= C or BIOL 2112 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Health and Physical Education, Kinesiology

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

KNHS 3300 - Practicum in Kinesiology (3 Credit Hours)

The purpose of the practicum is to provide the student hands-on/real-world experience in their chosen field of interest. Possible practicum experiences include, but are not limited to: working in a clinical setting such as physical therapy, hospital, or occupational therapy, conducting research with faculty, community outreach and corporate wellness, or working in a fitness center. All practicum locations must be pre-approved by an advisor and site coordinator.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Major Restrictions: Kinesiology

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

KNHS 3310 - Sport and Exercise Psychology (3 Credit Hours)

This course examines physical activity as a health behavior and health-related dimension of physical fitness. The association between physical activity and fitness are analyzed. Other topics include health habits, chronic diseases, the behavior physiology of stress and mental health. Applications of psychology and exercise are examined.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

KNHS 3311 - Sexuality, Gender, and Health in the Professional Workplace (3 Credit Hours)

This course is designed to introduce the student to the multifaceted study of human sexual behavior and the impact related issues have on the professional environment. Emphasis will be on the impact these behaviors have both professionally and ethically on personnel in health, fitness, and education-based careers.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

KNHS 3312 - Current Issues in Health and Diseases (3 Credit Hours)

This course will focus on medically-related issues associated with kinesiology-based professions. Discussions will include chronic and acute disease states, pharmacological issues, special populations, and musculoskeletal conditions and how they relate to clients, students, and co-workers.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

KNHS 3313 - Teaching and Assessing Physical Activity and Fitness (3 Credit Hours)

Candidates will learn about developmentally appropriate fitness education and assessment for students at all grade levels. The purpose of the course is to develop skills and knowledge related to teaching and assessing physical activity and fitness in K-12 public school settings and other movement-related contexts.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Health and Physical Education, Kinesiology **Student Class Restrictions:** Freshman-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

KNHS 3314 - Teaching and Coaching Team Sports and Lifetime Activities (3 Credit Hours)

The intent of this course is to develop teacher candidates' and perspective coaches' motor skill competencies, content knowledge, and pedagogic techniques for selected team sports and recreational activities.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Health and Physical Education **Student Class Restrictions:** Junior-Semester, Sophomore-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group, Asynchronous Instruction

KNHS 3315 - Teaching and Coaching Individual and Dual Sports and Lifetime Activities (3 Credit Hours)

The intent of this course is to develop teacher candidates' and perspective coaches' motor skill competencies, content knowledge, and pedagogic techniques for selected individual, dual, and recreational activities.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Health and Physical Education, Kinesiology

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

KNHS 3316 - Movement and Dance Methods (2 Credit Hours)

The physical education teacher candidate is introduced to the concepts and qualities of human movement, instructional strategies for teaching dance, rhythms, stunts and tumbling, educational games and gymnastics.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Health and Physical Education, Kinesiology

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

KNHS 3319 - Exercise Physiology (3 Credit Hours)

This course is an in-depth study of the physiology of exercise. Emphasis will be placed on energy metabolism during exercise and its relationship to the circulatory, pulmonary, and neuroendocrine systems.

Prerequisite(s): BIOL 2111 >= C or BIOL 2112 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

KNHS 3321 - Foundations of Teaching Sport and Physical Education (3 Credit Hours)

This course is the initial pedagogy experience for teacher education candidates and kinesiology-related majors interested in teaching physical education and/or coaching sports. Various teaching styles and skills necessary to develop and maintain an effective learning environment will be examined.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Health and Physical Education **Student Class Restrictions:** Freshman-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

KNHS 3343 - Elementary Methods of Physical Education and Health (3 Credit Hours)

The purpose of this course is to enable the teacher education candidate to create a variety of learning opportunities for students that will be developmentally appropriate for children.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Health and Physical Education, Kinesiology

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

KNHS 3420 - Instructional Strategies in Health Science (3 Credit Hours)

This course is designed to offer the student a theoretical and practical introduction to the discipline of health science education as a tool in both the academic and community setting.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

KNHS 3430 - Understanding Behavioral Changes Towards Healthy Lifestyles (3 Credit Hours)

This course examines the psychology of physical activity. Associations between physical activity and health habits, chronic disease, mental health and stress are explored. An emphasis is placed on behavioral skills associated with the adoption of a physically active lifestyle.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

KNHS 3440 - Health Promotion Program Design and Assessment (3 Credit Hours)

This course will focus on the theory and processes of planning, implementing, and evaluating health promotion programs. This course presents methods for the identification of population-based needs for public health intervention, development of programs to meet those needs, and evaluation of the effectiveness of these public health interventions. The course integrates several knowledge and skill areas including: research methods, statistics, proposal writing, budget planning, project management, and program evaluation.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

KNHS 3640 - Applied Community Assessments (3 Credit Hours)

Introduces the concepts of applied assessments and screenings that can be used in community, school, and other public settings. These assessments are an important component of preventive healthcare and play an important role in informing about an individual's overall well-being. Students learn through lectures and practical technique training how to conduct basic assessments.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

KNHS 4210 - Fitness Assessment and Exercise Prescription (3 Credit Hours)

This course is an introduction to basic principles of fitness and wellness. The measurement prescription and evaluation of health-related factors of physical fitness are critical elements. Practical experience in fitness and wellness programming will be an integral part of this course.

Prerequisite(s): BIOL2111 >= C and BIOL2112 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

KNHS 4225 - Personal Training Instruction (3 Credit Hours)

This course is designed to introduce students to concepts of integrated exercise training including basic sciences, exercise technique and training, program design, and professional development and responsibility based on the National Academy of Sports Medicine's (NASM) Optimum Performance Training model. At completion of the course, students may take the NASM certified personal trainer exam at a reduced price.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

KNHS 4230 - Biomechanics (3 Credit Hours)

Provides an understanding of the basic biomechanical principles of movement and their application to sports and human performance.

Prerequisite(s): KNHS 3220 >= C and BIOL 2251 >= C and BIOL 2252 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction

KNHS 4240 - Strength Training and Conditioning (3 Credit Hours)

A study of the fundamental concepts of human physiology and exercise physiology as they apply to programs of physical conditioning, training, and physical fitness. Theories, current research, and laboratory techniques for assessing human physiological responses to exercise, physical training, health-related physical fitness, and sport performance will be studied. This class is designed as a preparation for the Certified Strength and Conditioning Specialist (CSCS) exam.

Prerequisite(s): BIOL 2251 >= C and BIOL 2252 >= C and (KNHS 3319 >= C or KNHS 3220 >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1BSK-KINES-BSK-Kinesiology

Schedule Type (Primary): Lecture

KNHS 4300 - Health Literacy (3 Credit Hours)

Health literacy is an essential part of health services to ensure proper use of services, care, and maintenance of health. Problems with health literacy effect all people and it is important for individuals in healthcare to take an active role in health literacy decisions. This course is designed to examine the assessment and application of health literacy best practices through lectures, discussions, project development, and student presentations.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

KNHS 4310 - Global Health and Health Disparities (3 Credit Hours)

This course will explore global health issues and related concerns regarding health disparities. Students will be able to better relate local and national health and cultural topics to worldwide concerns. The course will incorporate the rationale for and modes of intervention to improve global health and reduce health disparities.

Prerequisite(s): KNHS 3312 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture

KNHS 4311 - Epidemiology (3 Credit Hours)

The purpose of this course is to introduce the participant to the study of human disease and injury in terms of distribution, determinants, and etiology.

Prerequisite(s): BIOL 2111 >= C and BIOL 2112 >= C and KNHS 3312 >= C and (MATH 1401 >= C or MATH 1401H >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

KNHS 4312 - Biostatistics (3 Credit Hours)

The purpose of this course is to introduce the student to the theoretical and practical use of statistics as a tool utilized in the collection, analysis, and interpretation of mortality and morbidity data.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

KNHS 4313 - Community and Public Health (3 Credit Hours)

This course helps students become effective public and community health educators by increasing knowledge in both public and community health areas and enhancing individual skills and competencies essential to this career field. The course provides an overview of the organization, role, and structure of community health agencies, with a specific emphasis on health education services. In addition, the course will cover the important role of national and global governance in public health.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

KNHS 4320 - Principles of Exercise Therapy (3 Credit Hours)

This course will deal specifically with fitness and the factors involved in the measurements, prescription, and evaluation of adult populations. The rehabilitation of athletic and work-related injuries will be discussed. Concepts will be reinforced through laboratory experiences.

Prerequisite(s): (BIOL2111 >= C or BIO111 >= C) and (BIOL2112 >= C or BIO112 >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

KNHS 4330 - History and Philosophy of Kinesiology (3 Credit Hours)

The history of kinesiology will be presented with emphasis on the implications for modern kinesiology and sport. Critical thinking skills, problem solving skills, and ethical decision making will be stressed.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

KNHS 4340 - Measurement and Evaluation in Kinesiology and Health Science (3 Credit Hours)

This course teaches how to collect, organize and analyze numerical data to find solutions to problems. Subjects of interest studied in this course include an understanding of how to measure knowledge, physical performance, and affective behavior.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

KNHS 4342 - Physical Education for Middle and Secondary School Students (3 Credit Hours)

Teacher education candidates will learn about developmentally appropriate physical education for youth in middle and high school (grades 6-12).

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Health and Physical Education **Student Class Restrictions:** Junior-Semester, Sophomore-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

KNHS 4350 - Nutrition in Health and Human Performance (3 Credit Hours)

Examines the science of nutrition as related to health, disease, and human performance. Special emphasis on how nutrition impacts on development of human disease and possible prevention, and the unique nutritional requirements of athletes. Prerequisite(s): Permission of the instructor and Senior standing.

Prerequisite(s): KNHS 2100 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction

KNHS 4360 - Assessment and Differentiation in Physical Education (3 Credit Hours)

This course introduces foundations and techniques for candidates to structure learning environments that address the variety of learning styles, interests, and abilities found within a physical education classroom. In addition, the process of assessment and reflection in physical education is examined in detail.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Lecture/Unsupervised Lab/Clinic, Independent Study, Asynchronous Instruction

KNHS 4370 - Stress and Emotional Health (3 Credit Hours)

Stressors and their subjective experience – stress – are a part of everyday life, whether minor or major, acute or chronic. How one copes with stress has substantial influence on one's physical, emotional, cognitive, and interpersonal functioning. This course is designed to provide in-depth study of the field of stress and coping through lectures, discussions, student presentations, and the practice of stress management exercises.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

KNHS 4380 - Substance Abuse and Health Education (3 Credit Hours)

Students will examine substance abuse and its connection with health education, including alcohol and other drugs, smoking, compulsive gambling, and sexual addictions. There will also be a focus on diversity in addicted populations, the business of drugs, and

prevention.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

KNHS 4400 - Team Training (3 Credit Hours)

This introductory course is designed to provide theoretical knowledge and practical skills in preparation for working with athletic teams in a training setting. Topics include guidelines for instructing safe, effective, and purposeful exercise; essentials of the coach–athlete relationship; foundational principles of strength and conditioning in a team setting; proper use of equipment and training modalities; and strategies for designing and implementing weight room activities for groups. The team training specialist's professional role is also explored. This course does not prepare students for the NSCA-CSCS certification exam.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

KNHS 4410 - Human-Centered Practice in Kinesiology (3 Credit Hours)

Analyzes the complexities of working with individuals and communities in kinesiology practice. Emphasis is placed on examining the factors that shape health, performance, and participation, while developing strategies to implement responsible and effective professional approaches across varied contexts.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

KNHS 4450 - Practicum in Sports Coaching (3 Credit Hours)

The practicum is a short-term, field-based experience designed for students with an interest in sports coaching. It emphasizes intentional learning objectives that align with each student's personal and professional development in coaching and athlete support. Over the course of the semester, students will observe and shadow an experienced coach, gaining practical insight into leadership, communication, training methods, and team management. Each student is required to complete a minimum of 90 hours. This practicum is an important step in fostering students' interest and skills in coaching by providing valuable real-world exposure and opportunities to apply classroom knowledge in practice.

Prerequisite(s): SPMT 3500>=C and KNHS 3400>=C and KNHS 4400>=C

Other Hours: 3 **Contact Hours:** 3

Repeatability: NR - Not Repeatable

Grade Mode: S- Satisfactory/Unsatisfactory

Department Restrictions: Department of Kinesiology **Program Restrictions:** Certificate of Less than One Year in Sports Coaching

Schedule Type (Primary): 81- Internship/Practicum **Schedule Type (Additional):** 57- Asynchronous Instruction

KNHS 4950 - Selected Topics in Kinesiology (1 to 6 Credit Hours)

The content of this course is designed to meet the needs and interests of students who are assigned studies in selected areas of health and physical education related topics. Variable from one to six credit hours. Prerequisite(s): Permission from department.

Lecture Hours: 1 to 6

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

KNHS 4960 - Internship in Kinesiology and Health Promotion (12 Credit Hours)

The purpose of the internship is to provide the student with extensive experience in the health, fitness, and kinesiology-related professions. The internship will further the development of professional and educational competence and provide students an opportunity to apply the knowledge/skills learned from their coursework to their chosen profession. Possible internship experiences include, but are not limited to: working in a clinical setting such as physical therapy, hospital, or occupational therapy, conducting research with faculty, community outreach and corporate wellness, or working in a fitness center. All internship locations must be pre-approved by an advisor and site coordinator.

Lecture Hours: 12

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Major Restrictions: Kinesiology **Program Restrictions:** 1BS-HPRO-BS-Health Promotion, 1BSK-KINES-BSK-Kinesiology

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

KNHS 4970 - Health and Physical Education Student Teaching (15 Credit Hours)

The purpose of the apprenticeship teaching experience is to develop the essential professional knowledge and skills of teacher education candidates who wish to enter the profession of teaching physical education and health. Prerequisite(s): Completion of all required health and physical education teacher education certification courses.

Lecture Hours: 15

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Health and Physical Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

KNHS 6311 - Behavioral Aspects of Physical Activity (3 Credit Hours)

This course examines physical activity as a health behavior and health-related dimension of physical fitness. Associations between physical activity and fitness with health habits, chronic diseases, the behavior physiology of stress, and mental health are examined.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1MS-KINES-MS-Kinesiology, 1MS-KINW-MS-Kinesiology Web

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

KNHS 6312 - Cardiovascular Response to Exercise (3 Credit Hours)

This course will deal specifically with the cardiovascular function of the human body during physical exertion. Concepts will be reinforced through laboratory experiences.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1MS-KINES-MS-Kinesiology, 1MS-KINW-MS-Kinesiology Web

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

KNHS 6313 - Principles of Strength and Conditioning (3 Credit Hours)

This course examines the principles of strength training. Included topics are the physiological responses to training as well as the practical considerations for developing a strength training program.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1MS-KINES-MS-Kinesiology, 1MS-KINW-MS-Kinesiology Web

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

KNHS 6314 - Biomechanics (3 Credit Hours)

The purpose of this course is to provide students with an understanding of the basic biomechanical principles of movement and their application to sports and human performance.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1MS-KINES-MS-Kinesiology, 1MS-KINW-MS-Kinesiology Web

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

KNHS 6321 - Foundations of Teaching Sport and Physical Education (3 Credit Hours)

This course is the initial pedagogy experience for teacher education candidates and kinesiology-related majors interested in teaching physical education and/or coaching sports. Various teaching styles and skills necessary to develop and maintain an effective learning environment will be examined.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1MAT-Master of Arts in Teaching, 1MS-KINES-MS-Kinesiology, 1MS-KINW-MS-Kinesiology Web

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction, Practice Teaching

KNHS 6331 - Organization and Administration of Physical Education and Athletic Programs (3 Credit Hours)

This course will provide the student with an understanding of personnel administration, physical education and athletic objectives, and program administration.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1MS-KINES-MS-Kinesiology, 1MS-KINW-MS-Kinesiology Web

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

KNHS 6339 - Trends and Issues in Kinesiology and Health Sciences (3 Credit Hours)

The purpose of the course is to offer the graduate student an exploration of kinesiology and health science topics which, during the offering of the course, is under great discussion and contemplation within the professional community. Topics may differ between semesters.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1MS-KINES-MS-Kinesiology, 1MS-KINW-MS-Kinesiology Web

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

KNHS 6342 - Physical Education for Middle and Secondary School Students (3 Credit Hours)

Candidates will learn about developmentally appropriate physical education for youth in middle and high school (grades 6-12). This course is designed to provide the teacher education candidate with the ability to plan and implement an effective middle school physical education program.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1MAT-Master of Arts in Teaching, 1MS-KINES-MS-Kinesiology, 1MS-KINW-MS-Kinesiology Web

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Practice Teaching

KNHS 6343 - Elementary Methods of Physical Education and Health (3 Credit Hours)

Teacher education candidates will learn about developmentally appropriate physical education for students in elementary school. The purpose of this course is to enable the teacher education candidate to create a variety of learning opportunities for diverse students that will be developmentally appropriate for children in grades K-12.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1MAT-Master of Arts in Teaching, 1MS-KINES-MS-Kinesiology, 1MS-KINW-MS-Kinesiology Web

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Practice Teaching

KNHS 6352 - Athletic Injuries, Care, and Prevention (3 Credit Hours)

This course is designed to provide the student an introduction to the recognition, care, and prevention of athletic injuries from a coach's perspective. It involves fulfilling the role of being a competent first responder to athletic injuries and illness in a variety of athletic contexts.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1CERG-SPCO-Post Bac Cert in Sports Coach, 1MS-KINES-MS-Kinesiology, 1MS-KINW-MS-Kinesiology Web

Schedule Type (Primary): Asynchronous Instruction

KNHS 6353 - Taking the Athlete to the Next Level (3 Credit Hours)

This course is designed to expose coaches to the psychological variables that have an effect on athletic performance and to equip them with the knowledge of NCAA rules and regulations to better support youth athletes transitioning from the recreation, club, and/or high school levels to competitive collegiate athletics.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1CERG-SPCO-Post Bac Cert in Sports Coach, 1MS-KINES-MS-Kinesiology, 1MS-KINW-MS-Kinesiology Web

Schedule Type (Primary): Asynchronous Instruction

KNHS 6354 - Foundations and Ethics of Sports Coaching (3 Credit Hours)

This course is a comprehensive introduction to the sports coaching profession. Foundational principles and practical applications associated with various dimensions of coaching are thoroughly examined. In addition, numerous ethical issues and moral dilemmas that are integral to a wide range of coaching contexts are presented and explored.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1MS-KINES-MS-Kinesiology, 1MS-KINW-MS-Kinesiology Web

Schedule Type (Primary): Asynchronous Instruction

KNHS 6360 - Assessment and Differentiation in Physical Education (3 Credit Hours)

This course introduces foundations and techniques for candidates to structure learning environments that address the variety of learning styles, interests, and abilities found within a physical education classroom. In addition, the process of assessment and reflection in physical education is examined in detail both theoretically and in practice.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1MAT-Master of Arts in Teaching, 1MS-KINES-MS-Kinesiology, 1MS-KINW-MS-Kinesiology Web

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Practice Teaching

KNHS 6400 - Internship in Kinesiology and Health Science (3 Credit Hours)

This experience is designed to offer the graduate student a pragmatic and experiential exposure to the fields of kinesiology and/or health science. Prerequisite(s): Permission of the instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1MS-KINES-MS-Kinesiology, 1MS-KINW-MS-Kinesiology Web

Schedule Type (Primary): Internship/Practicum

KNHS 6411 - Motor Control and Learning (3 Credit Hours)

This course focuses on theory and application of motor skill development and the behavioral characteristics of participants in motor activities will be discussed. Topics include performance and skill, attentional factors, motivational factors, stress, and perceptual motor learning and classical research in motor learning.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1MS-KINES-MS-Kinesiology, 1MS-KINW-MS-Kinesiology Web

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

KNHS 6413 - Statistics and Evaluation in Kinesiology (3 Credit Hours)

A study of basic statistics and other issues applied to the reliability and validity of cognitive, psychological, and physiological assessments of human movement.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1MS-KINES-MS-Kinesiology, 1MS-KINW-MS-Kinesiology Web

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

KNHS 6430 - Advanced Health and Wellness (3 Credit Hours)

This purpose of this course is to offer the graduate student an in-depth survey of health science. Six content areas will be reviewed: physical, mental, social, spiritual, emotional, and environmental health. Current trends and issues specific to the discipline will also be explored.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1MS-KINES-MS-Kinesiology, 1MS-KINW-MS-Kinesiology Web

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

KNHS 6431 - Advanced Application of Nutrition in Health and Human Performance (3 Credit Hours)

This course will provide essential updates to current standards related to nutrition in health, disease and human performance. Special emphasis on applying principles to athletes in specific environments.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1MS-KINES-MS-Kinesiology, 1MS-KINW-MS-Kinesiology Web

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

KNHS 6432 - Physiological Responses to Exercise (3 Credit Hours)

The physiological effects of acute and chronic exercise on metabolism, nervous, cardiorespiratory and muscular systems. Students gain the knowledge and skills necessary for conducting diagnostic and functional cardiopulmonary evaluations and conditioning programs for healthy and special populations. The structure of the course consists of lecture, group discussion, and hands-on experience in the laboratory.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1MS-KINES-MS-Kinesiology, 1MS-KINW-MS-Kinesiology Web

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

KNHS 6442 - Applied Research Project (3 Credit Hours)

This course is designed to allow the student to conduct an applied research project under the supervision of a faculty member. After conducting the study, the student will prepare a written research report in the form of a manuscript.

Lecture Hours: 3

Repeatability: May be repeated for credit up to three times.

Grade Mode: Normal, Audit, In Progress

Program Restrictions: 1MS-KINES-MS-Kinesiology, 1MS-KINW-MS-Kinesiology Web

Schedule Type (Primary): Thesis

KNHS 6950 - Selected Topics (1 to 3 Credit Hours)

The content of this course is intended to meet the needs and interests of graduate students in selected areas of kinesiology and health science. Prerequisite(s): Permission of the instructor.

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1MAT-Master of Arts in Teaching, 1MS-KINES-MS-Kinesiology, 1MS-KINW-MS-Kinesiology Web

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

LDRS 2000 - Introduction to Leadership and Professionalism (3 Credit Hours)

Introduces the concepts and relationships between leadership, engagement, teamwork, and professionalism. Through a variety of readings, experiences, and assignments, the course fosters successful leadership competencies. It develops students who think critically, implement creative problem solving, communicate and collaborate effectively, synthesize skills from multiple aspects and sources, be trusted with responsibility, respond constructively to feedback from peers and professors, and inspire others to work together toward common goals, for example, the Community Caring Project.

Pre- or Corequisite(s): INQR 1000 >=C

Lecture Hours: 3

Repeatability: May be repeated for credit once.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Seminar **Schedule Type (Additional):** Small Group, Asynchronous Instruction

LDRS 3000 - Experience in Leadership (1 to 3 Credit Hours)

This course is for students pursuing the Certificate of Leadership (COL). In this active learning course students conduct 120 leadership hours (40 hours for each credit hour) on or off campus in a pre-approved site in a leadership role such as teaching, tutoring, coaching, or holding an officer role in an organization. Reflective assignments are provided by the instructor. The Leadership Advisor must provide pre-approval for the experience and permission to enroll.

Prerequisite(s): LDRS 2000 >= C

Contact Hours: 1 to 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Program Restrictions: 1CER0-LEDR-Certificate in Leadership

Schedule Type (Primary): 57- Asynchronous Instruction **Schedule Type (Additional):** 20- Seminar Small Group

LDRS 4960 - Undergraduate Internship in Leadership (0 to 3 Credit Hours)

This course is an option for students who are pursuing the Certificate of Leadership and conducting an internship on or off campus at a pre-approved site. Students must take on a position (e.g., program developer, community event organizer) for an approved organization with a Memorandum of Understanding (MOU) with the university. For each 40 hours of supervised work, the student may earn up to 1 credit, with a maximum of 3 credits. Internships should require an applied working experience offering professional development and or leadership opportunities.

Prerequisite(s): LDRS 2000 >= C or MILS 2011 >= C or MILS 2021 >= C

Contact Hours: 0 to 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Course Level Restrictions: Undergraduate Semester **Program Restrictions:** 1CER0-LEDR-Certificate in Leadership

Schedule Type (Primary): Internship/Practicum

LDRS 4999 - Leadership Capstone (0 to 3 Credit Hours)

A required course for students pursuing the Certificate of Leadership (COL). Students reflect on leadership theory and styles witnessed in their own experiences and give oral presentations to complete the certificate. Final assessments for the COL are administered through this course. A graduation application for the COL should be completed prior to enrolling in this course.

Prerequisite(s): LDRS 2000 >= C or MILS 2011 >= C or MILS 2021 >= C

Lecture Hours: 0 to 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

College Restrictions: Academic Affairs **Major Restrictions:** LEDR- Leadership **Department Restrictions:** Leadership Program

Degree Restrictions: CER0-Certificate of Less than One Year In Leadership **Program Restrictions:** Certificate of Less than One Year in Leadership

Schedule Type (Primary): Asynchronous Instruction **Schedule Type (Additional):** Seminar-Small Group

LING 4410 - Phonetics and Phonology (3 Credit Hours)

An advanced introduction to phonetics and phonology, using data from a variety of languages. Topics include: articulatory phonetics, phonetic transcription, phonological theory, stress and intonation, and acoustic phonetics.

Prerequisite(s): ENGL 1102 >= C or ENGL 1102H >= C or ENGL 1114H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

LING 4500 - Second Language Acquisition (3 Credit Hours)

This course introduces second language acquisition from the linguistic, cognitive, and social perspectives, aiming at helping students understand and solve issues in second language learning and teaching.

Prerequisite(s): ENGL 1102 >= C or ENGL 1102H >= C or ENGL 1114H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

LING 4600 - Translation Theory and Method (3 Credit Hours)

Explores the principles of translation. Theory, methods, challenges, and problems involved in rendering written texts from one language into another. Emphasis on maintaining the basic ideas, intent, stylistic level, and linguistic register. The course focuses on the means by which cross-cultural communication can be facilitated and the actual process of translating (i.e., what the translator does and why and how translators make decisions about language, style, format, and cultural equivalency). Special attention is paid to the ongoing problems of translatability, fidelity, literalness, freedom, and imitation.

Prerequisite(s): ENGL 1102 >= C or ENGL 1102H >= C or ENGL 1114H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

LING 4711 - Introduction to Linguistics (3 Credit Hours)

This course is an introduction to the systems of language including sound and sound patterns, meaning, sentence patterns, and the social functions of language.

Prerequisite(s): ENGL 1102 >= C or ENGL 1102H >= C or ENGL 1114H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

LING 4712 - Modern Grammatical Systems (3 Credit Hours)

This course is an examination of modern grammatical systems, with an emphasis on a description of the morphology and syntax of languages.

Prerequisite(s): ENGL 1102 >= C or ENGL 1102H >= C or ENGL 1114H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MGMT 2106 - Legal and Ethical Environment of Business (3 Credit Hours)

This course analyzes the legal, ethical, economic, social, and political environment in which business operates. The cost and benefits of regulation are appraised.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MGMT 3500 - Management Theory and Practice (3 Credit Hours)

A study of the theory and practices of management using a functional approach to emphasize the interdependence of behavior, technology, and organizational structure.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MGMT 3510 - Organizational Behavior (3 Credit Hours)

Examines the determinants and consequences of human behavior in formal organizations.

Prerequisite(s): MGMT 3500 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MGMT 3530 - Legal and Policy Environment of Healthcare (3 Credit Hours)

This course provides an introduction to the legal and public policy foundations of health care in the United States. It is the responsibility of the US federal and state government to promote and protect the health and welfare of the public while respecting the interests, and upholding the rights, of the individual. The content of this course addresses how federal and state law and public policy balance the collective interests of US citizens and their individual rights as patients and providers.

Prerequisite(s): MGMT 2106 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Hull College of Business **Course Level Restrictions:** Undergraduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MGMT 3540 - Leadership and Ethics in Management (3 Credit Hours)

Addresses both traditional and non-traditional characteristics, behaviors and responsibilities required of contemporary organizational leaders.

Prerequisite(s): MGMT 3500 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MGMT 4500 - Human Resource Management (3 Credit Hours)

An applications approach to the managerial decisions regarding selection, recruitment, training, performance appraisal, compensation, benefits, discipline, termination, and employment law.

Prerequisite(s): MGMT 3500 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MGMT 4510 - Negotiation (3 Credit Hours)

An introductory survey of topics of negotiations in business. There are two major objectives for this course: 1) explore the major concepts and theories of the psychology of bargaining and negotiation, and the dynamics of interpersonal and intergroup conflict and its resolution; and 2) help students develop the sophistication to analyze bargaining and conflict relationships, and to learn (through class discussion and self-assessment) about their own individual "bargaining styles." The course is designed to be relevant to the broad spectrum of bargaining "problems" that are traditionally faced by a business manager or professional. Thus, the content is not restricted to students interested in one business discipline or industry. Students pursuing careers in sales, marketing, merger and acquisition, banking, purchasing, real estate, entrepreneurship and other areas that require skill in negotiation and persuasion should find the course useful and relevant.

Prerequisite(s): MGMT 2106 >= C and MGMT 3500 >= C

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

MGMT 4520 - Labor Relations and Collective Bargaining (3 Credit Hours)

A decisional approach surrounding the union-management relationship including collective bargaining, contract negotiation and administration, dispute resolution (arbitration, mediation), the NLRA, and the structure and functioning of organized labor.

Prerequisite(s): MGMT 3500 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MGMT 4530 - Healthcare Management (3 Credit Hours)

This course is designed to: 1) provide an understanding of the evolution of the US healthcare system; and 2) help students identify the elements of the individual manager's role in the inevitable and continuing process of organizational change in health care. Students will leave the course with an appreciation of the healthcare environment as a rapidly changing arena. Pressures on health care managers will increase to deliver quality care at lower cost. Healthcare organizations will continue to merge, affiliate, and pursue other perceived organizational advantages.

Prerequisite(s): MGMT 2106 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Hull College of Business **Course Level Restrictions:** Undergraduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MGMT 4540 - Sales Management (3 Credit Hours)

A study of planning, organizing, staffing, directing, and controlling of the sales force in developing an effective marketing organization.

Prerequisite(s): MKTG 3700 >=C and MKTG 3730 >=C

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MGMT 4550 - Entrepreneurship and Small Business Management (3 Credit Hours)

An interdisciplinary case and lecture approach is used to provide the student with knowledge of real life as well as simulated management experience in areas of entrepreneurship and small business problem solving. Emphasis will be on the characteristics of entrepreneurs, small business problems, managing and controlling the operations.

Prerequisite(s): MKTG 3700 >= C and MGMT 3500 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MGMT 4560 - Advanced Topics in Human Resources (3 Credit Hours)

Course contains module coverage of selected HR topics of selection, compensation, training and development, and safety and health issues.

Prerequisite(s): MGMT 4500 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Supervised Lab/Clinic, Asynchronous Instruction

MGMT 4580 - Strategic Management (3 Credit Hours)

Analysis of the practices and problems in the strategic management of businesses through case studies and other information drawn from the functional areas of the enterprise. Serves as a capstone course. Note: This course must be taken in final semester.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Accounting, Business Administration, Finance, Management, Management Info Systems, Marketing

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Thesis

MGMT 4950 - Selected Topics (3 Credit Hours)

A course and/or directed study of a major issue, practice, or problem in the area of management. Content to be decided based on needs and professional objectives of students and the expertise and availability of faculty.

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Unsupervi Lab/Clinic,Independent Study,Asynchronous Instruction

MGMT 6290 - International Management (3 Credit Hours)

The advanced study of major aspects of international business including, but not limited to, how and why the world's countries differ, the economics and politics of international trade and investment, the functions and form of the global monetary system, and the organizational strategies and structures of international businesses. The course covers the international perspective of organizational functions including manufacturing and materials management, marketing, research and development, human resource management, accounting and finance issues. The course also relates theoretical international business concepts to current international issues.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: MBA **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MGMT 6500 - Organizational Behavior (3 Credit Hours)

An analysis of the determinants and consequences of human behavior in organizations with attention to motivation, leadership, and group dynamics.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: MBA **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MGMT 6510 - Managerial Leadership: Professional and Personal Development (3 Credit Hours)

Examines the interrelationships between business and society from a managerial perspective. Decision implications of ethics, the natural environment, stakeholder diversity and business regulation are addressed from an application standpoint.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Nursing, MBA **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MGMT 6520 - Management of Human Resources (3 Credit Hours)

A comprehensive survey of the typical personnel management decisions faced by managers, including accepted contemporary practice relative to job analysis, EEO regulations, selection, development, discipline, discharge, appraisal, compensation, benefits, and global human resource issues.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: MBA **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MGMT 6530 - Labor and Management Relations (3 Credit Hours)

A graduate level survey of organized labor, major labor legislation, and the collective bargaining process. Arbitration, negotiation, and unfair labor practices will be studied within an applications framework. Major focus is upon managing in a unionized environment.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: MBA **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MGMT 6540 - Technology and Innovation Management (3 Credit Hours)

This course examines how firms generate, manage, and commercialize technological innovation to achieve and sustain competitive advantage. Drawing on strategic management frameworks, the course explores how innovation emerges from firms, networks, and broader ecosystems, and how it shapes industry evolution, competitive dynamics, and firm performance.

Students will analyze key strategic decisions related to innovation, including the selection and management of innovation projects, collaboration through alliances and partnerships, and the protection and appropriation of innovation outcomes. The course also examines how firms organize for innovation, manage new product development processes, and successfully bring new technologies to market.

Through a combination of conceptual frameworks and case-based discussions, students will develop an integrated understanding of how firms formulate and implement innovation strategies in dynamic and uncertain environments.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: College of Business **Major Restrictions:** Master of Business Administration with a Concentration in Strategic Innovation and Technology Management

Schedule Type (Primary): 10- Lecture

MGMT 6550 - Strategy and Entrepreneurship Capstone (3 Credit Hours)

This course exposes students to concepts and practical application of strategy (the arrangements and deployment of resources for a sustainable competitive advantage) and entrepreneurship (the capacity and willingness to develop, launch, and manage a business venture and its risks) in evolving business environments.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

MGMT 6560 - Health Policy and Management: Delivery of Healthcare in the US (3 Credit Hours)

This course includes a detailed review of the organization and financing of the US healthcare system with a focus on cost, quality, and access. Topics include: the evolution of health service in the US, the role of health services professionals in management, health policy, health services financing, and ethical challenges such as long term care, special populations, and the future of health services delivery.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Hull College of Business

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MGMT 6580 - Strategic Management (3 Credit Hours)

Gives the student an opportunity to develop and appreciate conceptual skills as needed by higher level managers in all types of organizations. Emphasis is on the integration of subject matter from all courses in the discussion and analysis of organizational problems. Comprehensive analyses of organizations are conducted. To be taken within the last two semesters.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: MBA **Course Level Restrictions:** Graduate Semester
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MGMT 6950 - Current Issues in Management (3 Credit Hours)

A variable content course individually designed to meet the needs, interests, and professional objectives in business administration.

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: MBA **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

QUAN 3600 - Fundamental Analytics for Business Decision-Making (3 Credit Hours)

Students will learn to apply analytics to solve business problems using computer-based tools. This course focuses on the fundamentals of business analytics and decision-making using approaches that would be applicable in a variety of business contexts and using popular business analytics software packages. Topics include analytical methods, tools, and applications related to making best decisions (optimization), making predictions (forecasting) and developing causal models (regression) in business. Additional data reduction techniques such as cluster analysis and factor analysis are also discussed.

Prerequisite(s): MATH 1401 >= C and MINF 2650 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

QUAN 4620 - Spreadsheet Modeling and Decision Analysis (3 Credit Hours)

Will use visual techniques to understand, document and communicate business models, and then apply information technology to the modeling process for business decisions in accounting, management, operations, finance, and marketing.

Prerequisite(s): MATH 2210 >= C and MINF 2201 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

QUAN 4630 - Business Analytics (3 Credit Hours)

Business analytics is concerned with models for describing, predicting, and improving business processes. A wide-variety of tools (e.g., optimization, regression, forecasting, queueing) are applied to problems in management, supply chain, marketing, and finance.

Prerequisite(s): QUAN 3600 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

QUAN 4640 - Operations Management (3 Credit Hours)

Explores the processes (e.g., purchase, manufacture, store, distribute, sell) that are used in managing (i.e., planning and controlling) the operations of organizations that produce goods and provide services. Topics include: process understanding and improvement, managing quality, managing capacity, logistics, demand forecasting, inventory management, material requirements planning, just-in-time/lean production systems and operations scheduling.

Prerequisite(s): (MATH 2210 >= C or MATH 1401 >= C or MATH 1401H >= C) and MGMT 3500 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

QUAN 4650 - Supplier Relationship Management (3 Credit Hours)

Focuses on managing a firm's upstream supply chain (i.e., its key suppliers of raw materials and parts). An introductory understanding of supply management is provided through an emphasis on supplier relationship management and strategic supply management. Supplier relationship management entails on-going activities including supplier selection, cost management, supplier development, and conflict resolution. Strategic supply management principles include the basic tenets of SCM, the differences between traditional purchasing and contemporary supply management philosophies, and the development of supply management strategy that is linked to business and corporate strategy.

Prerequisite(s): QUAN 4640 >= C

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

QUAN 4660 - Healthcare Operations and Process Improvement (3 Credit Hours)

This course provides a basic framework for understanding and using concepts, practices and tools of operations management in the healthcare industry. Topics include: healthcare operating systems; clinical process management and design; strategy and execution; process improvement and quality; problem solving and decision making; lean process improvement and statistical tools; patient flow; scheduling, forecasting and capacity management; supply chain; operational excellence; and principle-based system design.

Prerequisite(s): MGMT 2106 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Hull College of Business **Course Level Restrictions:** Undergraduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

QUAN 4670 - Logistics (3 Credit Hours)

A solid foundation in the principles and practices of modern logistics. Key topics such as inventory management, transportation planning, warehousing, strategic sourcing and procurement, demand forecasting, information coordination, revenue management, innovation, and sustainability are explored. Through a combination of theoretical concepts and real-world case studies, students develop the skills necessary to optimize the flow of goods and information within a supply chain, reduce operational costs, and enhance overall efficiency.

Prerequisite(s): QUAN 4640 >=C

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

QUAN 4680 - Quality Management (3 Credit Hours)

A solid foundation in the principles and practices of quality management. Key topics such as the voice of the customer, statistical process control, Six Sigma and Lean, and quality management systems are explored. Through a combination of theoretical concepts and real-world case studies, students develop the skills necessary to improve products, processes, and services.

Prerequisite(s): QUAN 3600 >=C

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

QUAN 4690 - Supply Chain Management (3 Credit Hours)

The design, planning, control, and improvement of supply chains for competing effectively in the context of global operations. Topics include: supply chain structure and configuration, approaches to intra-organizational and inter-firm integration, and complexities of material, information, and cash flows across international borders. Students explore key topics such as supply chain design and integration, inventory management and demand forecasting, the value of information, network planning, transportation and distribution, contracts, alliances and sourcing, and sustainability management. Students develop a mix of managerial knowledge and quantitative skills to support managerial decision-making through an exposure to conceptual theory and real-world applications and training in quantitative methods.

Prerequisite(s): QUAN 4640 >= C

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

QUAN 4950 - Selected Topics in Management Science (3 Credit Hours)

A course or directed study in management science. Content to be decided based upon instructor expertise and student interest.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

QUAN 6600 - Business Analytics for Managers (3 Credit Hours)

This course will help students sharpen critical thinking skills by applying scientific methods to help them make informed business decisions. Topics include research design; sampling; data collection, analysis and interpretation; report preparation; and ethics of business research. To be taken early in the program.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: MBA **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

QUAN 6610 - Designing, Managing, and Improving Operations (3 Credit Hours)

This course provides students with quantitative tools to solve business problems. They will learn how to use the best available data to generate optimum solutions. Optimization, experiment design, and statistical quality control are covered.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: MBA **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

QUAN 6650 - Healthcare Operations Management (3 Credit Hours)

This course provides a framework for understanding and using concepts, practices, and tools of operations management, to support decision-making in the healthcare industry. The course uses a combination of technical concepts and case discussions to approach operational situations from an analytical and a managerial approach. Topics include: operations strategy and healthcare operating systems; quality management, lean process improvement, and statistical process control; clinical process analysis and design; patient flow; capacity management, scheduling, and forecasting; supply chain management; change management and health information technology.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Hull College of Business **Course Level Restrictions:** Graduate Semester **Campus Restrictions:** AU Online

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous

QUAN 6950 - Current Issues in Management Science (3 Credit Hours)

A variable content course individually designed to meet the needs, interests, and professional objectives in business administration.

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: MBA **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

MKTG 3700 - Principles of Marketing (3 Credit Hours)

An introduction to the basic principles of marketing and the marketing environment, with a focus on understanding ethical planning, implementing, and controlling marketing activities on a local, national, and global scale.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MKTG 3710 - Buyer Behavior (3 Credit Hours)

This course examines the decision-making process of individual and organizational buyers. It examines both target market selection and segmentation, drawing on concepts from economics, psychology, and sociology, and relating behavior issues to strategic planning.

Prerequisite(s): MKTG 3700 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MKTG 3720 - Retail Management (3 Credit Hours)

Identification and analysis of concepts and practices of successful retailing management. Includes environmental and opportunity assessments, sales promotion and customer services, organizational and merchandise decisions, accounting controls, and leadership.

Prerequisite(s): MKTG 3700 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MKTG 3730 - Professional Selling (3 Credit Hours)

Introduction to sales concepts and techniques and how to apply them in a myriad of selling situations. Management and evaluation of the sales force are also included.

Prerequisite(s): MKTG 3700 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MKTG 3740 - Introduction to Hospitality (3 Credit Hours)

This course is designed as an introduction to the hospitality industry for first and second year business and non-business students to learn about different areas of hospitality management including tourism, arts, entertainment, food service and lodging industries. Major concepts provide a broad foundation of current knowledge about the world's largest industry and related career opportunities.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MKTG 3750 - Event Planning and Production (3 Credit Hours)

This course is designed to introduce students to the principles and practices involved with planning, staging and coordinating events, a specialty area within the practice of hospitality administration, public relations or general marketing. Major concepts provide a broad understanding of events from small celebrations to large corporate events. These concepts range from creative planning to strategic and fiscal analysis, within careers ranging from corporate meeting planners to governmental or entrepreneurial opportunities.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MKTG 3760 - Social Media Marketing (3 Credit Hours)

Social Media Marketing reviews basic marketing concepts that apply to any marketing business utilizing social media outlets. The course will give students the hands-on information they need to initially market a business, and introduce them to methods to keep a business, and their skills, at the forefront. Topics will include theoretical foundations and the 'how to' tips that yield social media marketing success. Students will learn how to build online marketing that is essential for new businesses including a social media marketing plan.

Prerequisite(s): MKTG 3700 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MKTG 3770 - Introduction to Digital Marketing (3 Credit Hours)

This course will examine a cross-section of digital marketing forms for today's business landscape. Students will understand the application of Internet and related digital technologies to achieve marketing objectives. Students will learn to develop integrated digital marketing strategies and execute tactics through a digital marketing project.

Prerequisite(s): MKTG 3700 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Hull College of Business **Course Level Restrictions:** Undergraduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MKTG 3780 - Introduction to Hospitality Marketing (3 Credit Hours)

This course introduces students to hospitality marketing and applies core marketing concepts to hospitality contexts. This course provides students with marketing concepts and tools, such as marketing mix, consumer behavior, STP, and marketing strategy, to help them execute hospitality businesses that meet customer needs and wants.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): 10- Lecture **Schedule Type (Additional):** 57- Asynchronous Instruction

MKTG 4710 - Consumer Behavior and Market Insights in Hospitality (3 Credit Hours)

This course examines consumer decision-making in the hospitality industry and the use of market research to understand guest needs and preferences. Students explore psychological, cultural, and social influences on consumer behavior while developing skills in data collection, analysis, and interpretation.

Prerequisite(s): MKTG 3780 >=C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): 10- Lecture **Schedule Type (Additional):** 57- Asynchronous Instruction

MKTG 4720 - Services Marketing (3 Credit Hours)

The service sector makes up more than two-thirds of the U.S. economy, and includes many industries important to the Augusta area such as healthcare, banking, tourism/hospitality, and insurance. This course emphasizes the differences in products and services and explores successful strategies for marketing in service industries.

Prerequisite(s): MKTG 3700 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MKTG 4730 - Strategic Marketing in Hospitality (3 Credit Hours)

This course examines strategic marketing concepts and practices in the hospitality industry. Students explore how hospitality organizations create, communicate, and deliver value in competitive and dynamic markets. Emphasis is placed on market analysis, positioning, brand strategy, digital marketing, and customer engagement.

Prerequisite(s): MKTG 3780 >=C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): 10- Lecture **Schedule Type (Additional):** 57- Asynchronous Instruction

MKTG 4740 - Marketing Research (3 Credit Hours)

Study and practice of planning, designing, organizing, executing, analyzing, reporting, and evaluating and controlling marketing research activities as an aid to effective and efficient managerial marketing decisions.

Prerequisite(s): MKTG 3700 >= C and (MATH 1401 >= C or MATH 1401H >= C or MATH 2210 >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MKTG 4750 - Marketing Planning and Strategy (3 Credit Hours)

An examination of the marketing decision-making process within the corporate strategic planning framework. The course explores strategic planning tools and assesses their strengths and weaknesses in helping attain long-range corporate objectives.

Prerequisite(s): MKTG 3700 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MKTG 4760 - Resort and Facility Strategies (3 Credit Hours)

This course is designed as an overview of the broad range of facilities encompassed within the hospitality administration arena. Each type of facility or resort has a distinct mission and set of challenges. Major concepts provide an understanding of unique challenges but also common areas of concern including development, guest profiles and front-line employee-guest interaction. Within the broad categories of mountain-based, water-based, and sports based facilities are dozens of subsets including ski resorts, marinas and golf resorts. Global management careers range from general managers and marketing directors to membership managers and entertainment directors.

Prerequisite(s): MKTG 3740 >= C and MKTG 3750 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MKTG 4780 - Advertising and Promotional Marketing (3 Credit Hours)

Introduction to marketing and advertising plans and strategies, the advertising business, advertising media, and advertising creativity.

Prerequisite(s): MKTG 3700 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MKTG 4950 - Selected Topics (3 Credit Hours)

A course and/or directed study of a major issue, practice, or problem in the area of marketing. Content to be decided based on needs and professional objectives of students and the expertise and availability of faculty.

Prerequisite(s): MKTG3700 >= C

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

MKTG 6700 - Marketing Management (3 Credit Hours)

Advanced study of the rationale for the marketing functions and the application of the managerial functions to marketing problems and opportunities.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: MBA **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MATH 0999 - Support for College Algebra (2 Credit Hours)

This course is taken as a corequisite to MATH 1111. It provides supplemental instruction of the prerequisite skills required in MATH 1111. The topics covered mirror the topics being studied in MATH 1111. Emphasis is on using algebraic and graphical techniques for solving problems using linear, quadratic, piece-wise defined, rational, polynomial, exponential, and logarithmic functions.

Corequisite(s): MATH 1111

Lecture Hours: 2 **Contact Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

MATH 1001 - Quantitative Reasoning (3 Credit Hours)

This course places quantitative skills and reasoning in the context of experiences that students will be likely to encounter. It emphasizes processing information in context from a variety of representations, understanding of both the information and the processing, and understanding which conclusions can be reasonably determined.

Core IMPACTS Requirement(s) Satisfied: Mathematics and Quantitative Skills (Mathematics)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

MATH 1111 - College Algebra (3 Credit Hours)

A symbolically intensive functional approach to algebra that incorporates the use of appropriate technology. Emphasis will be placed on the study of functions and their graphs, inequalities, and linear, quadratic, piece-wise defined, rational, polynomial, exponential, and

logarithmic functions. Appropriate applications will be included. Prerequisite(s): SATM 480 (ACT 20) or higher or placement.

Core IMPACTS Requirement(s) Satisfied: Mathematics and Quantitative Skills (Mathematics)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MATH 1113 - Precalculus Mathematics (3 Credit Hours)

A rigorous study of polynomial, exponential, logarithmic, and trigonometric functions, primarily intended to prepare science and mathematics majors for calculus. STEM GPA Eligible Course.

Prerequisite(s): MATH 1111 $\geq$ C

Core IMPACTS Requirement(s) Satisfied: Mathematics and Quantitative Skills (Mathematics); Technology, Mathematics, and Sciences (STEM)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MATH 1220 - Applied Calculus (3 Credit Hours)

An intuitive approach to the study of differential and integral calculus with applications in a variety of fields. STEM GPA Eligible Course

Prerequisite(s): MATH 1001 $\geq$ C or MATH 1111 $\geq$ C or MATH 1113 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MATH 1401 - Elementary Statistics (3 Credit Hours)

A study of frequency distributions of data, graphical and numerical presentations of data, probability, discrete and continuous distributions, sampling distributions, estimation, hypothesis testing, simple linear regression and correlation and goodness of fit.

Core IMPACTS Requirement(s) Satisfied: Mathematics and Quantitative Skills (Mathematics); Technology, Mathematics, and Sciences (STEM)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MATH 1401H - Honors: Elementary Statistics (3 Credit Hours)

A study of frequency distributions of data, graphical and numerical presentations of data, probability, discrete and continuous distributions, sampling distributions, estimation, hypothesis testing, simple linear regression and correlation and goodness of fit. This is an Honors Course.

Core IMPACTS Requirement(s) Satisfied: Mathematics and Quantitative Skills (Mathematics)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Undergraduate Semester

Schedule Type (Primary): Lecture

MATH 1950 - Selected Topics (1 to 3 Credit Hours)

Selected topics in freshman-level mathematics.

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

MATH 2008 - Foundations of Numbers and Operations (3 Credit Hours)

An introductory mathematics course for early childhood education majors. This course will emphasize the understanding and use of the major concepts of numbers and operations. As a general theme, strategies of problem solving will be used and discussed.

Prerequisite(s): MATH 1001 $\geq$ D or MATH 1111 $\geq$ D or MATH 1113 $\geq$ D

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

MATH 2011 - Calculus and Analytical Geometry I (4 Credit Hours)

An introduction to calculus including limits and continuity, derivatives of polynomial, rational, trigonometric, inverse trigonometric, exponential, and logarithmic functions, applications of derivatives, and basic integration. STEM GPA Eligible Course

Prerequisite(s): MATH 1113 $\geq$ C

Core IMPACTS Requirement(s) Satisfied: Mathematics and Quantitative Skills (Mathematics); Technology, Mathematics, and Sciences (STEM)

Lecture Hours: 4

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MATH 2011H - Honors: Calculus and Analytical Geometry I (4 Credit Hours)

An introduction to calculus including limits and continuity, derivatives of polynomial, rational, trigonometric, inverse trigonometric, exponential, and logarithmic functions, applications of derivatives, and basic integration. This is an Honors Course. STEM GPA Eligible Course

Prerequisite(s): MATH 1113 $\geq$ C

Core IMPACTS Requirement(s) Satisfied: Mathematics and Quantitative Skills (Mathematics)

Lecture Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MATH 2012 - Calculus and Analytical Geometry II (4 Credit Hours)

A continuation of calculus including applications of integration, techniques of integration, improper integrals, sequences, series, and polar coordinates. STEM GPA Eligible Course

Prerequisite(s): MATH 2011 $\geq$ C or MATH 2011H $\geq$ C

Core IMPACTS Requirement(s) Satisfied: Technology, Mathematics, and Sciences (STEM)

Lecture Hours: 4

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MATH 2013 - Calculus and Analytical Geometry III (4 Credit Hours)

A study of calculus on multivariate functions. Topics include vectors, vector-valued functions, functions of several variables, parametric equations, partial differentiation, multiple integration with applications, line integrals, and Green's theorem. STEM GPA Eligible Course

Prerequisite(s): (MATH2012 $\geq$ C or MAT203 $\geq$ C) or ()

Lecture Hours: 4

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis

MATH 2020 - Introduction to Discrete Mathematics (3 Credit Hours)

Introduction to fundamental topics in discrete mathematics. Topics include: sets, functions, elementary number theory, applications to cryptography, basic counting techniques, applications of graphs and relations, and Boolean Algebra.

Prerequisite(s): MATH 1111 $\geq$ C or MATH 1113 $\geq$ C or MATH 1401 $\geq$ C or MATH 2011 $\geq$ C or MATH 2012 $\geq$ C

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MATH 2030 - Logic and Set Theory (3 Credit Hours)

A course meant to serve as a transition to advanced courses in mathematics. Topics covered include logical connectives, the algebra of propositions, quantification, and basic properties of sets, relations, and orders. STEM GPA Eligible Course

Prerequisite(s): MATH 2012 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Internship/Practicum, Thesis, Dissertation

MATH 2950 - Selected Topics (1 to 3 Credit Hours)

Modern concepts in special areas of mathematics. Prerequisite(s): Permission of instructor.

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MATH 3020 - Differential Equations (3 Credit Hours)

A study of first-order and linear second-order differential equations with applications. Topics include solution techniques, qualitative behavior, numerical methods, Laplace transformations, and the use of series. STEM GPA Eligible Course.

Prerequisite(s): MATH 2012 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MATH 3210 - Math for Business and Economics (3 Credit Hours)

A description of the applications of linear models, simple non-linear models, applied probability, and selected topics from calculus. Additional topics may include a discussion of quadratic models, conditional probability, Bayes' Theorem, and Markov Chains.

Prerequisite(s): MATH 2210 >= C and MATH 2201 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Accounting, Business Administration, Cybersecurity, Finance, Information Technology, Management, Management Info Systems, Marketing

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MATH 3241 - Mathematics for Early Childhood Teachers I (3 Credit Hours)

A study of the real number system with an emphasis on rational numbers. Topics include multiple representations of numbers, relationships between numbers, properties, operations, estimation, and flexible and varied approaches to problem solving. (This course will not count toward a major or minor in mathematics.) **Prerequisite(s):** Admission to teacher education and permission of instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum

MATH 3242 - Mathematics for Early Childhood Teachers II (3 Credit Hours)

A study of the fundamental concepts related to geometry. The study includes spatial visualization and reasoning, the description and classification of two- and three-dimensional shapes, angle measurement, geometric transformations, the location of points on a map or a grid, congruence and similarity. This course will not count toward a major or minor in mathematics.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum

MATH 3243 - Mathematics for Early Childhood Teachers III (3 Credit Hours)

This course is a study of measurement, data analysis, and probability relevant to elementary teachers. Topics include the measurement process, units of measure, measurable attributes including length, perimeter, area, and volume, data collection, statistical graphs, measures of center, and experimental and theoretical probabilities. This course will not count toward a major or minor in mathematics.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1BSED-EARLY-BSED-Early Childhood Education

Schedule Type (Primary): Lecture

MATH 3250 - Introduction to Statistics and Data Analysis (3 Credit Hours)

This course interweaves traditional topics in statistics with elements of data analysis using popular statistical software packages. Topics include descriptive statistics, probability distributions, sampling distributions, statistical inference for means and proportions, categorical analysis, and simple regression, including multiple and non-linear regression. Elementary programming in a statistics environment (generally R or SAS) will be used to perform statistical analyses, make graphics, and perform simulations.

Prerequisite(s): MATH 2011 >= D or MATH 2011H >= D

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Bachelor of Science
Schedule Type (Primary): Lecture

MATH 3251 - Theory of Interest (3 Credit Hours)

This course on interest theory is intended to prepare students for the Society of Actuaries/Casualty Actuarial Society Exam FM/2. Topics include the time value of money, annuities, amortization, loans, bonds, general cash flows and portfolios.

Prerequisite(s): MATH 2012 $\geq$ C

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

MATH 3261 - Mathematics for Middle School Teachers I (3 Credit Hours)

A study of the real number system including multiple representations of numbers, relationships between numbers, operations, properties, and estimation. Additional topics include proportional reasoning, algebraic reasoning, and elementary number theory. (This course will not count toward a major or minor in mathematics.) **Prerequisite(s):** Admission to teacher education and permission of instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Unsupervi Lab/Clinic

MATH 3262 - Mathematics for Middle School Teachers II (3 Credit Hours)

A study of geometric concepts and measurement using nonstandard, english, and metric units. Topics include coordinate geometry, inductive and deductive reasoning, and concepts related to two and three-dimensional objects including similarity, congruence, and transformations. This course will not count toward a major or minor in mathematics. **Prerequisite(s):** Admission to teacher education and permission of instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

MATH 3263 - Mathematics for Middle School Teachers III (3 Credit Hours)

A study of functions, data analysis, and probability. Topics include understanding and representing functions, families of functions, applications of functions, methods of data collection, statistical graphs, measures of center and variation, basic inferential statistics, and experimental and theoretical probabilities. This course will not count towards a major or minor in mathematics. **Prerequisite(s):** Admission to teacher education and permission of instructor.

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Middle Grades Education

Schedule Type (Primary): Lecture

MATH 3280 - Linear Algebra (3 Credit Hours)

A study of vector spaces including finite-dimensional vector spaces, linear transformations, matrices, linear equations and determinants, and eigenvalues. STEM GPA Eligible Course.

Prerequisite(s): MATH 2012 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervi

Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

MATH 3610 - Introduction to Mathematical Models (3 Credit Hours)

A study of basic mathematical models from various applications including mathematical and computational tools for analyzing these models. Applications chosen from physical, biological, social, management, financial, medical, and engineering sciences (e.g., conservation laws; transport, economic, pharmacokinetic, population and disease models) and industrial applications based on the instructor.

Prerequisite(s): MATH 3020 $\geq$ C or (MATH 2012 $\geq$ C and Permission of Instructor)

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

MATH 3710 - Combinatorics (3 Credit Hours)

A first course in enumeration. Topics include permutations and combinations of finite sets and multisets, properties of the binomial coefficients, the inclusion-exclusion formula, recurrences, generating functions, the Fibonacci sequence, and applications of Burnside's lemma. The idea of the combinatorial proof is emphasized throughout the course.

Prerequisite(s): CSCI 3030 $\geq$ C or MATH 2012 $\geq$ C or MATH 2020 $\geq$ C or MATH 2030 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

MATH 4011 - Real Variables I (3 Credit Hours)

A study of the real number system and functions. Topics include sequences, limits, continuity, differentiation and integration.

Prerequisite(s): MATH 2030 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching

MATH 4012 - Real Variables II (3 Credit Hours)

A study of differentiation and integration of functions on n-dimensional Euclidian space. Other topics include the elementary theory of metric spaces, infinite sequences and series, and Fourier series.

Prerequisite(s): MATH 2013 $\geq$ C and MATH 4011 $\geq$ C

Lecture Hours: 0 to 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MATH 4110 - Mathematical Biology (3 Credit Hours)

Continuous and discrete population models for single species and for interacting species (predator-prey, species in competition, symbiosis); epidemiological models (influenza, childhood diseases, tuberculosis, sexually transmitted diseases); immunological models (tuberculosis, HIV); drug use models, marriage models (divorce prediction and marriage repair, two-sex models); parasite-host models; stochastic models and agent-based simulations.

Prerequisite(s): MATH 3020 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

MATH 4211 - Modern Abstract Algebra I (3 Credit Hours)

A study of abstract algebraic structure. Topics include groups, subgroups, permutation groups, homomorphisms, and quotient groups.

Prerequisite(s): (MATH 2030 $\geq$ C or CSCI 3030 $\geq$ C) and MATH 3280 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MATH 4212 - Modern Abstract Algebra II (3 Credit Hours)

A continuation of the study of abstract algebraic structure. Topics include rings, ideals, integral domains, fields, and rings of polynomials.

Prerequisite(s): MATH 4211 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MATH 4251 - Probability and Statistics I (3 Credit Hours)

A study of combinatorics, probability, mathematical expectation, discrete and continuous distributions, bivariate and multivariate distributions, and moment-generating functions.

Prerequisite(s): MATH 2012 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

MATH 4252 - Probability and Statistics II (3 Credit Hours)

The central limit theorem, sampling distributions, estimation and hypothesis testing, game theory and decision criteria, non-parametric tests, regression and correlation, analysis of variance and a general introduction to experimental design.

Prerequisite(s): MATH 4251 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

MATH 4253 - Mathematical Statistics (3 Credit Hours)

This course explores the mathematical foundations of statistical inference, with a focus on theory and selective applications. It is designed to provide essential preparation for the Society of Actuaries Exam P (Probability). The course begins with a brief review of probability concepts from MATH 4251, then covers topics such as multivariate discrete random variables, the distribution of order statistics, and linear combinations of independent random variables along with their moments. Additional topics include conditional expectation and variance, functions of univariate and bivariate random variables, sampling distributions, and the Central Limit Theorem. Students will also study common estimators and their properties, methods of estimation, the Neyman–Pearson Lemma, Likelihood Ratio Tests, and widely used hypothesis testing procedures.

Prerequisite(s): MATH 2013 $\geq$ C and MATH 4251 $\geq$ C

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

MATH 4310 - Modern Geometry (3 Credit Hours)

A modern treatment of geometry primarily from the metric approach, but with some reference to the Euclidean Synthetic approach. Topics include parallelism, similarity, area, constructions, non-Euclidean and finite geometries.

Prerequisite(s): MATH 2030 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MATH 4320 - Theory of Numbers (3 Credit Hours)

A study of the positive integers including divisibility, prime numbers and the theory of congruences. Additional topics may include Fermat's theorem, the law of quadratic reciprocity, and perfect numbers.

Prerequisite(s): MATH 2030 $\geq$ C or CSCI 3030 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MATH 4350 - Numerical Analysis (3 Credit Hours)

A study of non-linear equations, numerical integration and differentiation and numerical solution of initial value problems in ordinary differential equations.

Prerequisite(s): CSCI 1301 $\geq$ C and MATH 3020 $\geq$ C and MATH 3280 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MATH 4370 - Mathematical Foundations of Cryptography (3 Credit Hours)

A study of mathematical tools from number theory, linear algebra, and other areas of mathematics that are used in cryptographic algorithms and cryptanalysis, and how those tools are implemented in those algorithms.

Prerequisite(s): MATH 2030 $\geq$ C OR CSCI 3030 $\geq$ C

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

MATH 4420 - Introduction to the Theory of Graphs (3 Credit Hours)

A study of graphs, subgraphs, paths, arcs, trees, circuits, digraphs, colorability.

Prerequisite(s): CSCI 3030 $\geq$ C or MATH 2030 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MATH 4510 - Complex Variables (3 Credit Hours)

A study of the field of complex numbers, elementary functions of a complex variable, limits, derivatives, analytic functions, mapping by elementary functions, integrals, power series, residues and poles.

Prerequisite(s): MATH 2030 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MATH 4520 - General Topology (3 Credit Hours)

A study of general topology including applications to Euclidean spaces, surfaces, topological invariants, continuous functions, and homeomorphisms.

Prerequisite(s): MATH 2013 $\geq$ C and MATH 2030 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MATH 4530 - Mathematical Methods of Physics (3 Credit Hours)

An introduction to mathematical techniques used in advanced physics. Topics include Fourier series, special functions, integral transforms, boundary value problems, and partial differential equations.

Prerequisite(s): PHYS 2212 $\geq$ C and MATH 3020 $\geq$ D

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis, Dissertation

MATH 4720 - Partial Differential Equations (3 Credit Hours)

This course introduces techniques of solving first-order and second-order partial differential equations, including the heat equation, wave equation and Laplace's equation. Solution methods include characteristics, separation of variables, Green's functions, and Fourier transforms.

Prerequisite(s): MATH 2013 $\geq$ C and MATH 3020 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Bachelor of Science

Schedule Type (Primary): Lecture

MATH 4800 - Secondary Mathematics from an Advanced Perspective (3 Credit Hours)

This course is designed so that prospective teachers can gain a deeper understanding of the key ideas of secondary school mathematics in the areas of number and operations, algebra, geometry, measurement, and data analysis. Requires permission of the

chair.

Prerequisite(s): MATH 4211 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

MATH 4950 - Selected Topics (1 to 3 Credit Hours)

A study of modern concepts in special areas of mathematics. Prerequisite(s): Permission of instructor and approval by mathematics curriculum committee.

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MATH 4990 - Undergraduate Research (1 to 3 Credit Hours)

Individual mathematics research, a minimum of three hours per week for each semester hour credit. Prerequisite(s): Permission of department chair and senior standing.

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MATH 5110 - Introduction to Biostatistics (3 Credit Hours)

This course offers an introduction to the basic statistical techniques used to analyze and interpret data in the health sciences and related fields. Emphasis is on applications of these methods, with graphical statistics (estimation and hypothesis testing) for numeric and categorical data, nonparametric methods, analysis of variance, regression, and correlation.

Prerequisite(s): MATH 2013 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

MATH 5220 - Estimation and Hypothesis Testing (3 Credit Hours)

Introduction to the theoretical properties of point estimators and tests of hypotheses, sufficient statistics, likelihood, best linear unbiased estimates, elements of statistical tests, the Neyman-Pearson lemma, UMP tests, univariate normal inference, decision theory and multivariate distributions are covered.

Prerequisite(s): MATH 4251 $\geq$ C and MATH 5110 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

MATH 5241 - Numbers and Operations for Teachers (3 Credit Hours)

Designed for students in the MAT program seeking initial certification in early childhood or middle grades, this course focuses on developing a deep understanding of the concepts and techniques related to numbers, numerations systems, and numerical operations. Collaboration, critical thinking, hands-on explorations using manipulatives, problem-based inquiry, and technological tools will be used.

Prerequisite(s): Permission of instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Asynchronous Instruction

MATH 5242 - Geometry and Measurement for Teachers (3 Credit Hours)

Designed for students in the MAT program seeking initial certification in early childhood or middle grades, this course focuses on developing a deep understanding of the concepts related to spatial sense, geometry and measurement. Collaboration, critical thinking, hands-on explorations using manipulatives, problem-based inquiry, and technological tools will be used. Prerequisite(s): Permission of instructor.

Prerequisite(s): MATH 5241 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Asynchronous Instruction

MATH 5243 - Algebra, Probability and Data Analysis (3 Credit Hours)

Designed for students in the MAT program seeking initial certification in early childhood or middle grades, this course focuses on developing a deep understanding of the concepts and techniques related to algebraic thinking, probability, and making predictions and decisions through collecting, representing and analyzing data. Collaboration, critical thinking, hands-on explorations using manipulatives, problem-based inquiry, and technological tools will be used. Prerequisite(s): Permission of instructor.

Prerequisite(s): MATH 5241 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

MATH 6011 - Real Analysis I (3 Credit Hours)

Lebesgue measure and Lebesgue integrals; convergence theorems, differentiation and L^p spaces.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture

MATH 6012 - Real Analysis II (3 Credit Hours)

Abstract spaces, general measures, the Radon-Nikodym theorem and other topics.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture

MATH 6080 - Foundations of Geometry (3 Credit Hours)

A study of the fundamental concepts of plane geometry, both metric and non-metric and an introduction to finite, coordinate, non-Euclidean and projective geometries. Prerequisite(s): Permission of instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MATH 6120 - Statistical Theory I (3 Credit Hours)

Fundamentals of random variables and probability theory, discrete, and continuous distributions, exponential families, joint, marginal, and conditional distributions, functions of random variables, transformation and change of variables, order statistics, convergence concepts, central limit theorem, sampling distributions.

Prerequisite(s): MATH 2013 $\geq$ C and MATH 3280 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Bachelor of Science

Schedule Type (Primary): Lecture

MATH 6130 - Statistical Theory II (3 Credit Hours)

Point and interval estimation, hypothesis testing, maximum likelihood and moment estimators, Bayes estimators, unbiased estimators, sufficiency and completeness, Fisher information, uniformly most powerful tests, likelihood ratio tests, asymptotic inference, introduction to Bayesian inference.

Prerequisite(s): MATH 6120 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Bachelor of Science

Schedule Type (Primary): Lecture

MATH 6200 - Applied Partial Differential Equations (3 Credit Hours)

An advanced course in partial differential equations. Topics include first order conservation laws and the solutions of general nonlinear and quasilinear first order partial differential equations. Hyperbolic systems are solved by characteristic variables. Riemann's function, Green's function and similarity variable methods are introduced. Applications in the biosciences will be emphasized.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture

MATH 6211 - Abstract Algebra I (3 Credit Hours)

An advanced study of group theory. Prerequisite(s): Permission of instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MATH 6212 - Abstract Algebra II (3 Credit Hours)

Further study of advanced ring theory. An advanced study of field theory including extension fields and Galois theory. Prerequisite(s): permission of instructor.

Prerequisite(s): MATH 6211 $\geq$ D

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MATH 6220 - Dynamical Systems (3 Credit Hours)

A course in continuous dynamical systems. Topics include linear systems and the local, global and bifurcation theory of nonlinear systems. Applications to systems arising in mechanics, biology, ecology, and other areas will be discussed.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture

MATH 6250 - Mathematical Statistics (3 Credit Hours)

A detailed study of combinatorics, probability, mathematical expectation, discrete and continuous distributions, bivariate, multivariate and conditional distributions, moment generating functions, functions of random variables, transformation and change of variables, order statistics, convergence concepts, sampling distributions and the central limit theorem. Prerequisite(s): Permission of instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MATH 6320 - Advanced Number Theory (3 Credit Hours)

A brief survey of divisibility and primes followed by in-depth study of congruences, residues, Diophantine equations, number theoretic functions, Farey and continued fractions, Pell's equation, and algebraic numbers. Prerequisite(s): Permission of instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MATH 6341 - Mathematics for Early Childhood Teachers I (3 Credit Hours)

The first mathematics course required to receive the mathematics endorsement. Designed for individuals teaching mathematics in grades K-5, the course focuses on enhancing understanding of the concepts and techniques related to numbers, numeration, numerical operations, and algebraic thinking. Collaboration, critical thinking, hands-on explorations using manipulatives, problem-based inquiry, technological tools, and a variety of print and electronic resources will be used. Prerequisite(s): Permission of instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

MATH 6342 - Mathematics for Early Childhood Teachers II (3 Credit Hours)

The second mathematics course required to receive the mathematics endorsement. Designed for individuals teaching mathematics in grades K-5, the course focuses on strengthening and enhancing educator content competency in the areas of geometry, measurement and data analysis. A variety of physical and visual materials for exploration and development of geometric concepts and spatial visualization, measurement concepts and procedures, and concepts of probability and elementary data analysis will be used. Collaboration, critical thinking, problem-based inquiry, technological tools, and a variety of print and electronic resources will be used.

Prerequisite(s): MATH 6341 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

MATH 6350 - Numerical Analysis (3 Credit Hours)

Further study of numerical approximations and algorithms, including the solution of non-linear equations and systems of equations, numerical differentiation and integration, interpolation and approximation, and the numerical solution of initial value problems.

Prerequisite(s): Permission of instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

MATH 6370 - Numerical Partial Differential Equations (3 Credit Hours)

Finite difference and finite volume methods for solving parabolic, hyperbolic, and elliptic partial differential equations. Consistency, stability, and convergence of numerical methods.

Lecture Hours: 3 **Contact Hours:** 3

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

MATH 6400 - Combinatorial Mathematics (3 Credit Hours)

A course covering both elementary and advanced topics in combinatorial mathematics. Basic concepts such as inclusion-exclusion, recurrence relations and generating functions will be covered. More advanced topics may include the calculus of finite differences, Mobius and binomial inversion, partially ordered sets, and algebraic combinatorics.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture

MATH 6420 - Introduction to the Theory of Graphs (3 Credit Hours)

A study of graphs, subgraphs, paths, arcs, trees, circuits, digraphs, colorability. Additional topics from topological and algebraic graph theory will also be presented.

Prerequisite(s): MATH 3280 $\geq$ C or MATH 4211 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MATH 6440 - Applied Discrete Mathematics (3 Credit Hours)

A selection of topics that arise in applications of discrete mathematics. Potential topics could include generating functions, solution of difference equations, graphs and graph algorithms, discrete probability, Markov chain models, and game theory.

Lecture Hours: 3 **Contact Hours:** 3

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

MATH 6520 - General Topology (3 Credit Hours)

Further study of general topology including applications to Euclidean spaces, surfaces, topological invariants, continuous functions and homeomorphisms. Prerequisite(s): Permission of instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

MATH 6580 - Computational Linear Algebra (3 Credit Hours)

This course provides an introduction to computational linear algebra. Topics include direct and iterative methods for solving linear systems, error analysis, least squares problems, eigenvalue problems, Newton's and Quasi-Newton methods for systems of nonlinear equations.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture

MATH 6610 - Mathematical Models (3 Credit Hours)

Introduction to model development for physical and biological applications including analytical and numerical solution techniques and validation and verification techniques. Includes a study of examples of existing models chosen from physical, biological, social, and management sciences (e.g. conservation laws, heat transfer, fluid flow, population and disease models). Written and oral report is required for at least one of the models studied.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture

MATH 6620 - Optimization (3 Credit Hours)

Newton's method and Quasi-Newton methods for nonlinear equations and optimization problems, globally convergent extensions, applications to differential equations, integral equations and general minimization problems. The course may involve use of a high-level programming language.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester
Schedule Type (Primary): Lecture

MATH 6630 - Topics in Mathematical Biology (3 Credit Hours)

Deterministic and stochastic models in biology and the health-related sciences. Topics may include single-species models, modeling of interacting populations, and structured population models.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture

MATH 6640 - Stochastic Differential Equations and Applications (3 Credit Hours)

An introduction to stochastic modeling of dynamical systems via stochastic differential equations and its wide range of applications, in particular, in the biosciences. Topics include: the review of probability theory, study of Brownian Motion and Martingales, Stochastic Processes, Ito and Stratonovich Calculus, Stochastic Integration and Ito's Formula, Markov Processes, Girsanov's Theorem, Martingale Representation Theorem, Stochastic Differential Equations (SDE), Numerical Methods for Solving SDE, Parameter Estimation Scheme and the applications of stochastic differential equations in areas such as mathematical biology, mathematical finance, insurance, reliability and queueing theory.

Lecture Hours: 3 **Contact Hours:** 3

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

MATH 6800 - Secondary Mathematics from an Advanced Perspective (3 Credit Hours)

This course is designed so that teachers can gain a deeper and broader understanding of key ideas of secondary school mathematics in the areas of number and operations, algebra, geometry, measurement, and data analysis. Prerequisite(s): Admission to graduate program and permission of instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

MATH 6940 - Graduate Teaching Seminar (1 Credit Hour)

A course designed to prepare teaching assistants who are teaching a course as instructor of record for the first time. Topics include: syllabus design, methods for classroom management, exam design, and presentations about university policies and resources available to students.

Lecture Hours: 1 **Contact Hours:** 1

Grade Mode: Satisfactory/Unsatisfactory

Department Restrictions: Dept of Mathematics **Program Restrictions:** Master of Science with a Major in Biological and Computational Mathematics

Schedule Type (Primary): Lecture

MATH 6950 - Selected Topics (1 to 3 Credit Hours)

A variable content course intended to meet the needs and interests of graduate students in selected areas of mathematics.

Prerequisite(s): Permission of department chair and instructor.

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MATH 6960 - Graduate Seminar (3 Credit Hours)

A course in which students gain familiarity with the process of doing mathematical research. The course will include a lecture component, and a series of seminars on topics in current mathematical research. Students will prepare a research talk about a topic chosen in consultation with the course instructor.

Lecture Hours: 2 **Contact Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture

MATH 6965 - Research Seminar (3 Credit Hours)

A course in which students gain familiarity with current mathematical research. This course will feature directed readings of topics selected from recent mathematical literature, culminating with each student giving multiple presentations for the department's regularly scheduled Applied Mathematics Seminar; attendance at the seminar talks throughout the semester will be required.

Prerequisite(s): MATH 6960 >= C

Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Seminar - Small Group

MATH 6980 - Special Topics (3 Credit Hours)

Special topics in mathematics that are not covered in regular courses. The topics depend on the research interests of the instructor and the students.

Lecture Hours: 3

Repeatability: May be repeated for credit up to four times.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture

MATH 6990 - Graduate Project (3 Credit Hours)

This course is an in-depth research experience, conducted under the direction of a faculty member, culminating in a written paper and seminar presentation. This project may be expository in nature or may involve original research. The course may be repeated when a project is likely to produce a peer-reviewed publication.

Contact Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit, In Progress

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Directed Study (one-to-one)

MATH 6999 - Master's Thesis (2 to 3 Credit Hours)

Thesis research in mathematics done under the supervision of a faculty member. Students should plan to enroll in two semesters of thesis, and students wishing to do a thesis should begin the process of selecting a faculty research mentor in the second semester of study.

Other Hours: 2 to 3 **Contact Hours:** 2 to 3

Repeatability: May not be repeated for credit up to 2 times.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Directed Study (one-to-one)

MLIR 3220 - Principles of Education (2 Credit Hours)

Introduces principles of educational design with application to student education, patient education, staff development, continuing education and clinical education.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Undergraduate Semester **Program Restrictions:** BSCLS_CLS-Clinical Laboratory Sciences

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MLIR 3320 - Principles of Education and Management (2 Credit Hours)

Introduces principles of educational design with application to student education, patient education, staff development, continuing education and clinical education. Provides an overview of management theory, management of human and financial resources, operations, and communication skills using the managerial functions of planning, organizing, leading, and controlling. Includes application of principles of administration, personnel management, design, equipment purchasing, information systems and concepts of quality management.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A,B,C,D,F)

College Restrictions: College of Allied Health Sciences **Course Level Restrictions:** Undergraduate Semester **Program Restrictions:** BSCLS_CLS-Clinical Laboratory Sciences

Schedule Type (Primary): Asynchronous Instruction

MLIR 3510 - Applied Research and Statistics (2 Credit Hours)

Prerequisites: College Algebra, BS Program enrollment. This course offers an introduction to the basic statistical techniques used to analyze and interpret data in the health sciences and related fields. Emphasis will be placed on the application of these methods through qualitative, quantitative, and evidence-based research methods for clinical and professional studies. The ethical and procedural requirements for responsible research/scholarship will also be covered.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Undergraduate Semester **Program Restrictions:** BSCLS_CLS-Clinical Laboratory Sciences

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MLIR 4620 - Research Designs and Statistical Methods in Radiologic Sciences (3 Credit Hours)

Prerequisite: Elementary statistics or permission of instructor. Introduction to fundamentals of designing research and statistical methods appropriate for allied health and radiological sciences. Teaches working knowledge of basic descriptive and inferential statistics in order to analyze relationships and differences among groups, and differentiation between experimental and quasi-experimental research designs. Students design a project and develop it into a research proposal.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRS_NUMT-Nuclear Medicine Technology, BSRS_RADT-Radiation Therapy

Schedule Type (Primary): Asynchronous Instruction

MLIR 4999 - Independent Study (1 to 3 Credit Hours)

Prerequisite: Permission of instructor Individualized to student's learner needs, either extraordinary or remedial.

Contact Hours: 6 to 18

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: BSCLS_CLS-Clinical Laboratory Sciences, BSRS_DIMS-Diagnostic Medical Sonography, BSRS_NUMT-

MLIR 7100 - Clinical Patient Management (3 Credit Hours)

Introduction and evaluation of critical pathways of major DRGs in clinical patient management. Pathway analysis includes pathophysiology of disease processes and appropriateness/efficacy of diagnostic and therapeutic sequencing.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Graduate Semester **Program Restrictions:**

MHSCLS_CLS-Clinical Laboratory Science

Schedule Type (Primary): Asynchronous Instruction

MLIR 7320 - Principles of Education and Management (2 Credit Hours)

Introduces principles of educational design with application to student education, patient education, staff development, continuing education and clinical education. Provides an overview of management theory, management of human and financial resources, operations, and communication skills using the managerial functions of planning, organizing, leading, and controlling. Includes application of principles of administration, personnel management, design, equipment purchasing, information systems and concepts of quality management. Included advanced competencies/objectives requirements.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A,B,C,D,F)

Program Restrictions: MHSCLS_CLS-Clinical Laboratory Science

Schedule Type (Primary): Asynchronous Instruction

MILL 6650 - Medical Illustration Techniques IA (3 Credit Hours)

An introduction to techniques and media of the medical illustrator, including line, continuous tone, and color, using traditional materials and electronic media. The accurate and aesthetic presentation and preparation of visual biomedical information for publication and projection is stressed.

Lecture Hours: 1 **Lab Hours:** 8

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MSIL_MILL-Medical Illustration

Schedule Type (Primary): Lecture/Unsupervi Lab/Clinic **Schedule Type (Additional):** Internship/Practicum

MILL 6651 - Medical Illustration Techniques IB (3 Credit Hours)

An introduction to techniques and media of the medical illustrator, including line, continuous tone, and color using traditional materials and electronic media. The accurate and aesthetic presentation and preparation of visual biomedical information for publication and projection is stressed.

Prerequisite(s): MILL 6650 >= C

Lecture Hours: 1 **Lab Hours:** 8

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MSIL_MILL-Medical Illustration

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

MILL 6658 - Medical Sculpture (1 to 3 Credit Hours)

An introduction to the techniques and media used in creating and producing three-dimensional bio-scientific materials, include facial prosthetics.

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit up to five times.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** MSIL_MILL-Medical Illustration

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

MILL 6670 - Electronic Media I (3 Credit Hours)

Introduction to the terminology, concepts, and techniques of computer graphics, with emphasis on the software currently used in the field of medical illustration for two-dimensional images. Course will also cover current storage and output considerations.

Lecture Hours: 1 **Lab Hours:** 8

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MSIL_MILL-Medical Illustration

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

MILL 6671 - Electronic Media II (3 Credit Hours)

Advanced concepts and techniques of computer graphics, with emphasis on the software currently used in the field of medical illustration for two-dimensional, as well as three-dimensional images.

Prerequisite(s): MILL 6670 >= C

Lecture Hours: 2 **Lab Hours:** 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MSIL_MILL-Medical Illustration

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

MILL 6780 - Surgical Techniques (2 Credit Hours)

An orientation to surgery in which the student performs several procedures on freshly preserved human cadavers, utilizing standard equipment, material and techniques.

Lecture Hours: 1 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci , The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** MSIL_MILL-Medical Illustration

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Medical Illustration Surgical Tech Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 275

MILL 7010 - Human Gross Anatomy for Medical Illustration, Part I (4 Credit Hours)

Study of the anatomy of the human body as applicable to medical illustration practice. Part I of II. Lectures, laboratory and demonstration materials are directed studies.

Lecture Hours: 3 **Lab Hours:** 1

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Major Restrictions:** Medical Illustration **Degree Restrictions:** MS in Med Illus

Program Restrictions: MSIL_MILL-Medical Illustration

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Unsupervised Lab/Clinic

Additional Course Fee: Anatomy Lab Supplies Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 400

MILL 7011 - Human Gross Anatomy for Medical Illustration, Part II (3 Credit Hours)

Study of the anatomy of the human body as applicable to medical illustration practice. Part II of II. Lectures, laboratory and demonstration materials are directed studies.

Prerequisite(s): MILL 7010 >= C

Lecture Hours: 2 **Lab Hours:** 1

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Major Restrictions:** Medical Illustration **Degree Restrictions:** MS in Med Illus
Program Restrictions: MSIL_MILL-Medical Illustration
Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Unsupervised Lab/Clinic

MILL 7040 - Neuroanatomy for Medical Illustration (4 Credit Hours)

An in-depth study of the central and peripheral nervous system. Lectures are based on nervous system functions. Laboratories consist of the study of the surface anatomy of the brain, spinal cord and peripheral nervous system. Internal structures of the brain and spinal cord are studied in coronal, sagittal and axial sections, as well as x-rays, CT-scans and MRI series.

Prerequisite(s): MILL 7010 >= C

Lecture Hours: 3 **Lab Hours:** 1

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Major Restrictions:** Medical Illustration **Program Restrictions:** MSIL_MILL-Medical Illustration

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Unsupervised Lab/Clinic

MILL 7650 - Surgical Observation and Sketching I (3 Credit Hours)

The observation and sketching of surgical procedures in the operating rooms and related visual references in the clinics and laboratories of the medical center. The sketches are used as reference material for illustrations accomplished in MILL 7660, MILL 7661, and MILL 9210.

Prerequisite(s): MILL 6650 >= C) and MILL 6651 >= C and MILL 6780 >= C

Lecture Hours: 1 **Lab Hours:** 8

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MSIL_MILL-Medical Illustration

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Lecture/Unsupervi Lab/Clinic

MILL 7651 - Surgical Observation and Sketching II (1 Credit Hour)

The observation and sketching of surgical procedures in the operating rooms and related visual references in the clinics and laboratories of the medical center. The sketches are used as reference material for illustrations accomplished in MILL 7660, MILL 7661, and MILL 9210.

Prerequisite(s): MILL 7650 >= C

Lab Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MSIL_MILL-Medical Illustration

Schedule Type (Primary): Supervised Lab/Clinic

MILL 7660 - Medical Illustration Techniques IIA (3 Credit Hours)

A studio experience in which the student utilizes a variety of art, media, and techniques in preparing medical illustrations that meet stated objectives. Emphasis is on application of techniques to practical assignments and on problem-solving.

Prerequisite(s): MILL 6651 >= C

Lecture Hours: 1 **Lab Hours:** 8

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MSIL_MILL-Medical Illustration

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Lecture/Unsupervi Lab/Clinic

MILL 7661 - Medical Illustration Techniques IIB (3 Credit Hours)

A studio experience in which the student utilizes a variety of art, media, and techniques in preparing medical illustrations that meet stated objectives. Emphasis is on application of techniques to practical assignments and on problem solving.

Prerequisite(s): MILL 7660 >= C

Lecture Hours: 1 Lab Hours: 8

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MSIL_MILL-Medical Illustration

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

MILL 7670 - Multimedia I (3 Credit Hours)

Introduction to the terminology, concepts and techniques of animated computer graphics, with emphasis on the software currently used in the field of medical illustration for animation and interactive title construction. Course will also cover script writing, story boarding, interface design and output considerations.

Lecture Hours: 2 Lab Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MSIL_MILL-Medical Illustration

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Lecture/Unsupervised Lab/Clinic, Asynchronous Instruction

MILL 7671 - Multimedia II (3 Credit Hours)

Advanced concepts and techniques of computer animation and internet graphics, with emphasis on production of an interactive title.

Prerequisite(s): MILL 7670 >= C

Lecture Hours: 2 Lab Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MSIL_MILL-Medical Illustration

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

MILL 8020 - Business and Resource Management I (2 Credit Hours)

An overview of current instructional technology with emphasis on audiovisual resources. Management procedures and business practices for institutional and self-employment illustrators are covered. Issues related to ethics, copyright, contracts and negotiation are explored.

Lecture Hours: 1 Lab Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MSIL_MILL-Medical Illustration

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Seminar-Small Group

MILL 8021 - Business and Resource Management II (3 Credit Hours)

An overview of current instructional technology with emphasis on audiovisual resources. Management procedures and business practices for institutional and self-employment illustrators are covered. Issues related to ethics, copyright, contracts and negotiation are explored.

Prerequisite(s): MILL 8020 >= C

Lecture Hours: 1 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MSIL_MILL-Medical Illustration

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

MILL 8200 - Independent Study in Medical Illustration, Communication, or Visualization (1 Credit Hour)

Elective independent study course where a student will work individually with a medical illustration faculty member to design an individualized course of study, set course objectives and requirements, and designate student learning outcomes. Students must have

a 3.75 cumulative GPA to qualify.

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MSIL_MILL-Medical Illustration

Schedule Type (Primary): Independent Study

MILL 9210 - Investigation of a Problem (1 to 4 Credit Hours)

Independent study demonstrating competency in creating and producing bio-scientific images for visual communication media in specific technique and subject matter areas.

Lab Hours: 1 to 4

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MSIL_MILL-Medical Illustration

Schedule Type (Primary): Supervised Lab/Clinic

MILL 9211 - Investigation of a Problem II (2 Credit Hours)

Independent study demonstrating competency in researching, creating and producing bio-scientific images for visual communication media in specific technique and subject matter areas.

Prerequisite(s): MILL 9210 >= C

Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Degree Restrictions: MS in Med Illus

Schedule Type (Primary): Independent Study

MILL 9250 - Master's Project (1 to 4 Credit Hours)

A visual presentation of a bio-scientific subject prepared in partial fulfillment of the requirements for the degree of Master of Science in Medical Illustration.

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit, In Progress

Program Restrictions: MSIL_MILL-Medical Illustration

Schedule Type (Primary): Independent Study **Schedule Type (Additional):** Directed Study (one-to-one), Thesis

GMED 5500 - Internal Medicine/Histology Elective (8 Credit Hours)

- This 4 week, 8 credit hour course aims to strengthen already obtained histology and anatomy knowledge of select organ systems essential for students seeking to enter an Internal Medicine Residency. The course will allow students to rotate in six of the following subspecialty areas in Internal Medicine: Nephrology, Pulmonology, Gastrointestinal, Hematology/Oncology, Cardiology, and Rheumatology.
- Each week the student will participate with the subspecialty consulting team that conducts inpatient rounds in these particular disciplines of Internal Medicine. During this elective, the student will participate in the diagnosis and treatment of diseases frequently encountered by the Internist, which may include asthma and COPD, bowel disease, ulcerative colitis, Crohn's disease, acute and chronic kidney disease, urinary tract infections, anemias, and arthritis.
- During this 4-week course, the student (s) will also attend tumor boards to increase their knowledge base of malignancies (and their associated histopathology) that affect the various organ systems listed above.

Grade Mode: S-Satisfactory/Unsatisfactory

College Restrictions: 04-Medical College of Georgia

Schedule Type (Primary): 11-Lecture/Supervised Lab/Clinic

MEDI 5024 - Visual Communication in Medicine (8 Credit Hours)

This 4-week, 8-credit hour elective course is designed for post-clerkship medical students interested in improving their communication with patients and colleagues through use of visuals. This course will equip medical students with the unique skills to implement visuals into their interaction with patients with the goal of enhancing communication of complex information, improving patient health literacy, and fostering trusting relationships. Through interactive workshops, role-playing, and reflective exercises, students will learn to communicate using visual tools. Topics include the use of illustrations, animations, 3D models, and hand-drawn sketches to enhance patient understanding and appropriate scenarios for each. Emphasis is placed on application to real-life scenarios, receiving personalized feedback, and developing a personal communication style that is both professional and compassionate. This course prepares students to become compassionate patient educators armed with *unique and practical communication strategies*.

After this elective, 4th-year medical students will be able to identify types of visual communication methods, develop their own artistic skills, and apply them to suitable scenarios for improving communication and patient literacy.

Grade Mode: S-Satisfactory/Unsatisfactory

College Restrictions: 04-Medical College of Georgia

Schedule Type (Primary): 11-Lecture/Supervised Lab/Clinic

OBN 5021 - Obstetrics and Gynecology Night Float Elective (4 Credit Hours)

This two-week elective provides 3rd and 4th year medical students with immersive, hands-on experience in **nighttime obstetric and gynecologic care**. Students will participate as active members of the night float team, assisting with the management of patients on Labor & Delivery, evaluating and triaging obstetric patients, and performing initial assessments of gynecology consults in the main Emergency Department. Emphasis will be placed on sharpening clinical decision-making, improving patient communication, and developing teamwork skills in the acute care setting.

Grade Mode: S-Satisfactory/Unsatisfactory

College Restrictions: 04-Medical College of Georgia

Schedule Type (Primary): 11-Lecture/Supervised Lab/Clinic

RMED 5000 - Medicine (27 Credit Hours)

Lecture Hours: 14 **Contact Hours:** 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Internship/Practicum

SURG 5014 - Rural Trauma Outreach and Simulation Elective (8 Credit Hours)

Students will learn about simulation-based training best practices, participate in local institutional trauma simulation activities, and participate in a rural outreach trauma simulation program. Students will travel with faculty to rural hospitals and EMS agencies, teach supervised trauma procedures, develop simulations, and contribute to statewide trauma education research.

Students will participate in hands-on course delivery, gain experience in resource-limited trauma care, and complete a scholarly output relevant to rural trauma education, quality improvement, or simulation methodology.

Grade Mode: S-Satisfactory/Unsatisfactory

College Restrictions: 04-Medical College of Georgia

Schedule Type (Primary): 11-Lecture/Supervised Lab/Clinic

GMED 5000 - Basic Clerkship in Internal Medicine (18 Credit Hours)

This six-week core clerkship provides background in the fundamentals, principles and skills of internal medicine. Students actively participate in patient care as a member of the healthcare team. Bedside clinical skills, patient presentations, write-ups, logical approach to diagnostic decision making, as well as accumulation and synthesis of medical knowledge are emphasized. Every effort is made for all students to spend three weeks on inpatient services (at least one month on a general medicine service) and three week (if possible) in the ambulatory setting.

Lecture Hours: 3 **Contact Hours:** 15

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit, Continuing Progress Courses

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Internship/Practicum

GMED 5010 - Rheumatology Externship (4 to 8 Credit Hours)

A clinical multidisciplinary experience in the rheumatic diseases with a basic core of material pertinent to major diseases in this area; experience with consulting on clinical material. Special desires for more defined endeavor by the student will be considered.

Lab Hours: 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

GMED 5011 - Medicine Sub-I (12 Credit Hours)

Students taking the acting internship at MCG will essentially function as an intern on the team, admitting patients in sequence with the interns and working directly under the resident. Acting interns are expected to attend all conferences the interns attend. The acting intern completes the initial work-up and determines the treatment plan in conjunction with the resident. The acting intern functions as the primary care physician for their patients but is closely supervised in all activities by the resident and attending faculty physician. The acting interns on call schedule are identical to that of the ward team.

Lecture Hours: 10

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

GMED 5012 - Hematology/Oncology Externship (4 to 8 Credit Hours)

Provides the basics in clinical hematology and medical oncology. In-depth study of blood and marrow morphology is emphasized. An approach to diagnosis and management as well as general principles of cancer chemotherapy will be stressed. The importance of interdisciplinary cancer decision making (internist, surgeon, radiation therapist) is emphasized. Two half-day clinics each week are arranged to emphasize the diagnosis and therapy of common hematologic and oncologic disorders.

Lecture Hours: 5 **Lab Hours:** 30

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Internship/Practicum

GMED 5013 - Nephrology Externship (4 to 8 Credit Hours)

Overview of inpatient and outpatient physical medicine and rehabilitation.

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Internship/Practicum

GMED 5014 - Rehabilitation Medicine Externship (4 to 8 Credit Hours)

General principles of rehabilitation medicine in the hospital setting, in addition to participation in a multidisciplinary approach to treatment of patients undergoing rehabilitation. Students have some clinical responsibility for patients admitted to the hospital and follow them through their rehabilitation. Specialty programs for brain injury, pediatric rehab., spinal cord injury, stroke rehab.

Lecture Hours: 10 **Contact Hours:** 30

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Internship/Practicum

GMED 5016 - Nephrology Consult Elective (4 to 8 Credit Hours)

Experience in clinical nephrology through participation in inpatient consultations, teaching conferences, and once weekly general nephrology outpatient clinic.

Lecture Hours: 10

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

GMED 5017 - Cardiology Consultation Service (4 to 8 Credit Hours)

The MCG Cardiology elective is an integrated rotation between the cardiology consult service and the special procedure labs. Students' time will be divided between the consult service and the labs. On the consult service the student will be exposed to various cardiovascular diseases in medical and pre- and post-operative surgical inpatients. The student will be part of the consultative team working closely with the cardiology attending and the fellow. Patients will be seen with bedside teaching emphasizing physical and differential diagnosis. The student will be expected to provide references appropriate for each case evaluated. During this time, the student will become familiar with the indications, usefulness and limitations of diagnostic tests and special procedures such as echocardiography, cardiac catheterization, stress testing, electrophysiology studies and nuclear cardiology. Each week the student will spend one day in one of the special procedures laboratories (cardiac catheterization lab, ECHO lab, electrophysiology labs and Nuclear/stress testing lab.) The appropriate attending and fellow prior to and during the lab day will provide didactic teaching. Students will have an opportunity to see left and right catheterizations, coronary interventions, transthoracic and transesophageal echocardiography, catheter ablations, pacemaker and/or AICD implantations, cardioversions and stress testing. The EKG laboratory will provide EKGs each day to be read with the EKG attending. Invasive and non-invasive conferences are scheduled throughout the week and journal club is once a month. Students are required to attend conferences. Feedback will be given to the students biweekly from the rotation coordinator.

Lecture Hours: 10 **Contact Hours:** 30

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

GMED 5021 - Gastroenterology Externship (4 to 8 Credit Hours)

This course is designed to provide an understanding of clinical aspects of diseases of the digestive system, pancreas and liver, including endoscopy, interpretation of gastrointestinal x-rays, biopsies and laboratory results. It consists of rounds, conferences and clinics at the MCG Hospital.

Lecture Hours: 10 **Contact Hours:** 30

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

GMED 5022 - Sleep Medicine (4 to 8 Credit Hours)

Explores common sleep-related disorders and treatment of acute and chronic medical conditions, including but not limited to parasomnias, obstructive sleep apnea, and narcolepsy. Students are challenged to acquire the ability to apply this knowledge in diverse clinical settings with the majority being in an outpatient consultative service.

Lecture Hours: 4 to 8 **Lab Hours:** 4

Repeatability: May not be repeated for credit.

Grade Mode: S- Satisfactory/Unsatisfactory

College Restrictions: 04 Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Directed Study (one-to-one)

GMED 5023 - Pulmonary Externship (4 to 8 Credit Hours)

This elective is designed to provide experience in consultative pulmonary medicine. Emphasis is placed upon the clinical evaluation of patients with altered lung function, and the appropriate use of both invasive and noninvasive pulmonary diagnostic procedures. The student will gain experience in interpretation of chest roentgenograms, pulmonary function tests, and arterial blood gases. Selected pulmonary topics are covered in the weekly pulmonary conference.

Lecture Hours: 10 **Contact Hours:** 30

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Internship/Practicum

GMED 5025 - Infectious Diseases Externship (4 to 8 Credit Hours)

This clinical consultation service provides experience in the diagnosis and management of patients with infections, interpretation of stained specimen cultures and sensitivity data, serology and the appropriate use of antimicrobial and antiviral agents. The elective consists of rounds, clinics and conferences at the MCG hospital and clinics. Daily didactic instruction is provided. On call availability is needed.

Lecture Hours: 10 **Contact Hours:** 20

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

GMED 5027 - Medicine Off-Campus Externship (4 to 8 Credit Hours)

Special arrangements can be made for elective periods of one month in the Department of Medicine at other medical schools and teaching institutions. These electives can be spent in general internal medicine or medical subspecialties. The following must accompany the green sheet: written statement accepting student to do elective including description of the content of the elective and name of preceptor responsible for evaluation.

Repeatability: May be repeated for credit up to 3 times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Internship/Practicum

GMED 5028 - Research Elective in Medicine (4 to 8 Credit Hours)

Prerequisite: Approval by Faculty Member with whom research will be done Opportunity to participate in research programs being conducted by members of the faculty of the Department of Medicine. Arrangements to be made by the student with a member of the faculty. A description of proposed project must be submitted to the Medicine Education Office, Ext. 2055. A copy of the description must accompany the Green Sheet. If the duration of the elective is more than one month, students only receive credit for a one month elective.

Lecture Hours: 5

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Independent Study

GMED 5034 - Medical Critical Care (12 Credit Hours)

This elective is designed to provide an intensive experience in critical care medicine. Emphasis is placed upon clinical evaluation and management of critically ill patients: mechanical ventilatory support, hemodynamic and ventilatory monitoring and other critical care interventions. Didactic sessions, conferences and teaching rounds provide a broad view of clinical approaches to critically ill patients.

Lecture Hours: 10 **Contact Hours:** 40

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

GMED 5039 - Endocrinology Externship (4 to 8 Credit Hours)

Inpatient consultations and ambulatory clinics at the MCGH and VAMC are the primary activities of the elective. These activities are carried out in association with one or more medical residents and a clinical endocrine fellow. They are supervised by members of the Section of Endocrinology and Metabolism. The supervised management of cases encountered in these settings will provide the vehicle for teaching. Thyroid, adrenal, parathyroid, pituitary and gonadal diseases as well as diabetes, developmental problems, virilization and electrolyte disorders will be discussed. There will be opportunities for didactic presentations and students will be expected to read relevant clinical literature. A textbook and collection of reprints is provided on loan and a series of core didactic lectures is presented for students on the rotation. Student responsibilities will include participation in section inpatient consultation and clinic activities, as well as the weekly clinical conference at which case presentations will be made.

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Supervised Lab/Clinic

GMED 5040 - Cardiology Externship (4 to 8 Credit Hours)

Obtain a clear and concise cardiac history and physical, inpatient and outpatient. Use of ancillary modalities such as arrhythmia interpretation, ECG interpretation, indication, and use of echocardiography and doppler indication for cardiac catheter and intervention.

Lecture Hours: 5 **Contact Hours:** 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

GMED 5056 - Epidemiology Atlanta Externship (4 to 8 Credit Hours)

Months Offered: September through June (applications must be submitted to the Epidemiology Program Office at CDC by May 30 of the student's third year). This elective is designed to introduce the student to applied epidemiology, preventive medicine, and public health as practiced at CDC. Students have the opportunity to actively assist in epidemiologic investigations of infectious diseases and in studies of a wide variety of public health problems such as chronic, environmental, and occupational diseases, injuries, and reproductive health. Students work under the supervision of CDC epidemiologists and work on specific projects. Students are also exposed to day-to-day operations and a broad range of activities at CDC. Familiarity with computers and data analysis is helpful but not essential. Students are responsible for providing their own living and travel expenses.

Lecture Hours: 10 **Contact Hours:** 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Internship/Practicum

GMED 5066 - Obesity Medicine (4 to 8 Credit Hours)

Students will participate in the development of a differential diagnosis and evaluation scheme for common problems in patients with obesity in the outpatient setting. Upon successful completion of obesity medicine elective rotation, the student should be able to do the following: Correctly diagnose patients with obesity in varying age categories and ethnic groups, Utilize various treatment modalities for obesity including diet, lifestyle changes, behavioral, pharmacotherapy and endoscopic interventions, and appropriately refer patients for metabolic and bariatric surgery.

Lecture Hours: 6 **Lab Hours:** 24

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

GMED 5067 - Geriatric Elective (0 to 8 Credit Hours)

Quality care of geriatric patients requires a knowledge base and skill set which are acquired throughout medical training. The goals of this two-week rotation are as follows: 1. To expose medical students to a varied population of older adults in settings ranging from

ambulatory care, to home care, to assisted living, to palliative and hospice care. 2. To further learning of skills needed to care for older patients in a variety of settings. 3. To further the development of a working biopsychosocial knowledge of the issues involved in caring for the elderly frail population. Upon successful completion of this two to four week geriatric medicine rotation, the student should be able to do the following: Describe the following common geriatric syndromes, including the pathophysiology, risk factors, causes, signs, symptoms, differential diagnoses, treatments and preventive strategies. Alzheimer's Disease and related dementias, hospital related delirium, falls, potentially inappropriate medication prescribing in older adults including how to employ deprescribing strategies, hazards of hospitalization in older adults, elder abuse and neglect, depression and suicide in older adults, and strategies for healthy aging.

Prerequisite(s): GMED 5000 >= C or FMPC 5000 >= C

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Supervised Lab/Clinic

GMED 5071 - Introduction to Cardiac Catheter Laboratory (1 Credit Hour)

This course will provide an introduction to invasive and interventional cardiology.

Lab Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Supervised Lab/Clinic

GMED 5077 - Ambulatory Adult Selective (12 Credit Hours)

Goal: To provide students with a broad exposure to the clinical problems, settings and skills which make up the ambulatory practice of internal medicine. Objectives: Knowledge - Understand the pathophysiology, diagnosis and evidence-based management of common problems encountered in outpatient medicine. Learn about sub-specialty management of specific referred problems. Understand appropriate utilization of resources as a part of medical practice. Skills: Perform a problem-focused history and physical examination. Counsel patients regarding health behaviors. Manage multiple medications for complex patients. Coordinate care among several treating physicians. Activities: general internal medicine clinics, sub-specialty clinics, ambulatory cases and questions, evidence-based problem write-up, observed history and physical examinations.

Contact Hours: 40

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

GMED 5078 - Introduction to Rheumatology (4 to 8 Credit Hours)

Prerequisite: None This third year elective rotation is an introduction to musculoskeletal disorders and systematic inflammatory disease in an ambulatory setting. Supervised by attending physicians, students will participate in primarily outpatient consultations, participate in teaching conferences, gain experience in pertinent diagnostic procedures, evaluate and follow patients in the faculty and fellow practices, and learn pathophysiology, differential diagnosis, clinical manifestations, management, and therapy of rheumatic diseases.

Lecture Hours: 2 **Contact Hours:** 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

GMED 5092 - Current Topics in Translational Medical Research (1 Credit Hour)

Students will learn to comprehensively evaluate reports in the current translational medicine literature. They will learn to place research projects in the context of prior knowledge, appreciate the current state of a field, and critically evaluate research methodology, experimental design and interpretation, and statistical analysis.

Contact Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MD_MEDDD-Medicine
Schedule Type (Primary): Supervised Lab/Clinic

GMED 5095 - Palliative Care Externship (4 to 8 Credit Hours)

Students will see patients at the hospice in Albany during the day and hospital consultations. Students will participate in interdisciplinary team discussions about patient care.

Contact Hours: 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MD_MEDDD-Medicine

Schedule Type (Primary): Supervised Lab/Clinic

GMED 5096 - Introduction to Outpatient Internal Medicine (4 to 8 Credit Hours)

Interactions and learning opportunities will be conducted in the outpatient clinic setting. Students will rotate through General Internal Medicine clinic, Podiatry clinic, Allergy and Immunology clinic, and Endocrinology clinic. The majority of time will be spent in General Internal Medicine.

Contact Hours: 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MD_MEDDD-Medicine

Schedule Type (Primary): Supervised Lab/Clinic

GMED 5999 - Basic Clerkship Remediation in Medicine (1 Credit Hour)

Remediation of the Basic Core Clerkship in Medicine.

Prerequisite(s): GMED 5000 and GMED 5100

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Independent Study

GMED 6599 - GMED Student Chief (4 to 8 Credit Hours)

This elective is designed to allow M4 students an opportunity to practice their leadership skills as they serve as a peer role model to M3 students on the GMED rotation. Student must receive the site clerkship director's approval.

Prerequisite(s): GMED 5000 >= B

Lab Hours: 35 **Contact Hours:** 2

Repeatability: May be repeated for credit one time.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia - Athens Campus, Medical College of Georgia - Main Campus **Campus**

Restrictions: Athens Campus, Main Campus

Schedule Type (Primary): Internship/Practicum

MEDI 5002 - Off Campus Clinical Rotations (1 to 6 Credit Hours)

To give students an opportunity to visit other institutions and perform one to four week clinical experiences to gain exposure to residency training programs for career decision-making purposes.

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Supervised Lab/Clinic

MEDI 5004 - Independent Study (0 to 8 Credit Hours)

Independent Study with approval of the SOM Curriculum Office

Contact Hours: 0 to 8

Repeatability: May be repeated for credit up to five times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Independent Study

MEDI 5005 - Integrative Science Selective (8 Credit Hours)

The primary purpose of this course is to provide an opportunity for an in-depth exploration of the basic sciences that serve as the foundations of clinical practice, but at a more advanced level than what was presented in the pre-clerkship curriculum. Learners will explore how basic sciences inform many aspects of clinical medicine (e.g., understanding how patients experience disease—and health, generation of differential diagnoses and management plans, and monitoring disease progression and treatment outcomes). Course content will be split evenly between basic and clinical sciences and will be developed through the collaboration between basic scientists and clinicians. Each "collaboration" will be focused on a clinical area in which the intersection between the basic and clinical sciences is particularly evident. Students will choose their selective based on their area of clinical interest and identification of learning gaps to be addressed prior to their residency training. Depending on the particular collaboration, students may experience basic and clinical science content as separate or integrated sessions. The course will be a "hands-on," actively engaged course, with a focus on both patient care experiences and applications of the basic sciences.

Lecture Hours: 8 **Lab Hours:** 8 **Contact Hours:** 8

Repeatability: May be repeated for credit up to three times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

MEDI 5010 - USMLE Preparation Elective (1 to 12 Credit Hours)

This is a United States Medical Licensing Examination (USMLE) Step 1 and/or Step 2 CK Preparation Course to help students develop the necessary fund of knowledge of the basic sciences to be successful on USMLE Step 1 and/or Step 2 CK.

Contact Hours: 1 to 12

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Independent Study

MEDI 5012 - Medical Education (4 to 8 Credit Hours)

This course will provide students with a foundation in the principles of medical education.

Lecture Hours: 9

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture

MEDI 5013 - Point-of-Care Ultrasound in Medical Education (4 Credit Hours)

This elective promotes the use of point-of-care ultrasound (POCUS) technology as a clinical tool to enhance the educational experience of MCG medical students.

Lecture Hours: 6 **Lab Hours:** 6

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Degree Restrictions: Doctor of Medicine

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

MEDI 5014 - CBL (Case-Based Learning) Elective (0 to 8 Credit Hours)

CBL (Case-Based Learning) Elective is a 4- week elective intended for M4 students who are interested in developing teaching and writing skills in preparation for career in academic medicine. The goal of this elective is to introduce students to the Socratic method of teaching and is intended for M4 students who are interested in developing skills required for effective small group teaching and clinical case writing.

Contact Hours: 16

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Seminar - Small Group

MEDI 5015 - Overview of Health Professions Education Scholarship (3 Credit Hours)

This is an overview and survey of important topics and areas of research and development in health professions education. It is designed to give emerging leaders in health professions education enough of a background in the scholarship of these important topics that they will be able to engage in policy discussion and make minor educational decisions and explore the topic in greater depth should they need to do so.

Lecture Hours: 3

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School , Medical College of Georgia, College of Ed & Human Dev

Schedule Type (Primary): Seminar - Small Group

MEDI 5016 - Professional Development Elective (4 to 8 Credit Hours)

This elective course is designed to provide medical students in their third and fourth year of training an opportunity to explore healthy adult behaviors. The sessions are designed to engage students in topics related to personal health and wellbeing and to allow students to explore the physical, psychological, and social changes that occur throughout in adulthood. Upon successful completion of this course, the student should be able to do the following: Describe the psychological, cognitive and social developmental aspects of adulthood, including Erikson's stages, Understand the psychological and psychosocial challenges of adulthood through case-based discussion and reflection, Explore relevant coping strategies associated challenges of the adulthood and be able to differentiate those that promote wellness, Describe the importance of a mentoring relationship in personal and career development

Lecture Hours: 3 **Lab Hours:** 4 **Contact Hours:** 1

Repeatability: May be repeated for credit one time.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group

MEDI 5017 - Telemedicine Elective (4 to 8 Credit Hours)

The Clerkship Telemedicine elective course is a clerkship elective offered to MCG clerkship medical students over a three-week rotation. The goals of this elective course are to: 1) Explain key components of the pre-visit checklist and appropriate interactions for executing an appropriate, billable telemedicine exam 2) Identify best practices for collecting a patient history and conducting a physical exam during a telemedicine patient encounter 3) Recognize regulations, health equity, cultural competency, special populations, and special use cases in telemedicine patient encounters course assessments will include didactic learning assessments, simulated telemedicine patient encounters with feedback, and coder review of simulated patient encounter notes.

Lecture Hours: 6 **Contact Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture

MEDI 5018 - Clerkship Procedure Elective (4 to 8 Credit Hours)

Clerkship Procedure Elective is an elective offered to MCG Clerkship medical students over a 2 week rotation. The goals of this elective course are 1) To allow students to review and practice key skills to promote safer and higher quality procedures during medical training 2) To give students a deep understanding of the risks, benefits and challenges of common invasive procedures and allow for legitimate peripheral participation 3) To help students better function in the role of patient advocate during invasive procedures.

Lecture Hours: 10 **Lab Hours:** 5 **Contact Hours:** 5
Repeatability: May not be repeated for credit.
Grade Mode: Satisfactory/Unsatisfactory, Audit
College Restrictions: Medical College of Georgia
Schedule Type (Primary): Lecture/Unsupervi Lab/Clinic

MEDI 5019 - Southwest Campus Clinical Leadership Immersion (4 Credit Hours)

Physicians in the United States are increasingly needed as positive change agents within the complex healthcare delivery system. Input and guidance from physicians will be an integral factor in quality and patient safety improvements within healthcare industry. Developed from evidence-based research covering leadership training in medical schools, this elective provides training across several validated key domains deemed necessary for medical students to succeed as future physicians in this complex industry. The series covers cross-cutting leadership modules designed to promote a culture of excellence. Module themes address aspects address six domains leadership skills, emotional intelligence, change agency, teamwork/communication skills, scientific inquiry, and systems thinking.

Lecture Hours: 2 **Lab Hours:** 2
Repeatability: May not be repeated for credit.
Grade Mode: Satisfactory/Unsatisfactory
College Restrictions: MEDICAL COLLEGE OF GEORGIA - ATHENS CAMPUS, MEDICAL COLLEGE OF GEORGIA - MAIN CAMPUS, MEDICAL COLLEGE OF GEORGIA - SAVANNAH CAMPUS
Schedule Type (Primary): Lecture/Supervised Lab/Clinic

MEDI 5020 - Comparative Policy, Strategy, and Systems in Rural Health-Scotland (8 Credit Hours)

The course is designed to teach students about health policy and observe how policy can impact a healthcare system, particularly in the provision of rural health. During the first two weeks of this course, students learn about the structure of the Georgia and Scottish political systems, how to inform political conversations in Georgia, and how to apply this knowledge for future advocacy. This section of the course is integrated into the students' study abroad experience. While abroad, students learn about similarities and differences between Georgia and Scotland in the importance of interdisciplinary teams, the education and professional standards of certain healthcare professionals, and health professional advocacy. While abroad, various guest lecturers set the picture of healthcare systems in Scotland and the role that all professionals play in interdisciplinary care. When back from the study abroad experience, students are expected to demonstrate the differences and similarities of Scottish healthcare systems and Georgia healthcare systems, and how they, as future physician advocates, can influence policy, education, and population health on either side of the Atlantic. At the end of this course, students are better prepared to be a physician advocate in the state and make informed suggestions for health policy reflecting knowledge gained from this wider world view.

Lecture Hours: 5 **Contact Hours:** 8
Repeatability: May not be repeated for credit.
Grade Mode: Normal (A, B, C, D, F)
Campus Restrictions: Main Campus, Athens Campus
Schedule Type (Primary): Lecture/Supervised Lab/Clinic

MEDI 5021 - Enrichment Experiential Learning Mentorship Elective Syllabus (8 Credit Hours)

This 4-week, 8-credit hour elective provides clerkship students with the opportunity to serve as clinical mentors for preclerkship students in telemedicine, EMR navigation, and POCUS (point-of-care ultrasound). Under direct faculty supervision, students will guide preclerkship learners through virtual patient encounters, debriefing sessions using the PEARLS framework, and EMR documentation skills. Participants will also engage in curriculum development or educational scholarship and receive structured feedback on their teaching and clinical mentorship. The course fosters leadership and teaching skills essential for future academic or clinical educators. Time commitment is approximately 16–20 hours per week.

Repeatability: May not be repeated for credit.
Grade Mode: Satisfactory/Unsatisfactory
College Restrictions: MEDICAL COLLEGE OF GEORGIA - ATHENS CAMPUS, MEDICAL COLLEGE OF GEORGIA - MAIN CAMPUS, MEDICAL COLLEGE OF GEORGIA - SAVANNAH CAMPUS
Schedule Type (Primary): Lecture/Supervised Lab/Clinic

MEDI 5022 - The Use of Artificial Intelligence in Medical Education (4 to 8 Credit Hours)

This elective is designed for medical students to explore the integration of Artificial Intelligence (AI) in medical education. Through solution design and development, students gain insight into the fundamental principles, diverse applications, and ethical implications of AI in medical education and their transformative impact on medical practice. Participants develop medical professionalism and ethics, engage in hands-on projects, and prepare to innovate and disseminate their findings, fostering interdisciplinary collaboration and communication in an AI-driven healthcare environment.

Contact Hours: 4 to 8

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Campus Restrictions: Main Campus, Athens Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

MEDI 5023 - Resilient Leaders in Adolescent Behavioral Health (4 Credit Hours)

This interdisciplinary course is designed for medical students serving as coordinators and facilitators of the *Resilient Teens* program. Students will explore principles of resilient leadership, trauma-informed care, adolescent behavioral health, and mandated reporting. Through direct engagement with youth, reflective exercises, and skill-based workshops, students will strengthen their leadership identity and clinical communication in community-based mental health contexts.

Contact Hours: 4

Grade Mode: S-Satisfactory/Unsatisfactory

College Restrictions: 04-Medical College of Georgia

Schedule Type (Primary): 11-Lecture/Supervised Lab/Clinic

MEDI 5080 - Disease Prevention Research (8 Credit Hours)

Students gain insight into clinical and prevention research being done in the Medical College of Georgia at the Georgia Prevention Institute (GPI). This includes primary and secondary prevention of cardiometabolic disease, cancer, and other diseases through laboratory-based and community-engaged studies of lifestyle modification (e.g., nutrition, physical activity), self-monitoring (e.g., blood pressure and mood during pregnancy), and pharmacological interventions, as well as mechanistic studies of disease pathology and intervention effects. Exercise Is Medicine, Food Is Medicine, health disparities and social determinants of health are major themes. Students pick from a variety of recorded topics and are expected to watch at least 4 short clinical research perspectives and 2 clinical research seminars, asynchronously. Throughout the two weeks, students are also expected to engage in at least 4 shadowing visits with clinical studies at the GPI or in the community.

Contact Hours: 8

Grade Mode: Satisfactory/Unsatisfactory

Campus Restrictions: Main Campus, Athens Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

MEDI 5086 - Introduction to Global Health (1 Credit Hour)

Students will be able to describe prevalent issues relevant to international health, list effects of culture, and describe the different health care systems. Students will understand the role of various organizations involved in global health, describe the safety preparation needed for global health experiences, list possible roles they can play, and be able to explain how an interdisciplinary team functions in global health experiences.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Program Restrictions: MD_MEDDD-Medicine **Campus Restrictions:** Athens Campus

Schedule Type (Primary): Lecture

MEDI 5088 - Mentored Research Project (0 to 24 Credit Hours)

MEDI 5088 is a course designed for students who are interested in an intensive research experience working with a preceptor on a project that will ultimately result in a publishable outcome.

Lecture Hours: 0 to 3 **Lab Hours:** 0 to 3 **Contact Hours:** 0 to 3

Repeatability: May be repeated for credit up to three times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MD_MEDD-Medicine
Schedule Type (Primary): Directed Study (one-to-one)

MEDI 5089 - Health Equity and Access Leadership (HEAL) (2 Credit Hours)

The HEAL program is intended to provide students with skills, knowledge, and experiences related to health equity and access.

Lecture Hours: 1 **Contact Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Program Restrictions: MD_MEDD-Medicine

Schedule Type (Primary): Lecture/Unsupervi Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

MEDI 5090 - Scholarly Project Capstone Course (1 Credit Hour)

The Scholarly Project Capstone course is designed to give students a chance to present and discuss the project which they have completed during the required scholarly project course. Students will participate in a research forum where they will present their research in a poster format. During this forum students will discuss their project with peers and faculty from a variety of backgrounds. The course is designed to give students the opportunity to take the results from a project and discuss them with the broader scientific community.

Contact Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Supervised Lab/Clinic

MEDI 5091 - Introduction to the Foundational Sciences of Medicine (6 to 12 Credit Hours)

This course will expose students to the foundational sciences taught in the medical school curriculum and assist them with developing the necessary study strategies and test taking skills to be successful in medical school.

Lecture Hours: 20 **Lab Hours:** 3 **Contact Hours:** 1 to 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MD_MEDD-Medicine

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

MEDI 5099 - On/Off-Campus Research Elective (4 to 8 Credit Hours)

Goals: To provide the student an opportunity to learn the fundamentals of the process of research. The student will become familiar with the literature in a given research area, will develop a testable hypothesis, will design appropriate experiments to test the hypothesis and will write up the findings appropriately. The research activities shall have direct relevance to the clinical interests of the student.

Lecture Hours: 2 **Lab Hours:** 4

Repeatability: May be repeated for credit up to three times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Supervised Lab/Clinic

MEDI 5135 - Cellular and System Processes (0 to 16 Credit Hours)

The Cellular and Systems Processes module is designed to provide students with a basic understanding of the biological mechanisms by which the body responds to internal and external stimuli by building on the structure-function knowledge of previous modules (ITD5115 and ITD5125). Students will understand the pathological responses to these stimuli by examining the interplay between the biochemical and physiological mechanisms, and how the latter can be influenced by genetics.

Lecture Hours: 15 **Contact Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture

MEDI 5150 - Module 1: Cellular and Molecular Basis of Medicine (7 Credit Hours)

The first year of the curriculum is a year long module divided into six systems-based blocks that run in parallel with the Essentials of Clinical Medicine course. This module introduces students to Gross Anatomy, Biochemistry, Development, Genetics, Histology, Neuroscience, Physiology, and Psychiatry. The Essentials of Clinical Medicine course is a two-year sequence emphasizing the skills needed for patient care. The first year of the Essentials of Clinical Medicine course emphasizes family, cultural and population aspects of healthcare, communication skills, and information retrieval and analysis, health promotion/disease prevention, ethics, history taking with adults, and a community project.

Lecture Hours: 20 **Lab Hours:** 8

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia **Major Restrictions:** Medicine

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

MEDI 5151 - Module 1: Fundamentals (9 Credit Hours)

This module is designed to provide students with an understanding of the molecular and cellular basis of human health and disease as well as provide clinical components of art of doctoring, clinical skills, community and population health, and evidence-based medicine and practice.

Lecture Hours: 8 **Lab Hours:** 5 **Contact Hours:** 9

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MD_MEDD-Medicine **Campus Restrictions:** Athens Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

MEDI 5155 - Module 2: Tissue and Musculoskeletal (14 Credit Hours)

The first year of the curriculum is a year-long module divided into six systems-based blocks that run in parallel with the Essentials of Clinical Medicine course. This module introduces students to Gross Anatomy, Biochemistry, Development, Genetics, Histology, Neuroscience, Physiology, and Psychiatry. The Essentials of Clinical Medicine course is a two-year sequence emphasizing the skills needed for patient care. The first year of the Essentials of Clinical Medicine course emphasizes family, cultural and population aspects of healthcare, communication skills, and information retrieval and analysis, health promotion/disease prevention, ethics, history taking with adults, and a community project.

MEDI 5200 - Essentials of Clinical Medicine 2 (Part 1) (10 Credit Hours)

The Essentials of Clinical Medicine (ECM) is a four-semester program designed to equip students with the skills necessary to perform successfully in the Phase III clerkships. ECM is organized into two courses which build sequentially on one another, and interdigitate wherever possible with core basic science modules. ECM is designed to ensure a continuity of training for the student across the Phase I and II years in the areas of clinical skill development, clinical content, interdisciplinary collaborative teaching, and evaluation of student performance.

Lecture Hours: 5 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

MEDI 5201 - Essentials of Clinical Medicine 2 (Part 2) (13 to 23 Credit Hours)

A four-semester program designed to equip students with the skills necessary to perform successfully in the Phase III clerkships. ECM is organized into two courses which build sequentially on one another, and interdigitate wherever possible with core basic science modules. ECM is designed to ensure a continuity of training for the student across the Phase I and II years in the areas of clinical skill

development, clinical content, interdisciplinary collaborative teaching, and evaluation of student performance.

Lecture Hours: 5 Contact Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

MEDI 5204 - Essentials of Clinical Medicine 2 (Part 1) (10 Credit Hours)

Essentials of Clinical Medicine II complements the basic and clinical science, problem-based learning (PBL) curriculum at the Medical Partnership Campus. In Phase 2 small-group PBL, students examine patient problems from a biological, behavioral, and epidemiological, as well as common direct clinical perspective: basic science is seen in the context of the totality of the paper problem. In the ECM II curriculum, these same issues and perspectives are seen in the context of real and simulated patients, many of whose current problems fall within the differential diagnosis of the paper problems studied in tutorial. As in tutorial, patient centered clinical experiences under the supervision of a clinical preceptor allow for data gathering, abnormality identification, hypothesis generation, and the development of learning issues. Whereas the tutor is a learning facilitator for their group, a clinical-preceptor acts as a facilitator, content expert, and resource person in patient care in clinical practice. These CSP experiences reinforce learning in tutorial and prove the necessary foundation for caring for patients in the future. Through the ECM experience, students develop the interpersonal, interview, physical examination and communication skills that will permit them to solve and resolve patient problems. The ECM II sessions transfer the Phase 2 tutorial process to actual patient-physician interaction. Through Applied Clinical Skills, Clinical Skills Practice, Topics in Patient Centered Care and Principles of Population Health, students will be prepared for the more independent, more complex experiences of Phase 3 and Phase 4: the third year clerkships, senior selectives and electives and sub-internships, and finally, the postgraduate residency training programs and the professional life that continues thereafter.

Prerequisite(s): MEDI 5101

MEDI 5205 - Essentials of Clinical Medicine 2 (Part 2) (8 to 18 Credit Hours)

Essentials of Clinical Medicine II complements the basic and clinical science, problem-based learning (PBL) curriculum at the Medical Partnership Campus. In Phase 2 small-group PBL, students examine patient problems from a biological, behavioral, and epidemiological, as well as common direct clinical perspective: basic science is seen in the context of the totality of the paper problem. In the ECM II curriculum, these same issues and perspectives are seen in the context of real and simulated patients, many of whose current problems fall within the differential diagnosis of the paper problems studied in tutorial. As in tutorial, patient centered clinical experiences under the supervision of a clinical preceptor allow for data gathering, abnormality identification, hypothesis generation, and the development of learning issues. Whereas the tutor is a learning facilitator for their group, a clinical-preceptor acts as a facilitator, content expert, and resource person in patient care in clinical practice. These CSP experiences reinforce learning in tutorial and prove the necessary foundation for caring for patients in the future. Through the ECM experience, students develop the interpersonal, interview, physical examination and communication skills that will permit them to solve and resolve patient problems. The ECM II sessions transfer the Phase 2 tutorial process to actual patient-physician interaction. Through Applied Clinical Skills, Clinical Skills Practice, Topics in Patient Centered Care and Principles of Population Health, students will be prepared for the more independent, more complex experiences of Phase 3 and Phase 4: the third year clerkships, senior selectives and electives and sub-internships, and finally, the postgraduate residency training programs and the professional life that continues thereafter.

Prerequisite(s): MEDI 5204

Lecture Hours: 4 Contact Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MD_MEDD-Medicine **Campus Restrictions:** Athens Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

MEDI 5210 - Module 1: Fundamentals Cellular and Systems Disease States (10 Credit Hours)

The Cellular and Systems Disease States Module is a year long series of systems-based modules that is a microcosm of the Medical College of Georgia in its multifaceted approach to patient care. Armed with an in-depth understanding of normal human anatomy, physiology, and biochemistry from Phase 1 studies, students will begin learning the new language of disease. The vocabulary is

expressed in words that describe the causes, consequences, and treatment of organ system dysfunction. All components of organ system derangements are taught from a molecular biologic point of view to assist students in developing in-depth understanding of disease mechanisms, before their transition to clerkship year of Phase 3.

Lecture Hours: 20 **Contact Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group

MEDI 5211 - Module 1: Prologue II (6 Credit Hours)

Integrated Introductory Course

Lecture Hours: 5

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MD_MEDD-Medicine **Campus Restrictions:** Athens Campus

Schedule Type (Primary): Lecture

MEDI 5212 - Module 1: Hematology/Oncology (11 Credit Hours)

This module is designed to provide students with an overview of the clinical, pathological and treatment aspects of blood disorders. The medical partnership (MP) curriculum integrates the basic and clinical sciences, utilizing case-based and problem-based learning (CBL & PBL) facilitated by basic scientists and clinicians, as well as large group learning opportunities. In year 2, students examine patient problems from a biological, behavioral, and epidemiological, as well as common direct clinical perspective. Basic science is integrated in the context of patient-centered learning, using real and simulated patients. Through our integrated curriculum, students develop the interpersonal, interview, physical examination and communication skills that will permit them to solve and resolve patient problems. Threads in the MP curriculum include foundational sciences, applied clinical skills, clinical skills practice, art of doctoring, ethics & professionalism, evidence-based medicine & practice, professional identity formation & resiliency and community & population health. Clinical experiences under the supervision of a clinical preceptors allow for data gathering, abnormality identification, hypothesis generation, and the development of learning issues. Through the curriculum, students are prepared for the more independent, more complex experiences of their clerkship years, postgraduate residency training programs and professional life.

Lecture Hours: 9 **Contact Hours:** 10

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MD_MEDD-Medicine **Campus Restrictions:** Athens Campus

Schedule Type (Primary): Lecture

MEDI 5220 - Module 2: Hematology/GI Cellular and Systems Disease States (8 Credit Hours)

The Cellular and Systems Disease States Module is a year long series of systems-based modules that is a microcosm of the Medical College of Georgia in its multifaceted approach to patient care. Armed with an in-depth understanding of normal human anatomy, physiology, and biochemistry from Phase 1 studies, students will begin learning the new language of disease. The vocabulary is expressed in words that describe the causes, consequences, and treatment of organ system dysfunction. All components of organ system derangements are taught from a molecular biologic point of view to assist students in developing in-depth understanding of disease mechanisms, before their transition to clerkship year of Phase 3.

Lecture Hours: 20 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group

MEDI 5222 - Module 2: Renal/Urinary System (7 Credit Hours)

This module is designed to provide students with an overview of the clinical, pathological and treatment aspects of renal and urinary diseases.

Lecture Hours: 5 **Contact Hours:** 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MD_MEDDD-Medicine **Campus Restrictions:** Athens Campus

Schedule Type (Primary): Lecture

MEDI 5226 - Module 2: Genitourinary (15 Credit Hours)

This module is designed to provide you with an overview of the clinical, pathological and treatment aspects of genitourinary system diseases. The medical partnership (MP) curriculum integrates the basic and clinical sciences, utilizing case-based and problem-based learning (CBL & PBL) facilitated by basic scientists and clinicians, as well as large group learning opportunities. In year two, students examine patient problems from a biological, behavioral, and epidemiological, as well as common direct clinical perspective. Basic science is integrated in the context of patient-centered learning, using real and simulated patients. Through our integrated curriculum, students develop the interpersonal, interview, physical examination and communication skills that will permit them to solve and resolve patient problems. Threads in the MP curriculum include foundational sciences, applied clinical skills, clinical skills practice, art of doctoring, ethics & professionalism, evidence-based medicine & practice, professional identity formation & resiliency and community & population health. Clinical experiences under the supervision of a clinical preceptors allow for data gathering, abnormality identification, hypothesis generation, and the development of learning issues. Through the curriculum, students are prepared for the more independent, more complex experiences of their clerkship years, postgraduate residency training programs and professional life.

Lecture Hours: 9 **Contact Hours:** 10

Repeatability: May be repeated for credit one time.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Degree Restrictions: Doctor of Medicine **Program Restrictions:** MD_MEDDD-Medicine **Campus Restrictions:** Athens Campus

Schedule Type (Primary): Lecture

MEDI 5230 - Module 3: Cellular and Systems Disease States: Musculoskeletal/Central Nervous Systems (9 Credit Hours)

The Cellular and Systems Disease States Module is a year long series of systems-based modules that is a microcosm of the Medical College of Georgia in its multifaceted approach to patient care. Armed with an in-depth understanding of normal human anatomy, physiology, and biochemistry from Phase 1 studies, students will begin learning the new language of disease. The vocabulary is expressed in words that describe the causes, consequences, and treatment of organ system dysfunction. All components of organ system derangements are taught from a molecular biologic point of view to assist students in developing in-depth understanding of disease mechanisms, before their transition to clerkship year of Phase 3.

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group

MEDI 5232 - Module 3: Cardiopulmonary (15 Credit Hours)

This module is designed to provide students with an overview of the clinical, pathological and treatment aspects of cardiovascular and pulmonary diseases. The medical partnership (MP) curriculum integrates the basic and clinical sciences, utilizing case-based and problem-based learning (CBL & PBL) facilitated by basic scientists and clinicians, as well as large group learning opportunities. In year two, students examine patient problems from a biological, behavioral, and epidemiological, as well as common direct clinical perspective. Basic science is integrated in the context of patient-centered learning, using real and simulated patients. Through our integrated curriculum, students develop the interpersonal, interview, physical examination and communication skills that will permit them to solve and resolve patient problems. Threads in the MP curriculum include foundational sciences, applied clinical skills, clinical skills practice, art of doctoring, ethics & professionalism, evidence-based medicine & practice, professional identity formation & resiliency and community & population health. Clinical experiences under the supervision of a clinical preceptors allow for data gathering, abnormality identification, hypothesis generation, and the development of learning issues. Through the curriculum, students are prepared for the more independent, more complex experiences of their clerkship years, postgraduate residency training programs and professional life.

Lecture Hours: 9 **Contact Hours:** 10

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MD_MEDDD-Medicine **Campus Restrictions:** Athens Campus

Schedule Type (Primary): Lecture

MEDI 5234 - Module 4: Reproduction (5 Credit Hours)

This module is designed to provide students with an overview of the clinical, pathological and treatment aspects of reproductive system diseases.

Lecture Hours: 5 Contact Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MD_MEDD-Medicine **Campus Restrictions:** Athens Campus

Schedule Type (Primary): Lecture

MEDI 5235 - Module 3: Cellular and Systems Disease States: Pulmonary/Renal Systems (7 Credit Hours)

The Cellular and Systems Disease States Module is a year long series of systems-based blocks that is a microcosm of the Medical College of Georgia in its multifaceted approach to patient care. Armed with an in-depth understanding of normal human anatomy, physiology, and biochemistry from Phase I studies, students will begin learning the new language of disease. The vocabulary is expressed in words that describe the causes, consequences, and treatment of organ system dysfunction. All components of organ system derangements are taught from a molecular biologic point of view to assist students in developing in-depth understanding of disease mechanisms, before their transition to clerkship year of Phase III.

Lecture Hours: 12 Contact Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture

MEDI 5236 - Module 3: Central Nervous System (5 Credit Hours)

The phase two curriculum follows an integrated approach to the teaching of cellular and systems disease states. The Central Nervous System Module continues the systematic approach to systems begun in MEDI 5220 (Module 2) and transitions into the central nervous system. As such, this module builds upon the basic principles and factual knowledge about the development and manifestations of human disease covered so far. Clinical lectures and basic science lectures have been coordinated to highlight the relationships between the scientific basis of disease and the practice of clinical medicine.

Lecture Hours: 62

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group

MEDI 5237 - Module 4: Musculoskeletal/Skin (4 Credit Hours)

The phase two curriculum follows an integrated approach to the teaching of cellular and systems disease states. This module continues the systematic approach to systems and transitions into the musculoskeletal and integumentary system. As such, this module builds upon the basic principles and factual knowledge about the development and manifestations of human disease covered so far. Clinical lectures and basic science lectures have been coordinated to highlight the relationships between the scientific basis of disease and the practice of clinical medicine.

Lecture Hours: 50

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group

MEDI 5240 - Module 5: Cellular and Systems Disease States: Cardiopulmonary (9 Credit Hours)

The Cellular and Systems Disease States Module is a year long series of systems-based modules that is a microcosm of the Medical College of Georgia in its multifaceted approach to patient care. Armed with an in-depth understanding of normal human anatomy,

physiology, and biochemistry from Phase 1 studies, students will begin learning the new language of disease. The vocabulary is expressed in words that describe the causes, consequences, and treatment of organ system dysfunction. All components of organ system derangements are taught from a molecular biologic point of view to assist students in developing in-depth understanding of disease mechanisms, before their transition to clerkship year of Phase 3.

Lecture Hours: 20 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Seminar-Small Group

MEDI 5242 - Module 4: Digestive and Endocrine Systems (12 Credit Hours)

This module is designed to provide students with an overview of the clinical, pathological and treatment aspects of the Gastrointestinal and Endocrine Systems and the influence of diet and nutrition on disease and treatment outcomes. The Medical Partnership (MP) curriculum integrates the basic and clinical sciences, utilizing case-based and problem-based learning (CBL & PBL) facilitated by basic scientists and clinicians, as well as large group learning opportunities. In year 2, students examine patient problems from a biological, behavioral, and epidemiological, as well as common direct clinical perspective. Basic science is integrated in the context of patient-centered learning, using real and simulated patients. Through our integrated curriculum, students develop the interpersonal, interview, physical examination and communication skills that will permit them to solve and resolve patient problems. Threads in the MP curriculum include Foundational Sciences, Applied Clinical Skills, Clinical Skills Practice, Art of Doctoring, Ethics & Professionalism, Evidence-Based Medicine & Practice, Professional Identity Formation & Resiliency and Community & Population Health. Clinical experiences under the supervision of a clinical preceptors allow for data gathering, abnormality identification, hypothesis generation, and the development of learning issues. Through the curriculum, students are prepared for the more independent, more complex experiences of their clerkship years, postgraduate residency training programs and professional life.

Lecture Hours: 9 **Contact Hours:** 10

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MD_MEDD-Medicine **Campus Restrictions:** Athens Campus

Schedule Type (Primary): Lecture

MEDI 5243 - Module 6: Renal (4 Credit Hours)

The Phase 2 curriculum follows an integrated approach to the teaching of cellular and systems disease states. The Renal Module continues the systematic approach to systems with study of the renal system. As such, this module builds upon the basic principles and factual knowledge about the development and manifestations of human disease covered so far. Clinical lectures and basic science lectures have been coordinated to highlight the relationships between the scientific basis of disease and the practice of clinical medicine.

Lecture Hours: 55

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia **Course Level Restrictions:** Professional Semester **Degree Restrictions:** Doctor of Medicine

Schedule Type (Primary): Lecture

MEDI 5244 - Module 7: Endocrine/Reproductive (6 Credit Hours)

The Phase 2 curriculum follows an integrated approach to the teaching of cellular and systems disease states. The Endocrine/Reproductive Module continues the systematic approach to systems with study of the endocrine and reproductive systems. As such, this module builds upon the basic principles and factual knowledge about the development and manifestations of human disease covered so far. Clinical lectures and basic science lectures have been coordinated to highlight the relationships between the scientific basis of disease and the practice of clinical medicine.

Lecture Hours: 64

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia **Course Level Restrictions:** Professional Semester **Degree Restrictions:** Doctor of Medicine

Schedule Type (Primary): Lecture

MEDI 5245 - Module 4: Cellular and Systems Disease States: Endocrine/GI Systems (5 Credit Hours)

Prerequisites: Phase I. The Cellular and Systems Disease States Module is a year long series of systems-based modules that is a microcosm of the Medical College of Georgia in its multifaceted approach to patient care. Armed with an in-depth understanding of normal human anatomy, physiology, and biochemistry from Phase 1 studies, students will begin learning the new language of disease. The vocabulary is expressed in words that describe the causes, consequences, and treatment of organ system dysfunction. All components of organ system derangements are taught from a molecular biologic point of view to assist students in developing in-depth understanding of disease mechanisms, before their transition to clerkship year of Phase 3.

Lecture Hours: 12 **Contact Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture

MEDI 5252 - Module 5: Behavior and Brain (12 Credit Hours)

This module is designed to provide students with an overview of the clinical, pathological and treatment aspects of psychiatric and neurological diseases. The medical partnership (MP) curriculum integrates the basic and clinical sciences, utilizing case-based and problem-based learning (CBL & PBL) facilitated by basic scientists and clinicians, as well as large group learning opportunities. In year two, students examine patient problems from a biological, behavioral, and epidemiological, as well as common direct clinical perspective. Basic science is integrated in the context of patient-centered learning, using real and simulated patients. Through our integrated curriculum, students develop the interpersonal, interview, physical examination and communication skills that will permit them to solve and resolve patient problems. Threads in the MP curriculum include foundational sciences, applied clinical skills, clinical skills practice, art of doctoring, ethics & professionalism, evidence-based medicine & practice, professional identity formation & resiliency and community & population health. Clinical experiences under the supervision of a clinical preceptors allow for data gathering, abnormality identification, hypothesis generation, and the development of learning issues. Through the curriculum, students are prepared for the more independent, more complex experiences of their clerkship years, postgraduate residency training programs and professional life.

Schedule Type (Primary): Lecture

MEDI 5263 - Child Sexual Abuse: Physician's Power to Protect (1 Credit Hour)

The Physician's Power to Protect is a child sexual abuse preventative and intervention training to provide critical information on the issues surrounding child sexual abuse and how you can become a front line defender. The course also provides great insight when working with victims of child sexual abuse at any age. The course is broken down into six modules that include: 1. Child Sexual Abuse: The Basics, 2. Detecting Child Sexual Abuse, 3. Communicating Child Sexual Abuse, 4. Reporting and the Legal System, 5. Providing Resources, and 6. You are the Solution

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

MEDI 5264 - Entrepreneurship in Medicine (1 Credit Hour)

Medicine is becoming increasingly integrated with technology and reliant on innovation. This course is designed to follow this trend within medical education. It is a discussion-driven and knowledge-based seminar for medical students that are either curious about the process of entrepreneurship or have an existing idea that they would like to bring to market. The lectures are given by successful entrepreneurs who share their expertise within specific areas such as customer discovery and value propositions. To reinforce these concepts into practice, students will break into group sessions led by the lecturer. By the end of the course, students will have progressed from creation of an initial testable hypothesis to delivery of an effective pitch deck.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Degree Restrictions: Doctor of Medicine **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture

MEDI 5298 - Phase 2 Comprehensive Module and National Board Review (7 Credit Hours)

Prerequisites: Phase 1 and Phase 2 A systematic review for the USMLE Step 1 examination.

Lecture Hours: 10

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia **Course Level Restrictions:** Professional Semester

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

MEDI 5301 - Phase 2 Curriculum Exposure Elective (0 to 6 Credit Hours)

Medical students are expected to master a foundation of clinical knowledge with integration of basic sciences and the translation of that knowledge to the clinical setting.

Lecture Hours: 12 **Contact Hours:** 4

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia **Course Level Restrictions:** Professional Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group, Supervised Lab/Clinic

MEDI 5430 - Essentials of Clinical Medicine 4 Part 1 (0 Credit Hours)

The course is designed to equip students with the necessary knowledge, skills, behaviors, and attitudes to perform successfully in the clinical setting.

Contact Hours: 12

Repeatability: May be repeated for credit.

Grade Mode: Continuing Progress Courses, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Independent Study **Schedule Type (Additional):** Asynchronous Instruction

MEDI 5431 - Essentials of Clinical Medicine 4 Part 2 (1 Credit Hour)

The course is designed to equip students with the necessary knowledge, skills, behaviors, and attitudes to perform successfully in the clinical setting.

Contact Hours: 12

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Independent Study **Schedule Type (Additional):** Asynchronous Instruction

MEDI 5590 - Essentials of Clinical Medicine 1-Physical Diagnosis (4 Credit Hours)

The Essentials of Clinical Medicine (ECM) course is a four-semester program designed to equip students with the necessary knowledge, skills, attitudes, and behaviors to perform successfully in the Phase 3 clerkships. ECM is organized into three "courses" (Physical Diagnosis, Problem-based Learning and Foundations of Clinical Practice) with five components (The Art of Doctoring, Population and Public Health, Evidence-based Practice, Problem-based Learning, and Physical Diagnosis), which build sequentially on one another, and are interwoven wherever possible with the core foundational science modules. ECM is designed to ensure a continuity of training for the student across the Phase 1 and 2 years in the areas of professionalism, clinical skills development, cultural competency, public health, evidence-based practice, clinical content, interdisciplinary collaborative teaching, and self-evaluation of performance.

Contact Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Continuing Progress Courses, Audit

Degree Restrictions: Doctor of Medicine

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

MEDI 5591 - Essentials of Clinical Medicine 1-Physical Diagnosis (4 Credit Hours)

The Essentials of Clinical Medicine (ECM) course is a four-semester program designed to equip students with the necessary knowledge, skills, attitudes, and behaviors to perform successfully in the Phase 3 clerkships. ECM is organized into three "courses" (Physical Diagnosis, Problem-based Learning and Foundations of Clinical Practice) with five components (The Art of Doctoring, Population and Public Health, Evidence-based Practice, Problem-based Learning, and Physical Diagnosis), which build sequentially on one another, and are interwoven wherever possible with the core foundational science modules. ECM is designed to ensure a continuity of training for the student across the Phase 1 and 2 years in the areas of professionalism, clinical skills development, cultural competency, public health, evidence-based practice, clinical content, interdisciplinary collaborative teaching, and self-evaluation of performance.

Contact Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Degree Restrictions: Doctor of Medicine

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

MEDI 5592 - Essentials of Clinical Medicine 1-Problem-based Learning (3 Credit Hours)

The Essentials of Clinical Medicine (ECM) course is a four-semester program designed to equip students with the necessary knowledge, skills, attitudes, and behaviors to perform successfully in the Phase 3 clerkships. ECM is organized into three "courses" (Physical Diagnosis, Problem-based Learning and Foundations of Clinical Practice) with five components (The Art of Doctoring, Population and Public Health, Evidence-based Practice, Problem-based Learning, and Physical Diagnosis), which build sequentially on one another, and are interwoven wherever possible with the core foundational science modules. ECM is designed to ensure a continuity of training for the student across the Phase 1 and 2 years in the areas of professionalism, clinical skills development, cultural competency, public health, evidence-based practice, clinical content, interdisciplinary collaborative teaching, and self-evaluation of performance.

Contact Hours: 2

Repeatability: May be repeated for credit one time.

Grade Mode: Continuing Progress Courses, Audit

Degree Restrictions: Doctor of Medicine

Schedule Type (Primary): Seminar - Small Group

MEDI 5593 - Essentials of Clinical Medicine 1-Problem-Based Learning (2 Credit Hours)

The Essentials of Clinical Medicine (ECM) course is a four-semester program designed to equip students with the necessary knowledge, skills, attitudes, and behaviors to perform successfully in the Phase 3 clerkships. ECM is organized into three "courses" (Physical Diagnosis, Problem-based Learning and Foundations of Clinical Practice) with five components (The Art of Doctoring, Population and Public Health, Evidence-based Practice, Problem-based Learning, and Physical Diagnosis), which build sequentially on one another, and are interwoven wherever possible with the core foundational science modules. ECM is designed to ensure a continuity of training for the student across the Phase 1 and 2 years in the areas of professionalism, clinical skills development, cultural competency, public health, evidence-based practice, clinical content, interdisciplinary collaborative teaching, and self-evaluation of performance.

Contact Hours: 2

Repeatability: May be repeated for credit one time.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Degree Restrictions: Doctor of Medicine

Schedule Type (Primary): Seminar - Small Group

MEDI 5594 - Essentials of Clinical Medicine 1-Foundations of Clinical Practice (7 Credit Hours)

The Essentials of Clinical Medicine (ECM) course is a four-semester program designed to equip students with the necessary knowledge, skills, attitudes, and behaviors to perform successfully in the Phase 3 clerkships. ECM is organized into three "courses" (Physical Diagnosis, Problem-based Learning and Foundations of Clinical Practice) with five components (The Art of Doctoring, Population and Public Health, Evidence-based Practice, Problem-based Learning, and Physical Diagnosis), which build sequentially on one another, and are interwoven wherever possible with the core foundational science modules. ECM is designed to ensure a continuity of training for the student across the Phase 1 and 2 years in the areas of professionalism, clinical skills development, cultural competency, public health, evidence-based practice, clinical content, interdisciplinary collaborative teaching, and self-evaluation of performance.

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Continuing Progress Courses, Audit

Degree Restrictions: Doctor of Medicine

Schedule Type (Primary): Lecture

MEDI 5595 - Essentials of Clinical Medicine 1-Foundations of Clinical Practice (3 Credit Hours)

The Essentials of Clinical Medicine (ECM) course is a four-semester program designed to equip students with the necessary knowledge, skills, attitudes, and behaviors to perform successfully in the Phase 3 clerkships. ECM is organized into three "courses" (Physical Diagnosis, Problem-based Learning and Foundations of Clinical Practice) with five components (The Art of Doctoring, Population and Public Health, Evidence-based Practice, Problem-based Learning, and Physical Diagnosis), which build sequentially on one another, and are interwoven wherever possible with the core foundational science modules. ECM is designed to ensure a continuity of training for the student across the Phase 1 and 2 years in the areas of professionalism, clinical skills development, cultural competency, public health, evidence-based practice, clinical content, interdisciplinary collaborative teaching, and self-evaluation of performance.

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Degree Restrictions: Doctor of Medicine

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

MEDI 5995 - Advanced Research (40 Credit Hours)

A 20-week course in which students work with a mentor on a research project for at least 40 hours/week. Students must submit IRB and biosafety protocols, if applicable, before enrolling in this course. Students are required to present a poster at MCG's Research Day and give a final presentation to their mentor, research team, and curriculum faculty.

Lab Hours: 40

Repeatability: May not be repeated for credit.

Grade Mode: S- Satisfactory/Unsatisfactory

College Restrictions: 04 Medical College of Georgia

Schedule Type (Primary): Supervised Lab/Clinic

MEDI 6000 - Care of the Chronically and Terminally Ill Intersession (5 Credit Hours)

This course will expose students to the care of the patient with chronic care needs and terminal illnesses.

Lecture Hours: 5 **Lab Hours:** 20

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

MEDI 6001 - Simulation Education Elective (4 to 8 Credit Hours)

The goal is to provide students with an introduction to the practice of simulation in medical education through the use of didactics, literature review, hands-on simulations, and the production of scholarship. Objectives: (1) Describe the theories supporting the use of simulation in education; (2) Develop simulation cases using best practices; (3) Utilize technology to facilitate simulations; and (4) Produce scholarship in the domains of teaching discovery.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May be repeated for credit one time.

Grade Mode: Satisfactory/Unsatisfactory

Degree Restrictions: Doctor of Medicine

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group

MEDI 6100 - Orientation to Medicine Module (3 Credit Hours)

This introductory module is designed to introduce students to the learning pedagogies the medical education program utilizes to deliver curriculum including small group, case-based learning and simulation. The course also introduces students to the professional expectations required of a new medical student. Through the use of patient cases, students will be introduced to the language, concepts, and treatment of disease. This short case-based module will include relevant professional, cultural, and biomedical ethical issues, that are foundational to primary care practice as well as other medical specialties.

Lecture Hours: 1 **Lab Hours:** 2 **Contact Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia **Major Restrictions:** Medicine **Student Class Restrictions:** Professional **Course**

Level Restrictions: Professional Semester **Degree Restrictions:** Doctor of Medicine **Program Restrictions:** MD_MEDD-Medicine

Campus Restrictions: Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

MEDI 6110 - Patient Centered Learning 1 (11 Credit Hours)

This introductory course allows students to begin their development of patient centered skills. Students will learn how to interview and examine patients, establish rapport, formulate and prioritize clinical problems, develop clinical diagnostic reasoning skills, and begin to formulate patient care plans. These skills will be developed through experiential learning processes that include small group workshops, standardized patient interactions, simulations, procedures skills development, and clinical patient contact. The course allows the students to begin forming, in a very real way, their professional identity and demeanor.

Contact Hours: 11

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia **Major Restrictions:** Medicine **Student Class Restrictions:** Professional **Course**

Level Restrictions: Professional Semester **Degree Restrictions:** Doctor of Medicine **Program Restrictions:** MD_MEDD-Medicine

Campus Restrictions: Main Campus

Schedule Type (Primary): Supervised Lab/Clinic

MEDI 6120 - Foundations of Medicine Module (15 Credit Hours)

This integrated, introductory module is designed to provide the students with an understanding of the foundational principles of medicine including those related to cellular and molecular principles of medicine, genetics and early development, biochemistry, physiology, medical therapeutics, histopathology, hematology, microbiology and immunology. Students will focus on clinically relevant normal and abnormal cellular structure and function (including regulation), the operations of the genome, the features of early development as well as the biological mechanisms by which the body responds to external stimuli. Through the use of patient cases, students will be introduced to the language, concepts, and treatment of disease to show how alterations in structure, function, and

development are associated with disease states. This case-based module will include relevant professional, cultural, and biomedical ethical issues, with a focus on evidence-based medicine and value-based healthcare. This knowledge is foundational to primary care practice as well as other medical specialties.

Lecture Hours: 6 **Lab Hours:** 2 **Contact Hours:** 6

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia **Major Restrictions:** Medicine **Student Class Restrictions:** Professional **Course**

Level Restrictions: Professional Semester **Degree Restrictions:** Doctor of Medicine **Program Restrictions:** MD_MEDD-Medicine

Campus Restrictions: Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

MEDI 6130 - Musculoskeletal/ Skin Module (12 Credit Hours)

This integrated module is designed to provide the students with an understanding of the normal and abnormal structures and functions of the musculoskeletal system and skin along with the scientific basis of pathology and disease states. Patient cases will be utilized to help the students' gain the knowledge skills needed to develop differential diagnoses, interpret screening and diagnostic studies, and determine therapeutic management plans. This case-based module will include relevant professional, cultural, and biomedical ethical issues, with a focus on evidence based medicine and value-based healthcare. This knowledge is foundational to primary care practice as well as other medical specialties.

Lecture Hours: 5 **Lab Hours:** 6 **Contact Hours:** 4

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia **Major Restrictions:** Medicine **Student Class Restrictions:** Professional **Course**

Level Restrictions: Professional Semester **Degree Restrictions:** Doctor of Medicine **Program Restrictions:** MD_MEDD-Medicine

Campus Restrictions: Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Anatomy Lab Supplies Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 400

MEDI 6150 - MCG YOU+ Learning Communities (4 Credit Hours)

The YOU+ Learning Communities (LCs) module is longitudinal course that is designed to help prepare students for their role as a physician and maximize learning related to professional identity formation. Development of a professional identity involves knowledge, skills and attitudes related to students' practice as well as the environment within which the practice will occur. Students will apply the knowledge and skills gained during the pre-clerkship courses, life, and the materials in this course to help inform and guide their professional identity formation through reflection, relationship, and resilience. The curriculum utilizes facilitated small-group discussion and reflection, active group learning, case-based learning (CBL), online exercises, and supplemental materials for interpersonal and self-directed learning in order to explore the content in a manner that is conducive to varying learning styles. Students are expected to demonstrate professional behaviors toward colleagues, faculty, and other members of their community, including punctuality, reliability, preparation, and participation in all required learning encounters. To pass the course, students will be required to attend all context talks as well as LC group discussions. Attendance at both will be monitored either manually or electronically. Students are required to complete the weekly readings and may be requested to submit a question to the online chatroom or upload an artifact into their e-portfolio. Additionally, students are expected to participate actively in the LC group discussions.

Contact Hours: 4

Repeatability: May be repeated for credit up to five times.

Grade Mode: Satisfactory/Unsatisfactory, Continuing Progress Courses

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Seminar - Small Group

MEDI 6210 - Patient Centered Learning 2 (13 Credit Hours)

Students will continue to build on the skills they developed in the Patient Centered Learning 1 course. Students will continue to interview and examine patients, formulate and prioritize clinical problems, develop clinical diagnostic reasoning skills, and formulate patient care plans. This continued skill development will occur through experiential learning processes that include small group workshops, standardized patient interactions, simulations, procedures skills development, and clinical patient contact. This course allows the students to continue forming their professional identity and demeanor.

Contact Hours: 13

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia **Major Restrictions:** Medicine **Student Class Restrictions:** Professional **Course Level Restrictions:** Professional Semester **Degree Restrictions:** Doctor of Medicine **Program Restrictions:** MD_MEDD-Medicine **Campus Restrictions:** Main Campus **Schedule Type (Primary):** Supervised Lab/Clinic

MEDI 6220 - Cardiopulmonary/Renal (16 Credit Hours)

This integrated module is designed to provide students with an understanding of the normal and abnormal structures and functions of the cardiovascular, pulmonary and renal systems along with scientific basis of pathology and disease states. Patient cases will be utilized to help the students gain the knowledge skills needed to develop differential diagnoses, interpret screening and diagnostic studies, and determine therapeutic management plans. This case-based module will include relevant professional, cultural, and biomedical ethical issues, with a focus on evidence-based medicine and value-based healthcare. This knowledge is foundational to primary care practice as well as other medical specialties.

Lecture Hours: 7 **Lab Hours:** 2 **Contact Hours:** 7

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia **Major Restrictions:** Medicine **Student Class Restrictions:** Professional **Course Level Restrictions:** Professional Semester **Degree Restrictions:** Doctor of Medicine **Program Restrictions:** MD_MEDD-Medicine **Campus Restrictions:** Main Campus **Schedule Type (Primary):** Lecture/Supervised Lab/Clinic

MEDI 6230 - Healthcare Matters Module (4 Credit Hours)

The Healthcare Matters module is designed to provide students the opportunity to build basic knowledge around population care that all physicians must know to run a practice or take a leadership role within healthcare settings. During this module, students will learn about public health, health policy, and patient advocacy through simulations, presentations, and small group activities. Because the medical field is quickly evolving to a more population-based, evidence-based practice, future physicians must understand what it means to promote preventative medicine in the community and touch lives beyond clinical practice.

Lecture Hours: 2 **Contact Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia **Major Restrictions:** Medicine **Student Class Restrictions:** Professional **Course Level Restrictions:** Professional Semester **Degree Restrictions:** Doctor of Medicine **Program Restrictions:** MD_MEDD-Medicine **Campus Restrictions:** Main Campus **Schedule Type (Primary):** Lecture/Supervised Lab/Clinic

MEDI 6240 - GI/Endocrine/Reproduction/Lifespan Module (15 Credit Hours)

This integrated module is designed to provide the students with an understanding of the normal and abnormal structures and functions of the gastrointestinal, endocrine, genitourinary/reproduction systems and lifespan-related topics along with the scientific basis of pathology and disease states. Patient cases will be utilized to help the students' gain the knowledge skills needed to develop differential diagnoses, interpret screening and diagnostic studies, and determine therapeutic management plans. This case-based module will include relevant professional, cultural, and biomedical ethical issues, with a focus on evidence-based medicine and value-based healthcare. This knowledge is foundational to primary care practice as well as other medical specialties.

Lecture Hours: 7 **Lab Hours:** 2 **Contact Hours:** 7

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia **Major Restrictions:** Medicine **Student Class Restrictions:** Professional **Course Level Restrictions:** Professional Semester **Degree Restrictions:** Doctor of Medicine **Program Restrictions:** MD_MEDD-Medicine **Campus Restrictions:** Main Campus **Schedule Type (Primary):** Lecture/Supervised Lab/Clinic

MEDI 6300 - Career Paths in Medicine (0 to 15 Credit Hours)

This introductory module is designed to provide medical students with opportunities to explore various options for different career concentrations. The course will provide students with flexible and personalized experiences in their areas of interest. Choices will include options for learning about research, global health, biomedical ethics, health policy, leadership, and public health. Options will

also be available to allow students to explore various medical specialties.

Contact Hours: 0 to 15

Repeatability: May be repeated for credit.

Grade Mode: Continuing Progress Courses, Audit, Satisfactory/Unsatisfactory

College Restrictions: Medical College of Georgia **Major Restrictions:** Medicine **Student Class Restrictions:** Professional **Course**

Level Restrictions: Professional Semester **Degree Restrictions:** Doctor of Medicine **Program Restrictions:** MD_MEDD-Medicine

Campus Restrictions: Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

MEDI 6310 - Patient Centered Learning 3 (12 Credit Hours)

Students will continue to build on the skills they developed in the Patient Centered Learning 1 and 2 courses. Students will continue to hone their interviewing and physical examination skills, their ability to formulate and prioritize clinical problems, their clinical diagnostic reasoning skills, and their ability to formulate patient care plans. These skills will be developed through experiential learning processes that include small group workshops, standardized patient interactions, simulations, procedures skills development, and clinical patient contact. This course allows the students to continue forming their professional identity and demeanor.

Contact Hours: 12

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Supervised Lab/Clinic

MEDI 6320 - Brain, Behavior, and Movement Module (15 Credit Hours)

This integrated module is divided into two important areas, neurology and psychiatry. It is designed to provide students with an understanding of the normal and abnormal structures and functions of the central nervous system to include the head, neck, and special senses and behavior/psychiatry. Patient cases will be utilized to help the students' gain the knowledge skills needed to develop differential diagnoses, interpret screening and diagnostic studies, and determine therapeutic management plans. This case-based module will include relevant professional, cultural, and biomedical ethical issues, with a focus on evidence based medicine and value-based healthcare. This knowledge is foundational to primary care practice as well as other medical specialties.

Lecture Hours: 6 **Lab Hours:** 6 **Contact Hours:** 6

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

MEDI 6340 - Capstone in Medicine 1 Module (12 Credit Hours)

The capstone course is designed to help prepare students for transition to their clinical clerkships. Students will apply the knowledge and skills gained during the previous pre-clerkship courses to the most common patient cases they will encounter during their clerkships. This case-based module will include relevant professional, cultural, and biomedical ethical issues, with a focus on evidence-based medicine and value-based healthcare.

Lecture Hours: 3 **Lab Hours:** 2 **Contact Hours:** 6

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

MEDI 6410 - Patient Centered Learning - Clerkship Spring (6 Credit Hours)

The Patient Centered Learning (PCL) Clerkship courses are taken during the clerkship phase of the curriculum, with the content corresponding to each of the required courses during those segments of the curriculum. This course is a part of the core curriculum and required for all students, to run continuously with the medical student's tenure in medical school. These courses are designed to build on the content of the previous PCL courses taught during the pre-clerkship experience. Like the preclerkship courses, these PCL courses also have an EPA informed curriculum and offer students the opportunity to have hands on experiences through simulation, case discussions etc. Students will be able to practice and perfect skills taught in the earlier PCL courses as well as in the clerkships in an environment where they function as the primary decision-maker. They will receive both summative and formative feedback related

to specific EPA's.

Lab Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Supervised Lab/Clinic

MEDI 6420 - Patient Centered Learning - Clerkship Fall (6 Credit Hours)

The Patient Centered Learning (PCL) Clerkship 2 course is taken during the fall 3 semester as students are completing the clerkship phase of the curriculum, with the content corresponding to each of the required clerkships during this segment of the curriculum. This course is a part of the core curriculum and required for all students. This course is designed to build on the content of the previous PCL courses taught during the pre-clerkship & clerkship experiences. Like the pre-clerkship courses, these PCL courses also have an EPA informed curriculum and offer students the opportunity to have hands on experiences through simulation, case discussions etc. Students will be able to practice and perfect skills taught in the earlier PCL courses in an environment where they function as the primary decision-maker. They will receive both summative and formative feedback related to specific EPA's.

Lab Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Supervised Lab/Clinic

MEDI 6510 - Patient Centered Learning - Advanced Clerkship (6 Credit Hours)

The PCL – Advanced Clerkship course is taken during the Advanced Clerkship Experience in the spring of their 3rd year. This course is a part of the core curriculum and required for all students, one of the PCL courses that run continuously with the medical student's tenure in medical school. These courses are designed to build on the content of the previous PCL courses taught during the Preclerkship Experience. Like the preclerkship courses, these PCL courses also have an EPA informed curriculum and offer students the opportunity to have hands on experiences through simulation, case discussions etc. Students will be able to practice and perfect skills taught in the earlier PCL courses as well as in the clerkships in an environment where they function as the primary decision-maker. They will receive both summative and formative feedback related to specific EPA's.

Lab Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Supervised Lab/Clinic

MEDI 6590 - Essentials of Clinical Medicine 2-Physical Diagnosis (4 Credit Hours)

The Essentials of Clinical Medicine (ECM) course is a four-semester program designed to equip students with the necessary knowledge, skills, attitudes, and behaviors to perform successfully in the Phase 3 clerkships. ECM is organized into three "courses" (Physical Diagnosis, Problem-based Learning and Foundations of Clinical Practice) with five components (The Art of Doctoring, Population and Public Health, Evidence-based Practice, Problem-based Learning, and Physical Diagnosis), which build sequentially on one another, and are interwoven wherever possible with the core foundational science modules. ECM is designed to ensure a continuity of training for the student across the Phase 1 and 2 years in the areas of professionalism, clinical skills development, cultural competency, public health, evidence-based practice, clinical content, interdisciplinary collaborative teaching, and self-evaluation of performance.

Contact Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Continuing Progress Courses, Audit

Degree Restrictions: Doctor of Medicine

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

MEDI 6591 - Essentials of Clinical Medicine 2-Physical Diagnosis (4 Credit Hours)

The Essentials of Clinical Medicine (ECM) course is a four-semester program designed to equip students with the necessary knowledge, skills, attitudes, and behaviors to perform successfully in the Phase 3 clerkships. ECM is organized into three "courses"

(Physical Diagnosis, Problem-based Learning and Foundations of Clinical Practice) with five components (The Art of Doctoring, Population and Public Health, Evidence-based Practice, Problem-based Learning, and Physical Diagnosis), which build sequentially on one another, and are interwoven wherever possible with the core foundational science modules. ECM is designed to ensure a continuity of training for the student across the Phase 1 and 2 years in the areas of professionalism, clinical skills development, cultural competency, public health, evidence-based practice, clinical content, interdisciplinary collaborative teaching, and self-evaluation of performance.

Contact Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Degree Restrictions: Doctor of Medicine

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

MEDI 6592 - Essentials of Clinical Medicine 2-Problem-based Learning (3 Credit Hours)

The Essentials of Clinical Medicine (ECM) course is a four-semester program designed to equip students with the necessary knowledge, skills, attitudes, and behaviors to perform successfully in the Phase 3 clerkships. ECM is organized into three "courses" (Physical Diagnosis, Problem-based Learning and Foundations of Clinical Practice) with five components (The Art of Doctoring, Population and Public Health, Evidence-based Practice, Problem-based Learning, and Physical Diagnosis), which build sequentially on one another, and are interwoven wherever possible with the core foundational science modules. ECM is designed to ensure a continuity of training for the student across the Phase 1 and 2 years in the areas of professionalism, clinical skills development, cultural competency, public health, evidence-based practice, clinical content, interdisciplinary collaborative teaching, and self-evaluation of performance.

Contact Hours: 2

Repeatability: May be repeated for credit one time.

Grade Mode: Continuing Progress Courses, Audit

Degree Restrictions: Doctor of Medicine

Schedule Type (Primary): Seminar - Small Group

MEDI 6593 - Essentials of Clinical Medicine 2- Problem-based Learning (2 Credit Hours)

The Essentials of Clinical Medicine (ECM) course is a four-semester program designed to equip students with the necessary knowledge, skills, attitudes, and behaviors to perform successfully in the Phase 3 clerkships. ECM is organized into three "courses" (Physical Diagnosis, Problem-based Learning and Foundations of Clinical Practice) with five components (The Art of Doctoring, Population and Public Health, Evidence-based Practice, Problem-based Learning, and Physical Diagnosis), which build sequentially on one another, and are interwoven wherever possible with the core foundational science modules. ECM is designed to ensure a continuity of training for the student across the Phase 1 and 2 years in the areas of professionalism, clinical skills development, cultural competency, public health, evidence-based practice, clinical content, interdisciplinary collaborative teaching, and self-evaluation of performance.

Contact Hours: 2

Repeatability: May be repeated for credit one time.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Degree Restrictions: Doctor of Medicine

Schedule Type (Primary): Seminar - Small Group

MEDI 6594 - Essentials of Clinical Medicine 2-Foundations of Clinical Practice (3 Credit Hours)

The Essentials of Clinical Medicine (ECM) course is a four-semester program designed to equip students with the necessary knowledge, skills, attitudes, and behaviors to perform successfully in the Phase 3 clerkships. ECM is organized into three "courses" (Physical Diagnosis, Problem-based Learning and Foundations of Clinical Practice) with five components (The Art of Doctoring, Population and Public Health, Evidence-based Practice, Problem-based Learning, and Physical Diagnosis), which build sequentially on one another, and are interwoven wherever possible with the core foundational science modules. ECM is designed to ensure a continuity of training for the student across the Phase 1 and 2 years in the areas of professionalism, clinical skills development, cultural competency, public health, evidence-based practice, clinical content, interdisciplinary collaborative teaching, and self-evaluation of performance.

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Continuing Progress Courses, Audit

Degree Restrictions: Doctor of Medicine
Schedule Type (Primary): Lecture

MEDI 6595 - Essentials of Clinical Medicine 2-Foundations of Clinical Practice (7 Credit Hours)

The Essentials of Clinical Medicine (ECM) course is a four-semester program designed to equip students with the necessary knowledge, skills, attitudes, and behaviors to perform successfully in the Phase 3 clerkships. ECM is organized into three "courses" (Physical Diagnosis, Problem-based Learning and Foundations of Clinical Practice) with five components (The Art of Doctoring, Population and Public Health, Evidence-based Practice, Problem-based Learning, and Physical Diagnosis), which build sequentially on one another, and are interwoven wherever possible with the core foundational science modules. ECM is designed to ensure a continuity of training for the student across the Phase 1 and 2 years in the areas of professionalism, clinical skills development, cultural competency, public health, evidence-based practice, clinical content, interdisciplinary collaborative teaching, and self-evaluation of performance.

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Degree Restrictions: Doctor of Medicine

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

MEDI 6596 - OB/Gyn Student Chief (7 Credit Hours)

The elective is designed to allow M4 students an opportunity to practice their leadership skills as they serve as a peer role model to M3 students on the OB/Gyn rotation. The Student Chief will assist the clerkship director by helping M3 student with administrative tasks and required clinical skills. Student must receive the site clerkship director's approval.

Prerequisite(s): OBGN 5000 >= C

Contact Hours: 80

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia **Student Class Restrictions:** Professional **Course Level Restrictions:** Professional Semester **Program Restrictions:** MD_MEDD-Medicine

Schedule Type (Primary): Directed Study (one-to-one)

MEDI 6597 - GMED Student Chief (7 Credit Hours)

This elective is designed to allow M4 students an opportunity to practice their leadership skills as they serve as a peer role model to M3 students on the GMED rotation. Student must receive the site clerkship director's approval.

Contact Hours: 80

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Directed Study (one-to-one)

MEDI 6598 - PSRY Student Chief (7 Credit Hours)

This elective is designed to allow M4 students an opportunity to practice their leadership skills as they serve as peer role model to M3 students on the psychiatry rotation. Student must receive the site clerkship director's approval.

Contact Hours: 80

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Directed Study (one-to-one)

MEDI 6599 - SURG Student Chief (7 Credit Hours)

This elective is designed to allow M4 students an opportunity to practice their leadership skills as they serve as a peer role model to M3 students on the Surgery rotation. Student must receive approval from Site CD.

Contact Hours: 80

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit
Schedule Type (Primary): Directed Study (one-to-one)

MEDI 6610 - Patient Centered Learning - Enrichment Fall (6 Credit Hours)

The PCL – Enrichment courses are taken during the Enrichment Phase of the curriculum with the content corresponding to each of the required courses during those segments of the curriculum. This course is a part of the core curriculum and required for all students, to run continuously with the medical student's tenure in medical school. These courses are designed to build on the content of the previous PCL courses taught during the Preclerkship Experience. Like the preclerkship courses, these PCL courses also have an EPA informed curriculum and offer students the opportunity to have hands on experiences through simulation, case discussions etc. Students will be able to practice and perfect skills taught in the earlier PCL courses as well as in the clerkships in an environment where they function as the primary decision-maker. They will receive both summative and formative feedback related to specific EPA's.

Lab Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Supervised Lab/Clinic

MEDI 6620 - Patient Centered Learning - Enrichment Spring (6 Credit Hours)

The PCL Enrichment courses are taken during the Enrichment Phases of the curriculum with the content corresponding to each of the required courses during those segments of the curriculum. This course is a part of the core curriculum and required for all students, to run continuously with the medical student's tenure in medical school. These courses are designed to build on the content of the previous PCL courses taught during the Preclerkship Experience. Like the preclerkship courses, these PCL courses also have an EPA informed curriculum and offer students the opportunity to have hands on experiences through simulation, case discussions etc. Students will be able to practice and perfect skills taught in the earlier PCL courses as well as in the clerkships in an environment where they function as the primary decision-maker. MEDR 5226 - Module 2: Genitourinary System (1 Credit Hour)

This module is designed to provide you with an overview of the clinical, pathological and treatment aspects of genitourinary system diseases. The Medical Partnership (MP) curriculum integrates the basic and clinical sciences, utilizing case-based and problem-based learning (CBL & PBL) facilitated by basic scientists and clinicians, as well as large group learning opportunities. In year 2, students examine patient problems from a biological, behavioral, and epidemiological, as well as common direct clinical perspective. Basic science is integrated in the context of patient-centered learning, using real and simulated patients. Through our integrated curriculum, students develop the interpersonal, interview, physical examination and communication skills that will permit them to solve and resolve patient problems. Threads in the MP curriculum include Foundational Sciences, Applied Clinical Skills, Clinical Skills Practice, Art of Doctoring, Ethics & Professionalism, Evidence-Based Medicine & Practice, Professional Identity Formation & Resiliency and Community & Population Health. Clinical experiences under the supervision of a clinical preceptors allow for data gathering, abnormality identification, hypothesis generation, and the development of learning issues. Through the curriculum, students are prepared for the more independent, more complex experiences of their clerkship years, postgraduate residency training programs and professional life.

MEDR 6110 - Patient Centered Learning 1 Module Remediation (1 Credit Hour)

This is the remediation course for the introductory course PCL 1 module which allows students to begin their development of patient centered skills. Students will learn how to interview and examine patients, establish rapport, formulate and prioritize clinical problems, develop clinical diagnostic reasoning skills, and begin to formulate patient care plans. These skills will be developed through experiential learning processes that include small group workshops, standardized patient interactions, simulations, procedures skills development, and clinical patient contact. The course allows the students to begin forming, in a very real way, their professional identity and demeanor.

Lab Hours: 2 **Contact Hours:** 5

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia **Campus Restrictions:** Main Campus

Schedule Type (Primary): Independent Study

MEDR 6120 - Foundations of Medicine Module Remediation (1 Credit Hour)

This course is the remediation of the Foundations of Medicine Module, which is an integrated, introductory module that is designed to provide the students with an understanding of the foundational principles of medicine including those related to cellular and molecular principles of medicine, genetics and early development, biochemistry, physiology, medical therapeutics, histopathology, microbiology and immunology. Students will focus on clinically relevant normal and abnormal cellular structure and function (including regulation), the operations of the genome, the features of early development as well as the biological mechanisms by which the body responds to external stimuli. Through the use of patient cases, students will be introduced to the language, concepts, and treatment of disease to show how alterations in structure, function, and development are associated with disease states. This case-based module will include relevant professional, cultural, and biomedical ethical issues, with a focus on evidence based medicine and value-based healthcare. This knowledge is foundational to primary care practice as well as other medical specialties.

Contact Hours: 5

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia **Campus Restrictions:** Main Campus

Schedule Type (Primary): Independent Study

MEDR 6130 - Musculoskeletal/Skin Module Remediation (1 Credit Hour)

This is a remediation course for the Musculoskeletal/Skin integrated module that is designed to provide the students with an understanding of the normal and abnormal structures and functions of the musculoskeletal system and skin along with the scientific basis of pathology and disease states. Patient cases will be utilized to help the students' gain the knowledge skills needed to develop differential diagnoses, interpret screening and diagnostic studies, and determine therapeutic management plans. This case-based module will include relevant professional, cultural, and biomedical ethical issues, with a focus on evidence based medicine and value-based healthcare. This knowledge is foundational to primary care practice as well as other medical specialties.

Contact Hours: 5

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia **Campus Restrictions:** Main Campus

Schedule Type (Primary): Independent Study

MEDR 6150 - YOU+ Remediation (1 Credit Hour)

Remediation for YOU+ Course

Contact Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Independent Study

MEDR 6210 - Patient Centered Learning 2 Module Remediation (1 Credit Hour)

This is the remediation course for the PCL 2 Module in which students will continue to build on the skills they developed in the Patient Centered Learning 1 course. Students will continue to interview and examine patients, formulate and prioritize clinical problems, develop clinical diagnostic reasoning skills, and formulate patient care plans. This continued skill development will occur through experiential learning processes that include small group workshops, standardized patient interactions, simulations, procedures skills development, and clinical patient contact. This course allows the students to continue forming their professional identity and demeanor.

Lab Hours: 2 **Contact Hours:** 5

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia **Campus Restrictions:** Main Campus

Schedule Type (Primary): Independent Study

MEDR 6220 - Cardiopulmonary/Heme Module Remediation (1 Credit Hour)

This is the remediation course for an integrated module that is designed to provide students with an understanding of the normal and abnormal structures and functions of the cardiovascular and hematopoietic systems along with scientific basis of pathology and disease states. Patient cases will be utilized to help the students' gain the knowledge skills needed to develop differential diagnoses, interpret screening and diagnostic studies, and determine therapeutic management plans. This case-based module will include relevant professional, cultural, and biomedical ethical issues, with a focus on evidence based medicine and value-based healthcare. This knowledge is foundational to primary care practice as well as other medical specialties.

Contact Hours: 5

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia **Campus Restrictions:** Main Campus

Schedule Type (Primary): Independent Study

MEDR 6230 - Healthcare Matters Module Remediation (1 Credit Hour)

This is the remediation course for the Healthcare Matters module which is designed to provide students the opportunity to build basic knowledge around population care that all physicians must know to run a practice or take a leadership role within healthcare settings. During this module, students will learn about public health, health policy, and patient advocacy through simulations, presentations, and small group activities. Because the medical field is quickly evolving to a more population-based, evidence-based practice, future physicians must understand what it means to promote preventative medicine in the community and touch lives beyond clinical practice.

Contact Hours: 5

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia **Campus Restrictions:** Main Campus

Schedule Type (Primary): Independent Study

MEDR 6240 - GI/GU/Endocrine Module Remediation (1 Credit Hour)

This is the remediation course for the integrated GI/GU/Endocrine module which is designed to provide the students with an understanding of the normal and abnormal structures and functions of the gastrointestinal, genitourinary, and endocrine systems along with the scientific basis of pathology and disease states. Patient cases will be utilized to help the students' gain the knowledge skills needed to develop differential diagnoses, interpret screening and diagnostic studies, and determine therapeutic management plans. This case-based module will include relevant professional, cultural, and biomedical ethical issues, with a focus on evidence based medicine and value-based healthcare. This knowledge is foundational to primary care practice as well as other medical specialties.

Contact Hours: 5

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia **Campus Restrictions:** Main Campus

Schedule Type (Primary): Independent Study

MEDR 6300 - Career Paths in Medicine Module Remediation (1 Credit Hour)

This is the remediation course for the introductory module which is designed to provide medical students with opportunities to explore various options for different career concentrations. The course will provide students with flexible and personalized experiences in their areas of interest. Choices will include options for learning about research, global health, biomedical ethics, health policy, leadership, and public health. Options will also be available to allow students to explore various medical specialties.

Contact Hours: 5

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia **Campus Restrictions:** Main Campus

Schedule Type (Primary): Independent Study

MEDR 6310 - Patient Centered Learning 3 Module Remediation (1 Credit Hour)

This is the remediation course for the PCL 3 module in which students will continue to build on the skills they developed in the Patient Centered Learning 1 and 2 courses. Students will continue to hone their interviewing and physical examination skills, their ability to formulate and prioritize clinical problems, their clinical diagnostic reasoning skills, and their ability to formulate patient care plans. These skills will be developed through experiential learning processes that include small group workshops, standardized patient interactions, simulations, procedures skills development, and clinical patient contact. This course allows the students to continue forming their professional identity and demeanor.

Lab Hours: 2 **Contact Hours:** 5

Repeatability: May not be repeated for credit.

College Restrictions: Medical College of Georgia **Campus Restrictions:** Main Campus

Schedule Type (Primary): Independent Study

MEDR 6320 - Brain, Behavior, and Movement Module Remediation (1 Credit Hour)

This is the remediation course for the Brain/Behavior/Movement integrated module which is divided into two important areas, neurology and psychiatry. It is designed to provide students with an understanding of the normal and abnormal structures and functions of the central nervous system to include the head, neck, and special senses and behavior/psychiatry. Patient cases will be utilized to help the students' gain the knowledge skills needed to develop differential diagnoses, interpret screening and diagnostic studies, and determine therapeutic management plans. This case-based module will include relevant professional, cultural, and biomedical ethical issues, with a focus on evidence based medicine and value-based healthcare. This knowledge is foundational to primary care practice as well as other medical specialties.

Contact Hours: 5

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia **Campus Restrictions:** Main Campus

Schedule Type (Primary): Independent Study

MEDR 6330 - Healthcare Across the Lifespan Module Remediation (1 Credit Hour)

This is the remediation course for the Healthcare across the Lifespan module which is designed to equip medical students with the knowledge, skills, and attitudes to enable students to better address the health and well being needs of patient across the lifespan

continuum from conception to end-of-life. This case-based module will include relevant professional, cultural, and biomedical ethical issues, with a focus on evidence based medicine and value-based healthcare. This knowledge is foundational to primary care practice as well as medical specialties.

Contact Hours: 5

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia **Campus Restrictions:** Main Campus

Schedule Type (Primary): Independent Study

MEDR 6340 - Capstone in Medicine 1 Module Remediation (1 Credit Hour)

This is the remediation course for the capstone module which is designed to help prepare students for transition to their clinical clerkships. Students will apply the knowledge and skills gained during the previous pre-clerkship courses to the most common patient cases they will encounter during their clerkships. This case-based module will include relevant professional, cultural, and biomedical ethical issues, with a focus on evidence based medicine and value-based healthcare.

Contact Hours: 5

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia **Campus Restrictions:** Main Campus

Schedule Type (Primary): Independent Study

MEDR 6410 - Patient-Centered Learning Clerkship - Remediation (1 Credit Hour)

This is a remediation course for the clerkship year patient centered learning course.

Contact Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Independent Study

MEDR 6510 - Patient-Centered Learning Advanced Clerkship Remediation (1 Credit Hour)

This is a remediation course for the PCL Advanced Clerkship Course.

Contact Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Independent Study

MEDR 6591 - Essentials of Clinical Medicine 2 - Physical Diagnosis Remediation (1 Credit Hour)

Remediation of the Essentials of Clinical Medicine 2 - Physical Diagnosis course

Lab Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Degree Restrictions: Doctor of Medicine

Schedule Type (Primary): Independent Study

MEDR 6593 - Essentials of Clinical Medicine 2 - Problem Based Learning Remediation (1 Credit Hour)

Remediation of the Essentials of Clinical Medicine 2 - Problem Based Learning course

Lab Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Degree Restrictions: Doctor of Medicine
Schedule Type (Primary): Independent Study

MEDR 6595 - Essentials of Clinical Medicine 2 – Foundations of Clinical Practice Remediation (1 Credit Hour)

Remediation of the Essentials of Clinical Medicine 2 – Foundations of Clinical Practice course.

Lab Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Degree Restrictions: Doctor of Medicine

Schedule Type (Primary): Independent Study

MEDR 6610 - Patient-Centered Learning Enrichment - Remediation (1 Credit Hour)

This is a remediation course for the PCL Enrichment course.

Contact Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Independent Study

RADM 5001 - Radiology Externship (4 to 8 Credit Hours)

This four-week elective provides a basic overview of clinical radiology. Students rotate through most of the major areas of radiology, participating in the clinical diagnostic process. In addition to clinical rotations, lectures and case conferences are scheduled throughout the rotation. The primary goal of the elective is to help students develop a better understanding of the functions of radiology as a contributor to primary care of the patient. Students learn to recognize certain basic radiographic signs and patterns; however, it is not intended that students will be able to "read" a radiograph at the end of the elective.

Lecture Hours: 10 **Contact Hours:** 30

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

RADM 5003 - Pediatric Radiology Externship (4 to 8 Credit Hours)

This clerkship is designed for students who have an interest in either Diagnostic Radiology, Pediatrics, or Family Medicine. The four-week rotation will include exposure to radiography, fluoroscopy, CT, ultrasound, and MRI of the pediatric patient. In addition to didactic lectures, students attend film reading sessions with faculty and resident(s).

Lecture Hours: 10 **Contact Hours:** 30

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

RADM 5004 - Advanced Diagnostic Radiology Externship (4 to 8 Credit Hours)

The goals of this course include understanding the modalities to image pathology, and determining an efficient approach to the radiologic evaluation of the patient for those students desiring additional exposure to diagnostic radiology.

Lecture Hours: 3 **Contact Hours:** 40

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

RADM 5005 - Radiology Off-Campus Externship (4 to 8 Credit Hours)

This elective is designed for students who are considering pursuit of a radiology residency and would like to obtain additional and varied experiences in the field.

Lecture Hours: 10 **Contact Hours:** 30

Repeatability: May be repeated for credit up to 3 times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Supervised Lab/Clinic

RADM 5007 - Vascular/Interventional Radiology Externship (4 to 8 Credit Hours)

Prerequisite: Phase III The student and the attending set specific goals and plan learning activities that will lead to attainment of the student's objectives.

Contact Hours: 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Supervised Lab/Clinic

RADM 5013 - Radiology Research Elective (4 to 8 Credit Hours)

Prerequisite: None **Goals:** The goal of this elective is to provide the student with an opportunity to learn fundamental methods and experimental design in radiology research. The research activities shall have direct relevance to the clinical interests of the student;

Objectives: To guide the student in the fundamental process of basic science/clinical research including the development of a short research proposal, implementation of experimental methods and critical exchange of ideas with other researchers; **Activities:** The student will participate in writing a short research proposal relevant to a project in the PI's lab. The student will gain knowledge of the literature of the field, will obtain training and experience in appropriate laboratory methods, analysis and critical interpretation of experimental data; will participate/attend journal clubs, lab meetings and departmental seminars as deemed appropriate by the PI;

Assessment: The student will submit a well written, 2-3 page summary of the research describing the hypothesis tested, relevant literature, methods used and data obtained as well as a comprehensive, yet succinct discussion of how the findings obtained add to the body of knowledge being investigated.

Lab Hours: 8

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Supervised Lab/Clinic

RADM 5015 - Introduction to Clinical Ultrasound (4 to 8 Credit Hours)

This course is designed to promote ultrasound technology as a clinical skills tool to enhance the educational experience of MCG medical students with basic science content and to transform basic knowledge and experience of MCG medical students with ultrasound technology to enable readiness to incorporate this skills set into clinical practice.

Lecture Hours: 4 **Lab Hours:** 4 **Contact Hours:** 4

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MD_MEDDD-Medicine

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

RADM 5020 - Process Improvement in Healthcare (3 Credit Hours)

During the course, students learn quality and process improvement tools, the LEAN methodology, and the use of data visualization tools. The 7-month course (September – March) begins with a one-hour introduction lecture, which includes goals objectives, and the procedures for developing a process improvement project. Each month consists of a two-hour lecture and discussion, totaling 14 hours of lecture with additional time required for process improvement project planning. The project requires independent data collection. Required readings are provided. Students work one-on-one with a faculty member to develop a process improvement project. Students must spend scheduled time with faculty during each month and present a successful design of a process improvement project by the

end of the course. Students should complete six months of clinical rotations before enrolling in the course. The course will accept 20 students per year.

Lecture Hours: 2 Contact Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Degree Restrictions: Doctor of Medicine

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

RADM 5085 - Phase I Elective: Introduction to Radiology (1 Credit Hour)

Examine the process of radiologic diagnosis through assigned readings, clinical activities, and discussions with faculty. A daily log of activities and impressions will be kept and turned in to the course coordinator at the end of the course.

Lecture Hours: 2 Contact Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

RMEN 5000 - Metabolic Endocrine Disease (27 Credit Hours)

Lecture Hours: 10 Contact Hours: 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Internship/Practicum

MDPH 5098 - MD/PHD Transition Research (2 to 12 Credit Hours)

This course is designed for MD/PhD student research rotations during the MD program portion of their training. It is expected during this period that the student work with an individual faculty member on a specific investigative research problem. The experience is intended as an introduction to analytical techniques in context to disease-oriented research. In addition, the course is used for MD/PhD program students transitioning from the MD to the PhD training component. It is expected during this transition period that the student assimilate back into their specific biomedical research program, but they may also use a portion of this time for study of USMLE Step 1 or USMLE Step 2 exams.

Lab Hours: 2

Repeatability: May be repeated for credit one time.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: The Graduate School , Medical College of Georgia

Schedule Type (Primary): Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

MGED 3100 - The Nature and Needs of the Middle Grades Learner (3 Credit Hours)

This course is designed to enable teacher candidates to analyze and examine the nature of the middle grades student. The developmental needs and characteristics of students as adolescents and as individuals will be studied. A special focus on involving parents and the community in meeting the unique needs of middle grades students will be addressed. A field experience component is required in a local school setting.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised

Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

MGED 3200 - Active Learning in the Middle Grades Classroom (3 Credit Hours)

Students will examine the elements of middle grades curriculum and instruction that is challenging, exploratory, integrative, and relevant. An emphasis will be placed on learner-centered pedagogy that engages young adolescents in active learning. Strategies to incorporate technology into instruction in the middle grades classroom will also be addressed. A field experience component is required in a local school setting.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

MGED 3222 - Integrated Reading to Learn (3 Credit Hours)

Students will develop strategies to effectively engage Middle Grade students in reading across content areas. Students will develop approaches which emphasize reading as a means to learn. Students will also develop strategies to enable students to deal with reading deficiencies and other challenges students may face as readers in the Middle Grades. A field experience component is required in a local school setting.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Supervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction

MGED 3241 - Social Studies Education for Middle Grades (3 Credit Hours)

This course will emphasize how the conceptual themes and modes of inquiry represented in the national social studies standards are to be applied when formulating instruction and assessment activities that are appropriate to middle grade students. Special emphasis will be placed on concept formulation, thematic problem solving, strategic learning, complex skill development, and performance assessment. A field experience component is required in a local school setting.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Seminar-Small Group, Independent Study, Directed Study (one-to-one), Asynchronous Instruction

MGED 3251 - Science Education for Middle Grades (3 Credit Hours)

This course emphasizes approaches to teaching science content that reflect understanding of the distinct characteristics of middle school students, the importance of inquiry and discovery in the process of coming to understand science content, and the framework provided by national and state science standards. A field experience component is required in a local school setting.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction

MGED 3300 - Middle Level Programs and Schools (3 Credit Hours)

Students will examine the origins and principles of the middle school movement, along with the current structure of middle level schools and programs. Principles of professionalism and professional learning communities will be explored, as well as the core principles of interdisciplinary instruction and teaming. A field experience component is required in a local school setting.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

MGED 4100 - Assessment and Differentiation in the Middle Grades (3 Credit Hours)

Examines principles and strategies of effective classroom assessment techniques, as well as methods for using assessment to inform instruction in a differentiated middle grades classroom setting. Special focus is placed on providing support to meet the needs of all learners. A field experience component is required in a middle grades school setting.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1BSED-MIDDLE-BSED-Middle Grades Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

MGED 4200 - Classroom Management in Middle Grades (3 Credit Hours)

This course is designed to examine a variety of approaches for effective classroom management in the middle grades classroom. A special emphasis will be placed on current issues in contemporary middle schools. A field experience component is required in a local school setting.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

MGED 4210 - Middle Grades Culminating Residency (13 Credit Hours)

Students are placed with selected master teachers for an entire semester during which time they are teaching in the curriculum areas for which they are seeking certification. During the semester, the apprentice teacher, under the supervision of the master teacher, assumes the responsibilities of professional teaching practice. During this semester, apprentices meet regularly with the master teachers and university coordinators in seminar to examine issues and problems of practice. Students reflect on and synthesize the conceptual and theoretical constructs of pedagogy with the complexity of practice. Successful completion of all components of middle grades sequence is required prior to culminating residency.

Corequisite(s): EDTD 4940

Lab Hours: 26

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Student Teaching Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 200

MILS 1000 - Military Science Leadership Development Laboratory (0 Credit Hours)

The Military Science minor is primarily designed for the student planning a career in the U.S. Army as a commissioned officer. Military Science teaches skills that are vital for professional success on and off the battlefield, such as group leadership, management positions and public speaking. Leadership is the process of influencing an individual or a team of people by providing them purpose, direction, and motivation to accomplish assigned missions and to improve the team for the future. Courses should be arranged in consultation with your major department and the Professor of Military Science.

Repeatability: May be repeated for credit up to eight times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

MILS 1011 - Foundations of Officership (3 Credit Hours)

Introduces students to issues and competencies that are central to a commissioned officer's responsibilities. Establishes framework for understanding officership, leadership, and Army values followed by "life skills" such as physical fitness and time management. This

course is designed to give the cadet insight into the Army profession and the officer's role within the Army. Open to all students.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

MILS 1021 - Basic Leadership (3 Credit Hours)

Establishes foundation of basic leadership fundamentals such as problem solving, communications, briefings and effective writing, goal setting, techniques for improving listening and speaking skills and an introduction to counseling.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

MILS 1506 - U.S. Army Physical Readiness and Fitness Training (1 Credit Hour)

The Military Science minor is primarily designed for the student planning a career in the U.S. Army as a commissioned officer. Military Science teaches skills that are vital for professional success on and off the battlefield, such as group leadership, management positions and public speaking. Leadership is the process of influencing an individual or a team of people by providing them purpose, direction, and motivation to accomplish assigned missions and to improve the team for the future. Courses should be arranged in consultation with your major department and the Professor of Military Science.

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

MILS 2011 - Individual Leadership Studies (3 Credit Hours)

A study of a leader of a small organization. A practical exercise for the student to learn how to plan, organize, execute tasks, manage time and make sound decisions. Enrolled/contracted ROTC cadets can participate in a weekend exercise to put all skills to practice.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

MILS 2021 - Leadership and Teamwork (3 Credit Hours)

Study examines how to build successful teams, various methods for influencing action, effective communication in setting and achieving goals, the importance of timing the decision, creativity in the problem solving process, and obtaining team buy-in through immediate feedback.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

MILS 3011 - Leadership and Problem Solving (3 Credit Hours)

Students conduct self-assessment of leadership style, develop a personal fitness regimen, and learn to plan and conduct individual/small group tactical training while testing reasoning and problem-solving techniques. Students will receive direct feedback on

leadership abilities. Students will also receive an introduction to the basic fundamentals of military map reading and land navigation.

Prerequisite(s): Permission of Department Chair.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

MILS 3021 - Leadership and Ethics (3 Credit Hours)

Examines the role of communications, values, and ethics in effective leadership. Topics include ethical decision-making, consideration of others, spirituality in the military, and a survey of Army leadership doctrine. Emphasis on improving oral and written communication abilities and improving land navigation as applied with the military small unit leader. Includes further development of small unit tactics, leadership skills, and physical conditioning. Prerequisite(s): Permission of Department Chair.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

MILS 3060 - Leadership Training Course Summer Internship (3 Credit Hours)

A five week summer internship conducted at Fort Knox, KY. Students participate in physical training, land navigation, weapons and tactics, and leadership development. Successful completion qualifies individuals to validate or compete for a two year scholarship.

Prerequisite(s): Permission of Department Chair. 2.5 GPA for scholarship.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MILS 4011 - Leadership Management (3 Credit Hours)

Develops student proficiency in planning and executing complex operations, functioning as a member of a staff, and mentoring subordinates. Students explore training management, methods of effective staff collaboration, and developmental counseling techniques.

Prerequisite(s): MILS 3021 >= C

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

MILS 4021 - Officership (3 Credit Hours)

Focuses on completing the transition from cadet to lieutenant. Study includes case study analysis of military law and practical exercises on establishing an ethical command climate. Students must complete a semester long Senior Leadership Project that requires them to plan, organize, collaborate, analyze, and demonstrate their leadership skills.

Prerequisite(s): MILS 4011 >= C

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis

Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

MILS 4060 - Leadership Development and Assessment (3 Credit Hours)

A five-week summer internship conducted at Fort Lewis, WA. Students participate in physical training, land navigation, weapons and tactics, and leadership development. The final camp score is part of the student's accessions packet for service in the Army.

Prerequisite(s): MILS 3021 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

MILS 4950 - Selected Topics (3 Credit Hours)

An intensive/detailed study of an Army military battle. Study involves current Army doctrine, tactics, techniques, and procedures and how commanders won or lost the battle. Prerequisite(s): Permission of Department Chair.

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MOIM 8030 - Biological Signaling (3 Credit Hours)

Prerequisite: Completion of first year biomedical sciences graduate core curriculum. Strategies of communication at various levels of biological organization. Covers intracellular communication, communication between cells in multi-cellular organisms, and interactions between organisms in a group or ecosystem. Focuses on emergent properties of complex systems.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture

MOIM 8040 - Molecular Oncology and Immunology (3 Credit Hours)

Prerequisite: Completion of first year biomedical sciences graduate core curriculum. This course covers a variety of current topics centered on specific human diseases with a molecular aspect to diagnosis or treatment. Clinical case presentations form the starting point for an interactive discussion of the interface between basic research and clinical medicine. The course emphasizes acquisition of skills in interpreting cutting-edge primary scientific literature, and synthesizing this knowledge with real world patient care.

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Seminar-Small Group

MOIM 8130 - Advanced Topics in Molecular and Cellular Immunology (3 Credit Hours)

Prerequisite: Completion of first year biomedical sciences graduate core curriculum. Also open to medical students with interests in basic immunology. This course will cover current topics in immunology including tolerance, thymocytes development, lymphocyte activation, immunological memory, cell adhesion and cell cycle control. The course will emphasize an understanding of the molecular mechanisms of immune responses and will focus on gaining a critical understanding of the on gaining a critical understanding of the current scientific literature in immunology.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Directed Study (one-to-one)

MOIM 8300 - Thesis Research (1 to 12 Credit Hours)

This course requires permanent assignment to a specific lab with a faculty advisor and a defined research project. The student works under the mentorship of their faculty thesis advisor to define, develop, and carry out the basic study of a research problem of interest to both student and advisor. This course is designed to develop the experience, understanding, and skills to conduct and assess original, independent research in biomedical science. This course is typically taken more than one time and culminates in the final semester in the preparation and defense of a MS thesis.

Lab Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MS_MOLM-Molecular Medicine

Schedule Type (Primary): Thesis

MOIM 9010 - Advanced Seminar in Molecular Oncology and Immunology (1 Credit Hour)

Seminar-style course covers a single, current topic in Molecular Oncology and Immunology.

Prerequisite(s): Completion of first year biomedical sciences graduate core curriculum.

Contact Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Seminar-Small Group

MOIM 9020 - Seminar in Molecular Oncology and Immunology (1 Credit Hour)

Training in critical evaluation of basic biomedical research. Students are expected to attend seminars given by both internal and external speakers to provide written summaries of some of the topics presented.

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy

Schedule Type (Primary): Seminar - Small Group

MOIM 9030 - Seminars in Molecular Oncology and Immunology (1 Credit Hour)

This course will provide training in critical evaluation of basic biomedical research. Students will be expected to attend seminars given by both internal and external speakers and to provide written summaries of some of the topics presented. This course is offered in the spring semester.

Contact Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Seminar - Small Group

MOIM 9040 - Molecular Oncology and Immunology Journal Club (1 Credit Hour)

Provides: 1) In-depth discussion of current topics in Molecular Oncology and Immunology; 2) The opportunity to critically evaluate and present current papers; 3) Discussion of current techniques in the field; and 4) Faculty mentoring of students in career skills (e.g.,

searching for postdoc positions, job interviews, balancing family and science). Each week the discussion focuses on a current scientific paper, classic techniques paper, or opinion paper, depending on the goal described above. Each senior student (third year plus) selects and presents a paper to the class. Presentations are followed by a class discussion. Feedback on student performance is provided by the faculty mentor assigned to the topic. Discussions of current techniques and career skills is led by faculty experts. This course enhances students' ability to analyze and present scientific literature.

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: DPHIL_MOLM-Molecular Medicine

Schedule Type (Primary): Lecture

MOIM 9210 - Investigation of a Problem (1 to 12 Credit Hours)

This course is a laboratory rotation course that allows students to spend time during their first year in a faculty member's lab and prior to completion of the second qualifying examination.

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: The Graduate School **Major Restrictions:** Molecular Medicine **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Program Restrictions:** DPHIL_MOLM-Molecular Medicine

Schedule Type (Primary): Supervised Lab/Clinic

MOIM 9300 - Research (1 to 12 Credit Hours)

Permanent assignment to a specific lab with a major advisor and a defined research project. After successful completion of the second qualifying examination, the student works closely with their major advisor on an in-depth study of a research problem of interest to both student and advisor. This course culminates in the preparation of a PhD dissertation. Enrollment in this course requires official admission to candidacy.

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: The Graduate School **Major Restrictions:** Molecular Medicine **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Program Restrictions:** DPHIL_MOLM-Molecular Medicine

Schedule Type (Primary): Dissertation

MUSM 3950 - Introduction to Museum Studies (3 Credit Hours)

Designed for students interested in museums and curious about museum careers, this course serves as an introduction to the field of museum studies. Using short lectures, discussion, laboratory exercises, field trips, and guest speakers, students will explore the history and function of museums, and will examine museums of history, anthropology, art, natural history, and children's museums. Students will come to understand the changing role of museums over time, the variety of types of museums and exhibitions, and will learn to think critically about the future of museums.

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Lecture/Unsupervi Lab/Clinic, Seminar-Small Group, Asynchronous Instruction

MUSM 3960 - Museum Management and Leadership (3 Credit Hours)

This course introduces students to the interior workings of museums. Students will explore collection management, interpretation, mission statements, communications needs, museum ethics, and nonprofit management. Basic concepts of fundraising and public relations are introduced. Student examine collaborations with K-12 educators, programs to develop and manage volunteer docents, and museums as part of a community's cultural resource management and economic development.

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Asynchronous Instruction

MUSM 4950 - Selected Topics in Museum Studies (1 to 4 Credit Hours)

An intensive study of a selected topic in Museum Studies not addressed in the current curriculum.

Lecture Hours: 1 to 4

Repeatability: May be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Course Level Restrictions: US Undergraduate

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar Small Group, Directed Study (one-to-one), Asynchronous Instruction

MUSM 4960 - Internship (1 to 3 Credit Hours)

Internship hours with a museum or organization that provides an opportunity to apply theory to exhibit-work environment or collections.

Lecture Hours: 1 to 3 **Lab Hours:** 1 to 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Internship/Practicum

MUSA 1100 - Voice Secondary (1 Credit Hour)

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1101 - Voice Concentration (1 Credit Hour)

Corequisite(s): MUSA 2105 and MUSI 1621

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1102 - Voice Concentration (1 Credit Hour)

Prerequisite(s): MUSA 1101 >= C

Corequisite(s): MUSA 2105 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-

one),Practice Teaching

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1210 - Flute Secondary (1 Credit Hour)

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Practice Teaching,Internship/Practicum,Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1211 - Flute Concentration (1 Credit Hour)

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Practice Teaching,Internship/Practicum,Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1212 - Flute Concentration (1 Credit Hour)

Prerequisite(s): MUSA 1211 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Practice Teaching

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1220 - Oboe Secondary (1 Credit Hour)

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Practice Teaching,Internship/Practicum,Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1221 - Oboe Concentration (1 Credit Hour)

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1222 - Oboe Concentration (1 Credit Hour)

Prerequisite(s): MUSA 1221 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1230 - Clarinet Secondary (1 Credit Hour)

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1231 - Clarinet Concentration (1 Credit Hour)

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1232 - Clarinet Concentration (1 Credit Hour)

Prerequisite(s): MUSA 1231 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-

one),Practice Teaching

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1240 - Bassoon Secondary (1 Credit Hour)

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1241 - Bassoon Concentration (1 Credit Hour)

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Practice Teaching,Internship/Practicum,Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1242 - Bassoon Concentration (1 Credit Hour)

Prerequisite(s): MUSA 1241 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Practice Teaching

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1250 - Saxophone Secondary (1 Credit Hour)

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Practice Teaching,Internship/Practicum,Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1251 - Saxophone Concentration (1 Credit Hour)

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1252 - Saxophone Concentration (1 Credit Hour)

Prerequisite(s): MUSA 1251 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1310 - Trumpet Secondary (1 Credit Hour)

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1311 - Trumpet Concentration (1 Credit Hour)

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1312 - Trumpet Concentration (1 Credit Hour)

Prerequisite(s): MUSA 1311 >= C

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1320 - Horn Secondary (1 Credit Hour)

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1321 - Horn Concentration (1 Credit Hour)

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1322 - Horn Concentration (1 Credit Hour)

Prerequisite(s): MUSA 1321 >= C

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1330 - Trombone Secondary (1 Credit Hour)

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1331 - Trombone Concentration (1 Credit Hour)

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis
Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1332 - Trombone Concentration (1 Credit Hour)

Prerequisite(s): MUSA 1331 >= C
Corequisite(s): MUSA 2305 and MUSI 1500
Lecture Hours: 1
Repeatability: May be repeated for credit.
Grade Mode: Normal, Audit
Major Restrictions: Music Education, Music, Performance
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching
Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1340 - Euphonium Secondary (1 Credit Hour)

Repeatability: May be repeated for credit.
Grade Mode: Normal, Audit
Major Restrictions: Music Education, Music, Performance
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis
Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1341 - Euphonium Concentration (1 Credit Hour)

Corequisite(s): MUSA 2305 and MUSI 1500
Lecture Hours: 1
Repeatability: May be repeated for credit.
Grade Mode: Normal, Audit
Major Restrictions: Music Education, Music, Performance
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis
Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1342 - Euphonium Concentration (1 Credit Hour)

Prerequisite(s): MUSA 1341 >= C
Corequisite(s): MUSA 2305 and MUSI 1500
Lecture Hours: 1
Repeatability: May be repeated for credit.
Grade Mode: Normal, Audit
Major Restrictions: Music Education, Music, Performance
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching
Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1350 - Tuba Secondary (1 Credit Hour)

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1351 - Tuba Concentration (1 Credit Hour)

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1352 - Tuba Concentration (1 Credit Hour)

Prerequisite(s): MUSA 1351 >= C

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1410 - Percussion Secondary (1 Credit Hour)

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1411 - Percussion Concentration (1 Credit Hour)

Corequisite(s): MUSA 2405 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis
Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1412 - Percussion Concentration (1 Credit Hour)

Prerequisite(s): MUSA 1411 >= C
Corequisite(s): MUSA 2405 and MUSI 1500
Lecture Hours: 1
Repeatability: May be repeated for credit.
Grade Mode: Normal, Audit
Major Restrictions: Music Education, Music, Performance
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching
Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1510 - Violin Secondary (1 Credit Hour)

Repeatability: May be repeated for credit.
Grade Mode: Normal, Audit
Major Restrictions: Music Education, Music, Performance
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis
Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1511 - Violin Concentration (1 Credit Hour)

Corequisite(s): MUSA 2505 and MUSI 1500
Lecture Hours: 1
Repeatability: May be repeated for credit.
Grade Mode: Normal, Audit
Major Restrictions: Music Education, Music, Performance
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis
Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1512 - Violin Concentration (1 Credit Hour)

Prerequisite(s): MUSA 1511 >= C
Corequisite(s): MUSA 2505 and MUSI 1500
Lecture Hours: 1
Repeatability: May be repeated for credit.
Grade Mode: Normal, Audit
Major Restrictions: Music Education, Music, Performance
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching
Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1520 - Viola Secondary (1 Credit Hour)

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1521 - Viola Concentration (1 Credit Hour)

Prerequisite(s): MUSI 1630

Corequisite(s): MUSA 2505 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1522 - Viola Concentration (1 Credit Hour)

Prerequisite(s): MUSA 1521 >= C

Corequisite(s): MUSA 2505 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1530 - Violincello Secondary (1 Credit Hour)

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1531 - Violincello Concentration (1 Credit Hour)

Corequisite(s): MUSA 2505 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1532 - Violincello Concentration (1 Credit Hour)

Prerequisite(s): MUSA 1531 >= C

Corequisite(s): MUSA 2505 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1540 - Double Bass Secondary (1 Credit Hour)

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1541 - Double Bass Concentration (1 Credit Hour)

Corequisite(s): MUSA 2505 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1542 - Double Bass Concentration (1 Credit Hour)

Prerequisite(s): MUSA 1541 >= C

Corequisite(s): MUSA 2505 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1550 - Guitar Secondary (1 Credit Hour)

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1551 - Guitar Concentration (1 Credit Hour)

Corequisite(s): MUSA 2555 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1552 - Guitar Concentration (1 Credit Hour)

Prerequisite(s): MUSA 1551 >= C

Corequisite(s): MUSA 2555 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1610 - Piano Secondary (1 Credit Hour)

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1611 - Piano Concentration (1 Credit Hour)

Corequisite(s): MUSA 2605 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis
Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1612 - Piano Concentration (1 Credit Hour)

Prerequisite(s): MUSA 1611 >= C
Corequisite(s): MUSA 2605 and MUSI 1500
Lecture Hours: 1
Repeatability: May be repeated for credit.
Grade Mode: Normal, Audit
Major Restrictions: Music Education, Music, Performance
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis
Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1620 - Organ Secondary (1 Credit Hour)

Repeatability: May be repeated for credit.
Grade Mode: Normal, Audit
Major Restrictions: Music Education, Music, Performance
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis
Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1621 - Organ Concentration (1 Credit Hour)

Prerequisite(s): MUSI 1621 or MUSI 1630
Corequisite(s): MUSA 2605 and MUSI 1500
Lecture Hours: 1
Repeatability: May be repeated for credit.
Grade Mode: Normal, Audit
Major Restrictions: Music Education, Music, Performance
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis
Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1622 - Organ Concentration (1 Credit Hour)

Prerequisite(s): MUSA 1621 >= C
Corequisite(s): MUSA 2605 and MUSI 1500
Lecture Hours: 1
Repeatability: May be repeated for credit.
Grade Mode: Normal, Audit
Major Restrictions: Music Education, Music, Performance
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching
Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1711 - Jazz Winds (1 Credit Hour)

Individualized instruction in jazz. One one-hour private lesson per week. Emphasis will be placed upon jazz performance skills and pedagogical concepts.

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Independent Study

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1712 - Jazz Winds (1 Credit Hour)

Individualized instruction in jazz. One one-hour private lesson per week. Emphasis will be placed upon jazz performance skills and pedagogical concepts.

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Independent Study

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1721 - Jazz Piano (1 Credit Hour)

Individualized instruction in jazz. One one-hour private lesson per week. Emphasis will be placed upon jazz performance skills and pedagogical concepts.

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Independent Study

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1722 - Jazz Piano (1 Credit Hour)

Individualized instruction in jazz. One one-hour private lesson per week. Emphasis will be placed upon jazz performance skills and pedagogical concepts.

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Independent Study

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1731 - Jazz Percussion (1 Credit Hour)

Individualized instruction in jazz. One one-hour private lesson per week. Emphasis will be placed upon jazz performance skills and pedagogical concepts.

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Independent Study

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1732 - Jazz Percussion (1 Credit Hour)

Individualized instruction in jazz. One one-hour private lesson per week. Emphasis will be placed upon jazz performance skills and pedagogical concepts.

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Independent Study

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1741 - Jazz Strings (1 Credit Hour)

Individualized instruction in jazz. One one-hour private lesson per week. Emphasis will be placed upon jazz performance skills and pedagogical concepts.

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Independent Study

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1742 - Jazz Strings (1 Credit Hour)

Individualized instruction in jazz. One one-hour private lesson per week. Emphasis will be placed upon jazz performance skills and pedagogical concepts.

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Independent Study

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 1810 - Classical Composition Secondary (1 Credit Hour)

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2100 - Voice Secondary (1 Credit Hour)

Prerequisite(s): MUSA 1100 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2101 - Voice Concentration (1 Credit Hour)

Prerequisite(s): MUSA 1102 >= C

Corequisite(s): MUSA 2105 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2102 - Voice Concentration (2 Credit Hours)

Prerequisite(s): MUSA 2101 >= C

Corequisite(s): MUSA 2105 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2103 - Voice Major (2 Credit Hours)

Prerequisite(s): MUSA 1102 >= C

Corequisite(s): MUSA 2105 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2104 - Voice Major (2 Credit Hours)

Prerequisite(s): MUSA 2103 >= C

Corequisite(s): MUSA 2105 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2105 - Voice Studio Class (0 Credit Hours)

A forum for the discussion of performances, techniques and repertoire in the student's applied performance area. Corequisite: major or concentration applied lessons.

Lab Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSA 2205 - Woodwind Studio Class (0 Credit Hours)

A forum for the discussion of performances, techniques and repertoire in the student's applied performance area. Corequisite: major or concentration applied lessons.

Lab Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSA 2210 - Flute Secondary (1 Credit Hour)

Prerequisite(s): MUSA 1210 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2211 - Flute Concentration (1 Credit Hour)

Prerequisite(s): MUSA 1212 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2212 - Flute Concentration (2 Credit Hours)

Prerequisite(s): MUSA 2211 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2213 - Flute Major (2 Credit Hours)

Prerequisite(s): MUSA 1212 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2214 - Flute Major (2 Credit Hours)

Prerequisite(s): MUSA 2213 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2220 - Oboe Secondary (1 Credit Hour)

Prerequisite(s): MUSA 1220 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2221 - Oboe Concentration (1 Credit Hour)

Prerequisite(s): MUSA 1222 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-

one),Practice Teaching,Internship/Practicum,Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2222 - Oboe Concentration (2 Credit Hours)

Prerequisite(s): MUSA 2221 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2223 - Oboe Major (2 Credit Hours)

Prerequisite(s): MUSA 1222 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Practice Teaching,Internship/Practicum,Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2224 - Oboe Major (2 Credit Hours)

Prerequisite(s): MUSA 2223 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2230 - Clarinet Secondary (1 Credit Hour)

Prerequisite(s): MUSA 1230 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Practice Teaching,Internship/Practicum,Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2231 - Clarinet Concentration (1 Credit Hour)

Prerequisite(s): MUSA 1232 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2232 - Clarinet Concentration (2 Credit Hours)

Prerequisite(s): MUSA 2231 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2233 - Clarinet Major (2 Credit Hours)

Prerequisite(s): MUSA 1232 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2234 - Clarinet Major (2 Credit Hours)

Prerequisite(s): MUSA 2233 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2240 - Bassoon Secondary (1 Credit Hour)

Prerequisite(s): MUSA 1240 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2241 - Bassoon Concentration (1 Credit Hour)

Prerequisite(s): MUSA 1242 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2242 - Bassoon Concentration (2 Credit Hours)

Prerequisite(s): MUSA 2241 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2243 - Bassoon Major (2 Credit Hours)

Prerequisite(s): MUSA 1242 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2244 - Bassoon Major (2 Credit Hours)

Prerequisite(s): MUSA 2243 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2250 - Saxophone Secondary (1 Credit Hour)

Prerequisite(s): MUSA 1250 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2251 - Saxophone Concentration (1 Credit Hour)

Prerequisite(s): MUSA 1252 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2252 - Saxophone Concentration (2 Credit Hours)

Prerequisite(s): MUSA 2251 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2253 - Saxophone Major (2 Credit Hours)

Prerequisite(s): MUSA 1252 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2254 - Saxophone Major (2 Credit Hours)

Prerequisite(s): MUSA 2253 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2305 - Brass Studio Class (0 Credit Hours)

A forum for the discussion of performances, techniques and repertoire in the student's applied performance area. Corequisite: major or concentration applied lessons.

Lab Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSA 2310 - Trumpet Secondary (1 Credit Hour)

Prerequisite(s): MUSA 1310 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2311 - Trumpet Concentration (1 Credit Hour)

Prerequisite(s): MUSA 1312 >= C

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2312 - Trumpet Concentration (2 Credit Hours)

Prerequisite(s): MUSA 2311 >= C

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2313 - Trumpet Major (2 Credit Hours)

Prerequisite(s): MUSA 1312 >= C

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2314 - Trumpet Major (2 Credit Hours)

Prerequisite(s): MUSA 2313 >= C

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2320 - Horn Secondary (1 Credit Hour)

Prerequisite(s): MUSA 1320 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2321 - Horn Concentration (1 Credit Hour)

Prerequisite(s): MUSA 1322 >= C

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2322 - Horn Concentration (2 Credit Hours)

Prerequisite(s): MUSA 2321 >= C

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MUSA 2323 - Horn Major (2 Credit Hours)

Prerequisite(s): MUSA 1322 >= C

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2324 - Horn Major (2 Credit Hours)

Prerequisite(s): MUSA 2323 >= C

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2330 - Trombone Secondary (1 Credit Hour)

Prerequisite(s): MUSA 1330 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2331 - Trombone Concentration (1 Credit Hour)

Prerequisite(s): MUSA 1332 >= C

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2332 - Trombone Concentration (2 Credit Hours)

Prerequisite(s): MUSA 2331 >= C

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2333 - Trombone Major (2 Credit Hours)

Prerequisite(s): MUSA 1332 >= C

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2334 - Trombone Major (2 Credit Hours)

Prerequisite(s): MUSA 2333 >= C

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2340 - Euphonium Secondary (1 Credit Hour)

Prerequisite(s): MUSA 1340 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2341 - Euphonium Concentration (1 Credit Hour)

Prerequisite(s): MUSA 1342 >= C

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2342 - Euphonium Concentration (2 Credit Hours)

Prerequisite(s): MUSA 2341 >= C

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2343 - Euphonium Major (2 Credit Hours)

Prerequisite(s): MUSA 1342 >= C

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2344 - Euphonium Major (2 Credit Hours)

Prerequisite(s): MUSA 2343 >= C

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2350 - Tuba Secondary (1 Credit Hour)

Prerequisite(s): MUSA 1350 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2351 - Tuba Concentration (1 Credit Hour)

Prerequisite(s): MUSA 1352 >= C

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2352 - Tuba Concentration (2 Credit Hours)

Prerequisite(s): MUSA 2351 >= C and MUSA 1610

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-

one),Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2353 - Tuba Major (2 Credit Hours)

Prerequisite(s): MUSA 1352 >= C

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Practice Teaching,Internship/Practicum,Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2354 - Tuba Major (2 Credit Hours)

Prerequisite(s): MUSA 2353 >= C and MUSA 1610

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2405 - Percussion Studio Class (0 Credit Hours)

A forum for the discussion of performances, techniques and repertoire in the student's applied performance area. Corequisite: major or concentration applied lessons.

Lab Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Practice Teaching,Internship/Practicum,Thesis

MUSA 2410 - Percussion Secondary (1 Credit Hour)

Prerequisite(s): MUSA 1410 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Practice Teaching,Internship/Practicum,Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2411 - Percussion Concentration (1 Credit Hour)

Prerequisite(s): MUSA 1412 >= C

Corequisite(s): MUSA 2405 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2412 - Percussion Concentration (2 Credit Hours)

Prerequisite(s): MUSA 2411 >= C

Corequisite(s): MUSA 2405 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2413 - Percussion Major (2 Credit Hours)

Prerequisite(s): MUSA 1412 >= C

Corequisite(s): MUSA 2405 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2414 - Percussion Major (2 Credit Hours)

Prerequisite(s): MUSA 2413 >= C

Corequisite(s): MUSA 2405 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2505 - String Studio Class (0 Credit Hours)

A forum for the discussion of performances, techniques and repertoire in the student's applied performance area. Corequisite: major or concentration applied lessons.

Lab Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSA 2510 - Violin Secondary (1 Credit Hour)

Prerequisite(s): MUSA 1510 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2511 - Violin Concentration (1 Credit Hour)

Prerequisite(s): MUSA 1512 >= C

Corequisite(s): MUSA 2505 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2512 - Violin Concentration (2 Credit Hours)

Prerequisite(s): MUSA 2511 >= C

Corequisite(s): MUSA 2505 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2513 - Violin Major (2 Credit Hours)

Prerequisite(s): MUSA 1512 >= C

Corequisite(s): MUSA 2505 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2514 - Violin Major (2 Credit Hours)

Prerequisite(s): MUSA 2513 >= C

Corequisite(s): MUSA 2505 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2520 - Viola Secondary (1 Credit Hour)

Prerequisite(s): MUSA 1520 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2521 - Viola Concentration (1 Credit Hour)

Prerequisite(s): MUSA 1522 >= C

Corequisite(s): MUSA 2505 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2522 - Viola Concentration (2 Credit Hours)

Prerequisite(s): MUSA 2521 >= C

Corequisite(s): MUSA 2505 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2523 - Viola Major (2 Credit Hours)

Prerequisite(s): MUSA 1522 >= C

Corequisite(s): MUSA 2505 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2524 - Viola Major (2 Credit Hours)

Prerequisite(s): MUSA 2523 >= C

Corequisite(s): MUSA 2505 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2530 - Violincello Secondary (1 Credit Hour)

Prerequisite(s): MUSA 1530 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2531 - Violincello Concentration (1 Credit Hour)

Prerequisite(s): MUSA 1532 >= C

Corequisite(s): MUSA 2505 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2532 - Violincello Concentration (2 Credit Hours)

Prerequisite(s): MUSA 2531 >= C

Corequisite(s): MUSA 2505 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2533 - Violincello Major (2 Credit Hours)

Prerequisite(s): MUSA 1532 >= C

Corequisite(s): MUSA 2505 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2534 - Violincello Major (2 Credit Hours)

Prerequisite(s): MUSA 2533 >= C

Corequisite(s): MUSA 2505 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2540 - Double Bass Secondary (1 Credit Hour)

Prerequisite(s): MUSA 1540 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2541 - Double Bass Concentration (1 Credit Hour)

Prerequisite(s): MUSA 1542 >= C

Corequisite(s): MUSA 2505 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2542 - Double Bass Concentration (2 Credit Hours)

Prerequisite(s): MUSA 2541 >= C

Corequisite(s): MUSA 2505 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2543 - Double Bass Major (2 Credit Hours)

Prerequisite(s): MUSA 1542 >= C

Corequisite(s): MUSA 2505 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2544 - Double Bass Major (2 Credit Hours)

Prerequisite(s): MUSA 2543 >= C

Corequisite(s): MUSA 2505 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2550 - Guitar Secondary (1 Credit Hour)

Prerequisite(s): MUSA 1550 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2551 - Guitar Concentration (1 Credit Hour)

Prerequisite(s): MUSA 1552 >= C

Corequisite(s): MUSA 2555 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2552 - Guitar Concentration (2 Credit Hours)

Prerequisite(s): MUSA 2551 >= C

Corequisite(s): MUSA 2555 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2553 - Guitar Major (2 Credit Hours)

Prerequisite(s): MUSA 1552 >= C

Corequisite(s): MUSA 2555 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2554 - Guitar Major (2 Credit Hours)

Prerequisite(s): MUSA 2553 >= C

Corequisite(s): MUSA 2555 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2555 - Guitar Studio Class (0 Credit Hours)

Lab Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSA 2605 - Keyboard Studio Class (0 Credit Hours)

A forum for the discussion of performances, techniques and repertoire in the student's applied performance area.

Lab Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSA 2610 - Piano Secondary (1 Credit Hour)

Prerequisite(s): MUSA 1610 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2611 - Piano Concentration (1 Credit Hour)

Prerequisite(s): MUSA 1612 >= C

Corequisite(s): MUSA 2605 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2612 - Piano Concentration (2 Credit Hours)

Prerequisite(s): MUSA 2611 >= C

Corequisite(s): MUSA 2605 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2613 - Piano Major (2 Credit Hours)

Prerequisite(s): MUSA 1612 >= C

Corequisite(s): MUSA 2605 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2614 - Piano Major (2 Credit Hours)

Prerequisite(s): MUSA 2613 >= C

Corequisite(s): MUSA 2605 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2620 - Organ Secondary (1 Credit Hour)

Prerequisite(s): MUSA 1620 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2621 - Organ Concentration (1 Credit Hour)

Prerequisite(s): MUSA 1622 >= C

Corequisite(s): MUSA 2605 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2622 - Organ Concentration (2 Credit Hours)

Prerequisite(s): MUSA 2621 >= C

Corequisite(s): MUSA 2605 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2623 - Organ Major (2 Credit Hours)

Prerequisite(s): MUSA 1622 >= C

Corequisite(s): MUSA 2605 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2624 - Organ Major (2 Credit Hours)

Prerequisite(s): MUSA 2623 >= C

Corequisite(s): MUSA 2605 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2713 - Jazz Winds (2 Credit Hours)

Individualized instruction in jazz. One one-hour private lesson per week. Emphasis will be placed upon jazz performance skills and pedagogical concepts.

Lecture Hours: 3 **Lab Hours:** 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Independent Study

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2714 - Jazz Winds (2 Credit Hours)

Individualized instruction in jazz. One one-hour private lesson per week. Emphasis will be placed upon jazz performance skills and pedagogical concepts.

Lecture Hours: 3 **Lab Hours:** 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Independent Study

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2723 - Jazz Piano (2 Credit Hours)

Individualized instruction in jazz. One one-hour private lesson per week. Emphasis will be placed upon jazz performance skills and pedagogical concepts.

Lecture Hours: 3 **Lab Hours:** 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Independent Study

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2724 - Jazz Piano (2 Credit Hours)

Individualized instruction in jazz. One one-hour private lesson per week. Emphasis will be placed upon jazz performance skills and pedagogical concepts.

Lecture Hours: 3 **Lab Hours:** 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Independent Study

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2733 - Jazz Percussion (2 Credit Hours)

Individualized instruction in jazz. One one-hour private lesson per week. Emphasis will be placed upon jazz performance skills and pedagogical concepts.

Lecture Hours: 3 **Lab Hours:** 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Independent Study

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2734 - Jazz Percussion (2 Credit Hours)

Individualized instruction in jazz. One one-hour private lesson per week. Emphasis will be placed upon jazz performance skills and pedagogical concepts.

Lecture Hours: 3 Lab Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Independent Study

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2743 - Jazz Strings (2 Credit Hours)

Individualized instruction in jazz. One one-hour private lesson per week. Emphasis will be placed upon jazz performance skills and pedagogical concepts.

Lecture Hours: 3 Lab Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Independent Study

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2744 - Jazz Strings (2 Credit Hours)

Individualized instruction in jazz. One one-hour private lesson per week. Emphasis will be placed upon jazz performance skills and pedagogical concepts.

Lecture Hours: 3 Lab Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Independent Study

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 2810 - Classical Comp Secondary (1 Credit Hour)

Prerequisite(s): MUSA 1810 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3100 - Voice Secondary (1 Credit Hour)

Prerequisite(s): MUSA 2100 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3101 - Voice Concentration (2 Credit Hours)

Prerequisite(s): MUSA 2102 >= C

Corequisite(s): MUSA 3620 or MUSA 3621

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3102 - Voice Concentration (2 Credit Hours)

Prerequisite(s): MUSA 3101 >= C and MUSI 3620

Corequisite(s): MUSA 2105 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3103 - Voice Major (2 Credit Hours)

Prerequisite(s): MUSA 2104 >= C

Corequisite(s): MUSI 3620 or MUSI 3621

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3104 - Voice Major (2 Credit Hours)

Prerequisite(s): MUSA 3103 >= C

Corequisite(s): MUSI 3620 or MUSI 3621

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3105 - Junior Voice Recital (0 Credit Hours)

Individualized instruction in the student's applied performance medium leading to the performance of a half-hour public solo recital.

Prerequisite(s): Permission of the student's applied lesson instructor.

Corequisite(s): MUSA 3102 and MUSA 3104

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSA 3210 - Flute Secondary (1 Credit Hour)

Prerequisite(s): MUSA 2210 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3211 - Flute Concentration (2 Credit Hours)

Prerequisite(s): MUSA 2212 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3212 - Flute Concentration (2 Credit Hours)

Prerequisite(s): MUSA 3211 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3213 - Flute Major (2 Credit Hours)

Prerequisite(s): MUSA 2214 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3214 - Flute Major (2 Credit Hours)

Prerequisite(s): MUSA 3213 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3215 - Flute Junior Recital (0 Credit Hours)

Individualized instruction in the student's applied performance medium leading to the performance of a half-hour public solo recital.

Prerequisite(s): Permission of the student's applied lesson instructor.

Corequisite(s): MUSA 3212 and MUSA 3214

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSA 3220 - Oboe Secondary (1 Credit Hour)

Prerequisite(s): MUSA 2220 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3221 - Oboe Concentration (2 Credit Hours)

Prerequisite(s): MUSA 2222 >= C

Corequisite(s): MUSA2205, MUSI1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3222 - Oboe Concentration (2 Credit Hours)

Prerequisite(s): MUSA 3221 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3223 - Oboe Major (2 Credit Hours)

Prerequisite(s): MUSA 2224 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3224 - Oboe Major (2 Credit Hours)

Prerequisite(s): MUSA 3223 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3225 - Junior Oboe Recital (0 Credit Hours)

Individualized instruction in the student's applied performance medium leading to the performance of a half-hour public solo recital.

Prerequisite(s): Permission of the student's applied lesson instructor.

Corequisite(s): MUSA 3222 and MUSA 3224

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSA 3230 - Clarinet Secondary (1 Credit Hour)

Prerequisite(s): MUSA 2230 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSA 3231 - Clarinet Concentration (2 Credit Hours)

Prerequisite(s): MUSA 2232 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3232 - Clarinet Concentration (2 Credit Hours)

Prerequisite(s): MUSA 3231 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3233 - Clarinet Major (2 Credit Hours)

Prerequisite(s): MUSA 2234 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3234 - Clarinet Major (2 Credit Hours)

Prerequisite(s): MUSA 3233 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching
Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3235 - Junior Clarinet Recital (0 Credit Hours)

Individualized instruction in the student's applied performance medium leading to the performance of a half-hour public solo recital.
Prerequisite(s): Permission of the student's applied lesson instructor.

Corequisite(s): MUSA 3232 and MUSA 3234

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSA 3240 - Bassoon Secondary (1 Credit Hour)

Prerequisite(s): MUSA 2240 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3241 - Bassoon Concentration (2 Credit Hours)

Prerequisite(s): MUSA 2242 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3242 - Bassoon Concentration (2 Credit Hours)

Prerequisite(s): MUSA 3241 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3243 - Bassoon Major (2 Credit Hours)

Prerequisite(s): MUSA 2244 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3244 - Bassoon Major (2 Credit Hours)

Prerequisite(s): MUSA 3243 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3245 - Junior Bassoon Recital (0 Credit Hours)

Individualized instruction in the student's applied performance medium leading to the performance of a half-hour public solo recital.

Prerequisite(s): Permission of the student's applied lesson instructor.

Corequisite(s): MUSA 3242 or MUSA 3244

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSA 3250 - Saxophone Secondary (1 Credit Hour)

Prerequisite(s): MUSA 2250 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3251 - Saxophone Concentration (2 Credit Hours)

Prerequisite(s): MUSA 2252 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3252 - Saxophone Concentration (2 Credit Hours)

Prerequisite(s): MUSA 3251 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3253 - Saxophone Major (2 Credit Hours)

Prerequisite(s): MUSA 2254 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3254 - Saxophone Major (2 Credit Hours)

Prerequisite(s): MUSA 3253 >= C

Corequisite(s): MUSA 2205 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3255 - Junior Saxophone Recital (0 Credit Hours)

Individualized instruction in the student's applied performance medium leading to the performance of a half-hour public solo recital.

Prerequisite(s): Permission of the student's applied lesson instructor.

Corequisite(s): MUSA 3XX2 or MUSA 3XX4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSA 3310 - Trumpet Secondary (1 Credit Hour)

Prerequisite(s): MUSA 2310 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3311 - Trumpet Concentration (2 Credit Hours)

Prerequisite(s): MUSA 2312 >= C

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3312 - Trumpet Concentration (2 Credit Hours)

Prerequisite(s): MUSA 3311 >= C

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3313 - Trumpet Major (2 Credit Hours)

Prerequisite(s): MUSA 2314 >= C

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-

one),Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3314 - Trumpet Major (2 Credit Hours)

Prerequisite(s): MUSA 3313 >= C

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Practice Teaching,Internship/Practicum,Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3315 - Junior Trumpet Recital (0 Credit Hours)

Individualized instruction in the student's applied performance medium leading to the performance of a half-hour public solo recital.

Prerequisite(s): Permission of the student's applied lesson instructor.

Corequisite(s): MUSA 3312 or MUSA 3314

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Practice Teaching,Internship/Practicum,Thesis

MUSA 3320 - Horn Secondary (1 Credit Hour)

Prerequisite(s): MUSA 2320 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Practice Teaching,Internship/Practicum,Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3321 - Horn Concentration (2 Credit Hours)

Prerequisite(s): MUSA 2322 >= C

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Practice Teaching,Internship/Practicum,Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3322 - Horn Concentration (2 Credit Hours)

Prerequisite(s): MUSA 3321 >= C

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3323 - Horn Major (2 Credit Hours)

Prerequisite(s): MUSA 2324 >= C

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3324 - Horn Major (2 Credit Hours)

Prerequisite(s): MUSA 3323 >= C

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3325 - Junior Horn Recital (0 Credit Hours)

Individualized instruction in the student's applied performance medium leading to the performance of a half-hour public solo recital.

Prerequisite(s): Permission of the student's applied lesson instructor.

Corequisite(s): MUSA 3XX2 or MUSA 3XX4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSA 3330 - Trombone Secondary (1 Credit Hour)

Prerequisite(s): MUSA 2330 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3331 - Trombone Concentration (2 Credit Hours)

Prerequisite(s): MUSA 2332 >= C

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3332 - Trombone Concentration (2 Credit Hours)

Prerequisite(s): MUSA 3331 >= C

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3333 - Trombone Major (2 Credit Hours)

Prerequisite(s): MUSA 2334 >= C

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3334 - Trombone Major (2 Credit Hours)

Prerequisite(s): (MUSA3333 >= C)

Corequisite(s): MUSA2305, MUSI1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3335 - Junior Trombone Recital (0 Credit Hours)

Individualized instruction in the student's applied performance medium leading to the performance of a half-hour public solo recital.

Prerequisite(s): Permission of the student's applied lesson instructor.

Corequisite(s): MUSA 3XX2 or MUSA 3XX4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSA 3340 - Euphonium Secondary (1 Credit Hour)

Prerequisite(s): MUSA 2340 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3341 - Euphonium Concentration (2 Credit Hours)

Prerequisite(s): MUSA 2342 >= C

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3342 - Euphonium Concentration (2 Credit Hours)

Prerequisite(s): MUSA 3341 >= C

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3343 - Euphonium Major (2 Credit Hours)

Prerequisite(s): MUSA 2344 >= C

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3344 - Euphonium Major (2 Credit Hours)

Prerequisite(s): MUSA 3343 >= C

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3345 - Euphonium Junior Recital (0 Credit Hours)

Individualized instruction in the student's applied performance medium leading to the performance of a half-hour public solo recital.

Prerequisite(s): Permission of the student's applied lesson instructor.

Pre- or Corequisite(s): MUSA 3342 or MUSA 3344

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSA 3350 - Tuba Secondary (1 Credit Hour)

Prerequisite(s): MUSA 2350 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3351 - Tuba Concentration (2 Credit Hours)

Prerequisite(s): MUSA 2352 >= C

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3352 - Tuba Concentration (2 Credit Hours)

Prerequisite(s): MUSA 3351 >= C

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3353 - Tuba Major (2 Credit Hours)

Prerequisite(s): MUSA 2354 >= C

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3354 - Tuba Major (2 Credit Hours)

Prerequisite(s): MUSA 3353 >= C

Corequisite(s): MUSA 2305 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3355 - Junior Tuba Recital (0 Credit Hours)

Individualized instruction in the student's applied performance medium leading to the performance of a half-hour public solo recital.

Prerequisite(s): Permission of the student's applied lesson instructor.

Corequisite(s): MUSA 3XX2 or MUSA 3XX4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSA 3410 - Percussion Secondary (1 Credit Hour)

Prerequisite(s): MUSA 2410 >= C\

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3411 - Percussion Concentration (2 Credit Hours)

Prerequisite(s): MUSA 2412 >= C

Corequisite(s): MUSA 2405 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3412 - Percussion Concentration (2 Credit Hours)

Prerequisite(s): MUSA 3411 >= C

Corequisite(s): MUSA 2405 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3413 - Percussion Major (2 Credit Hours)

Prerequisite(s): MUSA 2414 >= C

Corequisite(s): MUSA 2405 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-

one),Practice Teaching,Internship/Practicum,Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3414 - Percussion Major (2 Credit Hours)

Prerequisite(s): MUSA 3413 >= C

Corequisite(s): MUSA 2405 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3415 - Junior Percussion Recital (0 Credit Hours)

Individualized instruction in the student's applied performance medium leading to the performance of a half-hour public solo recital.

Prerequisite(s): Permission of the student's applied lesson instructor.

Corequisite(s): MUSA 3412 or MUSA 3414

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Practice Teaching,Internship/Practicum,Thesis

MUSA 3510 - Violin Secondary (1 Credit Hour)

Prerequisite(s): MUSA 2510 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Practice Teaching,Internship/Practicum,Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3511 - Violin Concentration (2 Credit Hours)

Prerequisite(s): MUSA 2512 >= C

Corequisite(s): MUSA 2505 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Practice Teaching,Internship/Practicum,Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3512 - Violin Concentration (2 Credit Hours)

Prerequisite(s): MUSA 3511 >= C

Corequisite(s): MUSA 2505 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3513 - Violin Major (2 Credit Hours)

Prerequisite(s): MUSA 2514 >= C

Corequisite(s): MUSA 2505 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3514 - Violin Major (2 Credit Hours)

Prerequisite(s): MUSA 3513 >= C

Corequisite(s): MUSA 2505 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3515 - Junior Violin Recital (0 Credit Hours)

Individualized instruction in the student's applied performance medium leading to the performance of a half-hour public solo recital.

Prerequisite(s): Permission of the student's applied lesson instructor.

Corequisite(s): MUSA 3512 or MUSA 3514

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSA 3520 - Viola Secondary (1 Credit Hour)

Prerequisite(s): MUSA 2520 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3521 - Viola Concentration (2 Credit Hours)

Prerequisite(s): MUSA 2522 >= C

Corequisite(s): MUSA 2505 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3522 - Viola Concentration (2 Credit Hours)

Corequisite(s): MUSA 2505 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3523 - Viola Major (2 Credit Hours)

Prerequisite(s): MUSA 2524 >= C

Corequisite(s): MUSA 2505 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3524 - Viola Major (2 Credit Hours)

Prerequisite(s): MUSA 3523 >= C

Corequisite(s): MUSA 2505 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3525 - Junior Viola Recital (0 Credit Hours)

Individualized instruction in the student's applied performance medium leading to the performance of a half-hour public solo recital.

Prerequisite(s): Permission of the student's applied lesson instructor.

Corequisite(s): MUSA 3522 or MUSA 3524

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSA 3530 - Violincello Secondary (1 Credit Hour)

Prerequisite(s): MUSA 2530 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3531 - Violincello Concentration (2 Credit Hours)

Prerequisite(s): MUSA 2532 >= C

Corequisite(s): MUSA 2505 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3532 - Violincello Concentration (2 Credit Hours)

Prerequisite(s): MUSA 3531 >= C

Corequisite(s): MUSA 2505 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3533 - Violincello Major (2 Credit Hours)

Prerequisite(s): MUSA 2534 >= C

Corequisite(s): MUSA 2505 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3534 - Violincello Major (2 Credit Hours)

Prerequisite(s): MUSA 3533 >= C

Corequisite(s): MUSA 2505 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3535 - Junior Violincello Recital (0 Credit Hours)

Individualized instruction in the student's applied performance medium leading to the performance of a half-hour public solo recital.

Prerequisite(s): Permission of the student's applied lesson instructor.

Corequisite(s): MUSA 3532 or MUSA 3534

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSA 3540 - Double Bass Secondary (1 Credit Hour)

Prerequisite(s): MUSA 2540 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3541 - Double Bass Concentration (2 Credit Hours)

Prerequisite(s): MUSA 2542 >= C

Corequisite(s): MUSA 2505 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3542 - Double Bass Concentration (2 Credit Hours)

Prerequisite(s): MUSA 3541 >= C

Corequisite(s): MUSA 2505 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3543 - Double Bass Major (2 Credit Hours)

Prerequisite(s): MUSA 2544 >= C

Corequisite(s): MUSA 2505 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3544 - Double Bass Major (2 Credit Hours)

Prerequisite(s): MUSA 3543 >= C

Corequisite(s): MUSA 2505 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3545 - Junior Double Bass Recital (0 Credit Hours)

Individualized instruction in the student's applied performance medium leading to the performance of a half-hour public solo recital.

Prerequisite(s): Permission of the student's applied lesson instructor.

Corequisite(s): MUSA 3542 or MUSA 3544

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSA 3550 - Guitar Secondary (1 Credit Hour)

Prerequisite(s): MUSA 2550 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3551 - Guitar Concentration (2 Credit Hours)

Prerequisite(s): MUSA 2552 >= C

Corequisite(s): MUSA 2555 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3552 - Guitar Concentration (2 Credit Hours)

Prerequisite(s): MUSA 3551 >= C

Corequisite(s): MUSA 2555 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3553 - Guitar Major (2 Credit Hours)

Prerequisite(s): MUSA 2554 >= C

Corequisite(s): MUSA 2555 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-

one),Practice Teaching,Internship/Practicum,Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3554 - Guitar Major (2 Credit Hours)

Prerequisite(s): MUSA 3553 >= C

Corequisite(s): MUSA 2555 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3555 - Junior Guitar Recital (0 Credit Hours)

Individualized instruction in the student's applied performance medium leading to the performance of a half-hour public solo recital.

Prerequisite(s): Permission of the student's applied lesson instructor.

Corequisite(s): MUSA 3552 or MUSA 3554

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Practice Teaching,Internship/Practicum,Thesis

MUSA 3610 - Piano Secondary (1 Credit Hour)

Prerequisite(s): MUSA 2610 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Practice Teaching,Internship/Practicum,Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3611 - Piano Concentration (2 Credit Hours)

Prerequisite(s): (MUSA 2612 >= C) and (MUSI 3610 or MUSI 3620 or MUSI 3621 or MUSI 3630)

Corequisite(s): MUSA 2605 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Practice Teaching,Internship/Practicum,Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3612 - Piano Concentration (2 Credit Hours)

Prerequisite(s): MUSA 3611 >= C

Corequisite(s): MUSA 2605 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3613 - Piano Major (2 Credit Hours)

Prerequisite(s): MUSA 2614 >= C

Corequisite(s): MUSA 2605 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3614 - Piano Major (2 Credit Hours)

Prerequisite(s): MUSA 3613 >= C

Corequisite(s): MUSA 2605 and MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3615 - Junior Piano Recital (0 Credit Hours)

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSA 3620 - Organ Secondary (1 Credit Hour)

Prerequisite(s): MUSA 2620 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis
Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3621 - Organ Concentration (2 Credit Hours)

Prerequisite(s): MUSA 2622 >= C
Corequisite(s): MUSA 2605 and MUSI 1500
Lecture Hours: 1
Repeatability: May be repeated for credit.
Grade Mode: Normal, Audit
Major Restrictions: Music Education, Music
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis
Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3622 - Organ Concentration (2 Credit Hours)

Prerequisite(s): MUSA 3621 >= C
Corequisite(s): MUSA 2605 and MUSI 1500
Lecture Hours: 1
Repeatability: May be repeated for credit.
Grade Mode: Normal, Audit
Major Restrictions: Music Education, Music
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching
Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3623 - Organ Major (2 Credit Hours)

Prerequisite(s): MUSA 2624 >= C
Corequisite(s): MUSA 2605 and MUSI 1500
Lecture Hours: 1
Repeatability: May be repeated for credit.
Grade Mode: Normal, Audit
Major Restrictions: Performance
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis
Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3624 - Organ Major (2 Credit Hours)

Prerequisite(s): MUSA 3623 >= C
Corequisite(s): MUSA 2605 and MUSI 1500
Lecture Hours: 1
Repeatability: May be repeated for credit.
Grade Mode: Normal, Audit
Major Restrictions: Performance
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3625 - Junior Organ Recital (0 Credit Hours)

Individualized instruction in the student's applied performance medium leading to the performance of a half-hour public solo recital.

Prerequisite(s): Permission of the student's applied lesson instructor.

Corequisite(s): MUSA 3622 or MUSA 3624

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSA 3713 - Jazz Winds (2 Credit Hours)

Individualized instruction in jazz. One one-hour private lesson per week. Emphasis will be placed upon jazz performance skills and pedagogical concepts.

Lecture Hours: 3 **Lab Hours:** 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Independent Study

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3714 - Jazz Winds (2 Credit Hours)

Individualized instruction in jazz. One one-hour private lesson per week. Emphasis will be placed upon jazz performance skills and pedagogical concepts.

Lecture Hours: 3 **Lab Hours:** 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Independent Study

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3715 - Jazz Winds Junior Recital (0 Credit Hours)

Individualized instruction in jazz leading to the performance of a half-hour public jazz recital.

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Independent Study

MUSA 3723 - Jazz Piano (2 Credit Hours)

Individualized instruction in jazz. One one-hour private lesson per week. Emphasis will be placed upon jazz performance skills and pedagogical concepts.

Lecture Hours: 3 **Lab Hours:** 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Independent Study

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3724 - Jazz Piano (2 Credit Hours)

Individualized instruction in jazz. One one-hour private lesson per week. Emphasis will be placed upon jazz performance skills and pedagogical concepts.

Lecture Hours: 3 **Lab Hours:** 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Independent Study

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3725 - Jazz Piano Junior Recital (0 Credit Hours)

Individualized instruction in jazz leading to the performance of a half-hour public jazz recital.

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Independent Study

MUSA 3733 - Jazz Percussion (2 Credit Hours)

Individualized instruction in jazz. One one-hour private lesson per week. Emphasis will be placed upon jazz performance skills and pedagogical concepts.

Lecture Hours: 3 **Lab Hours:** 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Independent Study

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3734 - Jazz Percussion (2 Credit Hours)

Individualized instruction in jazz. One one-hour private lesson per week. Emphasis will be placed upon jazz performance skills and pedagogical concepts.

Lecture Hours: 3 **Lab Hours:** 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Independent Study

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3735 - Jazz Percussion Junior Recital (0 Credit Hours)

Individualized instruction in jazz leading to the performance of a half-hour public jazz recital.

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Independent Study

MUSA 3743 - Jazz Strings (2 Credit Hours)

Individualized instruction in jazz. One one-hour private lesson per week. Emphasis will be placed upon jazz performance skills and pedagogical concepts.

Lecture Hours: 3 **Lab Hours:** 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Independent Study

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3744 - Jazz Strings (2 Credit Hours)

Individualized instruction in jazz. One one-hour private lesson per week. Emphasis will be placed upon jazz performance skills and pedagogical concepts.

Lecture Hours: 3 **Lab Hours:** 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Independent Study

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 3745 - Jazz Strings Junior Recital (0 Credit Hours)

Individualized instruction in jazz leading to the performance of a half-hour public jazz recital.

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Independent Study

MUSA 3810 - Classical Composition Secondary (1 Credit Hour)

Prerequisite(s): (MUSA2810 >= C)

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4100 - Voice Secondary (1 Credit Hour)

Prerequisite(s): MUSA 3100 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4101 - Voice Concentration (2 Credit Hours)

Prerequisite(s): MUSA 3102 >= C

Corequisite(s): MUSA 2105 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4102 - Voice Concentration (2 Credit Hours)

Prerequisite(s): MUSA 4101 >= C

Corequisite(s): MUSA 2105 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4103 - Voice Major (2 Credit Hours)

Prerequisite(s): MUSA 3104 >= C

Corequisite(s): MUSA 2105 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4104 - Voice Major (2 Credit Hours)

Prerequisite(s): MUSA 4103 >= C

Corequisite(s): MUSA 2105 or MUSI 1500

Pre- or Corequisite(s): MUSI 3620 or MUSI 3621

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4105 - Senior Voice Recital (1 Credit Hour)

Individualized instruction in the student's major performance medium leading to the performance of a one-hour public solo recital with program notes researched and written by the student. **Prerequisite(s):** Permission of the student's applied lesson instructor; Completion of the Piano Proficiency and the Computer Applications in Music Proficiency.

Corequisite(s): MUSA 4102 or MUSA 4104

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSA 4210 - Flute Secondary (1 Credit Hour)

Prerequisite(s): MUSA 3210 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4211 - Flute Concentration (2 Credit Hours)

Prerequisite(s): MUSA 3212 >= C

Corequisite(s): MUSA 2205 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4212 - Flute Concentration (2 Credit Hours)

Prerequisite(s): MUSA 4211 >= C

Corequisite(s): MUSA 2205 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4213 - Flute Major (2 Credit Hours)

Prerequisite(s): MUSA 3214 >= C

Corequisite(s): MUSA 2205 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4214 - Flute Major (2 Credit Hours)

Prerequisite(s): MUSA 4213 >= C

Corequisite(s): MUSA 2205 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4215 - Senior Flute Recital (1 Credit Hour)

Individualized instruction in the student's major performance medium leading to the performance of a one-hour public solo recital with program notes researched and written by the student. **Prerequisite(s):** Permission of the student's applied lesson instructor; Completion of the Piano Proficiency and the Computer Applications in Music Proficiency.

Corequisite(s): MUSA 4212 or MUSA 4214

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSA 4220 - Oboe Secondary (1 Credit Hour)

Prerequisite(s): MUSA 3220 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4221 - Oboe Concentration (2 Credit Hours)

Prerequisite(s): MUSA 3222 >= C

Corequisite(s): MUSA 2205 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4222 - Oboe Concentration (2 Credit Hours)

Prerequisite(s): MUSA 4221 >= C

Corequisite(s): MUSA 2205 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4223 - Oboe Major (2 Credit Hours)

Prerequisite(s): MUSA 3224 >= C

Corequisite(s): MUSA 2205 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4224 - Oboe Major (2 Credit Hours)

Prerequisite(s): MUSA 4223 >= C

Corequisite(s): MUSA 2205 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4225 - Senior Oboe Recital (1 Credit Hour)

Individualized instruction in the student's major performance medium leading to the performance of a one-hour public solo recital with program notes researched and written by the student. **Prerequisite(s):** Permission of the student's applied lesson instructor; Completion of the Piano Proficiency and the Computer Applications in Music Proficiency.

Corequisite(s): MUSA 4222 or MUSA 4224

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSA 4230 - Clarinet Secondary (1 Credit Hour)

Prerequisite(s): MUSA 3230 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4231 - Clarinet Concentration (2 Credit Hours)

Prerequisite(s): MUSA 3232 >= C

Corequisite(s): MUSA 2205 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4232 - Clarinet Concentration (2 Credit Hours)

Prerequisite(s): MUSA 4231 >= C

Corequisite(s): MUSA 2205 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4233 - Clarinet Major (2 Credit Hours)

Prerequisite(s): MUSA 3234 >= C

Corequisite(s): MUSA 2205 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4234 - Clarinet Major (2 Credit Hours)

Prerequisite(s): MUSA 4233 >= C

Corequisite(s): MUSA 2205 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4235 - Senior Clarinet Recital (1 Credit Hour)

Individualized instruction in the student's major performance medium leading to the performance of a one-hour public solo recital with program notes researched and written by the student. Prerequisite(s): Permission of the student's applied lesson instructor; Completion of the Piano Proficiency and the Computer Applications in Music Proficiency. Corequisite: MUSA 4XX2 or 4XX4.

Corequisite(s): MUSA 4232 or MUSA 4234

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSA 4240 - Bassoon Secondary (1 Credit Hour)

Prerequisite(s): MUSA 3240 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4241 - Bassoon Concentration (2 Credit Hours)

Prerequisite(s): MUSA 3242 >= C

Corequisite(s): MUSA 2205 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4242 - Bassoon Concentration (2 Credit Hours)

Prerequisite(s): MUSA 4241 >= C

Corequisite(s): MUSA 2205 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4243 - Bassoon Major (2 Credit Hours)

Prerequisite(s): MUSA 3244 >= C

Corequisite(s): MUSA 2205 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4244 - Bassoon Major (2 Credit Hours)

Prerequisite(s): MUSA 4243 >= C

Corequisite(s): MUSA 2205 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4245 - Senior Bassoon Recital (1 Credit Hour)

Individualized instruction in the student's major performance medium leading to the performance of a one-hour public solo recital with program notes researched and written by the student. **Prerequisite(s):** Permission of the student's applied lesson instructor; Completion of the Piano Proficiency and the Computer Applications in Music Proficiency.

Corequisite(s): MUSA 4242 or MUSA 4244

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSA 4250 - Saxophone Secondary (1 Credit Hour)

Prerequisite(s): MUSA 3250 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4251 - Saxophone Concentration (2 Credit Hours)

Prerequisite(s): MUSA 3252 >= C

Corequisite(s): MUSA 2205 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4252 - Saxophone Concentration (2 Credit Hours)

Prerequisite(s): MUSA 4251 >= C

Corequisite(s): MUSA 2205 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4253 - Saxophone Major (2 Credit Hours)

Prerequisite(s): MUSA 3254 >= C

Corequisite(s): MUSA 2205 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4254 - Saxophone Major (2 Credit Hours)

Prerequisite(s): MUSA 4253 >= C

Corequisite(s): MUSA 2205 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4255 - Senior Saxophone Recital (1 Credit Hour)

Individualized instruction in the student's major performance medium leading to the performance of a one-hour public solo recital with program notes researched and written by the student. Prerequisite(s): Permission of the student's applied lesson instructor; Completion of the Piano Proficiency and the Computer Applications in Music Proficiency.

Corequisite(s): MUSA 4252 or MUSA 4254

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSA 4310 - Trumpet Secondary (1 Credit Hour)

Prerequisite(s): MUSA 3310 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4311 - Trumpet Concentration (2 Credit Hours)

Prerequisite(s): MUSA 3312 >= C

Corequisite(s): MUSA 2305 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4312 - Trumpet Concentration (2 Credit Hours)

Prerequisite(s): MUSA 4311 >= C

Corequisite(s): MUSA 2305 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4313 - Trumpet Major (2 Credit Hours)

Prerequisite(s): MUSA 3314 >= C

Corequisite(s): MUSA 2305 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis
Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4314 - Trumpet Major (2 Credit Hours)

Prerequisite(s): MUSA 4313 >= C
Corequisite(s): MUSA 2305 or MUSI 1500
Lecture Hours: 1
Repeatability: May be repeated for credit.
Grade Mode: Normal, Audit
Major Restrictions: Performance
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching
Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4315 - Senior Trumpet Recital (1 Credit Hour)

Individualized instruction in the student's major performance medium leading to the performance of a one-hour public solo recital with program notes researched and written by the student. **Prerequisite(s):** Permission of the student's applied lesson instructor; Completion of the Piano Proficiency and the Computer Applications in Music Proficiency.
Corequisite(s): MUSA 4312 or MUSA 4314
Repeatability: May not be repeated for credit.
Grade Mode: Normal, Audit
Major Restrictions: Performance
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSA 4320 - Horn Secondary (1 Credit Hour)

Prerequisite(s): MUSA 3320 >= C
Repeatability: May be repeated for credit.
Grade Mode: Normal, Audit
Major Restrictions: Music Education, Music, Performance
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis
Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4321 - Horn Concentration (2 Credit Hours)

Prerequisite(s): MUSA 3322 >= C
Corequisite(s): MUSA 2305 or MUSI 1500
Lecture Hours: 1
Repeatability: May be repeated for credit.
Grade Mode: Normal, Audit
Major Restrictions: Music Education, Music
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis
Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4322 - Horn Concentration (2 Credit Hours)

Prerequisite(s): MUSA 4321 >= C

Corequisite(s): MUSA 2305 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4323 - Horn Major (2 Credit Hours)

Prerequisite(s): MUSA 3324 >= C

Corequisite(s): MUSA 2305 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4324 - Horn Major (2 Credit Hours)

Prerequisite(s): MUSA 4323 >= C

Corequisite(s): MUSA 2305 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4325 - Senior Horn Recital (1 Credit Hour)

Individualized instruction in the student's major performance medium leading to the performance of a one-hour public solo recital with program notes researched and written by the student. Prerequisite(s): Permission of the student's applied lesson instructor; Completion of the Piano Proficiency and the Computer Applications in Music Proficiency.

Corequisite(s): MUSA 4322 or MUSA 4324

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSA 4330 - Trombone Secondary (1 Credit Hour)

Prerequisite(s): MUSA 3330 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4331 - Trombone Concentration (2 Credit Hours)

Prerequisite(s): MUSA 3332 >= C)

Corequisite(s): MUSA 2305 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4332 - Trombone Concentration (2 Credit Hours)

Prerequisite(s): MUSA 4331 >= C)

Corequisite(s): MUSA 2305 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4333 - Trombone Major (2 Credit Hours)

Prerequisite(s): MUSA 3334 >= C)

Corequisite(s): MUSA 2305 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4334 - Trombone Major (2 Credit Hours)

Prerequisite(s): MUSA 4333 >= C)

Corequisite(s): MUSA 2305 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4335 - Senior Trombone Recital (1 Credit Hour)

Individualized instruction in the student's major performance medium leading to the performance of a one-hour public solo recital with program notes researched and written by the student. Prerequisite(s): Permission of the student's applied lesson instructor; Completion of the Piano Proficiency and the Computer Applications in Music Proficiency.

Corequisite(s): MUSA 4332 or MUSA 4334

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSA 4340 - Euphonium Secondary (1 Credit Hour)

Prerequisite(s): MUSA 3340 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4341 - Euphonium Concentration (2 Credit Hours)

Prerequisite(s): MUSA 3342 >= C

Corequisite(s): MUSA 2305 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4342 - Euphonium Concentration (2 Credit Hours)

Prerequisite(s): MUSA 4341 >= C

Corequisite(s): MUSA 2305 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4343 - Euphonium Major (2 Credit Hours)

Prerequisite(s): MUSA 3344 >= C

Corequisite(s): MUSA 2305 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4344 - Euphonium Major (2 Credit Hours)

Prerequisite(s): MUSA 4343 >= C

Corequisite(s): MUSA 2305 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4345 - Senior Euphonium Recital (1 Credit Hour)

Individualized instruction in the student's major performance medium leading to the performance of a one-hour public solo recital with program notes researched and written by the student. **Prerequisite(s):** Permission of the student's applied lesson instructor; Completion of the Piano Proficiency and the Computer Applications in Music Proficiency.

Corequisite(s): MUSA 4342 or MUSA 4344

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSA 4350 - Tuba Secondary (1 Credit Hour)

Prerequisite(s): MUSA 3350 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4351 - Tuba Concentration (2 Credit Hours)

Prerequisite(s): MUSA 3352 >= C

Corequisite(s): MUSA 2305 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4352 - Tuba Concentration (2 Credit Hours)

Prerequisite(s): MUSA 4351 >= C

Corequisite(s): MUSA 2305 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4353 - Tuba Major (2 Credit Hours)

Prerequisite(s): MUSA 3354 >= C

Corequisite(s): MUSA 2305 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4354 - Tuba Major (2 Credit Hours)

Prerequisite(s): MUSA 4353 >= C

Corequisite(s): MUSA 2305 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4355 - Senior Tuba Recital (1 Credit Hour)

Individualized instruction in the student's major performance medium leading to the performance of a one-hour public solo recital with program notes researched and written by the student. Prerequisite(s): Permission of the student's applied lesson instructor; Completion of the Piano Proficiency and the Computer Applications in Music Proficiency.

Corequisite(s): MUSA 4352 or MUSA 4354

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSA 4410 - Percussion Secondary (1 Credit Hour)

Prerequisite(s): MUSA 3410 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4411 - Percussion Concentration (2 Credit Hours)

Prerequisite(s): MUSA 3412 >= C

Corequisite(s): MUSA 2405 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4412 - Percussion Concentration (2 Credit Hours)

Prerequisite(s): MUSA 4411 >= C

Corequisite(s): MUSA 2405 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4413 - Percussion Major (2 Credit Hours)

Prerequisite(s): MUSA 3414 >= C

Corequisite(s): MUSA 2405 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4414 - Percussion Major (2 Credit Hours)

Prerequisite(s): MUSA 4413 >= C

Corequisite(s): MUSA 2405 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4415 - Senior Percussion Recital (1 Credit Hour)

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSA 4510 - Violin Secondary (1 Credit Hour)

Prerequisite(s): MUSA 3510 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4511 - Violin Concentration (2 Credit Hours)

Prerequisite(s): MUSA 3512 >= C

Corequisite(s): MUSA 2505 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4512 - Violin Concentration (2 Credit Hours)

Prerequisite(s): MUSA 4511 >= C

Corequisite(s): MUSA 2505 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4513 - Violin Major (2 Credit Hours)

Prerequisite(s): MUSA 3514 >= C

Corequisite(s): MUSA 2505 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4514 - Violin Major (2 Credit Hours)

Prerequisite(s): MUSA 4513 >= C

Corequisite(s): MUSA 2505 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4515 - Senior Violin Recital (1 Credit Hour)

Individualized instruction in the student's major performance medium leading to the performance of a one-hour public solo recital with program notes researched and written by the student. Prerequisite(s): Permission of the student's applied lesson instructor; Completion of the Piano Proficiency and the Computer Applications in Music Proficiency.

Corequisite(s): MUSA 4512 or MUSA 4514

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSA 4520 - Viola Secondary (1 Credit Hour)

Prerequisite(s): MUSA 3520 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4521 - Viola Concentration (2 Credit Hours)

Prerequisite(s): MUSA 3522 >= C

Corequisite(s): MUSA 2505 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4522 - Viola Concentration (2 Credit Hours)

Prerequisite(s): MUSA 4521 >= C

Corequisite(s): MUSA 2505 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4523 - Viola Major (2 Credit Hours)

Prerequisite(s): MUSA 3524 >= C

Corequisite(s): MUSA 2505 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4524 - Viola Major (2 Credit Hours)

Prerequisite(s): MUSA 4523 >= C

Corequisite(s): MUSA 2505 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4525 - Senior Viola Recital (1 Credit Hour)

Individualized instruction in the student's major performance medium leading to the performance of a one-hour public solo recital with program notes researched and written by the student. Prerequisite(s): Permission of the student's applied lesson instructor; Completion of the Piano Proficiency and the Computer Applications in Music Proficiency.

Corequisite(s): MUSA 4522 or MUSA 4524

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSA 4530 - Violincello Secondary (1 Credit Hour)

Prerequisite(s): MUSA 3530 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4531 - Violincello Concentration (2 Credit Hours)

Prerequisite(s): MUSA 3532 >= C

Corequisite(s): MUSA 2505 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4532 - Violincello Concentration (2 Credit Hours)

Prerequisite(s): MUSA 4531 >= C

Corequisite(s): MUSA 2505 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4533 - Violincello Major (2 Credit Hours)

Prerequisite(s): MUSA 3534 >= C

Corequisite(s): MUSA 2505 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4534 - Violincello Major (2 Credit Hours)

Prerequisite(s): MUSA 4533 >= C

Corequisite(s): MUSA 2505 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4535 - Senior Violincello Recital (1 Credit Hour)

Individualized instruction in the student's major performance medium leading to the performance of a one-hour public solo recital with program notes researched and written by the student. **Prerequisite(s):** Permission of the student's applied lesson instructor; Completion of the Piano Proficiency and the Computer Applications in Music Proficiency.

Corequisite(s): MUSA 4532 or MUSA 4534

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSA 4540 - Double Bass Secondary (1 Credit Hour)

Prerequisite(s): MUSA 3540 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4541 - Double Bass Concentration (2 Credit Hours)

Prerequisite(s): MUSA 3542 >= C

Corequisite(s): MUSA 2505 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4542 - Double Bass Concentration (2 Credit Hours)

Prerequisite(s): MUSA 4541 >= C

Corequisite(s): MUSA 2505 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4543 - Double Bass Major (2 Credit Hours)

Prerequisite(s): MUSA 3544 >= C

Corequisite(s): MUSA 2505 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4544 - Double Bass Major (2 Credit Hours)

Prerequisite(s): MUSA 4543 >= C

Corequisite(s): MUSA 2505 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4545 - Senior Double Bass Recital (1 Credit Hour)

Individualized instruction in the student's major performance medium leading to the performance of a one-hour public solo recital with program notes researched and written by the student. Prerequisite(s): Permission of the student's applied lesson instructor; Completion of the Piano Proficiency and the Computer Applications in Music Proficiency.

Corequisite(s): MUSA 4542 or MUSA 4544

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSA 4550 - Guitar Secondary (1 Credit Hour)

Prerequisite(s): MUSA 3550 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4551 - Guitar Concentration (2 Credit Hours)

Prerequisite(s): MUSA 3552 >= C

Corequisite(s): MUSA 2555 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4552 - Guitar Concentration (2 Credit Hours)

Prerequisite(s): MUSA 4551 >= C

Corequisite(s): MUSA 2555 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4553 - Guitar Major (2 Credit Hours)

Prerequisite(s): MUSA 3554 >= C

Corequisite(s): MUSA 2555 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4554 - Guitar Major (2 Credit Hours)

Prerequisite(s): MUSA 4553 >= C

Corequisite(s): MUSA 2555 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4555 - Senior Guitar Recital (1 Credit Hour)

Individualized instruction in the student's major performance medium leading to the performance of a one-hour public solo recital with program notes researched and written by the student. **Prerequisite(s):** Permission of the student's applied lesson instructor; Completion of the Piano Proficiency and the Computer Applications in Music Proficiency.

Corequisite(s): MUSA 4552 or MUSA 4554

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSA 4610 - Piano Secondary (1 Credit Hour)

Prerequisite(s): MUSA 3610 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4611 - Piano Concentration (2 Credit Hours)

Must enroll in one of the following as a co-requisite: MUSI 3610, 3620, 3621, or 3630.

Prerequisite(s): MUSA 3612 >= C

Corequisite(s): MUSA 2605 or MUSI 1500

Pre- or Corequisite(s): MUSI 3610 or MUSI 3620 or MUSI 3621 or MUSI 3630

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4612 - Piano Concentration (2 Credit Hours)

Prerequisite(s): MUSA 4611 >= C

Corequisite(s): MUSA 2605 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4613 - Piano Major (2 Credit Hours)

Prerequisite(s): MUSA 3614 >= C

Corequisite(s): MUSA 2605 or MUSI 1500

Pre- or Corequisite(s): MUSI 3610 or MUSI 3620 or MUSI 3621 or MUSI 3630

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4614 - Piano Major (2 Credit Hours)

Prerequisite(s): MUSA 4613 >= C

Corequisite(s): MUSA 2605 or MUSI 1500

Pre- or Corequisite(s): MUSI 3610 or MUSI 3620 or MUSI 3621 or MUSI 3630

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4615 - Senior Piano Recital (1 Credit Hour)

Individualized instruction in the student's major performance medium leading to the performance of a one-hour public solo recital with program notes researched and written by the student. **Prerequisite(s):** Permission of the student's applied lesson instructor; Completion of the Piano Proficiency and the Computer Applications in Music Proficiency.

Corequisite(s): MUSA 4612 or MUSA 4614

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSA 4620 - Organ Secondary (1 Credit Hour)

Prerequisite(s): MUSA 3620 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4621 - Organ Concentration (2 Credit Hours)

Prerequisite(s): MUSA 3622 >= C

Corequisite(s): MUSA 2605 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4622 - Organ Concentration (2 Credit Hours)

Prerequisite(s): MUSA 4621 >= C

Corequisite(s): MUSA 2605 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4623 - Organ Major (2 Credit Hours)

Prerequisite(s): MUSA 3624 >= C

Corequisite(s): MUSA 2605 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-

one),Practice Teaching,Internship/Practicum,Thesis

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4624 - Organ Major (2 Credit Hours)

Prerequisite(s): MUSA 4623 >= C

Corequisite(s): MUSA 2605 or MUSI 1500

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Practice Teaching

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4625 - Senior Organ Recital (1 Credit Hour)

Individualized instruction in the student's major performance medium leading to the performance of a one-hour public solo recital with program notes researched and written by the student. Prerequisite(s): Permission of the student's applied lesson instructor; Completion of the Piano Proficiency and the Computer Applications in Music Proficiency.

Corequisite(s): MUSA 4622 or MUSA 4624

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Practice Teaching,Internship/Practicum,Thesis

MUSA 4713 - Jazz Winds (2 Credit Hours)

Individualized instruction in jazz. One one-hour private lesson per week. Emphasis will be placed upon jazz performance skills and pedagogical concepts.

Lecture Hours: 3 **Lab Hours:** 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Independent Study

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4714 - Jazz Winds (2 Credit Hours)

Individualized instruction in jazz. One one-hour private lesson per week. Emphasis will be placed upon jazz performance skills and pedagogical concepts.

Lecture Hours: 3 **Lab Hours:** 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Independent Study

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4715 - Jazz Winds Senior Recital (0 Credit Hours)

Individualized instruction in jazz leading to the performance of a one-hour public jazz recital with program notes researched and written by the student.

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit
Major Restrictions: Performance
Schedule Type (Primary): Independent Study

MUSA 4723 - Jazz Piano (2 Credit Hours)

Individualized instruction in jazz. One one-hour private lesson per week. Emphasis will be placed upon jazz performance skills and pedagogical concepts.

Lecture Hours: 3 **Lab Hours:** 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Independent Study

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4724 - Jazz Piano (2 Credit Hours)

Individualized instruction in jazz. One one-hour private lesson per week. Emphasis will be placed upon jazz performance skills and pedagogical concepts.

Lecture Hours: 3 **Lab Hours:** 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Independent Study

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4725 - Jazz Piano Senior Recital (0 Credit Hours)

Individualized instruction in jazz leading to the performance of a one-hour public jazz recital with program notes researched and written by the student.

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Independent Study

MUSA 4733 - Jazz Percussion (2 Credit Hours)

Individualized instruction in jazz. One one-hour private lesson per week. Emphasis will be placed upon jazz performance skills and pedagogical concepts.

Lecture Hours: 3 **Lab Hours:** 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Independent Study

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4734 - Jazz Percussion (2 Credit Hours)

Individualized instruction in jazz. One one-hour private lesson per week. Emphasis will be placed upon jazz performance skills and pedagogical concepts.

Lecture Hours: 3 **Lab Hours:** 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Independent Study

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4735 - Jazz Percussion Senior Recital (0 Credit Hours)

Individualized instruction in jazz leading to the performance of a one-hour public jazz recital with program notes researched and written by the student.

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Independent Study

MUSA 4743 - Jazz Strings (2 Credit Hours)

Individualized instruction in jazz. One one-hour private lesson per week. Emphasis will be placed upon jazz performance skills and pedagogical concepts.

Lecture Hours: 3 **Lab Hours:** 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Independent Study

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4744 - Jazz Strings (2 Credit Hours)

Individualized instruction in jazz. One one-hour private lesson per week. Emphasis will be placed upon jazz performance skills and pedagogical concepts.

Lecture Hours: 3 **Lab Hours:** 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Independent Study

Additional Course Fee: Applied Music 2 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSA 4745 - Jazz Strings Senior Recital (0 Credit Hours)

Individualized instruction in jazz leading to the performance of a one-hour public jazz recital with program notes researched and written by the student.

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Performance

Schedule Type (Primary): Independent Study

MUSA 4810 - Classical Composition Secondary (1 Credit Hour)

Prerequisite(s): MUSA 3810 >= C

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Applied Music 1 Fee **Fee Type:** Per Credit Hour **Fee Amount:** \$ 50

MUSI 1000 - Augusta University Pep Band (0 to 1 Credit Hour)

The AU Pep Band performs at all home basketball games and at the Peachbelt Conference Tournament. Music performed will be selected from a wide variety of sources, including popular and jazz idioms. Everyone is welcome to participate. No audition required.

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum

MUSI 1101 - Aural Skills I (2 Credit Hours)

The study of the diatonic harmony of the common practice period through aural analysis and recognition and the development of sight-singing skills. Emphasis on cadences, melodic form, non-harmonic tones, and diatonic triads.

Pre- or Corequisite(s): MUSI 1211

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSI 1102 - Aural Skills II (2 Credit Hours)

A continued study of the diatonic harmony of the common practice period through aural analysis and recognition and the development of sight-singing skills. Introduction to elementary forms, chromatic harmony, elementary modulation and secondary dominants of primary chords.

Prerequisite(s): MUSI 1101 >= C and MUSI 1211 >= C and MUSI 1212 >= C

Pre- or Corequisite(s): MUSI 1212

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MUSI 1201 - Music Fundamentals I (2 Credit Hours)

A course in basic musicianship for non-music majors and music majors, including a study of pitch reading, rhythm reading, analysis of music, major scales, key signatures, intervals from the major scales, and triads; with further application of learned theoretical concepts through the development of rudimentary keyboard, ear-training and sight-singing skills. Does not count toward the music degree. Offered summer.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSI 1211 - Music Theory I (2 Credit Hours)

A study of the diatonic harmony of the common practice period through the development of composition, analysis and keyboard skills. Emphasis on cadences, melodic form, non-harmonic tones, and diatonic triads. Offered fall semester.

Corequisite(s): MUSI 1101

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

MUSI 1212 - Music Theory II (2 Credit Hours)

A continued study of the diatonic and chromatic harmony of the common practice period through the development of composition, analysis and keyboard skills. Emphasis on elementary forms, chromatic harmony, elementary modulation and secondary dominants of primary chords.

Prerequisite(s): MUSI 1102 and MUSI 1211

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

MUSI 1500 - Recital Laboratory (0 Credit Hours)

A forum for student performances and recital/concert attendance. Emphasis on exposing the student to a variety of musical styles and genres within the classical and jazz traditions. Corequisite: Major or concentration applied lessons. Offered fall and spring semesters.

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSI 1521 - Class Piano I (1 Credit Hour)

An introduction to the keyboard and training in basic keyboard technique, with emphasis on major scales, repertoire, and simple harmonization. Offered fall and spring.

Lecture Hours: 2

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

MUSI 1522 - Class Piano II (1 Credit Hour)

A continuation of basic piano skills and repertoire, with emphasis on minor scales, repertoire, and extended lead sheet harmonization. Offered fall and spring.

Prerequisite(s): MUSI 1521 >= C

Lecture Hours: 2

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

MUSI 1621 - University Chorale (0 to 1 Credit Hour)

The university's Women's Ensemble is offered for freshman or sophomore students who do not major or minor in music, and who seek a choral ensemble that does not require an audition or prior choral experience. The Women's Ensemble performs at ceremonial occasions such as the Martin Luther King, Jr. birthday celebration and at spring commencement. From time to time, the group may perform at university sports events, or at student activity events. Enrollment is open to any enrolled student. Prerequisite(s): Open to any freshman or sophomore student not majoring in music.

Lecture Hours: 4

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Internship/Practicum, Thesis, Dissertation

MUSI 1630 - Augusta University Orchestra (0 to 1 Credit Hour)

Prerequisite(s): Previous experience on an orchestral instrument.

Lecture Hours: 4

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSI 1810 - Music Technology (1 Credit Hour)

The study and utilization of technology in musical applications. Emphasis on basic computer music notation systems, MIDI sequencing, and CAI. Offered fall and spring.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

MUSI 2000 - Introduction to Music Therapy (3 Credit Hours)

This course provides an overview of the field of music therapy from its historical development to current practices, national and international. The uses of music in therapy are explored with all of those who might benefit, including people who have developmental disabilities, terminally ill, dependent on substances, have psychiatric disorders, those in acute or chronic care hospitals, birthing centers, and pain management clinics. Lectures, videotapes, and professional conferences provide insight into what is music therapy and who is best suited as MT practitioners.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal

Schedule Type (Primary): Lecture

MUSI 2101 - Aural Skills III (2 Credit Hours)

A continued study of the chromatic harmony of the common practice period through aural analysis and recognition and the development of sight-singing skills. Emphasis on elementary forms, modulation to closely related and foreign keys, and secondary leading tone chords of primary chords.

Prerequisite(s): MUSI 1102 >= C and MUSI 1212 >= C

Pre- or Corequisite(s): MUSI 2211

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSI 2102 - Aural Skills IV (2 Credit Hours)

A continued study of the harmonic practices of the 19th and early 20th centuries through aural analysis and recognition and the development of sight-singing skills. Emphasis on common formal processes, extended tertian chords, modal practices and the twelve-tone system.

Prerequisite(s): MUSI 2101 >= C and MUSI 2211 >= C

Pre- or Corequisite(s): MUSI 2212

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MUSI 2211 - Music Theory III (2 Credit Hours)

A continued study of the chromatic harmony of the common practice period through the development of composition, analysis and keyboard skills. Emphasis on elementary forms, modulation to closely related and foreign keys, and secondary leading tone chords of primary chords.

Prerequisite(s): MUSI 1212 >= C

Pre- or Corequisite(s): MUSI 2101

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Asynchronous Instruction

MUSI 2212 - Music Theory IV (2 Credit Hours)

A continued study of the harmonic practices of the 19th and early 20th centuries through the development of composition, analysis and keyboard skills. Emphasis on common formal processes, extended tertian chords, modal practices and the twelve-tone system.

Prerequisite(s): MUSI 2211 >= C

Pre- or Corequisite(s): MUSI 2102

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Asynchronous Instruction

MUSI 2230 - Introduction to Western Music Literature (2 Credit Hours)

The art of music listening, involving study of the evolution of musical styles from the western tradition by listening to and discussing established masterworks. The course's approach is chronological with an emphasis on developing listening skills. Offered spring.

Prerequisite(s): MUSI 2101 >= C and MUSI 2211 >= C

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSI 2320 - Rock n' Roll and Society (3 Credit Hours)

A chronicle of the musical and historical development of rock-based popular music from its formative stages through the present day. Popular music will be examined within the sociocultural, political and economic contexts of a rapidly changing society where music stands as a dominant force in popular culture.

Core IMPACTS Requirement(s) Satisfied: Arts, Humanities, and Ethics (Humanities)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MUSI 2320H - Honors: Rock 'n' Roll and Society (3 Credit Hours)

A chronicle of the musical and historical development of rock-based popular music from its formative stages through the present day. Popular music will be examined within the sociocultural, political and economic contexts of a rapidly changing society where music stands as a dominant force in popular culture. This is an honors course.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Undergraduate Semester

Schedule Type (Primary): Lecture

MUSI 2330 - Music of the World's Peoples (3 Credit Hours)

An inquiry into the dynamics of western and non-western value systems and behaviors by studying classical, traditional, primitive, and folk music traditions in the context of human life in a variety of cultures.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSI 2340 - Music of the Spheres (3 Credit Hours)

A survey of the music, sounds and images on the Voyager Interstellar golden records found on the Voyager spacecraft which NASA launched from Florida in 1977. These contents from all over the world will be examined and discussed from a cultural and historical perspective as selections to represent Earth's humanity.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C) and (ENGL 1102 >= C or ENGL 1102H >= C)

Core IMPACTS Requirement(s) Satisfied: Arts, Humanities, and Ethics (Humanities)

Lecture Hours: 3

Repeatability: May be repeated for credit up to three times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

MUSI 2350 - The World of Film Music (3 Credit Hours)

Film Music is a distinct art form which synthesizes artistic sound with a visual image. This course explores Film Music in several aspects including, historical, aesthetic, and analytical. Analytic and listening skills are developed. Various aspects of music are addressed, including Western Classical History, Popular and Rock and Roll Music, and instrumentation and orchestration. Available for the Arts, Humanities, and Ethics area of Core IMPACTS courses.

Core IMPACTS Requirement(s) Satisfied: Arts, Humanities, and Ethics (Humanities)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

MUSI 2350H - Honors: World of Film Music (3 Credit Hours)

Film Music is a distinct art form which synthesizes artistic sound with a visual image. This Honors course explores Film Music in several aspects, including historical, aesthetic, and analytical. Analytic and listening skills are developed. Various aspects of music are addressed including Western Classical History, Popular and Rock and Roll Music, and instrumentation and orchestration. Available for the Arts, Humanities, and Ethics area of Core IMPACTS courses.

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Undergraduate Semester **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture

MUSI 2400 - Music Methods for the Elementary Teacher (2 Credit Hours)

A study of the fundamentals of music for the elementary classroom teacher with emphasis on strategies for teaching music to students in the elementary grades using the Orff and Kodaly methods.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSI 2523 - Class Piano III (1 Credit Hour)

A continuation of basic technical keyboard skills with emphasis on block chords and arpeggios, repertoire, extended lead sheet harmonizations and improvisation. Offered fall and spring.

Prerequisite(s): MUSI 1522 >= C

Lecture Hours: 2

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

MUSI 2524 - Class Piano IV (1 Credit Hour)

A continuation of class piano instruction for non-keyboard majors, with emphasis on patriotic songs, repertoire, accompanying improvisation and transposition. Offered fall and spring.

Prerequisite(s): MUSI 2523 >= C

Lecture Hours: 2

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

MUSI 2525 - Advanced Keyboard Skills (1 Credit Hour)

A course in functional keyboard skills designed for all piano majors. Emphasis on skill development in transpositions, improvisation, harmonizations, and sight reading.

Prerequisite(s): MUSA 1611 >= C

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

MUSI 2600 - Introduction to Music Industry (3 Credit Hours)

This course presents a broad overview of the music industry, and explains how its various segments operate on a daily basis; the music business system, how music is marketed, promoted, distributed, and heard, who the key players are, importance of copyright, recording agreements, touring and future opportunities, and how did we get here? This course presents the career opportunities that are available within the industry, and the knowledge needed to achieve those goals.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MUSI 2650 - Career and Job Success in the Music Industry (3 Credit Hours)

This course will introduce the wide array of exciting professional careers within the music industry, including paths to: performance, artist management, recording, production, touring, teaching and alternative careers. Learn how much can be earned in these areas and what traits and skills are needed to successfully secure a job.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MUSI 2800 - Foundation of Music Production I (3 Credit Hours)

Part one of this course will introduce students to the techniques and procedures for producing music within Digital Audio Workstation (DAW) software, focusing primarily on sequencing melodies, chord progressions, and percussion using a variety of MIDI input methods. The course is intended to be open to musicians of all levels, including those with little to no musical experience. To that end, the course will also provide students the opportunity to develop essential music performance, notation, and theory skills in the areas of piano and percussion to the extent needed to produce music using MIDI keyboards and DAW software.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

MUSI 2850 - Foundations of Music Production II (3 Credit Hours)

Part two of the music production course will introduce students to techniques, concepts, and workflows associated with recording studios. Students will learn about the various types of hardware used in the studio, including microphones, preamps, mixers, and interfaces, as well as the tracking, mixing, and mastering processes in Digital Audio Workstation (DAW) software. Students will apply these concepts in individual and group projects featuring real audio recordings (singing, rapping, instruments, etc.) while continuing to develop the performance skills from Part one of the course.

Prerequisite(s): MUSI2800 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

MUSI 3210 - Form and Analysis (1 Credit Hour)

A study of the formal processes of music in representative works from all style periods through analysis and composition. Offered spring.

Prerequisite(s): MUSI 2212 >= C

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MUSI 3220 - Sixteenth Century Counterpoint (2 Credit Hours)

A study of species and modal counterpoint based on principles of Johann Fux and the style of Palestrina. Projects will develop both compositional and analytical skills.

Prerequisite(s): MUSI 2212 >= C

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSI 3230 - Eighteenth Century Counterpoint (2 Credit Hours)

A study of two- and three-voice counterpoint as found in the invention, canon, and fugue. Projects will develop both compositional and analytical skills.

Prerequisite(s): MUSI 2212 >= C

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MUSI 3320 - Music and Popular Culture (3 Credit Hours)

A chronicle of the musical and historical development of rock-based popular music from its formative stages through the present day. Popular music will be examined within the sociocultural, political and economic contexts of a rapidly changing society where music stands as a dominant force in popular culture.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MUSI 3330 - Music of the World's Peoples (3 Credit Hours)

An inquiry into the dynamics of western and non-western value systems and behaviors by studying classical, traditional, primitive, and folk music traditions in the context of human life in a variety of cultures.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSI 3340 - Music History I (3 Credit Hours)

A survey of the history of western art music from its beginnings through the Baroque era (approximately 1750). Emphasis is given to the evolution of musical style, beginning with the influence of Greek and other ancient cultures, through the philosophical and societal attitudes toward music during the medieval, Renaissance, and Baroque periods. Offered fall.

Prerequisite(s): MUSI 2211 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MUSI 3350 - Music History II (3 Credit Hours)

A survey of the history of western art music from the Classic period (approximately 1750) to the present day. Emphasis is given to the influence of the various philosophical movements in music from the Age of Enlightenment through the 19th and 20th centuries, and the changes in societal attitudes toward music during this period. Offered spring.

Prerequisite(s): MUSI 3340

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSI 3410 - Elementary and Middle School Music Methods (3 Credit Hours)

A functional course in the techniques involved in teaching general music to students in the elementary and middle school grades. Techniques addressed will include the Orff approach, Kodaly method, Dalcroze Eurythmics and eclectic design. May be taken for graduate credit and additional coursework will be required.

Prerequisite(s): (MUSI1102 >= C or MUS126 >= C or MUS127 >= C) and (MUSI1212 >= C or MUS112 >= C or MUS113 >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching

MUSI 3413 - Foundations of Music Education (3 Credit Hours)

This course is designed to introduce students to the field of music education. Topics will include historical and philosophical foundations of American music education, learning theories with application for the field, basic teaching methods, lesson plan development, forms of assessments, and current trends in the profession. Students will also be familiar with the Georgia Performance Standards for Music Education and the teacher certification requirements from the College of Education.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MUSI 3420 - Brass Methods (1 Credit Hour)

A functional course for the music educator in the techniques involved in playing and teaching trumpet, horn, trombone, euphonium and tuba. Emphasis on development of fundamental skills and teaching techniques through hands-on experience with each of these instruments. May be taken for graduate credit; additional work will be required.

Prerequisite(s): (MUSI1102 >= C or MUS126 >= C or MUS127 >= C) and (MUSI1212 >= C or MUS112 >= C or MUS113 >= C)

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching

Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MUSI 3430 - Woodwind Methods (1 Credit Hour)

A functional course for the music educator in the techniques involved in playing and teaching flute, clarinet, oboe, bassoon and saxophone. Emphasis on development of fundamental skills and teaching techniques through hands-on experience with each of these instruments. May be taken for graduate credit; additional work will be required.

Prerequisite(s): MUSI 1102 >= C and MUSI 1212 >= C

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MUSI 3440 - String Methods (1 Credit Hour)

A functional course for the music educator in the techniques involved in playing and teaching violin, viola, cello, bass, guitar, and the instruction of string players of all levels within mixed ensembles. Emphasis on the development of fundamental skills and teaching techniques through hands-on experience with each of the string instruments. May be taken for graduate credit; additional work will be required.

Prerequisite(s): MUSI 1102 >= C and MUSI 1212 >= C

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MUSI 3450 - Percussion Methods (1 Credit Hour)

A functional course for the music educator in the techniques involved in playing and teaching snare drum, mallet percussion, timpani and auxiliary instruments. Emphasis on development of fundamental skills through hands-on experience with each of the percussion instruments. May be taken for graduate credit; additional work will be required.

Prerequisite(s): MUSI 1102 >= C and MUSI 1212 >= C

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSI 3460 - Marching Band Methods (1 Credit Hour)

Developmental experiences in the pedagogical and administrative skills, and knowledge of literature needed for successful teaching of marching band in secondary schools. Emphasis on teaching marching fundamentals and drill design. May be taken for graduate credit; additional work will be required.

Prerequisite(s): MUSI 1102 >= C and MUSI 1212 >= C

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSI 3470 - Vocal Methods (1 Credit Hour)

Vocal Methods is a functional course in basic vocal pedagogy for the future music educator. It includes an entry-level study of vocal anatomy and physiology and vocal technique, working with student voices, the differences between adolescent/teen female and male voices, and the changing voice. Further consideration is given to reasonable expectations for such voices, and criteria for selection of vocal music for ensembles. May be taken for graduate credit; additional work will be required.

Prerequisite(s): MUSI 1102 >= C and MUSI 1212 >= C

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSI 3511 - English Diction for Singers (1 Credit Hour)

The study of principles and application of English diction in singing through the use of the International Phonetic Alphabet, spoken language drill, and study and recitation of representative song literature. May be taken for graduate credit; additional work will be required. Offered on alternate years.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MUSI 3512 - Italian Diction for Singers (1 Credit Hour)

The study of principles and application of Italian diction in singing through the use of the International Phonetic Alphabet, spoken language drill, and study and recitation of representative song literature. May be taken for graduate credit; additional work will be required. Offered on alternate years.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MUSI 3513 - German Diction for Singers (1 Credit Hour)

The study of principles and application of German diction in singing through the use of the International Phonetic Alphabet, spoken language drill, and study and recitation of representative song literature. May be taken for graduate credit; additional work will be required. Offered on alternate years.

Prerequisite(s): MUSI 3511 >= C and MUSI 3512 >= C

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MUSI 3514 - French Diction for Singers (1 Credit Hour)

The study of principles and application of French diction in singing through the use of the International Phonetic Alphabet, spoken language drill, and study and recitation of representative song literature. May be taken for graduate credit; additional work will be required. Offered on alternate years.

Prerequisite(s): MUSI 3511 >= C and MUSI 3512 >= C

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MUSI 3520 - Vocal Pedagogy (2 Credit Hours)

A survey of the methods and materials related to individual and group instruction in a principal performing medium. Emphasis upon solo vocal instruction. Prerequisite(s): Upper division status in applied vocal studies.

Prerequisite(s): MUSA 2102 >= C and MUSA 2104 >= C

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance **Student Class Restrictions:** Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MUSI 3530 - Keyboard Pedagogy (2 Credit Hours)

A survey of the methods and materials related to individual and group instruction in a principal performing medium. Emphasis on solo piano instruction. Prerequisite(s): Upper division status in applied keyboard studies.

Prerequisite(s): (MUSA2612 >= C or MUSA2614 >= C)

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance **Student Class Restrictions:** Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MUSI 3551 - Keyboard Accompanying (1 to 2 Credit Hours)

An introduction to performance practices for keyboard and solo instrument and/or voice. Emphasis on historic and stylistic elements, sight-reading and aural skills. Prerequisite(s): Permission of the instructor.

Lecture Hours: 2 to 4

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSI 3560 - Fundamentals of Conducting (1 Credit Hour)

Training in score reading and the integration of analysis, style, performance practices, instrumentation, and baton techniques in order to create accurate and musically expressive performances with various types of performing groups and in classroom situations. Laboratory experiences provide opportunities to apply rehearsal techniques and procedures. Offered spring.

Prerequisite(s): MUSI 2101 >= C and MUSI 2211 >= C

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MUSI 3610 - Augusta University Wind Ensemble (0 to 1 Credit Hour)

Must be enrolled in MUSA 3XXX as a co-requisite.

Lecture Hours: 4

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSI 3620 - University Singers (0 to 1 Credit Hour)

Lecture Hours: 4

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSI 3621 - University Chorale (0 to 1 Credit Hour)

The University Chorale is offered to students who do not major or minor in music and who seek a choral ensemble that does not require an audition or prior choral experience. Enrollment is open to any enrolled student.

Lecture Hours: 4

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Internship/Practicum, Thesis, Dissertation

MUSI 3625 - Gospel Choir (1 Credit Hour)

Participation in the AU gospel choir is designed to provide experiences in the rehearsal and performance of choral music, with emphasis in gospel repertoire. Literature within this genre will be studied and performed. Skills of ensemble vocalization, practical musicianship, and expressive communication will be taught, rehearsed, and demonstrated in performance on and/or off campus.

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

MUSI 3630 - Augusta University Orchestra (0 to 1 Credit Hour)

Must be enrolled in MUSA 3XXX as a co-requisite.

Lecture Hours: 4

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSI 3640 - Artist Management and Concert Touring (3 Credit Hours)

This course will present the essential components of a successful tour: finding a manager/team, defining short and long term goals, contracts and deals, alternative streams of income, and who get paid and how much. Also covered will be merchandising and promotion techniques, and the technical side of touring: stage plots, sound and lights, and how to settle up the show when the music is over. This course will provide a detailed overview of the complete touring and music merchandising process.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MUSI 3650 - Music Events and Promotion (3 Credit Hours)

This course provides an overview of key music marketing principles, terms, and practices which include merchandising, publicity, radio promotion (online and traditional), retail & distribution (online and traditional), advertising, and touring. This course will look at the opportunities available at both traditional terrestrial marketing opportunities, as well as online opportunities. Students will develop a timeline and a working marketing plan.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MUSI 3660 - Augusta University Jazz Ensemble (0 to 1 Credit Hour)

Prerequisite(s): Permission of the instructor.

Lecture Hours: 4

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSI 3720 - Jazz Improvisation I (2 Credit Hours)

The study and application of jazz improvisation techniques. Emphasis on harmonic progressions, chord/scale relationships, patterns, and stylistic considerations.

Prerequisite(s): MUSI 1212 >= C

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture

MUSI 3800 - Music Technology for Multimedia Productions (3 Credit Hours)

This course will provide students with an introduction to several types of multimedia production techniques, including foley, sound design, and scoring for film, livestreaming and podcasting, and the creation of music videos.

Prerequisite(s): MUSI 2800 >= C and MUSI 2850 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture

MUSI 4000 - Field Experience in Music (1 to 3 Credit Hours)

Lecture Hours: 1 to 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSI 4090 - Senior Project for BA in Music (2 Credit Hours)

A guided study of topics in music and its interrelationship with other disciplines through an independent research project. In consultation with the music faculty, students will choose their own topics for study and research projects. Prerequisite(s): Permission of the instructor, senior standing; completion of piano proficiency and computer applications in music proficiency.

Prerequisite(s): MUSI 1810 >= C

Lecture Hours: 0 to 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit, In Progress

Major Restrictions: Music **Student Class Restrictions:** Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSI 4190 - Special Topics in Conducting (2 Credit Hours)

A guided study of topics in conducting through independent research projects or in-depth study. Possibilities include score preparation, score study, techniques for conducting specific repertoires and public performance.

Prerequisite(s): MUSI 3560 >= C

Lecture Hours: 2

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MUSI 4210 - Instrumentation and Orchestration (1 Credit Hour)

An introduction to the basics of writing for instruments, mixed groups of instruments and arranging music of other genres. Emphasis on the development of knowledge about the ranges, capabilities and tonal characteristics of each instrument, while writing with musical variety and interest. Offered fall of alternate years.

Prerequisite(s): MUSI 2212 >= C and MUSI 2102 >= C

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSI 4220 - Contemporary Theoretical Technology (2 Credit Hours)

An exploration of the methods and techniques with which to analyze twentieth century music, including the twelve-tone technique in the music of Schoenberg, Berg, and Webern, Allen Forte's theory of pitch sets, and means of analyzing pitch centric works and electronic and aleatoric music.

Prerequisite(s): MUSI 2212 >= C

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MUSI 4230 - Jazz Arranging and Composition (2 Credit Hours)

The study and application of concepts and techniques for writing and/or arranging jazz music. Emphasis is on traditional musical principles of dealing with melody, harmony, rhythm, orchestration, and form.

Prerequisite(s): MUSI 2212 >= C and MUSI 1810 >= C and MUSI 3720 >= C and MUSI 4730 >= C

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture

MUSI 4290 - Special Topics in Music Theory (2 Credit Hours)

A guided study of theoretical techniques through independent research and analysis projects or in-depth study in a classroom setting. In consultation with the theory faculty, students will choose their own topics for study.

Prerequisite(s): MUSI 2212 >= C

Lecture Hours: 2

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MUSI 4320 - Vocal Literature (2 Credit Hours)

A study of the development of solo vocal song literature, of major song composers, and of song and song cycle repertoire.

Prerequisite(s): MUSI 2211 >= C

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MUSI 4330 - Opera Literature (2 Credit Hours)

A comprehensive survey of opera through study of the historical development, characteristics, and composers of opera.

Prerequisite(s): MUSI 2211 >= C

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MUSI 4341 - Piano Literature I (2 Credit Hours)

A history of the piano and harpsichord and an in-depth survey of the major solo repertoire from the 16th through the 18th century.

Prerequisite(s): MUSI 2211 >= C

Lecture Hours: 2 **Lab Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MUSI 4350 - Orchestral Literature (2 Credit Hours)

A comprehensive survey of symphonic music styles and history from the Pre-Classical and Baroque Periods to the present, with an emphasis on listening, research and score study.

Prerequisite(s): MUSI 2211 >= C

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MUSI 4360 - Chamber Music Literature (2 Credit Hours)

A comprehensive study of instrumental chamber music styles and history from the Baroque period to the present. Emphasis on aural identification and comparative analysis of representative works.

Prerequisite(s): MUSI 2211 >= C

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MUSI 4390 - Special Topics in Music History (2 Credit Hours)

A guided study of topics in music history through independent research projects or in-depth study in a classroom setting. In consultation with the music history faculty, students will choose their own topics for study and research projects.

Prerequisite(s): MUSI 2211 >= C

Lecture Hours: 2

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MUSI 4410 - Conducting and Methodology of Secondary Instruments (3 Credit Hours)

Developmental experiences in the gestural, pedagogical, administrative skills, and knowledge of literature needed for successful teaching of instrumental music in grades 6-12. May be taken for graduate credit; additional work will be required. Offered fall.

Prerequisite(s): MUSI 3560 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSI 4420 - Conducting and Methodology of Secondary Choral (3 Credit Hours)

Conducting and Methods is a study of the skills necessary for secondary choral teaching. Among the areas to be examined are score preparation, gestural skills, artistic judgment, teaching problems and strategies (e.g., learning theories, classroom management, discipline, etc.), and rehearsal methodology. Further matters such as cultural, historical and linguistic contexts, teaching philosophy and administrative tasks will be considered. May be taken for graduate credit; additional work will be required. Offered spring.

Prerequisite(s): MUSI 3560 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MUSI 4492 - Music Education Culminating Residency (10 Credit Hours)

Intensive, field-based apprenticeship in music at the elementary and/or middle/secondary levels. Includes supervised teaching and practical application of previous coursework. Prerequisite(s): Senior standing, fulfillment of all other graduation requirements; completion of junior recital (MUSA 3XX5); completion of piano proficiency; computer applications in music proficiency; admission to teacher education.

Prerequisite(s): MUSI 1810 >= C

Corequisite(s): EDTD 4940

Lab Hours: 20

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Major Restrictions: MUED - Music Education

Schedule Type (Primary): Independent Study **Schedule Type (Additional):** Internship/Practicum

Additional Course Fee: Student Teaching Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 200

MUSI 4493 - Internship in Music Education (6 Credit Hours)

Intensive, field-based apprenticeship in music for those employed at the elementary and/or middle/secondary levels and who are seeking certification in music. Includes supervised teaching and practical application of previous course work. Prerequisite(s): Fulfillment of other music certification requirements.

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

MUSI 4521 - Directed Studio Teaching: Vocal (0 to 3 Credit Hours)

Studio teaching of beginning to intermediate level voice students under the regular supervision of the voice faculty.

Prerequisite(s): MUSI 3520 >= C

Lecture Hours: 0 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MUSI 4531 - Directed Studio Teaching: Keyboard (0 to 3 Credit Hours)

Studio teaching of beginning to intermediate level piano students under the regular supervision of the piano faculty.

Prerequisite(s): MUSI 3530 >= C

Lecture Hours: 0 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MUSI 4541 - Direct Studio Teaching: Instrument (0 to 3 Credit Hours)

Studio teaching of beginning to intermediate level instrumental students under the regular supervision of the instrumental faculty.

Prerequisite(s): MUSI 3540 >= C

Lecture Hours: 0 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music, Performance

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MUSI 4570 - Jazz Pedagogy (2 Credit Hours)

The study and application of concepts and techniques for teaching jazz at the private, secondary, and college levels.

Prerequisite(s): MUSI 3720 >= C and MUSI 4720 >= C and MUSI 3660 >= C and MUSI 4730 >= C

Lecture Hours: 1 **Lab Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

MUSI 4600 - Music Publishing and Licensing (3 Credit Hours)

This course will present a conceptual understanding of basic licensing terms, opportunities, and strategies for intellectual property within the music industry. Included will be a mix of several real-life examples and hypothetical situations, along with review of actual agreements. Students will learn how to register works with relevant performing rights organizations, understand basic copyright terminology and learn the different licensing rights available to the artist, record label, and publisher.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MUSI 4610 - Augusta University Opera Ensemble (0 to 3 Credit Hours)

Prerequisite(s): Permission of the instructor; audition for roles in major productions.

Lecture Hours: 0 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSI 4620 - TONEalities (0 to 1 Credit Hour)

The music ensembles at Augusta University present all students with the opportunity for a hands-on experience with music in a shared effort with others. A variety of performance groups exist for the interested student regardless of major, including large ensembles and chamber groups. All instruments and voice types are welcome.

Lecture Hours: 2

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSI 4640 - Woodwind Ensemble (0 to 1 Credit Hour)

Prerequisite(s): Permission of the instructor.

Lecture Hours: 2

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSI 4650 - Brass Ensemble (0 to 1 Credit Hour)

Prerequisite(s): Permission of the instructor.

Lecture Hours: 2

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSI 4660 - Jazz Combo (0 to 1 Credit Hour)

Prerequisite(s): Permission of the instructor.

Lecture Hours: 2

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MUSI 4670 - Keyboard Ensemble (0 to 1 Credit Hour)

Prerequisite(s): Permission of the instructor.

Lecture Hours: 2

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MUSI 4680 - Percussion Ensemble (0 to 1 Credit Hour)

Prerequisite(s): Permission of the instructor.

Lecture Hours: 2

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

MUSI 4690 - Chamber Music Ensemble (0 to 1 Credit Hour)

Prerequisite(s): Permission of Instructor.

Lecture Hours: 2

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MUSI 4695 - Sand Hills String Band (1 Credit Hour)

The Sand Hills String Band is a large group ensemble composed of violin, guitar, mandolin, banjo, cello, bass, penny whistle, accordion, piano, percussion instrumentation and vocalists. Additional folk instruments maybe added as needed. The ensemble rehearses and performs an array of music from the American folk tradition..

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

MUSI 4720 - Jazz Improvisation II (2 Credit Hours)

The study and application of jazz improvisation techniques as a continuation of Jazz Improvisation. Emphasis is on harmonic progressions, chord/scale relationships, patterns, and stylistic considerations.

Prerequisite(s): MUSI 2211 >= C and MUSI 3720 >= C and MUSI 4730 >= C

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music, Performance

Schedule Type (Primary): Lecture

MUSI 4730 - Jazz History and Literature (3 Credit Hours)

The study of music in the jazz idiom from its origin to the present, with emphasis on influential musicians, groups, and composers.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Music Education, Music

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

MUSI 4800 - Live Music Production (3 Credit Hours)

Performing artists typically make a greater percentage of their revenue from live performances and touring than from their album sales & streams, making it more important than ever for artists to have the skills to design and run a live show that looks & sounds professional and engaging. This course will provide students with opportunities to deepen their understanding of analog synthesis, sequencing, and production techniques suitable for either stage or studio, learn the basics of analog and digital sound reinforcement, and explore lighting techniques for live productions. This course will also serve as a culminating experience for students working

towards their music technology certificate, drawing on concepts and techniques taught across the previous three courses (Foundations of Music Production I and II, and Music Technology for Multimedia).

Prerequisite(s): MUSI 2800 >= C and MUSI 2850 >= C and MUSI 3800 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

MUSI 4910 - Music Industry Internship (1 to 3 Credit Hours)

This course provides the music industry student access to available internships, volunteer opportunities, community partnerships or job placement listings that match the student's learning objective and personal career goals. Student acceptance of a music industry internship position for academic credit is contingent upon a suitable learning objective approved by both the employer and the appropriate instructor.

Prerequisite(s): MUSI 2600 >= C and MUSI 2650 >= C

Contact Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Directed Study (one-to-one)

MUSI 4950 - Special Topics in Art and Nonprofit Leadership (1 to 3 Credit Hours)

An independent project on a subject of the student's choice. May be directed by a member of the music faculty and/or another faculty member in the arts areas. Prerequisite: upper-division standing or post-baccalaureate status.

Contact Hours: 1 to 3

Repeatability: May be repeated for credit up to five times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Internship/Practicum

MUSI 6410 - Elementary and Middle School Methods (3 Credit Hours)

A functional course in the techniques involved in teaching general music to students in the elementary and middle school grades. Techniques addressed will include the Orff approach, Kodaly method, Dalcroze Eurythmics and eclectic design. May be taken for graduate credit and additional coursework will be required.

Prerequisite(s): MUSI 1102 >= C and MUSI 1212 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: MAT

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

MUSI 6411 - Conducting and Methods of Secondary Instruments (3 Credit Hours)

Developmental experiences in the gestural, pedagogical, administrative skills, and knowledge of literature needed for successful teaching of instrumental music in grades 6-12. May be taken for graduate credit; additional work will be required. Offered fall.

Prerequisite(s): MUSI 3560 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: MAT **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

MUSI 6412 - Conduction and Methods of Secondary Choral (3 Credit Hours)

Conducting and Methods is a study of the skills necessary for secondary choral teaching. Among the areas to be examined are score preparation, gestural skills, artistic judgment, teaching problems and strategies (e.g., learning theories, classroom management, discipline, etc.), and rehearsal methodology. Further matters such as cultural, historical and linguistic contexts, teaching philosophy and administrative tasks will be considered. May be taken for graduate credit; additional work will be required. Offered spring.

Prerequisite(s): MUSI 3560 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: MAT **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

MUSI 6413 - Foundations in Music Education (3 Credit Hours)

A guided study of topics in music education through independent research projects or in-depth study in a classroom setting. May be taken for graduate credit.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: MAT **Student Class Restrictions:** Graduate-Semester, Post Baccalaureate, Post Graduate

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

MUSI 6420 - Brass Methods (1 Credit Hour)

A functional course for the music educator in the techniques involved in playing and teaching trumpet, horn, trombone, euphonium and tuba. Emphasis on development of fundamental skills and teaching techniques through hands-on experience with each of these instruments. May be taken for graduate credit; additional work will be required.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: MAT **Student Class Restrictions:** Graduate-Semester, Post Baccalaureate, Post Graduate

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

MUSI 6430 - Woodwind Methods (1 Credit Hour)

A functional course for the music educator in the techniques involved in playing and teaching flute, clarinet, oboe, bassoon and saxophone. Emphasis on development of fundamental skills and teaching techniques through hands-on experience with each of these instruments. May be taken for graduate credit; additional work will be required.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: MAT **Student Class Restrictions:** Graduate-Semester, Post Baccalaureate, Post Graduate

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

MUSI 6440 - String Methods (1 Credit Hour)

A functional course for the music educator in the techniques involved in playing and teaching violin, viola, cello, bass, guitar, and the instruction of string players of all levels within mixed ensembles. Emphasis on the development of fundamental skills and teaching techniques through hands-on experience with each of the string instruments. May be taken for graduate credit; additional work will be required.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: MAT **Student Class Restrictions:** Graduate-Semester, Post Baccalaureate, Post Graduate

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

MUSI 6450 - Percussion Methods (1 Credit Hour)

A functional course for the music educator in the techniques involved in playing and teaching snare drum, mallet percussion, timpani and auxiliary instruments. Emphasis on development of fundamental skills through hands-on experience with each of the percussion instruments. May be taken for graduate credit; additional work will be required.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: MAT **Student Class Restrictions:** Graduate-Semester, Post Baccalaureate, Post Graduate

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

MUSI 6460 - Marching Band Methods (1 Credit Hour)

Developmental experiences in the pedagogical and administrative skills, and knowledge of literature needed for successful teaching of marching band in secondary schools. Emphasis on teaching marching fundamentals and drill design. May be taken for graduate credit; additional work will be required.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: MAT **Student Class Restrictions:** Graduate-Semester, Post Baccalaureate, Post Graduate

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

MUSI 6470 - Vocal Methods (1 Credit Hour)

Vocal Methods is a functional course in basic vocal pedagogy for the future music educator. It includes an entry-level study of vocal anatomy and physiology and vocal technique, working with student voices, the differences between adolescent/teen female and male voices, and the changing voice. Further consideration is given to reasonable expectations for such voices, and criteria for selection of vocal music for ensembles. May be taken for graduate credit; additional work will be required.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: MAT

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

MUSI 6511 - English Diction for Singers (1 Credit Hour)

The study of principles and application of English diction in singing through the use of the International Phonetic Alphabet, spoken language drill, and study and recitation of representative song literature. May be taken for graduate credit; additional work will be required. Offered on alternate years.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: MAT **Student Class Restrictions:** Graduate-Semester, Post Baccalaureate, Post Graduate

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

MUSI 6512 - Italian Diction for Singers (1 Credit Hour)

The study of principles and application of Italian diction in singing through the use of the International Phonetic Alphabet, spoken language drill, and study and recitation of representative song literature. May be taken for graduate credit; additional work will be required. Offered on alternate years.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: MAT **Student Class Restrictions:** Graduate-Semester, Post Baccalaureate, Post Graduate

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

MUSI 6513 - German Diction for Singers (1 Credit Hour)

The study of principles and application of German diction in singing through the use of the International Phonetic Alphabet, spoken language drill, and study and recitation of representative song literature. May be taken for graduate credit; additional work will be required. Offered on alternate years.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: MAT **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

MUSI 6514 - French Diction for Singers (1 Credit Hour)

The study of principles and application of French diction in singing through the use of the International Phonetic Alphabet, spoken language drill, and study and recitation of representative song literature. May be taken for graduate credit; additional work will be required. Offered on alternate years.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: MAT **Student Class Restrictions:** Graduate-Semester, Post Baccalaureate, Post Graduate

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

RNEP 5000 - Nephrology (27 Credit Hours)

Lecture Hours: 10 **Lab Hours:** 10 **Contact Hours:** 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Internship/Practicum

NEUR 5000 - Basic Clerkship in Neurology (9 Credit Hours)

This three (3) week clerkship provides an introduction to general neurological problems through direct supervised patient management. The acquisition of basic skills in history taking and physical diagnosis of neurological patients are stressed. Emphasis is placed on the ability to assimilate historical information and physical findings to diagnose an existing neurological lesion. The recognition and

management of neurological lesion. The recognition and management of neurological emergencies is included.

Lecture Hours: 2 Contact Hours: 7

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Internship/Practicum

NEUR 5001 - Adult Neurology Sub-I (12 Credit Hours)

This is a patient care elective. Students have primary care responsibility for a block of neurological inpatients. They participate in rounds and conferences and assist with the diagnostic procedures involving their patients. Students are expected to participate in the on-call rotation with other house staff.

Contact Hours: 40

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

NEUR 5003 - Neurology Consult and Clinics Externship (4 to 8 Credit Hours)

This elective is designed to provide an introduction into decision making in Neurology. The student will attend Adult Neurology Clinics and participate in the direct evaluation of patients. There is ample opportunity to examine and evaluate patients with a wide range of neurological problems. A close working relationship with the neurology attending faculty will allow maximal learning potential.

Contact Hours: 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

NEUR 5006 - Neurology Research (4 to 8 Credit Hours)

The following electives will allow the student an opportunity to concentrate on a specific area of Neurology. Clinical responsibility and/or research opportunities are available. In most instances, the specific program can be tailored to the interests and needs of the student. These electives must be arranged with the individual preceptor at least two months prior to the beginning of the rotation.

Contact Hours: 40

Repeatability: May be repeated for credit one time.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Directed Study (one-to-one)

NEUR 5008 - Neurology Off-Campus Externship (4 to 8 Credit Hours)

This elective allows students an opportunity to concentrate on a specific area of Neurology. Clinical responsibility and/or research opportunities are available. In most instances, the specific program can be tailored to the interests and needs of the student. This elective must be arranged with the individual preceptor at least two months prior to the beginning of the rotation.

Lecture Hours: 10 Contact Hours: 40

Repeatability: May be repeated for credit up to 3 times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Internship/Practicum

NEUR 5009 - Child Neurology Sub-I (12 Credit Hours)

This is a patient care elective. Students have primary care responsibility for a block of child neurology patients. They participate in rounds and conferences and assist with the diagnostic procedures involving their patients. Students are expected to participate with the house staff.

Lecture Hours: 5 Contact Hours: 20

Repeatability: May be repeated for credit one time.
Grade Mode: Normal, Audit
College Restrictions: Medical College of Georgia
Schedule Type (Primary): Lecture/Supervised Lab/Clinic

NEUR 5010 - Neurology Critical Care (12 Credit Hours)

Students have primary care responsibilities for a group of patients in the Neurological Critical Care Unit. They participate in rounds and conferences and assist with the diagnostic procedures involving their patients. The course is designed to give students a firm grounding in the care of neurological patients in the critical care setting.

Lab Hours: 60

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Supervised Lab/Clinic

NEUR 5012 - UME GME Education- Osler Apprenticeship in Neurology (4 to 8 Credit Hours)

Osler Apprentices (OAs) in neurology, is an opportunity for senior medical students with an interest in academic medicine education to gain experience and exposure to the technical, administrative, and educational skills central to pursuing a clinician educator academic pathway. Neurology is an often very intimidating specialty for learners. Responsibilities include assisting with expanding medical education materials for neurology for learners of all levels, building educational content that engages both the UME and GME aspects of medical education, and potentially building research project in medical education.

Prerequisite(s): NEUR 5000 >= B

Lecture Hours: 3 **Lab Hours:** 9

Repeatability: May be repeated for credit up to three times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Internship/Practicum

NEUR 5020 - Neuromuscular Disease Senior Elective (4 to 8 Credit Hours)

The student will spend their time examining patients with neuromuscular diseases in the EMG lab on the AU Health campus. They will see mainly outpatients but will also participate in inpatient neuromuscular consults. They will participate in the multi-disciplinary ALS clinic. The student will have the option, if available, to see neuromuscular patients at a satellite clinic at the Rehabilitation Clinic of Atrium Health Navicent in Macon Georgia under the supervision of Dr. Michael Rivner, who currently attends there 3 days a month. The student will attend biweekly training sessions on EMG and neuromuscular diseases. At the end of the rotation, it will be expected that the student will have experience caring for neuromuscular patients being able to examine and understand basic testing and treatment for these diseases.

Lecture Hours: 12 **Lab Hours:** 148

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

NEUR 5022 - Electromyography Senior Elective (4 to 8 Credit Hours)

The student will learn the basic techniques for performing electrodiagnostic studies in patients. It is expected that the student will learn when to order these studies and how they will aid in neurological diagnosis. The student will learn how to perform nerve conduction studies and it will be expected that they will be able to do them. They will learn the proper techniques for performing needle exam and what the meaning of common abnormalities are. They will learn how to properly image a nerve using ultrasound. They will learn how ultrasound can be used to localize nerves and muscles for therapeutic injections. They will learn about the role of botulinum toxin injections in the treatment of neurological conditions. They will participate in biweekly EMG/neuromuscular conferences

Lecture Hours: 12 **Lab Hours:** 148

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia
Schedule Type (Primary): Lecture/Supervised Lab/Clinic

NEUR 5999 - Basic Clerkship Remediation in Neurology (1 Credit Hour)

Remediation of the Basic Core Clerkship in Neurology

Prerequisite(s): NEUR 5000 >= B

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Independent Study

RNEU 5000 - Neurology (27 Credit Hours)

Lecture Hours: 10 **Contact Hours:** 50

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents **Program Restrictions:** PPROF_NEUR-Neurology Residency

Schedule Type (Primary): Internship/Practicum

RNEU 5001 - Child Neurology (27 Credit Hours)

Lecture Hours: 10 **Contact Hours:** 50

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Internship/Practicum

RNEU 5002 - Electroencephalogram Neurology (27 Credit Hours)

Lecture Hours: 10 **Contact Hours:** 50

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Internship/Practicum

RNEU 5003 - Electromyography Neurology (27 Credit Hours)

Lecture Hours: 5 **Contact Hours:** 4

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Internship/Practicum

RNEU 5004 - Clinical Neurophysiology (27 Credit Hours)

Lecture Hours: 5 **Contact Hours:** 4

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Internship/Practicum

RNEU 5005 - Neurology Movement Disorder (27 Credit Hours)

Neurology Movement Disorder

Lecture Hours: 5 **Contact Hours:** 4

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Residents

Schedule Type (Primary): Internship/Practicum

NSCI 2001 - Introduction in Neuroscience (3 Credit Hours)

Neuroscience is a field that seeks to understand the structure and function of the nervous system and brain. This course is intended for undergraduate students interested in understanding the molecular, cellular, behavioral, and computational mechanisms of the brain.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

NSCI 2010 - Introduction to Neuropharmacology (3 Credit Hours)

This course introduces drug-induced changes in the functioning of the nervous system. The specific focus of this course will be to provide a description of the cellular and molecular actions of drugs on synaptic transmission. This course will also refer to specific diseases of the nervous system and their treatment in addition to giving an overview of the techniques used for the study of neuropharmacology. Additional topics include factors affecting responses to drugs, properties of drugs, the kinetics of drug-receptor interactions, dose-response relationship, the principles of synaptic transmission, and criteria for synaptic transmitters.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

NSCI 2020 - Neuroscience Seminar (1 Credit Hour)

A weekly seminar course that consists of lectures presented by leading researchers and graduate students doing research in the area of neuroscience.

Prerequisite(s): NSCI 2001

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

NSCI 2990 - Undergraduate Research (0 to 3 Credit Hours)

An introduction to research problems.

Lab Hours: 0 to 3 **Contact Hours:** 0 to 3

Repeatability: May be repeated for credit up to three times.

Grade Mode: N- Normal (A, B, C, D, F)

Course Level Restrictions: US Undergraduate

Schedule Type (Primary): Supervised Lab/Clinic

NSCI 3001 - Neuroscience Journal Club (1 Credit Hour)

The goals of this weekly course are: (1) to learn how to read and critique research papers; (2) to learn how to present a polished, professional summary of a recent research paper; and (3) to acquire some background information and context to more fully appreciate research seminars. Each session will consist of a presentation of a research paper related to neuroscience. Each presentation will be followed by a student-led discussion (~15 minutes).

Prerequisite(s): NSCI 2020 >= C

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Seminar - Small Group

NSCI 3010 - Neuroscience Methods (2 Credit Hours)

This laboratory course provides practical training in the foundations of neuroscience experimentation methods. Students will engage in model system experiments, brain anatomy work, and theoretical work addressing behavioral and physiological processes.

Prerequisite(s): NSCI 2001 >= C and NSCI 2020 >= C

Lab Hours: 2 **Contact Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Supervised Lab/Clinic

Additional Course Fee: Neuroscience Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

NSCI 4010 - Neuropharmacology (3 Credit Hours)

Building on basic pharmacology skills learned in NSCI 2010, the objectives of this course are to a) provide both knowledge and conceptual understanding of the use and action of various classes of drugs in the treatment of different human diseases affecting the brain and b) develop an appreciation of the need for further research to identify new drug targets for more effective therapies.

Prerequisite(s): NSCI 2001 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

NSCI 4120 - Neurobiology of Disease (3 Credit Hours)

An in-depth examination of the pathogenesis and repair processes of neurological disorders. Different disorders are examined at the anatomical, cellular, and functional level. Emphasis is placed on experimental modeling of disorders.

Prerequisite(s): NSCI 2001 >= C and BIOL 1107 >= C

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Course Level Restrictions: US Undergraduate

Schedule Type (Primary): Lecture

NSCI 4210 - Cognitive Neuroscience (3 Credit Hours)

Provides a foundation in understanding the neural basis of cognition. It is an interdisciplinary field that brings together evidence from many different disciplines including psychology, neuroscience, biology, and anatomy to focus on questions and theories related to the architecture of cognitive processes.

Prerequisite(s): NSCI 2001 >= C

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Course Level Restrictions: US Undergraduate

Schedule Type (Primary): Lecture

NSCI 4310 - Developmental Neurobiology (3 Credit Hours)

The human brain is composed of 100 billion neurons forming over 100 trillion synapses which govern all human functions. This course explores how this system is established. It examines how neurons are generated to form complex structures; how axons and dendrites find each other to wire the nervous system together; how synapses are correctly made, and remodeled with experience. Finally, it discusses how these processes are affected in neurodevelopmental disorders.

Prerequisite(s): NSCI 2001 >= C and BIOL 1107 >= C

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 0

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Course Level Restrictions: US Undergraduate

Schedule Type (Primary): Lecture

NSCI 4990 - Neuroscience Research (3 Credit Hours)

This course involves student participation in neuroscience research supervised by a faculty member within the College of Science and Mathematics or from another Augusta University college that is involved in neuroscience research.

Prerequisite(s): NSCI 3001 >= C

Lab Hours: 3

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Supervised Lab/Clinic

Additional Course Fee: Neuroscience Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

NURO 8080 - Foundations of Leadership (1 Credit Hour)

This course delivers short lectures and interactive exercises to present over a dozen different perspectives on interpersonal skills and leadership.

Lecture Hours: 1 **Contact Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Lecture

NURO 8082 - Neuroscience II (4 Credit Hours)

Neuroscience II will cover neuronal development, learning and memory, executive functions, sleep and circadian rhythms, mood, motivation and addiction, language and communication, and cell death regeneration.

Lecture Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy

Schedule Type (Primary): Lecture

NURO 8090 - Clinical Neuroscience (2 Credit Hours)

Intensive clinical exposure to neurological, psychiatric and ophthalmic disorders. Students attend a month-long survey of neurological disorders course and then choose a clinical rotation experience from a list of opportunities. For example, during the epilepsy rotation, students shadow physicians in the epilepsy clinic, are involved with EEG conferences, brain imaging and epilepsy surgery. Students are also involved in using human brain tissue from these surgeries in basic neuroscience research.

Lecture Hours: 2 **Lab Hours:** 5 to 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F), Audit

Student Class Restrictions: GS Graduate Semester **Course Level Restrictions:** GS Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

NURO 8300 - Thesis Research (1 to 12 Credit Hours)

This course requires permanent assignment to a specific lab with a faculty advisor and a defined research project. The student works under the mentorship of their faculty thesis advisor to define, develop, and carry out the basic study of a research problem of interest to both student and advisor. This course is designed to develop the experience, understanding, and skills to conduct and assess original, independent research in biomedical science. This course is typically taken more than one time and culminates in the final semester in the preparation and defense of a MS thesis.

Lab Hours: 1 to 12

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MS_NERO-Neuroscience

Schedule Type (Primary): Thesis

NURO 8310 - Advanced Topics in Neuroscience (1 Credit Hour)

This is a highly focused elective course designed to provide students with in-depth discussions of selected, rotating topics in Neuroscience. The emphasis of the course will be on the presentation and discussion of a recently published paper and closely related background works. Class time will consist of a combination of faculty lectures and student-led lecture and discussions. Students will present comprehensive background of the topic of discussion, followed by critical evaluation of scientific papers taken from recent primary literature. This course will provide students both with in-depth knowledge of selected topics in Neuroscience, and increased experience with reading, presenting and critically analyzing scientific literature.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture

NURO 9010 - Neuroscience Seminar (1 Credit Hour)

The Neuroscience Seminar course consists of research seminars by visiting neuroscientists. In addition, students will have an opportunity to talk to each speaker during a lunch meeting and to serve as hosts to visiting scientists.

Contact Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy

Schedule Type (Primary): Seminar - Small Group

NURO 9210 - Investigation of a Problem in Neuroscience (1 to 12 Credit Hours)

Laboratory rotation course in which the student works with individual faculty members on a specific research topic. This provides an introduction to techniques utilized in that laboratory as well as an introduction to the scientific method.

Lab Hours: 24

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: The Graduate School **Major Restrictions:** Neuroscience **Student Class Restrictions:** Graduate-Semester

Course Level Restrictions: Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Program Restrictions:** DPHIL_NERO-Neuroscience

Schedule Type (Primary): Supervised Lab/Clinic

NURO 9300 - Research in Neuroscience (1 to 12 Credit Hours)

Students works closely with their faculty dissertation mentor on an in-depth study of a research question of interest to both student and mentor. Enrollment in this course requires official admission to candidacy.

Lab Hours: 24

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: The Graduate School **Major Restrictions:** Neuroscience **Student Class Restrictions:** Graduate-Semester

Course Level Restrictions: Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Program Restrictions:** DPHIL_NERO-Neuroscience

Schedule Type (Primary): Dissertation

NMMT 3100 - Introduction to Patient Care (2 Credit Hours)

Presentation of fundamental patient care skills and medical terminology needed for entry level biomedical and radiologic science professionals. Content includes essential patient care concepts including medical assessment, physical assessment, physical assistance, infection control and aseptic technique, physiologic monitoring, venipuncture, drug administration, patient special needs, psychosocial considerations, and medical emergencies.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRS_NUMT-Nuclear Medicine Technology

Schedule Type (Primary): Asynchronous Instruction

NMMT 3105 - Introduction to Patient Care Lab (1 Credit Hour)

Laboratories include fundamental patient care skills needed for entry level biomedical and radiologic science professionals. Included are medical assessment, physical assessment, physical assistance, infection control and aseptic technique, physiologic monitoring, venipuncture, drug administration, patient special needs, psychosocial considerations, and medical emergencies.

Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Degree Restrictions:** BS Radiologic Sciences

Schedule Type (Primary): Supervised Lab/Clinic

NMMT 3210 - Radiation Protection and Biology (4 Credit Hours)

Regulations, principles and practices of radiation protection, and information particular to each radiologic specialty and/or modality. Medical aspects of radiobiology including cellular, systemic and total body responses. Prerequisite(s): Admission to the RADT program or permission of instructor with College Algebra or Pre-Calculus. Prerequisite(s): NMT program enrollment, College Algebra or Pre-Calculus or instructor permission.

Prerequisite(s): MATH 1111 $\geq$ C or MATH 1113 $\geq$ C

Lecture Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Program Restrictions:** BSRS_NUMT-Nuclear Medicine Technology

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

NMMT 3215 - Radiation Protection and Bio Lab (1 Credit Hour)

Regulations, principles and practices of radiation protection, and information particular to each radiologic specialty and/or modality. Medical aspects of radiobiology including cellular, systemic and total body responses. Prerequisite(s): Admission to NMT program or permission of instructor

Lab Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRS_NUMT-Nuclear Medicine Technology, CERNM_NUMT-Nuclear Medicine Technology

Schedule Type (Primary): Supervised Lab/Clinic

NMMT 3320 - Information Technology and Clinical Services Delivery (1 Credit Hour)

Provides an overview of management theory, management of human and financial resources, operations, and communication skills using the managerial functions of planning, organizing, leading, and controlling. Includes application of principles of administration, personnel management, design, equipment purchasing, information systems and concepts of quality management.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: BS Radiologic Sciences

Schedule Type (Primary): Asynchronous Instruction

NMMT 3400 - Physics of Nuclear Medicine (4 Credit Hours)

Theory of operation of nuclear medicine detection and imaging instrumentation presented in lectures coordinated with weekly experiments in directed laboratory sessions. Major emphasis on quality control of nuclear medicine detection and imaging instrumentation. Prerequisite(s): NMT program admission, or College Algebra or Pre-Calculus or permission of instructor.

Lecture Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Program Restrictions:** BSRS_NUMT-Nuclear Medicine Technology

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

NMMT 3600 - Introduction to Nuclear Cardiology (3 Credit Hours)

Prerequisite: NMMT 3611 and NMMT 3612. This course is the first of a two-course sequence in nuclear cardiology imaging and provides a comprehensive introduction that will allow the graduate of a certificate or entry level NMT program to perform basic cardiac perfusion, first pass, or multi-gated acquisition procedures in a dedicated cardiac outpatient setting or in a hospital nuclear medicine department. This course is designed to be an introduction to nuclear cardiology for entry level graduates, and is to provide adequate introductory skills in preparation for continued learning within the nuclear cardiology setting. This course covers nuclear medicine imaging only, and does not provide training in advanced cardiac life support (ACLS, or cardiac pharmacology) beyond reference to those pharmacological interventional drugs specific to stress testing.

Lecture Hours: 2 **Contact Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRS_NUMT-Nuclear Medicine Technology

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Asynchronous Instruction

NMMT 3605 - Physics of Nuclear Medicine Lab (1 Credit Hour)

Theory of operation of nuclear medicine detection and imaging instrumentation presented in lectures coordinated with experiments in directed laboratory sessions. Major emphasis on quality control of nuclear medicine detection and imaging instrumentation.

Prerequisite(s): NMT program admission, or College Algebra or Pre-Calculus or permission of instructor.

Prerequisite(s): MATH 1111 >= C or MATH 1113 >= C

Lab Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRS_NUMT-Nuclear Medicine Technology

Schedule Type (Primary): Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

NMMT 3611 - Principles and Practice of Nuclear Medicine I (3 Credit Hours)

Prerequisite: Admission to NMT program, or permission of instructor. Radiopharmaceutical preparation and quality control, anatomy and positioning, and the rationale, procedures, and technical aspects of routine imaging procedures are presented. (Part I of a two part course.)

Lecture Hours: 3 **Lab Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRS_NUMT-Nuclear Medicine Technology

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

NMMT 3612 - Principles and Practices of Nuclear Medicine II (3 Credit Hours)

Prerequisite: Pass NMMT 3611 or NMMT 3611. Gwinnett Rationale, procedures and technical aspects, functional imaging, hematology, and radionuclide therapy, renal imaging, infection imaging, and CNS evaluation protocols are presented (Part II of a two course sequence) combines classroom and online delivery.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Undergraduate Semester **Program Restrictions:**

BSRS_NUMT-Nuclear Medicine Technology

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

NMMT 3621 - Principles and Practice of Nuclear Medicine Laboratory I (1 Credit Hour)

Prerequisite: Admission to NMT program, or permission of instructor. Web-based course. Radiopharmaceutical preparation and quality control, anatomy, and positioning, and the rationale, procedures, and technical aspects of routine imaging procedures are presented.

Travel to main campus required. (Part 1 of a two part course.)

Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRS_NUMT-Nuclear Medicine Technology, CERNM_NUMT-Nuclear Medicine Technology

Schedule Type (Primary): Supervised Lab/Clinic

NMMT 3622 - Principles and Practice of Nuclear Medicine Lab II (1 Credit Hour)

Laboratory and research exercises to support techniques of radiopharmaceutical preparation and quality control, anatomy and positioning, and technical aspects of routine imaging procedures are presented in a supervised laboratory or clinical setting. (Part 2 of a two course sequence). Some travel to Augusta is required.

Lab Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Undergraduate Semester **Program Restrictions:**

BSRS_NUMT-Nuclear Medicine Technology

Schedule Type (Primary): Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

NMMT 3623 - Clinical Correlation Seminar (2 Credit Hours)

Study of nuclear medicine through literature review, discussion groups, and student or guest presentations.

Lecture Hours: 2 **Contact Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRS_NUMT-Nuclear Medicine Technology

Schedule Type (Primary): Seminar **Schedule Type (Additional):** Small Group, Asynchronous Instruction

NMMT 3631 - Applied Research I (1 Credit Hour)

Web-based course. Students select a study or research topic according to their special interests. A suitable paper or report is required.

Credit to be awarded is based on the level of difficulty of the project. Prerequisite: none

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Undergraduate Semester **Program Restrictions:**

BSRS_NUMT-Nuclear Medicine Technology, CERNM_NUMT-Nuclear Medicine Technology

Schedule Type (Primary): Seminar **Schedule Type (Additional):** Small Group, Asynchronous Instruction

NMMT 3641 - Clinical Internship (3 Credit Hours)

Prerequisite: Admission to program, or permission of instructor. Introduction to fundamentals of department operations, equipment and materials, patient care and management. Student observes clinical application of fundamentals and learns how they are applied by nuclear medicine technologist to patient imaging procedures. Student assists and performs routine procedures under direct supervision of clinical instructor.

Contact Hours: 24

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRS_NUMT-Nuclear Medicine Technology

Schedule Type (Primary): Unsupervised Lab/Clinic **Schedule Type (Additional):** Internship/Practicum

NMMT 3642 - Clinical Internship (3 Credit Hours)

Student observes, assists, and performs routine and cardiac procedures as well as functional studies under supervision of clinical instructor.

Contact Hours: 24

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Undergraduate Semester **Program Restrictions:** BSRS_NUMT-Nuclear Medicine Technology

Schedule Type (Primary): Asynchronous Instruction **Schedule Type (Additional):** Internship/Practicum

NMMT 3643 - Clinical Internship (5 Credit Hours)

Student practices performance of all aspects of nuclear medicine technology under guidance and/or supervision of clinical instructor, including routine imaging, cardiac procedures, SPECT, functional imaging, quality control, record keeping, and patient management.

Contact Hours: 24

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRS_NUMT-Nuclear Medicine Technology

Schedule Type (Primary): Internship/Practicum

NMMT 4120 - Principles and Instrumentation of CT (3 Credit Hours)

Principles of production of x-ray including x-ray tubes and generators. Concepts of CT physics and instrumentation. CT scanner equipment fundamentals from first generation to multi-slice spiral and cine CT. Prerequisite(s): Enrollment in Allied Health Program or permission of instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Degree Restrictions:** BS Radiologic Sciences

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

NMMT 4140 - Advanced Patient Care (1 Credit Hour)

This course is an introduction to ACLS and provides a basis for responding to a critical care event. The primary emphasis prepares students to take and pass the ACLS training course. The topics covered include patient assessment, treatment protocols, ECG monitoring and interpretation, implementing critical care algorithms, pharmacological agents and airway management. ACLS certification is required at the conclusion of the course. Prerequisite(s): BCLS Certification or instructor permission.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: BS Radiologic Sciences

Schedule Type (Primary): Asynchronous Instruction

NMMT 4160 - Pathology for Radiologic Sciences (2 Credit Hours)

The course is designed as an overview of pathological disease processes with a focus on specific diseases radiologic student are likely to encounter in the practice of their profession. Emphasis is on relatively common pathologies, their epidemiology, symptomology, diagnosis, and treatment. Each pathological entity is examined in the context of its impact upon the patient, typical course, and distinguishing diagnostic characteristics.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Degree Restrictions:** BS Radiologic Sciences

Schedule Type (Primary): Asynchronous Instruction

NMMT 4300 - Professional Issues and Ethics (1 Credit Hour)

Introduction to current critical issues impacting allied health science; the role of the allied health professional within the healthcare system and its relationship to other healthcare disciplines.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Degree Restrictions:** BS Radiologic Sciences

Schedule Type (Primary): Asynchronous Instruction

NMMT 4400 - Sectional Anatomy (2 Credit Hours)

The course is designed to provide students in radiologic and imaging sciences a supplement to the student's knowledge of anatomy through presentation of longitudinal, sagittal, coronal, and oblique sections of the human body. Correlation with computed tomography, magnetic resonance, sonographic, and SPECT images is made. Students should be able to use the material presented as a foundation for further study in any of the modalities.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Degree Restrictions:** BS Radiologic Sciences

Schedule Type (Primary): Asynchronous Instruction

NMMT 4500 - Radiopharmacy for Nuclear Medicine Technology (3 Credit Hours)

The radiopharmacy course is designed to give the student a broad overview of the development and design of radiopharmaceuticals with more specific emphasis placed on physiological utilization, clinical variations, and parameters of quality control. A review of the chemical basis of radioassays is presented and certain aspects of the radioassay procedure are studied in depth with emphasis on development of procedures in clinical nuclear medicine.

Prerequisite(s): NMMT 3210 >= C and NMMT 3400 >= C and NMMT 3611 >= C and NMMT 3612 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

NMMT 4600 - Advance Practice in Nuclear Medicine I (2 Credit Hours)

Prerequisite: Completion of junior year in nuclear medicine technology program or nuclear medicine technology certificate, or permission of instructor. The course will expand on the clinical application of basic components of nuclear cardiology imaging covered in the first year of nuclear medicine technologist training

Lecture Hours: 2 **Contact Hours:** 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRS_NUMT-Nuclear Medicine Technology

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

NMMT 4602 - Applied Research (2 Credit Hours)

Prerequisite: Enrollment as senior year student in NMT program or NMT certification. Web-based course. Students select a study or research topic according to their special interests. A suitable paper or report is required. Credit to be awarded is based on the level of difficulty of the project.

Contact Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRS_NUMT-Nuclear Medicine Technology

Schedule Type (Primary): Asynchronous Instruction

NMMT 4610 - Advanced Practice in Nuclear Medicine Laboratory I (1 Credit Hour)

Prerequisite: Senior year NMT status or NMT certification.

Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRS_NUMT-Nuclear Medicine Technology

Schedule Type (Primary): Supervised Lab/Clinic **Schedule Type (Additional):** Unsupervised Lab/Clinic, Asynchronous Instruction

NMMT 4620 - Research Design and Statistical Methods (2 Credit Hours)

Introduction to fundamentals of designing research and statistical methods appropriate for allied health and radiological sciences. Teaches working knowledge of basic descriptive and inferential statistics in order to analyze relationships and differences among groups, and differentiation between experimental and quasi-experimental research designs. Students design a project and develop it into research proposal. Prerequisite(s): Elementary Statistics or permission of the instructor.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: BS Radiologic Sciences

Schedule Type (Primary): Asynchronous Instruction

NMMT 4623 - Clinical Correlation in Nuclear Medicine (3 Credit Hours)

Study of nuclear medicine through lecture, literature review, discussion groups, and student or guest presentations. This course is the cumulative discipline review course prior to students sitting for national certification and registry examinations. Students must pass the exit examination in order to qualify to attempt the national certification or registry examinations.

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Degree Restrictions:** BS Radiologic Sciences

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

NMMT 4631 - Applied Research III (1 to 4 Credit Hours)

Students select a clinical research topic according to their special interests. A suitable paper or report is required. Credit to be awarded is based on the level of difficulty of the project. Prerequisites: Senior year NMT status or NMT certification, or permission of instructor.

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Undergraduate Semester **Program Restrictions:** BSRS_NUMT-Nuclear Medicine Technology

Schedule Type (Primary): Seminar - Small Group **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

NMMT 4641 - Clinical Practicum (2 Credit Hours)

Prerequisite: Senior level status in Nuclear Medicine Technology, or permission of instructor. Student performs routine and advanced function procedures accepting responsibility for quality and appropriateness of study. Special clinical assignments may be made at the discretion of the clinical supervisor or clinical coordinator. Practicum may include nuclear cardiology, CT, PET/CT as well as routine nuclear procedures.

Contact Hours: 16

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRS_NUMT-Nuclear Medicine Technology

Schedule Type (Primary): Unsupervised Lab/Clinic **Schedule Type (Additional):** Internship/Practicum

NMMT 4642 - Clinical Practicum (2 Credit Hours)

Student performs routine and advanced function procedures and accepts responsibility for quality and appropriateness of study. Special clinical assignments may be made at the discretion of the clinical supervisor or clinical coordinator. Practicum may include nuclear cardiology, CT, PET/CT, as well as routine nuclear procedures

Contact Hours: 16

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Undergraduate Semester **Program Restrictions:** BSRS_NUMT-Nuclear Medicine Technology

Schedule Type (Primary): Asynchronous Instruction **Schedule Type (Additional):** Internship/Practicum

NMMT 4650 - Advanced Practice in Nuclear Medicine II (3 Credit Hours)

Advanced techniques and knowledge of new imaging and therapy technology, and technical aspects of advanced imaging.

Prerequisites: NMT program admission or permission of instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Undergraduate Semester **Program Restrictions:** BSRS_NUMT-Nuclear Medicine Technology

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

NMMT 4651 - Advanced Practice of Nuclear Medicine Lab II (1 to 4 Credit Hours)

Laboratory and research exercises to support advanced techniques and knowledge of new imaging and therapy technology, and technical aspects of advanced imaging and therapy presented as student centered learning activities. Prerequisite: NMT program admission or permission of instructor.

Contact Hours: 1 to 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Undergraduate Semester **Program Restrictions:** BSRS_NUMT-Nuclear Medicine Technology

Schedule Type (Primary): Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

NURS 3000 - Introduction to Pathophysiology (3 Credit Hours)

This course builds on concepts and principles from the basic sciences and presents an orientation to disease as disordered physiology. It is intended to help students understand how and why the symptoms and signs of various conditions appear and will provide basic information on the causes of disease, the body's response to disease, the treatments for specific diseases and the body's response to those treatments.

Lecture Hours: 2 **Lab Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: SNUP-Summer Nursing Program

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

NURS 3006 - Undergraduate Nursing Orientation (0 Credit Hours)

This non-credit orientation course gives undergraduate students access to startup- materials for the College of Nursing and their clinical sites. The program will use this course to on-board new students, and to distribute and collect important materials.

Repeatability: May be repeated for credit up to five times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Degree Restrictions: Bachelor of Science in Nursing

Schedule Type (Primary): Asynchronous Instruction

NURS 3197 - Professional Nursing Practice (3 Credit Hours)

This course is designed to enhance and facilitate the development of the RN student to the role of a BSN prepared professional nurse. The focus is on developing personal and professional growth to promote better advocacy, critical thinking, educator skills, effective communication, and leadership abilities in a complex healthcare environment. Course content includes concepts from historical contributions and theories that have guided the profession, to promoting professional philosophies, visions, and practices to help prepare for future trends in healthcare. Topics relate to culture and diversity, professional ethics, political and legal issues in nursing, and technology. Students will apply knowledge of standards of practice, evidence-based practice, and caring science to course topics.

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3

Repeatability: Not Repeatable

Grade Mode: Normal (A, B, C, D, F)

College Restrictions: COLLEGE OF NURSING **Program Restrictions:** Bachelor of Science in Nursing - RN to BSN

Schedule Type (Primary): Asynchronous Instruction

NURS 3297 - Nursing Research Application (3 Credit Hours)

This course is designed to provide the registered nurse with an overview of the major research concepts as applied to the profession of nursing, to scholarship, and to clinical practice. Analysis, critique, and interpretation of qualitative and quantitative research approaches, including ethical implications, for evidence-based nursing practice will be examined. Emphasis is placed on how to critique, analyze, and apply published and empirical research findings to evidence-based nursing practice.

Pre- or Corequisite(s): NURS 3197 >= C

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3

Grade Mode: Normal (A, B, C, D, F)

College Restrictions: COLLEGE OF NURSING **Program Restrictions:** Bachelor of Science in Nursing - RN to BSN

Schedule Type (Primary): Asynchronous Instruction

NURS 3397 - Health Assessment (3 Credit Hours)

This course is a study of the advanced knowledge and skills beyond the associate's degree in nursing, designed to enhance health assessment for nursing practice in the care of individuals across the lifespan. Theory and skills essential to completing a comprehensive and holistic health history and physical examination are emphasized. The holistic delivery of care will include cultural, spiritual, nutritional, alternative, complementary therapies, and health promotion for the delivery of safe and person-centered care. The importance of comprehensive and accurate documentation as a tool for effective communication amongst the interdisciplinary team is reviewed.

Pre- or Corequisite(s): NURS 3197 >= C

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3

Repeatability: Not Repeatable

Grade Mode: Normal (A, B, C, D, F)

College Restrictions: COLLEGE OF NURSING **Program Restrictions:** Bachelor of Science in Nursing - RN to BSN

Schedule Type (Primary): Asynchronous Instruction

NURS 3500 - Independent Study (1 to 8 Credit Hours)

Independent Study

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: College of Nursing

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Independent Study

NURS 3800 - Essentials of Pathophysiology (3 Credit Hours)

This course focuses on the pathophysiological concepts necessary for nursing practice. Specific disease concepts across the lifespan are explored, integrated, and applied.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSN_NURS-Nursing

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

NURS 3801 - Health Assessment Across the Lifespan (3 Credit Hours)

This course provides the knowledge and skills to perform systematic health assessments of individuals across the lifespan. The physical, mental, psychosocial, functional, developmental, and environmental aspects of health are included. Guided laboratory exercises develop skills necessary to perform the comprehensive health assessments. Effective communication and documentation are emphasized and practiced in the laboratory setting.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSN_NURS-Nursing

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

NURS 3802 - Introduction to Nursing Practice (7 Credit Hours)

This course provides an introduction to the nursing process and professional nursing practice through exploration of the human experiences of health, wellness, illness, and death. Examination of professional roles, models, values, and practice standards offer insight into the complexity of providing comprehensive care to clients across the lifespan. Common health alterations are examined through the integration of evidence-based research, pathophysiologic concepts, health assessment, clinical skills, and laboratory and diagnostic findings.

Lecture Hours: 3 **Lab Hours:** 4 **Contact Hours:** 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSN_NURS-Nursing

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

NURS 3803 - Health Promotion and Nutrition (2 Credit Hours)

Nursing's role in guiding individuals and families in ways to positively influence their health is emphasized through the exploration of the theoretical basis for and basic principles of health promotion and wellness, health maintenance, and disease prevention across the lifespan. The role that nutrition plays in the prevention and control of selected health alterations will be discussed.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSN_NURS-Nursing

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

NURS 3804 - Essentials of Pharmacology (3 Credit Hours)

The course focuses on pharmacologic concepts necessary for safe nursing practice. Using drug families and prototypes, special emphasis is placed on the clinical application of pharmacologic therapy within the context of the nursing process.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSN_NURS-Nursing

Schedule Type (Primary): Lecture

NURS 3805 - Adult Health Nursing I (6 Credit Hours)

This course builds on previously-introduced concepts and focuses on the nursing care of adults with chronic health alterations. Emphasis is on the use of critical thinking skills to develop evidence-based care that promotes, maintains, and restores health for adults and their families. Diverse clinical and simulated experience reinforce these concepts.

Lecture Hours: 4 **Contact Hours:** 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSN_NURS-Nursing

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

NURS 3806 - Geriatric Nursing (3 Credit Hours)

This course highlights the effects of aging, the promotion of optimal health and wellness, pharmacotherapy for older adults, and the examination of common health alterations and chronic illness in the older adult. Diverse clinical and simulated experiences and projects reinforce these concepts while fostering critical thinking.

Lecture Hours: 2 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSN_NURS-Nursing

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

NURS 3807 - Introduction to Nursing Research (3 Credit Hours)

This course introduces the role of research as a foundation for nursing practice. Basic elements of the research process, and evidence-based practice, and the identification of potential nursing research are emphasized.

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Program Restrictions: BSN_NURS-Nursing

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

NURS 3808 - Immersion in Primary Care Nursing (4 Credit Hours)

This course examines the expanding transition of health care from acute care to community and primary care settings. The needs and roles of RNs in: care coordination for complex chronic conditions; transitional care between care settings; population health management; use of virtual visits; clinical flow of patients; and interprofessional community-based care teams are essential components of nursing care delivery in today's healthcare environment. Diverse clinical and simulated experiences, assignments, and projects will reinforce primary care nursing concepts and competencies while fostering critical thinking strategies.

Prerequisite(s): NURS 3800 >= C and NURS 3801 >= C and NURS 3802 >= C and NURS 3803 >= C

Lecture Hours: 2 **Contact Hours:** 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Nursing **Major Restrictions:** Nursing **Course Level Restrictions:** Undergraduate Semester **Degree**

Restrictions: Bachelor of Science in Nursing **Program Restrictions:** BSN_NURS-Nursing **Campus Restrictions:** Athens Campus, Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

NURS 4497 - Community Health Nursing (3 Credit Hours)

This course is designed to examine the concepts and principles of community and population health nursing. The course will provide an overview of health issues that transcend borders, class, race, ethnicity, and culture. Emphasis is placed on roles, levels of prevention, principles of epidemiology, public health policy, and disaster preparedness.

Corequisite(s): NURS 4498 >= C

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3

Repeatability: Not Repeatable

Grade Mode: Normal (A, B, C, D, F)

College Restrictions: COLLEGE OF NURSING **Program Restrictions:** Bachelor of Science in Nursing - RN to BSN

Schedule Type (Primary): Asynchronous Instruction

NURS 4498 - Community Health Nursing - Clinical (1 Credit Hour)

This course applies concepts, theories, and skills related to community health nursing by way of clinical/service-learning activities to comprise of 45 clinical hours.

Corequisite(s): NURS 4497 >= C

Other Hours: 1 **Contact Hours:** 1

Grade Mode: Normal (A, B, C, D, F)

College Restrictions: COLLEGE OF NURSING **Program Restrictions:** Bachelor of Science in Nursing - RN to BSN
Schedule Type (Primary): Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

NURS 4500 - Independent Study (1 to 3 Credit Hours)

This course enables the student to pursue a specified area of study which supports the student's program of study. Teaching strategies include didactic modalities; no clinical

Contact Hours: 1 to 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Nursing **Course Level Restrictions:** Undergraduate Semester

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

NURS 4501 - Independent Study (1 to 3 Credit Hours)

Independent study to complete senior course requirements.

Contact Hours: 1 to 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: College of Nursing **Course Level Restrictions:** Undergraduate Semester

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Seminar-Small Group, Independent Study, Asynchronous Instruction

NURS 4502 - Teaching Assistantship (1 to 6 Credit Hours)

This course enables students to participate in a classroom and learning resources center teaching apprenticeship. Students will function as part of the teaching team for NURS 3105.

Prerequisite(s): (NURS 3105 and NURS 3106 and NURS 3107 and NURS 3108 and NURS 3109 and NURS 3110 and NURS 3205) or NURS 3210 or NURS 3215 or NURS 4305 or NURS 4310 or NURS 4415

Lecture Hours: 1 to 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Nursing

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

NURS 4503 - Independent Study (1 to 3 Credit Hours)

This course enables the student to pursue a specified area of study which supports the student's program of study. Teaching strategies include didactic modalities; no clinical.

Contact Hours: 1 to 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Nursing **Course Level Restrictions:** Undergraduate Semester

Schedule Type (Primary): Lecture/Unsupervised Lab/Clinic

NURS 4597 - Leadership and Management (3 Credit Hours)

This course introduces the leadership roles and management functions of professional registered nurses within the structure of an organization. The management process provides the foundational structure for the course, while the theoretical framework for this course is established through exploration of leadership styles, organizational theory, and management theory. Quality assurance and the provision of evidence-based, patient-centered care and collaborative relationships are emphasized. The impact of political and legislative processes, the integration of informatics, and the legal and ethical issues in management are also discussed.

Pre- or Corequisite(s): NURS 3197 >= C

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3

Grade Mode: Normal (A, B, C, D, F)

College Restrictions: COLLEGE OF NURSING **Program Restrictions:** Bachelor of Science in Nursing - RN to BSN

Schedule Type (Primary): Asynchronous Instruction

NURS 4598 - Leadership & Management Clinical (2 Credit Hours)

This course applies concepts, theories, and skills related to leadership and management.

Corequisite(s): NURS 4597 >= C

Other Hours: 2 **Contact Hours:** 2

Grade Mode: Normal (A,B,C,D,F)

College Restrictions: College of Nursing **Program Restrictions:** Bachelor of Science in Nursing - RN to BSN **Campus Restrictions:**

AU Online

Schedule Type (Primary): 30-Supervised Lab/Clinic **Schedule Type (Additional):** 57-Asynchronous Instruction

NURS 4800 - Mental Health Nursing (3 Credit Hours)

This course focuses on the nursing care of individuals with acute and chronic mental health alterations. Therapeutic communication is used to attain a comprehensive mental status assessment and implement nursing interventions. Critical thinking skills and knowledge of growth and development are used to develop evidence-based care that promotes, maintains, and restores mental health for individuals and their families across the lifespan. Diverse clinical settings and simulated experiences reinforce these concepts.

Lecture Hours: 2 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSN_NURS-Nursing

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

NURS 4801 - Adult Health Nursing II (6 Credit Hours)

This course builds on previously introduced concepts and focuses on the nursing care of adults. Emphasis is placed on acute and chronic health alterations including care of patients with multi-system concerns. Critical thinking skills are used to develop evidence-based care that promotes, maintains, and restores health for adults and their families. Diverse clinical and simulated experiences reinforce these concepts.

Lecture Hours: 4 **Contact Hours:** 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSN_NURS-Nursing

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

NURS 4802 - Maternal Child Nursing (6 Credit Hours)

This course focuses on the nursing care of childbearing women, children, and families. Emphasis is placed on the use of critical thinking skills to develop evidence-based care that promotes, maintains, and restores health for women, children, and their families. Diverse clinical and simulated experiences reinforce these concepts.

Lecture Hours: 4 **Contact Hours:** 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSN_NURS-Nursing

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

NURS 4803 - Leadership, Management, and Contemporary Nursing Topics (3 Credit Hours)

This course focuses on leadership skills, management styles, and roles of the professional nurse. Critical analyses of global sociopolitical, economic, cultural, ethical-legal, and professional issues affecting nursing and healthcare are conducted.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSN_NURS-Nursing

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

NURS 4804 - Synthesis of Advanced Nursing Concepts (3 Credit Hours)

This course synthesizes the skills and knowledge learned from the humanities, sciences, and nursing practice. The focus is on student-led case scenarios that incorporate complex mental, physical, and sociological health alterations across the lifespan.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSN_NURS-Nursing

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

NURS 4805 - Community and Public Health Nursing (4 Credit Hours)

This course focuses on the theories and principles of community and public health nursing. Emphasis is placed on community assessment, vulnerable populations, and partnering with communities to improve health. Trends in public health and global health issues are explored. Diverse clinical experiences reinforce these concepts.

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSN_NURS-Nursing

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

NURS 4806 - Transition to Professional Nursing Practice (5 Credit Hours)

This course focuses on the clinical synthesis of the knowledge and skills gained from the humanities, sciences, and previous nursing courses for entry-level professional practice. Diverse clinical and simulated experiences reinforce these concepts.

Lecture Hours: 1 **Contact Hours:** 12

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: BSN_NURS-Nursing

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

NURS 4809 - Application and Integration of Pathophysiologic and Pharmacologic Concepts I (4 Credit Hours)

This two course series focuses on an integrated systems approach to physiological and pharmacologic concepts necessary for safe nursing practice. Special emphasis is placed on the clinical application of physiologic and pharmacologic principles within the context of the nursing process.

Lecture Hours: 4

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Nursing

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Asynchronous Instruction

NURS 4810 - Concepts of Healthcare Systems, Policy and Trends (4 Credit Hours)

This course focuses on complex concepts affecting healthcare systems including health policy, informatics, quality improvement, and their influence on current trends. Global health concepts and perspectives related to cultural diversity, patient and family centered care, complementary and alternative practices, and disparities in health care will be examined as they relate to professional nursing practice and healthcare outcomes.

Contact Hours: 4

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Nursing

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

NURS 4811 - Application and Integration of Pathophysiologic and Pharmacologic Concepts II (4 Credit Hours)

This two course series provides a focus on an integrated systems approach to physiological and pharmacologic concepts necessary for safe nursing practice. Special emphasis is placed on the clinical application of physiologic and pharmacologic principles within the context of the nursing process.

Contact Hours: 4

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Nursing

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Asynchronous Instruction

NURS 4813 - Health Promotion Across the Lifespan (3 Credit Hours)

This course emphasizes the nurse's role in promoting healthy lifestyles across the lifespan to improve the health of individuals, families, and communities. Students explore how variables in lifestyles impact quality of life, prevent disease, restore health, and manage chronic illness.

Pre- or Corequisite(s): NURS 3197 >= C

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3

Repeatability: Not Repeatable

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: COLLEGE OF NURSING **Major Restrictions:** NURL- Nursing (RN-BSN)

Schedule Type (Primary): Asynchronous Instruction

NURS 4815 - Healthcare Information Technology in Nursing (2 Credit Hours)

This course emphasizes the use of technology to effectively communicate and utilize information that drives decision-making when providing nursing care. The focus is on use of technology in complex and highly efficient healthcare settings to improve healthcare outcomes.

Pre- or Corequisite(s): NURS 3197 >= C

Lecture Hours: 2 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 2

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: COLLEGE OF NURSING **Major Restrictions:** NURL- Nursing (RN-BSN)

Schedule Type (Primary): Asynchronous Instruction **Schedule Type (Additional):** Lecture

NURS 4816 - Quality and Safety in Professional Nursing (2 Credit Hours)

This course emphasizes the professional nurse's role in application of evidence-based quality improvement and risk reduction strategies that promote safe environments and improve patient outcomes while equitably managing resources. Use of highly effective interprofessional teams to address local, national, and global health issues is explored.

Pre- or Corequisite(s): NURS 3197 >= C

Lecture Hours: 2 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 2

Grade Mode: Normal (A, B, C, D, F)

College Restrictions: COLLEGE OF NURSING **Major Restrictions:** NURL- Nursing (RN-BSN)

Schedule Type (Primary): Asynchronous Instruction **Schedule Type (Additional):** Lecture

NURS 4818 - Policy, Ethics, and Advocacy in Professional Nursing (3 Credit Hours)

This course explores the professional identity of nursing related to ethical practice, accountability to the profession and society, and advocacy. Nursing jurisprudence, patient safety, standards and scope of nursing practice, nursing peer review, whistleblower protections, and reflective practice are emphasized.

Pre- or Corequisite(s): NURS 3197 >= C

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3

Grade Mode: Normal (A, B, C, D, F)

College Restrictions: COLLEGE OF NURSING **Major Restrictions:** NURL- Nursing (RN-BSN)

Schedule Type (Primary): Asynchronous Instruction **Schedule Type (Additional):** Lecture

NURS 4819 - Collaborative Nursing Care (2 Credit Hours)

Emphasis is on developing and maintaining interprofessional collaborative partnerships within healthcare systems that utilize effective team approaches to provide person-centered care. Students focus on effective use of communication, team dynamics, self-awareness, and principles of delegation that optimize care delivery.

Pre- or Corequisite(s): NURS 3197 >= C

Lecture Hours: 2 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 2

Grade Mode: Normal (A, B, C, D, F)

College Restrictions: COLLEGE OF NURSING **Major Restrictions:** NURL- Nursing (RN-BSN)

Schedule Type (Primary): Asynchronous Instruction **Schedule Type (Additional):** Lecture

NURS 5006 - Graduate Nursing Orientation CNL (0 Credit Hours)

This non-credit orientation course gives clinical nurse leader students access to startup- materials for the College of Nursing and their clinical sites. The program will use this course to on-board new students, and to distribute and collect important materials.

Repeatability: May be repeated for credit up to five times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MSN_CNL-Clinical Nurse Leader

Schedule Type (Primary): Asynchronous Instruction

NURS 6100 - Pathophysiology (3 Credit Hours)

This course examines the pathophysiological basis of illness focusing on compromises in the body's ability to meet its physiological needs. The course begins with an introduction to basic pathophysiological concepts that are related to commonly occurring disease processes throughout the body. The student will then apply these concepts when analyzing compromises of the various body systems. Application of concepts across the lifespan will be incorporated through the discussion of pathophysiology. The course provides the foundation for the clinical decision-making and management of individual health problems and family health problems.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Program Restrictions:** MSN_CNL-Clinical Nurse Leader

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

NURS 6200 - Advanced Pharmacology and Nutrition (4 Credit Hours)

The course introduces the basic principles of clinical pharmacology and nutrition as therapeutic interventions in the healthcare arena. Application of concepts across the lifespan will be incorporated throughout the course. The student will apply these concepts to the pharmacological and nutritional management of compromises of the various body systems. This strong conceptual base will prepare students to administer and monitor the use of commonly used medications and alternative medicinal supplements (herbal and nutrition) safely and effectively.

Prerequisite(s): NURS 6100 >= C

Lecture Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Program Restrictions:** MSN_CNL-Clinical Nurse Leader

Schedule Type (Primary): Lecture

NURS 6300 - Introduction to Epidemiology and Biostatistics (3 Credit Hours)

This course will focus on applying epidemiologic principles to health promotion and illness prevention along the continuum of care in multiple settings.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** MSN_CNL-Clinical Nurse Leader

Schedule Type (Primary): Lecture

NURS 6400 - Evidence-Based Practice in Nursing and Healthcare (3 Credit Hours)

Focuses on the implementation of evidence-based practice to address trends in safety and quality to achieve optimal outcomes. This course also examines the relationship between research and its relevance to nursing practice. Emphasis is placed on the retrieval, appraisal, and synthesis of evidence in collaboration with healthcare team members, including patients, to improve care outcomes. Use of performance measures to assess and improve the delivery of evidence-based practices and to promote outcomes that demonstrate delivery of quality care at the microsystem level are also highlighted. The relationship to outcomes are evaluated using information systems, management principles, concepts of evidence-based practices and scientific writing publications.

Prerequisite(s): NURS 6100 and NURS 6700 and STAT 6300

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Nursing **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic

NURS 6510 - Advanced Physiological Concepts (2 Credit Hours)

This course will cover physiologic principles and processes that play a central role in health, illness, and pharmacology while exploring the latest research developments in these areas. It is designed to provide the student with in-depth understanding of normal function and alterations that contribute to acute and chronic illness. The role of genetics and the environment on health and illness will also be explored. Concepts will be applied to pharmacological principles including pharmacodynamics, pharmacokinetics, and pharmacogenomics.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Nursing Practice **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Asynchronous Instruction

NURS 6600 - Healthcare Delivery Models and Economic Policy (2 to 3 Credit Hours)

This course introduces the aspects of health care delivery systems, economics, ethics, and policy, which serve as a foundation for understanding and applying the dynamics of these principles in clinical practice.

Lecture Hours: 2 to 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Program Restrictions:** MSN_CNL-Clinical Nurse Leader

Schedule Type (Primary): Lecture

NURS 6620 - Transitions into Professional Nursing I (3 Credit Hours)

This course focuses on the transition to professional practice. Basic issues impacting nursing and health are analyzed. Individual philosophy, goals, and career strategies will be explored.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Major Restrictions:** Clinical Nurse Leader Complete **Course Level Restrictions:** Graduate Semester **Program Restrictions:** MSN_CNL-Clinical Nurse Leader **Campus Restrictions:** Web

Schedule Type (Primary): Asynchronous Instruction

NURS 6630 - Transitions into Professional Nursing II (3 Credit Hours)

This course focuses on the application of principles of professional nursing practice. Concepts related to ethics, evidence-based practice, leadership, management, resource utilization, and quality services are critically examined.

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Major Restrictions:** Clinical Nurse Leader Complete **Course Level Restrictions:**

Graduate Semester **Program Restrictions:** MSN_CNL-Clinical Nurse Leader **Campus Restrictions:** Web
Schedule Type (Primary): Asynchronous Instruction

NURS 6655 - Essentials of the Clinical Nurse Leader Role (3 Credit Hours)

This course focuses on essentials and fundamental aspects of the role of the clinical nurse leader (CNL). The course will guide the student to consider clinical and cost outcomes management of individuals and/or client groups experiencing chronic or acute illness. Strategies that are amenable to nursing and promote quality, safety, and efficiencies within a client-centered care delivery model are discussed. Concepts presented will include evidence based interventions, health promotion and prevention, disease prevention, injury reduction strategies, lateral integration of care, and the use of benchmarking for outcomes comparison. The CNL role of clinician, outcomes manager, systems analyst/risk anticipator, and team manager are a focus for this course.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Master of Science in Nursing

Schedule Type (Primary): Asynchronous Instruction

NURS 6675 - Immersion into the Clinical Nurse Leader Role (8 Credit Hours)

This course focuses on the assimilation and synthesis of principles of the clinical nurse leader role into the student's professional nursing practice across the continuum of care. Students will be provided with concentrated clinical experience and will be immersed in the clinical microsystem setting. During the clinical experience, students will collaborate with nurse preceptors and will focus on: clinical and team leadership (design, coordination, and evaluation of care) including lateral integration with interprofessional healthcare teams, information and outcomes management, quality improvement, risk anticipation, evidenced-based clinical decision-making and scholarship, fiscal stewardship (leveraging human, environmental, and material resources), and patient advocacy.

Lecture Hours: 2 **Lab Hours:** 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Master of Science in Nursing

Schedule Type (Primary): Asynchronous Instruction

NURS 6700 - Nursing Therapeutics and Professional Nursing (6 Credit Hours)

This course provides a foundation upon which students can build their professional nursing knowledge and practice. The course will emphasize fundamental nursing skills, age appropriate health assessment techniques, the nursing process, and the introduction to clinical reasoning skills. The course also explores the development of nursing practice and will emphasize the role and responsibilities of the clinical nurse leader in the healthcare delivery system.

Lecture Hours: 3 **Lab Hours:** 2 **Contact Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Program Restrictions:** MSN_CNL-Clinical Nurse Leader

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

NURS 6735 - Health Assessment and Diagnostics for Nursing Anesthesia (2 Credit Hours)

Course Prerequisites: Admission to the nursing anesthesia program or permission of instructor. This didactic course focuses on health assessment and use of the diagnostic history and physical examination to formulate a differential diagnosis in both the pediatric and adult surgical patient. Concentration is on selected theories, principles and techniques from the physical and behavior sciences essential to developing the patient data base and to applying the diagnostic process. Emphasis is placed on obtaining a comprehensive health history and performing a focuses physical examination on patients across the lifespan requiring anesthetic management. Exposure to topics of cultural differences that may impact the delivery of anesthesia care is also provided.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** MSN_NURA-Nursing Anesthesia

Schedule Type (Primary): Lecture

NURS 6741 - Anatomy and Physiology for Nurse Anesthetists (5 Credit Hours)

Prerequisite: Admission to the nursing anesthesia program or permission of the instructor. Effect of anesthesia on normal adult physiology is explored in-depth. Emphasis is placed upon those systems particularly affected by the administration of anesthesia including the central, peripheral and autonomic nervous systems, cardiovascular, respiratory and renal systems. This course is designed to build on a student's existing knowledge of anatomy and physiology.

Lecture Hours: 5

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** MSN_NURA-Nursing Anesthesia

Schedule Type (Primary): Lecture

NURS 6745 - Basic Principles of Nursing Anesthesia (4 Credit Hours)

This introductory course in nursing anesthesia is designed to present the graduate student an overview of basic principles and fundamental concepts related to nursing anesthesia practice that are essential for formulation of safe, individualized anesthesia management plans. Emphasis is placed on preoperative preparation and anesthetic planning for the surgical patient. The human patient simulator for pre-clinical management education will also be utilized to introduce the student to the induction process of anesthesia and providing hands-on interaction.

Corequisite(s): NURS6735, NURS6741, NURS6760

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** MSN_NURA-Nursing Anesthesia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

NURS 6751 - Pathophysiology for Nurse Anesthetist (3 Credit Hours)

Prerequisites: Admission to the nursing anesthesia program or permission of the instructor. This course provides students in the nursing anesthesia program with an overview of central concepts of pathophysiology including an understanding of the intraoperative management of common health problems, disease processes, and syndromes. The primary focus is to provide a foundation for differential diagnosis, intraoperative clinical decision-making and management.

Prerequisite(s): NURS 6741

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** MSN_NURA-Nursing Anesthesia

Schedule Type (Primary): Lecture

NURS 6755 - Advanced Principles of Nursing Anesthesia I (4 Credit Hours)

This course is designed to provide the graduate student with advanced anesthesia principles and techniques essential to planning and safely administering anesthesia to patients with specific systemic diseases in the surgical specialty areas. Emphasis will be placed on anesthetic considerations and management of patients with cardiovascular, pulmonary, endocrine, renal, hepatic, and hematological disorders. Principles and techniques of anesthetic administration for ENT, ophthalmologic, general, gynecological, genitourinary, orthopedic, minimally invasive and other specialty surgical procedures are also addressed. Anesthetic considerations for the geriatric population will also be explored. The students will also have the opportunity to hone clinical and critical thinking skills by managing clinical case scenarios in the simulation laboratory.

Prerequisite(s): NURS 6735 and NURS 6741 and NURS 6745 and NURS 6760

Corequisite(s): NURS 6751 and NURS 6770 and NURS 6815

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** MSN_NURA-

NURS 6760 - Pharmacology for Nurse Anesthetists I (3 Credit Hours)

In-depth exploration of the pharmacologic properties, indications, contraindications, and interactions of drugs used in the practice of anesthesia nursing. Aspects of organic and biochemistry including the chemical structures of compounds and its significance in pharmacology are explored.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** MSN_NURA-Nursing Anesthesia

Schedule Type (Primary): Lecture

NURS 6765 - Advanced Principles of Nursing Anesthesia II (7 Credit Hours)

This advanced principles course provides the graduate student in-depth study of specialized areas of nursing anesthesia practice. Lecture concentrates on advanced principles and concepts for specific anesthesia nursing interventions essential for developing and managing more complex, specialty patients and surgical procedures. Building on knowledge acquired in previous courses, this advanced principles course emphasizes anesthetic planning and management for cardiac, vascular, neurosurgical, thoracic, and organ transplant procedures. Emphasis on anesthetic considerations and management of the obstetric and pediatric patient, as well as the special needs of the trauma and burn patient are also included, as well as acute and chronic pain treatment modalities. Acute crisis management education is explored.

Prerequisite(s): NURS6741 and NURS6760 and NURS6735 and NURS6745 and NURS6751 and NURS6770 and NURS6755 and NURS6815

Corequisite(s): NURS6825

Lecture Hours: 6 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** MSN_NURA-Nursing Anesthesia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

NURS 6770 - Pharmacology for Nurse Anesthetists II (4 Credit Hours)

In-depth exploration of the pharmacologic properties, indications, contraindications, and interactions of drugs used in the practice of anesthesia nursing. Aspects of organic chemistry and biochemistry including the chemical structures of compounds and its significance in pharmacology are also explored.

Prerequisite(s): NURS 6735 and NURS 6741 and NURS 6745 and NURS 6760

Lecture Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** MSN_NURA-Nursing Anesthesia

Schedule Type (Primary): Lecture

NURS 6815 - Technology and Techniques in Nursing Anesthesia I (3 Credit Hours)

This course is designed to familiarize the graduate student with the design and use of equipment commonly utilized in nursing anesthesia practice, including biomedical instrumentation, the anesthesia delivery system, and breathing circuits. Application of the laws of physics as they pertain to nursing anesthesia practice will be reviewed with specific examples. Emphasis is placed on gas laws, vaporization, and pressure-flow. In-depth study of airway assessment and management is also provided.

Prerequisite(s): NURS 6735 and NURS 6741 and NURS 6745 and NURS 6760

Lecture Hours: 2 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** MSN_NURA-Nursing Anesthesia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

NURS 6820 - Professional Aspects of Nursing Anesthesia (2 Credit Hours)

Student's understanding of a complex healthcare system and the role of nurse anesthetists as advanced practice nurses within the system is enhanced. Issues pertaining to the nurse anesthetist as clinician, manager, teacher, researcher, and consultant are explored. Emphasis placed on practice arrangements, departmental management, principles of education and utilization of research.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** MSN_NURA-Nursing Anesthesia, MSN_NURS-Nursing

Schedule Type (Primary): Lecture

NURS 6825 - Technology and Techniques in Nursing Anesthesia II (3 Credit Hours)

This course presents fundamental concepts and techniques essential to clinical anesthesia practice focusing on the theoretical and practical considerations involved in the administration and management regional anesthesia. In-depth study of advanced hemodynamic monitoring, cardiac bypass machine, and fire and electrical safety in the operating room are also provided.

Prerequisite(s): NURS 6751 and NURS 6770 and NURS 6755 and NURS 6815

Lecture Hours: 2 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** MSN_NURA-Nursing Anesthesia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

NURS 6840 - Nurse Anesthesia Clinical Practicum (8 Credit Hours)

Provides clinical experience in the administration of all types of anesthetics to patients across the life span. Preparation of patients and equipment, pre and postoperative patient evaluation, planning and implementing individualized anesthesia care plans; non-invasive and invasive monitoring, pain management and airway management are emphasized.

Prerequisite(s): NURS 6755 and NURS 6825

Contact Hours: 32

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** MSN_NURA-Nursing Anesthesia, MSN_NURS-Nursing

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Supervised Lab/Clinic

NURS 6852 - Nursing Anesthesia Specialty Practicum I (4 Credit Hours)

Supervised experience is provided in the administration of anesthesia to specialized populations and surgical specialties. Emphasis is placed on anesthesia techniques specific to cardiovascular, thoracic, and neuroanesthesia and for obstetric, pediatric, and critically ill populations.

Prerequisite(s): NURS 6840

Contact Hours: 16

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MSN_NURA-Nursing Anesthesia

Schedule Type (Primary): Supervised Lab/Clinic

NURS 6854 - Nursing Anesthesia Specialty Practicum II (8 Credit Hours)

Supervised experience is provided in the administration of anesthesia to specialized populations and surgical specialties. Emphasis is placed on anesthesia techniques specific to cardiovascular, thoracic, and neuroanesthesia and for obstetric, pediatric, and critically ill populations.

Prerequisite(s): NURS 6840 and NURS 6852

Contact Hours: 32

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MSN_NURA-Nursing Anesthesia

Schedule Type (Primary): Supervised Lab/Clinic

NURS 6870 - Rural Anesthesia Perspectives and Clinical Practicum (6 Credit Hours)

Clinical experience is provided in the administration of anesthesia to rural and medically underserved populations. Emphasis is placed on developing the student's anesthesia skills and ability to function with a greater degree of independence. Requirements for comprehensive anesthesia care services in rural and medically underserved communities are explored.

Prerequisite(s): NURS 6840

Contact Hours: 24

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** MSN_NURA-Nursing Anesthesia

Schedule Type (Primary): Supervised Lab/Clinic

NURS 6990 - Scientific and Clinical Inquiry (2 Credit Hours)

This course focuses on clinical reasoning and decision-making skills as they relate to the application and implementation of evidence-based nursing practice. This course will also serve as an introduction to the research process with an emphasis on the relationship of research and its relevance to nursing practice. The relationship to outcomes will be examined through information systems and management, evidence-based practice concepts and principles, and scientific writing and publication. The overall purpose of the course will be to apply and integrate the concepts and principles into strategies for the clinical nurse leader role.

Prerequisite(s): NURS6100 and NURS6300 and NURS6700 and NURS6600 and NURS6200

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice, MSN_CNL-Clinical Nurse Leader

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Asynchronous Instruction

NURS 7000 - Nursing Practice through Clinical Reasoning I (6 Credit Hours)

This course will build on previous course knowledge and will provide a theoretical foundation in health promotion, illness prevention and maintenance of the client's (individual, family, group or community) function in health and illness. During the clinical segment, the student uses critical thinking in providing quality comprehensive client care along the continuum of care in multiple settings.

Prerequisite(s): NURS 6100 and NURS 6700

Lecture Hours: 2 **Lab Hours:** 1 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Program Restrictions:** MSN_CNL-Clinical Nurse Leader

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

NURS 7001 - Nursing Practice through Clinical Reasoning I (6 Credit Hours)

This course will build on previous course knowledge and will provide a theoretical foundation in health promotion, illness prevention and maintenance of the client's (individual, family, group or community) function in health and illness. During the clinical segment, the student uses critical thinking in providing quality comprehensive client care along the continuum of care in multiple settings.

Prerequisite(s): NURS 6100 >= C and NURS 6700 >= C

Lecture Hours: 3 **Lab Hours:** 1 **Other Hours:** 2 **Contact Hours:** 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Nursing **Major Restrictions:** Clinical Nurse Leader **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Master of Science in Nursing **Program**

Restrictions: MSN_CNL-Clinical Nurse Leader **Campus Restrictions:** Athens Campus, Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

NURS 7006 - Nursing Orientation DNP and NAP (0 Credit Hours)

This non-credit orientation course gives Doctor of Nursing Practice students (including NAP) access to start-up materials for the College of Nursing and their clinical sites. The programs will use this course to on-board new students, and to distribute and collect important materials.

Repeatability: May be repeated for credit up to nine times.

Grade Mode: Normal, Audit

Degree Restrictions: Doctor of Nursing Practice **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Asynchronous Instruction

NURS 7030 - Healthcare Delivery Systems and Models (2 Credit Hours)

Course provides the basis for understanding the evolving healthcare system and nursing's role within the system. Sociopolitical, economic, technological, and legal/ethical concerns impacting the delivery of healthcare in United States are emphasized.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** CERM_FNUP-Cert in Family Nurse Pract, CERM_PNUP-Cert in Pediatric Nurse Pract, MSN_FNUP-Family Nurse Practitioner, MSN_NURA-Nursing Anesthesia, MSN_NURS-Nursing, MSN_PNUP-Pediatric Nurse Practitioner

Schedule Type (Primary): Lecture

NURS 7100 - Integrated Healthcare: Population Health (3 Credit Hours)

Builds on previous course knowledge and provides a theoretical foundation in community assessment, disease prevention, and health behavior. Theoretical concepts are applied to promotion of health for communities and vulnerable populations. Understanding of systems and collaboration with the interdisciplinary team are emphasized. Community Health nursing practice is examined and synthesized utilizing historical, philosophical, legal, and ethical foundations and integrated knowledge. During the clinical segment, students are responsible for the clinical management of comprehensive client care along the continuum of care in multiple community settings. Community clinical meetings and presentations are in person, and dates/times vary based on the clinical site/organization.

Prerequisite(s): NURS 6100 and NURS 6300 and NURS 6600 and NURS 6700

Lecture Hours: 2 **Contact Hours:** 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Program Restrictions:** MSN_CNL-Clinical Nurse Leader

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

NURS 7150 - Evidence-Based Practice: Principles and Process (3 Credit Hours)

This course applies evidence-based principles to a clinical problem identified by the DNP project site and faculty advisor. Emphasis is on improving healthcare outcomes through problem identification and systematic literature search strategies. Learners begin to establish evidence-based practice as the cornerstone of critical thinking and decision-making. This course is the first step in developing the practice change project and is aligned to the IOWA Model. Students will complete 60 residency hours.

Lecture Hours: 2 **Other Hours:** 1 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: DNP - Doctor of Nursing Practice

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

NURS 7215 - Nursing Practice through Clinical Reasoning II (4 Credit Hours)

This course will build on previous course knowledge and will promote a theoretical foundation in health promotion, illness prevention and maintenance of the clients (individual, family, group, or community) function in health and illness. During the clinical segment, the student uses critical thinking in providing quality comprehensive client care along the continuum of care in multiple settings.

Prerequisite(s): NURS 6100 >= C and NURS 6200 >= C and NURS 6700 >= C

Lecture Hours: 2 **Lab Hours:** 1 **Other Hours:** 1 **Contact Hours:** 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Program Restrictions:** MSN_CNL-Clinical Nurse Leader

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

NURS 7221 - Strategic Resource Management (3 Credit Hours)

This course provides students with a strong foundation in the concepts of strategic management enabling them to implement the process in a wide variety of leadership positions in healthcare economics, organizations and systems.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

NURS 7222 - Utilizing Systems to Improve Health Outcomes (3 Credit Hours)

This course provides students with the financial management tools needed to analyze processes, and develop and implement changes to improve patient and/or system outcomes.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** CERM_ACNP-Cert in Acute Care Nurse Pract, DNP_DNP-Doctor of Nursing Practice, MSN_ACNP-Acute Care Nurse Practitioner

Schedule Type (Primary): Lecture

NURS 7223 - Bioethics in Nursing and Healthcare (2 Credit Hours)

Bioethical dilemmas are confronted daily across healthcare settings. Bioethical issues in current and future healthcare venues will be examined in areas such as the distribution of limited resources, health disparities, genetics, informatics, scientific exploration, patient rights, and priority-setting in healthcare. Students will critically examine an ethical issue in their specialty area with implications for the future and prepare a publishable essay.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Lecture

NURS 7225 - Application of Clinical Practice: Project Identification/Development (1 to 3 Credit Hours)

Students who enter the DNP program will have an identified practice area. In this course students will refine specific issues related to their practice that will lead them to the project outcome at program completion. Students will explore literature related to specific practice concerns in their area as well as discuss issues with practice leaders to identify and refine their project goals. During their clinical time they will explore in-depth how they will redefine their practice as they continue through the program.

Lecture Hours: 1 **Contact Hours:** 0 to 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Unsupervised Lab/Clinic

NURS 7226 - Examination of Practice (2 Credit Hours)

In a seminar format students will critically examine issues in nursing and healthcare today and explore how future directions can be impacted by nursing leadership in a collaborative environment to positively affect outcomes for patients and their families. Students will develop an in-depth evaluation of vulnerabilities and powerlessness in relation to their project population.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

NURS 7230 - Application of Clinical Practice - Project identification (2 Credit Hours)

Students who enter the DNP program will have an identified practice area. In this course students will refine specific issues related to their practice that will lead them to the project outcome at program completion. Students will explore literature related to specific practice concerns in their area as well as discuss issues with practice leaders to identify and refine their project goals. During their clinical time they will explore in-depth how they will redefine their practice as they continue through the program.

Lecture Hours: 1 **Contact Hours:** 5

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Program Restrictions:** MSN_NURS-Nursing

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

NURS 7235 - Application of Clinical Practice: Project Development/Implementation I (1 to 3 Credit Hours)

In this course, students will proceed with the development and implementation of the practice change project. Students will identify the target population, community resources and healthcare systems that will be impacted by their proposed project and discuss issues with these partners to further develop and refine their project goals. During their clinical time they will explore in-depth how they will redefine their practice as they continue through the program.

Lecture Hours: 1 **Contact Hours:** 0 to 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Lecture/Unsupervi Lab/Clinic, Unsupervised Lab/Clinic

NURS 7245 - Application of Clinical Practice: Project Development Implementation II (5 Credit Hours)

In this course students will continue with the development and implementation of their practice change project. Students will work in partnership with their target population, community and healthcare systems during implementation of their project plan. Students will evaluate the process of implementation and make appropriate adjustments to their plan.

Lecture Hours: 1 **Contact Hours:** 12

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Unsupervi Lab/Clinic, Unsupervised Lab/Clinic

NURS 7250 - Theoretical Foundations for Advanced Practice Psychiatric Mental Health Nursing (3 Credit Hours)

This course provides and orientation to the professional and scientific foundations of advanced practice psychiatric nursing across the lifespan. The evolving role of advanced practice psychiatric nurses is placed in the context of the current health care system. Focus is on explanatory models of mental health and psychiatric mental health nursing across the lifespan. The course will emphasize research evidence from genetics, epidemiology, neurosciences and behavioral sciences underlying mental health promotion and preventive interventions, and evidence-based treatments for psychiatric and substance use conditions. Translation of evidence in advanced practice psychiatric nursing is emphasized.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: CERM_PNUR-Cert Psyc and Mental Health NP

Schedule Type (Primary): Lecture

NURS 7251 - Advanced Psychopharmacology (2 Credit Hours)

Building on the foundation pharmacological concepts (pharmacokinetics, pharmacodynamics, and pharmacogenetics), this course presents theoretical concepts and empirical evidence related to psychopharmacological interventions with selected patient populations. Focus is on evidence-based pharmacological treatments for clients with mental and substance use disorders across the lifespan. Emphasis is on integration of mental and physical health assessment in selecting and prescribing psychopharmacological agents, and monitoring and evaluating individual responses to psychopharmacological interventions. This course emphasizes evidence-based approaches to prescribing medications, and patient education about specific diagnosis and medications. Issues related to prescribing for children, adolescents, and older adults are emphasized throughout the course.

Lecture Hours: 2

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Degree Restrictions: Post Masters Certificate, Doctor of Nursing Practice

Schedule Type (Primary): Asynchronous Instruction

NURS 7255 - DNP Project: Project Evaluation (3 to 5 Credit Hours)

During this course, students will critically evaluate the short and long term outcomes of the implementation of their practice change project. They will also participate in peer review of projects. Students will discuss alternative approaches, problems and resolutions of issues that they have encountered during the development and implementation of their projects.

Lecture Hours: 1 **Contact Hours:** 6 to 12

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Unsupervi Lab/Clinic,Unsupervised Lab/Clinic

NURS 7257 - Health Care Management (3 Credit Hours)

This course provides students with a strong foundation in the concepts of strategic organizational management in relation to advanced nursing practice in current and emerging health care practice. Students will learn theories of organizational and resource management as well as the processes of performance appraisal and strategic planning for quality assurance and improvement and managing risk at a systems level. It will also enable students to develop plans for innovative new business ideas to address the changing demands of the health care system.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Major Restrictions:** Nursing **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Nursing Practice **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Asynchronous Instruction

NURS 7258 - Advanced Practice Nursing Practicum (6 Credit Hours)

This course provides the student with terminal clinical practicum experiences in preparation for graduation from an advanced practice program. In preparation for employment interviews portfolios are compiled and evaluated for integration of advanced practice knowledge and skills in assessment, diagnosis, interventions and evaluation of outcomes for patients, families, communities, and/or systems. Students are provided information that will allow them to explore the full scope of responsibility inherent in the APN role. Students are expected to embrace the full scope of advanced practice nursing practice in conjunction with a preceptor. Students apply evidence based practice knowledge and skills in collaborative settings that support interprofessional learning and practice.

Lecture Hours: 1 Contact Hours: 5

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Major Restrictions:** Nursing **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Nursing Practice **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Asynchronous Instruction

NURS 7300 - Integrated Healthcare Mental Health (3 Credit Hours)

This course will apply and integrate biopsychosocial concepts and principles to the nursing process for individuals and groups. Previous course knowledge and communication skills will provide a theoretical foundation in mental health promotion, illness prevention and maintenance of the client's (individual, family, group or community) function. During the clinical segment, the student will be responsible for the clinical management of comprehensive client care along the continuum of care in multiple mental health settings.

Lecture Hours: 2 Contact Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal

Course Level Restrictions: Graduate Semester **Program Restrictions:** MSN_CNL-Clinical Nurse Leader

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

NURS 7310 - Group Approaches in Mental Health-Psychiatric Nursing (3 Credit Hours)

The course will present theoretical concepts basic to group interventions in Mental Health-Psychiatric nursing practice. Theories of group therapy will be analyzed with strong emphasis on group roles, and therapeutic techniques appropriate to the functional level of groups. Community aspects, including the client's sociocultural, ethnic and economic backgrounds will be integrated throughout the course.

Prerequisite(s): NURS 7180

Lecture Hours: 2 Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture

NURS 7320 - DNP Project (Product Evaluation/Synthesis) (3 Credit Hours)

This is a companion course to the final clinical practice component. During this course students will critically evaluate the product of their work during the program. They will also have in-depth peer review of their projects. They will discuss alternative approaches, problems and resolutions that they have dealt with during the program. They will critically evaluate the long range benefit of their product and determine how they could have improved on their product.

Lecture Hours: 3 Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal

Schedule Type (Primary): Lecture

NURS 7330 - Family Approaches in Mental Health-Psychiatric Nursing (3 Credit Hours)

Course presents theoretical concepts basic to family interventions in advanced mental health-psychiatric nursing practice. Theories of family development, structure, and function are studied. Major theoretical models of family therapy are analyzed with emphasis on systems theory and contextual issues. Community aspects, including the client's sociocultural, ethnic, and economic backgrounds, are integrated throughout the course.

Prerequisite(s): NURS 7180

Lecture Hours: 2 Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture

NURS 7348 - Advanced Psychiatric Mental Health Nursing for Individuals Across the Lifespan (3 Credit Hours)

This course presents theoretical concepts and empirical evidence related to psychotherapeutic interventions with selected patient populations across the lifespan. Focus is on evidence-based individual interventions for selected developmental, mental, and substance use conditions across the lifespan.

Corequisite(s): NURS7349

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: CERM_PNUR-Cert Psyc and Mental Health NP

Schedule Type (Primary): Lecture

NURS 7349 - Advanced Psychiatric Mental Health Nursing Practice I (2 Credit Hours)

This course provides opportunities to apply the knowledge and skills gained in NURS 7348: Advanced Psychiatric Mental Health Nursing for Individuals Across the Lifespan in clinical practice. Students assess individuals and diagnose mental and substance use disorders across the lifespan. Students select, implement, and evaluate evidence-based educational and psychotherapeutic interventions for children, adolescents, adults, and older adults with selected disorders. Students participate in individual and peer supervision sessions.

Prerequisite(s): NURS 7251 >= C

Corequisite(s): NURS 7348

Contact Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: CERM_PNUR-Cert Psyc and Mental Health NP

Schedule Type (Primary): Supervised Lab/Clinic

NURS 7350 - Psychopharmacotherapeutics for Advanced Practice Nursing (2 Credit Hours)

Course presents theoretical and clinical concepts applicable to psychopharmacology and pharmacotherapeutics in advanced nursing practice. Focus is on evidence-based pharmacological treatments for clients with mental health/substance use disorders, and integration of mental and physical health assessment in designing, implementing, monitoring, and evaluating individual responses to psychopharmacological interventions. The course emphasizes evidence-based approaches to patient education about specific diagnoses and medications. Special programs related to various age groups are considered.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** CERM_FNUP-Cert in Family Nurse Pract, CERM_PNUP-Cert in Pediatric Nurse Pract, MSN_FNUP-Family Nurse Practitioner, MSN_PNUP-Pediatric Nurse Practitioner

Schedule Type (Primary): Lecture

NURS 7351 - Psychopharmacotherapeutics Practicum for Advanced Practice Nursing (2 Credit Hours)

Prerequisite: NURS 7470 and NURS 7460. **Corequisite:** NURS7470. This course provides opportunities to apply concepts from courses in advanced health assessment, diagnostic reasoning, advanced pharmacology and psychopharmacology in a mental health-psychiatric nursing practicum. Emphasis is on nursing assessment, diagnosis, and management of individuals with mental health and/or substance use disorders, with a strong emphasis on patient-education. Students will apply evidence-based practice guidelines to select and manage medications, monitor therapeutic and adverse reactions to medications, and evaluate treatment response.

Prerequisite(s): NURS 7460 and NURS 7470

Contact Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

NURS 7352 - Advanced Psychiatric Mental Health Nursing for Families and Groups Across the Lifespan (3 Credit Hours)

This course presents theoretical concepts and empirical evidence related to family and group interventions with selected patient populations across the lifespan. Focus will be on evidence-based practices for family and group interventions. Major theoretical models of family therapy are analyzed with emphasis on systems theory and contextual issues. Models of group therapy are examined, with emphasis on group leadership styles, group roles, and therapeutic techniques appropriate to the purpose and composition of therapeutic groups. Influence of individual client factors and group characteristics on group process and function are examined throughout the course. Community aspects, including the client's sociocultural, ethnic, and economic backgrounds are integrated throughout the course.

Prerequisite(s): NURS 7250 and NURS 7348

Corequisite(s): NURS 7354

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: CERM_PNUR-Cert Psyc and Mental Health NP

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

NURS 7354 - Advanced Psychiatric Mental Health Nursing Practice II (3 Credit Hours)

This course provides opportunities to apply knowledge and skills gained in NURS 7352 to clinical practice. The focus is on evidence-based practices for family and group therapy interventions for clients with selected mental and substance use disorders. Students assess individuals and families, and select appropriate educational and psychotherapeutic intervention for couples and/or families with mental health or substance use conditions. Students implement and evaluate evidence-based treatments for families across the lifespan. Students participate in group therapy as leader or co-leader of educational, skill-building, support, or therapy groups. Students participate in at least one group for children or adolescents and at least one psychotherapy therapy group for adults. Students participate in individual peer group supervision sessions facilitated by faculty and/or preceptors.

Prerequisite(s): NURS 7250 and NURS 7348 and NURS 7349

Corequisite(s): NURS 7352

Lecture Hours: 2 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: CERM_PNUR-Cert Psyc and Mental Health NP

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

NURS 7357 - Mental Health Promotion and Integrated Practice (1 Credit Hour)

This course provides opportunities to apply the knowledge and skills gained in NURS 6970 in clinical practice. Students observe individuals across the lifespan, assess vulnerabilities and risks for atypical development, and mental and substance use conditions. Students select, implement, and evaluate evidence-based mental health promotion strategies and preventive interventions for at-risk children, adolescents, adults, and older adults in primary care and integrated health care settings. Students participate in individual and peer supervision sessions.

Corequisite(s): NURS6970

Contact Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: CERM_PNUR-Cert Psyc and Mental Health NP

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

NURS 7400 - Integrated Healthcare Women Children and Family Health (4 Credit Hours)

This course will build on previous course knowledge and will provide a theoretical foundation for health promotion, illness prevention, and maintenance of women throughout the lifespan (pregnancy, birth, postpartum, and interconceptional periods). This course will also build on previous course knowledge and provide a theoretical foundation in health promotion, illness prevention, and maintenance of children and family function in health and illness. During the clinical segment, the student will be responsible for the clinical management of comprehensive client care along the continuum of care in multiple settings.

Prerequisite(s): NURS 6100 >= C and NURS 6200 >= C and NURS 6700 >= C and NURS 7001 >= C

Corequisite(s): NURS 7215

Lecture Hours: 3 **Contact Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Program Restrictions:** MSN_CNLClinical Nurse Leader

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

NURS 7420 - Clinical Reasoning and Differential Diagnosis for Advanced Practice Nurses (2 Credit Hours)

This course builds on knowledge of advanced health assessment, with a focus on clients commonly seen in the family and pediatric practice settings. It focuses on diagnostic reasoning as a framework to synthesize knowledge for comprehensive assessment of primary care patients throughout the life span. Advanced health assessment techniques are emphasized and refined. Diverse types of approaches are used in expanding proficiency in conducting histories and physical examinations in laboratory and clinical settings including communication techniques unique to the specialty population. Systematic and organized health assessments that are sensitive to cultural and developmental needs are explored.

Lecture Hours: 1 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Audit, Normal

College Restrictions: The Graduate School **Program Restrictions:** MSN_NURS-Nursing

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

NURS 7425 - Advanced Pathophysiology (4 Credit Hours)

This course provides graduate students with an overview of central concepts of pathophysiology including an understanding of the management of common health problems, disease processes, and syndromes. The primary focus is to provide a foundation for differential diagnosis, clinical decision-making, and management of individual and family health problems.

Lecture Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Post Masters Certificate, Doctor of Nursing Practice

Schedule Type (Primary): Asynchronous Instruction

NURS 7430 - Pharmacology for Advanced Practice Nurses (4 Credit Hours)

This course focuses on increasing the knowledge base of advanced practice nurses in pharmacology and pharmacotherapeutics. Emphasis is placed on the pharmacotherapeutics for common acute and chronic health problems, as well as mental health conditions across the lifespan. Case studies are discussed, along with pharmacological management.

Prerequisite(s): NURS 7425 >= C

Lecture Hours: 4 **Contact Hours:** 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** DNP - Doctor of Nursing Practice

Schedule Type (Primary): Asynchronous Instruction

NURS 7440 - Theory and Research in Advanced Nursing Practice (3 Credit Hours)

Course examines theoretical foundations of nursing and use of research findings in advanced nursing practice. Concepts, theories and models related to health of individuals and families are critically analyzed. Development of a scientific base for advanced nursing practice is emphasized.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School

Schedule Type (Primary): Asynchronous Instruction

NURS 7441 - Advanced Nursing Research (2 Credit Hours)

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Nursing

Schedule Type (Primary): Lecture

NURS 7442 - Theory for Advanced Practice Nurses (2 Credit Hours)

This course is part of the core foundation of courses for all master's nursing curricula. This course provides an understanding of the role of theory in shaping research and practice in health and nursing. The basic elements of theory, theory development, and critique are discussed. Theories as they relate to health and human functioning of individual, family, and group client systems across the life span are explored. Examples of grand, middle-range, and practice level theory from nursing and related disciplines are examined. In addition, developmental, structural, functional, and interactional theories and related research data are analyzed and critiqued. These theories from nursing and related disciplines are used as a guide for therapeutic nursing interventions.

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** CERM_ACNP-Cert in Acute Care Nurse Pract, CERM_FNUP-Cert in Family Nurse Pract, CERM_PNUP-Cert in Pediatric Nurse Pract, MSN_ACNP-Acute Care Nurse Practitioner, MSN_FNUP-Family Nurse Practitioner, MSN_NURA-Nursing Anesthesia, MSN_PNUP-Pediatric Nurse Practitioner

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

NURS 7443 - Advanced Nursing Research (2 Credit Hours)

Advanced Nursing Research (2-0-0-2). This course addresses the scientific methods, research, clinical and ethical issues associated with the application of evidence-based practice (EBP) to nursing and other healthcare problems.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** CERM_ACNP-Cert in Acute Care Nurse Pract, CERM_FNUP-Cert in Family Nurse Pract, CERM_PNUP-Cert in Pediatric Nurse Pract, MSN_ACNP-Acute Care Nurse Practitioner, MSN_FNUP-Family Nurse Practitioner, MSN_NURA-Nursing Anesthesia, MSN_PNUP-Pediatric Nurse Practitioner

Schedule Type (Primary): Lecture

NURS 7450 - Advanced Practice Nursing Roles in Society (3 Credit Hours)

Students explore components and variations of the advanced practice role. Legal definitions and professional interpretations of advanced practice nursing are examined in relation to healthcare outcomes, resource allocation and cost effectiveness.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Major Restrictions:** Nursing **Course Level Restrictions:** Graduate Semester **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

NURS 7460 - Diagnostic and Clinical Reasoning for Advanced Practice Nurses (3 Credit Hours)

This course focuses on diagnostic reasoning as a framework to synthesize knowledge for comprehensive assessment of primary care patients throughout the life span. Advanced health assessment techniques are emphasized and refined. Diverse types of approaches are used in expanding proficiency in conducting histories and physical examinations in laboratory and clinical settings including communication techniques unique to the specialty population. Systematic and organized health assessments that are sensitive to cultural and developmental needs are explored.

Lecture Hours: 2 **Lab Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** CERM_ACNP-Cert in Acute Care Nurse Pract, CERM_FNUP-Cert in Family Nurse Pract, CERM_PNUP-Cert in Pediatric Nurse Pract, DNP_DNP-Doctor of Nursing Practice, MSN_FNUP-Family Nurse Practitioner, MSN_PNUP-Pediatric Nurse Practitioner

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic

Additional Course Fee: Nursing Skills Lab Fee (ACNP, NP, DNP, PNP) **Fee Type:** Flat Fee **Fee Amount:** \$ 150

NURS 7465 - Advanced Studies in Lifespan Development (2 Credit Hours)

This course is designed to prepare advanced practice nurses to describe and analyze the biological, cognitive, and socio-emotional development individuals from birth to death. The analysis of interactions between individuals at different stages of development in families, groups, and society will be emphasized.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Post Masters Certificate, Doctor of Nursing Practice

Schedule Type (Primary): Asynchronous Instruction

NURS 7470 - Advanced Health Assessment (3 Credit Hours)

This course in advanced health assessment expands the nurse's knowledge of cognitive processes and psychomotor skills needed for a comprehensive assessment of clients across the lifespan. Techniques and processes of performing a physical, mental, developmental, and nutritional assessment, obtaining a comprehensive health history, performing selected diagnostic procedures, and recording findings in SOAP note format will be demonstrated. Students will refine interviewing skills that prepare them to collect data from various clients across the lifespan.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Nursing Skills Lab Fee (ACNP, NP, DNP, PNP) **Fee Type:** Flat Fee **Fee Amount:** \$ 150

NURS 7472 - Advanced Professional Health Assessment (3 Credit Hours)

This course will build upon the professional nurse's basic educational background skills in health assessment. The theoretical and clinical basis for an advanced health assessment across the lifespan will be developed. Emphasis is placed on health promotion, disease prevention, and risk assessment.

Prerequisite(s): NURS 6100 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Master of Science in Nursing

Schedule Type (Primary): Asynchronous Instruction

NURS 7475 - Population Health and Emerging Disease (2 Credit Hours)

This course strengthens students' capacity to integrate and apply public health concepts and epidemiologic methods to improve population health. The theory and scope of public health practice are analyzed in the context of the complex interplay between science, law, policy, and ethics. Students synthesize and apply public health concepts (e.g., population perspective, health promotion and prevention, determinants of health) and methods, (e.g., policy/advocacy/epidemiology/quality improvement/program planning).

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Asynchronous Instruction

NURS 7486 - Global Rural Health (3 Credit Hours)

This study abroad course focuses on rural health in collaboration with nursing faculty and students in a foreign country. Students will explore health policy, nursing education, public health outcomes, and cultural experiences from a global perspective. Students will engage in critical reflection of learning experiences to facilitate professional transformation. Reciprocal learning relationships are fostered through community engagement activities.

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Lecture

NURS 7487 - Empowering DNPs: Finance, Innovation and Systems Thinking (2 Credit Hours)

This course prepares future nurse leaders with essential competencies in healthcare finance, strategic management, and innovation. Emphasis is on developing financial decision-making, budgeting, and cost-benefit analysis skills. The course develops skills in quality improvement, systems-based practice, and data-driven decision-making. Interprofessional collaboration is cultivated through team-based leadership simulations. Students also explore innovative care models and disruptive technologies to address population health.

Lecture Hours: 2 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 2

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: COLLEGE OF NURSING **Degree Restrictions:** DNP- Doctor of Nursing Practice

Schedule Type (Primary): Lecture

NURS 7490 - Psychiatric Mental Health Nurse Practitioner Practicum (4 Credit Hours)

Prerequisites: All courses in the major. Course provides opportunities to apply the knowledge and skills gained in the preceding courses to clinical practice. Focus is on designing, implementing, and evaluating the psychiatric mental health nurse practitioner role with individuals across the lifespan in selected settings. The role of the psychiatric mental health nurse practitioner in psychiatric emergencies and in integrated care settings is included.

Lecture Hours: 1 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** CERM_PNUR-Cert Psyc and Mental Health NP

Schedule Type (Primary): Lecture/Unsupervi Lab/Clinic

NURS 7491 - Advanced Practice in Mental Health-Psychiatric Nursing Practicum (1 to 3 Credit Hours)

Course provides an opportunity to apply the knowledge and skills gained in the preceding courses to clinical practice. The focus is on designing, implementing, and evaluating the advanced practice psychiatric nursing role in selected settings. Students may choose a primary care setting to focus on integration of mental health and primary care, or a specialty setting in which to develop additional competence in a psychotherapeutic modality.

Prerequisite(s): NURS 7250 and NURS 7348

Contact Hours: 1 to 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** CERM_PNUR-Cert Psyc and Mental Health NP

Schedule Type (Primary): Unsupervised Lab/Clinic

NURS 7500 - Leading Teams to Promote Quality and Safety (2 Credit Hours)

This course presents theories, concepts and models essential to developing leadership and management skills needed to collaborate with healthcare providers and community members. The student will apply and integrate creative and effective strategies for managing and leading in the delivery of nursing care. Opportunities exist for students to synthesize and integrate past principles and concepts into the development of the clinical nurse leader role. Concepts related to safety, quality, leadership and management of teams, policy, resource utilization, planning/evaluating services, root cause analysis, and outcomes are critically examined.

Prerequisite(s): NURS 6600 and NURS 6700 and NURS 6990 and NURS 7000

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Program Restrictions:** MSN_CNL-Clinical Nurse Leader

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

NURS 7520 - Advanced Practice in Parent-Child Nursing (6 Credit Hours)

The purpose of this last course in the series for advanced practice parent-child nursing is to provide a concentrated clinical experience (225 clock hours). Students refine advanced practice skills in clinical decision making, expert-collaborative care, case management, change agency, research utilization, and/or educational interventions. Seminars will be scheduled to discuss issues related to advanced practice.

Prerequisite(s): NURS 7500 >= C

Lecture Hours: 1 **Contact Hours:** 15

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

NURS 7550 - Leadership in Interprofessional Collaboration and Health Care (2 Credit Hours)

This course is designed to prepare the student to identify and utilize leadership roles as a basis for improving health care outcomes through interprofessional collaboration on a local, regional, and national level.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Doctor of Nursing Practice

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

NURS 7600 - Nursing Management of Complex Health Alterations Across the Lifespan (4 Credit Hours)

This course focuses and provides the theoretical and functional base for the complex management of clients with complicated, multi-system health problems.

Prerequisite(s): NURS 7215 >= C

Lecture Hours: 3 **Lab Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal

Course Level Restrictions: Graduate Semester **Program Restrictions:** MSN_CNL-Clinical Nurse Leader

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

NURS 7710 - Assessment and Management of Acute Health Problems for Acute Care Nurse Practitioners (ACNP I) (5 Credit Hours)

This initial course into the acute care nurse practitioner role focuses on the synthesis of advanced assessment and clinical decision making for patients with complex needs in the acute care setting.

Prerequisite(s): NURS 7471 and NURS 7390

Lecture Hours: 2 **Lab Hours:** 1 **Contact Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** CERM_ACNP-

Cert in Acute Care Nurse Pract, MSN_ACNP-Acute Care Nurse Practitioner
Schedule Type (Primary): Lecture/Supervised Lab/Clinic

NURS 7712 - PACE: Assessment and Management of Acute Health Problems for ACNP I (9 Credit Hours)

This accelerated course is designed as online modules for post masters clinical nurse specialists or nurse practitioners to be board-eligible for the acute care nurse practitioner (ACNP) certification exam. This last course focuses on the advanced assessment and clinical decision-making based on scientific evidence for patients with complex needs in the acute care setting.

Corequisite(s): NURS7390, NURS7470

Lecture Hours: 3 Lab Hours: 1 Contact Hours: 5

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Program Restrictions:** CERM_ACNP-Cert in Acute Care Nurse Pract

Schedule Type (Primary): Asynchronous Instruction

NURS 7716 - Assessment and Management of Acute Health Problems for CCNS I (6 Credit Hours)

This initial course into the acute and critical care clinical nurse specialist role focuses on the synthesis of advanced assessment and clinical decision making for patients with complex needs in the acute care setting. The CCNS competencies and spheres of influence with patients, families, and systems are introduced utilizing the AACN Synergy Model as a foundation for contemporary CCNS practice.

Prerequisite(s): NURS 7390 and NURS 7470

Lecture Hours: 3 Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Major Restrictions:** Nursing **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Nursing Practice **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Asynchronous Instruction

NURS 7717 - Research-based Interventions for Acute and CCNS Specialists in Collaborative Patient Care (CCNS II) (6 Credit Hours)

This second-level acute and critical care clinical nurse specialist course focuses on the scientific basis of interventions for complex, acutely ill individuals. The clinical practicum provides opportunities to: participate in collaborative practice on a multi-disciplinary health care team; determine appropriate interventions; utilize expanded practice skills; and evaluate outcomes for the acutely ill. The clinical practicum integrates CCNS competencies and spheres of influence with patients, families and systems by utilizing the AACN Synergy Model as a basis for contemporary CCNS practice.

Prerequisite(s): NURS 7390 and NURS 7430 and NURS 7470 and NURS 7716

Lecture Hours: 3 Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Major Restrictions:** Nursing **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Nursing Practice **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Asynchronous Instruction

NURS 7718 - Clinical Therapeutics for the Acute and CCNS (III) (6 Credit Hours)

This third level acute and critical care clinical nurse specialist course focuses on the application of all previous course work in the comprehensive management of complex, acutely ill individuals. This fosters mastery of CCNS skills and knowledge needed in assessment, collaborative care planning, selection of therapeutic intervention, and evaluation of outcomes of acute and chronically ill. The clinical practicum integrates CCNS competencies and spheres of influence with patients, families and systems utilizing the AACN Synergy Model as a basis for contemporary CCNS practice.

Prerequisite(s): NURS 7390 and NURS 7430 and NURS 7470 and NURS 7717

Lecture Hours: 3 Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Major Restrictions:** Nursing **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Nursing Practice **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Asynchronous Instruction

NURS 7720 - Research-Based Interventions for Acute Care Nurse Practitioners in Collaborative Patient Care ACNP II (5 Credit Hours)

This second level acute care nurse practitioner course focuses on the scientific basis of interventions for complex, acutely ill individuals. The clinical practicum provides opportunities to: participate in collaborative practice on a multi-disciplinary healthcare team; determine appropriate interventions; utilize expanded practice skills; and evaluate outcomes for the acutely ill.

Prerequisite(s): NURS 7390 and NURS 7430 and NURS 7471 and NURS 7710

Lecture Hours: 2 **Lab Hours:** 1 **Contact Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** CERM_ACNP-Cert in Acute Care Nurse Pract, MSN_ACNP-Acute Care Nurse Practitioner

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

NURS 7722 - PACE: Assessment and Management of Acute Health Problems for ACNP II (9 Credit Hours)

This accelerated course is designed as online modules for post masters clinical nurse specialists or nurse practitioners to be board-eligible for the acute care nurse practitioner (ACNP) certification exam. This last course focuses on the advanced assessment and clinical decision-making based on scientific evidence for patients with complex needs in the acute care setting.

Prerequisite(s): NURS 7712

Lecture Hours: 3 **Lab Hours:** 1 **Contact Hours:** 5

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Program Restrictions:** CERM_ACNP-Cert in Acute Care Nurse Pract

Schedule Type (Primary): Asynchronous Instruction

NURS 7725 - Adult-Gerontology ACNP III: Adv Clin Concepts in Crit Illness and Prof Role Dev for the Adult-Ger (6 Credit Hours)

The third acute care clinical course focuses on application of previous coursework in the management of highly complex, acutely ill adults and elderly individuals. The clinical experience fosters synthesis of skills needed in assessment, selection of therapeutic interventions, and evaluation of patient outcomes to ensure optimal clinical outcomes. Professional issues relevant to the adult gerontology acute care nurse practitioner will be explored.

Prerequisite(s): NURS 7724

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Adult Geront. Acute Care NP, Adult Geront. Acute Care NP **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

NURS 7726 - Advanced Clinical Therapeutics and Diagnostics for the ACNP (1 Credit Hour)

This course is designed to introduce students to diagnostic and therapeutic procedures commonly used in the management of adults and elderly clients in the acute care setting. Students will learn interpretation of common diagnostic testing in the acute care setting. Indications, contraindications, interpretations, risks, complications, and expected clinical outcomes of common procedures utilized in the acute care setting in an active learning environment using simulation. Students will have opportunities to develop and practice skills such as Chest X-ray and 12 lead EKG interpretation, suturing, endotracheal intubation, and central line placement and apply these

skills in realistic and complex simulated clinical scenarios. Students will also be able to evaluate their own performance and receive feedback from peers and expert faculty in a safe environment.

Prerequisite(s): NURS 7390 and NURS 7470

Contact Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Supervised Lab/Clinic

NURS 7730 - Clinical Therapeutics for the Acute Care Nurse Practitioner (ACNP III) (5 Credit Hours)

This third level acute care nurse practitioner course focuses on the application of all previous course work in the comprehensive management of complex, acutely ill individuals. This fosters mastery of skills needed in assessment, diagnosis, collaborative care planning, selection of therapeutic intervention, and evaluation of outcomes.

Prerequisite(s): NURS 7390 and NURS 7430 and NURS 7471 and NURS 7720

Lecture Hours: 2 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** CERM_ACNP-Cert in Acute Care Nurse Pract, MSN_ACNP-Acute Care Nurse Practitioner

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

NURS 7740 - Acute Care Nurse Practitioner Practicum (ACNP IV) (5 Credit Hours)

This final acute care nurse practitioner course focuses on the application of all previous course work in the comprehensive management of complex, acutely ill individuals. This fosters refinement of skills needed in assessment, diagnosis, collaborative care planning, selection of therapeutic intervention, and evaluation of outcomes. This precepted experience gives the student responsibility for the managing episodes of acute/critical care; utilizing all available resources throughout the health care continuum.

Prerequisite(s): NURS 7390 and NURS 7430 and NURS 7471 and NURS 7730

Lecture Hours: 1 **Contact Hours:** 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** CERM_ACNP-Cert in Acute Care Nurse Pract, MSN_ACNP-Acute Care Nurse Practitioner

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

NURS 7800 - Synthesis of the Clinical Nurse Leader Role in Practice (11 Credit Hours)

This course focuses on the synthesis of principles of professional nursing practice into the integration of the clinical nurse leader role. The student will be provided with concentrated clinical experience and will be immersed in the clinical setting. During the clinical experience, students will collaborate with nurse preceptors and will focus on: leadership, management (delegation and coordination), information management, outcomes, evidence-based clinical decision-making, scholarship, fiscal management and accountability (implementing cost effectiveness strategies), and interdisciplinary collaboration.

Prerequisite(s): NURS 7215 >= C and NURS 7500 >= C

Lecture Hours: 3 **Contact Hours:** 8

Repeatability: May not be repeated for credit.

Grade Mode: Normal

Course Level Restrictions: Graduate Semester **Program Restrictions:** MSN_CNL-Clinical Nurse Leader

Schedule Type (Primary): Lecture/Unsupervi Lab/Clinic

NURS 7801 - Synthesis of Clinical Nurse Leader Role in Practice (9 Credit Hours)

This course focuses on the synthesis of principles of professional nursing practice into the integration of the clinical nurse leader role. The student will be provided with concentrated clinical experience and will be immersed in the clinical setting. During the clinical experience, students will collaborate with nurse preceptors and will focus on: leadership, management (delegation and coordination), information management, outcomes, evidenced-based clinical decision-making, scholarship, fiscal management and accountability

(implementing cost effectiveness strategies), and interdisciplinary collaboration.

Prerequisite(s): (NURS7215 >= C and NURS7500 >= C)

Lecture Hours: 2 **Lab Hours:** 7

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Nursing **Major Restrictions:** Clinical Nurse Leader **Student Class Restrictions:** Graduate-

Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Master of Science in Nursing **Program**

Restrictions: MSN_CNL-Clinical Nurse Leader **Campus Restrictions:** Athens Campus, Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

NURS 7830 - Advanced Anatomy, Physiology & Pathophysiology for Nursing Anesthesia I (4 Credit Hours)

This graduate-level course provides an in-depth exploration of the anatomy, physiology, and pathophysiology of the cardiovascular, respiratory, central nervous, autonomic nervous, and hematologic systems as they relate to nurse anesthesia practice. Students will integrate foundational knowledge of normal and abnormal physiological processes to support clinical decision-making in perioperative anesthesia care. Emphasis is placed on the pathophysiological mechanisms underlying ischemic and valvular heart disease, obstructive and restrictive lung disorders, cerebrovascular disease, hematologic abnormalities, central nervous and autonomic nervous dysfunction. By synthesizing knowledge of systemic disease states and their perioperative implications, this course fosters preparation for clinical practice in nurse anesthesia.

Prerequisite(s): NURS 7832 >=B

Corequisite(s): NURS 7831 >=B

Lecture Hours: 3 **Lab Hours:** 1 **Contact Hours:** 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Major Restrictions:** Nursing Anesthesia **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

NURS 7831 - Advanced Pharmacology for Nursing Anesthesia I (3 Credit Hours)

This advanced course provides the student a strong foundation in pharmacology and its application in the advanced practice role of nurse anesthesia. An in-depth and comprehensive exploration of advanced scientific-based pharmacological principles including pharmacokinetics, pharmacodynamics, and pharmacogenetics of inhaled and injected drugs commonly used in advanced nurse anesthesia practice are emphasized throughout the course.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Nursing Anesthesia **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Lecture

NURS 7832 - Chemistry, Physics, and Cellular Foundations for Nursing Anesthesia (3 Credit Hours)

This course explores fundamental principles of chemistry, physics, and cellular physiology as they relate to nurse anesthesia practice. Topics include gas laws, fluid dynamics, and principles of measurement and safety in the operating room. Emphasis is placed on applying these concepts to anesthesia equipment function, drug behavior, and patient physiology.

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Nursing Anesthesia **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

NURS 7833 - Advanced Anatomy, Physiology & Pathophysiology for Nursing Anesthesia II (4 Credit Hours)

This graduate-level course provides an advanced examination of the anatomy, physiology, and pathophysiology of the renal, hepatic, musculoskeletal, immune, endocrine, and gastrointestinal systems as they relate to nurse anesthesia practice. Students will integrate foundational knowledge of these systems with disease mechanisms and their implications for anesthetic management. Emphasis is placed on complex pathophysiologic processes and their related anesthesia considerations to optimize anesthesia care for patients with coexisting diseases. By synthesizing knowledge of systemic disease states and their anesthetic implications, this course fosters preparation for clinical decision-making and anesthesia management in high-risk patient populations.

Prerequisite(s): NURS 7830 >= B

Corequisite(s): NURS 8360 >=B

Lecture Hours: 3 **Lab Hours:** 1 **Contact Hours:** 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Nursing Anesthesia **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

NURS 7834 - Basic Principles of Nursing Anesthesia (3 Credit Hours)

This course provides the nurse anesthesia student with a general introduction to the basic principles of nurse anesthesia practice. A comprehensive overview of professional aspects and fundamental anesthetic principles related to vigilant nurse anesthesia practice are presented and provide a strong foundation that is essential for the student to provide safe, vigilant, effective, and individualized anesthesia management plans. Basic principles of preoperative patient assessment, anesthesia planning, operating-room preparation, interpretation of pertinent patient findings, lab results, acid-base balance and blood gas analysis, and required documentation for safe anesthesia management is the focus of the course. An overview of the development of anesthesia as an advanced practice-nursing specialty will also be offered. Emphasis is placed on those factors that shape the practice environment of the nurse anesthetist: qualifications and scope of practice, professional role, commitment to the profession, professional organizations, the U.S. legal system, history, professional standards, code of ethics, political and practice challenges, global health issues, multiculturalism and culturally competent care, and the concept of caring and wellness with the goal of developing vigilant providers that practice with high integrity.

Prerequisite(s): NURS 7831 >= B

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Nursing Anesthesia **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Lecture

NURS 7835 - Advanced Principles of Nursing Anesthesia I (4 Credit Hours)

This course is designed to provide the student with a comprehensive overview of advanced principles and techniques essential to planning and safely administering sound, evidence based anesthesia to patients with common and complex patient morbidities undergoing various surgical, diagnostic, or therapeutic procedures. Emphasis is placed on patient assessment, anesthetic management, and associated technology integral to each procedure. Simulation-based methodologies are heavily integrated into the course, providing that the student a simulated anesthetizing environment for application and synthesis of advanced anesthesia principles to operationalize theoretical and critical thinking concepts. Lecture topics will be assimilated into high fidelity simulation scenarios to prepare the student for clinical residency courses. Students will develop problem solving and decision-making skills during all phases of anesthetic management by participating in case preparation and discussions, actual management of selected case scenarios, and review and discussion of their performance.

Prerequisite(s): NURS 7834 >= B

Lecture Hours: 3 **Lab Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Nursing Anesthesia **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

NURS 7836 - Techniques and Technologies in Nursing Anesthesia I (4 Credit Hours)

This course provides the student with a comprehensive overview of the design and utilization of the anesthesia delivery system, biomedical instrumentation, and monitoring modalities commonly used in nurse anesthesia practice. Monitors and equipment utilized are studied with respect to principles of operation, calibration, and interpretation of data. Emphasis will be placed on application of the scientific principles, vaporization, explosion hazards, electrical safety, and the provision of safe anesthesia care. In-depth study on airway anatomy and management is also emphasized. Course material encompasses recognition of the difficult airway, the ASA

Difficult Airway Algorithm, physiologic response to intubation, fiber-optic techniques, retrograde techniques, and the surgical airway. This course also includes practice in and evaluation of task specific skills utilizing skill trainers and simulation to maximize students' direct contact to the instrumentation of the profession with the goal of developing vigilant providers that practice with high integrity.

Prerequisite(s): NURS 7834 >= B

Lecture Hours: 3 **Lab Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Nursing Anesthesia **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

NURS 7837 - Nursing Anesthesia Clinical Practicum I (8 Credit Hours)

This first clinical course is designed to allow the student to utilize the didactic and simulation concepts received during the first four semesters of the nursing anesthesia program to develop and manage a comprehensive anesthetic plan that encompasses the patient's social, physical, and mental health. These clinical experiences will occur in collaboration with a certified registered nurse anesthetist and/or anesthesiologist.

Prerequisite(s): NURS 8361 >= B and NURS 8362 >= B

Contact Hours: 8

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Internship/Practicum

NURS 7900 - Professionalism and Transition to Nursing Practice (3 Credit Hours)

This hybrid course is an intensive review of key nursing concepts and skills to prepare CNL graduates for NCLEX success and transition into professional nursing practice. Emphasis is on professional development, critical thinking, NCLEX test-taking strategies and reinforcement of basic nursing skills and mastery of critical concepts learned throughout the curriculum.

Prerequisite(s): NURS 7100 >= C and NURS 7215 >= C and NURS 7400 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Nursing **Major Restrictions:** Clinical Nurse Leader **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Master of Science in Nursing **Program**

Restrictions: MSN_CNL-Clinical Nurse Leader **Campus Restrictions:** Athens Campus, Main Campus

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

NURS 7950 - Advanced Acute Care in Adult Health (3 Credit Hours)

This course is designed to enable students to acquire in-depth knowledge and skills related to adult acute care nursing specialty area. Clinical experience focuses on case management in a variety of sub-acute and acute care settings. The specialty area is mutually selected by the student and course faculty. Students apply knowledge of advanced pathophysiology, pharmacology, health assessment, nursing interventions, theory and research to the care of adults and their families experiencing health problems within a chosen acute/subacute specialty area. The seminar component of the course is designed to develop clinical decision-making skills through case study presentation. Students will be given the opportunity to submit a clinical paper for peer review.

Lecture Hours: 1 **Contact Hours:** 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Nursing

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

NURS 7965 - Seminar in Nursing (1 to 5 Credit Hours)

A faculty member offers a seminar on a special topic for two or more students.

Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Satisfactory/Unsatisfactory

College Restrictions: The Graduate School **Major Restrictions:** Nursing **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Nursing Practice

Schedule Type (Primary): Seminar **Schedule Type (Additional):** Small Group, Asynchronous Instruction

NURS 7970 - Laboratory and Diagnostic Tests in Advanced Practice (3 Credit Hours)

This course builds on undergraduate knowledge of basic normal and abnormal laboratory findings. More specifically, this course is designed to enable students to acquire advanced in-depth knowledge and skills related to proper laboratory and diagnostic testing for acute diseases/conditions. Opportunities are provided for students to synthesize knowledge regarding laboratory and diagnostic test usages in order to make decisions regarding diagnosis and evaluation of patient progress.

Prerequisite(s): NURS 7390 >= C and NURS 7470 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Nursing

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

NURS 7985 - Independent Study - DNP (1 to 3 Credit Hours)

This course provides an individual student with the opportunity to study further a topic introduced in earlier coursework, or pursue and area of interest (compatible with the area of concentration) for which course work is not available.

Contact Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Nursing Practice **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Independent Study **Schedule Type (Additional):** Asynchronous Instruction

NURS 7990 - Independent Study (1 to 6 Credit Hours)

This course enables the student to pursue a specified area of study which supports the student's program of study. Teaching strategies include dyadic modalities; no clinical.

Contact Hours: 1 to 6

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** MSN_NURA-Nursing Anesthesia

Schedule Type (Primary): Lecture/Unsupervi Lab/Clinic **Schedule Type (Additional):** Independent Study

NURS 7991 - Independent Study (1 to 6 Credit Hours)

This course enables the student to pursue a specified area of study which supports the student's program of study. Teaching strategies include dyadic modalities; no clinical.

Contact Hours: 1 to 6

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: College of Nursing

Schedule Type (Primary): Lecture/Unsupervi Lab/Clinic

NURS 7992 - Independent Study (1 to 6 Credit Hours)

This course enables the student to pursue a specified area of study which supports the student's program of study. Teaching strategies include dyadic and clinical experiences

Contact Hours: 1 to 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School
Schedule Type (Primary): Lecture/Unsupervi Lab/Clinic

NURS 8100 - Seminar in Academic Career Development (2 Credit Hours)

This course explores the multi-faceted roles of nursing faculty, with specific emphasis on career development and teaching effectiveness.

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** DPHIL_NURS-Nursing

Schedule Type (Primary): Asynchronous Instruction **Schedule Type (Additional):** Lecture

NURS 8140 - Responsible Conduct of Research (1 Credit Hour)

This course will provide an overview, via lecture and discussion, of critical issues related to the responsible conduct of research. In addition, it will fulfill the requirements established by the national Office of Research Integrity (ORI) Public Health Service (PHS) Policy on Instruction in the Responsible Conduct of Research (December 2000) for ensuring that PHS-supported researchers are provided adequate instruction in conducting responsible research and ensuring integrity of the research record.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** DPHIL_NURS-Nursing

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

NURS 8150 - Scientific Grant Writing I (2 Credit Hours)

The first of two scientific grant writing courses offered to nursing PhD students, this course is designed to give students an overview of scientific grant writing, including its purpose, how to identify granting agencies, componenets of a research proposal, grant timetables, grantmanship, as well as the peer review process and scoring. Students will participate in a mock peer-review of pre-assigned examples of grant submissions. Following these introductory presentations, faculty will mentor students in developing the initial components of a pre-doctoral grant application, including the candidate history, training plan, investigator biosketches, letters of support, budget and key personnel, scientific literature review, and the significance and innovation sections. After completing these components, faculty will mentor students in outlining and drafting the initial sections of the research proposal, including the specific aims page, approach/methods/analysis sections.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** DPHIL_NURS-Nursing

Schedule Type (Primary): Lecture

NURS 8160 - Scientific Grant Writing II (2 Credit Hours)

The second of two scientific grant writing courses offered to nursing PhD students, course faculty will mentor students in completing , reviewing, editing, and submitting the pre-doctoral grant application drafted in SGWI. The Center for Nursing Reserach will sponsor and facilitate extramural mock reviews 6 weeks prior to the grant submission deadline to allow students to benefit from peer-review and feedback.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** DPHIL_NURS-Nursing

Schedule Type (Primary): Lecture

NURS 8170 - Scientific Grant Writing (3 Credit Hours)

This scientific grant-writing course is designed to mentor PhD nursing students through the grant-writing process and lead to submission of a grant application. Students will be instructed on the grant submission process for funding agencies relative to their specific dissertation project. Under faculty mentorship, students will develop components of a grant, including research training goals/plan, biosketch, specific aims, research strategy (significance and methodological approach), abstract, budget and all additional required attachments relative to institutional and study site information.

Prerequisite(s): NURS 8510 >= B and NURS 8610 >= B

Pre- or Corequisite(s): NURS 8620 >= B

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Doctor of Philosophy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

NURS 8250 - Health Care Policy: Implications for the Advanced Practice Nurse (2 Credit Hours)

National, state, and local health care policy impacts health care at the level of delivery. Health care delivery models and reimbursement mechanisms will be analyzed from a policy perspective. The relationship between policy and patient care will be examined in areas such as distribution of limited resources, health care disparities, diffusion of technology, and current issues in health care. Students will critically examine a clinical issue, how health policy impacts outcomes and identify strategies to advocate for policy reform.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Doctor of Nursing Practice

Schedule Type (Primary): Asynchronous Instruction

NURS 8251 - Advanced Scientific Inquiry in Clinical Practice (3 Credit Hours)

This course involves the systematic exploration of the scientific underpinnings of advanced nursing practice. Students will examine recent evidence based on the scientific knowledge needed for advanced practice in an area of clinical concentration or phenomenon of interest. Empirical evidence will be searched to answer current and cutting edge questions that are at the core of the discipline of nursing.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Doctor of Nursing Practice

Schedule Type (Primary): Asynchronous Instruction

NURS 8300 - Nursing Education Practicum (1 to 6 Credit Hours)

This elective course is designed for doctoral students to gain supervised practical experience teaching in a specific area of nursing education in the Bachelor of Science in Nursing (BSN) program or the master's degree nursing program at Augusta University (AU). SACS guidelines for teaching will be followed. The PhD Program Director is responsible for approving the course faculty and the supervised practical experience in nursing education. Students in the Nurse Faculty Loan Program (NFLP) may take this course for partial fulfillment of the NFLP education requirement. Students are encouraged but are not required to take NURS 8100, Seminar in Academic Career Development, before enrolling in this course.

Contact Hours: 1 to 6

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School , College of Nursing **Student Class Restrictions:** Graduate-Semester **Course Level**

Restrictions: Graduate Semester **Campus Restrictions:** Athens Campus, Main Campus, Web

Schedule Type (Primary): Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

NURS 8311 - FNP I: Health Promotion and Primary Care of the Adult (3 Credit Hours)

This course is designed to prepare family nurse practitioner students to assume responsibility for health promotion, health maintenance, disease prevention, and the management of common acute and chronic health problems of adults in primary health care settings. Emphasis is on the family as the basic unit of nursing care. Discussion will include diagnosis and evidence based management (both non-pharmacologic and pharmacologic) of common health problems. Criteria for consultation and indications for referral along with exploration of available community resources will also be considered.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: CERM_FNUP-Cert in Family Nurse Pract, DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

NURS 8312 - FNP Practice I: for the DNP Program (4 Credit Hours)

This course provides the student with clinical experiences within the scope of the family nurse practitioner centered on health promotion, health maintenance, disease prevention, and the management of common acute and chronic health problems of adults in primary health care settings. Emphasis is on the family as the basic unit of nursing care.

Lab Hours: 1 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Program Restrictions: DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Supervised Lab/Clinic

Additional Course Fee: Nursing Skills Lab Fee (ACNP, NP, DNP, PNP) **Fee Type:** Flat Fee **Fee Amount:** \$ 150

NURS 8313 - FNP Practice I: for Post-Graduate Certificate (3 Credit Hours)

This course provides the student with clinical experiences within the scope of the family nurse practitioner centered on health promotion, health maintenance, disease prevention, and the management of common acute and chronic health problems of adults in primary health care settings. Emphasis is on the family as the basic unit of nursing care.

Lab Hours: 1 **Contact Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Program Restrictions: CERM_FNUP-Cert in Family Nurse Pract

Schedule Type (Primary): Supervised Lab/Clinic

Additional Course Fee: Nursing Skills Lab Fee (ACNP, NP, DNP, PNP) **Fee Type:** Flat Fee **Fee Amount:** \$ 150

NURS 8314 - FNP II: Health Promotion and Primary Care of Children and Women of Reproductive Age (3 Credit Hours)

This course prepares students to assume responsibility for health promotion, maintenance, and management of common health problems of infants, children, adolescents, and women during reproductive years. Emphasis is on the description of the condition or disease, etiology and incidence, clinical findings, differential diagnosis, evidence-based management, complications, and preventive and patient education measures. Consideration is given to cultural, ethical, and legal issues that affect health care delivery and client adherence to the management plan.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Family Nurse Practitioner **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Lecture

NURS 8315 - FNP Practice II: for DNP Program (3 Credit Hours)

This course provides the student with clinical experiences within the scope of family nurse practitioner centered health promotion, maintenance, and management of common acute and chronic health problems of infants, children, and adolescents in primary health care settings. Emphasis is on the description of the condition or disease, etiology and incidence, clinical findings, differential diagnosis, management, complications, and preventive and patient education measures. Consideration is given to cultural and ethical issues that affect health care delivery and client adherence to the management plan.

Lab Hours: 0 **Other Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Major Restrictions: Family Nurse Practitioner **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Supervised Lab/Clinic

NURS 8317 - FNP III: Health Promotion and Primary Care of the Older Adult (3 Credit Hours)

This course is designed to prepare family nurse practitioners to assume responsibility for health promotion, disease prevention, early detection, and management of common acute and chronic health problems of the elderly client and their family. The nurse practitioner's role in promoting successful aging, maintaining function, and promoting self care, through the use of the community, personal, and family resources is stressed. Common geriatric syndromes and problems, including chronic illnesses and their management, are emphasized. Ethical dilemmas that impact the healthcare of the older adult are integrated throughout the course.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: CERM_FNUP-Cert in Family Nurse Pract, DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

NURS 8318 - FNP Practice III: for the DNP Program (4 Credit Hours)

Provides students with clinical experiences within the scope of the family nurse practitioner centered on health promotion, disease promotion, early detection, and management of common acute and chronic health problems of the elderly client and their family. The nurse practitioner's role in promoting successful aging, maintaining function, and promoting self care, through the use of the community, personal, and family resources is stressed. Common geriatric syndromes and problems, including chronic illnesses and their management, are emphasized. Ethical dilemmas that impact the healthcare of the older adult are integrated throughout the course.

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Major Restrictions: Family Nurse Practitioner **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice **Concentration**

Restrictions: DNP Family Nurse Practitioner Concentration

Schedule Type (Primary): Supervised Lab/Clinic

NURS 8321 - PNP I: Health Promotion and Supervision: Birth through Adolescence (3 Credit Hours)

This course is designed to prepare pediatric nurse practitioners to assume responsibility for health promotion, health maintenance, and management of children from birth to adolescence. Emphasis is on the child within the framework of the family. Stages of development will be explored from biophysical, cognitive, emotional, and sociocultural perspectives. Discussion will include non-pharmacologic and pharmacologic management including immunizations supporting health promotion. Criteria for consultation and indications for referral along with exploration of available community resources will also be included.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Post Masters Certificate, Doctor of Nursing Practice **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

NURS 8322 - PNP Practice I: for the DNP Program (4 Credit Hours)

This course provides the student with clinical experiences within the scope of the pediatric nurse practitioner centered on health promotion, health maintenance, and management of children from birth to adolescence. Emphasis is on the child within the framework of the family. Stages of development will be explored from biophysical, cognitive, emotional, and sociocultural perspectives. Discussion will include non-pharmacologic and pharmacologic management including immunizations supporting health promotion. Criteria for consultation and indications for referral along with exploration of available community resources will also be considered.

Lab Hours: 1 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Major Restrictions: Pediatric Nurse Practitioner **Degree Restrictions:** Doctor of Nursing Practice

Schedule Type (Primary): Supervised Lab/Clinic

Additional Course Fee: Nursing Skills Lab Fee (ACNP, NP, DNP, PNP) **Fee Type:** Flat Fee **Fee Amount:** \$ 150

NURS 8324 - PNP II: Management of Acute and Common Health Problems of Children from Birth through Adolescence (3 Credit Hours)

This course is designed to prepare pediatric nurse practitioners (PNP) to assume responsibility for health promotion, health maintenance and management of acute and common health problems of children from birth to adolescence. Emphasis is on the child within the framework of the family. Emphasis is on the description of the condition or disease, etiology and incidence, critical findings, differential diagnosis, management, complications, and preventative and patient education measures. Consideration is given to cultural and ethical issues that affect health care delivery and client adherence to management plan. The role of the PNP regarding management, family involvement, health promotion and teaching, health maintenance, and continued collaboration with health professionals will be emphasized.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Post Masters Certificate, Doctor of Nursing Practice **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

NURS 8325 - PNP Practice II: for the DNP Program (3 Credit Hours)

This course provides the students with clinical experience within the scope of the pediatric nurse practitioner (PNP) centered on health promotion, health maintenance and management of acute and common health problems of children from birth to adolescence. Emphasis is on the child within the framework of the family. Emphasis is on the description of the condition or disease, etiology and incidence, clinical findings, differential diagnosis, management, complications, and preventative and patient education measures. Consideration is given to cultural and ethical issues that affect health care delivery and client adherence to the management plan. The role of the PNP regarding management, family involvement, health promotion and teaching, health maintenance, and continued collaboration with health professionals will be emphasized.

Other Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Major Restrictions: Pediatric Nurse Practitioner **Degree Restrictions:** Doctor of Nursing Practice **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Supervised Lab/Clinic

NURS 8327 - PNP III: Management of Chronic Health Problems of Children from Birth through Adolescence (3 Credit Hours)

This course is designed to prepare pediatric nurse practitioners (PNP) to identify potential and actual chronic health problems and to provide direct care, teaching, and management to children and families experiencing complex, lifelong processes. Emphasis is on the child within the framework of the family. Emphasis is on the description of the condition or disease, etiology and incidence, clinical findings, differential diagnosis, management, complications, and preventative and patient education measures. Consideration is given to cultural and ethical issues that affect health care delivery and client adherence to the management plan. The role of the PNP regarding management, family involvement, health promotion and teaching, health maintenance, and continued collaboration with health professionals will be emphasized.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Post Masters Certificate, Doctor of Nursing Practice

Schedule Type (Primary): Asynchronous Instruction

NURS 8328 - PNP Practice III: for the DNP Program (4 Credit Hours)

This course provides the student with clinical experience within the scope of the pediatric nurse practitioner (PNP). Clinic experiences are designed to prepare pediatric nurse practitioners to identify potential and actual chronic health problems and to provide direct care, teaching, and management to children and families experiencing complex, lifelong processes. Emphasis is on the child within the

framework of the family. Emphasis is on the description of the condition or disease, etiology and incidence, clinical findings, differential diagnosis, management, complications, and preventative and patient education measures. Consideration is given to cultural and ethical issues that affect health care delivery and client adherence to the management plan. The role of the PNP regarding management, family involvement, health promotion and teaching, health maintenance, and continued collaboration with health professionals will be emphasized.

Other Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Major Restrictions: Pediatric Nurse Practitioner **Degree Restrictions:** Doctor of Nursing Practice

Schedule Type (Primary): Supervised Lab/Clinic

NURS 8331 - Adult Gerontology ACNPI: Health Promotion and Management of Chronic Disease in the Adult and Older Adult (3 Credit Hours)

Prepares adult gerontology acute care nurse practitioner students to assume responsibility for health promotion, health maintenance, disease prevention, and the management of stable common acute and chronic health problems of adults and older adults. Discussion includes evidence-based non-pharmacologic and pharmacologic management of common health problems in the adult and older adult population. Criteria for consultation and indications for referral along with exploration of available community resources is also considered.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Program Restrictions: DNP_DNP - DNP-Doctor of Nursing Practice, CERM_ACNP - CERM-Cert Acute Care Nurse Pra

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

NURS 8332 - Adult Gerontology ACNP Practice I: for the DNP Program (4 Credit Hours)

This course provides the student with clinical experiences to prepare adult gerontology acute care nurse practitioners to assume responsibility for health promotion, health maintenance, disease prevention, and the management of common acute and chronic health problems of adults and older adults. Discussion will include non-pharmacologic and pharmacologic management of common health problems in the adult and older adult population. Criteria for consultation and indications for referral along with exploration of available community resources will also be considered.

Corequisite(s): NURS8331

Lab Hours: 1 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Major Restrictions: Acute Care, Adult Geront. Acute Care NP **Degree Restrictions:** Doctor of Nursing Practice

Schedule Type (Primary): Supervised Lab/Clinic

Additional Course Fee: Nursing Skills Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 150

NURS 8333 - Adult Gerontology ACNP Practice I: for Post-Graduate Certificate (3 Credit Hours)

This course provides the student with clinical experiences to prepare adult gerontology acute care nurse practitioners to assume responsibility for health promotion, health maintenance, disease prevention, and the management of common acute and chronic health problems of adults and older adults. Discussion will include non-pharmacologic and pharmacologic management of common health problems in the adult and older adult population. Criteria for consultation and indications for referral along with exploration of available community resources will also be considered.

Corequisite(s): NURS8331

Lab Hours: 1 **Contact Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Major Restrictions: Adult Geront Acute Care NP **Degree Restrictions:** Post Masters Certificate

Schedule Type (Primary): Supervised Lab/Clinic

Additional Course Fee: Nursing Skills Lab Fee (ACNP, NP, DNP, PNP) **Fee Type:** Flat Fee **Fee Amount:** \$ 150

NURS 8334 - Adult Gerontology ACNPII: Evidence-Based Management for Urgent and Emergent Health Problems in Adult (3 Credit Hours)

The second AG-ACNP clinical course focuses on the assessment and management of adults and older adults with urgent and emergent health conditions. Students strengthen their understanding of foundational physiologic concepts through application of care to clients with decreased stability and resiliency with complex disease. Analysis, synthesis and critique of the latest research facilitate students understanding and ability to provide up-to-date, evidence based care.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Post Masters Certificate, Doctor of Nursing Practice

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

NURS 8335 - Adult Gerontology ACNP Practice II: for the DNP Program (4 Credit Hours)

This course provides the student with clinical experiences to apply and synthesize advanced practice nursing knowledge and skills with adults and older adults with complex urgent and emergent health care needs.

Lab Hours: 1 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Major Restrictions: Adult Geront. Acute Care NP **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Supervised Lab/Clinic

Additional Course Fee: Nursing Skills Lab Fee (ACNP, NP, DNP, PNP) **Fee Type:** Flat Fee **Fee Amount:** \$ 150

NURS 8337 - Adult Gerontology ACNP III: Advanced Concepts in Complex Illness (3 Credit Hours)

The third acute care clinical course builds on application of previous coursework and in the evidence based management of highly complex, acutely ill adult and older adult patients. Focus on making decisions in a rapidly changing clinical environment considering patient, family, and systems level issues is emphasized.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: CERM_ACNP-Cert in Acute Care Nurse Pract, DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

NURS 8338 - Adult Gerontology ACNP Practice III: for the DNP Program (4 Credit Hours)

This course provides the student with clinical experiences to apply and synthesize evidence based advanced practice nursing knowledge and skills with adults with complex and rapidly changing health care needs.

Contact Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Major Restrictions: Adult Geront. Acute Care NP **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Supervised Lab/Clinic

NURS 8340 - Theoretical Foundations for Advanced Practice Psychiatric Mental Health Nursing Across the Lifespan (3 Credit Hours)

This course provides an orientation to the professional and scientific foundations of advanced practice psychiatric nursing across the lifespan. The evolving role of advanced practice psychiatric nurses is placed in the context of the current health care system. Focus is on explanatory models of mental health and psychiatric mental health nursing across the lifespan. The course will emphasize research evidence from genetics, epidemiology, neurosciences, and behavioral sciences underlying mental health promotion and preventive interventions, and evidence-based treatments for psychiatric and substance use conditions. Translation of evidence in advanced practice psychiatric nursing is emphasized.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: CERM_PNUR-Cert Psys and Mental Health NP, DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Asynchronous Instruction

NURS 8341 - Advanced Psychiatric Mental Health Nursing for Individuals Across the Lifespan (3 Credit Hours)

This course presents theoretical concepts and empirical evidence related to psychotherapeutic interventions with selected patient populations across the lifespan. Focus is on evidence-based individual interventions for selected developmental, mental, and substance use conditions across the lifespan.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: CERM_PNUR-Cert Psyc and Mental Health NP, DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

NURS 8342 - PMHNP Practice I: for the DNP Program (4 Credit Hours)

This course provides opportunities to apply the knowledge and skills gained in NURS 7348 in clinical practice. Students assess individuals and diagnose mental and substance use disorders across the lifespan. Students select, implement and evaluate evidence-based educational and psychotherapeutic interventions for children, adolescents, adults, and older adults with selected disorders. Students participate in individual and peer supervision sessions.

Lab Hours: 1 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Major Restrictions: Psych/Mental Health NP **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Supervised Lab/Clinic

Additional Course Fee: Nursing Skills Lab Fee (ACNP, NP, DNP, PNP) **Fee Type:** Flat Fee **Fee Amount:** \$ 150

NURS 8344 - Advanced Psychiatric Mental Health Nursing for Families and Groups Across the Lifespan (3 Credit Hours)

This course presents theoretical concepts and empirical evidence related to family and group interventions with selected patient populations across the lifespan. Focus will be on evidence based practices for family and group interventions. Major theoretical models of family therapy are analyzed with emphasis on systems theory and contextual issues. Models of group therapy are examined, with emphasis on group leadership styles, group roles, and therapeutic techniques appropriate to the purpose and composition of therapeutic groups. Influence of individual client factors and group characteristics on group process and function are examined throughout the course. Community aspects, including the client's sociocultural, ethnic, and economic backgrounds are integrated throughout the course.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: CERM_PNUR-Cert Psyc and Mental Health NP, DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

NURS 8345 - PMHNP Practice II: for the DNP Program (3 Credit Hours)

This course provides opportunities to apply knowledge and skills gained in NURS 8342 to clinical practice. The focus is on evidence based practices for family and group therapy interventions for clients with selected mental and substance use disorders. Students assess individuals and families, and select appropriate educational and psychotherapeutic interventions for couples and/or families with mental health or substance use conditions. Students implement and evaluate evidence-based treatments for families across the lifespan. Students participate in group therapy as leader or co-leader of educational, skill building, support, or therapy groups. Students participate in at least one group for children or adolescents, and at least one psychotherapy therapy group for adults. Students participate in individual and peer group supervision sessions facilitated by faculty and/or preceptors.

Prerequisite(s): NURS 8341 >= B and NURS 8342 >= S

Corequisite(s): NURS 8344

Lab Hours: 0 **Other Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Major Restrictions: Psych/Mental Health NP **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Supervised Lab/Clinic

NURS 8348 - PMHNP Practice III: for the DNP Program (4 Credit Hours)

This course provides opportunities to apply knowledge and skills gained in NURS 7352 to clinical practice. The focus is on evidence-based practices for family and group therapy interventions for clients with selected mental and substance use disorders. Students assess individuals and families, and select appropriate educational and psychotherapeutic interventions for couples and/or families with mental health or substance use conditions. Students implement and evaluate evidence-based treatments for families across the lifespan. Students participate in group therapy as leader or co-leader of educational, skill building, support, or therapy groups. Students participate in at least one group for children or adolescents, and at least one psychotherapy therapy group for adults. Students participate in individual and peer group supervision sessions facilitated by faculty and/or preceptors.

Prerequisite(s): NURS 8345 >= S

Other Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Major Restrictions: Psych/Mental Health NP **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Supervised Lab/Clinic

NURS 8350 - PMHNP Practice I: for Accelerated Post-Graduate Certificate (3 Credit Hours)

This course provides opportunities to apply the knowledge and skills gained in NURS 8341 in clinical practice. Students assess individuals and diagnose mental and substance use disorders across the lifespan. Students select, implement and evaluate evidence based educational and psychotherapeutic interventions for children, adolescents, adults, and older adults with selected disorders. Students participate in individual and peer supervision sessions.

Corequisite(s): NURS 8341

Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Supervised Lab/Clinic

NURS 8352 - PMHNP Practice III: for Accelerated Post-Graduate Certificate (3 Credit Hours)

Provides opportunities to apply the knowledge and skills gained in the preceding courses to clinical practice. Focus is on designing, implementing, and evaluating the psychiatric mental health nurse practitioner role with individuals across the lifespan in selected settings. The role of the psychiatric mental health nurse practitioner in psychiatric emergencies and in integrated care settings is included.

Prerequisite(s): NURS 8351 >= B

Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: College of Nursing **Major Restrictions:** Psych/Mental Health Nursing **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Post Masters Certificate **Program Restrictions:** CERM_PNUR-Cert Psyc and Mental Health NP **Campus Restrictions:** Athens Campus, Main Campus, Web

Schedule Type (Primary): Supervised Lab/Clinic

NURS 8353 - FNP Practice II: for Post-Graduate Certificate (3 Credit Hours)

This course provides the student with clinical experiences within the scope of the family nurse practitioner centered on health promotion, maintenance, and management of common acute and chronic health problems of infants, children, and adolescents in primary health care settings. Emphasis is on the description of the condition or disease, etiology and incidence, clinical findings, differential diagnosis, management, complications, and preventive and patient education measures. Consideration is given to cultural and ethical issues that affect families, and health care delivery.

Prerequisite(s): NURS 8311 >= B and NURS 8313 >= B

Corequisite(s): NURS 8314

Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: College of Nursing **Student Class Restrictions:** Graduate-Semester **Program Restrictions:** CERM_FNUP-Cert in Family Nurse Pract **Campus Restrictions:** Athens Campus, Main Campus

Schedule Type (Primary): Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

NURS 8354 - FNP Practice III: for Post-Graduate Certificate (4 Credit Hours)

This course provides the student with clinical experiences within the scope of the family nurse practitioner centered on health promotion, disease prevention, early detection, and management of common acute and chronic health problems of the elderly client and their family. The nurse practitioner's role in promoting successful aging, maintaining function and promoting self care, through the use of the community, personal, and family resources is stressed. Common geriatric syndromes and problems, including chronic illnesses and their management, are emphasized. Ethical dilemmas that impact the healthcare of the older adult are integrated throughout the course.

Prerequisite(s): NURS 8314 >= B and NURS 8353 >= B

Corequisite(s): NURS 8317

Contact Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: College of Nursing **Major Restrictions:** Family Nurse Practitioner **Student Class Restrictions:** Graduate-Semester **Program Restrictions:** CERM_FNUP-Cert in Family Nurse Pract **Campus Restrictions:** Athens Campus, Main Campus

Schedule Type (Primary): Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

NURS 8355 - PNP Practice I: for Post-Graduate Certificate (4 Credit Hours)

This course provides the student with clinical experiences within the scope of the pediatric nurse practitioner centered on preventive health care, health promotion and maintenance, and the health care management of children from birth to adolescence. Emphasis is on the child within the framework of the family. Stages of development will be examined and explored from biological, psychosocial, sociocultural, and environmental influences on the developing child. Consideration is given to cultural and ethical issues that affect children, families, and health care delivery. Discussion will include non-pharmacologic and pharmacologic management including immunizations supporting health promotion. Criteria for consultation and indications for referral along with exploration of available community resources will also be considered.

Corequisite(s): NURS8321

Lab Hours: 1 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

NURS 8356 - PNP Practice II: for Post-Graduate Certificate (3 Credit Hours)

This course provides the student with clinical experiences within the scope of the pediatric nurse practitioner (PNP) centered on health promotion, health maintenance and management of acute and common health problems of children from birth to adolescence.

Emphasis is on the child within the framework of the family. Emphasis is on the description of the condition or disease, etiology and incidence, clinical findings, differential diagnosis, management, complications, preventive and patient education measures. Discussion will include non-pharmacologic and pharmacologic management of acute and common health problems including immunizations in support of health promotion and maintenance. Consideration is given to cultural and ethical issues that affect children, families, and healthcare delivery. The role of the PNP regarding management, family involvement, health promotion and teaching, health maintenance, and continued collaboration with health professionals will be emphasized.

Prerequisite(s): NURS 8321 >= B and NURS 8355 >= B

Corequisite(s): NURS 8324

Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Supervised Lab/Clinic

NURS 8360 - Advanced Pharmacology for Nursing Anesthesia II (3 Credit Hours)

This advanced course provides the graduate nurse anesthesia student with an in-depth knowledge and comprehensive of pharmacology and its application in the advanced practice role of nurse anesthesia. A comprehensive exploration of advanced pharmacological principles including pharmacokinetics and pharmacodynamics of inhaled and injected drugs used in advanced nurse anesthesia practice are emphasized throughout the course.

Prerequisite(s): NURS 7831 >= B

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Nursing Anesthesia **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Lecture

NURS 8361 - Advanced Principles of Nursing Anesthesia II (4 Credit Hours)

This course offers a continuation of advanced principles of nurse anesthesia care. Building upon previous knowledge physiologic, pharmacologic, and advanced anesthetic principles, this course will provide the student a structured and systematic approach to the planning, preparation, and provision of anesthesia care for patients with increasing complex pathology and/or increasingly complex surgical procedures that is individualized for the obstetric and pediatric patient. Emphasis will be on providing the student a comprehensive and integrated overview of unique physiologic and pathologic states of primary body systems through the lifespan related to the provision of anesthesia care to the patients undergoing complex cardiovascular, thoracic, intracranial, extracranial, and transplant procedures. Anesthetic considerations and management of the obstetric and pediatric patient, as well as the special needs of the trauma and burn patient will also be examined in great detail. Simulation-based methodologies are heavily integrated into the course, providing that the student a simulated anesthetizing environment for application and synthesis of advanced anesthesia principles to operationalize theoretical and critical thinking concepts. Lecture topics will be assimilated into high fidelity simulation scenarios to prepare the student for clinical residency courses. Students will develop problem solving and decision-making skills during all phases of anesthetic management by participating in case preparation and discussions, actual management of selected case scenarios, and review and discussion of their performance. Acute crisis management education is explored.

Prerequisite(s): NURS 7835 >= B

Lecture Hours: 3 **Lab Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Nursing Anesthesia **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

NURS 8362 - Techniques and Technologies in Nursing Anesthesia II (4 Credit Hours)

This course provides the student with a comprehensive overview of the technical aspects of neuraxial, epidural, and regional anesthesia modalities as well as point of care ultrasound, pain management, and radiological modalities commonly used in nurse anesthesia practice. Emphasis will be placed on a comprehensive overview of concepts and techniques essential to clinical nurse anesthesia practice focusing on the theoretical and practical considerations involved in the administration and management regional anesthesia and pain management as it relates to the field of anesthesia. Advantages and disadvantages of various pain management approaches, as well as general physiologic and anatomic concepts as they relate to pain, will be covered. The fundamentals of radiologic and ultrasound principles and various techniques are also discussed. This course also includes practice in and evaluation of task specific skills utilizing skill trainers and simulation to maximize students direct contact to the instrumentation of the profession with the goal of developing vigilant providers that practice with high integrity.

Prerequisite(s): NURS 7836 >= B

Lecture Hours: 3 **Lab Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Nursing Anesthesia **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

NURS 8363 - Nursing Anesthesia Clinical Practicum II (10 Credit Hours)

This second clinical course is designed to allow the student to utilize the didactic and simulation concepts received during the first four didactic semesters and the first clinical course of nursing anesthesia program to develop and manage a comprehensive anesthetic plan that encompasses the patient's social, physical, and mental health at a higher level of understanding and experience. Emphasis is placed on anesthesia techniques specific to cardiovascular, thoracic, neuroanesthesia, obstetric, pediatric and critically ill populations. These clinical experiences will occur in collaboration with a certified registered nurse anesthetist and/or anesthesiologist.

Prerequisite(s): NURS 7837 >= B

Contact Hours: 10

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Nursing Anesthesia **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Internship/Practicum

NURS 8364 - Nursing Anesthesia Clinical Practicum III (8 Credit Hours)

This third clinical course is designed to allow the student to utilize the didactic and simulation concepts received during the first four didactic semesters and the two clinical courses of the nursing anesthesia program to continue to develop and manage a comprehensive anesthetic plan that encompasses the patient's social, physical, and mental health at a higher level of understanding and experience. Emphasis is placed on honing the anesthesia skills necessary for entry-level practice. These clinical experiences will

occur in collaboration with a certified registered nurse anesthetist and/or anesthesiologist.

Prerequisite(s): NURS 8363 >= B

Contact Hours: 8

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Nursing Anesthesia **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Supervised Lab/Clinic

NURS 8370 - Adult Gerontology Acute Care ACNP Practice II: for Post-Graduate Certificate (4 Credit Hours)

This course provides the student with clinical experiences to apply and synthesize advanced practice nursing knowledge and skills with adults and older adults with complex urgent and emergent health care needs.

Prerequisite(s): NURS 8331 >= B and NURS 8333 >= S

Corequisite(s): NURS8334

Lab Hours: 1 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: College of Nursing **Major Restrictions:** Adult Geront Acute Care NP **Student Class Restrictions:** Graduate-

Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Post Masters Certificate **Program Restrictions:**

CERM_ACNP-Cert in Acute Care Nurse Pract **Campus Restrictions:** Athens Campus, Main Campus, Web

Schedule Type (Primary): Supervised Lab/Clinic

Additional Course Fee: Nursing Skills Lab Fee (ACNP, NP, DNP, PNP) **Fee Type:** Flat Fee **Fee Amount:** \$ 150

NURS 8371 - Adult Gerontology Acute Care Practice III: for Post-Graduate Certificate (4 Credit Hours)

This course provides the student with clinical experiences to apply and synthesize evidence based advanced practice nursing knowledge and skills with adults with complex and rapidly changing health care needs.

Prerequisite(s): NURS 8334 >= B and NURS 8370 >= S

Corequisite(s): NURS 8337

Contact Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: College of Nursing **Major Restrictions:** ACNP - Adult Gerontology Acute Care Nurse Practitioner **Student**

Class Restrictions: Graduate-Semester **Campus Restrictions:** Athens Campus, Main Campus, Web

Schedule Type (Primary): Supervised Lab/Clinic

NURS 8500 - Philosophical Foundations of Nursing Science (3 Credit Hours)

This doctoral course is designed to assist the student in analyzing major philosophies of science as foundations for nursing knowledge. The general course focus will be on the influence and applicability to nursing of a variety of positivist, post-positivist, and post-modern views on the nature of scientific progress. Students will critically examine the claims of various conceptualizations of the natural and social sciences with a focus on distinctions in epistemology and ontology. Implications for nursing science will be emphasized.

Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** DPHIL_NURS-Nursing

Schedule Type (Primary): Asynchronous Instruction **Schedule Type (Additional):** Lecture

NURS 8510 - Theory Development for Health Inquiry (3 Credit Hours)

In this course, students advance their knowledge of theory development relative to statements and questions about health topics. The student explores in-depth analysis and definition of concepts and examines approaches to theory. Emphasis is placed on the development of a conceptual design demonstrating links between theoretical concepts and research processes.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** DPHIL_NURS-Nursing

Schedule Type (Primary): Asynchronous Instruction **Schedule Type (Additional):** Lecture

NURS 8550 - Evidence-Based Practice: Translation and Application (4 Credit Hours)

Evidence-based practice (EBP) has been defined as the conscientious, explicit, and judicious use of current best evidence in making decisions about the care of individual patients, groups, and communities. The practice of evidence-based medicine means integrating individual clinical expertise with the best available external clinical evidence from systematic research. The course utilizes the scientific methods used in EBP and the application of these methods to healthcare delivery and clinical issues.

Prerequisite(s): NURS 7150 >= C

Lecture Hours: 3 **Other Hours:** 1 **Contact Hours:** 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Doctor of Nursing Practice

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

NURS 8551 - Complex Issues in Health Care Delivery (2 Credit Hours)

Health and health care are complex, multilayered concepts. Understanding and effectively managing ethical and social implications are essential for improving health outcomes. Bioethical issues and their implications in current and future health care venues are examined in areas such as social justice and the distribution of limited resources, health disparities, patient rights, and in health care. Issues such as trust, stigma, and power in relation to the impact on the provider/client relationship and health care outcomes are analyzed. Students will apply theory and research related to health disparity and vulnerable populations. Challenges and strategies for improving health care outcomes for these groups will be explored including cultural and linguistic competency, social and environmental justice, and patient advocacy.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Doctor of Nursing Practice

Schedule Type (Primary): Asynchronous Instruction

NURS 8610 - Quantitative Research Designs and Methods (3 Credit Hours)

This course provides students with an overview of explanatory and predictive quantitative research designs. The major research designs used in laboratory, clinical and field settings will provide the foundation for this course. Advantages and disadvantages and sources of error for each research design will be provided. Students will have the opportunity to apply design principles through the development of a proposal.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** DPHIL_NURS-Nursing

Schedule Type (Primary): Asynchronous Instruction **Schedule Type (Additional):** Lecture

NURS 8620 - Measurement in Health Research (3 Credit Hours)

This course will provide students with a detailed analysis of measurement used in nursing science and other health related research. An introduction to psychometric theory will be provided. The impact of population characteristics, environmental restraints and ethical principles on measurement and operationalization of nursing concepts used in the study of clinical problems and populations will be included.

Prerequisite(s): NURS 8610

Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** DPHIL_NURS-Nursing

Schedule Type (Primary): Asynchronous Instruction **Schedule Type (Additional):** Lecture

NURS 8650 - Qualitative Design and Analysis (3 Credit Hours)

This course will focus on a critical analysis of the epistemological basis of the qualitative paradigms. Emphasis includes research design, data collection, analysis, interpretation and evaluation.

Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** DPHIL_NURS-Nursing

Schedule Type (Primary): Asynchronous Instruction **Schedule Type (Additional):** Lecture

NURS 8660 - Research Residency (4 Credit Hours)

This course offers an introduction to the research topics currently being investigated by nursing and interdisciplinary sciences graduate faculty (e.g. biomedical, clinical, translational faculty). In addition, students receive individualized instruction from an independent investigator in a research program or laboratory. Students are expected to master at least one research-related technique and become familiar with the various activities expected of an independently-funded investigator. Prerequisite(s): Admission to research focused doctoral program.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

NURS 8661 - Health Care Finance and Economics for the Nurse Executive (3 Credit Hours)

This course focuses on the analysis of health care operations and planning decisions derived from the theoretical concepts of demand, cost production, profit and competition. External and internal forces challenging health care services are analyzed. Organizational effectiveness and efficiency within the complex health care environment are emphasized, in addition, to providing the foundation for integrating health care finance and managerial accounting. Opportunities for analyzing current and emerging health care financing trends are provided. Practical cost-benefit strategies used in planning, controlling and preparing internal and external reports are emphasized.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Nursing Practice **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Asynchronous Instruction

NURS 8662 - Quality Improvement and Risk Management: Initiatives and Strategies for the Nurse Executive (2 Credit Hours)

This course examines an interdisciplinary, systematic approach to healthcare outcomes and risk management practices. Assurance of quality health services and organizational risk control is discussed using industry benchmark and accreditation standards and processes.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Nursing Practice **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Asynchronous Instruction

NURS 8663 - Strategic Planning and Marketing in Health Care (2 Credit Hours)

This course provides students with a strong foundation in the concepts of strategic management enabling them to implement the process in a wide variety of leadership positions in health care organizations and systems. This course focuses upon the visioning and modeling of services and programs, both anticipatory and responsive, utilizing market-driven information. Students integrate theories from economics, information management, finance and leadership, culminating in the generation of a comprehensive business plan.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Nursing Practice **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Asynchronous Instruction

NURS 8850 - Patient Safety and Provider Performance (3 Credit Hours)

This course explores incidence, classification, and causes of iatrogenic disease. Systems-based strategies for the promotion of patient safety and error reduction will be discussed. Students will explore intrapersonal, social, and environmental factors influencing patient safety. Researchable questions and hypotheses pertaining to the promotion of patient safety will be developed.

Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School

Schedule Type (Primary): Seminar - Small Group

NURS 8860 - Critical Analysis of Health Behavior Theories for Research (3 Credit Hours)

This course will focus on critically analyzing behavioral theories for their application in conducting research. The analysis will include examining the historical development, underlying assumptions, concepts, and relational statements as they have been applied in research in a variety of scientific domains. Health behavior theories will be examined to determine their internal consistency and external application to a variety of health and healthcare areas. Specific areas of research that were based on the theoretical perspectives will be examined and critiqued.

Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Seminar - Small Group

NURS 8870 - Theory and Research in Health Disparities (3 Credit Hours)

Disparities in health and quality of life between those who do and those who do not have access to resources have become more pronounced in their effect over time. These long-term effects pose a challenge to health scientists to conduct research on health disparities in their local, national, and global communities. Such community-driven research requires researchers to understand the history, attributions of cause, and theoretical approaches to the study of health disparities. Such research also requires modification of philosophical and methodological approaches used in more traditional research. In this course, the student will learn philosophical, conceptual and methodological approaches to health disparities and will design a research proposal that has the potential for describing and/or intervening in an aspect of a health problem in a selected vulnerable population.

Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School

Schedule Type (Primary): Seminar **Schedule Type (Additional):** Small Group, Asynchronous Instruction

NURS 8880 - Clinical Outcomes Research (3 Credit Hours)

This doctoral courses provides an opportunity for concentrated study of clinical outcomes research in nursing and related disciplines with an emphasis on clinical trial design in the testing of theory-driven interventions. The use of conceptual models in models in intervention research to guide the formulation of interventions and selection of appropriate clinical outcomes is addressed. Major topics in the course include the selection and evaluation of various clinical outcome measures, and analysis of outcome data. Feasibility issues related to the conduct of clinical research in formal clinical settings and informal community settings will be analyzed.

Alternatives to traditional clinical trial design for clinical research will also be considered.

Prerequisite(s): NURS 8610 and NURS 8650 and STAT 7010

Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Seminar - Small Group

NURS 9020 - Special Topics (1 to 9 Credit Hours)

This course, designed for students in a research-focused doctoral program, provides two or more doctoral students the opportunity to study a special topic under supervision of faculty. The course is designed for in-depth study of topics for which other coursework is not available.

Contact Hours: 1 to 9

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School

Schedule Type (Primary): Seminar **Schedule Type (Additional):** Small Group, Asynchronous Instruction

NURS 9050 - Strategies for Effective Practice Change - Proposal (2 Credit Hours)

This course guides students through the development of a feasible and ethically sound practice change project within a clinical partnership. Students formulate specific aims and measurable outcomes aligned with national benchmarks and standards. Emphasis is placed on selecting appropriate tools and statistical methods to evaluate project effectiveness, integrate evidence-based principles, and apply ethical frameworks. Learners will also engage in critical reflection to assess their progress in meeting current AACN competencies for advanced practice nurses.

Prerequisite(s): NURS 8550 >=C

Corequisite(s): NURS 9060 >=C

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Doctor of Nursing Practice

Schedule Type (Primary): Lecture

NURS 9051 - DNP Project Inquiry and Change (1 to 8 Credit Hours)

In this series of courses students will develop, implement, and evaluate a practice change project under the guidance of a project committee. Students will work in partnership with their target population, community, and health care systems throughout the project process. They will also participate in peer review projects. Students will discuss alternative approaches, problems, and resolutions of issues that they have encountered during the development and implementation of their projects. Students will also develop and demonstrate refined assessment skills and apply biophysical, psychosocial, behavioral, sociopolitical, cultural, economic, and nursing science as appropriate to develop expertise and scholarly practice in their area of specialization. These settings provide the environment in which the advanced practice DNP project will be implemented and evaluated.

Lecture Hours: 1 **Lab Hours:** 1 to 7

Repeatability: May be repeated for credit up to eight times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Degree Restrictions: Doctor of Nursing Practice

Schedule Type (Primary): Asynchronous Instruction

NURS 9052 - Practice Inquiry and Change (Nurse Executive Track) (1 to 8 Credit Hours)

In this series of courses, students will develop, implement and evaluate a practice change project under the guidance of project committee. Students will work in partnership with their target population, community and health care systems throughout the project process. They will also participate in peer review of projects. Students will discuss alternative problems, approaches, and resolutions of issues that they have encountered during the development and implementation of their projects. Students will also develop and demonstrate refined assessment skills and apply biophysical, psychosocial, behavioral, sociopolitical, cultural, economic, and nursing science as appropriate to develop expertise and scholarly practice in their area of specialization through a residency experience with an

experienced preceptor/mentor. These settings provide the environment in which the advanced practice DNP project will be implemented and evaluated.

Lecture Hours: 1

Repeatability: May be repeated for credit up to three times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Degree Restrictions: Doctor of Nursing Practice

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

NURS 9060 - Practice Inquiry and Change Design (2 Credit Hours)

In this course, students will design the practice change project proposed in NURS 9050 under the guidance of their project faculty advisor. Students will work in partnership with their target population, community, and health care systems throughout the project design process. Students will integrate leadership and collaborative skills when addressing alternative problems, approaches, and resolutions of issues that they have encountered during the development of their projects. Students will complete 60 residency hours in this course.

Prerequisite(s): NURS 8550 >= C

Corequisite(s): NURS 9050 >= C

Lecture Hours: 1 **Other Hours:** 1 **Contact Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Program Restrictions: DNP_DNP DNP-Doctor of Nursing Practice

NURS 9061 - Practice Inquiry and Change Implementation (3 to 8 Credit Hours)

In this course, students will implement their practice change project developed in NURS 9060 under the guidance of their project faculty advisor. Students will optimize team effectiveness to ensure sustainability of the change initiative and draft the implementation section of their final project. Through critical reflection, students will assess their progress in meeting current AACN competencies for advanced practice nurses during the implementation phase. Students will complete 120 residency hours in this course.

Prerequisite(s): NURS 9060 >= C

Lecture Hours: 1 **Lab Hours:** 0 **Other Hours:** 2 to 7 **Contact Hours:** 3 to 8

Grade Mode: Satisfactory/Unsatisfactory

Program Restrictions: ZDNP_DNP Doctor of Nursing Practice, DNP_DNP DNP-Doctor of Nursing Practice

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

NURS 9062 - Practice Inquiry and Change Dissemination (2 to 8 Credit Hours)

In this culminating course, students disseminate the practice change project implemented in NURS 9061 under the guidance of their project faculty advisor. Students finalize a scholarly manuscript and professional poster reflecting their work with their targeted population, community, and healthcare systems. Through critical reflection, students evaluate achievement of current AACN competencies for advanced practice nurses in the dissemination phase, demonstrating leadership and scholarly contribution to nursing practice. Students will complete 60 residency hours in this course.

Prerequisite(s): NURS 9061 >= C

Lecture Hours: 1 **Lab Hours:** 0 **Other Hours:** 1 to 7 **Contact Hours:** 2 to 8

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Lecture

NURS 9191 - APRN Practice Synthesis (2 Credit Hours)

In this course, students explore the full scope of responsibility inherent in the APRN role. Resumes and components of oral and written communication are developed. Professional portfolios are created and evaluated for integration of advanced practice exemplars. Exemplars include advanced nursing knowledge, assessment skills, diagnosis, interventions, and evaluation of healthcare outcomes in patients, families and communities. In preparation for certification exams, a full review of population focus material is provided with practice board exams.

Lecture Hours: 2 **Contact Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Post Masters Certificate, Doctor of Nursing Practice

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

NURS 9192 - Advanced Practice Nursing Program Practicum - for DNP Program (4 Credit Hours)

This course provides the student with terminal clinical practicum experiences in preparation for graduation from an advanced practice program. Students are expected to embrace the full scope of advanced practice nursing practice in conjunction with a preceptor. Students apply evidence-based practice knowledge and skills in collaborative settings that support interdisciplinary learning and practice.

Corequisite(s): NURS 9191

Lab Hours: 4 **Contact Hours:** 4

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Subject Restrictions: NURS - Nursing **Degree Restrictions:** DNP - Doctor of Nursing Practice

Schedule Type (Primary): Internship/Practicum

NURS 9193 - Advanced Practice Nursing Practicum for Post-Graduate Certificate (3 Credit Hours)

This course provides the student with terminal clinical practicum experience in preparation for graduation from an advanced practice certificate program. Students are expected to embrace the full scope of advanced practice nursing practice in conjunction with a preceptor. Students apply evidence base practice knowledge and skills in collaborative settings that support interprofessional learning and practice.

Lab Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Degree Restrictions: Post Masters Certificate

Schedule Type (Primary): Supervised Lab/Clinic

NURS 9194 - Rural Anesthesia Perspectives Practicum (3 Credit Hours)

Clinical experience is provided in the administration of anesthesia to rural and medically underserved populations. Emphasis is placed on developing the student's anesthesia skills and ability to function with a greater degree of independence. Requirements for comprehensive anesthesia care services in rural and medically underserved communities are explored. These clinical experiences will occur in collaboration with a certified registered nurse anesthetist and/or anesthesiologist.

Prerequisite(s): NURS 8363 >= B

Lecture Hours: 1 **Contact Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Nursing Anesthesia **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

NURS 9195 - Nursing Anesthesia Specialty Practicum I (10 Credit Hours)

This clinical practicum allows the student to utilize the didactic and simulation concepts of the nursing anesthesia program to prioritize, develop and administer an anesthetic to patients in all ASA classifications and in a variety of anesthesia care model settings. Emphasis is placed on honing the anesthesia skills and developing independence necessary for entry-level practice. These clinical experiences will occur in collaboration with a certified registered nurse anesthetist and/or anesthesiologist. Students will complete 600 practicum hours during this course.

Prerequisite(s): NURS 8363 >= B

Other Hours: 10 **Contact Hours:** 10

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Nursing Anesthesia **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Internship/Practicum

NURS 9196 - Nursing Anesthesia Specialty Practicum II (10 Credit Hours)

This fourth clinical course occurs simultaneously with Rural Anesthesia Perspectives Practicum and DNP residency to make a total of four days clinical per week. It is designed to allow the students to utilize the didactic and simulations concepts of the nursing anesthesia program to prioritize, develop and administer an anesthetic to patients in all ASA classifications and in a variety of anesthesia care model settings. Emphasis is placed on honing the anesthesia skills and developing independence necessary for entry-level practice. These clinical experiences will occur in collaboration with a certified registered nurse anesthetist and/or nurse anesthesiologist.

Prerequisite(s): NURS 9195 >= B

Contact Hours: 10

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Major Restrictions: Nursing Anesthesia **Program Restrictions:** DNP_DNP DNP-Doctor of Nursing Practice

Schedule Type (Primary): Internship/Practicum

NURS 9197 - Nursing Anesthesiology Synthesis Course I (1 Credit Hour)

This advanced course is a didactic and clinical synthesis course; whereby, the learner connects clinical experiences with didactic material presented in nursing anesthesia core courses. Students use inductive and deductive reasoning as they review anesthesia-based case studies and NBCRNA board review questions.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Major Restrictions:** Nursing Anesthesia **Degree Restrictions:** Doctor of Nursing Practice

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

NURS 9198 - Nursing Anesthesiology Synthesis Course II (1 Credit Hour)

This advanced course is a didactic and clinical synthesis course; whereby, the learner will connect clinical experiences with didactic material presented in nursing anesthesia core courses. Students will use inductive and deductive reasoning as they review anesthesia-based case studies and NBCRNA board review questions.

Lecture Hours: 1 **Contact Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

College Restrictions: The Graduate School **Major Restrictions:** NURA - Nursing Anesthesia **Program Restrictions:** DNP_DNP - DNP-Doctor of Nursing Practice

Schedule Type (Primary): Asynchronous Instruction

NURS 9199 - Nursing Anesthesiology Synthesis III (1 Credit Hour)

An advanced didactic and clinical synthesis course; whereby, the learner connects clinical experiences with didactic material presented in nursing anesthesia core courses. Students use inductive and deductive reasoning as they review anesthesia-based case studies and NBCRNA board review questions.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Program Restrictions:** DNP_DNP-Doctor of Nursing Practice

Schedule Type (Primary): Asynchronous Instruction

NURS 9240 - Independent Study (1 to 9 Credit Hours)

The course, designed for students in a research-focused doctoral program, provides individual students the opportunity to study in more depth a topic introduced in earlier coursework and to pursue topics compatible with their research area of concentration for which coursework is not available. The student typically takes this course with their major advisor or a member of their PhD advisory committee.

Contact Hours: 1 to 9

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School

Schedule Type (Primary): Independent Study **Schedule Type (Additional):** Directed Study (one-to-one),Asynchronous Instruction

NURS 9250 - Investigation of a Research Problem (1 to 12 Credit Hours)

This course, designed for students in a research-focused doctoral program, provides students the opportunity to work with individual faculty members on a specific investigative research problem. The course provides an introduction to the scientific method in action and helps the student progress toward the defense of their dissertation proposal. Students take this course from their third semester in the PhD program until they successfully defend their dissertation proposal and officially enter candidacy. The student typically takes this course with their major advisor or a member of their PhD advisory committee.

Contact Hours: 1 to 12

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: The Graduate School

Schedule Type (Primary): Independent Study **Schedule Type (Additional):** Directed Study (one-to-one),Asynchronous Instruction

NURS 9300 - Dissertation (3 to 9 Credit Hours)

This course, designed for students in a research-focused doctoral program, provides students the opportunity to complete dissertation work specific to their individual area of research under the supervision of their research mentors. Once students officially enter candidacy, they take NURS 9300 for 3-9 hours each semester until they successfully defend their dissertation and graduate. A minimum of 18 credit hours of NURS 9300 over at least 2 semesters is required for graduation.

Contact Hours: 3 to 9

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit, In Progress

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Program Restrictions:** DPHIL_NURS-Nursing

Schedule Type (Primary): Dissertation

OBN 5000 - Basic Clerkship in Obstetrics and Gynecology (18 Credit Hours)

This required basic clerkship of 6 weeks duration combines inpatient and outpatient experience in human reproduction and in disorders of the female reproductive system.

Lecture Hours: 14 **Contact Hours:** 40

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

OBN 5001 - Obstetrics and Gynecology Off-Campus Externship (4 to 8 Credit Hours)

This elective is offered by arrangement with various hospitals, or affiliated medical schools in the United States and overseas. The course is designed to fit each student's particular need and may be either clinically or research oriented. The student must obtain a letter of acceptance with the name of the supervisor and/or evaluator and their curriculum vitae showing OB/GYN training. Formal evaluation is required.

Lecture Hours: 10 **Contact Hours:** 40

Repeatability: May be repeated for credit up to 3 times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

OBN 5005 - Maternal Fetal Medicine Externship (4 to 8 Credit Hours)

This is a clinically oriented block of time during which The student will participate in the antepartum, delivery, and postpartum care of high risk obstetric patients. Responsibilities are those of a sub-intern working closely with the OB house-staff. The student will also present cases at the clinical conferences dealing with high risk pregnancies, and be responsible for assigned reading material.

Contact Hours: 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

OBN 5006 - Reproductive Endocrinology Externship (4 to 8 Credit Hours)

The student will participate in the Reproductive Endocrinology and Genetics Clinic at the Medical College of Georgia. One entire day per week will be devoted to the prenatal diagnosis and preconceptional genetic counseling. Two days at the Medical College of Georgia each week will be devoted to infertility surgery. Two days will be devoted to the management of patients, single or couples, with reproductive endocrine problems. The general diagnostic areas which will be covered are as follows: evaluation, diagnosis and management of couples with infertility, diagnosis and management of menstrual dysfunction, diagnosis and management of androgen over-production. A knowledge of gross and microscopic pathology relating to reproductive endocrinology. Contraception and family planning. Observation of reconstructive and reparative surgery involving congenital and acquired defects of the female genital tract. Gross and microscopic pathology relating to reproductive endocrinology. Basic knowledge of the pharmacology of hormones. Preconceptional and genetic counseling and prenatal diagnosis. In vitro fertilization.

Lecture Hours: 17 **Contact Hours:** 50

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

OBN 5007 - Gynecologic Oncology Externship (4 to 8 Credit Hours)

Students participate in all aspects of gynecologic oncology during this rotation to include exposure to radical gynecologic surgery, the use of specialized instruments in female genital cancer, such as the LASER, LLETZ and the administration of chemotherapy. Clinic time consists of examining patients, under supervision, who are pretreatment gynecologic oncology patients. They observe the use of colposcopy, cryotherapy, of outpatient cystoscopy and special biopsy procedures involving the female genital tract cancers and their precursors.

Lecture Hours: 10 **Contact Hours:** 68

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

OBN 5008 - Benign Gynecology Externship (4 to 8 Credit Hours)

The student will participate in the expanded management of inpatient and outpatient gynecology patients. The student's outpatient experience will include exposure to patients with common problems, as well as routine preventative care. The outpatient experience will also include exposure to, and possible ultrasound and colposcopy. The inpatient experience will consist of participation in the operating room and following assigned patients. Students will be responsible for their assigned patients and will be expected to function at the level of an intern.

Lecture Hours: 15 **Contact Hours:** 50

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

OBN 5009 - Obstetrics and Gynecology Sub-I (12 Credit Hours)

Students on this service will function as sub-interns in the Gynecologic Oncology and Maternal-Fetal Medicine services at MCG or on the obstetrics and gynecology service at the Atlanta Medical Center. Each student will work as an integral part of that service. The student will be required to participate in daily rounds and patient care conferences. The student will also be required to perform surgical procedures under supervision and be involved in clinical activities in the outpatient clinic.

Contact Hours: 40

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit
College Restrictions: Medical College of Georgia
Schedule Type (Primary): Internship/Practicum

OBGN 5011 - Obstetrics and Gynecology Research (4 to 8 Credit Hours)

The emphasis of the laboratory is on the genetic basis of puberty and reproduction using human disease models as hypogonadotropic hypogonadism and premature ovarian failure. The student will perform molecular procedures under supervision to identify mutations in human disease. The interested student will have an excellent change to be involved in abstract publication with eventual journal publication. These studies will provide the student with an exposure to molecular analysis and relate it to clinical problems in reproductive medicine.

Lecture Hours: 1 **Contact Hours:** 500

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

OBGN 5012 - Urogynecology Externship (4 to 8 Credit Hours)

The student will participate in the management of inpatient and outpatient urogynecology patients. The outpatient experience will include extensive exposure to urodynamics, exposure to bladder ultrasound as well as other diagnostic bladder tests. Students will participate in the office management of patients with all forms of incontinence, vaginal and uterine prolapse, as well as other gynecological problems. The patient experience will consist of participation in the operating room for urogynecology, advance laparoscopy, and general gynecology cases. Students will follow assigned patients both preoperatively and postoperatively. Students will be responsible for their assigned patients and will be expected to function at the level of an intern.

Lecture Hours: 3 **Contact Hours:** 35

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

OBGN 5013 - Bioethics in Obstetrics and Gynecology (4 Credit Hours)

This course delves into the ethical challenges in obstetrics and gynecology, blending both philosophical concepts and practical clinical applications. Through a combination of theoretical discussions, real-world case studies, and analysis of primary sources such as ACOG bulletins and PubMed articles, students will examine key ethical dilemmas in Ob/Gyn practice. Topics include reproductive justice, informed consent, assisted reproduction, professional ethics, and care for diverse populations, including same-sex couples and transgender individuals, as well as issues surrounding access to care. Students will engage in critical discussions that encourage thoughtful consideration of the balance between clinical recommendations and patient preferences. The course aims to equip students with the tools to navigate the complex ethical landscape in obstetrics and gynecology. The culmination of the course will be a written paper that synthesizes the student's learning, providing an opportunity to contribute to the bioethics dialogue through submission to a journal or presentation at a professional conference.

Lecture Hours: 2 **Other Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: MEDICAL COLLEGE OF GEORGIA - ATHENS CAMPUS, MEDICAL COLLEGE OF GEORGIA - MAIN CAMPUS, MEDICAL COLLEGE OF GEORGIA - SAVANNAH CAMPUS

Schedule Type (Primary): Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

OBGN 5016 - Gynecology Boot Camp (4 to 8 Credit Hours)

This course will provide the student with exposure to each of the GYN subspecialties (benign gynecology, gynecological oncology, urogynecology, and reproductive endocrinology and infertility), along with intensive experience performing many duties expected of OB-GYN interns.

Prerequisite(s): OBGN 5000 >= C

Lecture Hours: 2 **Contact Hours:** 44

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis, Dissertation

OBN 5017 - Obstetrics Emergency Department Elective (4 to 8 Credit Hours)

Students on this service will function as sub-interns in the OB Emergency Department at MCG. The student will work as an integral part of that service. The student will be required to participate in daily rounds and patient care conferences. The student will also be required to triage all OB ED patients and begin a treatment plan under supervision. They may participate in procedures in the ED including but not limited to ultrasound, incision & drainage, pelvic exams, and potentially precipitous deliveries. They will coordinate with consulting services as appropriate. They will help teach third years on the OB/GYN clerkship rotation. The student will participate in morning and departmental rounds.

Prerequisite(s): OBN 5000

Lecture Hours: 5 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Degree Restrictions: Doctor of Medicine

Schedule Type (Primary): Lecture

OBN 5018 - Transgender Health Longitudinal Elective (4 to 8 Credit Hours)

This course will provide the student with in-depth exposure to the field of transgender medicine, and will also incorporate a research component in the area of transgender genetics. The student will see patients at the Augusta University Transgender Health Clinic which meets once monthly, and at the Equality Clinic which meets twice monthly. The expectation will be that the student will attend a minimum of 50% of each of these clinic over the course of the year (minimum of 6 Transgender Health Clinics and 12 Equality Clinics). In these clinics students will be exposed to various aspects of transgender medicine, including primary and preventive care, mental health care, and gender-affirming treatments and procedures. The student will also work with the Transgender Health faculty in the genetics lab, and will assist with enrolling and consenting patients into research studies, with the goal of generating a poster presentation and the potential to be included on relevant publications to which a substantial contribution is made. Specific research goals will include: 1) Generate a research proposal in consultation with Transgender Health research faculty of appropriate scope to be completed by the end of academic year; 2) Learn the fundamental techniques required for PCR implementation, electrophoresis, and Sanger Sequencing, as well as interpretation of next generation sequencing results; and 3) Complete proposed research project by the end of the academic year, and present the results either by oral/poster presentation or by publication, including -- but not limited to -- presentation at Augusta University Health Sciences Education Day.

Prerequisite(s): OBN 5000 >= C

Contact Hours: 7

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia **Program Restrictions:** MD_MEDD-Medicine

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

OBN 5019 - OB/Gyn Advocacy Elective (4 to 8 Credit Hours)

This elective rotation is an ideal opportunity for medical students who are considering a career in obstetrics and gynecology and has interest in learning about the importance of advocacy for women's health. Students are exposed to multiple aspects of the field, as well as the fundamentals of the Georgia General Assembly, the policy making process, and the principles of effective advocacy. This is a 2-week to 4-week elective geared towards students who are interested in women's health policy. Multidisciplinary approaches to managing women's healthcare in the rural setting are examined, in addition to learning about policy proposals, advocacy strategies, and leadership skills necessary to become a lifetime advocate at the clinical level, at the community level, and at the legislative level.

Lab Hours: 4 to 8

Repeatability: May not be repeated for credit.

Grade Mode: S- Satisfactory/Unsatisfactory

College Restrictions: 04 Medical College of Georgia

Schedule Type (Primary): Supervised Lab/Clinic

OBN 5020 - Rural Outpatient Gynecology Elective (4 to 8 Credit Hours)

This rotation is ideal for students considering a career in obstetrics and gynecology. Students are exposed to multiple aspects of the field, as well as community engagement, mentoring and advocacy. This is a 2-week to 4-week elective geared towards students who are interested in women's health in the outpatient setting. Issues addressed during this rotation include the primary care of women, gynecological health, and menopause. Students develop cultural competence skills, are exposed to multidisciplinary approaches to managing women's healthcare, and expand their knowledge about corporate compliance and ethics in the workplace. The basic ambulatory management of obstetrical patients, the management of ambulatory gynecologic conditions, and prevention and screening in women's reproductive health are examined.

Lab Hours: 4 to 8

Repeatability: May not be repeated for credit.

Grade Mode: S- Satisfactory/Unsatisfactory

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Supervised Lab/Clinic

OBGN 5087 - OB/GYN and Women's Health (1 Credit Hour)

This course will expose students to various areas in the field of OB/GYN to enhance interest in the profession and improve knowledge and skills in women's healthcare.

Lecture Hours: 0.5 **Lab Hours:** 1.5

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia **Major Restrictions:** Medicine

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

OBGN 5500 - OBGYN Clinical Anatomy Readiness Course (8 Credit Hours)

This 4-week course aims to strengthen already obtained anatomy knowledge of regions essential for students seeking to enter an OBGYN residency. It reviews anatomical knowledge and dissection skills, while also practicing and observing clinically relevant procedures in the realm of OBGYN. This course includes 4 different components students must complete in order to receive elective credit: cadaveric dissection, assisting in the 1st year medical student anatomy laboratory, practice of clinically relevant procedures using cadaveric materials and/or simulations, and observation/participation in these procedures within a clinical setting. By the end of the course, students should feel confident in their anatomical knowledge and understanding related to OBGYN anatomy and be proficient in their knowledge and ability to demonstrate/perform common clinical procedures to prepare them for a OBGYN residency.

Lecture Hours: 2 **Lab Hours:** 5 **Other Hours:** 1 **Contact Hours:** 8

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Campus Restrictions: Main Campus, Athens Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

OBGN 5999 - Basic Clerkship Remediation in Obstetrics/Gynecology (1 Credit Hour)

Remediation of the Basic Core Clerkship in Obstetrics/Gynecology.

Prerequisite(s): OBGN 5000

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Independent Study

OBGN 6599 - OB/Gyn Student Chief (4 to 8 Credit Hours)

The elective is designed to allow M4 students an opportunity to practice their leadership skills as they serve as a peer role model to M3 students on the OB/Gyn rotation. The Student Chief will assist the clerkship director by helping M3 student with administrative tasks and required clinical skills. Student must receive the site clerkship director's approval.

Prerequisite(s): OBGN 5000 >= B

Lab Hours: 4 to 8

Repeatability: May be repeated for credit one time.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia - Athens Campus, Medical College of Georgia - Main Campus

Schedule Type (Primary): Internship/Practicum

ROBG 5000 - Obstetrics and Gynecology (27 Credit Hours)

Lecture Hours: 22 **Contact Hours:** 50

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Internship/Practicum

OCCL 5701 - Occlusion Clinic (0 to 1 Credit Hour)

Contact Hours: 0 to 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Continuing Progress Courses

Major Restrictions: Advanced Standing DMD

Schedule Type (Primary): Supervised Lab/Clinic

OTHP 6000 - Fieldwork I A (1 Credit Hour)

Application of the knowledge and skills learned in first semester graduate OT coursework.

Contact Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Program Restrictions:** MHSOT_OTHP-Occupational Therapy, MHS_OTHP-Occupational Therapy

Schedule Type (Primary): Internship/Practicum

OTHP 6001 - Fieldwork I B (1 Credit Hour)

Application of the knowledge and skills learned in first and second semester graduate occupational therapy coursework. Prerequisite: Successful completion of 1st semester MHS courses or permission of Academic Fieldwork Coordinator and Chair.

Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MHSOT_OTHP-Occupational Therapy, MHS_OTHP-Occupational Therapy

Schedule Type (Primary): Supervised Lab/Clinic **Schedule Type (Additional):** Internship/Practicum

OTHP 6002 - Fieldwork I C (2 Credit Hours)

Application of the knowledge and skills learned through the 3rd semester of graduate OT coursework. Prerequisite: successful completion of the 2nd semester MHS coursework and/or permission of the Academic Fieldwork Coordinator and Chair.

Contact Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MHSOT_OTHP-Occupational Therapy, MHS_OTHP-Occupational Therapy

Schedule Type (Primary): Supervised Lab/Clinic **Schedule Type (Additional):** Internship/Practicum

OTHP 6003 - Fieldwork I D (2 Credit Hours)

Application of the knowledge and skills learned through the 4th semester of graduate occupational therapy coursework. Prerequisite: Successful completion of the 3rd semester MHS coursework and/or permission of the Academic Fieldwork Coordinator and Chair.

Contact Hours: 6

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Program Restrictions: MHSOT_OTHP-Occupational Therapy, MHS_OTHP-Occupational Therapy
Schedule Type (Primary): Internship/Practicum

OTHP 6100 - Foundations of Occupational Therapy (3 Credit Hours)

Foundational knowledge and skills of occupational therapy related to the history of the profession and current global health trends. Includes the delineation of roles, use of theory and evidence, the function of professional organizations, the practice framework, use of health care terminology, application of critical reasoning within varied models of practice and settings. Transfer skills, vital signs, management of assistive mobility devices, adaptive dressing equipment, adaptive feeding, adapted equipment for IADL.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Program Restrictions: MHSOT_OTHP-Occupational Therapy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

OTHP 6104 - Occupational Therapy Models of Reasoning (3 Credit Hours)

Developing OT critical reasoning including problem screening and identification, referral, assessment, goal setting, intervention planning, reassessment, discontinuation for client and family centered care. Emphasis is placed on planning assessments and providing justification of care within a variety of settings.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MHSOT_OTHP-Occupational Therapy, MHS_OTHP-Occupational Therapy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

OTHP 6105 - Assessment Process and Documentation (3 Credit Hours)

Developing OT critical reasoning including problem screening and identification, referral, assessment, goal setting, intervention planning, reassessment, discontinuation for client and family centered care. Emphasis is placed on planning assessments and providing justification of care within a variety of settings.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Program Restrictions: MHS_OTHP-Occupational Therapy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

OTHP 6106 - Development of Lifespan Occupations (3 Credit Hours)

Analysis of developmental theories and occupations across the lifespan. The development of roles, habits, values, and skills are included. The influence of cultural diversity and the environment across the lifespan are analyzed. Emphasis is placed on analysis and synthesis of interrelationships of occupation and development.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MHSOT_OTHP-Occupational Therapy, MHS_OTHP-Occupational Therapy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

OTHP 6203 - Occupational Adaptations and Assistive Technology (3 Credit Hours)

Analysis of occupation as a therapeutic method including the adaptation of the person, task, environment and/or context to promote optimal health and occupational performance. Includes assessment, design and implementation of assistive technology. Prerequisite: Successful completion of 1st semester MHS courses or permission from the chair.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MHSOT_OTHP-Occupational Therapy, MHS_OTHP-Occupational Therapy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Supervised Lab/Clinic

OTHP 6204 - Movement Analysis (3 Credit Hours)

Integration of motor control and motor learning approaches related to occupational therapy interventions includes the analysis of posture, balance, quality of movement, and the impact on occupational performance. Promotion of client-centered health, analysis of impairments, and methods to positively influence movement for occupational performance. Prerequisites: Successful completion of 1st semester MHS courses or permission from the chair.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MHSOT_OTHP-Occupational Therapy, MHS_OTHP-Occupational Therapy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Supervised Lab/Clinic

OTHP 6205 - Applied Kinesiology (4 Credit Hours)

Study of movement emphasizing biomechanical analysis of foundational structures and skills that provide the basis for normal movement patterns. Application of the biomechanical frame of reference as utilized by occupational therapists to evaluate range of motion, strength, endurance, sensation, and edema. Prerequisite: Successful completion of 1st semester MHS courses and/or permission from the chair.

Lecture Hours: 3 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MHSOT_OTHP-Occupational Therapy, MHS_OTHP-Occupational Therapy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Supervised Lab/Clinic

OTHP 6206 - Adult Evaluation and Intervention (6 Credit Hours)

Application of theories, models of practice, and frames of reference to determine and implement interventions to address orthopedic, neurological, and general medical impairments that influence occupational performance outcomes among adults. Emphasizes development of skills reflective of current practice including construction of adaptive equipment, assistive technology, fabrication of orthoses, and the use of adjunctive treatment methods. Various reimbursement systems and environments are examined, including acute, chronic, rehabilitation, and outpatient settings. Includes Level I fieldwork.

Lecture Hours: 2 **Lab Hours:** 9

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MHSOT_OTHP-Occupational Therapy, MHS_OTHP-Occupational Therapy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

OTHP 6310 - Conditions in Occupational Therapy (3 Credit Hours)

A critical analysis of the promotion of health and wellness and the body's response to stress, illness or injury across the life span. Physiological concepts, systems and processes related to systems, maturation and healing pertaining to rehabilitation models of practice are also explored. Includes current health care trends, coding, pharmacological practices and evidence for evaluation and intervention.

Prerequisite(s): CAHS 7400 >=C or OTHP 6100 >=C or OTHP 6106 >=C

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Program Restrictions: MHSOT_OTHP-Occupational Therapy

Schedule Type (Primary): Lecture

OTHP 6404 - Pediatric Evaluation and Intervention (4 Credit Hours)

Identification and evaluation of the occupational therapy process applied with the 0-21 population with atypical development, acquisition of occupational roles, and the influence of the person, health, task and the environment. Emphasizes treatment using pediatric frames of reference and working collaboratively in interdisciplinary teams in a variety of environments with children and their families. Includes Level I fieldwork.

Lecture Hours: 2 **Lab Hours:** 5

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MHSOT_OTHP-Occupational Therapy, MHS_OTHP-Occupational Therapy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

OTHP 6501 - Introduction to Evidence Based Practice and Research Process (1 Credit Hour)

The process of evidence-based practice (EBP) and research is introduced, along with introduction of skills required for engaging in both the early exploration of the literature required for research and EBP. The course uses a flipped-classroom approach, with short learning modules presented through video or voice thread in D2L, and 1-hour class sessions reinforcing content with in-class activities.

Lecture Hours: 1

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Program Restrictions: MHSOT_OTHP-Occupational Therapy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

OTHP 6505 - Research Process (2 Credit Hours)

This course focuses on the knowledge and understanding of qualitative and quantitative research designs used to answer clinical and professional research questions. Students will develop and use statistical methods and qualitative analytic approaches to understand processes used in research. Students will continue to engage in evidence based processes in clinical settings and through continued application to a mentor-driven scholarly project.

Prerequisite(s): OTHP 6501 >= C

Lecture Hours: 1 **Lab Hours:** 2

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Program Restrictions: MHSOT_OTHP-Occupational Therapy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

OTHP 6510 - Evidence Based Practice (3 Credit Hours)

This course focuses on the critical appraisal and application of international and national literature within clinical practice settings for occupational therapists. Students will use the evidence-based process in making practice related assessment and intervention decisions. Additionally, learners will continue their mentored scholarly project in groups with allocated class time for continuing this process.

Prerequisite(s): OTHP 6505 >= C

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Program Restrictions: MHSOT_OTHP-Occupational Therapy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

OTHP 6515 - Research Seminar I (2 Credit Hours)

Continued development of a scholarly research process through data collection, data analysis, and preliminary work on publications and presentations related to the process of dissemination. Students are expected to spend their time engaged in an active scholarly pursuit in collaboration with their research mentor.

Prerequisite(s): OTHP 6510 >= C

Contact Hours: 2

Repeatability: May be repeated for credit one time.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MHSOT_OTHP-Occupational Therapy

Schedule Type (Primary): Seminar **Schedule Type (Additional):** Small Group,Asynchronous Instruction

OTHP 6520 - Research Seminar II (2 Credit Hours)

Completion of scholarly work that includes the application of research that affects practice and the provision of occupational therapy services.

Prerequisite(s): OTHP 6515 >= C

Contact Hours: 2

Repeatability: May be repeated for credit one time.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MHSOT_OTHP-Occupational Therapy

Schedule Type (Primary): Seminar - Small Group

OTHP 6600 - Mental Health and Psychosocial Evaluation and Intervention (3 Credit Hours)

Application of critical reasoning and selected theories and intervention approaches for mental health. Includes principles of health promotion, occupationally based intervention models and the application of selected individual and/or group programming within health and community based settings. Therapeutic use of self, conflict management and an understanding of cultural diversity are emphasized. Prerequisite: Successful completion of 1st semester MHS courses and/or permission from the chair.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Program Restrictions: MHS_OTHP-Occupational Therapy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

OTHP 6602 - Adult Evaluation and Intervention II (3 Credit Hours)

Promotion of occupational performance using a variety of adult models of practice. Special emphasis is placed on prevention, health promotion and wellness concepts; sports/leisure related services; low vision; vestibular rehabilitation; driver rehabilitation and cognitive care. Special emphasis is placed on older adult health trends. Various reimbursement systems and settings are examined including the community, private contracting, skilled nursing facilities and home health. Prerequisite: Successful completion of 3rd semester MHS coursework and/or permission of the chair.

Prerequisite(s): OTHP 6002 >= C and OTHP 6203 >= C and OTHP 6320 >= C and OTHP 6510 >= C and OTHP 6606 >= C

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Program Restrictions: MHS_OTHP-Occupational Therapy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

OTHP 6604 - Pediatric Evaluation and Intervention (4 Credit Hours)

Selection and application of the appropriate assessments and interventions of the occupational therapy process with the 0-21 client population. Emphasis is placed on analyzing atypical development, acquisition of the occupational therapy roles and pediatric approaches. Use of client and family centered care is implemented in a variety of settings and reimbursement models. Collaboration and advocacy within interdisciplinary teams are included. Prerequisite: Successful completion of 3rd semester MHS coursework or permission of chair.

Lecture Hours: 3 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MHSOT_OTHP-Occupational Therapy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

OTHP 6606 - Adult Evaluation and Intervention I (5 Credit Hours)

Occupationally based theories and evidence-based approaches for the selection and application of family and client centered care. Use of appropriate assessments and interventions for impairments, illnesses, or injuries related to adult health conditions. Synthesis and

application of outcomes related care for clients with orthopedic, neurological, and general medical and health related conditions. Application of adaptive equipment, assistive technology, fabrication of orthoses, and adjunctive intervention methods are included. Various reimbursement systems, settings, and the continuum of care are addressed. Prerequisite: Successful completion of 2nd semester MHS coursework or permission of chair.

Prerequisite(s): CAHS 7705 >= C and OTHP 6205 >= C and OTHP 6310 >= C and OTHP 6105 >= C and OTHP 6600 >= C and OTHP 6505 >= C and OTHP 6001 >= C

Lecture Hours: 3 **Lab Hours:** 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MHSOT_OTHP-Occupational Therapy, MHS_OTHP-Occupational Therapy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

OTHP 6608 - Worker Role and Ergonomics (3 Credit Hours)

Prerequisites: Graduate admission to the MHS in OT degree program; completion of third semester coursework; or permission of instructor/chair. Study of work and ergonomic principles to enhance occupational performance. Emphasis is on program design and implementation of outcome based work related programs. Settings include clinics, private practice, community, and the industrial work place. Regulatory guidelines are included.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Program Restrictions:** MHSOT_OTHP-Occupational Therapy, MHS_OTHP-Occupational Therapy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic

OTHP 6609 - Community, Societal and Population Models of Practice (3 Credit Hours)

In this course, the occupational therapy student will use a collaborative process involving the identification of a problem, creation of possible solutions, and assessment of their effectiveness in a community-based practice setting. Learners will assess client/family or community based health needs and design, develop and implement an evidence based program to address the identified needs. This includes the examination of issues and trends influencing community based practice, proposal creation, contractual agreement as necessary, identification of possible funding sources, outcome benchmarks, and promotional/marketing strategies for a community based setting. The course addresses community based and emerging practice settings across the life span. Prerequisite: Successful completion of the third semester MHS course work or permission of the instructor/chair.

Lecture Hours: 1 **Lab Hours:** 4

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Program Restrictions: MHS_OTHP-Occupational Therapy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

OTHP 6610 - Contemporary Interventions (3 Credit Hours)

Contemporary practice assessment and interventions addressing work and ergonomics, vision and vestibular rehabilitation, driving, sensory integration, and dysphagia care. Cultural importance of occupations and roles will be included. Course Prerequisites: Graduate admission to the MHS in OT degree program; completion of 3rd semester coursework; or permission of instructor/chair.

Lecture Hours: 1 **Lab Hours:** 2 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Graduate Semester **Program Restrictions:** MHSOT_OTHP-Occupational Therapy, MS_OTHP-Occupational Therapy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

OTHP 6612 - Community Practice (3 Credit Hours)

In this course, the occupational therapy student will use a collaborative process involving the identification of a problem, creation of possible solutions, and assessment of their effectiveness in a community –based practice setting. Learners will assess client/family or

community based health needs and design, develop and implement an evidence based program to address the identified needs. This includes the examination of issues and trends influencing community based practice, proposal creation, contractual agreement as necessary, identification of possible funding sources, outcome benchmarks, and promotional/marketing strategies for a community based setting. The course addresses community based and emerging practice settings across the life span. Prerequisite: Successful completion of the third semester MHS course work or permission of the instructor/chair.

Lecture Hours: 1 Lab Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Major Restrictions:** Occupational Therapy **Course Level Restrictions:** Graduate Semester **Program Restrictions:** MHSOT_OTHP-Occupational Therapy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

OTHP 6704 - Professional Issues and Service Management (4 Credit Hours)

Application of administrative and supervisory processes including professional standards and competencies, program evaluation, case management, advocacy reimbursement issues, marketing, analysis of outcomes, productivity, current policy issues and trends in the profession. Applies management principles and processes to appropriate methods within a variety of service delivery systems and models.

Lecture Hours: 3 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Major Restrictions:** Occupational Therapy **Degree Restrictions:** Master of Health Science **Program Restrictions:** MHSOT_OTHP-Occupational Therapy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic

OTHP 6706 - Future Directions in Occupational Therapy (2 Credit Hours)

Students in this course will examine literature and resources from a variety of sources such as professional associations, governmental reports, and international literature related to individual, group and population health as well as current trends and future vision in terms of service delivery in medical, education, and community settings.

Prerequisite(s): OTHP 6510 >= C

Lecture Hours: 2

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Program Restrictions: MHSOT_OTHP-Occupational Therapy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

OTHP 6708 - Professional Issues and Service Management (3 Credit Hours)

Application of administrative and professional leadership processes including standards of practice and competencies; needs assessments, program development, outcome management, reimbursement, ethics, policy and trends in health care. Includes management process, advocacy and promotion. Personal professional development and competencies are included. Prerequisite: Successful completion of fourth semester coursework or permission of the chair.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MHSOT_OTHP-Occupational Therapy, MHS_OTHP-Occupational Therapy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

OTHP 6710 - Professional Development and Competencies (1 Credit Hour)

This courses uses critical analyses of professional entry competencies for the occupational therapists including certification, licensure, and professional development responsibilities. A programmatic review and professional self assessment are conducted. Experiences include critical appraisal of components of a professional evaluation including educational, employment, certification results, fieldwork, research/scholarship success, and service/community outreach outcomes. Evaluation data will be critically examined with developed improvement plans captured in a strategic planning process. Ethics, supervision, liability, and advanced professional development planning are included.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: College of Allied Health Sci **Major Restrictions:** Occupational Therapy **Course Level Restrictions:** Graduate Semester **Program Restrictions:** MHSOT_OTHP-Occupational Therapy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

OTHP 6854 - School Systems (3 Credit Hours)

Advance studies in school based settings emphasizing regulatory guidelines, roles, IEPs, and delivery of services within an intra and interdisciplinary delineation, equipment and accessibility considerations, documentation, client and family centered care and consulting are included. Prerequisite: Successful completion of fourth semester MHS coursework; or permission of the chair.

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Program Restrictions: MHSOT_OTHP-Occupational Therapy, MHS_OTHP-Occupational Therapy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic

OTHP 6900 - Investigation of a Problem (1 to 4 Credit Hours)

Prerequisites: Graduate admission to the MHS in OT degree program; permission of chair or instructor. Student investigation of a topic of interest or need.

Lecture Hours: 1 to 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Program Restrictions:** MHSOT_OTHP-Occupational Therapy, MHS_OTHP-Occupational Therapy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

OTHP 6901 - Sensory Integration/Advanced Topics in Pediatric Practice (3 Credit Hours)

Prerequisites: Graduate admission to the MHS in OT degree program; permission of Chair or instructor. Student investigation of specialty practice(s) in pediatrics and sensory integrative theory and implications for practice. A review of evidence-based literature and the implications for occupational practice are examined.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Program Restrictions:** MHSOT_OTHP-Occupational Therapy, MHS_OTHP-Occupational Therapy

Schedule Type (Primary): Asynchronous Instruction

OTHP 6903 - Vestibular Rehabilitation (3 Credit Hours)

Prerequisites: Graduate admission to the MHS in OT degree program; permission of chair or instructor. A scientific review of the vestibular system and the implications for clinical intervention. Clinical case studies and a review of current evidence based literature are analyzed with implications identified for practice and research.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Program Restrictions:** MHSOT_OTHP-Occupational Therapy, MHS_OTHP-Occupational Therapy

Schedule Type (Primary): Asynchronous Instruction

OTHP 6904 - Visual Rehabilitation (3 Credit Hours)

Prerequisites: Graduate admission to the MHS in OT degree program; permission of chair or instructor. In-depth study of the vision system, common diagnostic populations, and related impairments. Case based learning and the implications for clinical practice are

included. A review of evidence based practice trends are analyzed with outcome benchmarks identified.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Program Restrictions:** MHSOT_OTHP-Occupational Therapy, MHS_OTHP-Occupational Therapy

Schedule Type (Primary): Asynchronous Instruction

OTHP 6906 - Cognitive Rehabilitation (3 Credit Hours)

Prerequisites: Graduate admission to the MHS in OT degree program; permission of the instructor or chair. Advanced investigation of cognition and the implications on occupational performance. Research related to cognitive rehabilitation in occupational therapy is reviewed. Implications for occupational services are analyzed within a reimbursement, effectiveness and cost-effective practice. Models of restoration, compensation, and adaptation are analyzed.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Graduate Semester **Program Restrictions:** MHSOT_OTHP-Occupational Therapy, MHS_OTHP-Occupational Therapy

Schedule Type (Primary): Asynchronous Instruction

OTHP 6907 - Advanced Musculoskeletal Investigation of Upper Extremity (3 Credit Hours)

Prerequisites: Graduate admission to the MHS in OT degree program; permission of the chair or instructor. Application of specialized musculoskeletal evaluation and intervention strategies for upper extremity impairments.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Graduate Semester **Program Restrictions:** MHSOT_OTHP-Occupational Therapy, MHS_OTHP-Occupational Therapy

Schedule Type (Primary): Asynchronous Instruction

OTHP 6908 - Advanced Splinting in Hand and Upper Extremity Rehabilitation (3 Credit Hours)

Prerequisites: Graduate admission to the MHS in OT degree program; permission of chair or instructor. Design and fabricate splints for complex upper extremity impairment.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Graduate Semester **Program Restrictions:** MHSOT_OTHP-Occupational Therapy, MHS_OTHP-Occupational Therapy

Schedule Type (Primary): Asynchronous Instruction

OTHP 6909 - Ergonomics (3 Credit Hours)

Prerequisites: Graduate admission to the MHS in OT degree program; permission of chair or instructor. Application of ergonomic theory related to occupational performance and productivity. Evaluation and treatment principles to enhance performance are identified for industrial and rehabilitation settings. Evidence-based literature are reviewed and current trends for practice are synthesized.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Graduate Semester **Program Restrictions:** MHSOT_OTHP-Occupational Therapy, MHS_OTHP-Occupational Therapy

Schedule Type (Primary): Asynchronous Instruction

OTHP 6910 - International Fieldwork Experience Seminar (2 Credit Hours)

This course consists of a range of classroom sessions, activities and assignments that have been developed to facilitate the student experience in an international Level I Fieldwork experience. Students in this course will actively engage in a variety of experiences to gain an understanding about the country of travel and cultural competency. Students are required to engage in project development activities and participate in debriefing sessions post trip.

Contact Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Occupational Therapy **Degree Restrictions:** Master of Health Science in OT **Program Restrictions:**

MHSOT_OTHP-Occupational Therapy

Schedule Type (Primary): Seminar - Small Group

OTHP 7009 - Fieldwork II Experience A (9 Credit Hours)

Intensive practicum to address the development of competent, entry-level, generalist occupational therapist. Level II Fieldwork experiences are assigned based on the program curriculum design, and includes in-depth experience in delivering occupational therapy services to clients. The fieldwork experiences focus on the application of purposeful and meaningful occupation and research, administration, and management of occupational services.

Contact Hours: 40

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Program Restrictions:** MHSOT_OTHP-Occupational Therapy, MHS_OTHP-Occupational Therapy

Schedule Type (Primary): Supervised Lab/Clinic **Schedule Type (Additional):** Internship/Practicum

OTHP 7010 - Fieldwork II Experience B (9 Credit Hours)

Intensive practicum to address the development of competent, entry-level, generalist occupational therapist. Level II Fieldwork experiences are assigned based on the program curriculum design, and includes in-depth experience in delivering occupational therapy services to clients. The fieldwork experiences focus on the application of purposeful and meaningful occupation and research, administration, and management of occupational services. Full-time fieldwork experience applying clinical reasoning in a practice environment. Prerequisite: Successful completion fieldwork II A or permission of Academic Fieldwork Coordinator.

Contact Hours: 40

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Program Restrictions:** MHSOT_OTHP-Occupational Therapy, MHS_OTHP-Occupational Therapy

Schedule Type (Primary): Internship/Practicum

OTHP 7109 - Fieldwork Experience B (9 Credit Hours)

Full-time 12 week fieldwork experience applying clinical reasoning in a practice environment.

Lab Hours: 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: College of Allied Health Sci **Program Restrictions:** MHSOT_OTHP-Occupational Therapy, MHS_OTHP-Occupational Therapy

Schedule Type (Primary): Supervised Lab/Clinic

OTHP 7303 - Contemporary Practice in Occupational Therapy (3 Credit Hours)

Examination of issues and trends influencing community based practice. Involves the development of a community based program proposal including a contractual agreement, identification of funding sources, outcome benchmarks and promotional and marketing strategies for a community-based setting. Includes Level 1 Fieldwork in a community-based or non-traditional setting.

Lecture Hours: 1 **Contact Hours:** 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Major Restrictions:** Occupational Therapy **Program Restrictions:**

OTHP 7600 - Elective Fieldwork (1 to 9 Credit Hours)

Full-time fieldwork experience in an identified practice area. Rotation duration is variable and negotiated with the Academic Fieldwork Coordinator and the identified fieldwork site.

Lecture Hours: 1 to 9

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Program Restrictions:** MHSOT_OTHP-Occupational Therapy, MHS_OTHP-Occupational Therapy

Schedule Type (Primary): Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

ORIE 0001 - Online Orientation (0 Credit Hours)

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Asynchronous Instruction

OPTH 5001 - Ophthalmology Externship (4 to 8 Credit Hours)

The student participates with the residents and faculty in their daily clinical activities. This includes seeing and evaluating patients in the outpatient clinic with the residents and faculty, participation in conferences and lectures, and observation of some surgical procedures.

Lecture Hours: 6 **Contact Hours:** 35

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

OPTH 5002 - Ophthalmology Research Elective (4 to 8 Credit Hours)

An area of mutual interest to the student and faculty supervisor is selected. The student outlines their research project with literature references and carries it out under supervision. A written report on the project is required at the end of the elective period.

Lecture Hours: 1 **Lab Hours:** 39 **Contact Hours:** 5

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

OPTH 5003 - Ophthalmology Off-Campus Externship (4 to 8 Credit Hours)

Special arrangements can be made for elective periods of one or two months in a Department of Ophthalmology at another medical school or one that is affiliated with a medical school (Canada or USA), to study some phase of ophthalmology such as ophthalmic pathology, neuro-ophthalmology, etc. Written approval must be obtained in advance from both the MCG Department of Ophthalmology (D. Thomas) and the Department where the elective is to be taken. A description of the off-campus elective, including the names(s) of the supervising faculty member(s), must be submitted to the MCG Department of Ophthalmology before approval to take the course for credit can be considered. In addition, a letter of evaluation with specific comments regarding the student's performance and a brief description of the work completed must be received from the Department Chairperson or the supervising faculty member in the Department where the off-campus elective is taken. Credit for the course will not be given until all of the above have been satisfactorily completed.

Contact Hours: 40

Repeatability: May be repeated for credit up to 3 times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Internship/Practicum

ROPH 5000 - Ophthalmology (27 Credit Hours)

Lecture Hours: 10 **Lab Hours:** 4 **Contact Hours:** 45

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Internship/Practicum

OBMP 5603 - Special Topics in Oral Biology (4 Credit Hours)

Lecture Hours: 8

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Major Restrictions: Advanced Standing DMD

Schedule Type (Primary): Lecture

OBMP 7210 - Applied Pathology (3 Credit Hours)

This course includes lectures and clinico-pathological conferences on the basic principles of disease, relevant histopathology and the underlying mechanism at the cellular and subcellular levels. The topics include cell pathology, inflammatory process, hemodynamic disturbances, genetic and metabolic disorders and neoplasia. In addition, pathology of the systemic organs is covered.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy, Master of Sci in Oral Biology **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture

OBMP 8001 - Topics in Oral Biology 1 (2 Credit Hours)

Prerequisites: DMD, DDS, or equivalent; 2 years dental school for combined programs. This course is composed of three blocks. The first block addresses hard tissue biology in which the anatomy, physiology, and biochemistry of bone and teeth are emphasized. The second block is devoted to temporomandibular joint disorders, and emphasizes the fundamental basic science that is essential in understanding the clinical problems related to the temporomandibular joint. The third block is regeneration/repair of orofacial tissues and emphasizes growth and differentiation of hard and soft tissues and the biochemical basis of wound healing.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Doctor of Philosophy, Master of Sci in Oral Biology

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

OBMP 8002 - Topics in Oral Biology II (2 Credit Hours)

Prerequisites: DMD, DDS, or equivalent; 2 yrs dental school for combined programs. The course is composed of two blocks. The first block is hemostasis and bleeding disorders which deals with fundamental concepts in the biochemistry, anatomy and physiology of the hemostatic response and bleeding disorders. The second block is orofacial infections in which the types of orofacial infections along with the causative agents, the role of lymphatic and other anatomic structures in the spread of infection, host defense mechanisms and anti-microbial therapies are presented.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Doctor of Philosophy, Master of Sci in Oral Biology

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study

OBMP 8003 - Topics in Oral Biology III (2 Credit Hours)

Prerequisites: DMD, DDS, or equivalent; 2 yrs dental school for combined programs. The course is composed of three major blocks. The first block is a series of lectures on pain and anxiety management in dentistry. The second block addresses the dental management of the medically complex patient. The third block covers salivary gland function in health and disease.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Doctor of Philosophy, Master of Sci in Oral Biology **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study

OBMP 8004 - Topics in Oral Biology 4 (2 Credit Hours)

The course is composed of two blocks. The first block is a series of lectures related to molecular pathology. The second block emphasizes genetics as it relates to orofacial anomalies and defects. This course is a multidisciplinary approach to these topics.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Doctor of Philosophy, Master of Sci in Oral Biology **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study

OBMP 8540 - Advanced Oral Pathology (2 Credit Hours)

This course is comprised of a series of lectures on advanced oral pathology with emphasis on the etiology, mechanisms, and state of the art diagnostic measures and prognostic evaluation.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy, Master of Sci in Oral Biology **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture

OBMP 8640 - Research Proposal Development (2 Credit Hours)

This course presents the entering oral biology graduate students with the range of opportunities available on campus (facilities, faculty, and instrumentation/techniques) to them to pursue for the purposes of fulfilling their master's or doctoral research requirements. Additional topics to be covered include fundamentals of computer literacy required to develop, present, and perform an acceptable, graduate-level research project: word processing, spreadsheet software, computer presentation programs, and reference management. Also, the student will be presented with facilities to perform on-line data searching. A series of short presentations concerning frequently utilized statistical methods will be presented. The student will also be introduced to the basics of structure, organizations, and format of an acceptable research proposal and manuscript.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy, Master of Sci in Oral Biology

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

OBMP 9001 - Topics in Oral Biology I (3 Credit Hours)

This course is composed of three blocks. The first block addresses hard tissue biology in which the anatomy, physiology, and biochemistry of bone and teeth are emphasized. The second block is devoted to temporomandibular joint disorders, and emphasizes the fundamental basic science that is essential in understanding the clinical problems related to the temporomandibular joint. The third block is regeneration/repair of orofacial tissues and emphasizes growth and differentiation of hard and soft tissues and the biochemical basis of wound healing.

Lecture Hours: 2 **Contact Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Doctor of Philosophy **Program Restrictions:** DPHIL_UNDCL-Biomedical Sciences Undeclared

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

OBMP 9002 - Topics in Oral Biology II (3 Credit Hours)

The course is composed of two blocks. The first block is hemostasis and bleeding disorders which deals with fundamental concepts in the biochemistry, anatomy, and physiology of the hemostatic response and bleeding disorders. The second block is orofacial infections in which the types of orofacial infections along with the causative agents, the role of lymphatic and other anatomic structures in the spread of infection, host defense mechanisms and anti-microbial therapies are presented.

Lecture Hours: 2 **Contact Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_OBMP-Oral Bio & Maxillofacial Path

Schedule Type (Primary): Lecture

OBMP 9003 - Topics in Oral Biology III (3 Credit Hours)

This course presents three modules each focused on a topic which is pivotal to the practice of clinical dentistry. These include 1) management of pain and anxiety in dentistry, 2) dental management of medically complex patients, and 3) salivary gland structure and function. A multidisciplinary approach will integrate relevant information from various basic science disciplines to achieve comprehensive presentation of each topic.

Lecture Hours: 2 **Contact Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Doctor of Philosophy **Program Restrictions:** DPHIL_UNDCL-Biomedical Sciences Undeclared

Schedule Type (Primary): Lecture

OBMP 9004 - Topics in Oral Biology IV (3 Credit Hours)

This course includes lecture series on the basic principles of disease, relevant morphological and biochemical features, and the underlying mechanism at the cellular, subcellular, and molecular level. The course is composed of three blocks: I. Molecular Pathology; II. Mechanisms in Normal and Abnormal Cell Proliferation; III. Normal and Abnormal Craniofacial Development. Specific topics include advanced concepts of disease at the cellular and subcellular level, to include principles and basic mechanisms of cell injury, inflammation, signal transduction, carcinogenesis, oncogenes, and neoplasia. Concepts of craniofacial development are discussed from genetic and embryological perspectives. An overview of current corrective measures, potential genetic therapies, and ethical considerations are also addressed.

Lecture Hours: 2 **Contact Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Doctor of Philosophy **Program Restrictions:** DPHIL_UNDCL-Biomedical Sciences Undeclared

Schedule Type (Primary): Lecture

OBMP 9010 - Graduate Oral Biology Seminar (1 Credit Hour)

This course consists of several one hour seminars that will be presented by dental faculty, graduate students and invited lecturers. The seminar topics will be related to the research being conducted by each presenter.

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy, Master of Sci in Oral Biology **Campus Restrictions:** Main Campus

Schedule Type (Primary): Seminar - Small Group

OBMP 9011 - Topics in Oral Biology I Supplemental (1 Credit Hour)

This course is composed of three blocks. The first block addresses hard tissue biology in which the anatomy, physiology, and biochemistry of bone and teeth are emphasized. The second block is devoted to temporomandibular joint disorders, and emphasizes the fundamental basic science that is essential in understanding the clinical problems related to the temporomandibular joint. The third block is regeneration/repair of orofacial tissues and emphasizes growth and differentiation of hard and soft tissues and the biochemical basis of wound healing.

Prerequisite(s): OBMP 8001 >= B

Contact Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Directed Study (one-to-one)

OBMP 9012 - Topics in Oral Biology II Supplemental (1 Credit Hour)

The course is composed of two blocks. The first block is hemostasis and bleeding disorders which deals with fundamental concepts in the biochemistry, anatomy and physiology of the hemostatic response and bleeding disorders. The second block is orofacial infections in which the types of orofacial infections along with the causative agents, the role of lymphatic and other anatomic structures in the spread of infection, host defense mechanisms and anti-microbial therapies are presented.

Prerequisite(s): OBMP 8002 >= B

Contact Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Doctor of Philosophy

Schedule Type (Primary): Directed Study (one-to-one)

OBMP 9013 - Topics in Oral Biology II Supplemental (1 Credit Hour)

Prerequisite(s): OBMP 8003 >= B

Contact Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Doctor of Philosophy

Schedule Type (Primary): Directed Study (one-to-one)

OBMP 9014 - Topics in Oral Biology IV Supplemental (1 Credit Hour)

Prerequisite(s): OBMP 8004 >= B

Contact Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Doctor of Philosophy

Schedule Type (Primary): Directed Study (one-to-one)

OBMP 9100 - Journal Club in Oral Biology (1 Credit Hour)

Weekly presentation and discussion of recent journal articles in the field of oral biology. All students enrolled will be required to present at least one journal paper per semester and will be expected to lead the discussion and answer questions in relation to the specific background, method, results, discussion, and conclusions as it relates to the paper and field in general.

Contact Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: DPHIL_OBMP-Oral Bio & Maxillofacial Path, MSOB_OBIO-Oral Biology

Schedule Type (Primary): Seminar **Schedule Type (Additional):** Small Group, Asynchronous Instruction

OBMP 9210 - Investigation of a Problem (1 to 12 Credit Hours)

The student works with individual faculty members on a specific investigative research problem. This provides an introduction to analytical techniques and the scientific method in action.

Repeatability: It is repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Program Restrictions:** DPHIL_OBMP-Oral Bio & Maxillofacial Path, MSOB_OBIO-Oral Biology

Schedule Type (Primary): Supervised Lab/Clinic

OBMP 9300 - Research (1 to 16 Credit Hours)

Permanent assignment to a specific lab with a faculty advisor and a defined research project. The student works closely with their faculty thesis/dissertation advisor on an in-depth study of a research problem of interest to both student and advisor. This course culminates in the preparation of the PhD dissertation or MS thesis. Enrollment in this course requires official admission to candidacy.

Repeatability: It is repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Program Restrictions:** DPHIL_OBMP-Oral Bio & Maxillofacial Path, MSOB_OBIO-Oral Biology

Schedule Type (Primary): Dissertation

OBPR 8001 - Topics in Oral Biology I (2 Credit Hours)

This course is a lecture series covering the basic principles of oral and dental disease, relevant morphological and biochemical features and the underlying mechanisms at the cellular, subcellular and molecular levels. The course is composed of three modules (all of which are mandatory): I. Hard Tissue Biology; II. TMJ Disorders; III. Regeneration/Repair. Specific topics include the development and structure of bone, and the hormonal regulation of bone metabolism; dentine permeability and fluoride metabolism/toxicity. Disorders of the temporomandibular joint and muscles will be discussed, including orthodontic aspects and the diagnosis and management of TMJ pain. Concepts of regeneration and repair will be covered, focusing on bone regeneration, nerve injury, wound healing and repair. An overview of current corrective measures and potential therapies is also provided.

Lecture Hours: 2

Repeatability: May be repeated for credit one time.

Grade Mode: Normal

College Restrictions: Residents

Schedule Type (Primary): Seminar - Small Group

OBPR 8002 - Topics in Oral Biology II (0 to 2 Credit Hours)

This course presents three interrelated areas of emphasis in the understanding of universal and unique features of the head and neck region and their response to microbial invasion. Initially, the anatomical features of the head and neck are presented as potential sites of dental and systemic diseases. General and specific features of the human immune response are presented that are responsible for returning the affected area to homeostasis are discussed. The middle portion of the course presents information on common bacterial, fungal, and viral systemic diseases presenting with major manifestations in the head and neck are presented. Along with these diseases, appropriate chemotherapeutic treatment regimens are also discussed. Finally, the development of the formed blood elements which, along with the circulatory system, transports many of the elements of the immune response are presented. Normal and aberrant mechanisms of blood clotting as well as pharmacological interventions for bleeding disorders commonly encountered in dental treatment are discussed in detail.

Lecture Hours: 0 to 2 **Lab Hours:** 0 to 2

Repeatability: May be repeated for credit one time.

Grade Mode: Audit

College Restrictions: Residents

Schedule Type (Primary): Seminar - Small Group

OBPR 8003 - Topics in Oral Biology III (0 Credit Hours)

This course presents three modules each focused on a topic which is pivotal to the practice of clinical dentistry. These include 1) management of pain and anxiety in dentistry, 2) dental management of medically complex patients and 3) salivary gland structure and function. A multidisciplinary approach will integrate relevant information from various basic science disciplines to achieve comprehensive presentation of each topic.

Lecture Hours: 0

Repeatability: May be repeated for credit one time.

Grade Mode: Audit

College Restrictions: Residents

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group

OBPR 8004 - Topics in Oral Biology IV (2 Credit Hours)

This course includes lecture series on the basic principles of disease, relevant morphological and biochemical features and the underlying mechanism at the cellular, subcellular and molecular level. The course is composed of three blocks: I. Molecular Pathology; II. Mechanisms in Normal and Abnormal Cell Proliferation; III. Normal and Abnormal Craniofacial Development. Specific topics include: advanced concepts of disease at the cellular and subcellular level, to include principles and basic mechanisms of cell injury, inflammation, signal transduction, carcinogenesis, oncogenes, and neoplasia. Concepts of craniofacial development are discussed from genetic and embryological perspectives. An overview of current corrective measures, potential genetic therapies, and ethical considerations also are addressed.

Lecture Hours: 2

Repeatability: May be repeated for credit one time.

Grade Mode: Audit

College Restrictions: Residents

Schedule Type (Primary): Seminar - Small Group

OBPR 8540 - Advanced Oral Pathology I (2 Credit Hours)

This course examines the etiology and pathogenesis of oral and head and neck diseases in basic oral & maxillofacial pathology. The subject matter includes introduction and reinforcing of etiology and mechanisms of pathological disorders taught in combination with basic principles of pathologic processes. However, this course is clinically oriented and details description of the clinical and radiographic features, and the general outlines of treatment modalities of the following, developmental defects and anomalies, abnormalities of teeth, mucosal white and red lesions, papillary lesions, ulcerative conditions, vesiculo-bullous conditions, oral cancer and epithelial pathology, non-neoplastic and neoplastic salivary gland pathology, and osseous and odontogenic pathology. The course is conducted via lectures coupled with case-based clinicopathology conferences which emphasize the development of a differential diagnosis and establishment of a final diagnosis.

Lecture Hours: 2

Repeatability: May be repeated for credit one time.

Grade Mode: Normal

College Restrictions: Residents

Schedule Type (Primary): Seminar - Small Group

OBPR 9010 - Graduate Oral Biology Seminar (1 Credit Hour)

Through the presentation of current research by students and faculty, the students will become conversant with scientific methods and literature. Upon graduation from the program, students will be competent and experienced in presenting their scientific results to audiences of their peers.

Lecture Hours: 1

Repeatability: May be repeated for credit one time.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Seminar - Small Group

OBPR 9100 - Journal Club in Oral Biology (1 Credit Hour)

Weekly presentation and discussion of recent journal articles in the field of oral biology. All students enrolled will be required to present at least one journal paper per semester and will be expected to lead the discussion and answer questions in relation to the specific background, method, results, discussion, and conclusions as it relates to the paper and field in general.

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents **Course Level Restrictions:** Professional Semester

Schedule Type (Primary): Seminar - Small Group

ODOM 5003 - The Medically Complex Patient (3 Credit Hours)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal

College Restrictions: Dental College of Georgia

Schedule Type (Primary): Lecture

ODOM 5603 - The Medically Complex Patient (3 Credit Hours)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Major Restrictions: Advanced Standing DMD

Schedule Type (Primary): Lecture

ODOM 5604 - Oral Medicine (1 Credit Hour)

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Major Restrictions: Advanced Standing DMD

Schedule Type (Primary): Lecture

ODOM 5701 - Oral Medicine Clinic (0 to 1 Credit Hour)

Contact Hours: 0 to 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Continuing Progress Courses

Major Restrictions: Advanced Standing DMD

Schedule Type (Primary): Supervised Lab/Clinic

ODOM 5702 - Oral Medicine Clinic (0 to 1 Credit Hour)

Contact Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Continuing Progress Courses

Major Restrictions: Advanced Standing DMD

Schedule Type (Primary): Supervised Lab/Clinic

OMSR 6021 - Didactics I (18 Credit Hours)

This course includes teaching rounds, physical diagnosis, journal club and an academic seminar series. Teaching rounds occur each weekday as required by the patient population in the hospital. Physical diagnosis is an intensive training program of 1 week duration sponsored by the Eisenhower Army Medical Center. Journal club is a monthly seminar with DCG OMS faculty, residents and interns and the Eisenhower Army Medical Center faculty and residents. Reviews of articles from the Journal of Oral and Maxillofacial Surgery are presented, as well as reviews of articles from a selection of other professional journals. The Academic Seminar Series is a biweekly seminar consisting of presentations by a resident, faculty member, or guest. The service activities during the preceding week, and any associated patient morbidity and mortality is also discussed by the chief resident.

Lecture Hours: 18

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit
Schedule Type (Primary): Lecture/Supervised Lab/Clinic

OMSR 6022 - Oral Maxillofacial Surgery - Pathology Conference I (2 Credit Hours)

This is an advanced course in oral and maxillofacial pathology for the oral and maxillofacial surgery residents. This course is especially designed for the oral surgery residents to better fit their needs in pathological and diagnostic sciences. It includes lectures and multihead-microscope conference to discuss topics that are pertinent to oral and head and neck surgery. The course addresses a number of topics including genetics, developmental anomalies, inflammatory conditions, and neoplastic disorders including oral cancer, salivary neoplasms, bone diseases and neoplasms and odontogenic cysts and tumors. This course provides a systematic approach to differential diagnosis as well as methods by which definitive diagnosis can be achieved prior to treatment.

Lecture Hours: 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

OMSR 6030 - Oral Surgery Didactics (23 Credit Hours)

Teaching Rounds Orthodontic Conference Surgical Ground Rounds Journal Club Teaching Session

Lecture Hours: 18

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Seminar - Small Group

OMSR 6031 - Didactics II (15 Credit Hours)

This course includes teaching rounds, journal club and an academic seminar series. Teaching rounds occur each weekday as required by the patient population in the hospital. Journal club is a monthly seminar with DCG OMS faculty, residents and interns and the Eisenhower Army Medical Center faculty and residents. Reviews of articles from the Journal of Oral and Maxillofacial Surgery are presented, as well as reviews of articles from a selection of other professional journals. The Academic Seminar Series is a biweekly seminar consisting of presentations by a resident, faculty member, or guest. The service activities during the preceding week, and any associated patient morbidity and mortality is also discussed by the chief resident.

Lecture Hours: 3

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

OMSR 6032 - Oral and Maxillofacial Surgery-Pathology Conference II (2 Credit Hours)

This is an advanced course in oral and maxillofacial pathology for the oral and maxillofacial surgery residents. This course is especially designed for the oral surgery residents to better fit their needs in pathological and diagnostic sciences. It includes lectures and multihead-microscope conference to discuss topics that are pertinent to oral and head and neck surgery. The course addresses a number of topics including genetics, developmental anomalies, inflammatory conditions, and neoplastic disorders including oral cancer, salivary neoplasms, bone diseases and neoplasms and odontogenic cysts and tumors. This course provides a systematic approach to differential diagnosis as well as methods by which definitive diagnosis can be achieved prior to treatment.

Lecture Hours: 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

OMSR 6120 - Oral Surgery Clinical Care (23 Credit Hours)

Ambulatory General Anesthesia Clinical Inpatient Care - OMS Clinical Outpatient Care - OMS Anesthesia Rotation

Lab Hours: 575

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Supervised Lab/Clinic

OMSR 6121 - Oral Surgery Clinical Care I (25 Credit Hours)

This clinical course includes OMS Clinical Inpatient Care that is assigned and supervised by the attending surgeon and OMS Clinical Outpatient Care. The course also includes a series of clinical rotations including the Augusta State Medical Prison, a five-month rotation in the Anesthesia Service of AU Hospital and Clinics, a one-month rotation in the Internal Medicine Service of AU Hospital and Clinics, and a one-month rotation in the Medical Intensive Care Clinic of AU Hospital and Clinics.

Lab Hours: 25

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Supervised Lab/Clinic

OMSR 6130 - Oral Surgery Clinical Care (23 Credit Hours)

This clinical course covers ambulatory general anesthesia, clinical inpatient care, clinical outpatient care, and anesthesia rotation.

Contact Hours: 36

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Supervised Lab/Clinic

OMSR 6131 - Oral Surgery Clinical Care (27 Credit Hours)

This clinical course includes OMS Clinical Inpatient Care that is assigned and supervised by the attending surgeon and OMS Clinical Outpatient Care. The course also includes a series of clinical rotations including the Augusta State Medical Prison, a five-month rotation in the Anesthesia Service of AU Hospital and Clinics, a one-month rotation in the Internal Medicine Service of AU Hospital and Clinics, and a one-month rotation in the Medical Intensive Care Clinic of AU Hospital and Clinics.

Lab Hours: 27

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Supervised Lab/Clinic

OMSR 7020 - Oral Surgery Didactics (22 Credit Hours)

Teaching Rounds Orthodontic Conference Surgical Ground Rounds Journal Club Teaching Session Oral Pathology

Lab Hours: 550

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Seminar - Small Group

OMSR 7021 - Didactics III (15 Credit Hours)

This course includes teaching rounds, journal club and an academic seminar series. Teaching rounds occur each weekday as required by the patient population in the hospital. Journal club is a monthly seminar with DCG OMS faculty, residents and interns and the Eisenhower Army Medical Center faculty and residents. Reviews of articles from the Journal of Oral and Maxillofacial Surgery are presented, as well as reviews of articles from a selection of other professional journals. The Academic Seminar Series is a biweekly seminar consisting of presentations by a resident, faculty member, or guest. The service activities during the preceding week, and any associated patient morbidity and mortality is also discussed by the chief resident.

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

OMSR 7022 - Oral Maxillofacial Surgery - Pathology Conference III (2 Credit Hours)

This is an advanced course in oral and maxillofacial pathology for the oral and maxillofacial surgery residents. This course is especially designed for the oral surgery residents to better fit their needs in pathological and diagnostic sciences. It includes lectures and multihead-microscope conference to discuss topics that are pertinent to oral and head and neck surgery. The course addresses a number of topics including genetics, developmental anomalies, inflammatory conditions, and neoplastic disorders including oral cancer, salivary neoplasms, bone diseases and neoplasms and odontogenic cysts and tumors. This course provides a systematic approach to differential diagnosis as well as methods by which definitive diagnosis can be achieved prior to treatment.

Lecture Hours: 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

OMSR 7031 - Didactics IV (15 Credit Hours)

This course includes teaching rounds, journal club and an academic seminar series. Teaching rounds occur each weekday as required by the patient population in the hospital. Journal club is a monthly seminar with DCG OMS faculty, residents and interns and the Eisenhower Army Medical Center faculty and residents. Reviews of articles from the Journal of Oral and Maxillofacial Surgery are presented, as well as reviews of articles from a selection of other professional journals. The Academic Seminar Series is a biweekly seminar consisting of presentations by a resident, faculty member, or guest. The service activities during the preceding week, and any associated patient morbidity and mortality is also discussed by the chief resident.

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

OMSR 7032 - Oral Maxillofacial Surgery - Pathology Conference IV (2 Credit Hours)

This is an advanced course in oral and maxillofacial pathology for the oral and maxillofacial surgery residents. This course is especially designed for the oral surgery residents to better fit their needs in pathological and diagnostic sciences. It includes lectures and multihead-microscope conference to discuss topics that are pertinent to oral and head and neck surgery. The course addresses a number of topics including genetics, developmental anomalies, inflammatory conditions, and neoplastic disorders including oral cancer, salivary neoplasms, bone diseases and neoplasms and odontogenic cysts and tumors. This course provides a systematic approach to differential diagnosis as well as methods by which definitive diagnosis can be achieved prior to treatment.

Lecture Hours: 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

OMSR 7121 - Oral Surgery Clinical Care III (27 Credit Hours)

This clinical course includes OMS clinical inpatient care that is assigned and supervised by the attending surgeon and OMS clinical outpatient care. The course also includes a series of clinical rotations including the Augusta State Medical Prison, a one-month rotation in the general surgery service of AU hospital and clinics a one-month rotation in the plastic and reconstructive surgery service of AU hospital and clinics, a one-month rotation in the emergency department of AU hospital and clinics and a one-month rotation with the trauma service of AU hospital and clinics.

Lab Hours: 27

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Supervised Lab/Clinic

OMSR 7131 - Oral Surgery Clinical Care IV (27 Credit Hours)

This clinical course includes OMS clinical inpatient care that is assigned and supervised by the attending surgeon and OMS clinical outpatient care. The course also includes a series of clinical rotations including the Augusta State Medical Prison, a one-month rotation in the general surgery service of AU hospital and clinics a one-month rotation in the plastic and reconstructive surgery service of AU hospital and clinics, a one-month rotation in the emergency department of AU hospital and clinics and a one-month rotation with the trauma service of AU hospital and clinics.

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit
Schedule Type (Primary): Supervised Lab/Clinic

OMSR 8021 - Oral Surgery Didactics V (14 Credit Hours)

This course includes teaching rounds, journal club, an Academic Seminar Series and a human anatomy cadaver dissection course. Teaching rounds occur each weekday as required by the patient population in the hospital. Journal club is held monthly combining the DCG OMS faculty, residents and interns and the Eisenhower Army Medical Center faculty and residents. Reviews of articles from the Journal of Oral and Maxillofacial Surgery are presented, as well as reviews of articles from a selection of other professional journals. The Academic Seminar Series is a weekly seminar that consists of presentations by a resident, faculty member, or guest. The service activities during the preceding week, and any associated patient morbidity and mortality is also discussed by the chief resident. The human anatomy cadaver dissection course is a two day course of human cadaver dissection designed to review head and neck anatomy and to introduce residents to surgical techniques for managing emergency and trauma induced pathology involving the head and neck.

Lecture Hours: 4 **Lab Hours:** 10

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

OMSR 8022 - Oral and Maxillofacial Surgery-Pathology Conference V (2 Credit Hours)

This is an advanced course in oral and maxillofacial pathology for the oral and maxillofacial surgery residents. This course is especially designed for the oral surgery residents to better fit their needs in pathological and diagnostic sciences. It includes lectures and multihead-microscope conference to discuss topics that are pertinent to oral and head and neck surgery. The course addresses a number of topics including genetics, developmental anomalies, inflammatory conditions, and neoplastic disorders including oral cancer, salivary neoplasms, bone diseases and neoplasms and odontogenic cysts and tumors. This course provides a systematic approach to differential diagnosis as well as methods by which definitive diagnosis can be achieved prior to treatment.

Lecture Hours: 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

OMSR 8031 - Oral Surgery Didactics VI (13 Credit Hours)

This course includes teaching rounds, journal club, and an Academic Seminar Series. Teaching rounds occur each weekday as required by the patient population in the hospital. Journal club is held monthly combining the DCG OMS faculty, residents and interns and the Eisenhower Army Medical Center faculty and residents. Reviews of articles from the Journal of Oral and Maxillofacial Surgery are presented, as well as reviews of articles from a selection of other professional journals. The Academic Seminar Series is a weekly seminar that consists of presentations by a resident, faculty member, or guest. The service activities during the preceding week, and any associated patient morbidity and mortality is also discussed by the chief resident.

Lecture Hours: 3 **Lab Hours:** 10

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

OMSR 8032 - Oral Maxillofacial Surgery - Pathology Conference VI (2 Credit Hours)

This is an advanced course in oral and maxillofacial pathology for the oral and maxillofacial surgery residents. This course is especially designed for the oral surgery residents to better fit their needs in pathological and diagnostic sciences. It includes lectures and multihead-microscope conference to discuss topics that are pertinent to oral and head and neck surgery. The course addresses a number of topics including genetics, developmental anomalies, inflammatory conditions, and neoplastic disorders including oral cancer, salivary neoplasms, bone diseases and neoplasms and odontogenic cysts and tumors. This course provides a systematic approach to differential diagnosis as well as methods by which definitive diagnosis can be achieved prior to treatment.

Lecture Hours: 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

OMSR 8121 - Oral Surgery Clinical Care V (26 Credit Hours)

This clinical course includes OMS Clinical Inpatient Care that is assigned and supervised by the attending surgeon and OMS Clinical Outpatient Care. The course also includes a clinical rotation to the Augusta State Medical Prison, and a one-month off-service elective clinical rotation. This elective rotation must be to a clinical service and must not be to any oral maxillofacial surgery service or practice.

Lab Hours: 26

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Supervised Lab/Clinic

OMSR 8131 - Oral Surgery Clinical Care VI (27 Credit Hours)

This clinical course includes OMS Clinical Inpatient Care that is assigned and supervised by the attending surgeon and OMS Clinical Outpatient Care. The course also includes a clinical rotation to the Augusta State Medical Prison, and a one-month off-service elective clinical rotation. This elective rotation must be to a clinical service and must not be to any oral maxillofacial surgery service or practice.

Lab Hours: 27

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Supervised Lab/Clinic

OMSR 9021 - Oral Surgery Didactics VII (14 Credit Hours)

This course includes teaching rounds, journal club, an Academic Seminar Series and training in ACLS and PALS. Teaching rounds occur each weekday as required by the patient population in the hospital. Journal club is held monthly combining the DCG OMS faculty, residents and interns and the Eisenhower Army Medical Center faculty and residents. Reviews of articles from the Journal of Oral and Maxillofacial Surgery are presented, as well as reviews of articles from a selection of other professional journals. The Academic Seminar Series is a weekly seminar that consists of presentations by a resident, faculty member, or guest. The service activities during the preceding week, and any associated patient morbidity and mortality is also discussed by the chief resident. Residents also take the American Heart Association courses in advanced trauma life support and pediatric advanced life support.

Lecture Hours: 4 **Lab Hours:** 10

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

OMSR 9022 - Oral Maxillofacial Surgery - Pathology Conference VII (2 Credit Hours)

This is an advanced course in oral and maxillofacial pathology for the oral and maxillofacial surgery residents. This course is especially designed for the oral surgery residents to better fit their needs in pathological and diagnostic sciences. It includes lectures and multihead-microscope conference to discuss topics that are pertinent to oral and head and neck surgery. The course addresses a number of topics including genetics, developmental anomalies, inflammatory conditions, and neoplastic disorders including oral cancer, salivary neoplasms, bone diseases and neoplasms and odontogenic cysts and tumors. This course provides a systematic approach to differential diagnosis as well as methods by which definitive diagnosis can be achieved prior to treatment.

Lecture Hours: 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

OMSR 9031 - Oral Surgery Didactics VIII (13 Credit Hours)

This course includes teaching rounds, journal club, and an Academic Seminar Series. Teaching rounds occur each weekday as required by the patient population in the hospital. Journal club is held monthly combining the DCG OMS faculty, residents and interns and the Eisenhower Army Medical Center faculty and residents. Reviews of articles from the Journal of Oral and Maxillofacial Surgery are presented, as well as reviews of articles from a selection of other professional journals. The Academic Seminar Series is a weekly seminar that consists of presentations by a resident, faculty member, or guest. The service activities during the preceding week, and any associated patient morbidity and mortality is also discussed by the chief resident.

Lecture Hours: 3 **Lab Hours:** 10

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit
Schedule Type (Primary): Lecture/Supervised Lab/Clinic

OMSR 9032 - Oral Maxillofacial Surgery - Pathology Conference VIII (2 Credit Hours)

This is an advanced course in oral and maxillofacial pathology for the oral and maxillofacial surgery residents. This course is especially designed for the oral surgery residents to better fit their needs in pathological and diagnostic sciences. It includes lectures and multihead-microscope conference to discuss topics that are pertinent to oral and head and neck surgery. The course addresses a number of topics including genetics, developmental anomalies, inflammatory conditions, and neoplastic disorders including oral cancer, salivary neoplasms, bone diseases and neoplasms and odontogenic cysts and tumors. This course provides a systematic approach to differential diagnosis as well as methods by which definitive diagnosis can be achieved prior to treatment.

Lecture Hours: 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

OMSR 9121 - Oral Surgery Clinical Care VII (27 Credit Hours)

This clinical course includes OMS Clinical Inpatient Care that is assigned and supervised by the attending surgeon and OMS Clinical Outpatient Care. The course also includes a clinical rotation to the Augusta State Medical Prison, and a one-month off-service rotation to the Eisenhower Medical Center with the US Army OMS Program at Fort Gordon.

Lab Hours: 27

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Supervised Lab/Clinic

OMSR 9131 - Oral Surgery Clinical Care VIII (27 Credit Hours)

This clinical course includes OMS Clinical Inpatient Care that is assigned and supervised by the attending surgeon and OMS Clinical Outpatient Care. The course also includes a clinical rotation to the Augusta State Medical Prison, and a one-month off-service rotation to the Eisenhower Medical Center with the US Army OMS Program at Fort Gordon.

Lab Hours: 27

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Supervised Lab/Clinic

OMFS 5004 - Nitrous Oxide Sedation in Dental Practice (1 Credit Hour)

Elective course in the theory and practice of nitrous oxide sedation in dental practice.

Prerequisite(s): OMFS 5001 and OMFS 5002

Lecture Hours: 4 **Lab Hours:** 2 **Contact Hours:** 8

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: DMD_DENT-Dentistry

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

OMFS 5501 - Introduction to Oral and Maxillofacial Surgery (1 Credit Hour)

Provides basic information necessary to complete clinical requirements in oral surgery, and subsequently perform those oral surgery procedures within the scope of a general practitioner.

Lecture Hours: 11

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

OMFS 5591 - Oral Surgery Clinic I (1 Credit Hour)

This comprehensive course includes two areas of evaluation. 1) Oral Surgery Assist Rotation (OSA): Students will be assigned on half-day shifts to the oral and maxillofacial surgery clinic. The responsibilities of students during this time are: a) To assist other students who schedule patients for extraction in the available oral surgery chairs. And b) If no student patients are scheduled, the rotating students must assist OMFS residents and faculty on simple cases and observe in complex cases. They may also participate in sedations assisting with the evaluation, monitoring and recovery of patients. It is the student's responsibility to identify the ongoing cases and participate. 2) Extractions: Students will perform extractions on patients within the student population. After an extraction is indicated, treatment planned by dental faculty and sign by the patient, the responsible student must present the case to an oral surgery faculty. A recent panoramic film of diagnostic quality (within one year) is required for patient presentation. A note will be placed in the chart assigning the case as a junior case, senior case, or resident case. When the case is assigned as a junior case, students will be able to schedule patients in the available oral surgery student chairs. If the case is assigned as a senior or resident case, the student is responsible for referring the patient to the appropriate clinic. Patients cannot be scheduled before oral surgery faculty approve the case as a junior student case. Junior students cannot schedule their own patients during their assigned OSA rotation shifts in the oral surgery clinic. If a student schedules a patient before approval or during the OSA rotation, they will be suspended from extraction clinic for a period of two (2) weeks. Repeating offenders will be suspended double the time of their previous suspension. 3) Students will not get surgical assist credit for participating in procedures during their assigned rotation shifts. 4) Enrolled students must complete the requirements of each individual area to obtain a satisfactory grade (S).

Lab Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Supervised Lab/Clinic

OMFS 5602 - Fundamentals of Oral Surgery (1 Credit Hour)

Didactic course continuing on the foundational principles of oral and maxillofacial surgery. Topics include: medically compromised patients, pathology of the oral cavity and other nearby structures, and management of facial trauma.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

OMFS 5692 - Oral Surgery Clinic II (2 Credit Hours)

This comprehensive course includes two areas of evaluation. 1) Oral Surgery Assist Rotation (OSA): Students will be assigned on half-day shifts to the oral and maxillofacial surgery clinic. The responsibilities of students during this time are: a) To assist other students who schedule patients for extraction in the available oral surgery chairs. And b) If no student patients are scheduled, the rotating students must assist OMFS residents and faculty on simple cases and observe in complex cases. They may also participate in sedations assisting with the evaluation, monitoring and recovery of patients. It is the student's responsibility to identify the ongoing cases and participate. 2) Extractions: Students will perform extractions on patients within the student population. After an extraction is indicated, treatment planned by dental faculty and signed by the patient, the responsible student must present the case to an oral surgery faculty. A recent panoramic film of diagnostic quality (within one year) is required for patient presentation. A note will be placed in the chart assigning the case as a junior case, senior case, or resident case. When the case is assigned as a junior case, students will be able to schedule patients in the available oral surgery student chairs. If the case is assigned as a senior or resident case, the student is responsible for referring the patient to the appropriate clinic. Patients cannot be scheduled before oral surgery faculty approve the case as a junior student case. Junior students must present their patients before they can be scheduled in the Pre-doc OMS clinic. If a student manages to get a patient scheduled prior to presenting, he or she will be suspended from extraction clinic for their next rotation. Repeating offenders will be suspended twice the number of rotations of their previous suspension. 3) Students will not get surgical assist credit for participating in procedures during their assigned rotation shifts. 4) Enrolled students must complete the requirements of each individual area to obtain a satisfactory grade (S).

Lab Hours: 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Supervised Lab/Clinic

OMFS 5701 - Oral Surgery Clinic (0 to 2 Credit Hours)

Contact Hours: 0 to 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Continuing Progress Courses

Major Restrictions: Advanced Standing DMD

Schedule Type (Primary): Supervised Lab/Clinic

OMFS 5702 - Oral Surgery Clinic (1 Credit Hour)

Contact Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Major Restrictions: Advanced Standing DMD

Schedule Type (Primary): Supervised Lab/Clinic

OMFS 5703 - Oral Surgery Hospital Clinic (0 to 2 Credit Hours)

Contact Hours: 0 to 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Continuing Progress Courses

Major Restrictions: Advanced Standing DMD

Schedule Type (Primary): Supervised Lab/Clinic

OMFS 5793 - Oral Surgery Clinic III (1 Credit Hour)

This comprehensive course includes two areas of evaluation. 1) Oral Surgery Assist Rotation (OSA): Students will be assigned on half-day shifts to the oral and maxillofacial surgery clinic. The responsibilities of students during this time are: a) To assist other students who schedule patients for extraction in the available oral surgery chairs. And b) If no student patients are scheduled, the rotating students must assist OMFS residents and faculty on simple cases and observe in complex cases. They may also participate in sedations assisting with the evaluation, monitoring and recovery of patients. It is the student's responsibility to identify the ongoing cases and participate. 2) Extractions: Students will perform extractions on patients within the student population. After an extraction is indicated, treatment planned by dental faculty and sign by the patient, the responsible student must present the case to an oral surgery faculty. A recent panoramic film of diagnostic quality (within one year) is required for patient presentation. A note will be placed in the chart assigning the case as a junior case, senior case, or resident case. When the case is assigned as a junior case, students will be able to schedule patients in the available oral surgery student chairs. If the case is assigned as a senior or resident case, the student is responsible for referring the patient to the appropriate clinic. Patients cannot be scheduled before oral surgery faculty approval of the case as a junior student case. Junior students cannot schedule their own patients during their assigned OSA rotation shifts in the oral surgery clinic. If a student schedules a patient before approval or during the OSA rotation, they will be suspended from extraction clinic for a period of two (2) weeks. Repeating offenders will be suspended double the time of their previous suspension. 3) Students will not get surgical assist credit for participating in procedures during their assigned rotation shifts. 4) Enrolled students must complete the requirements of each individual area to obtain a satisfactory grade (S).

Lab Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Supervised Lab/Clinic

OMFS 5794 - Oral Surgery Hospital Clinic (1 Credit Hour)

This is a full-time, one-week clinical rotation in oral and maxillofacial surgery.

Other Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Supervised Lab/Clinic

OMFS 5895 - Oral Surgery Clinic IV (1 Credit Hour)

Students will master the clinical skills learned in OMFS 5901. These include evaluation of surgical patients, case presentation, forceps extractions and management of complications during and after treatment. The students will complete the oral surgery competency

during this course. They will work in the planning, treatment, post-operative care and management complications. During the competency process, students might be exposed to more advanced oral surgery procedures to include, surgical extractions, alveoloplasty, tori removal and biopsies.

Lab Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Supervised Lab/Clinic

ORPR 5001 - Orientation to the Profession and Ethics (1 Credit Hour)

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Dental College of Georgia

Schedule Type (Primary): Lecture

ORTH 5401 - Orthodontics I (2 Credit Hours)

This course is an introduction to orthodontic diagnosis and is designed to provide the sophomore dental student with the knowledge base necessary to identify existing and developing problems associated with dental and/or skeletal malocclusions.

Lecture Hours: 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

ORTH 5512 - Orthodontics II (3 Credit Hours)

The purpose of this course is to introduce biologic and mechanical principles of orthodontic tooth movement. Evidenced based concepts will be used in the discussion of contemporary treatment approaches. Laboratory experiences will provide hands-on reinforcement of didactic instruction in the technical aspects of appliance construction and clinical treatment.

Lecture Hours: 2 **Lab Hours:** 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

ORTH 5602 - Orthodontics II (2 Credit Hours)

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Major Restrictions: Advanced Standing DMD

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

ORTH 5701 - Orthodontic Clinic (0 to 1 Credit Hour)

Contact Hours: 0 to 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Major Restrictions: Advanced Standing DMD

Schedule Type (Primary): Supervised Lab/Clinic

ORTR 7010 - Edgewise Therapy (10 Credit Hours)

Edgewise Appliance - Typodont Course Contemporary Orthodontics Basic Cephalometrics Research

Lecture Hours: 2 **Lab Hours:** 8

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Seminar - Small Group

ORTR 7020 - Advanced Diagnosis I (9 Credit Hours)

Literature Review Contemporary Orthodontics Advanced Cephalometrics Principles of Occlusion and TMD Edgewise Appliances - Biomechanics Research

Lecture Hours: 3 **Lab Hours:** 6

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Seminar - Small Group

ORTR 7030 - Advanced Diagnostics II (14 Credit Hours)

Literature Review Contemporary Orthodontics Research Principles of Occlusion and TMD

Lecture Hours: 5 **Lab Hours:** 9

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Seminar - Small Group

ORTR 7110 - Clinical Orthodontics (3 Credit Hours)

Clinical Orthodontics (Adults and Children)

Lab Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Supervised Lab/Clinic

ORTR 7120 - Craniofacial Deformities I (17 Credit Hours)

Clinical Orthodontics (Adults and Children) Craniofacial Deformities (CL&P)

Lecture Hours: 6 **Contact Hours:** 11

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Supervised Lab/Clinic

ORTR 7130 - Craniofacial Deformities II (24 Credit Hours)

This course provides the orthodontic residents the knowledge to understand the biologic responses to orthodontic forces in the treatment of patients of all ages with a variety of contemporary orthodontic techniques or philosophy. This course includes a rotation with the AU craniofacial anomalies team in which they examine and evaluate patients with cleft lip and palate and other craniofacial anomalies, discuss treatment options, and render patient care where appropriate.

Lecture Hours: 7 **Lab Hours:** 17

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Supervised Lab/Clinic

ORTR 7210 - Diagnostic Essentials (2 Credit Hours)

Orientation/Ortho Records Diagnosis and Treatment Planning Clinical Photography

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Supervised Lab/Clinic

ORTR 7220 - Surgical Orthodontics (7 Credit Hours)

Surgical Orthodontics Diagnosis and Treatment Planning

Lecture Hours: 3 **Lab Hours:** 4

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

ORTR 7230 - Dentofacial Malocclusions II (7 Credit Hours)

Surgical Orthodontics Diagnosis and Treatment Planning Graduate Teaching Assistant

Lecture Hours: 4 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Supervised Lab/Clinic

ORTR 8010 - Orthodontic Treatment: Principles and Techniques (9 Credit Hours)

Contemporary Orthodontics, Literature Review, Research.

Lecture Hours: 5 **Lab Hours:** 4

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Seminar - Small Group

ORTR 8020 - Finishing and Retention I (7 Credit Hours)

Contemporary Orthodontics Literature Review Finishing Orthodontic Treatment (Final Details) Research

Lecture Hours: 3 **Contact Hours:** 4

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Seminar - Small Group

ORTR 8030 - Finishing and Retention II (12 Credit Hours)

Contemporary Orthodontics Literature Review Finishing Orthodontic Treatment (Final Details)

Lecture Hours: 10 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Seminar - Small Group

ORTR 8120 - Comprehensive Orthodontic Treatment II (20 Credit Hours)

Clinical Orthodontics (Adult & Children) Surgical Orthodontics Craniofacial Deformities Graduate Teaching Assistant Principles of Occlusion & TMD Interdisciplinary Comprehensive Care Dentofacial Orthopedics - Orthodontics & Orthopedic Appliance Design

Lab Hours: 20

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Supervised Lab/Clinic

ORTR 8130 - Comprehensive Orthodontic Treatment III (24 Credit Hours)

This clinical and seminar course provides the orthodontic residents the knowledge and experience for the treatment of patients of all ages with a variety of contemporary orthodontic techniques or philosophy. This course includes a rotation with the AU Craniofacial Anomalies Team in which they examine and evaluate patients with cleft lip and palate and other craniofacial anomalies, discuss treatment options, and render patient care where appropriate. This course is intended to strengthen the second year orthodontic resident's knowledge base in the basic principles of occlusion and the classification, diagnosis, and treatment of temporomandibular disorders (TMD), the use of dentofacial orthopedics in orthodontics, and treatment planning and treatment coordination for the patient who requires the support of multiple specialists or disciplines to resolve the patient's treatment needs.

Lab Hours: 24

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Supervised Lab/Clinic

ORTR 8220 - Diagnosis and Treatment Planning II (10 Credit Hours)

Diagnosis and Treatment Planning

Lecture Hours: 10

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

ORTR 8330 - Diagnosis and Treatment Planning III (9 Credit Hours)

Diagnosis and Treatment Planning

Lecture Hours: 8 **Contact Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Supervised Lab/Clinic

ORTR 9020 - Classis and Current Literature Review II (17 Credit Hours)

Literature Review Defense of Completed Cases Research

Lecture Hours: 15 **Contact Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Seminar - Small Group

ORTR 9120 - Comprehensive Orthodontic Treatment III (19 Credit Hours)

This clinical course provides the orthodontic residents the knowledge and experience for the treatment of patients of all ages with a variety of contemporary orthodontic techniques or philosophy.

Lab Hours: 19

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Supervised Lab/Clinic

ORTR 9220 - ABO Treatment Plan Assessment II (10 Credit Hours)

Diagnosis and Treatment Planning

Lecture Hours: 5 **Lab Hours:** 1 **Contact Hours:** 4

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PATH 5003 - Surgical Pathology Externship (4 to 8 Credit Hours)

Prerequisite: Phase II. To participate in all activities of surgical pathology. Students will function as supervised residents. They will participate in the examination of tissues and the rendering of diagnoses to clinicians. Students will be part of modern surgical pathology. Limited responsibility under supervision will be commensurate with ability.

Lecture Hours: 10 **Lab Hours:** 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PATH 5008 - Oncologic Pathology (2 Credit Hours)

Oncologic Pathology is designed as an introduction to pathology for clinical and basic science researchers. Pathology samples are an integral part of translational research, yet oftentimes even established researchers are unfamiliar with differences in normal histology versus pre-neoplastic/neoplastic transformation processes. Through Oncologic Pathology, participants will gain an understanding of these processes, as well as standard tissue processing methods, molecular techniques used in clinical and research settings, and common molecular pathways and mutations involved in oncogenesis.

Lecture Hours: 2 **Contact Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: S-Satisfactory/Unsatisfactory

PATH 5009 - Clinical Pathology Externship (4 to 8 Credit Hours)

Prerequisite: Phase II. This elective is based on the practical application of clinical laboratory methods and evaluation of results. This objective will be pursued through patient rounds, interpretation of laboratory data, participation in patient treatment, particularly the use of blood and blood components, the development of tests and their evaluation as to future clinical utilization. An opportunity to learn the techniques of hematology, microbiology, clinical chemistry, microscopy, immunohematology and blood banking will be available. This elective includes hands-on instruction.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Internship/Practicum

PATH 5014 - Pathology Off-Campus Externship (4 to 8 Credit Hours)

Opportunity to work in selected areas of anatomic and/or clinical pathology, including such fields as surgical pathology, autopsy, hematology, blood banking, and microbiology in specified programs arranged with an offering pathologist. Students can participate in intra- and inter-departmental conferences. Prerequisite: Phase II.

Lecture Hours: 20 **Lab Hours:** 5

Repeatability: May be repeated for credit up to 3 times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PATH 5016 - Anatomic Pathology Externship (4 to 8 Credit Hours)

Prerequisite: Phase II Pathology This elective will provide the student opportunity to work with a preceptor who will give the student training in their field of specialty and in the practice of Pathology.

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Internship/Practicum

PATH 5019 - Clinical Microbiology Externship (4 to 8 Credit Hours)

An area of mutual interest will be explored through research, literature review, hands-on evaluation, discussions with other laboratories, etc. A written document of the findings will be produced for internal use and ideally for presentation and publication. Alternately, practical training in one or more areas of clinical microbiology can be arranged to meet the individual needs of each student.

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Internship/Practicum

PATH 5025 - Pathology Research (3 Credit Hours)

Prerequisite: Phase II Pathology. This elective consists of research experience in selected areas of pathology through special arrangement with a member of the faculty of the department of pathology. Arrangements should be made by the student with a member of the faculty. A description of the proposed project must be submitted to and approved by Dr. Stephen Peiper, Ext 2923. A copy of the description must accompany the green sheet. If the duration of the elective is more than one month, students only receive credit for a one month elective.

Lecture Hours: 10 **Lab Hours:** 30

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PATH 5028 - Introduction to Pathology (4 to 8 Credit Hours)

Provides students with an opportunity to rotate through a busy pathology department and experience the full array of daily functions undertaken in such a department.

Contact Hours: 9

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia **Course Level Restrictions:** Professional Semester

Schedule Type (Primary): Supervised Lab/Clinic

PATH 5029 - Forensic Medicine Elective (4 to 8 Credit Hours)

This elective course is designed to provide medical students in their third and fourth year of training an opportunity to rotate with the Georgia Bureau of Investigation, Division of Forensic Sciences in forensic medicine. The medical student will assist with autopsies performed on decedents of all ages, who died from both natural and non-natural causes. The student will learn to correlate investigative data, autopsy findings, and toxicology results to construct differential diagnoses and determine cause and manner of death. The student will gain exposure to the pathology of natural disease and common injury patterns seen in blunt force trauma, sharp force injury, firearms injury, motor vehicle fatalities, asphyxia injuries, temperature and electrical injuries, and suspected elder and child abuse. The student will learn to correctly sign a death certificate, understanding the differences between cause, manner, and mechanism of death. The student will attend criminal court and learn how the medicolegal death investigation system interacts with the criminal and civil legal systems, as well as public health and safety agencies. When possible, the student will rotate through forensic science departments and participate in a mock trial, held in the Georgia Bureau of Investigation training courtroom. When possible, students will gain exposure to forensic odontology and forensic anthropology. Opportunities to publish case reports or participate in retrospective research using death certificate and autopsy data are encouraged.

Lab Hours: 8 **Contact Hours:** 2

Repeatability: May not be repeated for credit.
Grade Mode: Satisfactory/Unsatisfactory, Audit
College Restrictions: Medical College of Georgia
Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PATH 5086 - Pathology General Research Elective (4 to 8 Credit Hours)

This rotation allows students to develop a research project to improve patient care, develop stronger medical knowledge in pathology, and become more aware of the recent pathology literature; learn to better critically evaluate pathology literature and use literature for evidenced based medicine practices. The student will develop better communications skills to work effectively with faculty, staff, and other learners.

Lab Hours: 34

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Degree Restrictions: Doctor of Medicine **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PATH 6010 - Pathology for Medical Illustrators I (3 Credit Hours)

This course includes lectures and clinico-pathological conferences on the basic principles of disease, relevant histopathology and the underlying mechanism at the cellular and sub cellular level. The topics include cell pathology, inflammatory process, hemodynamic disturbances, genetic and metabolic disorders and neoplasia. In addition, pathology of the systemic organs is also covered.

Prerequisite(s): ANAT 7010 >= C and ANAT 7011 >= C and ANAT 8050 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: MS in Med Illus

Schedule Type (Primary): Lecture

PATH 6011 - Pathology for Medical Illustrators II (2 Credit Hours)

This course includes lectures and clinico-pathological conferences on the basic principles of disease, relevant histopathology and the underlying mechanism at the cellular and sub cellular level. The topics include cell pathology, inflammatory process, hemodynamic disturbances, genetic and metabolic disorders and neoplasia. In addition, pathology of the systemic organs is also covered.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MSIL_MILL-Medical Illustration

Schedule Type (Primary): Lecture

RPAT 5000 - Pathology (27 Credit Hours)

Lecture Hours: 10 **Lab Hours:** 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Internship/Practicum

RPAT 5001 - Pathology Blood Banking (27 Credit Hours)

Lecture Hours: 10 **Lab Hours:** 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Internship/Practicum

Major Restrictions: Advanced Standing DMD

Schedule Type (Primary): Supervised Lab/Clinic

PEDR 7025 - Pediatric Dentistry Research I (1 Credit Hour)

This is an independent study course offered each semester to residents in pediatric dentistry. Residents are required to complete a research project under faculty guidance. These projects may be clinical or laboratory data collection studies, or, in limited situations, may take the form of case reports and/or comprehensive literature reviews. One half-day per week is provided throughout the program for completion of the research project.

Contact Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Independent Study

PEDR 7032 - Pediatric Dentistry Research II (1 Credit Hour)

This is an independent study course offered each semester to residents in pediatric dentistry. Residents are required to complete a research project under faculty guidance. These projects may be clinical or laboratory data collection studies, or, in limited situations, may take the form of case reports and/or comprehensive literature reviews. One half-day per week is provided throughout the program for completion of the research project.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

PEDR 7150 - Pediatric Dentistry Core Curriculum I (13 Credit Hours)

Achieve skill in all academic and clinical aspects of pediatric dentistry through this comprehensive residency program. Gain in-depth knowledge in understanding the development of dentition, cariology and prevention, growth and development, orthodontics, restorative

dentistry and dental materials, trauma, and pediatric oral pathology. Acquire practical knowledge in practice management to efficiently run a pediatric dental practice.

Lecture Hours: 13

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Lecture

PEDR 7160 - Clinical Pediatric Dentistry I (16 Credit Hours)

Develops competence in conducting comprehensive clinical evaluations. Generate appropriate treatment plans and provide evidence-based treatments across multiple clinical settings, including the school-based clinic, the Augusta University Surgical Center, and the Children's Hospital of Georgia. Collaborate with faculty in Pediatric Dentistry and the Department of Orthodontics to learn essential skills for evaluating patient growth and development. Collect and interpret orthodontic records and deliver interceptive orthodontic interventions.

Other Hours: 16

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Supervised Lab/Clinic

PEDR 7170 - Hospital Dentistry I (6 Credit Hours)

Understand and function as part of a clinical team in treating both healthy and special needs patients in a hospital setting. Rotate through various departments within the Children's Hospital of Georgia (CHOG) and the Dental College of Georgia (DCG), including pediatric medicine, hematology/oncology, craniofacial clinic, and general anesthesia. Become familiar with the treatment considerations for each special group of patients. Gain exposure to essential skills such as venipuncture, learn to interpret commonly ordered medical tests, and develop competence in maintaining a child patient's airway in the operating room setting.

Other Hours: 6

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Supervised Lab/Clinic

PEDR 7180 - Literature Review I (3 Credit Hours)

Read and evaluate both current and historical literature relevant to pediatric dentistry. Gain insight into how to critically review scientific studies. Develop the skills needed to report on and discuss scientific literature effectively. Establish yourself as a lifelong learner in the field of pediatric dentistry.

Lecture Hours: 3

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Seminar Small Group

PEDR 7190 - Special Care Dentistry I (7 Credit Hours)

Investigate all aspects of managing patient behavior to provide appropriate care, including for those with developmental, intellectual, medical, or craniofacial differences. Become skillful in behavior management techniques such as communicative methods, oral sedation, and general anesthesia. Understand the risks and benefits of each technique, along with the legal and ethical considerations. Provide care to patients with developmental, medical, intellectual, and craniofacial differences by utilizing comprehensive behavior guidance strategies.

Lecture Hours: 5 **Lab Hours:** 2

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PEDR 7250 - Pediatric Dentistry Core Curriculum II (2 Credit Hours)

Learn and become skillful in all academic aspects of pediatric dentistry. Utilize this knowledge as the cornerstone of all clinical and treatment decisions throughout your practice. Understand key topics, including the development of dentition, cariology and prevention,

growth and development, orthodontics, restorative dentistry and dental materials, trauma management, and pediatric oral pathology. Become familiar with and apply the basic concepts of practice management.

Lecture Hours: 2

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Lecture

PEDR 7260 - Clinical Pediatric Dentistry II (29 Credit Hours)

Complete comprehensive clinical evaluations with competence. Generate appropriate treatment plans and provide evidence-based treatments across multiple clinical settings, including the school-based clinic, the Augusta University Surgical Center, and the Children's Hospital of Georgia. Collaborate with faculty in Pediatric Dentistry and the Department of Orthodontics to learn essential skills for evaluating patient growth and development. Collect and interpret orthodontic records and deliver interceptive orthodontic interventions.

Other Hours: 29

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Supervised Lab/Clinic

PEDR 7270 - Hospital Dentistry II (4 Credit Hours)

Understand and function as part of a clinical team in treating both healthy and special needs patients in a hospital setting. Rotate through various departments within the Children's Hospital of Georgia (CHOG) and the Dental College of Georgia (DCG), including pediatric medicine, hematology/oncology, craniofacial clinic, and general anesthesia. Become familiar with the treatment considerations for each special group of patients. Gain exposure to essential skills such as venipuncture, learn to interpret commonly ordered medical tests, and develop competence in maintaining a child patient's airway in the operating room setting.

Lab Hours: 4

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PEDR 7280 - Literature Review II (3 Credit Hours)

Continue to read, evaluate, and gain insight into how to critically review both current and historical literature relevant to pediatric dentistry. Develop the skills needed to report on and discuss scientific literature effectively. Establish yourself as a lifelong learner in the field of pediatric dentistry.

Lecture Hours: 3

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Seminar Small Group

PEDR 7290 - Special Care Dentistry II (3 Credit Hours)

Understand all aspects of managing patient behavior to provide appropriate care, including for those with developmental, intellectual, medical, or craniofacial differences. Become proficient in behavior management techniques such as communicative methods, oral sedation, and general anesthesia. Understand the risks and benefits of each technique, along with the legal and ethical considerations. Provide care to patients with developmental, medical, intellectual, and craniofacial differences by utilizing comprehensive behavior guidance strategies.

Lecture Hours: 2 **Lab Hours:** 1

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PEDR 8013 - Pediatric Dentistry Research III (1 Credit Hour)

This course offered each semester to residents in pediatric dentistry. Residents are required to complete a research project under faculty guidance. These projects may be clinical or laboratory data collection studies, or, in limited situations, may take the form of case reports and/or comprehensive literature reviews. One half-day per week is provided throughout the program for completion of the

research project.

Contact Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

PEDR 8034 - Pediatric Dentistry Research IV (2 Credit Hours)

This is an independent study course offered each semester to residents in pediatric dentistry. Residents are required to complete a research project under faculty guidance. These projects may be clinical or laboratory data collection studies, or, in limited situations, may take the form of case reports and/or comprehensive literature reviews. One half-day per week is provided throughout the program for completion of the research project.

Contact Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

PEDR 8350 - Pediatric Dentistry Core Curriculum III (2 Credit Hours)

Learn and become proficient in all academic aspects of pediatric dentistry. Utilize this knowledge as the cornerstone of all clinical and treatment decisions throughout your practice. Understand key topics, including the development of dentition, cariology and prevention, growth and development, orthodontics, restorative dentistry and dental materials, trauma management, and pediatric oral pathology. Become familiar with and apply the basic concepts of practice management.

Lecture Hours: 2

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Lecture

PEDR 8360 - Clinical Pediatric Dentistry III (29 Credit Hours)

Complete comprehensive clinical evaluations with competence. Generate appropriate treatment plans and provide evidence-based treatments across multiple clinical settings, including the school-based clinic, the Augusta University Surgical Center, and the Children's Hospital of Georgia. Collaborate with faculty in Pediatric Dentistry and the Department of Orthodontics to learn essential skills for evaluating patient growth and development. Collect and interpret orthodontic records and deliver interceptive orthodontic interventions. Continue to develop all aspects of your clinical skills while gaining experience in teaching pediatric dentistry to dental students in the predoctoral clinic.

Other Hours: 29

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Supervised Lab/Clinic

PEDR 8370 - Hospital Dentistry III (2 Credit Hours)

Understand and function as part of a clinical team in treating both healthy and special needs patients in a hospital setting. Rotate through various departments within the Children's Hospital of Georgia (CHOG) and the Dental College of Georgia (DCG), including pediatric medicine, hematology/oncology, craniofacial clinic, and general anesthesia. Become familiar with the treatment considerations for each special group of patients. Gain exposure to essential skills such as venipuncture, learn to interpret commonly ordered medical tests, and develop competence in maintaining a child patient's airway in the operating room setting.

Lecture Hours: 1 **Lab Hours:** 1

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PEDR 8380 - Literature Review III (3 Credit Hours)

Read, evaluate, and gain insight into how to critically review both current and historical literature relevant to pediatric dentistry. Develop the skills needed to report on and discuss scientific literature effectively. Establish yourself as a lifelong learner in the field of pediatric

dentistry.

Lecture Hours: 3

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Seminar Small Group

PEDR 8450 - Pediatric Dentistry Core Curriculum IV (4 Credit Hours)

Learn and become proficient in all academic aspects of pediatric dentistry. Utilize this knowledge as the cornerstone of all clinical and treatment decisions throughout your practice. Understand key topics, including the development of dentition, cariology and prevention, growth and development, orthodontics, restorative dentistry and dental materials, trauma management, and pediatric oral pathology. Become familiar with and apply the basic concepts of practice management.

Lecture Hours: 4

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Lecture

PEDR 8460 - Clinical Pediatric Dentistry IV (29 Credit Hours)

Become competent in completing comprehensive clinical evaluations. Generate appropriate treatment plans and provide evidence-based treatments across multiple clinical settings, including the school-based clinic, the Augusta University Surgical Center, and the Children's Hospital of Georgia. Collaborate with faculty in Pediatric Dentistry and the Department of Orthodontics to learn essential skills for evaluating patient growth and development. Collect and interpret orthodontic records and deliver interceptive orthodontic interventions. Continue to develop all aspects of your clinical skills while gaining experience in teaching pediatric dentistry to dental students in the predoctoral clinic.

Other Hours: 29

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Supervised Lab/Clinic

PEDR 8470 - Hospital Dentistry IV (2 Credit Hours)

Understand and function as part of a clinical team in treating both healthy and special needs patients in a hospital setting. Rotate through various departments within the Children's Hospital of Georgia (CHOG) and the Dental College of Georgia (DCG), including pediatric medicine, hematology/oncology, craniofacial clinic, and general anesthesia. Become familiar with the treatment considerations for each special group of patients. Gain exposure to essential skills such as venipuncture, learn to interpret commonly ordered medical tests, and develop competence in maintaining a child patient's airway in the operating room setting.

Lab Hours: 2

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PEDR 8480 - Literature Review IV (3 Credit Hours)

Read, evaluate, and gain insight into how to critically review both current and historical literature relevant to pediatric dentistry. Develop the skills needed to report on and discuss scientific literature effectively. Establish yourself as a lifelong learner in the field of pediatric dentistry.

Lecture Hours: 3

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Seminar Small Group

PEDS 5000 - Basic Clerkship in Pediatrics (18 Credit Hours)

This six week pediatric clerkship provides basic education in child health. The recognition of normal developmental patterns, as well as the impact of age upon the expression of history taking, physical assessment, and laboratory interpretation within the various age groups that comprise pediatric practice. A lecture conference series accompanies the clinical rotations (nursery, ward and clinics) and is

designed to teach the students how to approach common pediatric conditions including health maintenance.

Lecture Hours: 28 **Contact Hours:** 45

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PEDS 5001 - Neonatal Sub-I/Critical Care (12 Credit Hours)

The student will serve in the same capacity as a first-year house officer being directly responsible for patients admitted to the neonatal nurseries. The student will be supervised by the senior NICU resident, the neonatal fellow, neonatal nurse practitioner and the NICU attending. Evaluation and management of high-risk infants will be emphasized and special techniques and procedures used in the care of the sick newborn will be employed.

Lecture Hours: 10 **Contact Hours:** 50

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Internship/Practicum

PEDS 5002 - Pediatric Off-Campus Externship (4 to 8 Credit Hours)

This special elective is offered to provide the student with experience in pediatrics in an off campus setting. It can be served either in a hospital or in a preceptor's office by prior arrangement with them and the department. Selection of a setting can be best accomplished through counsel with your advisor.

Contact Hours: 40

Repeatability: May be repeated for credit up to 3 times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Internship/Practicum

PEDS 5005 - Pediatric Cardiology Externship (4 to 8 Credit Hours)

This course offers experience in the study of congenital and acquired heart disease with emphasis on the clinical manifestations and findings, and interpretation of diagnostic tests. Correlation of the anatomic malformation with the physiologic alterations are emphasized as well as the natural history and prognosis. A series of tutorial sessions and a course of ECG interpretation will be provided as well as the opportunity to attend teaching sessions within the section. Each day begins with a tutorial. The remainder of the day is devoted to the evaluation and management of infants, children and adults with congenital heart disease seen in the pediatric cardiology practice site.

Lecture Hours: 10 **Contact Hours:** 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PEDS 5006 - Pediatric Allergy Immunology Externship (4 to 8 Credit Hours)

Students evaluate patients of all ages presenting with a variety of disorders ranging from common respiratory and cutaneous allergies to uncommon immunologic disorders. They gain experience with allergen skin testing, pulmonary function tests and microscopic examinations of sputum and nasal secretions. Two conferences and two pre-clinic lectures are presented each week.

Lecture Hours: 10 **Contact Hours:** 50

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Internship/Practicum

PEDS 5007 - Pediatric Research (4 to 8 Credit Hours)

This elective consists of research experience in selected areas of pediatrics through special arrangement with the pediatric faculty. For example, if a student desires to have an in-depth experience around a procedural technique or a specific investigative methodology, they may arrange this with a member of the faculty.

Lecture Hours: 2 Contact Hours: 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Internship/Practicum

PEDS 5009 - Pediatrics Sub-I (12 Credit Hours)

The pediatric substitute intern will serve as an active member (acting intern) of the pediatric house staff under the supervision of the pediatric resident and a pediatric faculty member. The student will have the opportunity for progressive experience in inpatient care. One student will be assigned to the general inpatient pediatric service, and one student will be assigned to the pediatric hematology/oncology service. In December, January, February and March, there will be openings for two students on the general inpatient service. When signing up for this elective, please specify general or hematology/oncology. Due to the limited number of pediatric sub-internships available at MCG, only those students who have declared for pediatrics will be able to sign up during the first six weeks of the elective sign-up period. After this initial six-week sign up period, all students will be able to apply for any available positions, regardless of career choice.

Lecture Hours: 10 Contact Hours: 50

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PEDS 5011 - Pediatric Gastroenterology Externship (4 to 8 Credit Hours)

This special elective provides the student an opportunity to participate in the diagnosis and management of gastrointestinal and hepatic disease in children and adolescents (acute and chronic). Patients are seen in clinic, on the inpatient wards and through the operating rooms and endoscopy suite. Topics include acute and chronic diarrhea, recurrent abdominal pain, inflammatory bowel disease, hepatitis (acute and chronic), persistent vomiting, hyperbilirubinemia, gastrointestinal bleeding, constipation, enteral and parenteral nutrition. A directed reading list will be provided to supplement "hands-on" experience.

Lecture Hours: 10 Contact Hours: 30

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PEDS 5013 - Pediatric Infectious Disease Externship (4 to 8 Credit Hours)

The objectives of this rotation include: To provide a one month rotation on the pediatric infectious disease service in order for the student to gain greater experience in diagnosis and management of infectious diseases in infants and children. To learn how to evaluate and complete (write-up) a pediatric consult. To integrate the clinical evaluation of a child with a presumed infectious disease with appropriate microbiology tests (bacterial, fungal and viral cultures, rapid antigen testing, HIV viral load/genotype, serology, etc.) This may include some time working with microbiology technologists directly on the processing of culture specimens, evaluating growth/change in cultures, and interpreting biochemical and other tests to identify specific organisms, etc. To research and present one major topic in pediatric infectious diseases during this rotation.

Lecture Hours: 10 Contact Hours: 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PEDS 5014 - Newborn Nursery Sub-I (4 to 8 Credit Hours)

Student will act in the same capacity as a first year house officer. Student will be responsible for admit and discharge examinations, attendance at deliveries and management of well infants and those with minor problems under the supervision of a pediatric resident

and general pediatric faculty member. Four in-house call nights are required, as chosen by the student.

Lecture Hours: 10 **Contact Hours:** 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Internship/Practicum

PEDS 5017 - Pediatric Hematology/Oncology Externship (4 to 8 Credit Hours)

This elective involves both outpatient and inpatient care. The student will learn how to formulate a diagnostic workup. A treatment plan will be developed and the multidisciplinary approach to patient management will be emphasized. The student will attend outpatient clinics each day and evaluate both new and established patients. Blood, spinal fluid and bone marrow smears will be reviewed. A research project can be a part of this elective if the student so desires.

Lecture Hours: 10 **Contact Hours:** 50

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PEDS 5018 - Pediatric Critical Care (12 Credit Hours)

This course is intended for students interested in critical care of infants and children. Students are assigned patients under the supervision of the critical care team and pediatric ICU attending. The focus of student teaching is to learn the basic skills needed for rapidly assessing and treating the critically ill child. Students are taught how to integrate a multiple organ systems approach to problem solving for such medical conditions as respiratory failure, shock, coma, pediatric trauma and care of the post-operative cardiac patient. This elective is NOT an acting internship. The setting is the Pediatric ICU at MCG Hospital. Those individuals interested in pediatrics, emergency medicine, anesthesiology or surgery are encouraged to enroll. Night call is arranged through the Pediatric ICU attending and average one night out of four.

Lecture Hours: 12 **Contact Hours:** 50

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PEDS 5020 - Pediatric Endocrinology Externship (4 to 8 Credit Hours)

This elective is designed to familiarize the student with normal variations in pre-pubertal and pubertal growth patterns, the diagnostic approach to pediatric endocrine conditions and the ongoing management of the conditions. The weekly Pediatric Diabetes Clinics offer the student the opportunity to become familiar with the multidisciplinary approach to a chronic condition. In addition, each week there will be a discussion of a chosen topic.

Lecture Hours: 20 **Contact Hours:** 20

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PEDS 5022 - Pediatric Pulmonology Externship (4 to 8 Credit Hours)

A four-week rotation in pediatric pulmonology will include both inpatient consultation and outpatient management regarding patients with cystic fibrosis, bronchopulmonary dysplasia, asthma, recurrent pneumonias and other common and uncommon respiratory disorders. Didactic sessions are conducted weekly with a reading list provided at the beginning of the course.

Lecture Hours: 24 **Contact Hours:** 16

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PEDS 5025 - Developmental Pediatrics (4 to 8 Credit Hours)

The purpose of this elective is to recognize the problem of childhood developmental delay and disability, the factors that contribute to the problem, the diagnostic process involved and the treatment modalities available to the patient. Upon completion, students should be able to correctly diagnose patients with various developmental delays and disabilities, understand the socio-economic factors that contribute to the problems, and utilize various treatment modalities for developmental delay and disability in children. Students will be exposed to an interdisciplinary approach which may include speech, occupational, and physical therapy, child psychology, and case management.

Lecture Hours: 12 **Lab Hours:** 62 **Contact Hours:** 50

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PEDS 5026 - Pediatric Enhanced Primary Care "PEPC" (4 to 8 Credit Hours)

The Pediatric Enhanced Primary Care "PEPC" clinic is an integrated behavioral health care clinic for children and adolescents, ages four to 16. Common presenting concerns include social, emotional, behavioral, and developmental deficits, and diagnoses within the neurodevelopmental, depressive, and anxiety disorder sections of the Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition (DSM-5). The interdisciplinary care team includes two pediatricians, a psychologist, a nurse practitioner specializing in sleep dysregulation, a psychiatry fellow, and doctoral psychology trainees. Students will see patients with the providers and will be responsible for completing a project and a case presentation.

Prerequisite(s): PEDS 5000 >= C

Lab Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Seminar - Small Group **Schedule Type (Additional):** Supervised Lab/Clinic

PEDS 5029 - Med-Peds Elective (4 to 8 Credit Hours)

This elective course is designed to provide medical students in their third and fourth year of training an immersive experience in the field of Med-Peds. In this elective, students will work a med-peds faculty member to evaluate and manage both adult and pediatric patients. Students will have the opportunity to develop insight into the med-peds pathway and for mentorship and career development.

Lab Hours: 4

Repeatability: May be repeated for credit one time.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Seminar - Small Group **Schedule Type (Additional):** Supervised Lab/Clinic

PEDS 5035 - Pediatric Assistantship at Special Needs Summer Camp (4 to 8 Credit Hours)

This unique elective allows the student to participate as part of the medical team each week in a camp setting with various medical conditions such as brain injury, chronic renal disease/solid organ transplant, hereditary bleeding disorders, cancer, asthma, emotional abuse, and congenital neuromuscular disorders.

Lecture Hours: 1 **Contact Hours:** 7

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PEDS 5036 - Pediatric Sub-Specialties Externship (4 to 8 Credit Hours)

Gain experience with the acute and chronic diseases associated with two different pediatric subspecialties.

Lecture Hours: 5 **Contact Hours:** 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia
Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PEDS 5037 - Advanced Pediatrics (4 to 8 Credit Hours)

In this course the students will take ownership of learning; develop a strong foundation in clinical reasoning; demonstrate understanding of improvement process and capacity for self-improvement; and work collaboratively and effectively as a member of an interdisciplinary team

Prerequisite(s): PEDS 5000 >= C

Lecture Hours: 4 **Lab Hours:** 6 **Contact Hours:** 20

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia **Course Level Restrictions:** Professional Semester

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Seminar-Small Group

PEDS 5038 - Spirituality and Medicine (4 Credit Hours)

Students research in-depth a topic of their choice and prepare a paper for presentation/publication. Optionally, they may participate in clinical rounds and other activities in the Department of Pastoral Care.

Contact Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MD_MEDDD-Medicine

Schedule Type (Primary): Independent Study

PEDS 5039 - Pediatric Hospital Medicine Elective (4 Credit Hours)

Provide exposure to inpatient pediatric medicine. Students work on a multidisciplinary team caring for children hospitalized with a wide array of pathologies.

Lab Hours: 4

Repeatability: May be repeated for credit one time.

Grade Mode: S- Satisfactory/Unsatisfactory

College Restrictions: 04 Medical College of Georgia

Schedule Type (Primary): Supervised Lab/Clinic

PEDS 5040 - Pediatric Palliative Care (4 to 8 Credit Hours)

During the Pediatric Palliative Care rotation medical students will interact with children and families with complex medical conditions and complex medical needs. Emphasis of this rotation will include understanding and implementing therapeutic communication, symptom management and coordination of services. Pediatric palliative care providers interact with the primary medical and surgical teams and assist in implementing discussions on goals of care and understanding "quality of life" as defined by the pediatric patient and family. End of life care will also be implemented as needed for pediatric patients and families for patients that are in the end stages of an illness.

Lecture Hours: 1 to 2 **Lab Hours:** 1 to 2 **Contact Hours:** 20

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PEDS 5041 - Pediatric Nephrology (4 to 8 Credit Hours)

This rotation is designed to familiarize the student with the diagnosis, management, and treatment of children with a variety of acute and chronic kidney-related disorders. This includes diagnostic and therapeutic services for children with renal disease, hypertension, fluid-electrolyte disorders, acid-base disorders, pre/post-operative care for end stage renal failure, and acute renal failure. Students will primarily see patients in the outpatient pediatric nephrology clinic and will have the opportunity to review laboratory studies, diagnostic imaging, and observe renal biopsies.

Lecture Hours: 1 **Lab Hours:** 8 **Contact Hours:** 20

Repeatability: May not be repeated for credit.
Grade Mode: Satisfactory/Unsatisfactory, Audit
College Restrictions: Medical College of Georgia
Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PEDS 5042 - Pediatric Therapy and Rehabilitation: The Medically Complex Child (4 to 8 Credit Hours)

Pediatric Therapy & Rehabilitation: The Medically Complex Child is a clinical elective in outpatient pediatric therapy/rehabilitation ideal for students interested in careers in general pediatrics and pediatric subspecialties, physical medicine & rehabilitation, neurology/child neurology, family medicine, or who seek a deeper understanding of speech therapy, physical therapy, and occupational therapy for children. In addition, this elective provides exposure to the "medically complex child" and highlights the need for extensive wrap-around services or a medical home for such patients. This elective requires both in-person clinical patient care under the supervision of speech, physical, and occupational therapists and self-directed reading and reflection.

Lecture Hours: 1 **Lab Hours:** 8 **Contact Hours:** 20

Repeatability: May not be repeated for credit.
Grade Mode: Satisfactory/Unsatisfactory, Audit
College Restrictions: Medical College of Georgia
Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PEDS 5043 - Pediatric Rheumatology (4 to 8 Credit Hours)

This rotation is designed to provide concentrated exposure to children and adolescents with autoimmune and inflammatory diseases and become familiar with commonly encountered pediatric rheumatologic conditions. The majority of this elective will occur in the outpatient setting and students will also have time for directed reading to further explore the pathophysiology of the diseases encountered.

Lecture Hours: 1 **Lab Hours:** 8 **Contact Hours:** 20

Repeatability: May not be repeated for credit.
Grade Mode: Satisfactory/Unsatisfactory, Audit
College Restrictions: Medical College of Georgia
Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PEDS 5045 - Pediatric Complex Care (4 to 8 Credit Hours)

Students develop critical thinking and problem-solving skills, providing compassionate and patient-centered care managing pediatric patients with complex medical needs within a collaborative multidisciplinary interprofessional team model. Students work in a collaborative interprofessional multidisciplinary setting with a pediatrician, nurse navigator, dietician, and pharmacist. Students also have assigned time in a transplant clinic and with a speech/feeding therapist.

Prerequisite(s): PEDS 5000 >= C

Other Hours: 4 to 8 **Contact Hours:** 4 to 8

Repeatability: May not be repeated for credit.
Grade Mode: Satisfactory/Unsatisfactory
Campus Restrictions: Main Campus, Athens Campus
Schedule Type (Primary): Supervised Lab/Clinic

PEDS 5077 - Pediatric Ambulatory Selective (12 Credit Hours)

The PEDS Ambulatory Selective will prepare students for care of pediatric patients in an ambulatory setting. Students will work in an outpatient setting supervised by a general pediatrician or pediatric sub-specialist. Students will independently obtain history and exam, document encounters in the medical record, communicate directly with patients, and give appropriate anticipatory guidance to patients. Students will learn about billing and coding, insurance issues, and meaningful use. Students must complete a portfolio in One45 and a clinical exercise on a pediatric patient.

Prerequisite(s): PEDS 5000 >= C

Contact Hours: 40

Repeatability: May be repeated for credit one time.
Grade Mode: Normal, Audit

College Restrictions: Medical College of Georgia **Campus Restrictions:** Main Campus
Schedule Type (Primary): Supervised Lab/Clinic

PEDS 5078 - Medicine/Pediatrics Ambulatory Selective (12 Credit Hours)

The MED-PEDS Ambulatory Selective will prepare students for care of adult and pediatric patients in an ambulatory setting. Students will work in an outpatient setting supervised by a physician with med-peds training. Students will independently obtain history and exam, document encounters in the medical record, communicate directly with patients, and give appropriate anticipatory guidance to patients. Students will learn about billing and coding, insurance issues, and meaningful use.

Prerequisite(s): PEDS 5000 >= C and GMED 5000 >= C

Lecture Hours: 10 **Lab Hours:** 10

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PEDS 5086 - Introduction to Pediatric Health Promotion/Disease Prevention Research (1 Credit Hour)

Prerequisite: None Shadow faculty and research staff in their research activities. Topics include evaluation of genetic and environmental contributors to cardiovascular (CV) disease development in youth, neurohormonal mechanisms responsible for changes in CV structure and function, social and community determinates of health behavior, prevention of CV disease and type 2 diabetes in youth via exercise, smoking prevention, stress reduction, safe exercise practices in the heat incl. Sick cell trait, and community interventions. Under the mentorship of a GPI faculty member, each student will complete an annotated bibliography in an area to be selected by the student within the first 3 weeks, and give a brief talk on the topic.

Lecture Hours: 10

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Unsupervised Lab/Clinic

PEDS 5099 - Pediatric Outpatient Orthopedics Externship (2 Credit Hours)

Students will develop history and physical exam skills related to musculoskeletal disorders in children and adolescents. They will also learn fundamentals of evaluating and managing pediatric patients with congenital and acquired muscular-skeletal disorders and injuries. Students will round on inpatient ward as needed; complete history and physical examinations in clinic and office setting; present and discuss cases with attending physicians on an ongoing bases; and will work in clinic 30-40 hours per week with approximately 6 hours per week in the OR.

Prerequisite(s): GMED 5000 >= C

Contact Hours: 50 to 60

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Internship/Practicum

PEDS 5999 - Basic Clerkship Remediation in Pediatrics (1 Credit Hour)

Remediation of the Basic Core Clerkship in Pediatrics

Prerequisite(s): PEDS 5000

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Independent Study

PEDS 6599 - Pediatric Chief Elective (4 to 8 Credit Hours)

The goal of this course is to introduce fourth-year students to their upcoming role as teachers during pediatric residency. Pediatric Student Chiefs help orient third-year students to expectations of the Pediatric Clerkship. Student Chiefs serve as student leaders and are available to the third-year students on the Pediatric Clerkship for support and guidance. Chiefs act as a liaison between students and faculty and participate in bedside and formal teaching. Chiefs work with the Clerkship Director to refine teaching and leadership skills and promote a better educational experience for third-year students.

Prerequisite(s): PEDS 5000

Lecture Hours: 4 **Other Hours:** 4 **Contact Hours:** 8

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Campus Restrictions: Main Campus, Athens Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

RPED 5000 - Pediatrics Allergy (27 Credit Hours)

Lecture Hours: 10 **Contact Hours:** 84

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Internship/Practicum

RPED 5001 - Pediatrics Cardiology (27 Credit Hours)

Lecture Hours: 10 **Contact Hours:** 84

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Internship/Practicum

RPED 5002 - Pediatrics General (27 Credit Hours)

Lecture Hours: 10 **Contact Hours:** 84

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Internship/Practicum

RPED 5003 - Pediatrics Neonatology (27 Credit Hours)

Lecture Hours: 10 **Contact Hours:** 84

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Internship/Practicum

RPED 5004 - Pediatrics Critical Care (27 Credit Hours)

Lecture Hours: 10 **Contact Hours:** 84

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Internship/Practicum

PERI 5211 - Fundamentals of Periodontology (2 Credit Hours)

This course provides lectures and seminars to introduce and orient the student to the fundamentals of periodontology. Lecture topics include periodontal anatomy, epidemiology & classification of periodontal diseases, periodontal etiology and pathogenesis, and clinical and microbiological characteristics of various non-plaque associated and plaque-associated periodontal diseases and conditions. In addition, this course includes two clinical experiences, one emphasizing periodontal charting in AxiUm, the other a first experience performing probing depths, gingival index, bleeding on probing, and gingival recession or overgrowth measurements on each other. This is their first experience examining a patient.

Lecture Hours: 1 **Lab Hours:** 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PERI 5302 - Non-Surgical Periodontics (1 Credit Hour)

This course will familiarize you with the principles and skills required to provide non-surgical periodontal therapy. You should be aware that all periodontal disease requires non-surgical treatment as a first step. This will not only be the foundation for your experience in the pre-doctoral clinics, but also for your practice after graduation.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

PERI 5591 - Periodontics Clinic I (2 Credit Hours)

A clinical course in which the student, under faculty supervision, diagnoses their patient's periodontal conditions and provides treatment for mildly/moderately involved cases. The need for early treatment and effective patient-performed disease control measures is emphasized.

Lab Hours: 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Supervised Lab/Clinic

PERI 5613 - Surgical Periodontics (2 Credit Hours)

This course is designed to introduce the student to basic surgical techniques available to manage selected periodontal cases. Material covered will include surgical techniques such as the gingivectomy, modified widman flap, open flap curettage, apically positioned flap, etc. The laboratory exercise in this course is designed to provide the student with an opportunity to gain limited hands-on pre-clinical surgical experience.

Lecture Hours: 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PERI 5692 - Periodontics Clinic II (2 Credit Hours)

A clinical course in which the student, under faculty supervision, diagnoses their patient's periodontal conditions and provides treatment for mildly/moderately involved cases. The need for early treatment and effective patient-performed disease control measures is emphasized.

Lab Hours: 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Supervised Lab/Clinic

PERI 5704 - Periodontics in General Practice (1 Credit Hour)

This course for D4 dental students will be presented in a lecture. Classes meet weekly, with an online component as a reference resource. The objectives of this course are to enable students to integrate periodontics into general dental practice and to prepare the students for integrated National Board Dental Examination (INBDE) and licensing exam.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

PERI 5793 - Periodontics Clinic III (1 Credit Hour)

A clinical course in which the student, under faculty supervision, diagnoses their patient's periodontal conditions and provides treatment for mildly involved cases. The need for early treatment and effective patient-performed disease control measures is emphasized.

Lab Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Supervised Lab/Clinic

PERI 5894 - Periodontics Clinic IV (1 Credit Hour)

A clinical course in which the student, under faculty supervision, diagnoses their patient's periodontal conditions and provides treatment for mildly involved cases. The need for early treatment and effective patient-performed disease control measures is emphasized.

Lab Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Supervised Lab/Clinic

PERR 7013 - Lasers in Periodontics (3 Credit Hours)

Didactic and clinical instruction regarding lasers used in periodontics.

Lecture Hours: 2 **Lab Hours:** 1

Repeatability: May not be repeated for credit.

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PEEB 5101 - Evidence-Based Dentistry (3 Credit Hours)

This is a small group, problem-based learning course that will give students the tools they need to understand how to conduct research, to develop into life-long learners and to learn presentation skills. It is comprised of several learning modules, consisting of a brief orientation by the faculty, then followed by self-paced learning by the students in randomly generated small groups. There will be only one mid-term online quiz to evaluate progression on general concepts given during class, and there will be only one final 10-minute presentation after the development of a virtual research proposal (and the execution with virtual data analysis) by each team. The ultimate goal of PEEB 5101 is to provide specific tools for the dental student to become a lifelong learner dentist (with a clear understanding of evidence based dentistry and the scientific method) with a fundamental critical approach to the dental literature.

Lecture Hours: 3

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

PEIM 5611 - Introduction to Oral Implantology (2 Credit Hours)

This course designed to introduce the basic concepts and principles related to dental and oral implantology. Historical perspectives, implant biomaterials and devices, principles of placement, reconstruction and maintenance, current problems, controversies and research directions are among the topics included.

Lecture Hours: 1 **Lab Hours:** 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PERR 7001 - Orientation for New Residents (10 Credit Hours)

This is an orientation course, in which residents are instructed in periodontal case documentation procedures, intraoral photography, record keeping and clinical protocol. Common therapeutic techniques used in advanced periodontal therapy are also presented and discussed, including such topics as behavior modification, mucogingival surgery, flaps, pedicle and free gingival grafts, guided tissue regeneration, osseous grafts. The course includes laboratory sessions for intraoral photography, periodontal case presentations, and surgical procedures are practiced on pig jaws.

Lecture Hours: 9 **Lab Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Seminar - Small Group

PERR 7002 - Anesthesia Rotation (1 Credit Hour)

Residents will spend one week on rotation to gain clinical experience in pre-sedation evaluation of patients, venipuncture, administration of IV drugs, evaluation of sedation effects on patients, and post-sedation evaluation. Some airway management may also be performed if the situation presents itself.

Other Hours: 1 **Contact Hours:** 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Supervised Lab/Clinic

PERR 7003 - Advanced Periodontology 2 (21 Credit Hours)

Lecture Hours: 16

Repeatability: May not be repeated for credit.

Grade Mode: Normal

College Restrictions: Residents

Schedule Type (Primary): Seminar - Small Group

PERR 7004 - Periodontal Literature Review I (3 Credit Hours)

Seminars on relevant readings in the periodontal literature. This is a weekly seminar in both the fall and spring semesters. Articles are assigned on specific topics; residents read and abstract the articles, and the articles are reviewed and critically discussed in the seminar session.

Lecture Hours: 2 **Contact Hours:** 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

PERR 7005 - Periodontal Literature Review II (4 Credit Hours)

Seminars on relevant readings in the periodontal literature. This is a weekly seminar in both the fall and spring semesters. Articles are assigned on specific topics; residents read and abstract the articles, and the articles are reviewed and critically discussed in the seminar session.

Lecture Hours: 3 **Contact Hours:** 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

PERR 7006 - Periodontal Journal Club I (2 Credit Hours)

Residents review current articles from the last 12 months of periodontal and dental implant literature. Specific articles are selected and critiqued in seminar sessions. In addition, topic based lit review is being coordinated by each resident in these seminar sessions.

Lecture Hours: 1 Contact Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

PERR 7007 - Periodontal Journal Club II (2 Credit Hours)

Residents review current articles from the last 12 months of periodontal and dental implant literature. Specific articles are selected and critiqued in seminar sessions. In addition, topic based lit review is being coordinated by each resident in these seminar sessions.

Lecture Hours: 1 Contact Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

PERR 7008 - Periodontal Treatment Planning and Surgery Seminar I (4 Credit Hours)

Residents prepare and present formal case presentations of patients they are treating in the periodontics clinic. These presentations include a complete data base, diagnosis/prognosis, treatment plan, treatment procedures, and evaluation of treatment results.

Residents also present series of slides that were obtained during periodontal surgery performed on their patients for critical evaluation and discussions.

Lecture Hours: 3 Contact Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

PERR 7009 - Periodontal Treatment Planning and Surgery Seminar II (4 Credit Hours)

Residents prepare and present formal case presentations of patients they are treating in the periodontics clinic. These presentations include a complete data base, diagnosis/prognosis, treatment plan, treatment procedures, and evaluation of treatment results.

Residents also present series of slides that were obtained during periodontal surgery performed on their patients for critical evaluation and discussions.

Lecture Hours: 3 Contact Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

PERR 7010 - Periodontal Research I (2 Credit Hours)

All residents must participate in a research project and prepare and submit a manuscript based on their research for publication. In addition, periodic presentations of resident's progress on their research projects are made in seminar sessions in the periodontics department and at local, regional, national and international conferences. Residents are strongly encouraged to be involved in a research project that leads to the defense of a thesis for either the MS or PhD in Oral Biology.

Contact Hours: 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

PERR 7011 - Periodontal Research II (2 Credit Hours)

All residents must participate in a research project and prepare and submit a manuscript based on their research for publication. In addition, periodic presentations of resident's progress on their research projects are made in seminar sessions in the periodontics department and at local, regional, national and international conferences. Residents are strongly encouraged to be involved in a research project that leads to the defense of a thesis for either the MS or PhD in Oral Biology.

Contact Hours: 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

PERR 7012 - Undergraduate Teaching I (2 Credit Hours)

Periodontics residents have responsibility to teach sophomore, junior and senior dental students in the undergraduate periodontal clinical program. Residents also present in a lecture/seminar course in Periodontics for senior dental students.

Lab Hours: 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Supervised Lab/Clinic

PERR 7020 - Topics in Periodontics (1 credit hour)

Introduces residents to the most common periodontal procedures, rationale, armamentarium and associated dental codes.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: S- Satisfactory/Unsatisfactory

Schedule Type (Primary): Lecture

PERR 7101 - Clinical Periodontics I (20 Credit Hours)

Patients with different types and severity of periodontal disease are treated using current modalities in both the Dental College of Georgia Graduate Periodontics Clinic and the VA Medical Center Dental Clinic. Post-doctoral students receive experiences with all accepted methods of periodontal treatment, and dental implantology in a population of medically compromised patients.

Lab Hours: 20

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Supervised Lab/Clinic

PERR 7102 - Clinical Periodontics 2 (24 Credit Hours)

Clinical Patient Care

Lab Hours: 24

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Supervised Lab/Clinic

PERR 8006 - Periodontal Literature Review III (3 Credit Hours)

Seminars on relevant readings in the periodontal literature. This is a weekly seminar in both the fall and spring semesters. Articles are assigned on specific topics; residents read and abstract the articles, and the articles are reviewed and critically discussed in the seminar session.

Lecture Hours: 2 **Contact Hours:** 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

PERR 8007 - Periodontal Literature Review IV (4 Credit Hours)

Seminars on relevant readings in the periodontal literature. This is a weekly seminar in both the fall and spring semesters. Articles are assigned on specific topics; residents read and abstract the articles, and the articles are reviewed and critically discussed in the seminar session.

Lecture Hours: 3 **Contact Hours:** 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

PERR 8008 - Periodontal Journal Club III (2 Credit Hours)

Residents review current articles from the last 12 months of periodontal and dental implant literature. Specific articles are selected and critiqued in seminar sessions. In addition, topic based lit review is being coordinated by each resident in these seminar sessions.

Lecture Hours: 1 Contact Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

PERR 8009 - Periodontal Journal Club IV (2 Credit Hours)

Residents review current articles from the last 12 months of periodontal and dental implant literature. Specific articles are selected and critiqued in seminar sessions. In addition, topic based lit review is being coordinated by each resident in these seminar sessions.

Lecture Hours: 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

PERR 8010 - Periodontal Treatment Planning and Surgery Seminar III (4 Credit Hours)

Residents prepare and present formal case presentations of patients they are treating in the periodontics clinic. These presentations include a complete data base, diagnosis/prognosis, treatment plan, treatment procedures, and evaluation of treatment results. Residents also present series of slides that were obtained during periodontal surgery performed on their patients for critical evaluation and discussions.

Lecture Hours: 2 Contact Hours: 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

PERR 8011 - Periodontal Surgery and Treatment Planning Seminar IV (4 Credit Hours)

Residents prepare and present formal case presentations of patients they are treating in the periodontics clinic. These presentations include a complete data base, diagnosis/prognosis, treatment plan, treatment procedures, and evaluation of treatment results. Residents also present series of slides that were obtained during periodontal surgery performed on their patients for critical evaluation and discussions.

Lecture Hours: 3 Contact Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

PERR 8012 - Periodontal Research III (2 Credit Hours)

All residents must participate in a research project and prepare and submit a manuscript based on their research for publication. In addition, periodic presentations of resident's progress on their research projects are made in seminar sessions in the periodontics department and at local, regional, national and international conferences. Residents are strongly encouraged to be involved in a research project that leads to the defense of a thesis for either the MS or PhD in Oral Biology.

Contact Hours: 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

PERR 8013 - Periodontal Research IV (2 Credit Hours)

All residents must participate in a research project and prepare and submit a manuscript based on their research for publication. In addition, periodic presentations of resident's progress on their research projects are made in seminar sessions in the periodontics department and at local, regional, national and international conferences. Residents are strongly encouraged to be involved in a

research project that leads to the defense of a thesis for either the MS or PhD in Oral Biology.

Contact Hours: 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

PERR 8014 - Undergraduate Teaching II (2 Credit Hours)

Periodontics residents have responsibility to teach sophomore, junior and senior dental students in the undergraduate periodontal clinical program. Residents also present in a lecture/seminar course in Periodontics for senior dental students.

Lab Hours: 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Supervised Lab/Clinic

PERR 8015 - Undergraduate Teaching III (2 Credit Hours)

Periodontics residents have responsibility to teach sophomore, junior and senior dental students in the undergraduate periodontal clinical program. Residents also present in a lecture/seminar course in Periodontics for senior dental students.

Lab Hours: 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Supervised Lab/Clinic

PERR 8016 - Periodontal Medicine/Medically Complex Patient Seminar I (1 Credit Hour)

This is a seminar course designed to address the inter-relationship between host systemic conditions and periodontal diseases, and the management of patients with complex medical histories. This course is intended to provide a thorough evidence based review and understanding of how the periodontal tissues are affected by systemic diseases/disorders as well as the systemic consequences of periodontal disease. This course is given over two semesters to all residents of the Advanced Education in Periodontics program. One-hour presentations are developed and presented by each resident every other week on selected topics related to Periodontal Medicine in conjunction with an in-depth discussion of the management of the medically complex patient using a combined literature-review, case presentation format. Guest/faculty lectures on different related topics may be included as well.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

PERR 8019 - Periodontal Medicine/Medically Complex Patient Seminar II (1 Credit Hour)

This is a seminar course designed to address the inter-relationship between host systemic conditions and periodontal diseases, and the management of patients with complex medical histories. This course is intended to provide a thorough, evidence-based review and understanding of how the periodontal tissues are affected by systemic diseases/disorders, as well as the systemic consequences of periodontal disease. This course is given over two semesters to all residents of the Advanced Education in Periodontics program. One-hour presentations are developed and presented by each resident every other week on selected topics related to Periodontal Medicine in conjunction with an in-depth discussion of the management of the medically complex patient using a combined literature-review, case-presentation format. Guest/faculty lectures on different related topics may be included as well.

Lecture Hours: 1 **Contact Hours:** 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Seminar Small Group

PERR 8020 - Topics in Periodontics II (1 Credit Hour)

Introduces residents to the most common periodontal procedures, rationale, armamentarium and associated dental codes.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: S- Satisfactory/Unsatisfactory
Schedule Type (Primary): Lecture

PERR 8104 - Clinical Periodontics III (25 Credit Hours)

Patients with different types and severity of periodontal disease are treated using current modalities in both the Dental College of Georgia Graduate Periodontics Clinic and the VA Medical Center Dental Clinic. Post-doctoral students receive experiences with all accepted methods of periodontal treatment, and dental implantology in a population of medically compromised patients.

Lab Hours: 25

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Supervised Lab/Clinic

PERR 8105 - Clinical Periodontics 4 (24 Credit Hours)

Clinical Patient Care

Lab Hours: 24

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Supervised Lab/Clinic

PERR 9008 - Periodontal Literature Review V (3 Credit Hours)

Seminars on relevant readings in the periodontal literature. This is a weekly seminar in both the fall and spring semesters. Articles are assigned on specific topics; residents read and abstract the articles, and the articles are reviewed and critically discussed in the seminar session.

Lecture Hours: 2 **Contact Hours:** 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

PERR 9009 - Periodontal Literature Review VI (4 Credit Hours)

Seminars on relevant readings in the periodontal literature. This is a weekly seminar in both the fall and spring semesters. Articles are assigned on specific topics; residents read and abstract the articles, and the articles are reviewed and critically discussed in the seminar session.

Lecture Hours: 3 **Contact Hours:** 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

PERR 9010 - Periodontal Journal Club V (2 Credit Hours)

Residents review current articles from the last 12 months of periodontal and dental implant literature. Specific articles are selected and critiqued in seminar sessions. In addition, topic based lit review is being coordinated by each resident in these seminar sessions.

Lecture Hours: 1 **Contact Hours:** 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

PERR 9011 - Periodontal Journal Club VI (2 Credit Hours)

Residents review current articles from the last 12 months of periodontal and dental implant literature. Specific articles are selected and critiqued in seminar sessions. In addition, topic based lit review is being coordinated by each resident in these seminar sessions.

Lecture Hours: 1 Contact Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

PERR 9012 - Periodontal Treatment Planning and Surgery Seminar V (4 Credit Hours)

Residents prepare and present formal case presentations of patients they are treating in the periodontics clinic. These presentations include a complete data base, diagnosis/prognosis, treatment plan, treatment procedures, and evaluation of treatment results. Residents also present series of slides that were obtained during periodontal surgery performed on their patients for critical evaluation and discussions.

Lecture Hours: 2 Contact Hours: 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Supervised Lab/Clinic

PERR 9013 - Periodontal Treatment Planning and Surgery Seminar VI (4 Credit Hours)

Residents prepare and present formal case presentations of patients they are treating in the periodontics clinic. These presentations include a complete data base, diagnosis/prognosis, treatment plan, treatment procedures, and evaluation of treatment results. Residents also present series of slides that were obtained during periodontal surgery performed on their patients for critical evaluation and discussions.

Lecture Hours: 3 Contact Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

PERR 9014 - Periodontal Research V (2 Credit Hours)

All residents must participate in a research project and prepare and submit a manuscript based on their research for publication. In addition, periodic presentations of resident's progress on their research projects are made in seminar sessions in the periodontics department and at local, regional, national and international conferences. Residents are strongly encouraged to be involved in a research project that leads to the defense of a thesis for either the MS or PhD in Oral Biology.

Contact Hours: 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

PERR 9015 - Periodontal Research VI (2 Credit Hours)

All residents must participate in a research project and prepare and submit a manuscript based on their research for publication. In addition, periodic presentations of resident's progress on their research projects are made in seminar sessions in the periodontics department and at local, regional, national and international conferences. Residents are strongly encouraged to be involved in a research project that leads to the defense of a thesis for either the MS or PhD in Oral Biology.

Contact Hours: 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

PERR 9016 - Undergraduate Teaching IV (2 Credit Hours)

Periodontics residents have responsibility to teach sophomore, junior and senior dental students in the undergraduate periodontal clinical program. Residents also present in a lecture/seminar course in Periodontics for senior dental students.

Lab Hours: 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Supervised Lab/Clinic

PERR 9017 - Undergraduate Teaching V (2 Credit Hours)

Periodontics residents have responsibility to teach sophomore, junior and senior dental students in the undergraduate periodontal clinical program. Residents also present in a lecture/seminar course in Periodontics for senior dental students.

Lab Hours: 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Supervised Lab/Clinic

PERR 9020 - Topics in Periodontics III (1 credit hour)

Introduces residents to the most common periodontal procedures, rationale, armamentarium and associated dental codes.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: S- Satisfactory/Unsatisfactory

Schedule Type (Primary): Lecture

PERR 9107 - Clinical Periodontics V (27 Credit Hours)

Patients with different types and severity of periodontal disease are treated using current modalities in both the Dental College of Georgia Graduate Periodontics Clinic and the VA Medical Center Dental Clinic. Post-doctoral students receive experiences with all accepted methods of periodontal treatment, and dental implantology in a population of medically compromised patients.

Lab Hours: 27

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Supervised Lab/Clinic

PERR 9108 - Clinical Periodontics VI (24 Credit Hours)

Patients with different types and severity of periodontal disease are treated using current modalities in both the Dental College of Georgia Graduate Periodontics Clinic and the VA Medical Center Dental Clinic. Post-doctoral students receive experiences with all accepted methods of periodontal treatment, and dental implantology in a population of medically compromised patients.

Lab Hours: 24

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Supervised Lab/Clinic

PERR 9109 - Oral Medicine Oral Pathology Rotation (1 Credit Hour)

Residents participate in a clinical rotation in the Oral Medicine and Oral Pathology Clinic at Augusta University Dental College of Georgia during their third year. Residents observe and assist oral medicine/oral pathology faculty in the evaluation and management of patients with various oral medicine, oral pathology, and chronic pain diagnoses.

Lab Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Supervised Lab/Clinic

DPHM 5602 - Pharmacology and Therapeutics for Dental Practice (5 Credit Hours)

This course will provide the student with a working understanding of pharmacology and pharmaco-therapeutics as applied to dental practice. Further, this course includes the pharmacology of drugs that affect the central nervous system, autonomic nervous system, cardiovascular system and endocrine function. Students will become familiar with drugs used in dental practice and the drugs that the patients may be taking for medical conditions.

Lecture Hours: 5

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Major Restrictions: Advanced Standing DMD

Schedule Type (Primary): Lecture

DPHM 5603 - Pharmacology Seminar (1 Credit Hour)

This course is a seminar review and an update of pharmacologic topics. A national board examination package has been assembled from the last (seven credit hours) released exams. The questions are grouped according to topics and questions are identified by year. At each session, students will register their responses to selected questions (either exact or modifications of those which have appeared on the national board examinations) utilizing a computerized program. The program allows instantaneous display of percentile distribution of answers to each question and thereby class performance on each question. After students have attempted each question and results have been displayed, the faculty will provide information as to why a particular answer is correct and the distracters are wrong. The extent of discussion for each question will depend on the class performance on each question. Approximately 25-30 questions on designated topics will be attempted during each scheduled session.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Major Restrictions: Advanced Standing DMD

Schedule Type (Primary): Lecture

PHRM 5003 - Pharmacology Tutorial (4 Credit Hours)

Expand knowledge and understanding of selected areas of pharmacology and therapeutics. Students may elect to study in-depth a specific area in Pharmacology and Toxicology under the guidance of one or more faculty members most familiar with that specific area.

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Directed Study (one-to-one)

PHRM 5004 - Pharmacology Research (4 Credit Hours)

Prerequisite: Approval by faculty member with whom research will be done Opportunity to participate in research programs being conducted by members of the faculty of the Department of Pharmacology and Toxicology

Repeatability: May be repeated for credit one time.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Internship/Practicum

PHRM 5012 - Clinical Pharmacology Tutorial (4 Credit Hours)

Better understanding of the actions and clinical uses of important classes or drugs and modes of drug delivery, allow students to reflect on and solve problems encountered with clinical therapeutics.

Lecture Hours: 8

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Internship/Practicum

PHRM 5015 - Critical Care Pharmacology Tutorial (4 Credit Hours)

This elective will provide a better understanding of the actions and clinical uses of common classes of drugs and modes of drug delivery in an intensive care unit. Allow students to reflect on and solve problems encountered with clinical therapeutics. Develop an evidence-based treatment and monitoring plan for diseases of critical illness.

Lecture Hours: 4 **Contact Hours:** 36

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Degree Restrictions: Doctor of Medicine **Campus Restrictions:** Albany

Schedule Type (Primary): Supervised Lab/Clinic **Schedule Type (Additional):** Unsupervised Lab/Clinic

PHRM 8041 - Pharmacology and Therapeutics (4 Credit Hours)

Prerequisites: Completion of SGS Core Curriculum. Current concepts and trends in pharmacological science and research. Covers all areas of pharmacology.

Lecture Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture

PHRM 8042 - Pharmacology and Therapeutics I (3 Credit Hours)

This is the first part of a two semester comprehensive course of study on the actions and uses of drug agents for treatment and prevention of disease. The focus of this advanced graduate course of on state-of-the-art pharmacological approaches to therapeutics. Basic principles of drug action (e.g. receptor therapy, pharmacokinetics) will be discussed. Covered in depth will be how pharmacological agents can be used to prevent and/or treat pathophysiological alterations in a number of organs and systems. Principles of cellular signal transduction will be taught with an emphasis on the molecular basis of current therapeutics principles.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Doctor of Philosophy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group

PHRM 8043 - Pharmacology and Therapeutics II (3 Credit Hours)

This is the second part of a two semester comprehensive course of study on the actions and uses of drug agents for treatment and prevention of disease. This part of the course builds on the basic pharmacological principles covered in part 1 of the course and focuses on cardiovascular, infectious diseases, endocrine diseases and therapeutics. Pharmacological agents used to prevent and/or treat pathophysiological alterations in a number of organs and systems will be emphasized in both clinical and research applications. Mechanisms of cellular signal transduction, adverse effects, critical thinking will also be addressed.

Prerequisite(s): PHRM 8042 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Doctor of Philosophy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group

PHRM 8120 - Cardiovascular Physiology and Pharmacology (3 Credit Hours)

Integrative study of the cardiovascular system and how drugs and identified molecular mechanisms target cardiovascular disease. Cardiac, vascular and renal physiology will be studied in detail, and also will be integrated into an overall scheme for control of the circulation. The scope will range from fundamental lectures on cardiovascular pharmacology and physiology to the state of the art understanding in respective areas of faculty.

Prerequisite(s): PHRM 8042 & PHRM 8043, minimum grade C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture

PHRM 8300 - Thesis Research (1 to 12 Credit Hours)

Permanent assignment to a specific lab with a faculty advisor and a defined research project. Students work under the mentorship of their faculty thesis advisor to define, develop, and carry out the basic study of a research problem of interest to both student and advisor. This course is designed to develop the experience, understanding, and skills to conduct and assess original, independent research in biomedical science. This course is typically taken more than one time and culminates in the final semester in the preparation and defense of a MS thesis.

Lab Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MS_PHAR-Pharmacology

Schedule Type (Primary): Thesis

PHRM 8301 - Neuropharmacology (4 Credit Hours)

Pharmacological principals of drugs that act on the brain and nervous system.

Lecture Hours: 3 **Contact Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

PHRM 9020 - Seminar in Pharmacology (1 Credit Hour)

Research presentations by MCG faculty and visiting research scientists.

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy

Schedule Type (Primary): Seminar - Small Group

PHRM 9090 - Pharmacology Journal Club (1 Credit Hour)

This course provides a structured opportunity for students to develop the habit of regular scientific reading in pharmacology. Students will read and present both classic and contemporary research articles, gaining exposure to foundational methodologies as well as recent advances in pharmacology and toxicology. Emphasis is placed on critical analysis of data, evaluation of research rigor, and identification of strengths and weaknesses in published studies. The course also develops professional skills in oral presentation and scientific communication. Reflecting the department's broad research interests, topics span the nervous, cardiovascular, respiratory, and immune systems. This cross-disciplinary approach offers students multiple perspectives on current pharmacological scientific literature.

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: THE GRADUATE SCHOOL

Schedule Type (Primary): Seminar Small Group

PHRM 9210 - Investigation of a Problem (1 to 12 Credit Hours)

The student works with individual faculty members on a specific investigative research problem. This provides an introduction to analytical techniques and the scientific method in action.

Lab Hours: 40

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: The Graduate School **Major Restrictions:** Pharmacology **Student Class Restrictions:** Graduate-Semester

Course Level Restrictions: Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Program Restrictions:** DPHIL_PHAR-Pharmacology

Schedule Type (Primary): Supervised Lab/Clinic

PHRM 9300 - Research (1 to 12 Credit Hours)

Students work closely with their major advisor on an in-depth study of a research problem of interest to both student and advisor. This course culminates in the preparation of a PhD dissertation. Permanent assignment to a specific lab with a major advisor and a defined research project. Enrollment in this course requires official admission to candidacy.

Lab Hours: 40

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: The Graduate School **Major Restrictions:** Pharmacology **Student Class Restrictions:** Graduate-Semester

Course Level Restrictions: Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Program Restrictions:** DPHIL_PHAR-Pharmacology

Schedule Type (Primary): Dissertation

PHIL 2010 - Introduction to Philosophy (3 Credit Hours)

This course introduces students to the methods by which philosophers raise questions and problems, provides answers and solutions, and thereby generate knowledge. It also introduces students to some of the key content areas of philosophy, which include the nature of reality, knowledge, consciousness, and the good.

Core IMPACTS Requirement(s) Satisfied: Arts, Humanities, and Ethics (Humanities)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

PHIL 2010H - Honors: Introduction to Philosophy (3 Credit Hours)

This course introduces students to the methods by which philosophers raise questions and problems, provides answers and solutions, and thereby generate knowledge. It also introduces students to some of the key content areas of philosophy, which include the nature of reality, knowledge, consciousness, and the good. This is an Honors Course.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

PHIL 2020 - Introduction to Critical Thinking (3 Credit Hours)

This course introduces students to the basics of critical thinking, which is defined as the systematic evaluation and formulation of claims by rational standards. As such, it develops tools for exploring both world and self and for defense against error. The course covers a wide variety of forms of reasoning: formal and informal, deductive and inductive, and scientific and moral.

Core IMPACTS Requirement(s) Satisfied: Arts, Humanities, and Ethics (Humanities)

Lecture Hours: 3

Repeatability: May be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PHIL 2020H - Honors: Introduction to Critical Thinking (3 Credit Hours)

This course introduces students to the basics of critical thinking, which is defined as the systematic evaluation and formulation of claims by rational standards. As such, it develops tools for exploring both world and self and for defense against error. The course covers a wide variety of forms of reasoning: formal and informal, deductive and inductive, and scientific and moral. This is an Honors Course.

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PHIL 2030 - Introduction to Ethics (3 Credit Hours)

This course introduces students to ethics, which is the rational investigation of the right and the good. It focuses on questions related to the nature of morality, the assessment of moral theories, and the application of moral theories to particular moral problems.

Core IMPACTS Requirement(s) Satisfied: Arts, Humanities, and Ethics (Humanities)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PHIL 2030H - Honors: Introduction to Ethics (3 Credit Hours)

This course introduces students to ethics, which is the rational investigation of the right and the good. It focuses on questions related to the nature of morality, the assessment of moral theories, and the application of moral theories to particular moral problems. This is an Honors Course.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PHIL 2040 - The Ethics of Digital Life (3 Credit Hours)

Today's students are citizens of an increasingly digital world, and many will one day be professionals in that world. This course introduces students to the ethical dimensions of digital life. It will include an account of the key elements that constitute digital life and ethical reasoning. It will also address a range of issues, including but not limited to social media, cyber security, big data, and gaming.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PHIL 2950 - Selected Topics (3 Credit Hours)

A study of various topics in philosophy of interest to the lower-division undergraduate student.

Repeatability: May be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Course Level Restrictions: US Undergraduate

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar Small Group, Independent Study

PHIL 3000 - Environmental Ethics (3 Credit Hours)

The course offers a philosophical account of the moral relationship between human beings and their natural environment with attention to animal interests and rights as well as our responsibilities to species and ecosystems. The course also investigates such environmental theories as deep ecology, social ecology and ecofeminism which attempt to explain the origins of environmental degradation. Prerequisite(s): Junior or senior standing or permission of instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PHIL 3002 - Ethical Theory (3 Credit Hours)

The course examines the major ethical theories and philosophers as represented in the virtue-ethics, utilitarian and deontological ethical traditions. The focus of the course will be on a critical examination of the rational basis of our moral duties and will raise questions about the status of moral beliefs and judgments. Prerequisite(s): Junior or senior standing or permission of instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Unsupervi Lab/Clinic, Seminar-Small Group, Asynchronous Instruction

PHIL 3003 - Contemporary Ethical Issues (3 Credit Hours)

A critical, analytic examination of contemporary ethical issues such as abortion, capital punishment, torture, and penalties for hate speech. Students will learn how to assess the pros and cons of an ethical position, how to develop an ethical argument in support of a position, and how to critically evaluate an opposing point of view. Prerequisite(s): Junior or senior standing or permission of the instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PHIL 3004 - Bioethics (3 Credit Hours)

This course investigates the philosophical basis of the values and goals of medicine. Ethical concepts, principles, and theories are applied to an analysis of clinical case studies; the ethical and philosophical significance of the experience of illness and suffering are considered; the course also examines contemporary bioethical issues such as abortion and euthanasia. Prerequisite(s): Junior or senior semester, or permission of the instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PHIL 3005 - Philosophy of the Human Person (3 Credit Hours)

A critical inquiry into the questions of the human condition and the realms of experience that generate the framework for thinking and acting, such as myth/religion, knowledge, art, science and the ethical/political. Prerequisite(s): Junior or senior standing or permission of instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PHIL 3010 - Ancient Political Philosophy (3 Credit Hours)

A critical examination of ancient Greek political philosophy in the writings of Plato and Aristotle and their expressions of fundamental theoretical and practical approaches to political experiences of regime and citizenship. Their contemporary relevance will be scrutinized. Prerequisite(s): Junior or senior standing or permission of instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Unsupervi Lab/Clinic

PHIL 3020 - Existentialism (3 Credit Hours)

In its search for meaning rather than truth, existential philosophy understands the human condition as individual choice in the pursuit of self-knowledge. Its discursive language includes vocabularies on love, belief, the other, responsibility, suffering, anxiety, despair, and death. Prerequisite(s): Junior or senior standing or permission of instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction, Practice Teaching

PHIL 3095 - Major Philosophers in History (3 Credit Hours)

To acquaint students with fundamental texts in philosophy. This course undertakes a critical reading of the work of one or two philosophers alternating ancient with modern in order to examine the meaning, language, and philosophical value of these texts.

Prerequisite(s): Junior or senior standing or permission of instructor.

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PHIL 3601 - Modern Political Philosophy (3 Credit Hours)

The development of modern political ideas underlying democratic theory and liberalism as found in the works of Hobbes, Locke, Rousseau and Mill. Prerequisite(s): Junior or senior standing or permission of instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PHIL 3701 - Contemporary Political Philosophy (3 Credit Hours)

An analysis of political ideas, theories, ideologies, and issues as presented in the writings of contemporary thinkers.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PHIL 4030 - Ancient Greek Philosophy (3 Credit Hours)

This course undertakes a critical study of the writings of Plato and Aristotle focusing on major teleological, ontological, and epistemological concepts such as Plato's forms and their ground in the good and Aristotle's being and its ground presence. Prerequisite(s): Junior or senior standing or permission of instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Directed Study (one-to-one), Asynchronous Instruction

PHIL 4031 - 19th Century European Philosophy (3 Credit Hours)

A critical analysis of the major ideas and theories of significant 19th century European philosophers such as Hegel, Schopenhauer, Marx, Nietzsche and Kierkegaard. Prerequisite(s): Junior or senior standing or permission of instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

PHIL 4032 - 20th Century Philosophy (3 Credit Hours)

A study of selected philosophers and philosophical issues, problems, questions and schools of thought in the 20th century.

Prerequisite(s): Junior or senior standing or permission of instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PHIL 4033 - 17th and 18th Century Philosophy (3 Credit Hours)

A study of some of the significant thinkers from the early modern period of philosophy such as Descartes, Leibniz, Spinoza, Locke, Berkeley and Hume; selected topics include epistemology, philosophy of science, metaphysics and philosophy of mind. Prerequisite(s): Junior or senior standing or permission of instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PHIL 4950 - Selected Topics (3 Credit Hours)

An intensive study of a selected philosophical issue, problem or school of thought not addressed in the current curriculum.

Prerequisite(s): Junior or senior standing or permission of instructor.

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

PHIL 4990 - Undergraduate Research (3 Credit Hours)

Independent research that focuses on a particular philosophical theme or philosopher of the student's choice under the direction of the philosophy instructor. Emphasis will be on the development of sound philosophical ideas and approaches. Prerequisite(s): Junior or senior standing or permission of instructor.

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Unsupervi Lab/Clinic, Independent Study

PHIL 6000 - Bioethics Capstone (1 to 4 Credit Hours)

Bioethics examines ethical issues and problems arising in the fields of medicine, biotechnology, and public health. This course introduces students to such problems and reviews conceptual frameworks used to work through them.

Lecture Hours: 0 to 4 **Lab Hours:** 0 to 4 **Contact Hours:** 0 to 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Independent Study **Schedule Type (Additional):** Directed Study (one-to-one), Asynchronous Instruction, Internship/Practicum

PHIL 6004 - Contemporary Issues in Bioethics (3 Credit Hours)

The course considers basic ethical theories, principles, and perspectives and their applicability to contemporary issues in bioethics. The limitations of these various theories and approaches will be examined as we consider how competing ethical theories are to be critically

assessed. Particular attention will be devoted to the four basic principle of medicine-autonomy, nonmaleficence, justice, and benevolence-and how they serve as indispensable (but incomplete) guides to ethical-problem solving in healthcare.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Graduate Coursework

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PHIL 6014 - Contemporary Bioethics Issues (3 Credit Hours)

The course situates bioethical questions and challenges related to disability, mental health, public health, reproductive justice, and racial disparities in health within a social, political and cultural context. Medical practice is critiqued with an eye toward eliminating bias and decreasing health disparities within marginalized communities and populations.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester, Post Professional, Professional Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group

PHIL 6950 - Special Topics in Philosophy (1 to 4 Credit Hours)

This class examines a special topic in Philosophy. Content of the course varies.

Lecture Hours: 0 to 4 **Lab Hours:** 0 to 4 **Contact Hours:** 0 to 4

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Graduate-Semester **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Independent Study,Directed Study (one-to-one),Asynchronous Instruction,Practice Teaching

CERG 5800 - Certificate in Physician Leadership and Advocacy (10 Credit Hours)

Students will understand different types of leadership, understand important professional traits required in leadership and advocacy, understand basic financial and legal methodology in healthcare, learn about career opportunities in leadership and advocacy, advocate for their patients and the health of their community, and learn the economics and systems of healthcare delivery.

Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit, Continuing Progress Courses

College Restrictions: Medical College of Georgia **Degree Restrictions:** Doctor of Medicine

Schedule Type (Primary): Lecture

PHSC 1011 - Physical Science (4 Credit Hours)

A survey of physics including motion and energy. May include heat, sound, light, electricity, magnetism, relativity, atoms and nuclei. Simple applications in problem solving. Credit may not be earned for both PHSC 1101 and PHSC 1100.

Prerequisite(s): (MATH1001 >= D or MATH1111 >= D or MATH1101 >= D or MATH1113 >= D)

Core IMPACTS Requirement(s) Satisfied: Technology, Mathematics, and Sciences (STEM)

Lecture Hours: 3 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Asynchronous Instruction

Additional Course Fee: Physics/Biophysics Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

PTHP 7105 - Clinical Physiology I (4 Credit Hours)

Provides students with the opportunity to develop the necessary foundational knowledge of normal physiology and pathophysiology of the musculoskeletal system as a basis for physical therapy examination and treatment. The impact of energy metabolism on growth,

aging, and exercise is explored. Provides instruction in exercise science as a strong foundation on which the principles of therapeutic exercise are applied. The role of exercise is to improve function, prevent dysfunction, and facilitate recovery from injury and disease throughout the lifespan.

Lecture Hours: 3 **Lab Hours:** 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PTHP- Physical Therapy **Student Class**

Restrictions: Graduate **Course Level Restrictions:** GS Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy

Degree Restrictions: DPT- Doctor of Physical Therapy **Program Restrictions:** Doctor of Physical Therapy **Campus Restrictions:** M-Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PTHP 7110 - Kinesiology for Physical Therapy Practice (3 Credit Hours)

Provides students with the opportunity to develop the skills, knowledge, and competency in kinesiology of human movement as the basis for physical therapy practice. Students will understand normal human motion to provide a conceptual framework for assessing abnormal motion. Content includes principles of the basic structure and function of human joints and skeletal muscle, and biomechanical principles of kinetics and kinematics. These principles of kinesiology are applied to the human body by region including the upper extremity, lower extremity, and axial skeleton. Further application includes posture and gait analysis, and basic assessment and treatment skills for joint mobility impairments.

Lecture Hours: 2 **Lab Hours:** 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PTHP- Physical Therapy **Student Class**

Restrictions: Graduate **Course Level Restrictions:** GS Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy

Degree Restrictions: DPT- Doctor of Physical Therapy **Program Restrictions:** Doctor of Physical Therapy **Campus Restrictions:** M-Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PTHP 7115 - Foundational Skills in Physical Therapy I (4 Credit Hours)

The first course in the foundations of physical therapy sequence which introduces the student to the multiple realms of the patient/client management process, International Classification of Functioning, Disability, and Health (ICF) model, systems review, and review of systems. Provides students with the opportunity to develop the skills, knowledge, and competency in communication within the healthcare system including conflict management, documentation, use of feedback, and patient/caregiver education while appreciating the impact of cultural and societal differences on the provision of patient/client care management. It is expected that the knowledge and skills gained in this course will be applied to patients/clients across the lifespan and continuum of care.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PTHP- Physical Therapy **Student Class**

Restrictions: Graduate **Course Level Restrictions:** GS Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy

Degree Restrictions: DPT- Doctor of Physical Therapy **Program Restrictions:** Doctor of Physical Therapy **Campus Restrictions:** M-Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Physical Therapy Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 250

PTHP 7120 - Personal and Professional Leadership Development (1 Credit Hour)

Provides students with the opportunity to develop the skills, knowledge, and competency related to personal leadership and professional development. This course is structured to promote professional identity formation by introducing the student to the professional organization (American Physical Therapy Association [APTA]), its core values and code of ethics. Students learn the standards of professionalism and professional conduct and learn to use feedback and personal reflection as a means of personal and professional growth. It is expected that the knowledge and skills gained in this course are applied to all health care practice settings.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PTHP- Physical Therapy **Student Class**

Restrictions: Graduate **Course Level Restrictions:** GS Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy
Degree Restrictions: DPT- Doctor of Physical Therapy **Program Restrictions:** Doctor of Physical Therapy **Campus Restrictions:** M-
Main Campus
Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PTHP 7125 - Physical Therapy Seminar I (0 Credit Hours)

The first course in the physical therapy seminar sequence. Provides students with opportunities involving academic advisement, service-learning, clinical education preparation and debriefing, programmatic assessment, annual compliance training, and college-specific requirements.

Repeatability: May be repeated for credit up to two times.

Grade Mode: S- Satisfactory/Unsatisfactory

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PTHP- Physical Therapy **Student Class**

Restrictions: Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy **Program Restrictions:** Doctor of Physical Therapy **Campus Restrictions:** M- Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PTHP 7200 - The Musculoskeletal Movement System I (6 Credit Hours)

The first course in the musculoskeletal movement system sequence. Provides students with the opportunity to develop the skills, knowledge, and competency necessary to manage patients/ clients with musculoskeletal dysfunction related to the lower quarter including the lumbopelvic spine and lower extremities. It is expected that the knowledge and skills gained in this course will be applied to effectively and efficiently manage patients/clients with common musculoskeletal problems across the lifespan and continuum of care to include application of the ICF model, history taking, systems review, examination, evaluation, diagnosis, prognosis, treatment and progression, re-evaluation, and discharge.

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PTHP- Physical Therapy **Student Class**

Restrictions: Graduate **Course Level Restrictions:** GS Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy **Degree Restrictions:** DPT- Doctor of Physical Therapy **Program Restrictions:** Doctor of Physical Therapy **Campus Restrictions:** M-
Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PTHP 7202 - Research II (1 Credit Hour)

Content includes literature search, article critique, beginning to identify a research question.

Lab Hours: 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Program Restrictions: DPT_PHTP-Physical Therapy

Schedule Type (Primary): Seminar - Small Group

PTHP 7205 - Movement System Case Application I (1 Credit Hour)

Provides students with the opportunity to develop the skills, knowledge, and competency necessary to manage patients/clients using clinical scenarios. This course helps students integrate didactic and clinical concepts using course specific case analysis, Integrated Clinical Experiences, and other activities in the classroom and in various clinical environments locally. The clinical scenarios in this course focus on musculoskeletal, cardiopulmonary, and metabolic diagnoses. It is expected that the knowledge and skills gained in this course will be applied to patients/clients across the lifespan and continuum of care to include application of the ICF model, history taking, systems review, examination, evaluation, diagnosis, prognosis, treatment and progression, re-evaluation, and discharge.

Lab Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PTHP- Physical Therapy **Student Class**

Restrictions: Graduate **Course Level Restrictions:** GS Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy

Degree Restrictions: DPT- Doctor of Physical Therapy **Program Restrictions:** Doctor of Physical Therapy **Campus Restrictions:** M- Main Campus

Schedule Type (Primary): Supervised Lab/Clinic

PTHP 7210 - Foundational Skills in Physical Therapy II (2 Credit Hours)

The second course in the foundations of physical therapy sequence which introduces the student to physical agents, assistive devices, and equipment utilized to promote safe and effective physical therapy practice. Provides students with the opportunity to develop the skills, knowledge, and competency in the assessment of and training of transitional movements such as transfers, balance, gait, and locomotion. It is expected that the knowledge and skills gained in this course will be applied to patients/clients across the lifespan and continuum of care.

Lecture Hours: 1 **Lab Hours:** 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PTHP- Physical Therapy **Student Class**

Restrictions: Graduate **Course Level Restrictions:** GS Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy

Degree Restrictions: DPT- Doctor of Physical Therapy **Program Restrictions:** Doctor of Physical Therapy **Campus Restrictions:** M- Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PTHP 7211 - Applied Physiology (3 Credit Hours)

Advanced discussions on topics of integrated applied physiology with respect to normal and pathologic responses and adaptations to various stimuli (e.g., exercise, aging, environmental stress, medications) as well as laboratories to develop clinical skills related to fitness assessment.

Lecture Hours: 2 **Lab Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPT_PHTP-Physical Therapy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PTHP 7212 - Professional Practice Expectations II (1 Credit Hour)

Professional Practice Expectation II (Professional Socialization) is designed to increase the student's awareness of interactions with clients and colleagues in the healthcare system. As a result of this course, the student will become more aware of their patterns of communication as well as having the opportunity to practice effective interaction skills (both oral and written) in a culturally competent manner. This course also examines both the patient's and clinician's response to illness and students are introduced to the concepts of confidentiality and informed consent.

Lecture Hours: 1 **Lab Hours:** 1 **Contact Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPT_PHTP-Physical Therapy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PTHP 7215 - The Cardiovascular and Cardiopulmonary Movement Systems (3 Credit Hours)

Provides students with the opportunity to develop the skills, knowledge, and competency necessary to manage patients/clients with cardiovascular and pulmonary dysfunction. Topics include: basic science, exercise physiology, pathophysiology, and the clinical skills required for the examination and treatment of the cardiovascular and pulmonary systems. Students select and perform examination and intervention skills for primary, secondary, and tertiary management of cardiovascular and pulmonary systems. A strong emphasis is placed on evaluation and development of a comprehensive plan of care to improve patient/client health and outcomes. It is expected that the knowledge and skills gained in this course will be applied to patients/clients across the lifespan and continuum of care to include application of the ICF model, history taking, systems review, examination, evaluation, diagnosis, prognosis, treatment and progression, re-evaluation, and discharge.

Lecture Hours: 2 **Lab Hours:** 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PTHP- Physical Therapy **Student Class Restrictions:** Graduate **Course Level Restrictions:** GS Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy **Degree Restrictions:** DPT- Doctor of Physical Therapy **Program Restrictions:** Doctor of Physical Therapy **Campus Restrictions:** M-Main Campus
Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PTHP 7220 - Seminar II (0 Credit Hours)

The second course in the physical therapy seminar sequence. Provides students with opportunities involving academic advisement, service-learning, clinical education preparation and debriefing, programmatic assessment, annual compliance training, and college-specific requirements.

Prerequisite(s): CAHS 7500 >= C and PTHP 7105 >=B and PTHP 7110 >=B and PTHP 7115 >=B and PTHP 7120 >=B and PTHP 7125 = S

Repeatability: May be repeated for credit up to two times.

Grade Mode: S- Satisfactory/Unsatisfactory

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PTHP- Physical Therapy **Student Class Restrictions:** Graduate **Course Level Restrictions:** GS Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy **Degree Restrictions:** DPT- Doctor of Physical Therapy **Program Restrictions:** Doctor of Physical Therapy **Campus Restrictions:** M-Main Campus
Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PTHP 7221 - Applied Physiology (5 Credit Hours)

This course is a foundational science course and serves as a core building block for the contextual framework needed to understand the physiological basis of physical therapy interventions taught in the clinical courses. The overall goal of the course is for students to gain a deeper understanding of physiology so that they can apply it to physical therapy interventions and better understand the limits of human adaptation, pathophysiology of diseases and pharmacological and non-pharmacological interventions. Exercise physiology and physiology through the lifespan are discussed in relation to three main themes, 1) energy metabolism, endocrine and bone physiology 2) neuromuscular physiology and 3) pulmonary/cardiovascular physiology. The course concludes with an integrative physiology which includes pharmacology and environmental adaptations renal physiology and progressively links the course through a project on fatigue.

Prerequisite(s): ANAT 7300 >= C or CAHS 7400 >= C

Lecture Hours: 4 **Lab Hours:** 1

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Degree Restrictions: Doctor of Physical Therapy **Program Restrictions:** DPT_PHTP-Physical Therapy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PTHP 7222 - Foundations of Physical Therapy (6 Credit Hours)

Introduction to the foundational skills for physical therapy practice. Students describe and appraise normal human motion to provide a conceptual framework for assessing abnormal motion. Current and relevant issues in physical therapy are examined. Basic elements of physical therapy management including examination, evaluation and diagnosis are discussed.

Lecture Hours: 3 **Lab Hours:** 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPT_PHTP-Physical Therapy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PTHP 7223 - General Concepts of Patient Management II (3 Credit Hours)

This course is designed to provide students with the knowledge and skills necessary to provide appropriate general interventions based on the examination, evaluation, diagnosis and prognosis of patients. Topics will include principles of therapeutic exercise, modalities and introduction to other physical therapy interventions. Course content will be presented in a modified problem/case based format and will include small group, interactive labs, resource and lecture sessions.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPT_PHTP-Physical Therapy

Schedule Type (Primary): Supervised Lab/Clinic

PTHP 7224 - General Concepts of Patient Management II (4 Credit Hours)

This course is designed to provide students with the knowledge and skills to provide appropriate interventions based on the examination, evaluation, and plan of care for various patients. Skills and knowledge from current and previous courses will be integrated. Students will determine expected outcomes and progress an appropriate plan of care based on patients' responses and healing constraints. Topics will include principles related to physical agents, therapeutic exercise, massage, joint mobilization, progressive mobility, balance, and splinting. Course content will be presented in a modified problem/case-based format and will include small group study activities, interactive labs, and resource and lecture sessions. D2L will be a mechanism for conveying additional information and resource material.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Program Restrictions: DPT_PHTP-Physical Therapy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PTHP 7300 - The Musculoskeletal Movement System II (6 Credit Hours)

The second course in the musculoskeletal movement system sequence. Provides students with the opportunity to develop the skills, knowledge, and competency necessary to manage patients with musculoskeletal dysfunction related to the upper quarter including the cervicothoracic spine and upper extremities. It is expected that the knowledge and skills gained in this course will be applied to effectively and efficiently manage patients with common musculoskeletal problems across the lifespan and continuum of care to include application of the ICF model, history taking, systems review, examination, evaluation, diagnosis, prognosis, treatment and progression, re-evaluation, and discharge.

Lecture Hours: 3 Lab Hours: 3

Repeatability: May be repeated for credit up to two times.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PTHP- Physical Therapy **Student Class**

Restrictions: Graduate **Course Level Restrictions:** GS Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy

Degree Restrictions: DPT- Doctor of Physical Therapy **Program Restrictions:** Doctor of Physical Therapy **Campus Restrictions:** M-Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PTHP 7303 - Research III (2 Credit Hours)

Contents include experimental control, selecting an appropriate experimental design, single-subject design, surveys, epidemiology, analysis, and project proposal (written report and slide presentation).

Lecture Hours: 1 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPT_PHTP-Physical Therapy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Independent Study

PTHP 7305 - Movement System Case Application II (1 Credit Hour)

Provides students with the opportunity to develop the skills, knowledge, and competency necessary to manage patients/clients using clinical scenarios. Helps students integrate didactic and clinical concepts using course specific case analysis, Integrated Clinical Experiences, and other activities in the classroom and in various clinical environments locally. The clinical scenarios in this course focus on musculoskeletal diagnoses, cardiopulmonary and metabolic diagnoses, and health promotion and wellness concepts. It is expected that the knowledge and skills gained in this course will be applied to patients/clients across the lifespan and continuum of care to include application of the ICF model, history taking, systems review, examination, evaluation, diagnosis, prognosis, treatment and progression, re-evaluation, and discharge.

Lab Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PTHP- Physical Therapy **Student Class**

Restrictions: Graduate **Course Level Restrictions:** GS Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy

Degree Restrictions: DPT- Doctor of Physical Therapy **Program Restrictions:** Doctor of Physical Therapy **Campus Restrictions:** M-Main Campus

Schedule Type (Primary): Supervised Lab/Clinic

PTHP 7310 - Health Promotion and Wellness in Physical Therapy (3 Credit Hours)

This course introduces cardiovascular and pulmonary physiology, including system control, exercise responses, and training adaptations, as the foundation for exercise prescription to improve health and fitness across the lifespan. Learners will examine strategies for disease prevention, chronic disease management, mental health, and wellness promotion through screening, physical activity, stress management, and health behavior change. The course also explores the impact of social determinants of health, health policy, and community resources, emphasizing the physical therapist's role in advocacy, interprofessional collaboration, and improving health outcomes.

Lecture Hours: 2 **Lab Hours:** 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PTHP- Physical Therapy **Student Class**

Restrictions: Graduate **Course Level Restrictions:** GS Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy

Degree Restrictions: DPT- Doctor of Physical Therapy **Program Restrictions:** Doctor of Physical Therapy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PTHP 7313 - Professional Practice Expectations III (2 Credit Hours)

Assists students in applying concepts of the teaching learning process to physical therapy practice in a variety of settings (academic, clinical, and professional). Students work in groups to plan, implement, and assess the efficacy of several learning activities.

Lecture Hours: 1 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPT_PHTP-Physical Therapy, MPH_HINF-Master of Public Health

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic

PTHP 7315 - Evidence-Based Practice I (2 Credit Hours)

Introduction to the principles of evidence-based practice. Students learn strategies for identifying and locating literature to answer a searchable clinical question. They also understand the various levels of evidence that physical therapists use to make clinical decisions. Students learn a clinically based approach for understanding commonly used statistical tools used to analyze data. These skills will enable students to systematically review scientific literature and make informed decisions regarding the application of research findings in future courses.

Lecture Hours: 1 **Lab Hours:** 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PTHP- Physical Therapy **Student Class**

Restrictions: Graduate **Course Level Restrictions:** GS Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy

Degree Restrictions: DPT- Doctor of Physical Therapy **Program Restrictions:** Doctor of Physical Therapy **Campus Restrictions:** M-Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PTHP 7320 - Physical Therapy Seminar III (0 Credit Hours)

The third course in the physical therapy seminar sequence. Provides students with opportunities involving academic advisement, service-learning, clinical education preparation and debriefing, programmatic assessment, annual compliance training, and college-specific requirements.

Repeatability: May be repeated for credit up to two times.

Grade Mode: S- Satisfactory/Unsatisfactory

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PTHP- Physical Therapy **Student Class**

Restrictions: Graduate **Course Level Restrictions:** GS Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy

Degree Restrictions: DPT- Doctor of Physical Therapy **Program Restrictions:** Doctor of Physical Therapy **Campus Restrictions:** M-Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PTHP 7331 - Orthopaedics I (6 Credit Hours)

Student groups work through problems and case studies related to peripheral joint pathology, impairments, functional limitations, and disabilities. Emphasis is placed on examination, evaluation, intervention, and physical therapy diagnosis related to the shoulder, elbow, wrist, hand, hip, knee, ankle and foot. Content will include: 1) all previously learned examination skills such as assessment of sensation, range of motion, and strength; 2) special test related to the appendicular skeleton; 3) interventions such as thermal modalities, electrotherapeutics, therapeutic exercise, and home programs; and 4) evaluation, intervention, and physical therapy diagnosis skills related to the appendicular skeleton. Basic science principles are integrated with examination and intervention. Both didactic and lab sessions are used during this unit.

Lecture Hours: 3 **Lab Hours:** 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPT_PHTP-Physical Therapy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PTHP 7341 - Medical Conditions I (6 Credit Hours)

Provides students with the knowledge and skills necessary to provide appropriate PT interventions based on the examination, evaluation, diagnosis and prognosis of patients with cardiopulmonary and endocrine dysfunction. Wellness and prevention as it relates to cardiopulmonary disease and diabetes mellitus will be studied. Course content is presented in modified problem/case based format and includes small group study, interactive labs, resource and lecture sessions.

Lecture Hours: 3 **Lab Hours:** 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPT_PHTP-Physical Therapy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PTHP 8005 - The Integumentary and Endocrine Movement Systems (3 Credit Hours)

Provides students with the opportunity to develop the skills, knowledge, and competency necessary to manage patients/clients with diseases and conditions that impact the integumentary system, including diabetes and vascular insufficiencies. Topics covered include basic science, pathophysiology, and the clinical skills required for the examination and treatment of various wounds and burn injuries. Students select and perform examination of the integumentary and endocrine systems across the lifespan and environments of care. Emphasis is on the evaluation and development of a comprehensive plan of care to improve patient/client health and outcomes. It is expected that the knowledge and skills gained in this course will be applied to patients/clients across the lifespan and continuum of care to include application of the ICF model, history taking, systems review, examination, evaluation, diagnosis, prognosis, treatment and progression, re-evaluation, and discharge.

Lecture Hours: 2 **Lab Hours:** 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PTHP- Physical Therapy **Student Class**

Restrictions: Graduate **Course Level Restrictions:** GS Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy

Degree Restrictions: DPT- Doctor of Physical Therapy **Program Restrictions:** Doctor of Physical Therapy **Campus Restrictions:** M-Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Physical Therapy Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 250

PTHP 8010 - Motor Control and Movement Analysis (3 Credit Hours)

Provides students with the opportunity to learn the theoretical constructs and principles of motor learning, motor control, and motor planning involved in the interactions of body systems that contribute to human movement. Typical and atypical nervous system development and reflex integration are emphasized as a fundamental precursor to normal movement development. The course provides clinical application via analysis of postures and movement across the lifespan and diagnoses involving movement systems of the human body.

Lecture Hours: 1 **Lab Hours:** 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PTHP- Physical Therapy **Student Class**

Restrictions: Graduate **Course Level Restrictions:** GS Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy

Degree Restrictions: DPT- Doctor of Physical Therapy **Program Restrictions:** Doctor of Physical Therapy **Campus Restrictions:** M- Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PTHP 8015 - Evidence-Based Practice II (1 Credit Hour)

Introduction to developing critical literature review skills. Students learn and apply strategies on how to critically review multiple types of research studies and published articles. By the end of this course, students systematically review a peer-reviewed article and make clinical decisions regarding application of the findings in physical therapy practice.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PTHP- Physical Therapy **Student Class**

Restrictions: Graduate **Course Level Restrictions:** GS Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy

Program Restrictions: Doctor of Physical Therapy **Campus Restrictions:** M- Main Campus

Schedule Type (Primary): Lecture

PTHP 8020 - Leading in Physical Therapy (1 Credit Hour)

This course prepares students to develop the knowledge, skills, and competencies essential for professional leadership and collaboration within healthcare teams. Students will examine strategies for building strong relationships, fostering teamwork, and leading through conflict, while recognizing that collaboration requires individuals to reflect on and adapt their own behaviors. Interprofessional competencies of effective teamwork and communication will be explored to optimize team performance and improve health outcomes. The course prepares students for their first clinical rotation by addressing patient and client rights, legal and ethical guidelines, as well as the appropriate supervision and delegation of care components.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PTHP- Physical Therapy **Student Class**

Restrictions: Graduate **Course Level Restrictions:** GS Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy

Degree Restrictions: DPT- Doctor of Physical Therapy **Program Restrictions:** Doctor of Physical Therapy **Campus Restrictions:** M- Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PTHP 8025 - Physical Therapy Clinical Experience I (8 Credit Hours)

The first full-time clinical experience in the clinical education coursework. Focuses on the care of patients/clients with orthopedic problems. Students are assigned to outpatient clinical facilities. Under the direct supervision of a licensed physical therapist, students are expected to use the knowledge and skills gained in didactic coursework to examine, evaluate, diagnose, develop a prognosis, outline expected outcomes, and design and implement an intervention plan for patients/clients with orthopedic dysfunction.

Repeatability: May be repeated for credit up to two times.

Grade Mode: S- Satisfactory/Unsatisfactory

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PTHP- Physical Therapy **Student Class**

Restrictions: Graduate **Course Level Restrictions:** GS Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy

Degree Restrictions: DPT- Doctor of Physical Therapy **Program Restrictions:** Doctor of Physical Therapy **Campus Restrictions:** M- Main Campus

Schedule Type (Primary): Internship/Practicum

PTHP 8030 - Physical Therapy Seminar IV (0 Credit Hours)

The fourth course in the physical therapy seminar sequence. Provide students with opportunities involving academic advisement, service-learning, clinical education preparation and debriefing, programmatic assessment, annual compliance training, and college-specific requirements.

Repeatability: May be repeated for credit up to two times.

Grade Mode: S- Satisfactory/Unsatisfactory

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PTHP- Physical Therapy **Student Class**

Restrictions: Graduate **Course Level Restrictions:** GS Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy

Degree Restrictions: DPT- Doctor of Physical Therapy **Program Restrictions:** Doctor of Physical Therapy **Campus Restrictions:** M-Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PTHP 8105 - The Nervous Movement System I (6 Credit Hours)

This is the first course in the nervous movement system sequence. It provides students with the opportunity to develop the skills, knowledge, and competency necessary to manage patients/ clients with neurologic dysfunction. Emphasis is placed on adults with acquired brain injuries, spinal cord injuries, and stable neurologic conditions across the continuum of care. It is expected that the knowledge and skills gained in this course will be applied to effectively and efficiently manage patients/ clients with common neurologic problems across the continuum of care to include application of the ICF model, history taking, systems review, examination, evaluation, diagnosis, prognosis, treatment and progression, re-evaluation, and discharge.

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May be repeated for credit up to two times.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PTHP- Physical Therapy **Student Class**

Restrictions: Graduate **Course Level Restrictions:** GS Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy

Degree Restrictions: DPT- Doctor of Physical Therapy **Program Restrictions:** Doctor of Physical Therapy **Campus Restrictions:** M-Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PTHP 8110 - Movement System Case Application III (1 Credit Hour)

Provides students with the opportunity to develop the skills, knowledge, and competency necessary to manage patients/clients using clinical scenarios. Helps students integrate didactic and clinical concepts using course specific case analysis, Integrated Clinical Experiences, and other activities in the classroom and in various clinical environments locally. The clinical scenarios focus on neurologic impairments, complex multi-system diagnoses, and the geriatric population. It is expected that the knowledge and skills gained in this course will be applied to patients/clients across the lifespan and continuum of care to include application of the ICF model, history taking, systems review, examination, evaluation, diagnosis, prognosis, treatment and progression, re-evaluation, and discharge.

Lab Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PTHP- Physical Therapy **Student Class**

Restrictions: Graduate **Course Level Restrictions:** GS Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy

Degree Restrictions: DPT- Doctor of Physical Therapy **Program Restrictions:** Doctor of Physical Therapy **Campus Restrictions:** M-Main Campus

Schedule Type (Primary): Supervised Lab/Clinic

PTHP 8115 - Interactions of Multiple Body Movement Systems (3 Credit Hours)

Provides students with the opportunity to develop the skills, knowledge, and competencies necessary to manage patients/clients with multiple system involvement. The dysfunctional states or disorders considered may include primary disease or comorbidities in the gastrointestinal, genitourinary, hepatic, renal, lymphatic and immune systems. Students learn to address multiple disease pathologies and co-morbidities as they compound to produce medically complex situations in patients/clients. It is expected that the knowledge and skills gained in this course will be applied to patients/clients across the lifespan and continuum of care to include application of the ICF model, history taking, systems review, examination, evaluation, diagnosis, prognosis, treatment and progression, re-evaluation and discharge.

Lecture Hours: 2 **Lab Hours:** 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PTHP- Physical Therapy **Student Class**

Restrictions: Graduate **Course Level Restrictions:** GS Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy

Degree Restrictions: DPT- Doctor of Physical Therapy **Program Restrictions:** Doctor of Physical Therapy **Campus Restrictions:** M-Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PTHP 8120 - The Musculoskeletal Movement System III (2 Credit Hours)

The third and final course in the musculoskeletal movement system sequence. Provides students with the opportunity to develop the skills, knowledge, and competency necessary to manage patients/clients with amputations including determining prosthetic candidacy, the team approach to prosthetic prescription, prosthetic components, recognizing and managing prosthetic gait deviations, and prosthetic training. It is expected that the knowledge and skills gained in this course will be applied to effectively and efficiently manage patients/ clients that require the use of prostheses and/or orthoses across the lifespan and continuum of care to include application of the ICF model, history taking, systems review, examination, evaluation, diagnosis, prognosis, treatment and progression, re-evaluation, and discharge.

Lecture Hours: 1 **Lab Hours:** 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PTHP- Physical Therapy **Student Class**

Restrictions: Graduate **Course Level Restrictions:** GS Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy

Degree Restrictions: DPT- Doctor of Physical Therapy **Program Restrictions:** Doctor of Physical Therapy **Campus Restrictions:** M-Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PTHP 8125 - Geriatric Considerations in Patient Management (2 Credit Hours)

A comprehensive, evidence-based overview of physical therapy management of older adults. Students learn to manage the unique needs of an aging adult population across all healthcare settings. Explores the myths of aging while providing evidence to enable older adults to not only survive but thrive. It is expected that the knowledge and skills regarding the aging process gained in this course will be applied to geriatric patients/ clients across all healthcare settings and diagnoses.

Lecture Hours: 1 **Lab Hours:** 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PTHP- Physical Therapy **Student Class**

Restrictions: Graduate **Course Level Restrictions:** GS Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy

Degree Restrictions: DPT- Doctor of Physical Therapy **Program Restrictions:** Doctor of Physical Therapy **Campus Restrictions:** M-Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PTHP 8132 - Orthopaedics II (3 Credit Hours)

Student groups work through problems and case studies related to spinal pathology, impairments, functional limitations, and disabilities. Emphasis is placed on examination, evaluation, intervention, and physical therapy diagnosis related to the spine and axial skeleton. Content includes 1) all previously learned examination skills such as assessment of sensation, range of motion, and strength; 2) previously learned interventions such as thermal modalities, electro therapeutics, therapeutic exercise, and home programs; and 3) new examination, evaluation, intervention, and physical therapy diagnosis skills related to the spine and axial skeleton. Basic science principles are integrated with examination and intervention.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPT_PHTP-Physical Therapy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PTHP 8191 - Clinical Experience I (8 Credit Hours)

An 8-week, full-time clinical experience focusing on the care of patients with orthopedic problems. Students are assigned to outpatient clinical facilities. Under the direct supervision of a physical therapist, students use the knowledge and skills gained in didactic coursework to examine, evaluate, diagnose, develop prognoses and expected outcomes, and intervention plans and implement those plans for patients with orthopedic dysfunction. Students document their work using proper format, research information about problems with which they are unfamiliar, and perform other duties pertinent to functioning as a member of the healthcare team.

Contact Hours: 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: DPT_PHTP-Physical Therapy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Supervised Lab/Clinic

PTHP 8230 - Evidence-Based Practice III (1 Credit Hour)

Introduction to research designs. Students become familiar with multiple research designs used to answer clinical questions pertinent to physical therapy practice. Students also learn the ethics of conducting research and how to gain informed consent. By the end of the course, students will have the requisite tools to develop a research design to answer a clinical question.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PTHP- Physical Therapy **Student Class**

Restrictions: Graduate **Course Level Restrictions:** GS Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy

Degree Restrictions: DPT- Doctor of Physical Therapy **Program Restrictions:** Doctor of Physical Therapy **Campus Restrictions:** M-Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PTHP 8235 - Physical Therapy Seminar 5 (0 Credit Hours)

The first course in the physical therapy seminar sequence. Provides students with opportunities involving academic advisement, service-learning, clinical education preparation and debriefing, programmatic assessment, annual compliance training, and college-specific requirements.

Prerequisite(s): CAHS 7500 >= C and CAHS 7550 >=C and PTHP 7105 >=B and PTHP 7110 >=B;PTHP 7115 >=B and PTHP 7120 >=B and PTHP 7125 = S and PTHP 7200 >=B and PTHP 7205 >=B and PTHP 7210 >=B and PTHP 7215 >=B and PTHP 7220 = S and PTHP 7300 >=B and PTHP 7305 >= B and PTHP 7310 >=B and PTHP 7315 >=B and PTHP 7320 = S and PTHP 8005 >=B and PTHP 8010 >=B and PTHP 8015 >= B and PTHP 8020 >=B and PTHP 8025 >=B and PTHP 8030 = S

Repeatability: May be repeated for credit up to two times.

Grade Mode: S- Satisfactory/Unsatisfactory

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PTHP- Physical Therapy **Student Class**

Restrictions: Graduate **Course Level Restrictions:** GS Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy

Degree Restrictions: DPT- Doctor of Physical Therapy **Program Restrictions:** Doctor of Physical Therapy **Campus Restrictions:** M-Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PTHP 8300 - The Nervous Movement System II (2 Credit Hours)

This is the second course in the nervous movement system sequence. It provides students with the opportunity to develop the skills, knowledge, and competency necessary to manage patients/clients with neurologic injury and illness. Emphasis is placed on assessing and addressing the specific needs of individuals with progressive neurologic diseases. The course also emphasizes the special considerations of ongoing health promotion and wellness of individuals with chronic stable and progressive neurologic disorders across the lifespan. It is expected that the knowledge and skills gained in this course will be applied to effectively and efficiently manage patients/ clients with common neurologic problems across the continuum of care to include application of the ICF model, history taking, systems review, examination, evaluation, diagnosis, prognosis, treatment and progression, re-evaluation, and discharge.

Lecture Hours: 1 **Lab Hours:** 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PTHP- Physical Therapy **Student Class**

Restrictions: Graduate **Course Level Restrictions:** GS Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy

Degree Restrictions: DPT- Doctor of Physical Therapy **Program Restrictions:** Doctor of Physical Therapy **Campus Restrictions:** M-Main Campus

Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PTHP 8310 - Movement System Case Application IV (1 Credit Hour)

Provides students with the opportunity to develop the skills, knowledge, and competency necessary to manage patients/clients using clinical scenarios. Helps students integrate didactic and clinical concepts using course specific case analysis, Integrated Clinical Experiences, and other activities in the classroom and in various clinical environments locally. The clinical scenarios in this course focus on neurologic impairments, complex multi-system diagnoses, and the pediatric population. It is expected that the knowledge and skills gained in this course will be applied to patients/clients across the lifespan and continuum of care to include application of the ICF model, history taking, systems review, examination, evaluation, diagnosis, prognosis, treatment and progression, re-evaluation, and discharge.

Lab Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PTHP- Physical Therapy **Student Class**

Restrictions: Graduate **Course Level Restrictions:** GS Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy

Degree Restrictions: DPT- Doctor of Physical Therapy **Program Restrictions:** Doctor of Physical Therapy **Campus Restrictions:** M-Main Campus

Schedule Type (Primary): Supervised Lab/Clinic

PTHP 8320 - Integrated Patient Management of Individuals with Acute and Critical Illness (3 Credit Hours)

Focuses on the management of individuals with complex, acute and/or chronic illness, disease, or surgical intervention due to life-threatening health conditions in the intensive care unit, acute care hospital, and across the care continuum during recovery. Provides students with the opportunity to apply their knowledge and skills to develop clinical reasoning and practice professional communication in more intense, complex patient care situations. Emphasizes how physical therapy management must include advanced clinical practice across the care continuum for optimal patient outcomes for individuals with acute, critical illness and disease.

Lecture Hours: 1 **Lab Hours:** 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PTHP- Physical Therapy **Student Class**

Restrictions: Graduate **Course Level Restrictions:** GS Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy

Degree Restrictions: DPT- Doctor of Physical Therapy **Program Restrictions:** Doctor of Physical Therapy **Campus Restrictions:** M-Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PTHP 8330 - Pediatric Considerations in Patient Management (3 Credit Hours)

A comprehensive, evidence-based overview of physical therapy management of pediatric patients/ clients. Explores developmental milestones, the unique psychosocial needs of the patient/ client and family, handling skills, and communication considerations within the care of this population. It is expected that the knowledge and skills gained in this course will be applied to pediatric patients/ clients across all healthcare settings and diagnoses.

Lecture Hours: 2 **Lab Hours:** 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PTHP- Physical Therapy **Student Class**

Restrictions: Graduate **Course Level Restrictions:** GS Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy

Degree Restrictions: DPT- Doctor of Physical Therapy **Program Restrictions:** Doctor of Physical Therapy **Campus Restrictions:** M-Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PTHP 8335 - Physical Therapy Practice Management (4 Credit Hours)

Provides students with the opportunity to develop the skills, knowledge, and competency necessary for safe and effective practice management across settings. This course is structured to discuss human resource management, organizational structure, business planning, communication, fiscal responsibilities, productivity, reimbursement, professional development, policies and procedures, quality and risk management, marketing, legal and ethical issues, and health information technology and informatics. It is expected that the knowledge and skills gained in this course will be applied to all healthcare practice settings.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PTHP- Physical Therapy **Student Class**

Restrictions: Graduate **Course Level Restrictions:** GS Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy

Degree Restrictions: DPT- Doctor of Physical Therapy **Program Restrictions:** Doctor of Physical Therapy **Campus Restrictions:** M- Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PTHP 8340 - Physical Therapy Seminar VI (0 Credit Hours)

The sixth course in the physical therapy seminar sequence. Provides students with opportunities involving academic advisement, service-learning, clinical education preparation and debriefing, programmatic assessment, annual compliance training, and college-specific requirements.

Prerequisite(s): CAHS 7500 >= C and CAHS 7550 >=C and PTHP 7105 >=B and PTHP 7110 >=B;PTHP 7115 >=B and PTHP 7120 >=B and PTHP 7125 = S and PTHP 7200 >=B and PTHP 7205 >=B and PTHP 7210 >=B and PTHP 7215 >=B and PTHP 7220 = S and PTHP 7300 >=B and PTHP 7305 >= B and PTHP 7310 >=B and PTHP 7315 >=B and PTHP 7320 = S and PTHP 8005 >=B and PTHP 8010 >=B and PTHP 8015 >= B and PTHP 8020 >=B and PTHP 8025 >=B and PTHP 8030 = S and PTHP 8105 >= B and PTHP 8110 >=B and PTHP 8115 >=B and PTHP 8120 >=B and PTHP 8125 >=B and PTHP 8230 >=B and PTHP 8235 = S

Repeatability: May be repeated for credit up to two times.

Grade Mode: S- Satisfactory/Unsatisfactory

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PTHP- Physical Therapy **Student Class**

Restrictions: Graduate **Course Level Restrictions:** GS Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy

Degree Restrictions: DPT- Doctor of Physical Therapy **Program Restrictions:** Doctor of Physical Therapy **Campus Restrictions:** M- Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PTHP 9000 - Physical Therapy Leadership Synthesis (1 Credit Hour)

In this course, students will develop a new vision for health professional leadership in the face of increasing organizational change and complexity. Students will gain an appreciation of working collaboratively with people from multiple professions/disciplines to optimize health for individuals and populations. Core competencies in interprofessional collaborative practice will be explored as students learn about each other to improve collaboration and healthcare quality. They will learn to use their leadership qualities to inspire personal growth and contribute to a climate of shared values, ethical conduct, and mutual respect.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Student Class Restrictions:** Graduate **Course Level Restrictions:** GS

Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy **Degree Restrictions:** DPT- Doctor of Physical Therapy

Program Restrictions: Doctor of Physical Therapy **Campus Restrictions:** M- Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PTHP 9005 - Physical Therapy Seminar VII (0 Credit Hours)

The seventh course in the physical therapy seminar sequence. Provide students with opportunities involving academic advisement, service-learning, clinical education preparation and debriefing, programmatic assessment, annual compliance training, and college-specific requirements

Repeatability: May be repeated for credit up to two times.

Grade Mode: S- Satisfactory/Unsatisfactory

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PTHP- Physical Therapy **Student Class**

Restrictions: Graduate **Course Level Restrictions:** GS Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy

Degree Restrictions: DPT- Doctor of Physical Therapy **Program Restrictions:** Doctor of Physical Therapy **Campus Restrictions:** M-

Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PTHP 9010 - Movement System Case Application V (1 Credit Hour)

Provides students with the opportunity to develop the skills, knowledge, and competency necessary to manage patients/clients using clinical scenarios. Help students integrate didactic and clinical concepts using course specific case analysis and other activities in the classroom and in various clinical environments locally. The clinical scenarios in this course integrate complex patient management specific to any human body and/or movement system. It is expected that the knowledge and skills gained in this course will be applied to patients/clients across the lifespan and continuum of care to include application of the ICF model, history taking, systems review, examination, evaluation, diagnosis, prognosis, treatment and progression, re-evaluation, and discharge.

Lab Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PTHP- Physical Therapy **Student Class**

Restrictions: Graduate **Course Level Restrictions:** GS Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy

Degree Restrictions: DPT- Doctor of Physical Therapy **Program Restrictions:** Doctor of Physical Therapy **Campus Restrictions:** M- Main Campus

Schedule Type (Primary): Supervised Lab/Clinic

PTHP 9015 - Physical Therapy Clinical Experience II (12 Credit Hours)

The second full-time clinical experience in the clinical education coursework. Focuses on the care of patients/clients in various physical therapy settings. The experience is 12 weeks in length for a minimum of 480 clinical hours. Practice settings may include inpatient, outpatient, subacute, rehabilitation, skilled nursing facilities, school systems, home health, and others in which physical therapy is commonly practiced. Under the direct supervision of a physical therapist, it is expected that the students will use the knowledge and skills gained in didactic coursework to examine, evaluate, diagnose, develop a prognosis, outline expected outcomes, and design and implement an intervention plan for patients/ clients across the life span with problems encompassing any of the body systems and at any phase of care or rehabilitation.

Repeatability: May be repeated for credit up to two times.

Grade Mode: S- Satisfactory/Unsatisfactory

College Restrictions: 01 College of Allied Health Sciences **Student Class Restrictions:** Graduate **Course Level Restrictions:** GS

Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy **Degree Restrictions:** DPT- Doctor of Physical Therapy

Program Restrictions: Doctor of Physical Therapy **Campus Restrictions:** M- Main Campus

Schedule Type (Primary): Internship/Practicum

PTHP 9100 - Physical Therapy Clinical Experience III (12 Credit Hours)

The third full-time clinical experience in the clinical education courses. Focuses on the care of patients/ clients in various physical therapy settings. The experience is 12 weeks in length for a minimum of 480 clinical hours. focuses on the care of patients/clients with a wide variety of diagnoses in settings encompassing the health care continuum. The experiences vary with the student's previous clinical experiences and areas of interest serving as a guide for selection and assignment. Under the direct supervision of a physical therapist, it is expected that the students will use the knowledge and skills gained in didactic coursework to examine, evaluate, diagnose, develop a prognosis, outline expected outcomes, and design and implement an intervention plan for patients/client with a wide variety of medical diagnoses.

Repeatability: May be repeated for credit up to two times.

Grade Mode: S- Satisfactory/Unsatisfactory

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PTHP- Physical Therapy **Student Class**

Restrictions: Graduate **Course Level Restrictions:** GS Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy

Degree Restrictions: DPT- Doctor of Physical Therapy **Program Restrictions:** Doctor of Physical Therapy **Campus Restrictions:** M- Main Campus

Schedule Type (Primary): Internship/Practicum

PTHP 9105 - Physical Therapy Leadership Actualization (1 Credit Hour)

This course provides students with the opportunities to self-assess the skills, knowledge, attributes, and competencies required for becoming an autonomous practitioner and leaders in entry-level clinical practice. This course promotes lifelong learning, career planning, and collaborative and critical thinking skills essential for clinical, community, and organizational leadership, including roles in clinical instruction. This course culminates in a final reflective product that integrates the profession's core values, skills developed in terminal clinical experiences, a commitment to lifelong learning, and preparation for professional licensure and leadership roles within the profession.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PTHP- Physical Therapy **Student Class**

Restrictions: Graduate **Course Level Restrictions:** GS Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy

Degree Restrictions: DPT- Doctor of Physical Therapy **Program Restrictions:** Doctor of Physical Therapy **Campus Restrictions:** M- Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PTHP 9106 - Research VI (1 Credit Hour)

Contents include finishing up data collection, analyses, final written report and slide presentation.

Prerequisite(s): Successful completion of previous DPT coursework.

Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Satisfactory/Unsatisfactory, Audit

Program Restrictions: DPT_PHTP-Physical Therapy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Lecture/Unsupervi Lab/Clinic,Asynchronous Instruction

PTHP 9116 - Professional Practice Expectations VI (1 Credit Hour)

The capstone of the teaching-learning threads throughout the curriculum. Students design their four week Elective experience during this course, as well as prepare for the fall Clinical Education experiences. Students also critically explore the role of Clinical Instructor (CI) and revisit the assessment and organizational skills necessary for successful practice.

Prerequisite(s): Successful completion of previous DPT coursework.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPT_PHTP-Physical Therapy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

PTHP 9144 - Medical Conditions 4 (1 Credit Hour)

Student groups work through problems and case studies related to patients with lower and upper limb amputations. Students address the pathology, impairments, functional limitations, and disabilities associated with amputation. Emphasis will be placed on examination, evaluation, intervention and physical therapy diagnosis related to patients with amputations. Content includes: 1) all previously learned examination skills such as assessment of sensation, range of motion and strength; 2) previously learned interventions such as wound care, post-operative care, therapeutic exercise, and home programs; 3) new examinations, evaluation, intervention and physical therapy diagnosis skills related to the patient with an amputation; and 4) new information related to prosthetic prescription and prosthetic training. Basic science principles are integrated with examination, evaluation and intervention.

Prerequisite(s): Successful completion of previous DPT coursework.

Lecture Hours: 1 **Lab Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPT_PHTP-Physical Therapy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

PTHP 9152 - Pediatrics (4 Credit Hours)

Provides students with the study of human development with emphasis on children under five. The primary emphasis is on the assessment, evaluation, diagnosis, prognosis and intervention in children with neuromusculoskeletal disorders. Students are expected to use this information to develop interventions to meet patient-centered goals. There is a variety of learning experiences used in this course.

Prerequisite(s): Successful completion of previous DPT coursework.

Lecture Hours: 3 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPT_PHTP-Physical Therapy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PTHP 9171 - Integrated Patient Management (3 Credit Hours)

Provides physical therapy students with the opportunity to integrate all aspects of the patient management model across complex patients. Information presented in the course is designed to build on basic skills and expand intervention options as available for the management of patients with musculoskeletal, neuromuscular, cardiopulmonary and integumentary dysfunction. Emphasis is placed on clinical decision-making related to various pathologies. Content is presented using a variety of instructional strategies to include lecture/discussion, small group activities and lab participation. The emphasis of the course is a "hands-on" approach whenever possible. The course culminates in a comprehensive exam.

Prerequisite(s): Successful completion of previous DPT coursework.

Lecture Hours: 1 **Lab Hours:** 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPT_PHTP-Physical Therapy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PTHP 9292 - Clinical Experience II (16 Credit Hours)

A 16-week full-time clinical experience focusing on the care of patients with neurological and/or complex medical problems. Students are assigned to inpatient acute care, inpatient rehabilitation, skilled nursing or outpatient facilities. This experience may be scheduled either as 16 weeks in one facility with opportunity for participation in multiple patient care areas, or as two 8-week periods in different facilities. Under the direct supervision of a physical therapist, students use the knowledge and skills gained in didactic coursework to examine, evaluate, diagnose, develop a prognosis and expected outcomes and intervention plan and implement that plan for patients with orthopaedic dysfunction. Students document their work using proper format, research information about problems with which they are unfamiliar, and perform other duties pertinent to functioning as a member of the healthcare team.

Prerequisite(s): Successful completion of previous DPT coursework.

Contact Hours: 40

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: DPT_PHTP-Physical Therapy

Schedule Type (Primary): Internship/Practicum

PTHP 9393 - Clinical Experience III (12 Credit Hours)

Prerequisites: Successful completion of previous DPT coursework. This is a 12-week full-time clinical experience focusing on the care of patients with a wide variety of diagnoses. The experiences will vary with the student's previous clinical experiences and areas of interest serving as a guide for selection. Under the direct supervision of a physical therapist, students use the knowledge and skills gained in didactic coursework to examine, evaluate, diagnose, develop a prognosis and expected outcomes and intervention plan and implement that plan for patients with a wide variety of medical diagnoses. Students document their work using proper format, research information about problems with which they are unfamiliar, and perform other duties pertinent to functioning as a member of the healthcare team.

Contact Hours: 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: DPT_PHTP-Physical Therapy

Schedule Type (Primary): Internship/Practicum

PTHP 9394 - Elective (4 Credit Hours)

Students gain knowledge and skills in a physical therapy special interest area by individually defining personal learning objectives and developing learning activities to achieve those objectives. Self assessment, expert opinion and/or peer assessments are utilized to evaluate outcomes of the experience. Study may be in areas related practice, administration, education or research.

Prerequisite(s): Successful completion of previous DPT coursework.

Contact Hours: 40

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPT_PHTP-Physical Therapy

Schedule Type (Primary): Internship/Practicum

PTHP 9500 - DPT Clinical Experience (0 Credit Hours)

A "zero credit hour course" for tracking clinical year students while they are out on clinical rotations and there are no other remaining required PT courses to register for during a particular semester.

Repeatability: May not be repeated for credit.

Grade Mode: S- Satisfactory/Unsatisfactory

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PTHP- Physical Therapy **Student Class**

Restrictions: Graduate **Course Level Restrictions:** GS Graduate **Department Restrictions:** Allied Health: Dept. of Physical Therapy

Degree Restrictions: DPT- Doctor of Physical Therapy **Program Restrictions:** Doctor of Physical Therapy **Campus Restrictions:** M-Main Campus

Schedule Type (Primary): Supervised Lab/Clinic

PTHP 9999 - Independent Study (1 to 12 Credit Hours)

Individualized to student's learning needs, either extraordinary or remedial.

Contact Hours: 1 to 12

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: College of Allied Health Sci **Major Restrictions:** Physical Therapy **Degree Restrictions:** Doctor of Physical Therapy **Program Restrictions:** DPT_PHTP-Physical Therapy

Schedule Type (Primary): Independent Study

PTPP 9901 - Foundations of Physical Therapy Residency Practice (3 Credit Hours)

Residency participants will learn foundational knowledge to improve their practice they develop as advanced physical therapy practitioners. Course content includes topics related to professional competencies, evidence based practice, clinical reasoning and examination planning, medical screening, pharmacology, post-operative rehabilitation, management of patients with chronic pain, principles of exercise prescription, and management of select patient populations that span multiple practice settings.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: College of Allied Health Sci **Student Class Restrictions:** Post Professional **Course Level Restrictions:** Post Professional **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture

PTPP 9902 - Physical Therapy Residency Practicum I (1 Credit Hour)

Residency participants engage in multiple learning activities and projects designed facilitate their development as professionals, incorporate principles of education, teaching and learning, and mentoring as both the learner and the teacher, integrate information from and participate in interprofessional educational opportunities, and design a quality improvement project to improve patient outcomes.

Lab Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: College of Allied Health Sci **Student Class Restrictions:** Post Professional **Course Level Restrictions:** Post Professional **Campus Restrictions:** Main Campus

Schedule Type (Primary): Internship/Practicum

PTPP 9903 - Orthopaedic Physical Therapy Practice I (3 Credit Hours)

Residency participants will improve their practice as they develop into advanced physical therapy practitioners. Course content includes topics related to examination, evaluation, prognosis, and treatments of orthopaedic conditions of the lower quarter. Content is guided by current evidence and best practice standards to prepare participants for advanced orthopaedic practice and clinical reasoning.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: College of Allied Health Sci **Student Class Restrictions:** Post Professional **Course Level Restrictions:** Post Professional **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PTPP 9904 - Physical Therapy Residency Practicum II (1 Credit Hour)

Residency participants engage in multiple learning activities and projects designed facilitate their development as professionals, incorporate principles of education, teaching and learning, and mentoring as both the learner and the teacher, integrate information from and participate in interprofessional educational opportunities, identify and plan a patient case report, and implement a quality improvement project to improve patient outcomes.

Lab Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: College of Allied Health Sci **Student Class Restrictions:** Post Professional **Course Level Restrictions:** Post Professional **Campus Restrictions:** Main Campus

Schedule Type (Primary): Internship/Practicum

PTPP 9905 - Orthopaedic Physical Therapy Practice I (3 Credit Hours)

Residency participants will improve their practice as they develop into advanced physical therapy practitioners. Course content includes topics related to examination, evaluation, prognosis, and treatments of orthopaedic conditions of the upper quarter. Content is guided by current evidence and best practice standards to prepare participants for advanced orthopaedic practice and clinical reasoning.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: College of Allied Health Sci **Student Class Restrictions:** Post Professional **Course Level Restrictions:** Post Professional **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PTPP 9906 - Physical Therapy Residency Practicum III (1 Credit Hour)

Residency participants engage in multiple learning activities and projects designed facilitate their development as professionals, incorporate principles of education, teaching and learning, and mentoring as both the learner and the teacher, integrate information from and participate in interprofessional educational opportunities, and complete and present a quality improvement project to improve patient outcomes, and complete and present a patient case report.

Lab Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: College of Allied Health Sci **Student Class Restrictions:** Post Professional **Course Level Restrictions:** Post Professional **Campus Restrictions:** Main Campus

Schedule Type (Primary): Internship/Practicum

PHAS 5010 - Medical Terminology (1 Credit Hour)

Instruction to equip students with strong skills in medical communication and terminology and its application to patient care.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Major Restrictions:** Physician Assistant **Course Level Restrictions:** Graduate

Semester **Degree Restrictions:** Master of Physician Assistant

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

PHAS 5011 - Principles of Professional Practices (1 Credit Hour)

Instruction related to credentialing, historical development, laws and regulations regarding professional practice and conduct, licensure and certification, the PA relationship with the physician and other health care providers, policy issues that affect practice, and professional organizations. There is also instruction related to time management and effective study skills.

Lecture Hours: 1 **Contact Hours:** 15

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PHAS- Physician Assistant **Student Class**

Restrictions: Professional **Course Level Restrictions:** PR Professional **Department Restrictions:** Allied Health: Dept. of Physician Assistant **Degree Restrictions:** MPA- Master of Physician Assistant **Program Restrictions:** Master of Physician Assistant **Campus**

Restrictions: M- Main Campus

Schedule Type (Primary): Lecture

PHAS 5015 - Medical Communications (1 Credit Hour)

Presents the skills necessary for obtaining a complete medical history and enhancing good communication among patients and healthcare team members.

Lecture Hours: 1 **Contact Hours:** 15

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Major Restrictions:** Physician Assistant **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture

PHAS 5020 - Genetics (1 Credit Hour)

A survey course of medical genetics using case-based instruction.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal

College Restrictions: College of Allied Health Sci **Major Restrictions:** Physician Assistant **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Master of Physician Assistant

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PHAS 5100 - Ethics and Professional Practice Issues (1 Credit Hour)

This course helps the students explore issues of medical practice. Students debate both sides of ethical issues such as patient confidentiality, patient rights and clinical experimentation/investigation; aspects of dependent practice, and roles of other healthcare providers involved in medical team approach to medical care, legal issues, quality assurance, and risk management. Facilitates development of realistic role identity for the physician assistant.

Contact Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

PHAS 5115 - Physical Assessment (3 Credit Hours)

Prerequisite: Admission to the PA program; successful completion of summer semester coursework. This course presents physical examination skills and techniques. Introduces variations of normal and common abnormal physical findings. Students will also learn how to document the physical exam.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Course Level Restrictions:** Graduate Semester **Program Restrictions:**

MPA_PHAS-Physician Assistant

Schedule Type (Primary): Lecture

PHAS 5125 - Principles of Pharmacology for the Clinician (1 Credit Hour)

Acquire knowledge of foundational concepts of pharmacology.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Lecture

PHAS 5131 - Orthopedics (3 Credit Hours)

Diagnosis and treatment of common disorders in orthopedics.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PHAS 5132 - Dermatology (2 Credit Hours)

Diagnosis and treatment of common disorders in dermatology.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PHAS 5133 - Ophthalmology/Otolaryngology (2 Credit Hours)

A multi-instructor clinical didactic course with the focus on common disease entities in Ophthalmology and Otolaryngology. Course lecturers include PAD faculty, Clinical faculty of the Augusta University School of Medicine, and other clinical PAs/physician specialists from the community. Each individual lectures in their field of expertise.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Degree Restrictions: MPA- Master of Physician Assistant **Program Restrictions:** MPA_PHAS-Physician Assistant

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PHAS 5134 - Infectious Diseases (2 Credit Hours)

Diagnosis and treatment of common disorders in infectious diseases.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PHAS 5135 - EKG Interpretation (1 Credit Hour)

Acquire knowledge of the method, physiology, and interpretation of electrocardiograms.

Lecture Hours: 1

Repeatability: May be repeated for credit up to three times.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PHAS 5137 - Diagnostic Methods and Pathology (2 Credit Hours)

Acquire foundational knowledge of pathology and diagnostic methods/tests.

Lecture Hours: 2 **Contact Hours:** 30

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Lecture

PHAS 5138 - Anatomy, Pathophysiology, and Genetic Mechanism of Disease I (1 credit hour)

A study of the structure and function of human biology cells, tissues, organs, and the fundamental physiology principles of the following systems: Dermatology, Ophthalmology/Otolaryngology, Infectious Disease, EKG, and Orthopedics. Also provides a study of the basic genetic concepts related to Dermatology, Ophthalmology/Otolaryngology, Infectious Disease, EKG, and Orthopedics.

Lecture Hours: 1 **Contact Hours:** 15

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PHAS- Physician Assistant **Student Class**

Restrictions: Professional **Course Level Restrictions:** PR Professional **Department Restrictions:** Allied Health: Dept. of Physician Assistant **Degree Restrictions:** MPA- Master of Physician Assistant **Program Restrictions:** Master of Physician Assistant **Campus**

Restrictions: M- Main Campus

Schedule Type (Primary): Lecture

PHAS 5139 - Professional Practices I (1 credit hour)

Instruction related to credentialing, historical development, laws and regulations regarding professional practice and conduct, licensure and certification, the PA relationship with the physician and other health care providers, policy issues that affect practice, and professional organizations. Instruction-related time management and effective study skills are learned.

Lecture Hours: 1 **Contact Hours:** 15

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PHAS- Physician Assistant **Student Class**

Restrictions: Professional **Course Level Restrictions:** PR Professional **Department Restrictions:** Allied Health: Dept. of Physician Assistant **Degree Restrictions:** MPA- Master of Physician Assistant **Program Restrictions:** Master of Physician Assistant **Campus**

Restrictions: M- Main Campus

Schedule Type (Primary): Lecture

PHAS 5140 - Clinical Skills Integration and Application I (1 Credit Hour)

Prerequisite: Admission to the PA program; successful completion of summer and fall semester coursework. Clinical training using both real and standardized patients for obtaining histories and performing physical exams. Enhances acquisition of skills necessary to formulate a diagnosis and treatment plan using case-based instruction.

Contact Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit, Satisfactory/Unsatisfactory

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Supervised Lab/Clinic

PHAS 5200 - Essentials of Psychiatry (2 Credit Hours)

Prerequisite: Admission to the PA Program, successful completion of summer and fall semester coursework. General survey of fundamental principles underlying human behavior, development, learning, memory, motivation, and social and abnormal behavior.

Emphasis on improving communication skills, integrating knowledge of psychosocial principles and clinical diagnosis using case-based instruction.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PHAS 5210 - Pharmacotherapeutics I (3 Credit Hours)

Prerequisites: Admission to the PA Program, successful completion of summer and fall semester coursework. General principles of pharmacotherapeutics as related to medications used in treatment of injury or disease conditions affecting body systems discussed in PAD 5120 using case-based instruction.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic

PHAS 5215 - Pharmacotherapeutics I (2 Credit Hours)

Acquire knowledge of pharmacology by body system.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Lecture

PHAS 5221 - Cardiology (3 Credit Hours)

Diagnosis and management of common disorders of the heart and vascular system.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PHAS 5222 - Pulmonology (3 Credit Hours)

Diagnosis of management of common disorders of the pulmonary system.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PHAS 5223 - Nephrology/Urology (2 Credit Hours)

Diagnosis and the management of common disorders of the genitourinary system.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PHAS 5224 - Gastroenterology (2 Credit Hours)

Diagnosis and the management of common disorders of the GI system.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PHAS 5226 - BLS and Airway Management (1 Credit Hour)

Cardiopulmonary resuscitation with basic and advanced airway management skills.

Lab Hours: 2

Repeatability: May be repeated for credit up to three times.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PHAS 5227 - Hematology and Oncology (2 Credit Hours)

Diagnosis and the management of common disorders of the blood and cancers.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PHAS 5228 - Anatomy, Pathophysiology, and Genetic Mechanism of Disease II (1 credit hour)

A study of the structure and function of human biology cells, tissues, organs, and the fundamental physiology principles of the following systems: Cardiology, Pulmonology, Gastroenterology, Urology, Nephrology, Hematology, and Oncology. Also provides a study of the basic genetic concepts related to Cardiology, Pulmonology, Gastroenterology, Urology, Nephrology, Hematology, and Oncology.

Lecture Hours: 1 **Contact Hours:** 15

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PHAS- Physician Assistant **Student Class**

Restrictions: Professional **Course Level Restrictions:** PR Professional **Department Restrictions:** Allied Health: Dept. of Physician Assistant **Degree Restrictions:** MPA- Master of Physician Assistant **Program Restrictions:** Master of Physician Assistant **Campus**

Restrictions: M- Main Campus

Schedule Type (Primary): Lecture

PHAS 5229 - Professional Practices II (1 credit hour)

Instruction related to credentialing, historical development, laws and regulations regarding professional practice and conduct, licensure and certification, the PA relationship with the physician and other health care providers, policy issues that affect practice, and professional organizations. There is also instruction-related time management and effective study skills.

Lecture Hours: 1 **Contact Hours:** 15

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PHAS- Physician Assistant **Student Class**

Restrictions: Professional **Course Level Restrictions:** PR Professional **Department Restrictions:** Allied Health: Dept. of Physician Assistant **Degree Restrictions:** MPA- Master of Physician Assistant **Program Restrictions:** Master of Physician Assistant **Campus**

Restrictions: M- Main Campus

Schedule Type (Primary): Lecture

PHAS 5230 - Clinical Skills Integration and Application II (1 Credit Hour)

Prerequisites: Admission to the PA program, successful completion of summer and fall semester coursework. Clinical training using both real and standardized patients for obtaining histories and performing physical exams. Enhances acquisition of skills necessary to

formulate a diagnosis and treatment plan using case-based instruction. Continuation of PHAS 5140.

Contact Hours: 5

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Supervised Lab/Clinic

PHAS 5300 - Pharmacotherapeutics II (3 Credit Hours)

Prerequisites: Admission to the PA program, successful completion of summer, fall and spring semester coursework. General principles of pharmacotherapeutics as related to medications used in treatment of injury or disease conditions affecting body systems discussed in PHAS 5130, 5220 & 5310 using care-based instruction.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PHAS 5311 - Pediatrics (2 Credit Hours)

Diagnosis and treatment of common disorders of the pediatric patient.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PHAS 5312 - Obstetrics and Gynecology (2 Credit Hours)

Diagnosis and management of pregnancy and disorders of the female reproductive system.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PHAS 5313 - Endocrinology (2 Credit Hours)

Diagnosis and management of common disorders of the endocrine system.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PHAS 5314 - Neurology (3 Credit Hours)

Diagnosis and management of common disorders of the neurologic system.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PHAS 5315 - Anatomy, Pathophysiology, and Genetic Mechanism of Disease III (1 Credit Hour)

A study of the structure and function of human biology cells, tissues, organs, and the fundamental physiology principles of the following systems: Reproductive, Endocrine, and Pediatric. Also provides a study of the basic genetic concepts related to Reproductive, Endocrine, and Pediatric.

Lecture Hours: 1 Contact Hours: 15

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PHAS- Physician Assistant **Student Class**

Restrictions: Professional **Course Level Restrictions:** PR Professional **Department Restrictions:** Allied Health: Dept. of Physician

Assistant **Degree Restrictions:** MPA- Master of Physician Assistant **Program Restrictions:** Master of Physician Assistant **Campus**

Restrictions: M- Main Campus

Schedule Type (Primary): Lecture

PHAS 5316 - Critical Care (1 Credit Hour)

Advances in technology and medicine mean that increasing numbers of severely ill patients are surviving with a corresponding need for intensive care physician assistants. Critically ill patients are often managed in an intensive care unit within a hospital where sophisticated equipment is available to enable frequent monitoring of vital signs, assisted ventilation and, when life-threatening crises occur, rapid resuscitation measures. This course focuses on the causes of single and multi-organ system dysfunction and the human responses to life threatening illness. Lectures within the course explores restoring physiologic stability to the severely ill patient. Core concepts of complex pathophysiology, current treatment modalities, and the role physician assistants when providing care to critically ill patients are discussed.

Lecture Hours: 1 Contact Hours: 15

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PHAS- Physician Assistant **Student Class**

Restrictions: Professional **Course Level Restrictions:** PR Professional **Department Restrictions:** Allied Health: Dept. of Physician

Assistant **Degree Restrictions:** MPA- Master of Physician Assistant **Program Restrictions:** Master of Physician Assistant **Campus**

Restrictions: M- Main Campus

Schedule Type (Primary): Lecture

PHAS 5317 - Professional Practices III (1 Credit Hour)

Introduces many of the principles and practices of health policy along with in-depth analysis of various medical ethical scenarios. Considers the impact of socioeconomic issues affecting health care and an overview of selected aspects of the various health care systems to include HMO, PPO, Medicare and Medicaid. Other issues such as professional and legal ethics are discussed. This course presents overviews of PA professional organizations, PA program accreditation, as well as certification of PAs. The interrelated issues of licensure, credentialing and professional liability are also explored at an introductory level. Students who perform well in the course also tend to apply themselves very diligently to understanding key concepts and not just rote memorization of course materials.

Lecture Hours: 1 Contact Hours: 15

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PHAS- Physician Assistant **Student Class**

Restrictions: Professional **Course Level Restrictions:** PR Professional **Department Restrictions:** Allied Health: Dept. of Physician

Assistant **Degree Restrictions:** MPA- Master of Physician Assistant **Program Restrictions:** Master of Physician Assistant **Campus**

Restrictions: M- Main Campus

Schedule Type (Primary): Lecture

PHAS 5320 - Emergency Medicine (2 Credit Hours)

Prerequisites: Admission to the PA program, successful completion of summer, fall, and spring semester coursework. Clinically oriented didactic course used as a foundation for clinical rotations in emergency medicine. Focus on common acute conditions encountered in primary care and surgical settings. Primary goals are to present concepts and principles which characterize discipline of emergency medicine and to provide basic ER skills using case-based instruction.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PHAS 5330 - Surgery (2 Credit Hours)

Prerequisites: Admission to the PA program, successful completion of summer, fall and spring semester coursework. Clinically oriented didactic and lab skills course used as a foundation for clinical rotations in surgery and emergency medicine. Focus on common surgical conditions encountered in surgical settings. Primary goals are to present concepts and principles which characterize disciplines of surgery and to provide basic surgical skills using case-based instruction.

Lecture Hours: 1 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PHAS 5340 - Clinical Skills Integration and Application III (1 Credit Hour)

Prerequisites: Admission to the PA program, successful completion of summer, fall, and spring semester coursework. Clinical training using both real and standardized patients for obtaining histories and performing physical exams. Enhances acquisition of skills necessary to formulate a diagnosis and treatment plan using case-based instruction. Continuation course of PHAS 5230.

Contact Hours: 5

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Supervised Lab/Clinic

Additional Course Fee: PAEA Tests/PackRat **Fee Type:** Flat Fee **Fee Amount:** \$ 420

PHAS 5360 - Evidence-Based Medicine and Medical Writing (1 Credit Hour)

Research skills, study evaluation for evidence-based medical decisions and article writing.

Lecture Hours: 1 **Contact Hours:** 15

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PHAS 5400 - Pharmacotherapeutics III (3 Credit Hours)

Acquire knowledge of the pharmacotherapeutics for different body system diseases.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PHAS 6000 - PA Clinical Practicum (0 Credit Hours)

The Physician Assistant (PA) Department created a "zero credit hour course" to use for tracking clinical year students when there are no other remaining required PA courses to register for during a particular semester. This situation has developed during the COVID-19 pandemic. As the PA students continue their training with incompletes, the Registrar's Office will need a course for tracking purposes only while students are out on clinical rotations.

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: College of Allied Health Sci **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:**

Graduate Semester **Degree Restrictions:** Master of Physician Assistant **Program Restrictions:** MPA_PHAS-Physician Assistant

Campus Restrictions: Main Campus

Schedule Type (Primary): Internship/Practicum

PHAS 6020 - Surgery Practicum (4 Credit Hours)

Prerequisites: Successful completion of PA didactic coursework. Assignment to surgical team to learn routine surgical management of both inpatients and outpatients. Emphasis on preoperative evaluation and preparatory procedures, assisting at the operating table, and management of patients from preoperative period through to discharge.

Contact Hours: 40

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Supervised Lab/Clinic **Schedule Type (Additional):** Internship/Practicum

PHAS 6027 - Adult Medicine Practicum (4 Credit Hours)

This adult medicine practicum educates the student in the evaluation, diagnosis, and treatment of acute/chronic adult diseases in an inpatient and/or outpatient clinical setting.

Lab Hours: 4

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Program Restrictions:** MPA_PHAS-Physician Assistant

Schedule Type (Primary): Internship/Practicum

PHAS 6028 - Adult Medicine Practicum II (4 Credit Hours)

This practicum educates the student in the evaluation, diagnosis, and treatment of acute/chronic adult diseases in an inpatient and/or outpatient clinical setting through exposure to clinical teaching in various adult medicine sub-specialties.

Lab Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Internship/Practicum

PHAS 6035 - Family Medicine Practicum (4 Credit Hours)

Exposes student to family medicine specialty in the inpatient and outpatient setting.

Contact Hours: 40

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Internship/Practicum

PHAS 6040 - Emergency Medicine Practicum (4 Credit Hours)

Prerequisites: Successful completion of PA didactic coursework. Evaluation and management of emergency and surgical problems of ambulatory patient. Emergency room setting facilitates experience in initial evaluation of acute medical and surgical conditions, performance of problem-specific examinations and minor surgical skills.

Contact Hours: 40

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Supervised Lab/Clinic **Schedule Type (Additional):** Internship/Practicum

PHAS 6050 - Pediatric Practicum (4 Credit Hours)

Prerequisites: Successful completion of PA didactic coursework. Assigned to institutional setting or community-based pediatric site with emphasis on communication skills and relating sensitively to children and parents. Normal growth and development, pediatric preventive medicine, and evaluation and management of common childhood illnesses.

Contact Hours: 40

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Supervised Lab/Clinic **Schedule Type (Additional):** Internship/Practicum

PHAS 6060 - Psychiatric and Addiction Medicine Practicum (4 Credit Hours)

Prerequisites: Successful completion of PA didactic coursework. Assignment to psychiatric and/or behavioral clinical inpatient or outpatient setting. Placement facilitates acquisition of communication and behavioral modification skills useful in primary care settings.

Contact Hours: 40

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSPSA_PHAS-Physician Assistant, MPA_PHAS-Physician Assistant

Schedule Type (Primary): Supervised Lab/Clinic **Schedule Type (Additional):** Internship/Practicum

PHAS 6061 - Senior Thesis and PA Professional Practice I (1 credit hour)

Allows students to reinforce and demonstrate mastery of professional behaviors, professional practice, analysis of medical literature, application of evidence-based medicine, and professional writing skills.

Lecture Hours: 1 **Contact Hours:** 15

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PHAS- Physician Assistant **Student Class**

Restrictions: Professional **Course Level Restrictions:** PR Professional **Department Restrictions:** Allied Health: Dept. of Physician Assistant **Degree Restrictions:** MPA- Master of Physician Assistant **Program Restrictions:** Master of Physician Assistant **Campus**

Restrictions: M- Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PHAS 6070 - Women's Health Practicum (4 Credit Hours)

Prerequisites: Successful completion of PA didactic coursework. Common gynecological problems, pregnancy and delivery. Assisting at operating table may be significant aspect of rotation. Emphasis on clinical experience with cancer detection techniques, abnormal menstruation and bleeding, infections, and contraception counseling.

Contact Hours: 40

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Supervised Lab/Clinic **Schedule Type (Additional):** Internship/Practicum

PHAS 6071 - Senior Thesis and PA Professional Practice II (1 Credit Hour)

Students reinforce and demonstrate mastery of professional behaviors, professional practice, analysis of medical literature, application of evidence based-medicine, and professional writing skills.

Lecture Hours: 1 **Contact Hours:** 15

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PHAS- Physician Assistant **Student Class**

Restrictions: Professional **Course Level Restrictions:** PR Professional **Department Restrictions:** Allied Health: Dept. of Physician Assistant **Degree Restrictions:** MPA- Master of Physician Assistant **Program Restrictions:** Master of Physician Assistant **Campus**

Restrictions: M- Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PHAS 6081 - Senior Thesis and PA Professional Practice III (4 Credit Hours)

The final course of the MPA curriculum and allows students to demonstrate mastery of clinical skills, medical knowledge, professional behavior, presentation skills, and analysis of medical literature.

Lecture Hours: 4 **Contact Hours:** 60

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PHAS- Physician Assistant **Student Class**

Restrictions: Professional **Course Level Restrictions:** PR Professional **Department Restrictions:** Allied Health: Dept. of Physician

Assistant **Degree Restrictions:** MPA- Master of Physician Assistant **Program Restrictions:** Master of Physician Assistant **Campus**

Restrictions: M- Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PHAS 6090 - Elective Clinical Practicum (4 Credit Hours)

Prerequisites, successful completion of PA didactic coursework. Focus on community settings in area of student's medical vocational interest.

Contact Hours: 40

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Supervised Lab/Clinic **Schedule Type (Additional):** Internship/Practicum

PHAS 6110 - Research/Masters Project (2 Credit Hours)

Process of researching, writing, and submitting an article to a peer-reviewed journal.

Contact Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit, In Progress

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Seminar **Schedule Type (Additional):** Small Group, Asynchronous Instruction

PHAS 6120 - Teaching, Leadership, and Clinical Elective Practicum (4 Credit Hours)

Educates students facilitating the learning of professional degree students and provides the opportunity for students to refine clinical skills and knowledge in selected elective medical field.

Contact Hours: 60

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

College Restrictions: 01 College of Allied Health Sciences **Major Restrictions:** PHAS- Physician Assistant **Student Class**

Restrictions: Professional **Course Level Restrictions:** PR Professional **Department Restrictions:** Allied Health: Dept. of Physician

Assistant **Degree Restrictions:** MPA- Master of Physician Assistant **Program Restrictions:** Master of Physician Assistant **Campus**

Restrictions: M- Main Campus

Schedule Type (Primary): Supervised Lab/Clinic

PHAS 7120 - Human Physiology for the Clinician (5 Credit Hours)

Acquire knowledge of human physiology for each body system.

Lecture Hours: 5

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PHAS 8022 - Concepts in Healthcare Delivery (3 Credit Hours)

A course for healthcare professionals on the non-technical aspects of healthcare. Examples of topics to be covered are areas in quality assurance, risk management, Medicaid, Medicare, other third party payers, home healthcare, malpractice, ethics, etc.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant
Schedule Type (Primary): Lecture

PHAS 8023 - Geriatrics (3 Credit Hours)

Focus of course is on primary care geriatrics. It will be conducted in a symposium format with opportunity for class/group discussion. There will be take-home assignments including a take-home examination. This will be a practice case management approach.

Lecture Hours: 2 **Contact Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PHAS 8024 - Health Promotion and Disease Prevention (3 Credit Hours)

Course designed to help develop skills to enable students to incorporate health promotion and disease prevention into clinical practice. They will do research into available community resources for possible referrals.

Contact Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Lecture

PHAS 8700 - Evaluation of the Urologic Patient (1 Credit Hour)

Refines history taking skills with an emphasis on formulating differential diagnosis, selection of appropriate evaluation tools (radiographic, laboratory, etc.) needed to make a definitive diagnosis in a variety of clinical settings and interpretation of evaluatory procedure outcomes to formulate a diagnosis and treatment plan.

Lecture Hours: 2 **Contact Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PHAS 8701 - Clinical Urology, Core I (4 Credit Hours)

Applies previously learned history taking skills and appropriate physical examination skills to integrate them into a patient evaluation, diagnostic plan, and collation of data.

Lecture Hours: 2 **Contact Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PHAS 8702 - Clinical Urology, Core II (4 Credit Hours)

Prerequisite: Successful completion of Clinical Urology, Core I. Builds on previously acquired skills in both history taking and physical examination components as well as formulation of diagnosis and initiation of diagnostic plans, to formulate a treatment plan.

Lecture Hours: 2 **Contact Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PHAS 8703 - Clinical Urology, Core III (5 Credit Hours)

Prerequisite: Successful completion of Clinical Urology Core II. Builds on skills acquired during previous two core courses with increasing independence of action.

Lecture Hours: 2 Contact Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PHAS 8710 - Urologic Pharmacology (1 Credit Hour)

Expands knowledge of pharmaceuticals to include commonly used medication in the practice of urology as well as pharmaceuticals uniquely used in this practice.

Lecture Hours: 2 Contact Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PHAS 8720 - Radiographic Evaluation (3 Credit Hours)

Equips the physician assistant resident with knowledge to obtain, interpret, and apply data from radiographic studies.

Lecture Hours: 2 Contact Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PHAS 8730 - Urodynamics (3 Credit Hours)

The focus is on the use, performance of, and interpretation of urodynamics studies in the urologically intact and urologically impaired patient with an emphasis on interpretation of studies and application to patient care.

Lecture Hours: 2 Contact Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPA_PHAS-Physician Assistant

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PHYS 1010 - Fundamentals of Physics: Selected Topics (3 Credit Hours)

An exploration of principles, conceptual understanding, and problem-solving in physical science oriented around a central theme. Does not include a laboratory component.

Prerequisite(s): MATH 1001 or MATH 1111 or MATH 1113

Core IMPACTS Requirement(s) Satisfied: Technology, Mathematics, and Sciences (STEM)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PHYS 1010L - Fundamentals of Physics: Selected Topics Laboratory (1 Credit Hour)

A laboratory course to accompany PHYS 1010 to explore principles, apply concepts, and problem-solve in physics; oriented around a central theme.

Prerequisite(s): MATH 1001 >= C or MATH 1111 >= C or MATH 1113 >= C

Corequisite(s): PHYS 1010

Lab Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Supervised Lab/Clinic **Schedule Type (Additional):** Unsupervised Lab/Clinic

Additional Course Fee: Physics/Biophysics Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

PHYS 1111 - Introductory Physics I (3 Credit Hours)

A trigonometry-based study of mechanics, heat, waves and sound. Emphasis on problem solving. Credit may not be earned for both PHYS 1111 and PHYS 2211. STEM GPA Eligible Course

Prerequisite(s): MATH 1113 $\geq$ C or MATH 2011 $\geq$ C

Corequisite(s): PHYS 1111L

Core IMPACTS Requirement(s) Satisfied: Technology, Mathematics, and Sciences (STEM)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PHYS 1111L - Introductory Physics I Laboratory (1 Credit Hour)

Laboratory experiments relating to the trigonometry-based study of mechanics, heat, waves and sound. STEM GPA Eligible Course

Prerequisite(s): MATH 1113 $\geq$ C or MATH 2011 $\geq$ C

Corequisite(s): PHYS 1111

Core IMPACTS Requirement(s) Satisfied: Technology, Mathematics, and Sciences (STEM)

Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

Additional Course Fee: Physics/Biophysics Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

PHYS 1112 - Introductory Physics II (3 Credit Hours)

A trigonometry-based study of electricity and magnetism, light, and modern physics. Emphasis on problem solving. Credit may not be earned for both PHYS 1112 and PHYS 2212. STEM GPA Eligible Course

Prerequisite(s): (PHYS 1111 $\geq$ C and PHYS 1111L $\geq$ C) or (PHYS 2211 $\geq$ C)

Corequisite(s): PHYS 1112L

Core IMPACTS Requirement(s) Satisfied: Technology, Mathematics, and Sciences (STEM)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Asynchronous Instruction

PHYS 1112L - Introductory Physics II Laboratory (1 Credit Hour)

Laboratory experiments relating to a trigonometry-based study of electricity and magnetism, light, and modern physics. STEM GPA Eligible Course.

Prerequisite(s): (PHYS 1111 $\geq$ C and PHYS 1111L $\geq$ C) or PHYS 2211 $\geq$ C

Corequisite(s): PHYS 1112

Core IMPACTS Requirement(s) Satisfied: Technology, Mathematics, and Sciences (STEM)

Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

Additional Course Fee: Physics/Biophysics Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

PHYS 2211 - Principles of Physics I (4 Credit Hours)

A calculus-based study of mechanics, heat, waves and sound. Emphasis on problem solving. Credit may not be earned for both PHYS 2211 and PHYS 1111. STEM GPA Eligible Course

Pre- or Corequisite(s): MATH 2012

Core IMPACTS Requirement(s) Satisfied: Technology, Mathematics, and Sciences (STEM)

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Physics/Biophysics Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

PHYS 2212 - Principles of Physics II (4 Credit Hours)

A calculus-based study of electricity and magnetism, light, and modern physics. Emphasis on problem solving. Credit may not be earned for both PHYS 2212 and PHYS 1112. STEM GPA Eligible Course

Prerequisite(s): PHYS 2211 $\geq$ C and MATH 2012 $\geq$ C

Core IMPACTS Requirement(s) Satisfied: Technology, Mathematics, and Sciences (STEM)

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching

Additional Course Fee: Physics/Biophysics Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

PHYS 2950 - Selected Topics (1 to 3 Credit Hours)

Concepts/topics in special areas of physics. May be repeated for credit. Prerequisite(s): Permission of the instructor.

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

PHYS 2990 - Introduction to Undergraduate Research (0 Credit Hours)

A course to introduce undergraduates to experience of research through a faculty mentored introductory project.

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Supervised Lab/Clinic

PHYS 3000 - Introduction to Nuclear Science (3 Credit Hours)

An introduction to nuclear models and structure, natural and artificial radioactivity, interactions of radiation with matter, nuclear reactions, neutron physics and reactors. Credit may not be earned for both CHEM 3000 and PHYS 3000.

Prerequisite(s): (MATH 2011 $\geq$ C or MATH 2011H $\geq$ C) and (PHYS 1112 $\geq$ C or PHYS 2212 $\geq$ C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

PHYS 3010 - Introduction to Nuclear Measurements (3 Credit Hours)

An introductory course on scintillation counters, semiconductor detectors, nuclear electronics, nuclear spectroscopy, counting statistics and shielding. Credit may not be earned for both CHEM 3010 and PHYS 3010.

Prerequisite(s): CHEM 3000 >= C or PHYS 3000 >= C

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

Additional Course Fee: Physics/Biophysics Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

PHYS 3011 - Electronics I (4 Credit Hours)

Alternating current theory, filters, wave-shaping, power supplies, transistors, amplification, integration, feedback, operational amplifiers and their application. Applicable solid-state theory will also be discussed.

Prerequisite(s): PHYS 2212 >= C

Lecture Hours: 2 **Lab Hours:** 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Physics/Biophysics Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

PHYS 3012 - Electronics II (4 Credit Hours)

Logic gates, multiplexing, flip-flops, counters, open collector and tri-state logic, analog-to-digital converters, data-logging systems.

Prerequisite(s): PHYS 3011 >= C

Lecture Hours: 4 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Additional Course Fee: Physics/Biophysics Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

PHYS 3020 - Application of Nuclear Science (3 Credit Hours)

A study of applications of nuclear science to include characterization of radiation, the effects of radiation and radioactive materials, dosimetry and dose calculations, radiation exposure and basic nuclear safety. Other topics may include nuclear reactors, criticality, poisons, neutron life cycle, isotopic dating, nuclear medicine and imaging, neutron activation work/tracers, and environmental radioactivity. Credit may not be earned for both CHEM 3020 and PHYS 3020.

Prerequisite(s): CHEM 3000 >= C or PHYS 3000 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

PHYS 3250 - Theoretical Mechanics (4 Credit Hours)

Newtonian mechanics. Particle kinematics and dynamics in two and three dimensions. System of particles. Simple, damped and forced harmonic motion. Rigid body motion. Vibrating systems. Lagrange's equations. Hamilton's equations.

Prerequisite(s): PHYS 2211 >= C and MATH 3020 >= D

Lecture Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

PHYS 3260 - Computational Physics (3 Credit Hours)

Introduction to computationally based problem solving in physics. Emphasis on understanding and applying various numerical algorithms to different types of physics problems. Topics will include realistic mechanical systems. Monte Carlo methods and time independent as well as time-dependent quantum physics problems.

Prerequisite(s): (PHYS 2211 $\geq$ C) and (ENGR 2060 $\geq$ C or CSCI2060 $\geq$ C) and (MATH 3020 $\geq$ C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

PHYS 3300 - Modern Physics (3 Credit Hours)

Theory of Special Relativity. Quantum Physics: Blackbody radiation, Photoelectric effect, Compton effect, X-rays; Bohr model of the atom; wave properties of matter; the uncertainty principle.

Prerequisite(s): PHYS 2212 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

PHYS 3990 - Undergraduate Research (0 to 3 Credit Hours)

Faculty mentored undergraduate research at an intermediate level.

Lab Hours: 0 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Supervised Lab/Clinic

Additional Course Fee: Physics/Biophysics Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

PHYS 4010 - Advanced Laboratory (3 Credit Hours)

Experiments are conducted in various fields of physics including modern physics and optics. Evaluation, analysis and interpretation of experimental data is emphasized.

Prerequisite(s): PHYS 3300 $\geq$ C

Lecture Hours: 2 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

Additional Course Fee: Physics/Biophysics Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

PHYS 4051 - Electromagnetic Theory I (3 Credit Hours)

Vector analysis. Electrostatics and Gauss' law. Poisson's and Laplace's equations applied to Electrostatics problems. Electric fields, energy and potential. Dielectrics and electrical properties. Currents and magnetic fields.

Prerequisite(s): PHYS 2212 >= C and MATH 3020 >= D

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

PHYS 4052 - Electromagnetic Theory II (3 Credit Hours)

Magnetization, magnetic fields and properties of matter. Electromagnetic induction. Maxwell's equations and applications. Electromagnetic radiation, propagation of electromagnetic waves in free space and in dielectric materials.

Prerequisite(s): PHYS 4051 >= C and MATH 3020 >= D

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

PHYS 4310 - Thermal Physics (3 Credit Hours)

Thermodynamics and the relation between microscopic systems. Statistical descriptions of microscopic systems. Equilibrium, reversible processes, heat and temperature. Ideal gas, specific heats, expansion or compression, and entropy. Equipartition of energy.

Prerequisite(s): PHYS 2211 >= C and MATH 3020 >= D

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

PHYS 4530 - Mathematical Methods of Physics (3 Credit Hours)

Apply mathematical techniques to specific physics problems. Vector theorems. Variational calculus. Special functions. Applications of partial differential equations and integral transforms to problems in physics. Complex variables. Tensors and eigenvalue problems.

Prerequisite(s): PHYS 2212 >= C and MATH 3020 >= D

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis, Dissertation

PHYS 4600 - Quantum Mechanics (3 Credit Hours)

Non-relativistic wave mechanical treatment of physical systems. Definition and interpretation of state functions; construction of wave packets; solutions of the Schrodinger equation for simple one-dimensional systems; the hydrogen atom; various approximation methods, including perturbation theory.

Prerequisite(s): PHYS 3300 >= C and MATH 3020 >= D

Cross-Listed Course(s): CHEM 4600

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

PHYS 4950 - Selected Topics (1 to 4 Credit Hours)

Concepts/topics in special areas of physics. Prerequisite(s): Permission of the instructor.

Lecture Hours: 1 to 4

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching

PHYS 4960 - Undergraduate Internship (1 to 15 Credit Hours)

This internship is a service-learning experience based in an institution or agency, emphasizing the completion of a specific task and the acquisition of specific knowledge and skills under the supervision of the university and the cooperating institution or agency.

Prerequisite(s): Permission of the instructor.

Other Hours: 1 to 15 **Contact Hours:** 1 to 15

Repeatability: May be repeated for credit up to 3 times with a maximum of 15 credit hours.

Grade Mode: Normal (A, B, C, D, F)

PHYS 4990 - Undergraduate Research (0 to 3 Credit Hours)

Faculty mentored undergraduate research at an advanced level. Generally the course should be taken for 1-2 credits except for extenuating circumstances.

Lab Hours: 0 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Physics/Biophysics Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 50

PSIO 5011 - Research Elective in Physiology (4 Credit Hours)

Prerequisites: Approval by faculty This course will introduce medical students to physiological research. They will learn how to do hypothesis-based research and learn research methods.

Repeatability: May be repeated for credit one time.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Seminar - Small Group

PSIO 6110 - Medical Physiology I (8 Credit Hours)

Medical Physiology I contains three components, including Component 1: Principles of Medical Physiology, Component 2: Cardiopulmonary Physiology, and Component 3: Renal Physiology. Component 1 helps students understand normal physiology and diseases based on genetics, nerves, muscle, and molecular biology. Component 2 covers the physiology of the heart and blood vessels as well as the respiratory physiology. Component 3 covers the function of the renal system. The ultimate goal of this course is to enable students to understand the function of these important physiological systems.

Lecture Hours: 8

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

PSIO 6410 - Medical Anatomy (2 Credit Hours)

The course teaches human anatomy at a level necessary for a graduate student in medical physiology. The course covers a basic understanding of the structural organization of the human body relative to system and organismal function. This course will constitute

the foundation for other courses in this master's degree program. This course provides the basis for students to begin to appreciate the relationship between anatomical form and physiological function.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

PSIO 6510 - Medical Histology (2 Credit Hours)

The course teaches medical histology at a level necessary for a graduate student in medical physiology. This course covers the characteristic morphology of various cells, tissues, and organs discussed in the physiology courses. An emphasis will be placed on the relationship between structure and function to explain human physiology. This course will constitute the foundation for other courses in this master's degree program.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

PSIO 6610 - Seminar in Physiology (1 Credit Hour)

This course will expose students to various topics related to physiology and pathophysiology of multiple organ systems including the renal, cardiovascular, respiratory, gastrointestinal, endocrine, and neural systems. The course consists of a weekly journal club (formal review of a scientific publication) that is related to the weekly scientific seminar held in the Department of Physiology. Students will take this course in both spring and fall semesters; each week will cover a different scientific topic.

Lecture Hours: 1

Repeatability: May be repeated for credit one time.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

PSIO 6710 - Pathophysiology I (2 Credit Hours)

The course covers the pathophysiology of medical disorders corresponding to the material concurrently covered in Medical Physiology I. The course will therefore address the pathophysiology of disorders related to cell, membrane, and muscle physiology; cardiopulmonary physiology; and renal physiology. The ultimate goal of this course is for students to develop a deep understanding of the etiology of different diseases pertinent to the course material in the fall semester.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

PSIO 6720 - Pathophysiology II (2 Credit Hours)

The course teaches the pathophysiology of different disorders at a level required for clinical medicine in medical physiology. The first part of course covers the disorders related to Endocrine Physiology. The second part of course covers the disorders related to GI Physiology. The third part of course covers the disorders related to Neurophysiology. The ultimate goal of this course is for students to develop a deep understanding of the pathophysiology of different diseases related to courses in the spring semester.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

PSIO 6810 - Medical Physiology II (6 Credit Hours)

Medical Physiology II contains three components, including Component 1: GI Physiology, Component 2: Endocrinology, and Component 3: Neurophysiology. Component 1 covers the normal function of the GI system. Component 2 covers the numerous classes of hormones, hormone production, sources of hormones, receptors, and target tissues. Component 3 covers the functions of human nervous system. The ultimate goal of this course is to enable students to understand the function of these important physiological

systems.

Prerequisite(s): PSIO 6110 >= C

Lecture Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

PSIO 7110 - Physiology (6 Credit Hours)

A course giving detailed coverage of the major organic systems of the body, their interactions and control. Includes lectures, demonstrations, discussion groups and laboratory work as appropriate.

Lecture Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPT_PHTP-Physical Therapy

Schedule Type (Primary): Lecture

PSIO 7210 - Advanced Renal Physiology (2 Credit Hours)

The course teaches Renal Physiology at a level appropriate for an advanced graduate student. The course discusses normal physiology as well as selected renal disorders. This course will also cover the important role of the kidney in the regulation of arterial blood pressure. The ultimate goal of this course is for students to develop an in-depth understanding of the integrated functions of renal system.

Prerequisite(s): PSIO 6110 >= C

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

PSIO 7310 - Advanced Cardiovascular Physiology (2 Credit Hours)

The course teaches Cardiovascular Physiology at a level appropriate for an advanced graduate student. The course discusses normal physiology as well as selected cardiovascular disorders. This course helps the student understand the integration of cardiovascular physiology with cardiac muscle, vascular smooth muscle, and endothelium as a basis for a better understanding of human disease. This course will also cover the important mechanisms, including renal pressure-natriuresis and cardiac output, in the regulation of blood pressure. The ultimate goal of this course is for students to develop an in-depth understanding of the integrated functions of cardiovascular system.

Prerequisite(s): PSIO 6110 >= C

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

PSIO 7410 - Independent Research (6 Credit Hours)

This course provides students with the opportunity to experience and learn the scientific fundamentals of physiological research by working on an original research project in the laboratory of an Augusta University faculty member. This course will include an in-depth look at the key elements in the scientific method including: asking important questions/making observations, performing literature reviews, formulating hypotheses, designing experiments to test the hypotheses, obtaining and analyzing data, and presenting the data in written and verbal formats. Students will present the results of their research projects in oral presentation.

Lab Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group **Schedule Type (Additional):** Supervised Lab/Clinic

PSIO 7510 - Advanced Cell and Molecular Physiology (2 Credit Hours)

This course covers the structure, chemical organization, and function of cells. This course also covers molecular techniques, including gene cloning, PCR, transgenic mice, and knockout mice, and the application of these techniques in research. This is a course designed to help students understand in-depth knowledge of cell and molecular physiology.

Prerequisite(s): PSIO 6110 >= C

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

PSIO 8110 - Medical Physiology I (8 Credit Hours)

Physiology is the fundamental basis of medicine. Physiology emphasizes understanding the mechanisms of life by integrating molecular, cellular, tissue, organ, and whole-body function. This course will focus on the mechanisms of healthy body functions and normal responses to the environment. The course will cover three major modules - Module 1: Principles of Medical Physiology; Module 2: Cardiopulmonary Physiology; and Module 3: Renal Physiology. Module 1 helps students understand normal physiology based on genetics, molecular biology, nerves, and muscle. Module 2 covers the physiology of the heart and blood vessels, as well as respiratory physiology. Module 3 covers the function of the renal system. The goal of this course is to provide students a comprehensive understanding of the functions of these important physiological systems. This course (PSIO 8110 Medical Physiology I) is cross-leveled with PSIO 6110, and includes an additional assignment for doctoral level component. PSIO 8110 and PSIO 6110 are equivalent courses; a student may not receive credit for both.

Lecture Hours: 8

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

PSIO 8300 - Thesis Research (1 to 12 Credit Hours)

Permanent assignment to a specific lab with a faculty advisor and a defined research project. Students work under the mentorship of their faculty thesis advisor to define, develop, and carry out the basic study of a research problem of interest to both student and advisor. This course is designed to develop the experience, understanding, and skills to conduct and assess original, independent research in biomedical science. This course is typically taken more than one time and culminates in the final semester in the preparation and defense of a MS thesis.

Lab Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MS_PHYS-Physiology

Schedule Type (Primary): Thesis

PSIO 8310 - Principles of Medical Physiology (2 Credit Hours)

Explores normal physiology based on genetics, molecular biology, nerves, and muscle. The goal of this course is to provide students a comprehensive understanding of the principles of the basic physiology. This course is the Module 1 of PSIO 8110, cross-leveled with PSIO 6110, and thus, includes an additional assignment for doctoral level component. Students who have earned credits for PSIO 8110 or PSIO 6110 are not allowed to register this course.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F), Audit

Schedule Type (Primary): Lecture

PSIO 8315 - Teaching Practicum in Physiology (2 Credit Hours)

This course will provide mentored practical experience teaching in medical physiology. This course will run concurrently with COGS 8033 Integrative Systems Biology which is a 6 credit hour course. Students can sign up for one of the four blocks covered in COGS 8033. Depending on the number of students enrolled, a maximum of two students will be assigned to each block on a first-come, first-served basis. They will be required to attend the lectures, work with the instructor for the preparation of the lectures and exam and tutor first year students who are enrolled in COGS 8033.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Major Restrictions: Physiology **Course Level Restrictions:** Graduate Semester **Program Restrictions:** DPHIL_PHYS-Physiology

Schedule Type (Primary): Lecture

PSIO 8320 - Medical GI Physiology (2 Credit Hours)

This course will cover the normal physiology of the gastrointestinal system. The goal of this course is to provide students a comprehensive understanding of the functions and physiology of the GI system. This course (PSIO 8320 Medical GI Physiology) is the Module 1 of the PSIO 8810, cross-leveled with PSIO 6810, and thus, includes an additional assignment for doctoral level component. Students who have earned credits for PSIO 8810 or PSIO 6810 are not allowed to register this course. This course is a 2-credit hour course, including 6 hours of the mini review writing assignment.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture

PSIO 8330 - Medical Neurophysiology (3 Credit Hours)

This course will cover the functions of human nervous system. The goal of this course is to provide students a comprehensive understanding of the functions and physiology of brain and nervous systems. This course (PSIO 8330 Medical neurophysiology) is the Module 3 of the PSIO 8810, cross-leveled with PSIO 6810, and thus, includes an additional assignment for doctoral level component. Students who have earned credits for PSIO 8810 or PSIO 6810 are not allowed to register this course.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture

PSIO 8335 - Medical Pulmonary Physiology (2 Credit Hours)

The normal physiology of pulmonary system. Provides students a comprehensive understanding of the functions and regulation of the pulmonary system. This course is the Module 2-2 of the PSIO 8110, cross-leveled with PSIO 6110, and thus, includes an additional assignment for doctoral level component. Students who have earned credits for PSIO 8110 or PSIO 6110 are not allowed to register this course.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F), Audit

Schedule Type (Primary): Lecture

PSIO 8340 - Advanced Study of Physiology (2 Credit Hours)

Prerequisites: Satisfactory completion of the core course and first exam. The course is designed to provide the student in-depth knowledge of physiology in the area that encompasses their research training. This typically will be a directed reading format with one discussion/oral quiz session per week.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy

Schedule Type (Primary): Lecture

PSIO 8350 - Current Trends in Physiology (1 Credit Hour)

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal

Schedule Type (Primary): Lecture

PSIO 8370 - Medical Endocrine and Reproductive Physiology (2 Credit Hours)

This course will cover the physiology of endocrine and reproductive systems. The goal of this course is to provide students a comprehensive understanding of the functions and physiology of hormonal regulations of endocrine and reproductive systems. This course (PSIO 8370 Medical Endocrine & Reproductive Physiology) is the Module 2 of the PSIO 8810, cross-leveled with PSIO 6810, and thus, includes an additional assignment for doctoral level component. Students who have earned credits for PSIO 8810 or PSIO 6810 are not allowed to register this course.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Doctor of Philosophy **Program Restrictions:** DPHIL_UNDCL-Biomedical Sciences Undeclared

Schedule Type (Primary): Lecture

PSIO 8380 - Medical Cardiovascular Physiology (3 Credit Hours)

The course will cover the normal physiology of Cardiovascular system. The goal of this course is to provide students a comprehensive understanding of the functions and physiology of the cardiovascular system. This course (PSIO 8380 Medical Cardiovascular Physiology) is the Module 2-1 of the PSIO 8110, cross-leveled with PSIO 6110, and thus, includes an additional assignment for doctoral level component. Students who have earned credits for PSIO 8110 or PSIO 6110 are not allowed to register this course. This course is a 3-credit hour course, including 6 hours of the mini review writing assignment.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Doctor of Philosophy **Program Restrictions:** DPHIL_UNDCL-Biomedical Sciences Undeclared

Schedule Type (Primary): Lecture

PSIO 8390 - Medical Renal Physiology (2 Credit Hours)

The course will cover the normal physiology of renal system. The goal of this course is to provide students a comprehensive understanding of the functions and physiology of the urinary system. This course (PSIO 8390 Medical Renal Physiology) is the Module 3 of the PSIO 8110, cross-leveled with PSIO 6110, and thus, includes an additional assignment for doctoral level component. Students who have earned credits for PSIO 8110 or PSIO 6110 are not allowed to register this course.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Doctor of Philosophy **Program Restrictions:** DPHIL_UNDCL-Biomedical Sciences Undeclared

Schedule Type (Primary): Lecture

PSIO 8710 - Pathophysiology I (2 Credit Hours)

This course will focus on the pathophysiology of medical disorders associated with the systems covered in the PSIO 8110 Medical Physiology I course (disorders related to cell, membrane and muscle physiology; cardiopulmonary physiology; and renal physiology). Students will be introduced to common themes and concepts in pathophysiology, as well as clinically relevant disorders of physiological systems. Emphasis will be placed on developing a deeper understanding of the mechanisms of disease and understanding the signs, symptoms and treatment of relevant disorders. This course (PSIO 8710 Pathophysiology I) is cross-leveled with PSIO 6710, and includes an additional assignment for doctoral level component. PSIO 8710 and PSIO 6710 are equivalent courses; a student may not receive credit for both.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

PSIO 8720 - Pathophysiology II (2 Credit Hours)

This course will focus on the pathophysiology of medical disorders associated with the systems covered in the PSIO 8810 Medical Physiology II course (disorders related to GI; endocrine & reproductive; and neurophysiology). Students will be introduced to common themes and concepts in pathophysiology, as well as clinically relevant disorders of physiological systems. Emphasis will be placed on developing a deeper understanding of the mechanisms of disease and understanding the signs, symptoms and treatment of relevant disorders. This course (PSIO 8720 Pathophysiology II) is cross-leveled with PSIO 6720, and includes an additional assignment for doctoral level component. PSIO 8720 and PSIO 6720 are equivalent courses; a student may not receive credit for both.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

PSIO 8810 - Medical Physiology II (6 Credit Hours)

Physiology is the fundamental basis of medicine. Physiology emphasizes understanding the mechanisms of life by integrating molecular, cellular, tissue, organ, and whole-body function. This course will focus on the mechanisms of healthy body functions and normal responses to the environment. This course is a continuation of the PSIO 8110 Medical Physiology I course, and will cover three major modules - Module 1: Gastrointestinal Physiology; Module 2: Endocrinology; and Module 3: Neurophysiology. Module 1 covers the normal physiology of the gastrointestinal system. Module 2 covers the numerous classes of hormones, hormone production and signaling in normal physiology. Module 3 covers the functions of human nervous system. The goal of this course is to provide students a comprehensive understanding of the functions of these important physiological systems. This course (PSIO 8810 Medical Physiology II) is cross-leveled with PSIO 6810, and includes an additional assignment for doctoral level component. PSIO 8810 and PSIO 6810 are equivalent courses; a student may not receive credit for both.

Lecture Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

PSIO 9010 - Seminar in Physiology (1 Credit Hour)

Attendance and participation in research presentations by MCG faculty and visiting research scientists.

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy

Schedule Type (Primary): Seminar - Small Group

PSIO 9210 - Investigation of a Problem (1 to 12 Credit Hours)

The student works with individual faculty members on a specific investigative research problem. This provides an introduction to analytical techniques and the scientific method in action.

Lab Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: The Graduate School **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Program Restrictions:** DPHIL_PHYS-Physiology

Schedule Type (Primary): Supervised Lab/Clinic

PSIO 9300 - Research (1 to 12 Credit Hours)

Permanent assignment to a specific lab with a faculty advisor and a defined research project. Students work closely with their faculty thesis/dissertation advisor on an in-depth study of a research problem of interest to both student and advisor. This course culminates in the preparation of a PhD dissertation or MS thesis. Enrollment in this course requires official admission to candidacy.

Lab Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: The Graduate School **Major Restrictions:** Physiology **Student Class Restrictions:** Graduate-Semester

Course Level Restrictions: Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Program Restrictions:** DPHIL_PHYS-Physiology

Schedule Type (Primary): Dissertation

POLS 1101 - Introduction to American Government (3 Credit Hours)

An introductory course covering the essential facts of federal, state and local governments in the United States. A satisfactory grade will exempt a student from the requirement of passing an examination on the Constitution of the United States and the Constitution of Georgia before graduation.

Core IMPACTS Requirement(s) Satisfied: Political Science and U.S. History (Citizenship)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Unsupervised Lab/Clinic,Asynchronous Instruction

POLS 1101H - Honors: Introduction to American Government (3 Credit Hours)

An introductory course covering the essential facts of federal, state and local governments in the United States. A satisfactory grade will exempt a student from the requirement of passing an examination on the Constitution of the United States and the Constitution of Georgia before graduation. This is an Honors Course.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Unsupervised Lab/Clinic,Asynchronous Instruction

POLS 2000 - Society, Law, and the Criminal (3 Credit Hours)

An introductory examination of the nature of crime, the consequences of crime for society, and an intensive examination and evaluation of the law as a social device for coping with crime.

Prerequisite(s): POLS 1101 >= C or POLS 1101H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar Small Group,Directed Study (one-to-one),Asynchronous Instruction

POLS 2101 - Introduction to Political Science (3 Credit Hours)

This course is designed to provide a foundation for and a focus on the theories and language of the discipline and on political inquiry.

Prerequisite(s): POLS 1101 >= C or POLS 1101H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Asynchronous Instruction,Practice Teaching

POLS 2401 - Introduction to Global Issues (3 Credit Hours)

A course that focuses on major global issues and problems. Credit for prior learning may be provided to students who have earned at least a 3 on the Comparative Government & Politics AP Examination.

Prerequisite(s): POLS 1101 >= C or POLS 1101H >= C

Core IMPACTS Requirement(s) Satisfied: Social Sciences (Social Sciences)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

POLS 2930 - Model UN I (3 Credit Hours)

Lower-level study away course denoting sophomore level work in the Model UN program.

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

POLS 3100 - Introduction to the European Union (3 Credit Hours)

The course outlines the historical origin and development of the EU, its institutions, processes, their structures and functions. The course also examines current EU policies and issues.

Prerequisite(s): POLS 1101 >= C or POLS 1101H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group, Supervised Lab/Clinic, Asynchronous Instruction

POLS 3101 - Comparative European Governments (3 Credit Hours)

This course describes and analyzes the major political systems in Western Europe. It includes France, Germany, Italy and Great Britain. It compares and contrasts the constitutions of these four countries and their political and economic developments after the Second World War.

Prerequisite(s): POLS 1101 >= C or POLS 1101H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

POLS 3301 - Judicial Process (3 Credit Hours)

An introduction to the three major areas of law, civil, criminal and administrative, their institutions and functions.

Prerequisite(s): POLS 1101 >= C or POLS 1101H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

POLS 3401 - Congress and the Presidency (3 Credit Hours)

A detailed study of American Congress and the presidency, considering their constitutional basis, selection process, contemporary roles, and relationships with other elements of the political system.

Prerequisite(s): POLS 1101 >= C or POLS 1101H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

POLS 3501 - Ancient Political Thought (3 Credit Hours)

A critical examination of ancient Greek political philosophy in the writings of Plato and Aristotle and their expressions of fundamental theoretical and practical approaches to political experiences of regime and citizenship. Their contemporary relevance will be scrutinized.

Prerequisite(s): POLS 1101 >= C or POLS 1101H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

POLS 3601 - Modern Political Thought (3 Credit Hours)

The development of modern political ideas underlying democratic theory and liberalism as found in the works of Hobbes, Locke, Rousseau and Mill.

Prerequisite(s): POLS 1101 >= C or POLS 1101H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching

POLS 3701 - Contemporary Political Thought (3 Credit Hours)

An analysis of political ideas, theories, ideologies, and issues as presented in the writings of contemporary thinkers.

Prerequisite(s): POLS 1101 >= C or POLS 1101H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

POLS 3702 - American Political Thought (3 Credit Hours)

This course focuses on the major philosophical concepts guiding the American political regime. A plurality of the course focuses on the major philosophers who influenced the American Founders and the ideas of the Founders. Major concepts discussed are equality, justice, fairness, liberty, and tolerance.

Prerequisite(s): (POLS1101 >= C or POLS1101H >= C or POL101 >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

POLS 3800 - Introduction to Political Research (3 Credit Hours)

Introduces students to the principles of designing research, defining and measuring variables, sampling, and data collection. Emphasis is placed on the scientific study of political behavior.

Prerequisite(s): (POLS 1101 >= C or POLS 1101H >= C) and POLS 2101 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Internship/Practicum, Thesis, Dissertation

POLS 3801 - International Relations (3 Credit Hours)

The course is designed to survey the major theories which serve as models for understanding and analyzing the political processes of the international system, to guide students through the best in theory and to trace the development of international relations as a field of systematic study.

Prerequisite(s): POLS 1101 >= C or POLS 1101H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

POLS 3901 - Campaigns and Elections (3 Credit Hours)

A course in campaign strategies, tactics and financing, political polling, voter behavior, political parties, and how elections are conducted within the context of the current election year in the United States.

Prerequisite(s): POLS 1101 >= C or POLS 1101H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group, Directed Study (one-to-one), Asynchronous Instruction

POLS 4050 - Nonprofit Management (3 Credit Hours)

This course introduces students to the world of nonprofit management. It covers a broad spectrum of issues including creating a nonprofit, fundraising, recruitment and management of volunteers, the basic principles of program evaluation, and the proper role of a board.

Prerequisite(s): POLS 1101 >= C or POLS 1101H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

POLS 4051 - Financial Management for Nonprofits (3 Credit Hours)

An overview of the financial issues, challenges and opportunities facing nonprofits managers. The course includes instruction in budgeting and financial management strategies appropriate for the nonprofit sector.

Prerequisite(s): POLS 1101 >= C or POLS 1101H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Seminar - Small Group **Schedule Type (Additional):** Independent Study, Directed Study (one-to-one), Asynchronous Instruction

POLS 4052 - Fundraising for Nonprofit Organizations (3 Credit Hours)

The course introduces students to the basic theories and practices of fundraising for nonprofit organizations. The course will examine philanthropy in the nonprofit sector through exploring topics such as grant writing, managing fundraising campaigns, and evaluating fundraising efforts.

Prerequisite(s): POLS 1101 >= C or POLS 1101H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Directed Study (one-to-one), Asynchronous Instruction

POLS 4101 - State Government (3 Credit Hours)

A broad based approach to organizational forms, functions and procedures of state governments. Emphasis is placed on the government and constitution of Georgia. Regional and state infrastructures are also covered. Successful completion of the course

satisfies the Georgia Constitution requirement. May be taken for graduate credit within the prescribed limits and with the chair's approval.

Prerequisite(s): POLS 1101 >= C or POLS 1101H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

POLS 4201 - Urban Policy Analysis (3 Credit Hours)

The origin, development and growth of local government forms. Policy making process and governmental reorganization will be stressed. Emphasis will also be placed on urban redevelopment and infrastructure. May be taken for graduate credit within the prescribed limits and with the chair's approval.

Prerequisite(s): POLS 1101 >= C or POLS 1101H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

POLS 4301 - Principles of Public Administration (3 Credit Hours)

The course describes the general principles, problems and practices of public administration, emphasizing governmental process in the executive branch. May be taken for graduate credit within the prescribed limits and with the chair's approval.

Prerequisite(s): POLS 1101 >= C or POLS 1101H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

POLS 4302 - Political Economy (3 Credit Hours)

Introduces students to the study of the relationship between government and economic institutions, and how the political environment and institutions affect market behavior.

Prerequisite(s): POLS 1101 >= C or POLS 1101H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

POLS 4303 - Public Budgeting (3 Credit Hours)

Introduces students to the institutions and techniques of financial administration in federal, state, and local government. The role of the budget as a tool in expressing political priorities is emphasized.

Prerequisite(s): POLS 1101 >= C or POLS 1101H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

POLS 4304 - Public Human Resource Management (3 Credit Hours)

Introduces students to the personnel practices and processes in federal, state, and local governments. Legal, political, social and ethical issues in personnel management will be addressed.

Prerequisite(s): POLS 1101 >= C or POLS 1101H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

POLS 4401 - Government Organization and Administrative Theory (3 Credit Hours)

A systematic analysis of major theories of organization, management, and administration in the public sector. Emphasis will be placed on the formal scientific management school and the less formal human relations approach. Organization processes, environments, and effectiveness will be analyzed. May be taken for graduate credit within the prescribed limits and with the chair's approval.

Prerequisite(s): POLS 1101 >= C or POLS 1101H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

POLS 4501 - Constitutional Law: Distribution of Power (3 Credit Hours)

The role of the Supreme Court as arbiter of separation of powers and federalism, as well as the interplay of political, social, and economic forces. May be taken for graduate credit within the prescribed limits and with the chair's approval.

Prerequisite(s): POLS 1101 >= C or POLS 1101H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Seminar - Small Group **Schedule Type (Additional):** Independent Study, Directed Study (one-to-one), Asynchronous Instruction

POLS 4601 - Constitutional Law: Civil Liberties (3 Credit Hours)

A study of the constitutional protection of civil liberties in the U.S., emphasizing freedom of expression, religious freedom, and the nationalization of the Bill of Rights. May be taken for graduate credit within the prescribed limits and with the chair's approval.

Prerequisite(s): POLS 1101 >= C or POLS 1101H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

POLS 4701 - Governments of Developing Nations (3 Credit Hours)

Focuses on the concepts of political stability, conflict, revolution, nationalism, hyper-disintegration, economic development and modernization. May be taken for graduate credit within the prescribed limits and with the chair's approval.

Prerequisite(s): POLS 1101 >= C or POLS 1101H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

POLS 4807 - The Supreme Court (3 Credit Hours)

This course will focus on the role of the Supreme Court in American democracy. It will introduce students to concepts like constitutionalism and judicial review and examine how the Supreme Court functions, the work it does and the effects its decisions have on the American people.

Prerequisite(s): POLS 1101 >= C or POLS 1101H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Internship/Practicum, Thesis, Dissertation

POLS 4809 - Identity, Nationalism and Ethnic Conflict (3 Credit Hours)

This course will examine the role of identity and nationalism in ethnic conflict situations around the world. Students will learn about various theories put forward to explain these phenomenon and also study ways in which these conflicts can be mitigated or prevented.

Prerequisite(s): POLS 1101 >= C or POLS 1101H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Internship/Practicum, Thesis, Dissertation

POLS 4902 - World Politics (3 Credit Hours)

A comprehensive study of the international political system, concentrating on the environmental factors, theories of international relations, the nation state and nationalism, international conflict, international cooperation, transnational institutions, balance of power and collective security, military strategy, the role of diplomacy, the dynamics of national foreign policy, the role of nuclear weapons in world politics, and other contemporary problems. May be taken for graduate credit within the prescribed limits and with the chair's approval.

Prerequisite(s): POLS 1101 >= C or POLS 1101H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis

POLS 4904 - Politics of Latin America (3 Credit Hours)

This course is designed to provide students with an overview of the political systems of Latin American countries. It describes the various political experiences among Latin American nations and compares and contrasts their constitutions. May be taken for graduate credit within the prescribed limits and with the chair's approval.

Prerequisite(s): POLS 1101 >= C or POLS 1101H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

POLS 4905 - United States Foreign Policy (3 Credit Hours)

An upper-level course examining US foreign policy and concentrating on the history, the theories, the processes, and the challenges of this policy. May be taken for graduate credit within the prescribed limits and with the chair's approval.

Prerequisite(s): (POLS1101 >= C or POLS1101H >= C or POL101 >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

POLS 4906 - International Terrorism (3 Credit Hours)

This course will introduce students to the phenomenon of international terrorism. The course will examine the meaning and uses of terrorism and different interpretations used by different countries, peoples and governments. Students will be introduced to various theories explaining the phenomenon as well as to actual case studies of terrorist events.

Prerequisite(s): POLS 1101 >= C or POLS 1101H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

POLS 4907 - The Politics of India (3 Credit Hours)

An introduction to the complexity of Indian politics. Examines the historical, cultural and institutional underpinnings of the Indian state and democracy. Various institutional mechanisms, the role of elites at the national and regional levels, and the challenges posed by the constantly changing patterns of caste, ethnic, and religious alliances as well as issues of economic development are explored.

Prerequisite(s): POLS 1101 >= C or POLS 1101H >= C

Lecture Hours: 3 **Contact Hours:** 45

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Asynchronous Instruction

POLS 4911 - Introduction to Security Studies (3 Credit Hours)

This course covers the basic approaches to security studies, emerging trends in security studies, current global threats to US national security, and policy responses to such threats.

Prerequisite(s): POLS 1101 >= C or POLS 1101H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

POLS 4912 - Counterterrorism (3 Credit Hours)

This course will focus on examining the macro and micro level approaches to combating domestic and international terrorism.

Prerequisite(s): POLS 1101 >= C or POLS 1101H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

POLS 4913 - The Politics of Islam (3 Credit Hours)

The course will provide students with an understanding of the role of Islam in international politics today.

Prerequisite(s): POLS 1101 >= C or POLS 1101H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

POLS 4914 - Introduction to Middle Eastern Security Studies (3 Credit Hours)

This course will introduce students to the sources of interstate conflict, intrastate conflict, and terrorism in the Middle Eastern region.

Prerequisite(s): POLS 1101 >= C or POLS 1101H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

POLS 4915 - The Economics of Security (3 Credit Hours)

This course analyzes the economic underpinnings of military power and national security. It also examines the economic aspects of non-traditional (transnational) security threats whose spread and impact have been amplified by the process of globalization. The course explores ways to foster engagement between security studies and international political economy.

Prerequisite(s): POLS 1101 >= C or POLS 1101H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

POLS 4920 - Cyber Intelligence and Policy (3 Credit Hours)

This course introduces students to strategic cyber security and covers topics as diverse as cyber war, hacktivism, big data, cyber-crime, and threats to critical infrastructure. It also discusses common internet vulnerabilities as well as related legal and ethical concerns regarding privacy and government surveillance.

Prerequisite(s): POLS 1101 >= C or POLS 1101H >= C

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

POLS 4921 - Advanced Strategic Cyber Security (3 Credit Hours)

This is a non-technical but intermediate course in strategic cyber security that is designed to help students better conceptualize the nature of the world's cyber threats. It focuses on the national security aspects of cyber security and introduces students to the world's major cyber adversaries: the United States, China, Russia, Iran, and North Korea. Students will learn about the major geo-political concerns of these countries, their national security strategies, and how the development and organization of their cyber capabilities support their national objectives.

Prerequisite(s): (POLS 1101 >= C or POLS 1101H >= C) and (POLS 4920 >= C)

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

POLS 4922 - Cyber Conflict: History and Theory of Cyber War (3 Credit Hours)

This is a non-technical course that introduces students to the major cyber conflicts that have transpired since the dawn of the "internet age" and the geo-political developments leading to each. It discusses the relevance of major strategic theorists to cyber conflict and whether cyber capabilities represent a revolution in military affairs. Finally, it considers possible future developmental trajectories of cyber capabilities as they relate to the conduct of warfare and the ethical concerns these developments may bring.

Prerequisite(s): POLS 1101 >= C or POLS 1101H >= C

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

POLS 4930 - Model UN II (3 Credit Hours)

Upper-level political science course denoting senior-level work in the Model UN program.

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit
Schedule Type (Primary): Lecture

POLS 4950 - Political Science Selected Topics (0 to 3 Credit Hours)

Designed primarily for students who wish to pursue an in-depth study of a specialized area in Political Science. May be taken for graduate credit within the prescribed limits and with the chair's approval.

Prerequisite(s): POLS 1101 >= C or POLS 1101H >= C

Lecture Hours: 0 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction, Internship/Practicum

POLS 4960 - Undergraduate Internship (3 to 9 Credit Hours)

An internship is a service-learning experience based in an institution or agency, emphasizing the completion a specific task and the acquisition of specific knowledge and skills under the supervision of the university and the cooperating institution or agency.

Prerequisite(s): POLS 1101 >= C or POLS 1101H >= C

Lecture Hours: 3 to 9

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

POLS 4990 - Undergraduate Research (3 Credit Hours)

This is a supervised research on a political science topic of interest to the student and the supervisor. Advanced planning is required and a contract proposal must be approved by the supervisor and the department chair before enrolling in the course.

Prerequisite(s): POLS 3800 >= C

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Internship/Practicum, Thesis, Dissertation

POLS 6905 - United States Foreign Policy (3 Credit Hours)

An upper level course examining US Foreign Policy and concentrating on the history, the theories, the processes, and the challenges of this policy. May be taken for graduate credit within the prescribed limits and with the chair's approval. Prerequisite(s): POLS 1101, grade of C or better.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Graduate-Semester **Course Level Restrictions:** Graduate-Quarter

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

POLS 6950 - Selected Topics (3 Credit Hours)

Designed primarily for students who wish to pursue an in-depth study of a specialized area in Political Science. May be taken for graduate credit within the prescribed limits and with the chair's approval. Prerequisite(s): POLS 1101, grade of C or better.

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

PRDM 5602 - Principles and Practice of Small Business Administration (2 Credit Hours)

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Major Restrictions: Advanced Standing DMD

Schedule Type (Primary): Lecture

PRDM 5603 - Principles and Practice of Small Business Administration II (3 Credit Hours)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Major Restrictions: Advanced Standing DMD

Schedule Type (Primary): Lecture

PROS 5601 - Advanced Prosthodontics (3 Credit Hours)

Lecture Hours: 2 **Lab Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Major Restrictions: Advanced Standing DMD

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PROS 5701 - Prosthodontics Clinic (0 to 2 Credit Hours)

Contact Hours: 0 to 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Continuing Progress Courses

Major Restrictions: Advanced Standing DMD

Schedule Type (Primary): Supervised Lab/Clinic

PROR 7011 - Complete Dentures (3 Credit Hours)

This course employs lecture presentations, literature review, practical demonstrations, clinical exercises and independent study to enable the prosthodontics resident to develop in-depth knowledge and clinical expertise in complete denture prosthodontics.

Lecture Hours: 1 **Lab Hours:** 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PROR 7012 - Removable Partial Prosthodontics (3 Credit Hours)

This course employs lecture presentations, literature review, practical demonstrations, clinical exercises and independent study to enable the prosthodontics resident to develop in-depth knowledge and clinical expertise in removable partial denture prosthodontics.

Lecture Hours: 1 **Lab Hours:** 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PROR 7013 - Fixed Partial Prosthodontics (2 Credit Hours)

This course employs lecture presentations, literature review, practical demonstrations, clinical exercises and independent study to enable the prosthodontics resident to develop in-depth knowledge and clinical expertise in fixed partial denture prosthodontics.

Lecture Hours: 1 **Lab Hours:** 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PROR 7014 - Intraoral Photography (1 Credit Hour)

This course employs lecture presentations, practical demonstrations, clinical exercises and independent study to enable the prosthodontics resident to develop the knowledge and clinical skills necessary for producing successful clinical photographs.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PROR 7021 - Literature Review I (4 Credit Hours)

This is a seminar course in which prosthodontics residents review and critique selected articles from the recent prosthodontics literature.

Lecture Hours: 4

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

PROR 7022 - Prosthodontics Treatment Planning Conference I (4 Credit Hours)

This is a seminar course in which prosthodontics residents prepare and present case presentations of their assigned patients to the Program Director and fellow residents. Case presentations must include clinical photos, radiographs, mounted diagnostic casts, written history, and clinical exam information. With these aids a primary and, if appropriate, two alternative treatment plans are presented.

Lecture Hours: 3 **Lab Hours:** 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PROR 7024 - Occlusion/Articulator Seminar I (4 Credit Hours)

These seminars are a combination of literature reviews covering all aspects of occlusion and mandibular movement, lectures that coordinate with the literature reviews, and hands-on workshops through which the residents are taught the materials, instruments and techniques for recording, measuring, modifying and understanding occlusion and mandibular movement as it pertains to prosthodontics. Several of the most common and useful articulator systems are presented.

Lecture Hours: 3 **Lab Hours:** 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PROR 7025 - Maxillofacial Prosthodontics I (1 Credit Hour)

This is a lecture/seminar course in which prosthodontics residents are introduced to the techniques and procedures employed for the prosthetic rehabilitation and long term management of patients with maxillofacial defects of developmental, traumatic injury or

pathologic origin.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

PROR 7026 - Implant Seminar I (2 Credit Hours)

Lecture Hours: 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

PROR 7027 - Resident Fixed and Removable Prosthodontics Seminar (1 Credit Hour)

This is a seminar course in which prosthodontics residents gain experience in making oral presentations to their peers. Residents are provided a list of seminar topics and must thoroughly research the topic, prepare a well-organized, thorough and up-to-date powerpoint presentation, and then deliver this presentation in a seminar session with their fellow residents and supervising faculty. Residents must be able to respond to questions with appropriate evidence from the literature.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

PROR 7031 - Literature Review II (4 Credit Hours)

This is a seminar course in which prosthodontics residents review and critique selected articles from the recent prosthodontics literature.

Lecture Hours: 4

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

PROR 7032 - Prosthodontics Treatment Planning Conference II (4 Credit Hours)

This is a seminar course in which prosthodontics residents prepare and present case presentations of their assigned patients to the Program Director and fellow residents. Case presentations must include clinical photos, radiographs, mounted diagnostic casts, written history, and clinical exam information. With these aids a primary and, if appropriate, two alternative treatment plans are presented.

Lecture Hours: 3 **Lab Hours:** 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PROR 7034 - Prosthodontics Board Review I (2 Credit Hours)

The Prosthodontics Board Review course is a seminar designed to prepare prosthodontic residents for the oral section of the American Board of Prosthodontics Examination. Residents are assigned questions related to topics covered on the ABP exam and are expected to research these topics in the scientific literature in order to develop well-reasoned and clear responses to each question.

Lecture Hours: 2

Repeatability: May be repeated for credit up to four times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

PROR 7035 - Prosthodontics Biomaterials (2 Credit Hours)

This is a comprehensive course introducing the resident to the chemistry and physical properties pertinent to the most commonly used prosthodontic dental materials.

Lecture Hours: 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

PROR 7036 - Implant Seminar I (2 Credit Hours)

This is an ongoing lecture/seminar course designed to introduce the prosthodontics resident to the theoretical principles, designs and materials used in osseointegrated implant prosthodontics.

Lecture Hours: 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

PROR 7037 - Temporomandibular Dysfunction (1 Credit Hour)

This is a lecture/seminar course in which prosthodontics residents are introduced to the techniques of diagnosis and treatment of patients with temporomandibular dysfunction.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

PROR 7121 - Clinical Prosthodontics I (13 Credit Hours)

This is a clinical course for residents in advanced prosthodontics. Residents are assigned patients for comprehensive prosthodontic evaluation and treatment and must complete a specified number of advanced prosthodontic procedures and complete treatment on a specified number of patients in order to satisfy the requirements for completion of the certificate program.

Lab Hours: 13

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Supervised Lab/Clinic

PROR 7131 - Clinical Prosthodontics II (23 Credit Hours)

This is a clinical course for residents in advanced prosthodontics. Residents are assigned patients for comprehensive prosthodontic evaluation and treatment and must complete a specified number of advanced prosthodontic procedures and complete treatment on a specified number of patients in order to satisfy the requirements for completion of the certificate program.

Lab Hours: 23

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Supervised Lab/Clinic

PROR 8021 - Literature Review III (4 Credit Hours)

This is a seminar course in which prosthodontics residents review and critique selected articles from the recent prosthodontics literature.

Lecture Hours: 4

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

PROR 8022 - Prosthodontics Treatment Planning Conference III (4 Credit Hours)

This is a seminar course in which prosthodontics residents prepare and present case presentations of their assigned patients to the Program Director and fellow residents. Case presentations must include clinical photos, radiographs, mounted diagnostic casts, written history, and clinical exam information. With these aids a primary and, if appropriate, two alternative treatment plans are presented.

Lecture Hours: 3 Lab Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PROR 8025 - Temporomandibular Dysfunction (1 Credit Hour)

This is a lecture/seminar course in which prosthodontics residents are introduced to the techniques of diagnosis and treatment of patients with temporomandibular dysfunction.

Lecture Hours: 1

Repeatability: May be repeated for credit up to four times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

PROR 8026 - Occlusion/Articulator Seminar II (4 Credit Hours)

These seminars are a combination of literature reviews covering all aspects of occlusion and mandibular movement, lectures that coordinate with the literature reviews, and hands-on workshops through which the residents are taught the materials, instruments and techniques for recording, measuring, modifying and understanding occlusion and mandibular movement as it pertains to prosthodontics. Several of the most common and useful articulator systems are presented.

Lecture Hours: 3 Lab Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PROR 8028 - Implant Seminar III (2 Credit Hours)

This is an ongoing lecture/seminar course designed to introduce the prosthodontics resident to the theoretical principles, designs and materials used in osseointegrated implant prosthodontics.

Lecture Hours: 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

PROR 8031 - Literature Review IV (4 Credit Hours)

This is a seminar course in which prosthodontics residents review and critique selected articles from the recent prosthodontics literature.

Lecture Hours: 4

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture

PROR 8032 - Prosthodontics Treatment Planning Conference IV (4 Credit Hours)

This is a seminar course in which prosthodontics residents prepare and present case presentations of their assigned patients to the Program Director and fellow residents. Case presentations must include clinical photos, radiographs, mounted diagnostic casts, written history, and clinical exam information. With these aids a primary and, if appropriate, two alternative treatment plans are presented.

Lecture Hours: 3 Lab Hours: 1

Repeatability: May be repeated for credit up to four times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PROR 8034 - Prosthodontics Board Review II (2 Credit Hours)

The Prosthodontics Board Review course is a seminar designed to prepare prosthodontic residents for the oral section of the American Board of Prosthodontics Examination. Residents are assigned questions related to topics covered on the ABP exam and are expected to research these topics in the scientific literature in order to develop well-reasoned and clear responses to each question.

Lecture Hours: 2

Repeatability: May be repeated for credit up to four times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

PROR 8035 - Implant Seminar IV (2 Credit Hours)

This is an ongoing lecture/seminar course designed to introduce the prosthodontics resident to the theoretical principles, designs and materials used in osseointegrated implant prosthodontics.

Lecture Hours: 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group

PROR 8120 - Clinical Prosthodontics (34 Credit Hours)

Prosthodontic patient care clinic.

Lab Hours: 850

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Supervised Lab/Clinic

PROR 8121 - Clinical Prosthodontics III (19 Credit Hours)

This is a clinical course for residents in advanced prosthodontics. Residents are assigned patients for comprehensive prosthodontic evaluation and treatment and must complete a specified number of advanced prosthodontic procedures and complete treatment on a specified number of patients in order to satisfy the requirements for completion of the certificate program.

Lab Hours: 19

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Supervised Lab/Clinic

PROR 8130 - Clinical Prosthodontics (21 Credit Hours)

Clinical Patient Care

Contact Hours: 33

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Supervised Lab/Clinic

PROR 8131 - Clinical Prosthodontics IV (23 Credit Hours)

This is a clinical course for residents in advanced prosthodontics. Residents are assigned patients for comprehensive prosthodontic evaluation and treatment and must complete a specified number of advanced prosthodontic procedures and complete treatment on a specified number of patients in order to satisfy the requirements for completion of the certificate program.

Lab Hours: 23

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Supervised Lab/Clinic

PROR 9010 - Didactic Prosthodontics (8 Credit Hours)

Research-

Lecture Hours: 16

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Seminar - Small Group

PROR 9020 - Didactic Prosthodontics (20 Credit Hours)

Current Literature Review Treatment Planning Conference Clinical Research

Lecture Hours: 12

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Seminar - Small Group

PROR 9022 - Predoctoral Teaching I (8 Credit Hours)

Third-year prosthodontics residents gain experience in clinical, pre-clinical laboratory, and/or lecture format teaching based on the opportunities available in the DMD program curriculum at the time this teaching rotation assignment occurs. Residents are assigned to student teaching for one half-day session per week for the semester.

Lecture Hours: 3 **Lab Hours:** 5

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PROR 9023 - Clinical Research I (3 Credit Hours)

Prosthodontics residents gain experience in research beginning in the first year. They must select a research topic and prepare a research protocol during their first year. The research protocol should be approved by the start of year two, when data collection begins. Residents should complete research data collection and analysis by the fall of year three, and prepare a research paper for publication and/or presentation before they complete the program in the spring of the third year.

Contact Hours: 3

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Independent Study

PROR 9024 - Occlusion/Articulator Seminar III (4 Credit Hours)

This is an ongoing lecture/seminar course designed to introduce the prosthodontics resident to the theoretical principles, designs and materials used in osseointegrated implant prosthodontics.

Lecture Hours: 3 **Lab Hours:** 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PROR 9030 - Didactic Prosthodontics (28 Credit Hours)

Lecture Hours: 22

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Seminar - Small Group

PROR 9031 - Prosthodontics Completed Treatment Presentation Conference (3 Credit Hours)

This is a seminar course in which third year prosthodontics residents prepare and present case presentations of the treatment they have completed on their assigned patients. Case presentations are prepared in ABP format and must include clinical photos, radiographs, mounted diagnostic casts, written history, clinical exam information, treatment performed, and an evaluation of treatment outcomes.

Lecture Hours: 1 **Lab Hours:** 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PROR 9032 - Predoctoral Teaching II (4 Credit Hours)

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PROR 9033 - Clinical Research II (3 Credit Hours)

Prosthodontics residents gain experience in research beginning in the first year. They must select a research topic and prepare a research protocol during their first year. The research protocol should be approved by the start of year two, when data collection begins. Residents should complete research data collection and analysis by the fall of year three, and prepare a research paper for publication and/or presentation before they complete the program in the spring of the third year.

Contact Hours: 3

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Independent Study

PROR 9034 - Prosthodontic Board Review III (6 Credit Hours)

Lab Hours: 6

Repeatability: May be repeated for credit up to four times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Supervised Lab/Clinic

PROR 9120 - Clinical Prosthodontics (21 Credit Hours)

Prosthodontic patient care clinic.

Lab Hours: 525

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Supervised Lab/Clinic

PROR 9121 - Clinical Prosthodontics V (19 Credit Hours)

This is a clinical course for residents in advanced prosthodontics. Residents are assigned patients for comprehensive prosthodontic evaluation and treatment and must complete a specified number of advanced prosthodontic procedures and complete treatment on a specified number of patients in order to satisfy the requirements for completion of the certificate program.

Lab Hours: 19

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Supervised Lab/Clinic

PROR 9130 - Clinical Prosthodontics (21 Credit Hours)

Clinical Patient Care

Contact Hours: 33

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Supervised Lab/Clinic

PROR 9131 - Clinical Prosthodontics VI (24 Credit Hours)

This is a clinical course for residents in advanced prosthodontics. Residents are assigned patients for comprehensive prosthodontic evaluation and treatment and must complete a specified number of advanced prosthodontic procedures and complete treatment on a specified number of patients in order to satisfy the requirements for completion of the certificate program.

Lab Hours: 24

Repeatability: May be repeated for credit up to two times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Supervised Lab/Clinic

PSRY 5000 - Basic Psychiatry Clerkship (9 Credit Hours)

This required three (3) week clerkship will allow the student intensive experience with diagnosis and the treatment of psychiatric patients. The student will perform a complete evaluation of assigned patients, with collaboration and guidance of the staff, including a physical and mental status examination involved in formulating and carrying out a treatment plan for the patient including use of individual psychotherapy, psychopharmacology, family therapy, group therapy and other therapeutic modalities.

Lecture Hours: 3 **Contact Hours:** 50

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Internship/Practicum

PSRY 5002 - Consult-Liaison Psychiatry Externship (4 to 8 Credit Hours)

To provide the student doctor with the opportunity to learn directly about the medicine/psychiatry interface. This medical/psychiatric experience can be invaluable for those going into any specialty in medicine.

Contact Hours: 20

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Internship/Practicum

PSRY 5005 - Psychiatry Off-Campus Externship (4 to 8 Credit Hours)

Special arrangements can be made for elective rotations at other institutions or for preceptorships with individual psychiatrists.

Lecture Hours: 3 **Contact Hours:** 40

Repeatability: May be repeated for credit up to 3 times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Internship/Practicum

PSRY 5007 - Eating Disorders Externship (4 to 8 Credit Hours)

Students will be given an opportunity to be an active member of the MCG Eating Disorders Treatment Team. Dependent upon previous experience, students will be given a number of responsibilities to include the observation and participation of initial assessments and evaluations as well as individual and group psychotherapy of both inpatient and outpatient eating disordered patients.

Psychopharmacological management and medical assessment and treatment will also be emphasized. Reading material will be

provided concerning a comprehensive biopsychosocial approach to the assessment and treatment of eating disorders.

Contact Hours: 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PSRY 5023 - Child and Adolescent Psychiatry Externship (4 to 8 Credit Hours)

To provide the student doctor with knowledge of diagnostic issues, evaluation strategies, behavioral and pharmacologic treatments, and mental health resources available for children. This rotation focuses on the treatment of children and adolescents admitted for both acute and long-term psychiatric care.

Prerequisite(s): PSRY 5000 >= C

Lecture Hours: 2 **Contact Hours:** 38

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PSRY 5028 - HIV and LGBTQ+ Mental Health (4 to 8 Credit Hours)

In this elective, students will be given an opportunity to explore the psychological impact of HIV/AIDS by participating as part of MCG's HIV/AIDS Mental Health Treatment Team. Students will participate in the treatment of individuals infected with and affected by HIV/AIDS through assessment, individual and group therapy, and psychological consultation in several HIV/AIDS treatment environments.

Lecture Hours: 2 **Lab Hours:** 3 **Contact Hours:** 30

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PSRY 5029 - Molecular Neurobiology of Treatment Outcome of Schizophrenia (4 to 8 Credit Hours)

This elective will explore the molecular neurobiological markers of antipsychotic actions on the brain in rats. The common molecular markers will be studied in body fluids of early psychotic and chronic schizophrenic patients before and after treatment with antipsychotics. The association of these molecular substrates to several key symptomatic dimensions will be examined in patients to understand their clinical applicability. The students will be trained in all aspects of laboratory analysis as well as to watch the clinical assessment of patients. This elective includes two weekly contact hours of seminar.

Lab Hours: 30 **Contact Hours:** 5

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Supervised Lab/Clinic

PSRY 5040 - Research Elective in Psychotic Disorders (4 to 8 Credit Hours)

The student will demonstrate basic understanding of areas of research in psychiatry, particularly in psychotic disorders. The student will perform clinical care of patients with psychotic disorders. The student will examine and appraise current literature in a manner relevant for dissemination of scientific information. The student will develop a presentation for the departmental journal club, case conference, or any other appropriate venue.

Prerequisite(s): PSRY 5000

Lecture Hours: 1 **Contact Hours:** 4 to 6

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MD_MEDD-Medicine

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Independent Study, Directed Study (one-to-one)

PSRY 5041 - Addiction Psychiatry Externship (4 to 8 Credit Hours)

Provides the exposure to the diagnosis and treatment of addiction disease with and without medical and psychiatric co-morbidity. Student will become familiar with the clinical practice of addiction psychiatry at various levels of care to include inpatient, residential partial hospitalization, intensive outpatient and outpatient treatment settings. Patient population may include adolescents, young adults, geriatric, as well as adult patients. Patient care will include detoxification, psychopharmacology, individual, group and milieu therapy and 12 step facilitator.

Lecture Hours: 2 Contact Hours: 40 to 45

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PSRY 5043 - Emergency Psychiatry Externship (4 to 8 Credit Hours)

Introduce medical students to the fundamentals of emergency psychiatry.

Prerequisite(s): PSRY 5000

Lecture Hours: 1 Contact Hours: 35

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MD_MEDD-Medicine

Schedule Type (Primary): Supervised Lab/Clinic

PSRY 5044 - Neurostimulation Externship (4 to 8 Credit Hours)

This course introduces the medical student to the fundamentals of therapeutic neurostimulation in psychiatry and to the care of patients with severe, treatment-resistant neuropsychiatric conditions.

Prerequisite(s): PSRY 5000

Lecture Hours: 1 Contact Hours: 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MD_MEDD-Medicine

Schedule Type (Primary): Supervised Lab/Clinic

PSRY 5045 - Advanced Psychiatry Sub-I (4 to 8 Credit Hours)

To prepare the student doctor for internship in psychiatry by becoming an integral part of interdisciplinary treatment teams in a mental health inpatient adult population and take call.

Prerequisite(s): PSRY 5000

Lecture Hours: 1 to 2 Lab Hours: 1 to 2 Contact Hours: 40 to 50

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Directed Study (one-to-one), Internship/Practicum

PSRY 5046 - Mood Disorders Externship (4 to 8 Credit Hours)

This elective includes a clinical component along with an optional research component. The student will attend a specialized moods disorder clinic and participate in all aspects of clinical care including formulation of diagnosis and management plan, addressing all aspects of care and various treatment modalities. The elective will include regular meetings for discussion of seminal articles in mood disorders and suicide prevention in addition to attendance of formal educational activities. The optional research component will involve mentoring to develop interest in one area related to mechanistic understanding, psychopharmacology, neuroscience, brain stimulation, electrophysiology research of mood disorders, or suicide prevention. This will include participation in a research project in one of these

areas, presentation or publication of the data, and/or mentoring in preparation of a student grant application.

Prerequisite(s): PSRY 5000 >= B

Lecture Hours: 2 **Lab Hours:** 9 **Contact Hours:** 1 to 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Degree Restrictions: Doctor of Medicine **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PSRY 5047 - Child and Adolescent Psychiatry Sub I (12 Credit Hours)

To prepare the student doctor for internship in psychiatry by becoming an integral part of interdisciplinary treatment teams in a child and adolescent acute inpatient mental health care setting. The student will evaluate and treat complex patients in the pediatric population and take call.

Prerequisite(s): PSRY 5000 >= C

Lecture Hours: 1 to 2 **Lab Hours:** 1 to 2 **Contact Hours:** 40 to 60

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Supervised Lab/Clinic

PSRY 5048 - General Psychiatry Sub I (12 Credit Hours)

To prepare the student doctor for internship in psychiatry by becoming an integral part of interdisciplinary treatment teams in an inpatient mental health care setting. The student will evaluate and treat complex patients in the adult population and take call.

Prerequisite(s): PSRY 5000 >= B

Lecture Hours: 1 to 2 **Lab Hours:** 1 to 2 **Contact Hours:** 40 to 60

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Supervised Lab/Clinic

PSRY 5050 - Psychiatry Media Elective (8 Credit Hours)

This elective course is designed to provide third- and fourth-year medical students with a self-directed learning experience centered on media-related issues from a mental health perspective. Under regular faculty supervision and discussion, students critically examine assigned readings and media (e.g., social media, video games, music, cinema, literature) and evaluate how these portray mental health. Students also review academic literature discussing the influence of various media on mental health and well-being. In addition to theoretical exploration, this course integrates a clinical component to enhance practical skills. Students have opportunities to apply their learning in clinical settings by collaborating with mental health professionals, assessing the impact of media on patients, or creating media-focused interventions to address mental health challenges. Students may conduct media assessments as part of patient care or participate in interdisciplinary case discussions exploring the media's role in mental health treatment. Students develop a personalized, media-related project as part of their final project. Options may include creating social media content focused on mental health education or advocacy, collaborating with MCG's media team on public health initiatives, writing a letter to the editor or a learner's perspective column for a journal, or conducting a literature review on media-related mental health issues.

Lecture Hours: 8

Repeatability: May not be repeated for credit.

Campus Restrictions: Main Campus, Athens Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

PSRY 5090 - Phase I Research Elective in Psychotic Disorders (1 Credit Hour)

This elective provides introductory experience in psychotic disorders research.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MD_MEDD-Medicine

Schedule Type (Primary): Independent Study

PSRY 5999 - Basic Clerkship Remediation in Psychiatry (1 Credit Hour)

Remediation of the Basic Core Clerkship in Psychiatry

Prerequisite(s): PSRY 5000

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Independent Study

PSRY 6599 - PSRY Student Chief (4 to 8 Credit Hours)

This elective is designed to allow M4 students an opportunity to practice their leadership skills as they serve as peer role model to M3 students on the Psychiatry rotation. Student must receive the site clerkship director's approval.

Prerequisite(s): PSRY 5000 >= B

Contact Hours: 80

Repeatability: May be repeated for credit one time.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia - Athens Campus, Medical College of Georgia - Main Campus

Schedule Type (Primary): Internship/Practicum

RPSY 5000 - Psychiatry (27 Credit Hours)

Lecture Hours: 20 **Contact Hours:** 50

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

RPSY 5001 - Child Psychiatry (27 Credit Hours)

Contact Hours: 55

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Internship/Practicum

PSYC 1101 - Introduction to General Psychology (3 Credit Hours)

An introduction to the full breadth of the science and practice of psychology including such topics as research methodology, neurobiology, learning, cognition, emotion and abnormal psychology, development, personality, and social psychology.

Core IMPACTS Requirement(s) Satisfied: Social Sciences (Social Sciences)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PSYC 1101H - Honors: Introduction to General Psychology (3 Credit Hours)

An introduction to the full breadth of the science and practice of psychology including such topics as research methodology, neurobiology, learning, cognition, emotion and abnormal psychology, development, personality, and social psychology. This is an Honors Course.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PSYC 2101 - Introduction to Psychology of Adjustment (3 Credit Hours)

An examination of applied psychological theory and research as related to self exploration, enhancement of mental health and well being, and prevention of behavioral and mental disorders. Topics will include values development, conflict resolution, lifestyle management, anxiety and stress, and effective interpersonal communication.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis

PSYC 2103 - Introduction to Human Development (3 Credit Hours)

The study of behavioral, cognitive, emotional and psychosocial changes across the life span. Major developmental theories and research will be examined. Note: This course is intended primarily for nursing and allied health majors. For more detailed coverage of developmental topics, the student may wish to consider PSYC 3131 and/or PSYC 3133.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PSYC 2150 - Introduction to Human Diversity (3 Credit Hours)

An examination of a variety of gender, age, racial, ethnic and cultural issues from a psychological and, to a lesser extent, biological perspective, especially as these influence individual development. Emphasis will be placed on historical trends, communication, critical thinking, and healthy functioning in an increasingly diverse world.

Core IMPACTS Requirement(s) Satisfied: Social Sciences (Social Sciences)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis

PSYC 2990 - Undergraduate Research (1 to 4 Credit Hours)

Early level supervised research on a psychological topic of interest to the student and supervisor. Advanced planning is required since activities must be approved by ethics committees of AU and any host agency.

Lab Hours: 1 to 4

Repeatability: May be repeated for credit up to nine times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Seminar - Small Group **Schedule Type (Additional):** Independent Study, Directed Study (one-to-one)

PSYC 3121 - Quantitative Methods (4 Credit Hours)

A study of parametric and nonparametric statistics used in correlational and experimental designs in psychological research, including computer applications. This course is a prerequisite to PSYC 3122 and to most all 4000-level PSYC courses.

Prerequisite(s): (PSYC 1101 >= C or SOCI 1103 >= C) and (MATH 1001 >= D or MATH 1101 >= D or MATH 1111 >= D or MATH 1113 >= D) and PSYC 3190

Lecture Hours: 3 **Lab Hours:** 1 **Contact Hours:** 4

Repeatability: May be repeated for credit up to 3 times.

Grade Mode: Normal (A, B, C, D, F)

Major Restrictions: PSYC - Psychology

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

PSYC 3122 - Research Methods (4 Credit Hours)

A survey of correlational and experimental research methods used in psychology. Students will use scientific methods in conducting research projects and will write reports using APA style. This course is a prerequisite to most all 4000-level PSYC courses.

Prerequisite(s): (PSYC 1101 >= C or PSYC 1101H >= C) and (MATH 1001 >= D or MATH 1001 >= C or MATH 1111 >= D or MATH 1113 >= D) and PSYC 3190 >= C and PSYC 3121 >= C

Lecture Hours: 3 **Lab Hours:** 1 **Contact Hours:** 4

Repeatability: May be repeated for credit up to 3 times.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

PSYC 3131 - Child and Adolescent Development (3 Credit Hours)

A study of behavioral, emotional, cognitive, and maturational changes from conception through adolescence. Developmental theories and research are presented with emphasis on applying concepts to life experience.

Prerequisite(s): PSYC 1101 >= C or PSYC 1101H >= C or SOCI 1103 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis

PSYC 3133 - Adult Development and Aging (3 Credit Hours)

A study of physical, emotional, cognitive, behavioral, and psychosocial changes occurring from young adulthood to old age. Focus is placed on topics such as preventive health measures, relationships, work and retirement, and death and dying issues.

Prerequisite(s): PSYC 1101 >= C or PSYC 1101H >= C or SOCI 1103 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching

PSYC 3140 - Theories of Personality (3 Credit Hours)

A survey of major theories of personality along with primary research on the biological, sociocultural and psychological foundations of personality. Emphasis will be placed on the integrated aspects of personality.

Prerequisite(s): PSYC 1101 >= C or PSYC 1101H >= C or SOCI 1103 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group, Independent Study, Asynchronous Instruction

PSYC 3143 - Mental Health and Psychopathology (3 Credit Hours)

The study of various forms of maladaptive behaviors and intellectual deficits with focus upon terminology and classification systems, etiology, and recognition of primary symptoms.

Prerequisite(s): PSYC 1101 >= C or PSYC 1101H >= C or SOCI 1103 >= C

Cross-Leveled Course(s): Mental Health and Psychopathology (PSYC 6143)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study,

PSYC 3145 - Clinical Psychology (3 Credit Hours)

A critical examination of psychological and biological/medical interventions with disturbed individuals, principally to compare various diagnostic approaches and major psychotherapeutic models.

Prerequisite(s): PSYC 3143 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

PSYC 3160 - Sensation and Perception (3 Credit Hours)

A study of the biological and psychological processes that govern encoding and storage of sensory information and the construction of individual perceptions of reality, and how these impact such things as concept formation, consumer preferences, art appreciation, and human factors.

Prerequisite(s): PSYC 1101 >= C or PSYC 1101H >= C or SOCI 1103 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction

PSYC 3178 - Psychology Applied to the Workplace (3 Credit Hours)

A survey of psychology as applied to the workplace. Topics include personnel selection, training, performance appraisal, motivation, work vs. leisure; leadership, and organizational development.

Prerequisite(s): PSYC 1101 >= C or PSYC 1101H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

PSYC 3180 - Drugs and Behavior (3 Credit Hours)

An introduction to psychopharmacology in its broadest sense, including drug-taking relationships with sociocultural and economic factors, mechanisms of drug action, drug classifications, psychological effects of drugs, abuse and addiction, and psychotherapeutic drugs.

Prerequisite(s): PSYC 1101 >= C or PSYC 1101H >= C or SOCI 1103 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis

PSYC 3183 - Health Psychology (3 Credit Hours)

A survey of the scientific and clinical study of behavior as it relates to wellness, disease, disease prevention, and rehabilitation.

Prerequisite(s): PSYC 1101 >= C or PSYC 1101H >= C or SOCI 1103 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching

PSYC 3188 - Human Sexuality (3 Credit Hours)

This course will provide an overview of sexual development along with the biological, sociocultural, and psychological influences on sexuality and sexual behavior. Sexual dysfunctions, deviations, and victims of sexual assault will also be discussed.

Prerequisite(s): PSYC 1101 >= C or PSYC 1101H >= C or SOCI 1103 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PSYC 3190 - Ethical and Professional Foundations (1 Credit Hour)

This course will provide an examination of career opportunities for persons majoring in psychology. In addition the course provides an overview of ethics related to psychology, a foundation in scientific reading and writing, and the foundation to be competitive for future careers.

Prerequisite(s): PSYC 1101 >= C or PSYC 1101H >= C

Lecture Hours: 1 **Contact Hours:** 1

Repeatability: May be repeated for credit up to 3 times.

Grade Mode: Normal (A, B, C, D, F)

Major Restrictions: PSYC - Psychology

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PSYC 3950 - Selected Topics (1 to 5 Credit Hours)

A study, either in a special classroom or on an individual (but supervised) basis, of a selected psychological topic not addressed in the current curriculum.

Prerequisite(s): PSYC 1101 >= C or PSYC 1101H >= C

Lecture Hours: 1 to 5

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Seminar Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

PSYC 4115 - History and Systems of Psychology (3 Credit Hours)

The scientific and philosophic antecedents and trends influencing psychology and the development of its principal theoretical schools. Emphasis will be placed on understanding current trends from an historical perspective.

Prerequisite(s): PSYC 3121 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Psychology **Student Class Restrictions:** Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

PSYC 4125 - Psychological Tests and Measurement (3 Credit Hours)

Construction and characteristics of tests and measurement scales, including standardization, reliability and validity. The course will include a survey of individual and group tests used in various psychological, educational, business and clinical settings.

Prerequisite(s): PSYC 3121 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Psychology **Student Class Restrictions:** Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis

PSYC 4165 - Learning Principles and Applications (3 Credit Hours)

The course will focus on the theory and methods of empirically derived principles of conditioning and learning on human and animal subjects.

Prerequisite(s): PSYC 3121 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Psychology **Student Class Restrictions:** Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

PSYC 4168 - Cognitive Psychology (3 Credit Hours)

This course will examine the scientific study of human mental processes, including language, memory, problem solving, and attention. The course will emphasize thinking critically about issues central to cognition, grasping the logic of research design and understanding how to weigh evidence in evaluating explanations.

Prerequisite(s): PSYC 3121 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Psychology **Student Class Restrictions:** Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PSYC 4173 - Social Psychology (3 Credit Hours)

A survey of social influences on individual and group behavior. Special topics will include attitude formation and change, social perception and attribution processes, interpersonal attraction, aggression, altruism, social influence, and group dynamics.

Prerequisite(s): PSYC 3121 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Psychology **Student Class Restrictions:** Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching

PSYC 4180 - Behavioral Neuroscience (3 Credit Hours)

An examination of the biological bases of behavior and mental processes to include learning, perception, emotion, cognition, personality and deviance.

Prerequisite(s): PSYC 3121 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Psychology **Student Class Restrictions:** Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study

PSYC 4950 - Selected Topics (1 to 3 Credit Hours)

An intensive study, either in a special classroom course or on an individual (but supervised) basis, of a selected psychological area not addressed in the current curriculum.

Prerequisite(s): PSYC 3121 >= C

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Psychology **Student Class Restrictions:** Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

PSYC 4960 - Undergraduate Internship (1 to 9 Credit Hours)

Supervised field experience in a variety of cooperating community institutions or agencies. Registration requires advanced planning with the Director of Undergraduate Internships.

Prerequisite(s): PSYC 1101 >= C

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Student Class Restrictions: Sophomore-Semester, Junior-Semester, Senior-Semester

Schedule Type (Primary): Internship/Practicum

PSYC 4990 - Undergraduate Research (1 to 9 Credit Hours)

Supervised research on a psychological topic of interest to the student and supervisor. Advanced planning is required since activities must be approved by ethics committees of AU and any host agency.

Prerequisite(s): PSYC 2990 >= C or PSYC 3122 >= C

Lecture Hours: 1 to 9

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis

PSYC 6115 - History and Systems of Psychology (3 Credit Hours)

The scientific and philosophical antecedents influencing psychology, and the development of psychology's principal theoretical schools. Emphasis will be placed on understanding current trends from an historical perspective.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

PSYC 6121 - Research Methods I (3 Credit Hours)

This course covers theory and application of experimental design in psychology. Topics include but are not limited to controlling confounding variables, hypothesis testing, APA style guidelines, and univariate statistics. The use of computers in psychological research will also be covered.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study

PSYC 6122 - Research Methods II (3 Credit Hours)

A continuation of PSYC 6121 in examining the theory and application of experimental and correlational designs in psychological research. Focus is placed particularly on multivariate designs and analysis, with other topics including qualitative analyses, research ethics, and APA style guidelines. Computer application of course material will be emphasized.

Prerequisite(s): PSYC 6121 >= B

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study

PSYC 6126 - Cognitive Assessment (3 Credit Hours)

Review of theory and application as related to psychological tests of intellectual and cognitive functioning. The application part of the course focuses on supervised practice in the individual administration and scoring of widely used, psychometrically sound cognitive tests. Moreover, emphasis is placed on interpretation of test results through, for example, multiple reports and feedback of written communication.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

PSYC 6127 - Personality Assessment (3 Credit Hours)

Examination of the theoretical and practical issues in personality and diagnostic assessment, with an emphasis on reliability, validity, and test construction, and an emphasis on diagnosis using the current Diagnostic and Statistical Manual.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

PSYC 6130 - Developmental Psychology (3 Credit Hours)

A study of biological, cognitive, psychosocial and ecological changes in life span development. The evolution of developmental theory is examined with emphasis on current research in the field.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

PSYC 6143 - Mental Health and Psychopathology (3 Credit Hours)

The study of the etiology, explanatory models, and terminology associated with diagnosis of disorders described in the current Diagnostic and Statistical Manual. Students will have extensive practice at diagnosing from video clips and written case studies.

Prerequisite(s): PSYC 3143 >= C

Cross-Leveled Course(s): Mental Health and Psychopathology (PSYC 3143)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study

PSYC 6145 - Therapeutic Interventions I (3 Credit Hours)

A critical comparison of therapeutic approaches to behavior disorders and problems of daily living, including psychodynamic behavioral, humanistic and cognitive-behavioral models. Practical training in interviewing and therapy is provided.

Prerequisite(s): PSYC 6127 >= B and PSYC 6143 >= B and PSYC 6927 >= B

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

PSYC 6146 - Therapeutic Interventions II (3 Credit Hours)

A continuation of PSYC 6145, with critical comparison of therapeutic approaches to behavior disorders and problems of daily living, including psychodynamic behavioral, humanistic and cognitive-behavioral models. Practical training in interviewing and therapy is provided.

Prerequisite(s): PSYC 6143 >= B and PSYC 6145 >= B

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

PSYC 6147 - Seminar in Group Process (3 Credit Hours)

The application of psychotherapeutic and counseling theory to group intervention. Group interactions are used to explore feelings, attitudes, cognition, and interpersonal impact upon others. Techniques of group facilitation and personal exploration are emphasized.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Seminar - Small Group **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

PSYC 6149 - Career Counseling (3 Credit Hours)

Examination of theories of career development and approaches to career counseling in a variety of contexts and populations. Students will become familiar with career counseling assessments, counseling techniques, career development across the lifespan, and ethical issues related to practice. Practical training in career counseling is provided.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Master of Science **Program Restrictions:** 1MS-PSYCH-MS-Psychology

Schedule Type (Primary): Lecture

PSYC 6165 - Learning Principles and Applications (3 Credit Hours)

The course will focus on the theory and methods of empirically derived principles of conditioning and learning on human and animal subjects. Special attention will be given to clinical and personal applications of the material.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervi

Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

PSYC 6168 - Cognitive Psychology (3 Credit Hours)

This course will examine the scientific study of human mental processes, including language, memory, problem solving, concept formation and attention. The course will emphasize thinking critically about issues central to cognition, grasping the logic of research design and understanding how to weigh evidence in evaluating explanations.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Program Restrictions:** 1MS-PSYCH-MS-Psychology

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

PSYC 6173 - Social Psychology and Human Diversity (3 Credit Hours)

An advanced survey of the traditional areas of research in social psychology including social cognition, the self, attitudes, social influence, prejudice, prosocial behavior, aggression and groups. Emphasis will be placed on relationship of diversity (e.g., gender, ethnicity, sexual orientation, religion, disability) with these topic areas.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

PSYC 6175 - Diversity Issues in Counseling (3 Credit Hours)

Emphasis on knowledge, attitudes, and skills related to assessment and psychotherapeutic interventions with individuals different from the student, including characteristics such as culture, race, gender, sexual orientation, physical disability, and religious preference. Review of theories, trends, and research in assessing and counseling special populations.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Master of Science **Program Restrictions:** 1MS-PSYCH-MS-Psychology

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PSYC 6181 - Behavioral Neuroscience (3 Credit Hours)

Consideration of the biological bases of behavior, particularly the role of forebrain structures. Clinical neuropsychology will receive special focus. An undergraduate course in biological psychology is recommended but not required.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

PSYC 6182 - Clinical and Addictive Psychopharmacology (3 Credit Hours)

A critical examination of contemporary chemical-based therapies for psychological disorders; and a survey of the theoretical, etiological and treatment aspects of drug abuse and (especially) drug addiction. Undergraduate preparation in biological psychology and/or

psychopharmacology is preferred but not required.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching

PSYC 6190 - Professional Foundations (1 Credit Hour)

The course will address multiple professional issues, including licensing, professionalism, the scope of counseling and psychology, and specializations in those fields. In addition, the course will serve as an orientation to the program.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

PSYC 6191 - Ethical Issues in Counseling and Psychology (3 Credit Hours)

A critical evaluation of the ethical issues associated with the practice of counseling and psychology. Students will learn about the APA and ACA codes of ethics associated with both treatment and research in the disciplines. Students will be provided with information to make informed ethical decisions in their profession.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Program Restrictions:** 1MS-PSYCH-MS-Psychology

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

PSYC 6921 - Research Methods Lab I (1 Credit Hour)

Designed to be taken concurrently with PSYC 6121. Provides in-depth experience with design of independent research projects. Other topics include writing APA style manuscripts and statistical analysis using computer software.

Prerequisite(s): PSYC 6121 >= B

Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

PSYC 6922 - Research Methods Laboratory II (1 Credit Hour)

Designed to be taken concurrently with PSYC 6122. Provides in-depth experience with data collection and analysis of independent research projects. Other topics include writing APA style manuscripts and statistical analysis using computer software.

Prerequisite(s): PSYC 6122

Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

PSYC 6926 - Cognitive Assessment Practicum (1 Credit Hour)

Designed to be taken concurrently with PSYC 6126. Provides in-depth supervised experience with administration, scoring, and summarizing the results of cognitive assessments applicable to professional psychology.

Prerequisite(s): PSYC 6126

Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

PSYC 6927 - Personality Assessment Practicum (1 Credit Hour)

This lab is designed to be taken concurrently with Personality Assessment (PSYC 6127). It provides in-depth supervised experience with clinical interviewing, administration, scoring, and interpretation of personality tests. Emphasis is placed on the ability to synthesize findings and write professional assessment reports.

Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

PSYC 6930 - Research Practicum I (3 Credit Hours)

In-depth research experience under the supervision of a faculty member. Readings will focus on research ethics and diversity issues in psychological science. Prerequisite(s): Graduate status and prior approval by the faculty instructor or supervisor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

PSYC 6931 - Research Practicum II (3 Credit Hours)

In-depth research experience under the supervision of a faculty member. An emphasis will be placed on writing, professional issues, and philosophy of science. Prerequisite(s): Graduate status and prior approval by the faculty instructor or supervisor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

PSYC 6940 - Industrial-Organization Internship (1 to 3 Credit Hours)

Individually supervised field work in the area of human resources or industrial/organizational psychology in an applied setting relevant to the student's professional goals. In order to enroll in an industrial/organizational internship, students must have completed 18

graduate hours with a B average or better and have the approval of their academic advisor.

Prerequisite(s): PSYC 6121 >= B and PSYC 6122 >= B and PSYC 6178 >= C

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Internship/Practicum, Thesis, Dissertation

PSYC 6945 - Therapeutic Intervention Practicum I (1 Credit Hour)

Designed to be taken concurrently with PSYC 6145. Provides in-depth supervised experience with individual psychotherapy. Topics include initial interview and assessments, therapy micro skills, and therapeutic techniques to include humanistic, gestalt, behavioral, and cognitive modalities.

Prerequisite(s): PSYC 6145

Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

PSYC 6946 - Therapeutic Intervention Practicum II (1 Credit Hour)

Designed to be taken concurrently with PSYC 6146. Provides in-depth supervised experience with individual psychotherapy. Topics include initial interview and assessments, therapy micro skills, and empirically based therapy techniques.

Prerequisite(s): PSYC 6146 >= B and PSYC 6945 >= B

Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

PSYC 6950 - Special Topics (1 to 3 Credit Hours)

Supervised independent study or seminars on topics chosen to meet the needs and interests of graduate students which make use of the expertise of the faculty and consultants. Prerequisite(s): Graduate status and prior approval by the faculty instructor or supervisor.

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

PSYC 6960 - Clinical Internship (1 to 9 Credit Hours)

Individually supervised clinical or counseling field work in an applied setting relevant to the student's professional goals. Students are strongly encouraged to complete PSYC 6145, PSYC 6146, and PSYC 6147 either before or concurrent with the applied internship. Students must have completed 18 graduate hours with a B average or better and have the approval of their academic advisor.

Prerequisite(s): PSYC 6190 >= B and PSYC 6126 >= C and PSYC 6127 >= C and PSYC 6143 >= C

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit
Schedule Type (Primary): Internship/Practicum

PSYC 6970 - Teaching Internship (1 to 9 Credit Hours)

Individually supervised field work in a teaching or educational setting relevant to the student's professional goals. In order to enroll in a Teaching Internship, students must have completed 18 graduate hours with a B average or better and have the approval of their academic advisor.

Prerequisite(s): PSYC 6190 >= B

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

PSYC 6980 - Research Internship (1 to 9 Credit Hours)

Individually supervised fieldwork of a research nature relevant to the student's professional goals. In order to enroll in a Research Internship, students must have completed 18 graduate hours with a B average or better and have the approval of their academic advisor.

Prerequisite(s): PSYC 6121 >= B and PSYC 6122 >= B and PSYC 6190 >= B

Lecture Hours: 1 to 9

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

PSYC 6990 - Thesis Research (1 to 3 Credit Hours)

The thesis is an independent research project conducted under the supervision of a faculty supervisor. All students pursuing the thesis option must complete a thesis proposal before data collection and defend their completed thesis to a faculty committee. Most thesis students will enroll in PSYC 6990 during the semester they write their thesis proposal and again during the semester they collect data and finish writing the thesis. May be repeated for credit; only six hours of credit count toward the Master in Science degree.

Prerequisite(s): Completion of a minimum of 18 graduate hours in psychology with a B average or better, and approval of the thesis option on the student's plan of study.

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

PSYC 6995 - Independent Research (1 to 3 Credit Hours)

Independent research conducted under the supervision of a faculty supervisor. **Prerequisite(s):** completion of a minimum of 18 graduate hours in psychology with a B average or better, and approval of the student's faculty advisor.

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

PADM 6000 - Survey of Public Administration (3 Credit Hours)

This course is designed to introduce the MPA student to the intellectual tradition of the field of public administration. It will focus on theories, concepts and methods which have become associated with the discipline of public administration. Prerequisite(s): Permission of the MPA Director.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Public Administration **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

PADM 6020 - Geographic Information Systems for Public Management (3 Credit Hours)

Introduces students to the use and application of Geographic Information Systems (GIS) in public organizations. The principal focus is on the use of GIS for planning and problem solving at the local government level. Prerequisite(s): Permission of the MPA Director.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Public Administration **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

PADM 6030 - Grant Writing and Administration (3 Credit Hours)

Grants are an increasingly important source of funding for public and nonprofit organizations. This course is a skill-building course designed to prepare students to write grants as well as to understand the basic concepts of administering a federal, state or private grant award. Prerequisite(s): Permission of the MPA Director.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Public Administration **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Internship/Practicum, Thesis, Dissertation

PADM 6050 - Constitutional and Administrative Law (3 Credit Hours)

The course explores the scope, nature and function of administrative law as it relates to the substantive, procedural and equal protection rights; as well as that law which a reasonably competent public official should know. Prerequisite(s): Permission of the MPA Director.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Public Administration **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

PADM 6100 - Public Organization Theory and Behavior (3 Credit Hours)

Offers conceptual and practical perspectives for understanding and managing organizations. A spectrum of theories of organization will be examined. The concepts and issues to be discussed include mechanical and organismic aspects of organizations, organizational culture and politics, organizational psychodynamics, and recent theories of organizing including the use of networks and privatization. Prerequisite(s): Permission of the MPA Director.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Public Administration **Student Class Restrictions:** Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

PADM 6150 - Leadership and Ethics (3 Credit Hours)

This course is designed to help students link leadership theory, ethical standards commonly used in the public and nonprofit sectors, to organizational outcomes and standards of best practice.

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Program Restrictions: 1MPA-MPA-Public Administration

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PADM 6200 - Management of Human Resources (3 Credit Hours)

Introduces the student to personnel processes used in the public and nonprofit sector and the legal, political, social, and ethical issues affecting the management of human resources. Prerequisite(s): Permission of the MPA Director.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Public Administration **Student Class Restrictions:** Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

PADM 6250 - Introduction to Urban Planning (3 Credit Hours)

This course introduces students to the legal bases and politics of planning, the tools of land-use planning, community development, transportation planning, economic development and growth management, and environmental and energy planning. Particular emphasis will be on the legal and technical aspects of planning in cities, counties, and metropolitan regions. The implications of citizen participation in planning for democracy and political processes will also be discussed. Prerequisite(s): Permission of the MPA Director.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Public Administration **Student Class Restrictions:** Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

PADM 6300 - Public Budgeting (3 Credit Hours)

This course examines the institutions and techniques of modern financial administration in federal, state, and local government. The course introduces the terminology and processes of budgeting as well as teaches competence in analyzing budgetary problems and proposing solutions. The role of the budget as a tool in expressing priorities in policy choices is emphasized. Prerequisite(s): Permission of the MPA Director.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Public Administration **Student Class Restrictions:** Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PADM 6301 - Financial Management for Nonprofit Organizations (3 Credit Hours)

An overview of the financial issues, challenges and opportunities facing nonprofit managers. The course includes instruction in budgeting and financial management strategies appropriate for the nonprofit sector. Prerequisite(s): Permission of the MPA Director.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Public Administration **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Internship/Practicum, Thesis, Dissertation

PADM 6302 - Nonprofit Management (3 Credit Hours)

This course introduces students to the world of nonprofit management. It covers a broad spectrum of issues including creating a nonprofit, fundraising, recruitment and management of volunteers, the role of program evaluation, and the proper role of a board. Prerequisite(s): Permission of the MPA Director.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

PADM 6350 - Emergency Management (3 Credit Hours)

Introduces students to the discipline and profession of applying science, technology, planning and management to deal with disasters. Special emphasis on how local governments and agencies can mitigate, plan, respond and recover from disaster situations. Prerequisite(s): Permission of the MPA Director.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Public Administration **Student Class Restrictions:** Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PADM 6351 - Introduction to Homeland Security (3 Credit Hours)

Introduces students to the essential ideas in the emerging discipline of homeland security. Includes basic instruction on the strategy-making process, fear management, crisis communication, conventional and unconventional threats, civil liberties and security, the role of technology, and intelligence and information collection. Prerequisite(s): Permission of the MPA Director.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Public Administration

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

PADM 6353 - Information Security Management (3 Credit Hours)

Overview of information security practice management. Topics include information systems security governance and management, risk management, information security program management, incident response management. Prerequisite(s): Permission of the MPA Director.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Public Administration **Course Level Restrictions:** Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

PADM 6400 - Community Development (3 Credit Hours)

The course examines the process of community development at the local level of government in the United States. The course explains the role of community organizations, in particular public agencies, in development. The course applies the asset model of community development to teach the subject.

Contact Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Schedule Type (Primary): Seminar **Schedule Type (Additional):** Small Group, Asynchronous Instruction

PADM 6430 - Social Deviance (3 Credit Hours)

The purpose of this course is to provide a sociological analysis of "deviance" with an emphasis on the social construction of deviance and deviant behavior. The course explores major theoretical explanations for understanding and defining who and what gets defined as deviant and under what circumstances as well as the social organization of deviance. Prerequisite(s): Permission of the MPA Director.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PADM 6432 - Juvenile Delinquency and Justice (3 Credit Hours)

This course uses an integrated approach to examine how theories of delinquency causation influence public policy responses. The course focuses on juvenile justice as a legal system, examines motives for the development of the juvenile court system, and analyzes the organization and processes of the contemporary juvenile court and correctional system. Prerequisite(s): Permission of the MPA Director.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PADM 6435 - Crime and Public Policy (3 Credit Hours)

The goals of this course are to introduce students to key concepts in crime policy and help develop their policy analysis skills, including the ability to frame problems and policy alternatives, think critically about empirical evidence, use cost-effectiveness and benefit-cost analysis to compare policy alternatives, and write effective policy memos. The course seeks to develop these skills by considering the relative efficacy of different policy approaches to controlling crime, including imprisonment, policing, drug regulation, and gun-oriented regulation or enforcement, as well as education, social programs and active labor market policies that may influence people's propensity to commit crime.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School, College of Arts, Hum, Soc Sci **Major Restrictions:** Public Administration **Student Class**

Restrictions: Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Master of Public Admin

Program Restrictions: 1MPA-MPA-Public Administration **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PADM 6436 - Intimate Partner Violence (3 Credit Hours)

This course uses a criminological and sociological perspective to understand the criminal justice system's response to intimate partner abuse and violence. The development of the field of victimology and the response of social service agencies to these issues is also explored, especially with regard to how victim service agencies intersect with the criminal justice system. Prerequisite(s): Permission of

MPA Director.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PADM 6500 - Research Methods in Public Administration (3 Credit Hours)

Introduces the student to the principles of designing research, defining and measuring variables and sampling, and the use of SPSS to analyze data. During this course, students will develop their capstone proposal. Prerequisite(s): PADM 6600 and Permission of the MPA Director.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Public Administration **Student Class Restrictions:** Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

PADM 6550 - Human Services Administration (3 Credit Hours)

This course is an in-depth consideration of human service agencies and organizations: staff, clients, structure, service delivery, and administration. A strong emphasis is given to developing knowledge and practice skills for interfacing with local regional agencies and resources. Prerequisite(s): Permission of the MPA Director.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Public Administration **Student Class Restrictions:** Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PADM 6600 - Analytical Tools for Decision Makers (3 Credit Hours)

Introduces students to the common analytical methods used in public and nonprofit organizations for decision-making, policy analysis, and program evaluation.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Public Administration **Student Class Restrictions:** Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis

PADM 6650 - Public Policy Analysis (3 Credit Hours)

Introduces students to the economic, political, and social forces that shape public policy along with methods of analyzing policy alternatives.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Public Administration **Student Class Restrictions:** Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching

PADM 6700 - Urban Government Administration (3 Credit Hours)

This course focuses on providing a comprehensive understanding of the origin, development, and growth of urban government. Emphasis will be on alternative forms of urban governments, policymaking and implementation, budgeting and delivery of services. Case studies will be incorporated. Prerequisite(s): Permission of the MPA Director.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Public Administration **Student Class Restrictions:** Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PADM 6750 - Program Evaluation (3 Credit Hours)

Focuses on the design and implementation of program evaluation and performance monitoring systems for in-house and privatized public programs and services. Prerequisite(s): PADM 6650 and PADM 6600 and permission of the MPA Director.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Public Administration **Student Class Restrictions:** Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching

PADM 6900 - Graduate Internship (3 Credit Hours)

Prerequisite(s): Permission of the MPA Director.

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

PADM 6950 - Selected Topics (1 to 3 Credit Hours)

This course title will be utilized as needed to create seminars around specialized topics as these issues become prominent on the current public policy agenda. Prerequisite(s): Permission of the MPA Director.

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Public Administration **Student Class Restrictions:** Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

PADM 7000 - Directed Reading (1 to 3 Credit Hours)

This course is a structured, individualized research project to be mutually designed by the instructor and student. Prerequisite(s): Permission of the MPA Director.

Lab Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Public Administration **Student Class Restrictions:** Graduate-Semester

Schedule Type (Primary): Directed Study (one-to-one) **Schedule Type (Additional):** Asynchronous Instruction

MPHC 7101 - Health Management and Policy (3 Credit Hours)

Applied study of the managerial functions of planning, organizing, leading and controlling. Students work through specific issues related to operational and strategic planning, organizational structures and relationships, motivation leadership theories and application, as well as fiscal and non-fiscal control processes, work standards, work measurement, and productivity. Special attention is given to the concept of health systems management and techniques of health systems analysis. Includes office ergonomics, information

management and equipment procurement.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPH_HINF, CERG_PHLT

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MPHC 7104 - Health Care Financial Management (3 Credit Hours)

The purpose of this course is to provide the student with a practical understanding of the basic financial and budgeting concepts and tools used by healthcare organizations. The student will be provided with a basic refresher on accounting terminology and principles. Additionally the student will learn about cost concepts, the financial market, financial analysis, management of capital institutional budgeting, decision analysis, and emerging issues in healthcare finance.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPH_HINF, CERG_PHLT

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MPHC 7209 - Health Law and Ethics (3 Credit Hours)

Overview of the law and its administration as it applies to questions of policy and procedure development for health data requirements in a healthcare setting. Includes basic ethical principles and situations of ethical dilemma and ethical decision-making processes.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPH_HINF, CERG_PHLT

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MPHC 7210 - Health Care Performance Improvement (3 Credit Hours)

Introduces concepts in quality management. Areas discussed include continuous quality improvement, utilization and risk management, accrediting functions, six-sigma and statistical process control, balanced scorecards, outcomes and disease management.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPH_HINF, CERG_PHLT

Schedule Type (Primary): Asynchronous Instruction

MPHC 8011 - Ethical Conduct in Research (1 Credit Hour)

Ethical Conduct in Research is a one credit hour core course designed to introduce students to the scope of recommended practices of responsible research in the social and behavioral science model (SBE) for research.

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: DPHIL_AHSC, MCTS_CTS, MSEPD_EPID, MPH_HINF, CERG_PHLT

Schedule Type (Primary): Asynchronous Instruction **Schedule Type (Additional):** Lecture

MPHC 8600 - Fundamentals of Health Promotion (3 Credit Hours)

An overview of the theories and principles surrounding social and behavioral determinants of health, the social-ecological approach to public health, and a summary of successful health promotion and disease prevention models.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_AHSC, MPH_HINF, CERG_PHLT

Schedule Type (Primary): Independent Study **Schedule Type (Additional):** Asynchronous Instruction

MPHC 8700 - Introduction to Environmental Health (3 Credit Hours)

This course introduces foundational and technical concepts in environmental health, including the principles and factors that influence human health. It also addresses environmental hazards, risk assessment, and management, as well as the role of environmental health in public health policy and practice.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_AHSC, MPH_HINF, CERG_PHLT

Schedule Type (Primary): Asynchronous Instruction

MPHC 8722 - Internship (2 or 5 Credit Hours)

All Master of Public Health (MPH) degree candidates in the MPH program must complete an internship, five credits for admission cohorts before fall 2021, and two credits for the admission cohorts from fall 2021. The internship is a field experience that integrates professional academic preparation and public health practice. Public health and health informatics/management knowledge and skills obtained in core and concentration courses are applied in an organizational setting under an experienced preceptor's supervision and guidance. Under the direction of a preceptor, the academic advisor, and the internship coordinator, students develop a work plan that bridges the students' career goals with public health competencies. Students must complete objectives defined in the work plan and submit other reports specified in the course syllabus at the end of the internship experience.

Contact Hours: 2 or 5

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MPH_HINF, CERG_PHLT

Schedule Type (Primary): Asynchronous Instruction **Schedule Type (Additional):** Internship/Practicum

MPHC 8800 - Health Decision Support Systems (3 Credit Hours)

This course presents an overview of automated decision systems used in clinical care, health administration and public health. The intensive format of the course allows for topic discussion, on-site observation of clinical, managerial, and population-based decision support systems.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPH_HINF

Schedule Type (Primary): Lecture

MPHC 8999 - Capstone Course (3 Credit Hours)

The goal of the course is to facilitate the student's transition from graduate school to life as a public health professional. The course takes two concurrent pedagogical methods to accomplish this goal: 1) Seminar lectures and exercises designed to aid the integration of public health practice principles to enhance job performance and future careers, and to introduce some concepts by which students can expect to be managed and can use to manage others, and 2) the "Capstone Project" which provides an opportunity to integrate both technical and professional knowledge into comprehensive web-enabled oral and written reports on a student's selected public health topic.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_AHSC, MPH_HINF

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

RPUL 5000 - Pulmonary and Critical Care (27 Credit Hours)

Lecture Hours: 5 **Lab Hours:** 7 **Contact Hours:** 20

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Internship/Practicum

RONC 5006 - Radiation Therapy Externship (4 to 8 Credit Hours)

Students gain experience in the workup and general management of the cancer patient in the areas of curative therapy, palliation, and supportive care.

Contact Hours: 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MD_MEDD-Medicine

Schedule Type (Primary): Supervised Lab/Clinic

RONC 5008 - Radiation Therapy Off-Campus Externship (4 to 8 Credit Hours)

This elective designed for the student who is considering pursuit of a radiation oncology residency and who would like to obtain additional and varied experiences in the field.

Contact Hours: 8

Repeatability: May be repeated for credit up to 3 times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MD_MEDD-Medicine

Schedule Type (Primary): Supervised Lab/Clinic

RADT 2312 - Medical Terminology (3 Credit Hours)

The knowledge of medical terminology is fundamental for health professionals. This course is offered as part of the core curriculum so that it may be used as a tool in other advanced coursework. The degree of competency required will be related to the main objectives of the course: spelling, use of correct word forms in context (English as well as medical terms), and using resource materials with ease when unfamiliar terms are encountered.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Program Restrictions:** BSRS_RADT-Radiation Therapy

Schedule Type (Primary): Asynchronous Instruction

RADT 3100 - Introduction to Patient Care (2 Credit Hours)

Presentation of fundamental patient care skills and medical terminology needed for entry level biomedical and radiologic science professionals. Content includes essential patient care concepts including medical assessment, physical assessment, physical assistance, infection control and aseptic technique, physiologic monitoring, venipuncture, drug administration, patient special needs, psychosocial considerations and medical emergencies. Prerequisite(s): Admission to the RADT program or permission of instructor.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Program Restrictions:** BSRS_RADT-Radiation Therapy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

RADT 3105 - Introduction to Patient Care Lab (1 Credit Hour)

Laboratories include fundamental patient care skills needed for entry level biomedical and radiologic science professionals. Included are medical assessment, physical assessment, physical assistance, infection control and aseptic technique, physiologic monitoring, venipuncture, drug administration, patient special needs, psychosocial considerations, and medical emergencies.

Corequisite(s): RADT 3100 or permission of instructor

Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Program Restrictions:** BSRS_RADT-Radiation Therapy

Schedule Type (Primary): Supervised Lab/Clinic

RADT 3210 - Radiation Protection and Biology (3 Credit Hours)

Regulations, principles and practices of radiation protection, and information particular to each radiologic specialty and/or modality.

Medical aspects of radiobiology including cellular, systemic and total body responses. Prerequisite(s): Admission to the RADT program or permission of instructor with College Algebra or Pre-Calculus.

Prerequisite(s): MATH 1111 >= C or MATH 1113 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Program Restrictions:** BSRS_RADT-Radiation Therapy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

RADT 3601 - Principles of Radiation Oncology (4 Credit Hours)

An overview of radiation therapy to include pathology, radiobiology, radiation safety and protection, medical imaging, simulation and therapeutic equipment, treatment procedures, electronic charting, quality improvement, operational issues, as well as the rationale of radiation therapy and related subject matters.

Lecture Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Program Restrictions:** BSRS_RADT-Radiation Therapy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

RADT 3641 - Radiation Oncology Clinical Internship I (4 Credit Hours)

Prerequisite: Admission to the program or permission of instructor. Students work with the clinical personnel in a team approach to radiation therapy treatment, planning and patient care.

Contact Hours: 20

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Program Restrictions:** BSRS_RADT-Radiation Therapy

Schedule Type (Primary): Supervised Lab/Clinic **Schedule Type (Additional):** Unsupervised Lab/Clinic, Internship/Practicum

Additional Course Fee: Radiation Therapy Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 120

RADT 3642 - Radiation Oncology Clinical Internship II (4 Credit Hours)

Prerequisite: Admission to the program or permission of instructor. Students work with the clinical personnel in a team approach to radiation therapy treatment, planning and patient care.

Contact Hours: 20

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Program Restrictions:** BSRS_RADT-Radiation Therapy

Schedule Type (Primary): Unsupervised Lab/Clinic **Schedule Type (Additional):** Internship/Practicum

RADT 3643 - Radiation Oncology Clinical Internship III (6 Credit Hours)

Students work with the clinical personnel in a team approach to radiation therapy treatment, planning and patient care.

Contact Hours: 30

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Program Restrictions:** BSRS_RADT-Radiation Therapy
Schedule Type (Primary): Supervised Lab/Clinic **Schedule Type (Additional):** Unsupervised Lab/Clinic, Internship/Practicum

RADT 4120 - Principles and Instrumentation of CT (3 Credit Hours)

Principles of the production of x-ray including x-ray tubes and generators. Concepts of CT physics and instrumentation. CT scanner equipment fundamentals from first generation to multi-slice, spiral and cine CT. Prerequisite(s): Admission to the RADT program or permission of instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Program Restrictions:** BSRS_RADT-Radiation Therapy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

RADT 4160 - Pathology for Radiologic Sciences (2 Credit Hours)

The course is designed as an overview of pathological disease processes with a focus on specific diseases radiologic students are likely to encounter in the practice of their profession. Emphasis is on relatively common pathologies, their epidemiology, symptomology, diagnosis, and treatment. Each pathological entity is examined in the context of its impact upon the patient, typical course, and distinguishing diagnostic characteristics. Prerequisite(s): Admission to the RADT program or permission of instructor.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Program Restrictions:** BSRS_RADT-Radiation Therapy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

RADT 4300 - Professional Issues and Ethics (1 Credit Hour)

Introduction to current critical issues impacting allied health science; the role of the allied health professional within the healthcare system and its relationship to other healthcare disciplines. Prerequisite(s): Admission to the RADT program or permission of instructor.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Program Restrictions:** BSRS_RADT-Radiation Therapy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

RADT 4400 - Sectional Anatomy (2 Credit Hours)

The course is designed to provide students in radiologic and imaging sciences a supplement to the student's knowledge of anatomy through presentation of longitudinal, sagittal, coronal, and oblique sections of the human body. Correlation with computed tomography, magnetic resonance, sonographic, and SPECT images is made. Students should be able to use the material presented as a foundation for further study in any of the modalities. Prerequisite(s): Admission to the RADT program or permission of instructor.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Program Restrictions:** BSRS_RADT-Radiation Therapy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

RADT 4501 - Seminar in Radiation Oncology Evidence Based Practice (2 Credit Hours)

This course examines how to perform a literature evaluation of current research in the profession. The resources needed to conduct a scholarly investigation are studied including the examination of finding and the significance for practice.

Contact Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Program Restrictions:** BSRS_RADT-Radiation Therapy

Schedule Type (Primary): Seminar **Schedule Type (Additional):** Small Group, Asynchronous Instruction

RADT 4600 - Applied Research (1 to 4 Credit Hours)

Pursuit of a topic or course of study, or investigation of a problem, of interest to student and approved by instructor.

Lecture Hours: 1 to 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Program Restrictions:** BSRS_RADT-Radiation Therapy

Schedule Type (Primary): Seminar - Small Group **Schedule Type (Additional):** Independent Study

RADT 4614 - Radiation Oncology Procedures (2 Credit Hours)

General principles of patient simulation including familiarization with equipment, patient positioning, and the rationale for simulation of radiation therapy portals.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Program Restrictions:** BSRS_RADT-Radiation Therapy

Schedule Type (Primary): Lecture

RADT 4615 - Radiation Oncology Seminar (3 Credit Hours)

Prerequisite: Senior standing or permission of instructor. Review of radiation therapy literature through research, discussions and student or guest presentation.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Program Restrictions:** BSRS_RADT-Radiation Therapy

Schedule Type (Primary): Seminar **Schedule Type (Additional):** Small Group, Asynchronous Instruction

RADT 4621 - Cancer Management in Radiology Oncology (3 Credit Hours)

The student is provided with an introduction to the specific malignant disease entities by site occurrence. Disease processes and the treatment planning philosophy are discussed, as well as the relationship of these concepts to clinical simulation and treatment planning procedures.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Program Restrictions:** BSRS_RADT-Radiation Therapy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

RADT 4640 - Radiation Oncology Clinical Internship IV (4 Credit Hours)

Students work with the clinical personnel in a team approach to radiation therapy treatment, planning and patient care.

Contact Hours: 20

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Program Restrictions:** BSRS_RADT-Radiation Therapy

Schedule Type (Primary): Supervised Lab/Clinic **Schedule Type (Additional):** Unsupervised Lab/Clinic, Internship/Practicum

RADT 4641 - Radiation Oncology Clinical Internship (3 Credit Hours)

Prerequisite: Admission to the program. Students work with the clinical personnel in a team approach to radiation therapy treatment, planning and patient care.

Contact Hours: 18

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRS_RADT-Radiation Therapy
Schedule Type (Primary): Internship/Practicum

RADT 4642 - Radiation Oncology Clinical Internship V (4 Credit Hours)

Students work with the clinical personnel in a team approach to radiation therapy treatment, planning and patient care.

Contact Hours: 20

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Degree Restrictions:** BS Radiologic Sciences

Schedule Type (Primary): Supervised Lab/Clinic **Schedule Type (Additional):** Unsupervised Lab/Clinic, Internship/Practicum

RADT 4648 - Applied Project (3 Credit Hours)

Directed project in which the student works independently on a project related to radiation oncology or medical dosimetry

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit, In Progress

College Restrictions: College of Allied Health Sci **Program Restrictions:** BSRS_RADT-Radiation Therapy

Schedule Type (Primary): Seminar **Schedule Type (Additional):** Small Group, Asynchronous Instruction

RADT 4800 - Physics of Radiation Oncology (3 Credit Hours)

Basic principles of radiation such as radioactive decay, production of x-rays, radiation quality, radiation interaction with matter, radiation detection and measurement, and radiation safety. Design and principles of operation of radiation therapy equipment are included.

Prerequisite(s): Admission to the RADT program or permission of instructor with College Algebra or Pre-Calculus.

Prerequisite(s): MATH 1111 $\geq$ C or MATH 1113 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Program Restrictions:** BSRS_RADT-Radiation Therapy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

RADT 4820 - Radiation Oncology Dosimetry (3 Credit Hours)

Application of physics learned in RADT 4800 to radiation oncology. Concepts of dose distribution in tissue patient treatment approaches and planning techniques. Calculation systems for photon, electron, and brachytherapy treatments included and all modification factors for treatment devices, patient geometry and machine parameters considered in-depth. Course designed to augment the student's clinical knowledge from rotations in radiation therapy and medical dosimetry. **Prerequisite(s):** admission to the RADT program or permission of instructor.

Prerequisite(s): RADT 4800 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: College of Allied Health Sci **Degree Restrictions:** BS Radiologic Sciences **Program Restrictions:** BSRS_RADT-Radiation Therapy

Schedule Type (Primary): Lecture

RADT 4825 - Radiation Oncology Dosimetry Lab (1 Credit Hour)

Labs include concepts of radiation detection/measurement, central axis dose distribution, calibration of megavoltage photon beams, calculation of open/shaped fields, dose distributions in two/three dimensions, electron beam dosimetry, and quality assurance.

Prerequisite: admission to the RADT program, or permission of the instructor.

Prerequisite(s): RADT 4800 $\geq$ C

Corequisite(s): RADT 4820

Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit
Program Restrictions: BSRS_RADT-Radiation Therapy
Schedule Type (Primary): Supervised Lab/Clinic

RRAD 5000 - Radiology Diagnostic (27 Credit Hours)

Lecture Hours: 15 **Contact Hours:** 48
Repeatability: May not be repeated for credit.
Grade Mode: Satisfactory/Unsatisfactory
College Restrictions: Residents
Schedule Type (Primary): Internship/Practicum

RRAD 5001 - Radiology Neuroradiology (27 Credit Hours)

Lecture Hours: 7 **Contact Hours:** 48
Repeatability: May not be repeated for credit.
Grade Mode: Satisfactory/Unsatisfactory
College Restrictions: Residents
Schedule Type (Primary): Internship/Practicum

RRAD 5002 - Therapeutic (27 Credit Hours)

Lecture Hours: 10 **Lab Hours:** 40 **Contact Hours:** 24
Repeatability: May not be repeated for credit.
Grade Mode: Satisfactory/Unsatisfactory
College Restrictions: Residents
Schedule Type (Primary): Internship/Practicum

RTHP 3100 - Foundations of Respiratory Care (3 Credit Hours)

This course covers introductory topics required for the study of respiratory care. Medical terminology, basic principles of pharmacology, applied anatomy, physiology, and function of the reparatory and closely related systems included.

Lecture Hours: 3
Repeatability: May not be repeated for credit.
Grade Mode: Normal, Audit
Program Restrictions: BSRPT_RESP-Respiratory Therapy
Schedule Type (Primary): Lecture

RTHP 3204 - Fundamentals of Respiratory Care Practice I (3 Credit Hours)

An integrated approach to principles and applications of cardiopulmonary physiology, physical assessment, and basic respiratory care equipment and techniques.

Corequisite(s): RTHP 3208 or permission of instructor
Lecture Hours: 3
Repeatability: May not be repeated for credit.
Grade Mode: Normal, Audit
Program Restrictions: BSRPT_RESP-Respiratory Therapy
Schedule Type (Primary): Lecture

RTHP 3208 - Fundamentals of Respiratory Care Practice Lab I (2 Credit Hours)

The companion lab for RTHP 3204, providing students an integrated approach to patient assessment, basic respiratory care equipment, and patient care.

Corequisite(s): RTHP 3204 or permission of instructor

Lab Hours: 4 **Contact Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Supervised Lab/Clinic

Additional Course Fee: Respiratory Therapy Lab Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 150

RTHP 3211 - Introduction to Problem Based Learning (3 Credit Hours)

An introduction to the process of problem-based learning using small groups to discuss patient problems pertaining to cardiopulmonary disease. Development of communication, critical thinking, and peer teaching skills are emphasized. Orientation to and assessment of the effective use of electronic resources to research learning topics is included.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

RTHP 3304 - Fundamentals of Respiratory Care Practice II (3 Credit Hours)

Prerequisites: Successful completion of previous RTHP courses and concurrent enrollment in RTHP 3308, or permission of the instructor. A continuation of an integrative approach to the study and application of concepts in cardiopulmonary physiology, physical assessment, and respiratory care equipment technology.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Lecture

RTHP 3308 - Fundamentals of Respiratory Care Practice Lab II (1 Credit Hour)

Prerequisites: Successful completion of previous RTHP courses and concurrent enrollment in RTHP 3304, or permission of the instructor. The companion lab for RTHP 3304, providing students an integrated approach to patient assessment, basic respiratory care equipment and patient care techniques.

Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Supervised Lab/Clinic

RTHP 3317 - Advanced Respiratory Care Techniques Lab (1 Credit Hour)

Prerequisites: Successful completion of previous RTHP courses and concurrent enrollment in RTHP 3314, or permission of the instructor. The companion lab for RTHP 3314. This course covers clinical applications of material presented in RTHP 3314 as well as relevant cardiopulmonary anatomy.

Lab Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Supervised Lab/Clinic

RTHP 3322 - Clinical Aspects of Cardiopulmonary Disease for the Respiratory Therapist I (3 Credit Hours)

Successful completion of all previous RTHP courses is required. This course covers the pathophysiological mechanism, clinical presentation, and management of common cardiopulmonary diseases with emphasis on the role of the respiratory care professional.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

RTHP 3525 - Clinic I (3 Credit Hours)

Prerequisites: Successful completion of previous RTHP courses or permission of the instructor. Students perform respiratory care procedures in acute care areas and alternate sites with emphasis placed on patient assessment and basic care techniques.

Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Supervised Lab/Clinic

RTHP 3560 - Diagnostic Testing in Respiratory Care (3 Credit Hours)

Successful completion of all previous RTHP courses or admission to the RSRT Completion Program is required. This course addresses principles of operation and application of diagnostic procedures used, interpreted and/or performed by the respiratory care practitioner.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

RTHP 3601 - Community and Public Health Respiratory Therapy (3 Credit Hours)

Successful completion of all previous RTHP courses or admission to the RSRT Completion Program is required. This course provides an overview of the role of the respiratory therapist across the continuum of care to include geriatric care, pulmonary rehabilitation, case management, public health, home health, U.S. health care delivery system and patient/family education.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Asynchronous Instruction

RTHP 3707 - Directed Individual Study: Quality Management (1 to 3 Credit Hours)

The study and/or application of quality management processes as related to an area of Respiratory Therapy. Prerequisites: Permission of the instructor.

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Directed Study (one-to-one)

RTHP 4114 - Introduction to Ventilator-Patient Management (3 Credit Hours)

Prerequisites: Successful completion of previous RTHP courses and concurrent enrollment in RTHP 4117, or permission of the instructor. A study of intensive respiratory care ventilator-patient management. Course emphasizes ventilator function, waveform analysis, and patient assessment.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

RTHP 4117 - Introduction to Ventilator-Patient Management Lab (1 Credit Hour)

A study of intensive respiratory care ventilator-patient management. Lab emphasizes ventilator function, waveform analysis, and patient assessment. Prerequisites: Successful completion of previous RTHP courses and concurrent enrollment in RTHP 4114, or permission of the instructor.

Lab Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Supervised Lab/Clinic

RTHP 4124 - Neonatal and Pediatric Respiratory Care (3 Credit Hours)

Prerequisites: Satisfactory completion of all previous RTHP courses and concurrent enrollment in RTHP 4127 or permission of instructor. Comprehensive study of neonatal and pediatric respiratory care with the emphasis on fetal development, labor and delivery, patient assessment, resuscitation techniques, cardiopulmonary diseases, and techniques of conventional and non-conventional mechanical ventilation.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

RTHP 4127 - Neonatal and Pediatric Respiratory Care Lab (2 Credit Hours)

Prerequisites: Successful completion of semester RTHP courses and concurrent enrollment in RTHP 4124, or permission of the instructor. Hands on experience with equipment and techniques used in neonatal and pediatric respiratory care.

Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Supervised Lab/Clinic

RTHP 4303 - Independent Study (1 to 5 Credit Hours)

An opportunity to study a topic of particular interest in a non-resident or independent setting. Prerequisite: Permission of the instructor.

Lecture Hours: 1 to 5

Repeatability: May be repeated for credit.

Grade Mode: Normal

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Independent Study

RTHP 4304 - Directed Individual Study: Marketing Respiratory Care (1 to 3 Credit Hours)

The study of general marketing theory with emphasis on the development and delivery of a plan for the marketing of the respiratory care profession. Prerequisites: Permission of the instructor.

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Directed Study (one-to-one)

RTHP 4305 - Directed Individual Study: Current Topics in Respiratory Care Research (1 to 3 Credit Hours)

The study and/or application of basic research principles in a current topic of respiratory care. Prerequisites: Permission of the instructor.

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Directed Study (one-to-one)

RTHP 4306 - Directed Individual Study: Improvements in Mechanical Ventilation (1 to 3 Credit Hours)

Study and evaluation of new modes and methods of mechanical ventilation to include pulmonary diagnostics using waveform analysis.

Prerequisites: Permission of the instructor.

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Directed Study (one-to-one)

RTHP 4307 - Directed Individual Study: Current Topics in Pediatric Respiratory Care (1 to 3 Credit Hours)

Study of current topics impacting neonatal and/or pediatric respiratory care. Prerequisites: Permission of the instructor.

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Directed Study (one-to-one)

RTHP 4308 - Techniques of Clinical Instruction (1 to 3 Credit Hours)

Introduction to theory and practice of clinical education in respiratory care.

Lecture Hours: 1 to 3 **Contact Hours:** 1 to 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Directed Study (one-to-one) **Schedule Type (Additional):** Asynchronous Instruction

RTHP 4414 - Hemodynamic Monitoring (1 Credit Hour)

An in-depth course on the various concepts and principles of hemodynamic monitoring for respiratory care. The course includes a study of the basic principles of normal cardiovascular function, pathophysiology, and techniques for monitoring cardiovascular function.

Lecture Hours: 1 **Lab Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

RTHP 4415 - Hemodynamics (2 Credit Hours)

An in-depth course on the various concepts and principles of hemodynamic monitoring for respiratory care. The course includes a study of the basic principles of normal cardiovascular function, pathophysiology, and techniques for monitoring cardiovascular function.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy **Campus Restrictions:** Web

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

RTHP 4422 - Clinical Aspects of Cardiopulmonary Disease for the Respiratory Therapist II (3 Credit Hours)

Successful completion of all previous RTHP courses or admission to the RSRT Completion Program is required. This course covers identification and treatment of problems associated with diseases seen in the critical care setting. Emphasis is placed on evidence-based treatment methodologies and the role of the respiratory care practitioner in the critical care setting.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

RTHP 4426 - Clinic II (3 Credit Hours)

Students perform respiratory care procedures in acute care areas or alternate sites with emphasis placed on basic patient care techniques. Prerequisites: Satisfactory completion of all previous RTHP courses or permission of instructor.

Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Unsupervised Lab/Clinic

RTHP 4501 - Individual Clinical Prac 1 (1 to 3 Credit Hours)

Clinical training in specialty areas of respiratory care such as critical care, pulmonary rehabilitation, or sleep diagnostics.

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Directed Study (one-to-one)

RTHP 4502 - Individual Clinical Prac 2 (1 to 3 Credit Hours)

Clinical training in specialty areas of respiratory care such as critical care, pulmonary rehabilitation, or sleep diagnostics.

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Directed Study (one-to-one)

RTHP 4514 - Advanced Ventilator-Patient Management Techniques (3 Credit Hours)

Prerequisites: Successful completion of previous RTHP courses and concurrent enrollment in RTHP 4517, or permission of the instructor. A continuation of RTHP 4114 emphasizing advanced waveform analysis, and pulmonary function testing procedures.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

RTHP 4517 - Advanced Ventilator-Patient Management Lab (1 Credit Hour)

Prerequisites: Successful completion of previous RTHP courses and concurrent enrollment in RTHP 4514, or permission of the instructor. Laboratory for RTHP 4514 emphasizing advanced waveform analysis, and pulmonary function testing procedures.

Lab Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Supervised Lab/Clinic

RTHP 4525 - Advanced Clinic I (4 Credit Hours)

Successful completion of all previous RTHP courses is required. Students perform respiratory care procedures in intensive care areas or alternative sites with emphasis placed on patient assessment and advanced patient care techniques.

Lab Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Supervised Lab/Clinic

RTHP 4526 - Advanced Clinic II (3 Credit Hours)

Successful completion of all previous RTHP courses is required. Students continue to refine advanced procedures and previously learned skills in the critical care setting in preparation for going on to externship.

Lab Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Supervised Lab/Clinic

RTHP 4527 - Advanced Clinic III - Externship (11 Credit Hours)

Successful completion of all previous RTHP courses is required. Students will travel to external clinical affiliates where they will receive extensive experience in the practice of respiratory care.

Lab Hours: 11

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Supervised Lab/Clinic

RTHP 4540 - Research in Health Care (3 Credit Hours)

Prerequisites: Successful completion of previous RTHP courses or permission of the instructor. Introduction to the fundamentals of research and basic statistical analyses applied to literature related to the practice of respiratory care. Emphasis is placed on critical review of medical literature and its integration into clinical practice through the use of lectures and student presentations.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSHIA_HINA-Health Information Admin, BSRPT_RESP-Respiratory Therapy, BS_HLTS-Health Services

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

RTHP 4541 - Investigation of a problem (1 Credit Hour)

Prerequisites: Successful completion of all previous RTHP courses. The student works with individual faculty members to investigate a specific research problem and provides an introduction to the scientific method in action.

Lab Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Supervised Lab/Clinic

RTHP 4542 - Capstone Project (3 Credit Hours)

Prerequisites: Successful completion of all previous RTHP courses. Students will finish data collection as needed, analyze/discuss the data and disseminate the results through an abstract, poster, and oral presentation of the project.

Lecture Hours: 1 **Lab Hours:** 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

RTHP 4601 - Professional and Ethical Issues in Respiratory Therapy (3 Credit Hours)

This course will provide an overview of basic ethical principles with an emphasis on the role of the respiratory therapist. The course will address professional issues in the field of respiratory therapy and prepare the student for transitioning to the work force. The role of the respiratory therapist as a leader in the health care arena will be addressed.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

RTHP 4701 - Cardiopulmonary Pathophysiology Case Study in Pediatric Asthma (2 Credit Hours)

A case study of clinical signs, symptoms, diagnosis, treatment, and management of pediatric asthma emphasizing the role of the respiratory care professional.

Contact Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

RTHP 4702 - Cardiopulmonary Pathophysiology, CS in Trauma (2 Credit Hours)

A case study of clinical signs, symptoms, diagnosis, treatment and management of trauma emphasizing the role of the respiratory care professional.

Contact Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

RTHP 4703 - Cardiopulmonary Pathophysiology, CS in COPD (2 Credit Hours)

A case study of clinical signs, symptoms, diagnosis, treatment, and management of COPD emphasizing the role of the respiratory care professional.

Contact Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

RTHP 4704 - Cardiopulmonary Pathophysiology, CS in Heart Failure (2 Credit Hours)

A case study of clinical signs, symptoms, diagnosis, treatment, and management of heart failure emphasizing the role of the respiratory care professional.

Contact Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

RTHP 4705 - Cardiopulmonary Pathophysiology, CS in Obstructive Sleep Apnea (2 Credit Hours)

A case study of clinical signs, symptoms, diagnosis, treatment, and management of obstructive sleep apnea emphasizing the role of the respiratory care professional.

Contact Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

RTHP 4706 - Cardiopulmonary Pathophysiology, Case Study in Burns (2 Credit Hours)

A case study of clinical signs, symptoms, diagnosis, treatment, and management of burns emphasizing the role of the respiratory care professional.

Contact Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

RTHP 4800 - Critical Thinking (1 Credit Hour)

Prerequisites: Acceptance in on-line AS-to-BS program and successful completion (grade of C or better) of all previous RTHP courses. This course is designed to give the student a better understanding and appreciation of techniques associated with critical thinking and problem solving as they relate to respiratory therapy. Emphasis will be placed on problem solving, logical reasoning, identifying and applying the best available evidence to clinical practice.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Asynchronous Instruction

RTHP 4801 - Advanced Applied Physiology for Respiratory Therapists (2 Credit Hours)

This course is designed to give the student a better understanding and appreciation of normal cardiopulmonary physiology. Consequently, the student will be able to understand how changes in normal physiology can affect the cardiopulmonary status of patients and allow the student to better modify therapeutic interventions and monitor the patient response to interventions. Course Prerequisite: Acceptance in the on-line AS-to-BS Completion program and successful completion (grade of C or better) of all previous RTHP courses

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Asynchronous Instruction

RTHP 4802 - Professional Presentations (3 Credit Hours)

Students will develop and present a 45-50 minute seminar on a current topic in respiratory care suitable for presentation to a professional audience.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Asynchronous Instruction

RTHP 4803 - Management of the Mechanically Ventilated Patient (2 Credit Hours)

A study of intensive respiratory care ventilator-patient management. Course emphasizes ventilator function and patient assessment.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Asynchronous Instruction

RTHP 4804 - Mechanical Ventilation Waveforms I (2 Credit Hours)

A companion course to RTHP 4803 emphasizing advanced waveform analysis and pulmonary function testing procedures.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Asynchronous Instruction

RTHP 4805 - Mechanical Ventilation Waveforms II (2 Credit Hours)

A continuation of RTHP 4804 emphasizing advanced waveform analysis and pulmonary function testing procedures.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Asynchronous Instruction

RTHP 4807 - Newborn Respiratory Care (2 Credit Hours)

Comprehensive study of neonatal respiratory care with the emphasis on fetal development, labor and delivery, patient assessment, resuscitation techniques, cardiopulmonary disease and techniques of conventional and non-conventional mechanical ventilation.

Lecture Hours: 2 **Contact Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Asynchronous Instruction

RTHP 4808 - Pediatric Respiratory Care (2 Credit Hours)

Comprehensive study of pediatric respiratory care with the emphasis on patient assessment, resuscitation techniques, cardiopulmonary disease and techniques of conventional and non-conventional mechanical ventilation.

Lecture Hours: 2 **Contact Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Asynchronous Instruction

RTHP 4809 - X-ray Interpretation (1 Credit Hour)

An introduction to radiologic imaging techniques with emphasis on routine evaluation of chest radiographs.

Lecture Hours: 1 **Contact Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Asynchronous Instruction

RTHP 4810 - ECG Interpretation (1 Credit Hour)

Basic analysis and evaluation of the ECG emphasizing dysrhythmia identification, patient evaluation, and treatment.

Contact Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Asynchronous Instruction

RTHP 4811 - Advanced Concepts in Critical Care (2 Credit Hours)

Students will explore advanced respiratory care procedures and patient assessment techniques with emphasis placed on cardiopulmonary anatomy and physiology.

Lecture Hours: 2 **Contact Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Asynchronous Instruction

RTHP 4812 - Advanced Cardiopulmonary Pathophysiology (3 Credit Hours)

Clinical signs, symptoms, diagnosis and management of selected cardiopulmonary diseases emphasizing the role of respiratory care professionals.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: BSRPT_RESP-Respiratory Therapy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

REST 5601 - Fixed Prosthodontic Seminar (1 Credit Hour)

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Major Restrictions: Advanced Standing DMD

Schedule Type (Primary): Lecture

REST 5701 - Restorative Clinic (2 to 10 Credit Hours)

Contact Hours: 0 to 6

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Continuing Progress Courses

Major Restrictions: Advanced Standing DMD

Schedule Type (Primary): Supervised Lab/Clinic

RSBC 5605 - Bioclinical Seminar V (2 Credit Hours)

Clinical case histories and reports appropriate to the biomedical and clinical science courses currently or previously taught, and correlated to the students' level of clinical expertise, will be provided to the class. One group will present a case study to the rest of the class, followed by a class discussion session. Faculty moderators will be present for the entire seminar.

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Seminar - Small Group

RSCA 5101 - Cariology (1 Credit Hour)

This foundational course in Cariology is designed to introduce first-semester dental students to the essential concepts and principles of dental caries, including its etiology, diagnosis, prevention, and management. The course provides a comprehensive understanding of the biological, behavioral, and environmental factors that contribute to the development of dental caries.

Lecture Hours: 1

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

RSCD 5311 - Complete Denture Prosthodontics (8 Credit Hours)

The course includes a didactic part and supervised clinical and laboratory sessions on the philosophy and techniques in the fabrication of complete dentures. Material includes oral examinations, preliminary and final impressions, maxillo-mandibular records, denture tooth selection, factors and philosophies of denture occlusion, setting teeth in a balanced lingualized occlusion, verifying maxillo-mandibular records, denture processing, correction of processing errors, completion and insertion of complete dentures.

Lecture Hours: 3 **Lab Hours:** 3 **Other Hours:** 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

RSDM 5511 - Dental Materials (5 Credit Hours)

This course takes a pragmatic approach to the study of dental materials and their underlying scientific principles as they relate to clinical dentistry. Materials science theory is coupled with property-based knowledge of the three primary restorative material classes: polymers, ceramics, and metals. These fundamentals provide students with a sound understanding of the properties required in a given clinical situation and the ability to critically assess manufacturer claims regarding product suitability. The course also helps students troubleshoot potential clinical challenges by distinguishing technique-sensitive issues from those related to material selection or composition. The course consists of three parts: faculty-led lectures, adaptive learning modules, and small-group student seminars. Lectures are 1.5 hours long and focus on specific material-related topics. Adaptive learning modules present interactive, self-paced clinical scenarios that reinforce decision-making and application. Small-group student seminars simulate a flipped classroom environment, with topics selected by students and faculty based on contemporary clinical relevance.

Lecture Hours: 5

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

RSDS 5211 - Introduction to Dental Sciences (4 Credit Hours)

This course introduces the student to basic dental terminology, instruments and laboratory equipment, and the risks associated with their use. It familiarizes the student with different types of dental stones and impression materials, and their use in the fabrication of diverse types of casts. The course presents basic information on the microbiological aspects of dentistry; dental infection control procedures; instrument sterilization; state dental board rules; four-handed dentistry; and interpersonal skills to enable freshman dental students to safely assist and observe upperclassmen in clinics.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

RSDS 5391 - Introduction to Clinical Dentistry (3 Credit Hours)

The purpose of this clinical course during the sophomore year is to provide the student with the opportunity to gain clinical experience and skill while demonstrating clinical knowledge and independent technical abilities for oral medicine, diagnosis, radiology, periodontics, and operative dentistry. Students will rotate to different clinics.

Lab Hours: 3

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Supervised Lab/Clinic

RSDS 5492 - Introduction to Clinical Dentistry II (3 Credit Hours)

The purpose of this clinical course during the sophomore year is to provide the student with the opportunity to gain clinical experience and skill while demonstrating clinical knowledge and independent technical abilities for oral medicine, diagnosis, radiology, periodontics, and operative dentistry. Students will rotate to different clinics.

Lab Hours: 3

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Supervised Lab/Clinic

RSED 5511 - Esthetic Restorative Dentistry (4 Credit Hours)

The goal of this course is to provide an exposure of the special didactic and clinical requirements of esthetic restorations such as; porcelain and composite veneers, direct placement layered composites, shade selection, and vital bleaching procedures. In addition, students will learn to evaluate and document the esthetic needs of patients through the use of a smile analysis and intra-oral photography. Treatment rationale and restoration longevity are presented so that the student can successfully develop a comprehensive esthetic treatment plan.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

RSFX 5311 - Fixed Prosthodontics I (5 Credit Hours)

Students are introduced to principles and techniques encountered in the preparation of teeth and subsequent fabrication and delivery of a gold crown, including various provisional restorations, pin-retained foundations, PVS impressions, and articulation of casts for posterior single-tooth gold crowns.

Lecture Hours: 2 **Lab Hours:** 3

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

RSFX 5412 - Fixed Prosthodontics II (8 Credit Hours)

Lecture and laboratory segments discussing fundamentals of abutment preparation, retainer and pontic design and clinical procedures for fabrication of fixed partial prostheses and single units in all metal and ceramic veneers on vital and endodontically treated teeth.

Lecture Hours: 4 **Lab Hours:** 4

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

RSGD 5701 - Dental Challenges in Treating Older Adults (1 Credit Hour)

An in-depth exploration of the unique dental challenges faced when treating older adults. As the population ages, dental professionals must be equipped with specialized knowledge and skills to address the complex needs of geriatric patients. Students gain insights into the physiological, pharmacological, and psychological aspects of aging that impact dental care. Topics range from managing medically

compromised patients to understanding the links between oral and systemic health, and from prosthodontic challenges to effective communication strategies with older adults. Students are prepared to deliver comprehensive, compassionate, and effective dental care to the elderly population.

Lecture Hours: 1

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

RSID 5211 - Introduction to Dental Sciences (4 Credit Hours)

This course introduces the student to basic dental terminology, instruments and laboratory equipment, and the risks associated with their use. It familiarizes the student with different types of dental stones and impression materials, and their use in the fabrication of diverse types of casts. The course presents basic information on the microbiological aspects of dentistry; dental infection control procedures; instrument sterilization; state dental board rules; four-handed dentistry; and interpersonal skills to enable freshman dental students to safely assist and observe upperclassmen in clinics.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

RSOC 5111 - Dental Anatomy and Occlusion (8 Credit Hours)

This course includes material from two very closely related topics: dental anatomy and occlusion of the natural dentition. The dental anatomy component introduces the student to the morphology of the primary and permanent dentition. Throughout the course, tooth arch traits, type traits, specific developmental and eruption features, as well as anomalies, will be stressed for both primary and permanent dentitions. In addition, a preliminary overview to gross structures of the masticatory system, periodontal anatomy, internal root anatomy is presented. Knowledge from didactic learning of arch traits and type traits is then applied to waxing selected teeth in the permanent dentition on the dentoform. The course also introduces the student to the basic concepts of occlusion. The main emphasis is on the occlusion of the natural dentition, but certain aspects also apply to the occlusion of the artificial dentition. The purposes are to familiarize the student with 1) necessary terminology, 2) condylar movement characteristics and the resulting interactions of teeth, 3) basic knowledge of optimal occlusion and acceptable variations, and 4) the psychomotor skills related to restorative and prosthetic dentistry. The occlusal waxing phase of the course is concerned with the form-function interrelationships of the opposing surfaces of natural and artificial teeth. The rationale for current concepts of occlusion based on mechanical and known biological principles will be presented. The student will be expected to integrate manual skills and didactic knowledge by forming the coronal surfaces of teeth in wax while utilizing a dentoform and pre-formed dies. This course begins to impart to students the knowledge and skills necessary to restore missing parts or complete crowns of teeth to anatomical form that is in intra-arch and inter-arch harmony both in centric and eccentric mandibular positions.

Lecture Hours: 4 **Lab Hours:** 4

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

RSOC 5311 - Occlusal Analysis (2 Credit Hours)

This course consists of lectures, laboratory exercises and clinical procedures involved in determining the functional status of the natural dentition with a clinical occlusal examination; in making alginate impressions, generating stone casts and mounting the diagnostic casts in a semi-adjustable and hinge articulator; and in performing a complete or limited occlusal adjustment on the natural dentition.

Lecture Hours: 1 **Lab Hours:** 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

RSOP 5111 - Operative Dentistry I (4 Credit Hours)

RSOP 5111 teaches the evidence-based principles and techniques of conservative cavity preparation and the restoration of teeth with direct restorative materials. Topics include but are not limited to the caries diagnosis; appropriate restorative plan, field isolation, preparation design, and the clinical application of restorative materials and ergonomics. Laboratory treatment of simulated permanent teeth and extracted human teeth is utilized to teach basic restorative concepts. Larger preparations and restorations are also performed

to simulate real clinical situations.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

RSOP 5212 - Operative Dentistry II (4 Credit Hours)

RSOP 5212 teaches the evidence-based principles and techniques of conservative cavity preparation and the restoration of teeth with silver amalgam and tooth-colored restorative materials. Topics include but are not limited to the diagnosis of dental caries; preparation design including the use of auxiliary retention and dentin bonding; field isolation; the clinical application of restorative materials and ergonomics. Laboratory treatment of simulated permanent teeth and extracted human teeth is utilized to teach basic restorative concepts. Larger preparations and restorations are also performed to simulate real clinical situations.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

RSPR 5411 - Removable Partial Dentures (7 Credit Hours)

This laboratory technique course stresses the fundamentals of proper RPD design and fabrication. Emphasis is on examination, diagnosis, sequential treatment planning and mouth preparation including occlusal modification to assure optimal stability and occlusal harmony of the RPD(s) in function, including the use of endosseous implants. Diagnosis and treatment planning of the partially dentate patient, including provisional techniques, sequencing of treatment and preparation for complete edentulism will also be introduced.

Lecture Hours: 3 **Lab Hours:** 4

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

RSPR 5591 - Prosthodontics Clinic I (3 Credit Hours)

In this junior level prosthodontics clinic, the student will examine patients requiring removable prosthodontic care and then design, construct and insert four units of removable prosthodontics, under faculty supervision, by the end of the 8th semester. In addition the student will complete at least one treatment planning board (TPB) competency, one laboratory prescription/work authorization competency, six clinical competency examinations (CE's) and one occlusion procedure (D9940-Splint, D9951 Limited Occlusal Adjustment, D9952 Complete Occlusal Adjustment).

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Supervised Lab/Clinic

RSPR 5692 - Prosthodontics Clinic II (4 Credit Hours)

Students examine patients requiring fixed and removable prosthodontic care, insertion of four indirect fixed restorations, design, fabricate and insertion two sets of dentures, either CULD or Max CD/Class 1 or 2 RPD, under faculty supervision, by the end of their third year. D3 students must demonstrate competence in completing either a Fixed or a Removable Work Authorization, complete some aspect of occlusal therapy (D9951, D9952, D9944) and have begun/completed some other type of Removable Prosthodontic treatment (e.g., Immediate CD, RPD, Interim). Students' second set of complete dentures will be completed with minimal faculty intervention to demonstrate competence in six procedures. Students are expected to create portfolios documenting their planning, sequencing, and treatments, and be prepared to present any of these portfolios. One practice 123 Sequencing Board must be completed by the end of the semester. This supports the competency assessment of a 123 Sequencing Board during the Spring semester. The third year is completed with the successful passing of the D3 OSCE Assessment. Students are also expected to manage their patient populations ethically and effectively, ensuring that graduation expectations will be met in a timely manner.

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Supervised Lab/Clinic

RSRC 5591 - Restorative Clinic I (4 Credit Hours)

The purpose of this clinical course during the junior year is to provide the student with the opportunity to gain clinical experience and skill while demonstrating clinical knowledge and technical abilities for a variety of indirect and direct restorative procedures.

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Supervised Lab/Clinic

RSRC 5692 - Restorative Clinic II (4 Credit Hours)

The purpose of this clinical course during the junior year is to provide the student with the opportunity to gain clinical experience and skill while demonstrating clinical knowledge and technical abilities for a variety of indirect and direct restorative procedures.

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Supervised Lab/Clinic

RSTP 5201 - Diagnosis and Treatment Planning I (3 Credit Hours)

This course continues the teaching of oral diagnosis begun in DSOM 5301, but focuses on the dentition, primarily identifying and charting existing dental restorations, conditions, and dental pathosis, including caries, in the school's Electronic Dental Record (axiUm). Incorporating medical history evaluation into the dental examination and axiUm documentation will be expanded and reinforced, as well as an introduction to writing chart notes in correct format. Key disease risk assessments will be incorporated. All didactic topics will be explored using a case-based format.

Lecture Hours: 3

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

RSTP 5502 - Diagnosis and Treatment Planning II (1 Credit Hour)

This course follows DXTP 5001 and TXPL 5001 (Treatment Planning I) expanding on concepts, principles and treatment philosophy associated with the diagnostic process and subsequent clinical treatment. The intent of this course is to present, review and amplify these concepts with emphasis on data analysis/correlation, diagnosis, prognosis and appropriately phased/prioritized problem based dental/orofacial treatment planning.

Lecture Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

RSTP 5591 - Diagnosis and Treatment Planning Clinic I (2 Credit Hours)

This course continues the student's training in clinical techniques of oral physical examination, collection of diagnostic data, treatment planning, and patient management.

Lab Hours: 2

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Supervised Lab/Clinic

RSTP 5692 - Diagnosis and Treatment Planning Clinic II (1 Credit Hour)

This course continues the student's training in clinical techniques of oral physical examination, collection of diagnostic data, treatment planning, and patient management.

Lab Hours: 1

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Supervised Lab/Clinic

RRHE 5000 - Rheumatology (27 Credit Hours)

Lecture Hours: 5 **Contact Hours:** 40
Repeatability: May not be repeated for credit.
Grade Mode: Satisfactory/Unsatisfactory
College Restrictions: Residents
Schedule Type (Primary): Internship/Practicum

SCED 3102 - Secondary School Context and Curriculum (3 Credit Hours)

Using language bases derived from educational research, from state, national, and local curriculum standards, and from secondary school effective practices, students will examine the secondary school curriculum in terms of the connections that exist among the subject area disciplines and in terms of the strategies that secondary school teachers and learners use (including models of teaching, critical thinking techniques, and approaches to content area reading). Students will examine the secondary school in its historical and political context as well as in relation to pertinent philosophical issues. Students will examine multiple models of classroom management and their relationship to the learning environment of the classroom.

Lecture Hours: 2 **Lab Hours:** 2
Repeatability: May not be repeated for credit.
Grade Mode: Normal, Audit
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Independent Study,Asynchronous Instruction

SCED 3201 - Secondary Social Studies Content Pedagogy I (3 Credit Hours)

Students will examine the implications of the structural features of social sciences and history for developing curriculum, instruction, and assessment for secondary social studies and history. They will critically consider national and state content standards in light of their knowledge of the disciplines and secondary students.

Lecture Hours: 2 **Lab Hours:** 2
Repeatability: May not be repeated for credit.
Grade Mode: Normal, Audit
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Independent Study,Asynchronous Instruction

SCED 3401 - Secondary Science Education Methods (3 Credit Hours)

The focus of the course is on integrating science concepts, disciplinary core ideas, and inquiry processes into the teaching of science in high school. Emphasis will be placed on the process-oriented inquiry method of teaching science, designing and planning instruction, and implementing and evaluating student learning in science. Prospective teachers are expected to integrate knowledge of science, learning, and pedagogy and apply that knowledge to science teaching. Course content and presentation is guided by the Science Georgia Standards of Excellence (SGES), the Next Generation Science Standards (NGSS), and NSTA's Preservice Science Standards (PSS). Credit Hours: 3

Lecture Hours: 2 **Lab Hours:** 2
Repeatability: May not be repeated for credit.
Grade Mode: Normal, Audit
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Independent Study,Asynchronous Instruction

SCED 4101 - The Secondary School Student (3 Credit Hours)

Using knowledge bases derived from educational research and learning theory relevant to adolescents, students will study the characteristics of secondary school learners and the principles of educational psychology that inform our understanding of these learners. The course will examine that population in terms of student differences and special needs; it will explore the implications of these learner characteristics for curriculum, instruction, and assessment.

Lecture Hours: 2 **Lab Hours:** 2
Repeatability: May not be repeated for credit.
Grade Mode: Normal, Audit
Major Restrictions: Secondary Education
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervi

Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

SCED 4102 - Secondary School Context and Curriculum (3 Credit Hours)

Using language bases derived from educational research, from state, national, and local curriculum standards, and from secondary school effective practices, students will examine the secondary school curriculum in terms of the connections that exist among the subject area disciplines and in terms of the strategies that secondary school teachers and learners use (including models of teaching, critical thinking techniques, and approaches to content area reading). Students will examine the secondary school in its historical and political context as well as in relation to pertinent philosophical issues. Students will examine multiple models of classroom management and their relationship to the learning environment of the classroom.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Secondary Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

SCED 4201 - Secondary Social Studies Content Pedagogy I (3 Credit Hours)

Students will examine the implications of the structural features of social sciences and history for developing curriculum, instruction, and assessment for secondary social studies and history. They will critically consider national and state content standards in light of their knowledge of the disciplines and secondary students.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Secondary Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

SCED 4301 - Secondary Mathematics Pedagogy I (3 Credit Hours)

The focus will be on skills in problem-solving, measurement, computation, hypothesis posing and hypothesis testing, and on algebraic and geometric analyses. Teaching and learning strategies will be examined in light of effective school practices and in light of national, regional, and local curriculum standards.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Secondary Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching

SCED 4401 - Science Pedagogy I (3 Credit Hours)

Students will examine varied approaches to instruction of secondary science curriculum including: inquiry, field and laboratory based learning, concept attainment and formation, hypothesis testing, discovery and simulation. Students will develop instructional planning skills.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Secondary Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

SCED 4501 - Secondary English Pedagogy I (3 Credit Hours)

Through this course, students will demonstrate the abilities to analyze and apply models of instructional approaches, and learning assessment in the areas of literature, reading skills, writing skills, and language development. Students will develop skills necessary to plan instructional units and lessons that accommodate all learners.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Secondary Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

SCED 4901 - Secondary Culminating Residency (11 Credit Hours)

Students are placed with selected master teachers for an entire semester during which time they are teaching in the curriculum areas for which they are seeking certification. During the semester, the apprentice teacher, under the supervision of the master teacher, assumes the responsibilities of professional teaching practice. Students reflect on and synthesize the conceptual and theoretical constructs of pedagogy with the complexity of practice. Successful completion of teacher education coursework and all requirements for the subject area major are required prior to Culminating Residency.

Prerequisite(s): EDTD 3200 >=B and SCED 3102 >=B and SPED 3002 >=B

Corequisite(s): EDTD 4940

Lab Hours: 22 **Contact Hours:** 22

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Subject Restrictions: EDTD - Teacher Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

Additional Course Fee: Student Teaching Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 200

SECR 6168 - Cross-Cultural Security and Psychology (3 Credit Hours)

Theoretical foundations and practical skills for a set of core psychological principles and practices which relate to cyber. The course material will focus on three areas of psychological sciences that relate to cyber. First, the course material examines our capabilities to profile cyber criminals and/or cyberterrorists. While traditional profiling techniques are of value, new techniques are surveyed to appraise our profiling capabilities within the cyber domain. Second, the course material reviews the effects of culture on cognition and behavior. In addition, the course material reviews our current state of knowledge regarding psychological factors associated with the development of extremist beliefs and group membership. The course focuses on the individuals behind the computer, related to cybercrime, cyberterrorists and cyber professionals working for the nation-state. It is well-suited in the sub-field of intelligence and security studies known as political psychology.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SECR 6351 - Homeland Security (3 Credit Hours)

Introduces students to the essential ideas in the emerging discipline of homeland security. Includes basic instruction on the strategy-making process, fear management, crisis communication, conventional and unconventional threats, civil liberties and security, the role of technology, and intelligence and information collection.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group, Asynchronous Instruction

SECR 6411 - Introduction to Intelligence Studies (3 Credit Hours)

This course introduces students to a broad overview of the U.S. Intelligence Community (USIC), to include its purpose, development, organization and role in meeting the objectives of U.S. national security. Students will be introduced to the five major disciplines of intelligence (human, signals, geospatial, measurement and signature, and open source), as well as the roles of policy makers and Congress in directing and overseeing the USIC.

Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Seminar **Schedule Type (Additional):** Small Group, Asynchronous Instruction

SECR 6412 - Intelligence Collection (3 Credit Hours)

This course gives students an in-depth understanding of the five disciplines of intelligence collection: Open-Source (OSINT), Signals (SIGINT), Human (HMINT), Geospatial (GEOINT), and Measurement and Signature (MASINT). Students will also gain a broad understanding of how these intelligence disciplines have been used in past intelligence operations, as well as how they support the executive branch of the U.S. government in formulating and directing national security policy.

Prerequisite(s): SECR 6411 >= C

Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Seminar **Schedule Type (Additional):** Small Group, Asynchronous Instruction

SECR 6413 - Open-Source Intelligence (3 Credit Hours)

An introduction to Open-Source Intelligence (OSINT), to include its historical development, applications for the U.S. intelligence community and private sector, and underlying techniques, methods, and tools. The course covers several historical and contemporary examples of how the United States, its strategic competitors, and non-state actors use OSINT in global competition and conflict, information warfare, social influence and persuasion, and criminal investigations. Students acquire the foundational policy and practical knowledge on which to build expertise in OSINT production, as well as the skills to analyze and communicate OSINT's application to a variety of national security challenges and private-sector trends.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Intelligence & Sec Studies

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SECR 6414 - Public Health and Medical Intelligence: Security and Civilian Principles and Applications (3 Credit Hours)

Students will examine the different historical and current definitions of public health and medical intelligence. They will also become acquainted with different theories and principles, and they will also understand the proper use and role of both security and public health/epidemiological applications. Case studies will review military and civilian examples and utilization in guiding strategic and operational decisions. The course is designed to illustrate the role intelligence collection plays within public health and international security.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group, Asynchronous Instruction

SECR 6415 - Intelligence Analysis (3 Credit Hours)

This 3-hour course introduces students to the tradecraft of intelligence analysis, including the basics of critical thinking, recognizing and avoiding cognitive biases, and using structured analytic techniques, such as analysis of competing hypotheses. Students will also gain experience writing analytical products that highlight specific threats to national security operations, including political-military, terrorism, medical, criminal, and counterintelligence. Additionally, students will gain knowledge of the role analysis has played in prior intelligence failures.

Prerequisite(s): SECR 6411 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SECR 6600 - Research Design and Writing for Intelligence and Security Studies (3 Credit Hours)

Introduces students to the basic writing style and technical writing format used in intelligence and security studies. This includes the scientific principles of research design, collecting and analyzing intelligence and security-related literature, and producing appropriate analytic reports. Topics include but are not limited to: the foundational elements of research design (e.g., developing a research question, theory, hypothesis testing, data collection, data analysis and discussion), how to conduct research properly, types of qualitative and quantitative research, and how to approach writing a thesis/capstone project.

Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Seminar **Schedule Type (Additional):** Small Group, Asynchronous Instruction

SECR 6601 - Data Analytics for Intelligence Analysis (3 Credit Hours)

Introduces methods for analyzing and visualizing data to answer questions of intelligence studies. Topics include: essential notions of probability theory and statistics, followed by techniques in modern data analysis: ordinary least squares regression, maximum likelihood estimation, multi-level modeling, and data visualization. Also discussed is how to deal with different types of variables and data generating process. These concepts are illustrated with applications drawn from frontier research. Finally, instruction is provided on the use of R language and opportunities for students to perform hands-on, self-directed empirical analysis.

Lecture Hours: 3 **Contact Hours:** 80

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Major Restrictions: INSC- Intelligence & Security Studies

Schedule Type (Primary): Asynchronous Instruction

SECR 6602 - Introduction to Machine Learning for Intelligence Analysis (3 Credit Hours)

Introduces various machine learning models, gives an overview of many concepts, techniques, and algorithms, as well as demonstrates how these models can be applied to social science research and particularly intelligence studies. Basic concepts of machine learning including classification, regression, overfitting, boosting, clustering, and more are discussed. Supervised learning algorithms that are commonly used in academia and industries such as decision trees, random forest, K-nearest neighbor, support vector machines, and neural networks are further investigated. A few unsupervised learning algorithms, including the K-means clustering algorithm and dimensionality-reduction algorithms are introduced. Finally, instructions are provided on the use of Python language and opportunities for students to perform hands-on, self-directed machine learning projects.

Lecture Hours: 3 **Contact Hours:** 80

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Major Restrictions: INSC- Intelligence & Security Studies

Schedule Type (Primary): Asynchronous Instruction

SECR 6603 - Intro to Intelligence: Theory and Practice (3 Credit Hours)

Introduction to the theory and practice of intelligence. Students are introduced to the history of U.S. intelligence, the five collection disciplines, analytic methods and problems of analytical bias, ethical issues in intelligence, as well as an overview of foreign intelligence entities (FIEs). Case studies are heavily relied upon, especially regarding the use of analytic methods and the challenges of intelligence collection, as well as the operations of both U.S. and foreign intelligence agencies. Additionally, given this is a course focusing on the "practice" of intelligence, students are asked to produce several intelligence assessments in memorandum format, as well as an in-depth research paper on a relevant topic related to the U.S. Intelligence Community.

Lecture Hours: 3 **Contact Hours:** 80

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Major Restrictions: INSC- Intelligence & Security Studies
Schedule Type (Primary): Asynchronous Instruction

SECR 6604 - Intelligence Analysis: Theory and Practice (3 Credit Hours)

Introduces students to the theory and practice of intelligence analysis. During this course, students rely heavily on analytical case studies to highlight the various structured analytic techniques used by most intelligence analysts to identify biases, challenge assumptions, develop alternative explanations, and learn to examine evidentiary evidence more closely. Also examined are the ways in which common cognitive biases can skew analysis and focus on ways analysts can overcome them. Students also learn the various types of information available to intelligence analysts, as well as the best strategies to build an analytical assessment/argument. Additionally, given this is a course focusing on the "practice" of intelligence analysis, students are asked to produce several intelligence assessments in memorandum format, as well as an in-depth research paper on an intelligence-related topic.

Lecture Hours: 3 **Contact Hours:** 80

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Major Restrictions: INSC- Intelligence & Security Studies

Schedule Type (Primary): Asynchronous Instruction

SECR 6605 - Intelligence Collection: Theory and Practice (3 Credit Hours)

An introduction to a broad overview of the five disciplines of intelligence collection. Students gain an understanding of the history, development, and policy considerations of open-source intelligence (OSINT), human intelligence (HUMINT), signals intelligence (SIGINT), measurement and signature intelligence (MASINT), and geospatial intelligence (GEOINT). Students also become familiar with the various types of platforms, imaging systems, and sensors used in intelligence collection operations. Moreover, the course uses case studies based on previously released classified information to assist students in thinking about how to plan for collection operations in complex environments. Finally, students are introduced to ideas regarding the ongoing development of surveillance technologies and how they may be utilized to gather intelligence information in the future.

Lecture Hours: 3 **Contact Hours:** 80

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Major Restrictions: INSC- Intelligence & Security Studies

Schedule Type (Primary): Asynchronous Instruction

SECR 6606 - Counterintelligence: Theory and Practice (3 Credit Hours)

Introduction to the theory and practice of Counterintelligence. Students become familiar with the major tenets of both offensive and defensive counterintelligence operations, as well as an overview of CI operational planning. Case studies are heavily relied upon to highlight the successes and failures of past CI operations, most of which were derived from released classified material. Additionally, given this is a course focusing on the "practice" of intelligence, students are asked to produce several counterintelligence assessments in memorandum format, as well as prepare an in-depth research paper on a given topic associated with a past CI operation. Finally, students become familiar with the most common ethical dilemmas associated with the conduct of both offensive and defensive CI operations.

Lecture Hours: 3 **Contact Hours:** 80

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Major Restrictions: INSC- Intelligence & Security Studies

Schedule Type (Primary): Asynchronous Instruction

SECR 6607 - Open-Source Intelligence: Theory and Practice (3 Credit Hours)

Introduction the theory and practice of Open-Source Intelligence (OSINT). Students learn many key terms and the historical role OSINT has played in the Intelligence Community and how it has evolved into one of the most important disciplines of intelligence collection. The course highlights the various types of openly available information that form the basis of OSINT, and examples of how this data/information have been used in prior intelligence operations. Also covered are the major advantages and disadvantages of OSINT, as well as the need to understand the inherent biases associated with it. Moreover, students are introduced to the concept of "circular reporting" and how to recognize it in OSINT. Finally, students are taught the likely trajectory of future OSINT capabilities and the implications their development may have on privacy rights.

Lecture Hours: 3 Contact Hours: 80

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Major Restrictions: INSC- Intelligence & Security Studies

Schedule Type (Primary): Asynchronous Instruction

SECR 6611 - Social Media Network Analysis (3 Credit Hours)

An introduction to the theory and methods employed in social network analysis with a focus on the application on social media. Starting from basic concepts and components of network analysis, and moving to more complex network models, with examples provided from frontier research in the field of political science, international relations, and security studies. Topics include: network theory, data collection from social media, describing, measuring, and visualizing networks, nodes and edges, graph-level indices, exponential random graph models, network regression, network autocorrelation models, temporal models of social networks, and more. Both descriptive and inferential approaches are covered with an emphasis on the use of network methods for theory testing and social media analysis. Also introduced is the R statistical computing system for network analysis and Rstudio, with opportunities to carry out hands-on, self-directed data manipulation and network analysis within the R environment.

Lecture Hours: 3 Contact Hours: 80

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Major Restrictions: INSC- Intelligence & Security Studies

Schedule Type (Primary): Asynchronous Instruction

SECR 6612 - Social Media Text Analysis (3 Credit Hours)

Introduces various text analysis concepts and methods for social media studies. This field includes a collection of research from the natural language processing, data mining, and machine learning communities. Topics include: various social media data collection methods such as the use of API and web scraping, data manipulation, text data preprocessing, text analysis algorithms, text classification, clustering, topic modeling, sentimental analysis, and text visualization. Also examined are various methods and tools for handling text data in different languages. Further, frontier research on social media studies for students to better understand the application of text analysis is explored. Lastly, instructions on the use of Python language and opportunities for students to perform hands-on, self-directed text analysis projects are provided.

Lecture Hours: 3 Contact Hours: 80

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Major Restrictions: INSC- Intelligence & Security Studies

Schedule Type (Primary): Asynchronous Instruction

SECR 6650 - National Security and Public Policy (3 Credit Hours)

US national security is pursued within the bounds of a public policy process. This 3-hour course introduces students to the theory and practice of public policy and its application to US national security policy and management. First, the course will examine theories of public policy, including their intellectual development over time, as well as models of the current policy process. Second, the course will examine national security management by looking at the roles of pertinent institutions from the president, military establishment, and intelligence agencies to Congress and the courts. Finally, the course will examine national security decision-making theories and review significant legislation such as the National Security Act of 1947, War Powers Resolution of 1973, and USA Patriot Act of 2001.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group, Asynchronous Instruction

SECR 6809 - Ethnic Conflict and Political Violence (3 Credit Hours)

This course focuses on the causes, prevention and consequences of conflict and political violence based on identity, nationalism, and ethnicity. It also covers civil wars and terrorism as they relate to these issues, with particular focus placed upon ethno-religious identity. Importance is also placed on how ethnic conflict affects US policy and US intervention. Areas of focus may include Afghanistan, Bosnia, Burma/Myanmar, Chechnya, Darfur, Israel, Iran, Iraq, Kosovo, Northern Ireland, Rwanda, and Syria.

Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Seminar **Schedule Type (Additional):** Small Group,Asynchronous Instruction

SECR 6810 - The Politics of Islam and International Security (3 Credit Hours)

This 3-hour course introduces students to the role of Islam in international politics and security. First, the course will introduce students to the basic belief structure in Islam. Second, the course will focus on the history and expansion of the Islamic empires. The third part of the course will consider the impact that Western colonialism had on the development of modern states in the Muslim world paying particular focus on areas of historic and continuing security concerns. Finally, the course will explore Islam's connections to concepts like terrorism, and democracy, through the lens of international Muslims' public opinion.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Asynchronous Instruction

SECR 6813 - Environmental Issues in International Security (3 Credit Hours)

This 3-hour course introduces students to the study of how environmental factors can affect domestic and international security. The first part of the course will focus on how natural resource competition and resource availability (e.g., water, energy) can affect conflict and security. The second part of the course will examine how natural disasters (e.g., floods, droughts, and hurricanes) can affect security. The third part of the course will analyze how climate change can impact migration patterns due to natural disasters, environmental changes, and subsequent domestic and international security. The last part of the course will examine the strategies to provide for stability and security, internationally and domestically, based on the challenges presented by environmental factors.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Asynchronous Instruction

SECR 6814 - Space and International Security (3 Credit Hours)

This 3-hour course introduces students to the study of how the militarization of space and space-related policies affect security. The first part of the course will focus on how the militarization of space affects security in general terms. The second part of the course will investigate the "Space Race" from a historical perspective and will consider its implications for security studies. The third part of the course will examine the strategies/actions each of the major power states (United States, China, and Russia) are taking in space. The fourth part of the course will analyze the actions developed/non-major power states and developing states are taking in space. The final part of the course will examine the implications of the current space race on international and domestic security and will consider future scenarios regarding space and security.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Asynchronous Instruction

SECR 6815 - Weapons of Mass Destruction and International Security (3 Credit Hours)

This 3-hour course introduces students to the topic of Weapons of Mass Destruction (WMDs). The course will focus on multiple aspects of WMDs within the field of security studies. First, the course will examine the different definitions of WMDs. Second, the course will focus on the various types of WMDs, and the production processes related to their development (i.e., how nation-states attempt to develop WMDs). The third part of the course will consider various strategies regarding limiting the proliferation of WMDs – especially as it pertains to rogue states, the implications WMD development has for international/national security, and strategies to defend against WMD threats.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Asynchronous Instruction

SECR 6906 - Terrorism Studies (3 Credit Hours)

This course is designed to help students understand the phenomenon of international terrorism. The course is designed to introduce students to different perspectives on terrorism and the readings will give students a conceptual framework to systematically analyze terrorism while encouraging them to sharpen their analytical skills through exploration of case studies.

Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Seminar **Schedule Type (Additional):** Small Group,Asynchronous Instruction

SECR 6910 - International Relations Theory (3 Credit Hours)

This 3-hour course introduces students to the most important theoretical approaches to the study of international relations (IR), providing a gateway to subfields intelligence and security studies. The first part of the course focuses on the history of the discipline. Secondly, the course investigates the mainstream IR theoretical approaches including, realism, institutionalism, world-systems, and constructivism Thirdly, this course turns to the critical approaches including, but not limited to, post-modernism, feminism, other critical theories. This course concludes with the prospect for dialogue and synthesis among the diverging theories, and, into the relevance of theory to policy and military operations. This course serves as the foundational course for more advanced course-work along with Introduction to Security Studies. The purposes of this course are fully theoretical, and do not delve into case-illustrations or specific nation-state studies.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SECR 6911 - Introduction to Security Studies (3 Credit Hours)

This is the introductory course for the MA in Intelligence and Security Studies (MAISS). It familiarizes students with basic approaches to security studies, emerging trends in security studies, current global threats to US national security, and policy responses to such threats. It examines security from both the macro and micro levels, covering systemic security theories as well as focusing on emerging threats to US security, non-traditional threats, and an introduction to US security strategy.

Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Seminar **Schedule Type (Additional):** Small Group,Asynchronous Instruction

SECR 6912 - Counterterrorism Studies (3 Credit Hours)

This course examines macro and micro level approaches to combating domestic and international terrorism. It analyzes the various challenges nations encounter as they attempt to combat terrorism. It examines counterterrorism through a broad multi-regional approach as well as through unique case study analyses. Specific topics may include, but are not limited to: deterrence, military and law enforcement responses to terrorist attacks, homeland security, counterinsurgency tactics, and media relations.

Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Seminar **Schedule Type (Additional):** Small Group,Asynchronous Instruction

SECR 6913 - Critical Security Studies (3 Credit Hours)

Examines new theoretical approaches to security studies and emerging trends, focusing specifically on post-modern ideas of security and the role of human rights and human security. Topics include: gender and security, environmental security, and health and security. Also focuses on U.S. policy implications from a critical security studies perspective.

Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Seminar **Schedule Type (Additional):** Small Group,Asynchronous Instruction

SECR 6914 - Future Wars (3 Credit Hours)

This course is designed to introduce students to emerging trends in conflict within the field of security studies. The course will focus on potential future conflicts as a result of geopolitics and shifting power dynamics internationally. The course will also examine past, current, and future trends pertaining to conflict and violence more generally. Lastly, the course will analyze the role artificial intelligence, cybertechnology, environmental factors, and the militarization of space will play in influencing conflict in the near and distant future. The overall aim of the course is to provide students with a better understanding of the factors that will shape of security studies in the coming decades.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Directed Study (one-to-one),Asynchronous Instruction

SECR 6915 - The Economics of International Security (3 Credit Hours)

Security and economics still exist to a substantial degree as separate worlds in both academia and government. Yet more and more scholars and practitioners have come to realize that economic constraints and opportunities greatly affect the pursuit of security objectives and the kinds of policies that states implement to cope with security challenges in a deeply interconnected world. This course analyzes the economic underpinnings of military power and international security. It also examines the economic aspects of non-traditional (which tend to be transnational) security threats whose spread and impact have been amplified by the process of globalization. In essence, this course takes issue with the outdated distinction between "high politics" (security affairs) and "low politics" (economics) and explores ways to foster engagement and bridge the gap between security studies and international political economy.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Directed Study (one-to-one),Asynchronous Instruction

SECR 6916 - The Causes and Prevention of War (3 Credit Hours)

This course familiarizes students with theoretical approaches to understanding what causes war. It also examines American Grand Strategy and policy. It highlights the differences between the cold-war era international security conditions for war and the pre-and post-9/11 conditions. This course focuses on the meta- or grand theories of war. It offers case studies of US wars, including the War on Terror, focusing specifically on Iraq and Afghanistan. It also introduces students to theories of conflict prevention and conflict maintenance.

Prerequisite(s): SECR 6911 >= C

Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Seminar **Schedule Type (Additional):** Small Group,Asynchronous Instruction

SECR 6917 - Democracy and Conflict (3 Credit Hours)

This course is designed to introduce students to the study of regime type and conflict. The course will focus on the democratization process and how different types of government (i.e., democratic, authoritarian, and mixed regime) influence conflict. The first half of the course will focus on factors that affect democratic transitions and democratic consolidations within states. The second half of the course will focus on how regime type influences various forms of conflict including: interstate conflict, intrastate conflict, and terrorism. By the end of the course students will have a better understanding of the factors that influence the democratization process as well as how regime type affects conflict.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Directed Study (one-to-one),Asynchronous Instruction

SECR 6918 - Stability and Peacekeeping Operations (3 Credit Hours)

This 3-hour course provides a broad overview of humanitarian relief, peace keeping, and other types of regional "interventions" generally referred to as "stability operations". Stability operations are designed to prevent, contain, and/or resolve regional conflicts. As such, this course examines the concepts of nation building, stabilization, reconstruction, and transition across the spectrum of peace

operations. It also analyzes the role of various actors, to include governmental and non-governmental organizations, inter-governmental organizations, and private military companies, and how they interact in the stabilization mission and environment.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Directed Study (one-to-one),Asynchronous Instruction

SECR 6919 - The Psychology of Terrorism (3 Credit Hours)

This course is designed to introduce students to the study of the psychology of terrorism. The course will focus on the underlying psychological/sociological/political factors that influence terrorism. The course will examine both the micro and macro level psychological/sociological/political factors that influence terrorist activity carried out by individuals and groups. Specific questions the course will address are: what factors and/or circumstances influence terrorist activity; what macro level factors (i.e., societal, economic, political) affect terrorism; what actions and/or policies can be constructed to help mitigate terrorist activity from a political/sociological/psychological perspective? The overall aim of the course is to better understand the myriad of psychological/sociological/political factors that contribute to terrorist activity.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Directed Study (one-to-one),Asynchronous Instruction

SECR 6920 - Weaponizing Information: The History and Theory of Propaganda (3 Credit Hours)

Examines the different historical and current definitions of propaganda. Students become acquainted with different theories of persuasion that underpin the work of propagandists, and they also understand the proper use and role of propaganda in a free society as well as the legal regulation of speech/actions that could be classified as propaganda. Additionally, students understand the roles of communication professionals who create propaganda and those who expose it. Cases will focus on information campaigns against the United States; how the U.S. has used propaganda against its strategic adversaries; and how propaganda and information campaigns have been updated and implemented within the social media battlespace.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SECR 6950 - Selected Topics in Intelligence and Security Studies (3 Credit Hours)

This is the SELECTED TOPICS CLASS for the MA in Intelligence and Security Studies (MAISS). Subject and course content will vary.

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Seminar **Schedule Type (Additional):** Small Group,Asynchronous Instruction

SECR 6980 - Introduction to Cyber Intelligence and Cybersecurity Policy (3 Credit Hours)

Introduction to the fascinating world of strategic cybersecurity and covers topics as diverse as cyber war, hacktivism, big data, cyber-crime, and threats to critical infrastructure. Also explores common vulnerabilities of the internet, as well as the legal and ethical concerns relating to issues of privacy and government surveillance of the internet.

Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Seminar **Schedule Type (Additional):** Small Group,Asynchronous Instruction

SECR 6981 - Cyber Conflict: History and Theory of Cyber War (3 Credit Hours)

This course introduces students to some of the major cyber conflicts and attacks that have transpired since the dawn of the "internet age," to include a discussion of the geo-political developments leading up to each. We will also discuss various theoretical problems with defining "cyber warfare" and how various strategic theorists approach the topic. Finally, we will discuss the possible future developmental trajectories of cyber capabilities as they relate to the conduct of warfare, as well as an overview of the problems with cyber deterrence.

Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Seminar **Schedule Type (Additional):** Small Group, Asynchronous Instruction

SECR 6982 - Information Warfare (3 Credit Hours)

This 3-hour course is a broad overview of information warfare. The course will cover the historical evolution of information warfare and highlight several historical and contemporary examples of information operations in conflict. The course will also highlight several foundational topics relevant to the study of information warfare, to include: social influence and persuasion, propaganda, and the information approaches used by our strategic adversaries

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Directed Study (one-to-one), Asynchronous Instruction

SECR 6983 - Hybrid Warfare (3 Credit Hours)

This 3-hour course introduces students to the topic of hybrid warfare. The course will focus on multiple aspects of hybrid warfare. The first part of the course will focus on defining and conceptualizing hybrid warfare. The second part of the course will focus on offensive and defensive cyber operations. The third part of the course will focus on offensive and defensive kinetic operations. The fourth part of the course will examine real-world and theoretical examples of hybrid warfare. The last part of the course will focus on the security implications of hybrid warfare and how to provide appropriate defenses given the nature of hybrid warfare.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group, Asynchronous Instruction

SECR 6997 - Capstone (0 to 6 Credit Hours)

This course allows students to complete a director-approved major project or culminating experience in which they reflect on and apply their previous studies to advance their understanding of intelligence or security studies.

Contact Hours: 0 to 6

Repeatability: May be repeated for credit one time.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: 1MA-INSC-MA Intelligence & Sec. Studies

Schedule Type (Primary): Asynchronous Instruction **Schedule Type (Additional):** Thesis

SECR 6998 - Thesis I (3 Credit Hours)

This course is required for MAISS students who elect to complete a thesis. It provides students an opportunity to work with a mentor to develop an original project through research and to assemble those findings in a prospectus that demonstrates the project's merit for fuller exploration. This course requires individual effort that is overseen by the course instructor, your research mentor. Weekly or bi-weekly meetings, either in person or online, will be held to discuss progress and review submitted documents. Once the preliminary research and analysis are completed, the prospectus will be written iteratively until it is ready to be submitted for a defense. Successful completion of this course requires successful completion of the defense.

Contact Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Asynchronous Instruction **Schedule Type (Additional):** Thesis

SECR 6999 - Thesis II (3 Credit Hours)

This course is required for MAISS students who elect to complete a thesis. It provides students an opportunity to conduct research to develop an approved prospectus into a substantive paper that demonstrates insightful analysis of existing or original data in order to advance the current understanding of an intelligence or security studies issue. This course requires individual effort that is overseen by the course instructor, your research mentor. Weekly or bi-weekly meetings, either in person or online, will be held to discuss progress and review submitted documents. Once the research and necessary analysis and results compilation are completed, individual thesis sections will be written and revised iteratively until we both agree that the document is ready for submission to the thesis committee. If the committee agrees, then a defense of the thesis will be held. Upon successful completion of the defense, the manuscript will be revised a final time and once approved, officially submitted for final processing.

Prerequisite(s): SECR 6998 >= S

Contact Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Asynchronous Instruction **Schedule Type (Additional):** Thesis

SECR 7000 - Directed Readings in Intelligence and Security Studies (0 to 6 Credit Hours)

This is the DIRECTED READINGS COURSE for the MA in Intelligence and Security Studies (MAISS). It is meant as an independent study course or research course for students.

Contact Hours: 0 to 6

Repeatability: May be repeated for credit up to six times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Directed Study (one-to-one)

SECR 7101 - U.S. Grand Strategy and Foreign Policy (3 Credit Hours)

Examines the U.S.'s overall grand strategy and foreign policy within the context of international relations and security studies. The first part of the course focuses on defining grand strategy and foreign policy. The second part of the course considers how states develop their grand strategies and foreign policies. The third part of the course analyzes the U.S.'s grand strategy and foreign policy and how they have evolved over time. The fourth part of the course focuses on the historical, political, economic, and social factors that have shaped the U.S.'s grand strategy and foreign policy. The last part of the course considers the national and international security implications of the U.S.'s grand strategy and foreign policy.

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3

Grade Mode: Normal (A, B, C, D, F)

Degree Restrictions: Doctor of Philosophy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar Small Group

SECR 7102 - Homeland Defense and Security (3 Credit Hours)

Examines the foundational elements of homeland defense and security. The first part of the course focuses on defining homeland defense. The second part of the course examines the government bureaucracy involved in providing for homeland defense. Here, the course analyzes how the U.S. system of federalism affects homeland defense. In addition, this section examines the nature and functions of different state, local, and federal agencies as it relates to homeland defense. The next part of the course analyzes specific threats (foreign and domestic) to homeland defense. Lastly, the course examines strategies to protect against threats to homeland defense.

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3

Grade Mode: Normal (A, B, C, D, F)

Degree Restrictions: Doctor of Philosophy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar Small Group

SECR 7103 - International Terrorism (3 Credit Hours)

An overview of why some political movements decide to use terrorism as a strategy. It covers the causes, the conduct, as well as the consequences of terrorism in different parts of the world. In the process, the course addresses the theories used to study terrorism as well as the measures used to counter terrorism. The objective of the course is for students to acquire the tools and techniques needed to engage in a critical analysis of the conflicts which seed terrorism.

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3
Grade Mode: Normal (A, B, C, D, F)
Degree Restrictions: Doctor of Philosophy
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar Small Group

SECR 7104 - Domestic Terrorism (3 Credit Hours)

Examines the factors associated with domestic terrorism and strategies to counter domestic terrorism. The first part of the course focuses on defining domestic terrorism. The second part of the course analyzes the political, economic, social, and technological factors associated with domestic terrorism. The third part of the course focuses on strategies to combat domestic terrorism.

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3
Grade Mode: Normal (A, B, C, D, F)
Degree Restrictions: Doctor of Philosophy
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar Small Group

SECR 7105 - Advanced Counterterrorism Strategies (3 Credit Hours)

Examines strategies to counter domestic and transnational terrorism. The first part of the course focuses on defining terrorism and counterterrorism. The second part of the course examines the different types of terrorism and motivating factors for terrorist attacks. The third part of the course analyzes the strategies to counter the different types of terrorism. Finally, this course applies counterterrorism strategies to the United States' national security to see what strategies work best in different contexts and scenarios.

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3
Grade Mode: Normal (A, B, C, D, F)
Degree Restrictions: Doctor of Philosophy
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar Small Group

SECR 7106 - International Conflict and Security (3 Credit Hours)

Analyzes the main theories that are used to explain the causes of international conflict. The course focuses on the classical manuscripts in the literature, and then demonstrates how the field has developed. Specifically, this course focuses on realism, with some emphasis on liberalism and constructivism. Additionally, students learn some game-theoretic models of warfare and get exposure to the most explanatory concepts for international conflict, including offense-defense balance, the security dilemma, deterrence, first-strike advantage, and windows of opportunity and vulnerability, arms control, and deterrence. Students are also introduced to how intelligence techniques work during international conflict, as well as an overview of the information and cyber domains. Finally, students are expected to integrate these theories into U.S. national security policy and doctrine.

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3
Grade Mode: Normal (A, B, C, D, F)
Degree Restrictions: Doctor of Philosophy
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar Small Group

SECR 7107 - Nationalism and Ethnic Conflict (3 Credit Hours)

Introduction to the role played by nationalism and ethnic identity in international security. The course examines theories, analyzes case studies, and provides an overview of why these two forces are at the heart of some of the most intractable conflicts in the world. The course also examines the consequences of nationalist ideology and ethnic violence on states and the measures used by governments to offset the threat. The objective of the course is for students to acquire the tools and techniques needed to engage in a critical analysis of nationalism and ethnic identity in order to understand the part they play in generating conflict on the global stage.

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3
Grade Mode: Normal (A, B, C, D, F)
Degree Restrictions: Doctor of Philosophy
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar Small Group

SECR 7108 - Technology, Artificial Intelligence, and International Security (3 Credit Hours)

Examines how evolving technologies, including artificial intelligence, affect domestic and international security. The first part of the course focuses on defining and conceptualizing evolving technologies and artificial intelligence. The second part of the course analyzes how evolving technologies and artificial intelligence can affect domestic stability and security. The third part of the course examines how

evolving technologies and artificial intelligence are being incorporated in the areas of defense and information warfare. The fourth part of the course focuses on how evolving technology and artificial intelligence affect the international balance of power between states and global security. The last part of the course considers future directions regarding the effects evolving technology and artificial intelligence can have on stability, international competition, and domestic and global security.

Lecture Hours: 3 Lab Hours: 0 Other Hours: 0 Contact Hours: 3

Grade Mode: Normal (A, B, C, D, F)

Degree Restrictions: Doctor of Philosophy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar Small Group

SECR 7109 - Foreign Policy Analysis (3 Credit Hours)

This course offers a rigorous and interdisciplinary examination of the formulation, execution, and consequences of U.S. foreign policy. The course is designed to equip students with the theoretical, methodological, and empirical tools necessary to critically analyze how the United States engages with the world across diplomatic, military, economic, and ideological dimensions. Students will explore the historical evolution of U.S. foreign policy, the strategic logic underpinning key decisions, and the institutional and political processes that shape policy outcomes. The course emphasizes the interplay between domestic politics and international pressures, the role of individual decision-makers and bureaucratic actors, and the influence of ideas, identity, and norms in shaping American global behavior. Special attention is given to the national security implications of U.S. foreign policy, including how the United States responds to emerging threats, manages alliances, engages in great power competition, and navigates global governance structures.

Lecture Hours: 3 Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Program Restrictions: DPHIL_IDCP - DPHIL-Intell, Def, & Cyber Pol

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SECR 7150 - Current Topics in Security Studies (3 Credit Hours)

This is a special topic subject for the PhD program where a professor may teach a specific, time-sensitive subject for a course that is not regularly offered or on record. The subject, topics, and readings would differ depending on the professor, issue, and semester taught.

Repeatability: May be repeated for credit one time.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

SECR 7200 - U.S. Intelligence Theory and Practice (3 Credit Hours)

Examines the U.S. Intelligence Community and its role in national security. It analyzes the intelligence cycle and critiques to the U.S. cycle. Students are introduced to intelligence theory and practice overall, and how the U.S. utilizes intelligence within its national security apparatus. Furthermore, there is comparative analysis with other nation-state intelligence systems. It also compares the organization and activities of foreign intelligence agencies with the U.S. model. The course provides students with an overview of the United States Intelligence Community (IC), its significant role within the U.S. government, and how intelligence informs and shapes U.S. policy. Students are also expected to understand the role of the analyst in the policy-making process. Importantly, students are exposed to intelligence theory within the academic literature.

Lecture Hours: 3 Lab Hours: 0 Other Hours: 0 Contact Hours: 3

Grade Mode: Normal (A, B, C, D, F)

Degree Restrictions: Doctor of Philosophy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar Small Group

SECR 7201 - Intelligence Analysis (3 Credit Hours)

This course in advanced intelligence analysis is designed to deepen students' understanding and application of advanced intelligence analysis techniques. Utilizing structured analytic techniques, this course guides students through the complex landscape of intelligence analysis, blending theoretical knowledge with practical case studies. The course begins with an exploration of the foundational concepts of intelligence analysis, including its history, purpose, and the role it plays in national security and decision-making processes. Students then delve into a variety of structured analytical techniques, learning how to apply these methods to enhance the accuracy and reliability of their analyses.

Lecture Hours: 3 Lab Hours: 0 Other Hours: 0 Contact Hours: 3

Grade Mode: Normal (A, B, C, D, F)

Degree Restrictions: Doctor of Philosophy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar Small Group

SECR 7202 - Advanced Intelligence Analysis (3 Credit Hours)

This is the second course in intelligence analysis designed to deepen students' understanding and application of advanced intelligence analysis techniques. Utilizing structured analytic techniques, this course deepens students' knowledge and understanding of intelligence analysis, blending theoretical knowledge with practical case studies. The course teaches and utilizes more advanced structured analytic techniques (SATs), and the student is expected to demonstrate mastery over SATs by the end. The course deepens students' expertise in intelligence analysis, emphasizing strategic applications and critical thinking. It continues to explore complex intelligence challenges, focusing on sophisticated analytical techniques, strategic-level analysis, and foresight. Students engage in scenario planning and learn to anticipate future threats and opportunities. Through rigorous case studies and collaborative projects, the course hones their skills in independent thinking, problem solving, and decision making, preparing them for senior roles in intelligence, policy analysis, and national security.

Prerequisite(s): SECR 7201

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3

Grade Mode: Normal (A, B, C, D, F)

Degree Restrictions: Doctor of Philosophy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar Small Group

SECR 7203 - Advanced Intelligence - Theory and Policy (3 Credit Hours)

An advanced research-based exploration of the theory and policy associated with the development of the U.S. Intelligence Community, intelligence collection, operations, intelligence analysis, and other important policy considerations within the context of global security challenges. Students engage with complex case studies, current methodologies in intelligence analysis, and the evolving landscape of intelligence operations in the digital era. The course also examines ethical considerations, legal frameworks, and the role of intelligence in democratic societies. Through a blend of lectures and online exercises, students gain comprehensive insights into the higher-level functioning of intelligence agencies and their role in national and international security.

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SECR 7204 - Legal and Ethical Issues In Intelligence Policy (3 Credit Hours)

This course provides an in-depth examination of the legal frameworks and ethical considerations that shape intelligence policy and practice in democratic societies. Students will explore the constitutional, statutory, and regulatory foundations governing intelligence activities, including surveillance, covert operations, and information sharing. Emphasis will be placed on the balance between national security imperatives and the protection of civil liberties, privacy rights, and democratic accountability. The course will address contemporary challenges such as cyber intelligence, the role of artificial intelligence in surveillance, whistleblower protections, and the oversight mechanisms that ensure transparency and legality in intelligence operations. By the end of the course, students will be equipped to critically assess the ethical dimensions of intelligence policy and contribute to informed policymaking in the field.

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Program Restrictions: DPHIL_IDCP - DPHIL-Intell, Def, & Cyber Pol

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SECR 7205 - Social Media Intelligence (3 Credit Hours)

The course explains the role social media intelligence (SOCMINT) plays within the Intelligence Community. It is not a technical course, though there will be some introductory materials towards technical intelligence collection. It is meant to explore how SOCMINT is used as a part of open-source intelligence collection. The course also examines the role SOCMINT plays within the different intelligence components of the United States Intelligence Community (USIC). The influx of technology, especially artificial intelligence, is also explained in relationship to social media analysis. Finally, privacy concerns, ethics, norms, and national laws are explored in relation to SOCMINT.

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3
Grade Mode: Normal (A, B, C, D, F)
Degree Restrictions: Doctor of Philosophy
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar Small Group

SECR 7206 - Counterintelligence: Theory and Practice (3 Credit Hours)

This course delves into the intricate world of counterintelligence, offering a balanced mix of theoretical foundations and practical applications. Designed for advanced students who are keen on exploring the depths of counterintelligence strategies and operations, this course is a journey through the multifaceted challenges and ethical considerations inherent in the field. Some of the topics to be explored include the fundamentals and challenges of counterintelligence, counterintelligence theory and planning, and offensive and defensive counterintelligence operations.

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3
Grade Mode: Normal (A, B, C, D, F)
Degree Restrictions: Doctor of Philosophy
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar Small Group

SECR 7208 - Strategic Intelligence (3 Credit Hours)

This course explores the importance of strategic intelligence, offering students an in-depth understanding of its principles, methodologies, and real-world applications. Aimed at those interested in the fields of intelligence and national security, global policy, and international affairs, the course explores the crucial role of strategic intelligence in gaining decision advantage and shaping government policies (e.g., economic, military, foreign policy) on a global scale. A significant focus is on the pivotal role of strategic intelligence in strategic decision making, emphasizing how it guides leaders in navigating complex geopolitical landscapes and making critical decisions with long-term implications.

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3
Grade Mode: Normal (A, B, C, D, F)
Degree Restrictions: Doctor of Philosophy
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar Small Group

SECR 7209 - Public Health Intelligence (3 Credit Hours)

This course explores the strategic role of public health intelligence in safeguarding population health and informing evidence-based policy and emergency response. Students will examine the systems, tools, and methodologies used to collect, analyze, and disseminate health-related data for decision-making at local, national, and global levels. Emphasis will be placed on the integration of epidemiological surveillance, biosurveillance, and health informatics to detect and respond to emerging threats, including pandemics, bioterrorism, and environmental hazards. The course also introduces the concept of medical intelligence, a specialized domain within public health intelligence that involves the collection and analysis of health-related information by national security and defense agencies to assess risks to military and civilian populations. Students will develop the skills to critically evaluate intelligence products, assess data quality and ethical considerations, and contribute to the design of resilient public health intelligence systems.

Lecture Hours: 3 **Contact Hours:** 3
Repeatability: May not be repeated for credit.
Grade Mode: Normal (A, B, C, D, F)
Program Restrictions: DPHIL_IDCP - DPHIL-Intell, Def, & Cyber Pol
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SECR 7210 - Emerging Technology, Artificial Intelligence, and Intelligence Analysis (3 Credit Hours)

This graduate-level course explores the intersection of emerging technologies—particularly artificial intelligence—and the evolving mission of the U.S. Intelligence Community (USIC). Students will critically examine how AI and related innovations are transforming intelligence collection, analysis, and decision-making. The course delves into the strategic, operational, ethical, and policy dimensions of technological integration within the IC, while also addressing the challenges posed by adversarial use of these technologies. Students will gain a comprehensive understanding of how the IC is adapting to a rapidly shifting technological landscape and what this means for the future of national security.

Lecture Hours: 3 **Contact Hours:** 3
Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Program Restrictions: DPHIL_IDCP - DPHIL-Intell, Def, & Cyber Pol

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SECR 7211 - Psychology of Intelligence Analysis (3 Credit Hours)

This course explores the psychological foundations and cognitive processes that underpin intelligence analysis. Students will examine how human cognition—particularly perception, memory, reasoning, and decision-making—affects the interpretation and evaluation of intelligence data. Emphasis is placed on understanding cognitive biases, ethics, heuristics, and the psychological dynamics of analytical teams and organizations. Students will learn to identify and mitigate common analytical pitfalls, enhance critical thinking, and apply psychological principles to improve the accuracy and reliability of intelligence assessments. The course also addresses the role of stress, emotion, and organizational culture in shaping analytical outcomes.

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Program Restrictions: DPHIL_IDCP - DPHIL-Intell, Def, & Cyber Pol

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SECR 7300 - Theories of Cyberwar (3 Credit Hours)

Explains the different theories about cyberwar, including the debate on whether such a concept should even exist. Thus, the first part of this course discusses in detail the conceptualization of cyberwar. The course then pursues several schools of thought on the causes and consequences of cyberwar, including the cybersecurity dilemma, the cyber offense-defense balance, and democratic peace theory and cyberconflict, and cyber-deterrence. Additionally, students are exposed how theory differs from practice in the cyber domain. In other words, how does military doctrine differentiate theories of cyberwar from academic disciplines? Throughout the course, students are also exposed to technical papers, cyberwar through information operations, as well as cyber intelligence and policy.

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3

Grade Mode: Normal (A, B, C, D, F)

Degree Restrictions: Doctor of Philosophy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar Small Group

SECR 7301 - U.S. Cyber Strategy and Policy (3 Credit Hours)

This course is the primary policy course for strategic cybersecurity studies. It is designed to analyze the U.S. cyber strategies of different agencies and departments. Specifically, it analyzes The National Security Strategy as it pertains to cyber and influence operations; The Department of Defense cyber strategy; The Department of Homeland Security cyber strategy and several other major defense related departments. Additionally, the Armed Services military doctrines on cyber policy are illustrated, including the relevant US doctrine on information warfare. Finally, academic analysis covering the doctrines of defend forward, persistent engagement, and the U.S.' approach to influence operations are discussed.

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3

Dual Enrollment Status: No, this course should not be submitted for dual enrollment approval.

Grade Mode: Normal (A, B, C, D, F)

Degree Restrictions: Doctor of Philosophy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar Small Group

SECR 7302 - Comparative Cyber Policy: NATO (3 Credit Hours)

An in-depth exploration of cyber policy across NATO member countries, examining the similarities, differences, and collaborative efforts in their cyber strategies, legislations, and defense mechanisms. Students analyze how these nations address cyber threats, protect critical infrastructure, and cooperate within the NATO framework. The course also delves into the geopolitical implications of cyber policies, their impact on international relations, and the future of collective digital defense strategies in the context of NATO.

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3

Grade Mode: Normal (A, B, C, D, F)

Degree Restrictions: Doctor of Philosophy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar Small Group

SECR 7303 - Comparative Cyber Policy: U.S. Adversaries (3 Credit Hours)

A comprehensive exploration of the cyber policies and strategies of key strategic adversaries of the United States: Russia, China, Iran, North Korea, and various non-state terrorist and criminal actors. Designed for advanced students specializing in intelligence, international relations, and national security, this course delves into the complex and nuanced world of global cyber conflict and competition. Throughout the course, students critically examine and compare the cyber strategies of these adversaries. They explore the unique historical, cultural, and political contexts that shape each actor's approach to cyber operations. The course covers a range of topics, including state-sponsored cyber espionage, cyber warfare tactics, information warfare, and the use of cyber capabilities by non-state actors for terrorism and criminal activities.

Lecture Hours: 3 Lab Hours: 0 Other Hours: 0 Contact Hours: 3

Grade Mode: Normal (A, B, C, D, F)

Degree Restrictions: Doctor of Philosophy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar Small Group

SECR 7304 - Cyber Intelligence: Policy and Theory (3 Credit Hours)

A comprehensive and in-depth exploration of cyber intelligence, focusing on the identification and analysis of threat actors, the strategies and complexities of cyber deterrence, and the challenges of cyber attribution. Designed for advanced students who are aiming to become experts in the field of cybersecurity and intelligence, this course equips them with the policy and theoretical knowledge and skills necessary to navigate the sophisticated landscape of contemporary cyber threats. The course analyzes the international order concerning cyber intelligence, and places the global realm within the context of U.S. national security.

Lecture Hours: 3 Lab Hours: 0 Other Hours: 0 Contact Hours: 3

Grade Mode: Normal (A, B, C, D, F)

Degree Restrictions: Doctor of Philosophy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar Small Group

SECR 7305 - Information Operations and Warfare (3 Credit Hours)

This course analyzes information warfare and information operations from theory to practice. It starts with a introduction to information warfare (IW) and then moves directly into influence operations. Close attention is paid to all aspects of IW, but especially social media operations, cyber-enabled influence operations, command and control operations, and electronic warfare. Special emphasis is placed upon how IW fits within kinetic conflict, the connection between intelligence and influence operations, and IW's connection to cyber operations. Finally, this course examines U.S. policy and doctrine according to the literature and juxtaposed to U.S. adversaries, especially China and Russia.

Lecture Hours: 3 Lab Hours: 0 Other Hours: 0 Contact Hours: 3

Grade Mode: Normal (A, B, C, D, F)

Degree Restrictions: Doctor of Philosophy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar Small Group

SECR 7306 - Cyberterrorism and Cybercrime (3 Credit Hours)

This course provides a comprehensive examination of the threats posed by cyberterrorism and cybercrime within the broader context of U.S. and global security. Students will explore the convergence of digital technologies with criminal and terrorist activities, analyzing how these actors exploit cyberspace to disrupt critical infrastructure, undermine public trust, and challenge national sovereignty. The course integrates legal, ethical, operational, and strategic perspectives to prepare students for roles in cybersecurity policy, intelligence, law enforcement, and national defense.

Lecture Hours: 3 Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Program Restrictions: DPHIL_IDCP - DPHIL-Intell, Def, & Cyber Pol

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SECR 7307 - Legal and Ethical Issues in Cybersecurity Policy (3 Credit Hours)

This course provides an in-depth examination of the legal frameworks, ethical principles, and policy challenges that shape cybersecurity governance in the public and private sectors. Students will explore the intersection of law, technology, and ethics in the context of digital security, privacy, surveillance, and cybercrime. Special attention is given to the national security implications of cybersecurity policy, including the legal authorities and ethical boundaries that guide U.S. defense, intelligence, and homeland security operations in cyberspace.

Lecture Hours: 3 Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Program Restrictions: DPHIL_IDCP - DPHIL-Intell, Def, & Cyber Pol

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SECR 7308 - The Psychology of Cyberspace (3 Credit Hours)

Cyber-psychology studies the way people interact with technology and how technological tools effect the way people feel, think, and behave both online and offline. This course introduces theories of psychology and particularly cyber-psychology to help students gain a comprehensive understanding of the dynamics between human cognition and cyberspace. Topics include: political persuasion, associative learning, social engineering, social media, cybersecurity, political activism, and more. Also discussed are how human perception, learning, emotion, motivation, and belief systems are prone to online manipulation and what the implications are when it comes to social-political behaviors. Lastly, the course explores how state actors and non-state actors may take advantages of cyberspace to manipulate cognition, shape perceptions, and direct behaviors of their targeted audience.

Lecture Hours: 3 Lab Hours: 0 Other Hours: 0 Contact Hours: 3

Grade Mode: Normal (A, B, C, D, F)

Degree Restrictions: Doctor of Philosophy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar Small Group

SECR 7309 - Social Media Psychology and Propaganda Operations (3 Credit Hours)

Introduction to the theory and practice of propaganda operations with an emphasis on the role of new technology such as social media and the internet in propaganda and persuasion. The course examines propaganda operations on social media through different theoretical perspectives, including political psychology, political communication, political persuasion, and political behavior. Students are acquainted with both classic and frontier research on how propaganda interacts with information technology, war, political violence, and political campaign. Further discussed is how social media may influence individual behavior through the lens of social-political psychology. Additionally, cases on propaganda operations on social media include American presidential election campaign; information campaign between the United States and Russia; propaganda as a tool to manipulate public opinion in China, Russia, the United States, and other countries; terrorist group and other non-state actors' use of propaganda, and more.

Lecture Hours: 3 Lab Hours: 0 Other Hours: 0 Contact Hours: 3

Grade Mode: Normal (A, B, C, D, F)

Degree Restrictions: Doctor of Philosophy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar Small Group

SECR 7310 - Digital Surveillance and Control (3 Credit Hours)

This doctoral seminar provides a broad overview of how information technologies are transforming state surveillance and control worldwide. It addresses a wide range of policy-relevant issues, including but not limited to, the ways in which democracies and nondemocracies surveil their citizens in the age of new technologies, the role of big tech companies in digital control, strategies that users can adopt to resist digital surveillance, and gaps in current policy and legal frameworks. By the end of the course, students are expected to have developed the theoretical and analytical skills necessary to evaluate digital surveillance and control techniques in detail.

Lecture Hours: 3 Lab Hours: 0 Other Hours: 0 Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Program Restrictions: DPHIL_IDCP - DPHIL-Intell, Def, & Cyber Pol

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SECR 7601 - Introduction to Statistical Analysis for Security Studies (3 Credit Hours)

Introduction to the foundational statistical analysis techniques for security studies. The first part of the course focuses on the importance and relevance of statistical analysis techniques for security studies. The second part of the course examines descriptive statistical analysis techniques. The next part of the course covers hypothesis testing and correlation and regression analysis. Then the course examines maximum likelihood estimation techniques. The last part of the course focuses on applying statistical analysis techniques to security studies data.

Lecture Hours: 3 Lab Hours: 0 Other Hours: 0 Contact Hours: 3

Grade Mode: Normal (A, B, C, D, F)

Degree Restrictions: Doctor of Philosophy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar Small Group

SECR 7602 - Introduction to Qualitative Methods: Process-Tracing and Case-Study Analysis (3 Credit Hours)

This course offers a graduate-level exploration of qualitative research methods in security studies, focusing on case studies and process tracing. Students engage in theoretical and practical applications of these methods, learning to design related research, analyze related data, and apply their findings to real-world security scenarios. Specifically, it focuses on case studies – in-depth examinations of single instances or events and their contexts – and process tracing – investigations of causal mechanisms behind sequences of events or actions that lead to a particular outcome in a specific case. Both methods are particularly valuable for understanding complex security issues and strategic outcomes. The course explores theoretical underpinnings, methodological approaches, and practical applications of these methods. Students learn when and how to effectively use case studies and process tracing, addressing issues of designing research, collecting and analyzing data, and reporting findings. The course focuses on theoretical knowledge as well as hands-on experience, enabling students to apply these methods to real-world security scenarios.

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3

Grade Mode: Normal (A, B, C, D, F)

Degree Restrictions: Doctor of Philosophy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar Small Group

SECR 7603 - Advanced Statistical Analysis for Security Studies (3 Credit Hours)

Introduction to advanced statistical analysis for security studies. The course equips students with competence and practical expertise in advanced statistical analysis, specifically tailored for applications in security studies. The course is structured into two primary parts: the first focuses on advanced multivariate regression techniques, while the second examines a range of complementary statistical methods frequently employed in high-level quantitative analysis.

Prerequisite(s): SECR 7601

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3

Grade Mode: Normal (A, B, C, D, F)

Degree Restrictions: Doctor of Philosophy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar Small Group

SECR 7604 - Machine Learning and Security Analysis (3 Credit Hours)

Introduction to various machine learning models, providing an overview of many concepts, techniques, and algorithms, as well as demonstrating how these models can be applied to social science research and particularly security studies. This course starts with introducing important machine learning concepts such as classification, regression, overfitting, boosting, clustering, and more. Then the course investigates supervised learning algorithms that are commonly used in academia and industries such as decision trees, random forest, K-nearest neighbor, support vector machines, and neural networks. Next the course focuses on unsupervised learning algorithms, including the K-means clustering algorithm, feature selection and transformation algorithms, and dimensionality-reduction algorithms. In addition, the course provides instructions on the use of Python language and opportunities for students to perform hands-on, self-directed machine learning projects. Finally, information theory and reinforcement learning are briefly discussed.

Prerequisite(s): SECR 7601 and SECR 7605 and SECR 7606

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3

Grade Mode: Normal (A, B, C, D, F)

Degree Restrictions: Doctor of Philosophy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar Small Group

SECR 7605 - Introduction to Data Analytics and Data Science (3 Credit Hours)

An introduction to data analytics and builds upon the introduction to statistics course. This course provides students with an understanding of some concepts that underline data analysis and familiarize students with some more advanced statistical techniques and math skills for social scientists. The course starts with essential notions of probability theory and statistics such as descriptive statistics, probability distributions, Bayes' Rule, and sampling distributions. It then introduces advanced concepts of quantitative

analysis such as point estimation, confidence intervals, hypothesis testing, causal inference, statistical significance, and data mining. Next, the course covers techniques in modern data analysis focusing on bivariate and multivariate ordinary least squares regressions and data visualization. Also discussed is how to deal with different types of variables and data generating process. These concepts are illustrated with applications drawn from frontier research. Additionally, predictive methods and forecasting are covered. Finally, instructions are provided on the use of R language and opportunities for students to perform hands-on, self-directed empirical analysis.

Prerequisite(s): SECR 7601 and SECR 7603

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3

Grade Mode: Normal (A, B, C, D, F)

Degree Restrictions: Doctor of Philosophy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar Small Group

SECR 7606 - Advanced Data Science (3 Credit Hours)

Introduces some advanced topics in statistical modeling and data science. The course covers a broad range of topics, starting from diagnostics and variations of the ordinary least-squares regressions such as non-normality, nonlinearity, nonconstant error variance, collinearity, and more. The course then proceeds to maximum likelihood estimations and related models such as the Logit regression and Probit regression. It further investigates time-series-cross-sectional data, multilevel models with random effects and fixed effects, and event-history modeling techniques. Finally, causal inference methods such as A/B testing, Difference-in-Difference estimation, and matching are discussed.

Prerequisite(s): SECR 7605

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3

Grade Mode: Normal (A, B, C, D, F)

Degree Restrictions: Doctor of Philosophy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar Small Group

SECR 7700 - Introduction to GIS for Security Studies (3 Credit Hours)

An introduction to Geographic Information Systems (GIS) and the application of GIS techniques in security studies. The course first introduces the basic GIS concepts and components, such as geographic coordinate systems, spatial features (location, size, and shape) and attributes, geocoding, georeferencing, and more. Then the course moves on to common spatial data models and basic data analysis, including vector data analysis and raster data analysis. Further, it examines map projections, spatial data manipulations, and data visualization. Also discussed is the application of GIS methods in frontier research in security studies and political science in general. This course also introduces software and necessary skills and techniques for students to conduct hands-on GIS analysis including ArcGIS and R. Students learn through both theories and skills-based GIS exercise.

Prerequisite(s): SECR 7601

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Degree Restrictions: Doctor of Philosophy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** 20- Seminar Small Group

SECR 7701 - Advanced GIS for Security Studies (3 Credit Hours)

An intermediate-level course of Geographic Information Systems (GIS) and spatial analysis, with a focus on the application in the field of intelligence and defense studies. The course examines spatial regressions and the implementation of spatial regressions in R. First discussed is spatial data transformation and spatial autocorrelation, as well as the general use of spatial econometrics in political science. Then spatial autoregression and explore spatial interdependence. Finally, the course incorporates time into the analysis and discuss spatial-temporal autoregressive models. The course also provides hands-on opportunities for students to carry out self-directed spatial analysis projects in R.

Prerequisite(s): SECR 7603 and SECR 7700

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Degree Restrictions: Doctor of Philosophy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar Small Group

SECR 7702 - Social Media Analysis (3 Credit Hours)

Introduction to various text analysis methods for students to research social media content. Both theoretical and applied realms of text analysis with a focus on the application of text analysis in frontier research in social media studies are discussed. The course first introduces various social media collection methods, such as the use of API and web scraping algorithms. Then it proceeds to the pre-processing and manipulation of social media data. Following are introduced various methods and algorithms for analyzing social media data, including text classification, clustering, topic modeling, sentimental analysis, and more. The course also discusses various tools for handling text data in different languages. Further, frontier social media research for students to better understand the application of text analysis in social sciences are explored. Instructions on the use of Python language and opportunities for students to perform hands-on, self-directed social media analysis projects are provided.

Prerequisite(s): SECR 7605 and SECR 7606

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Degree Restrictions: Doctor of Philosophy

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar Small Group

SECR 7990 - Advanced Research in Security Studies (3 Credit Hours)

This independent study course is designed for advanced graduate students seeking to engage in focused, self-directed research aligned with their dissertation interests. It provides a structured yet flexible framework for students to explore a specialized topic in depth, under the guidance of a faculty advisor. The primary objective is to guide students in working towards the development of a publishable scholarly paper, while also serving as a preparatory platform for comprehensive examinations and the formulation of a dissertation prospectus. Throughout the course, students will refine their research questions, conduct a thorough literature review, and apply appropriate theoretical and methodological approaches to their chosen topic. Emphasis is placed on academic writing, critical analysis, and the development of original arguments that contribute meaningfully to the field. This elective is particularly well-suited for students towards the later stages of their didactic coursework and may serve as a launching point for dissertation research.

Repeatability: May be repeated for credit one time.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Independent Study **Schedule Type (Additional):** Directed Study (one-to-one), Asynchronous Instruction

SECR 9900 - Integrated Research for Intelligence and Security Studies (3 Credit Hours)

This course allows students to demonstrate their understanding of the necessary information in security studies, which will help them pass the comprehensive exam. Students must outline and organize the major themes, theories, scholars, and texts covering their subfield to help them prepare for the comprehensive exam. As such, this course integrates the research from the courses completed through the students' dissertation process. Students are expected to take their comprehensive exam during this course. Students may repeat the course or retake the comprehensive exams in alignment with the Comprehensive Exam Policy. The exam will cover security studies in general and the student's specific area of emphasis.

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Independent Study **Schedule Type (Additional):** Directed Study (one-to-one), Asynchronous Instruction

SECR 9901 - Dissertation Prospectus (3 Credit Hours)

This research course guides students in writing their dissertation proposal/prospectus. The prospectus outlines the type of dissertation being pursued. The course supports students through key steps of writing and defending their prospectus, including developing their research design, selecting appropriate data and methods, conducting a literature review, and creating a dissertation calendar for submitting completed sections. This course may be taken more than once and culminates in the submission and defense of a prospectus for final approval by the student's advisory committee. Successfully completing the prospectus is one of the prerequisites for advancing to PhD candidacy.

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Directed Study (one-to-one) **Schedule Type (Additional):** Asynchronous Instruction

SECR 9902 - Dissertation Research (1 to 9 Credit Hours)

This course is the main dissertation research course in the PhD - IDCP program where students are guided in writing their complete dissertation. Students will be exploring the PhD dissertation manuscript requirements of The Graduate School and the PhD - IDCP

program. The course will guide the student through the process of dissertation completion dependent upon which specific dissertation format was chosen. This course entails guided research hours. It is understood that drafts are submitted regularly to the mentor and approved dissertation committee, and that there is a constant process of revisions and re-writes.

Prerequisite(s): SECR 9901

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Dissertation **Schedule Type (Additional):** Asynchronous Instruction

SECR 9903 - Defense Preparation and Presentation (3 Credit Hours)

This course marks the culmination of the doctoral journey, guiding PhD candidates through the final stages of their dissertation completion and defense. Students will refine their dissertation, create their presentation and prepare and deliver a formal oral defense of their dissertation. Students will prepare to demonstrate mastery of their field, discuss the significance of their research, and be able to respond to critical feedback in a scholarly and professional manner. Completion requires submission of the final approved dissertation and passing a formal defense as approved by the dissertation committee.

Pre- or Corequisite(s): SECR 9902

Repeatability: May be repeated for credit one time.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Dissertation **Schedule Type (Additional):** Asynchronous Instruction

SCCP 5601 - Senior Comprehensive Case Portfolio Series (1 Credit Hour)

Senior students will present comprehensive care patients they have completed.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Major Restrictions: Advanced Standing DMD

Schedule Type (Primary): Lecture

MPHS 8200 - Integration Social and Behavioral Theory into Public Health (3 Credit Hours)

Introduces students to the ecologic framework of health behavior by integrating perspectives from anthropology, sociology, and cognitive sciences. Uses a combination of lectures, readings, discussions, and small group exercises to support the premise that effective interventions consider health behaviors at multiple levels: macro level (socio-economic); mezzo level (social networks and social capital) and micro level (influences on rational decision-making).

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_AHSC, MPH_HINF, CERG_PHLT

Schedule Type (Primary): Asynchronous Instruction

MPHS 8300 - Social Determinants of Health and Health Disparities (3 Credit Hours)

The course provides students with a basic understanding of our society's most pervasive social disparities in health status and prepares students to evaluate underlying theories and promising interventions related to social determinants of health.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_AHSC, MPH_HINF, CERG_PHLT

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MPHS 8400 - Social Behavioral Change at Individual, Household, and Community Levels (3 Credit Hours)

Provides students with conceptual tools to analyze health-related behaviors and the social, cultural, and environmental context in which they occur. Applies concepts and theories drawn from medical anthropology, psychology, and sociology to programmatic examples

from Latin America, Africa, and Asia concerning care-seeking, treatment of sick children, voluntary counseling and testing, sexual risk behaviors, intimate partner violence, and other behavior change challenges in public health.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_AHSC, MPH_HINF, CERG_PHLT

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MPHS 8500 - Implementation and Sustainability of Community-Based Health Programs (3 Credit Hours)

Uses projects to describe the delivery process of sustainable activates and benefits of community-based disease prevention and health promotion. Also provides students with theories of innovation and organizational change and the relationships between investments in health and overall community development.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPH_HINF

Schedule Type (Primary): Lecture

MPHS 8600 - Research Design in Social and Behavioral Sciences (3 Credit Hours)

Offers an overview of major types of social sciences research design (experimental, quasi-experimental, observation). Discusses the ways in which each social science perspective shapes the conduct and results of research, compared to other disciplines in public health.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPH_HINF

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MPHS 8700 - Cancer Epidemiology (3 Credit Hours)

The goal of this course is to provide an overview of the important concepts and tools fundamental to the understanding, design, and conduct of cancer epidemiology studies. It will provide an overview of the biology of cancer, as well as the major epidemiologic concepts critical to cancer epidemiology. We will study many of the major cancer sites, including breast, lung, colon, prostate, cervix, and melanoma, reviewing descriptive data on incidence and mortality, risk factors, and methodological issues involved in studying these cancers. We will review several major risk factors for cancer, including tobacco, nutrition, infections, and environmental exposures.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_AHSC, MPH_HINF

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MPHS 8800 - Introduction to Cancer Prevention and Control (3 Credit Hours)

Cancer is the second leading cause of death in this country, making its prevention and control important in public health practice. This urgency is exacerbated by the existence of racial/ethnic disparities in cancer incidence, morbidity, and mortality. Using an integrative, collaborative, and translational approach, this course is designed to examine concepts, methods, issues, and applications related to cancer risk reduction. Students will gain access to broad perspective of scientific and public health practices. The spectrum of research and practices including diet and diet-related lifestyle factors (such as weigh and physical activity) and tobacco (including the prevention/cessation), will be studied in detail.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_AHSC, MPH_HINF

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MPHS 8900 - Prevention, Rehabilitation, and System Change among Incarcerated Adult Offenders (3 Credit Hours)

Describes the roles that which places incarceration on the public health agenda by using public health tools to address the epidemic of mass incarceration.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPH_HINF

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

MPHS 9000 - Public Health Issues in Juvenile Detention Centers (3 Credit Hours)

Provides a discussion on public health challenges for the growing number of teenagers incarcerated and addresses opportunities for public health intervention.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MPH_HINF

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous instruction

SOSC 3001 - Methods in Social Science (3 Credit Hours)

An introduction to the scientific method in social research, logic of scientific inquiry; principles of designing research, relationship between theory and research, logic of sampling, defining and measuring variables, and sampling. Other topics discussed include data collection, modes of observation (experiments, survey research, field research, evaluation research) and ethics in social research.

Prerequisite(s): POLS 2101 >= C or SOCI 1160 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group, Directed Study (one-to-one), Asynchronous Instruction

SOSC 3002 - Quantitative Analysis in Social Sciences (3 Credit Hours)

An introduction to the analysis of social data, including the quantification of data for computer application, use of SPSS (statistical package) for analyzing data, logic of statistical inference. Additional topics covered include statistical techniques for analyzing data, including univariate, bivariate, and multivariate social statistics, and the reporting of research findings.

Prerequisite(s): POLS 2101 >= C or SOCI 1160 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group, Directed Study (one-to-one), Asynchronous Instruction

SOSC 3003 - Qualitative Analysis in Social Sciences (3 Credit Hours)

An introduction to qualitative research methodologies including formulating viable research questions; various issues related to ethical conduct and validity when conducting fieldwork; data gathering techniques through participant observation, interviews, and focus groups; coding and analysis of data; and writing research findings.

Prerequisite(s): POLS 2101 >= C or SOCI 1160 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group, Directed Study (one-to-one), Asynchronous Instruction

SOSC 3950 - Selected Topics in Social Science (Variable Title) (0 to 6 Credit Hours)

A variable content course. Either 1) a faculty initiated course which allows students the opportunity to enroll in specifically titled courses, or 2) a student initiated directed study at an introductory level.

Prerequisite(s): CRJU 1103 >= C or POLS 2101 >= C or SOCI 1101 >= C or SOWK 1101 >= C

Lecture Hours: 0 to 6 **Contact Hours:** 0 to 6

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Directed Study (one-to-one), Asynchronous Instruction

SOSC 4950 - Selected Topics in Social Sciences (0 to 6 Credit Hours)

A variable content course. Either 1) a faculty initiated course which allows students the opportunity to enroll in specifically titled courses, or 2) a student initiated directed study.

Prerequisite(s): SOSC 3001 >= C

Lecture Hours: 0 to 6

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group, Directed Study (one-to-one), Asynchronous Instruction

SOSC 4960 - Social Science Undergraduate Internship (0 to 12 Credit Hours)

An internship is a form of experiential learning that integrates knowledge and theory learned in the classroom with practical application and skills development in a professional setting under the supervision of the university and the cooperating institution or agency.

Prerequisite(s): SOSC 3001 and permission of instructor. Must also be a junior or senior in good standing with the university. Specific agencies may employ their own screening and selection criteria in addition to those listed above. Completion of this course is dependent upon acceptance by the cooperating institution/agency.

Prerequisite(s): SOSC 3001 >= C

Contact Hours: 0 to 12

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior, Senior

Schedule Type (Primary): Internship/Practicum

SOWK 1101 - Introduction to Social Work Practices (3 Credit Hours)

Introduction to the discipline and professional social work and the programs and policies that social workers interface with regularly.

The course examines the knowledge base of the social work profession, typical areas where social workers practice, an introduction to social work theory, and discussion of the programs and policies for social welfare.

Core IMPACTS Requirement(s) Satisfied: Social Sciences (Social Sciences)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Asynchronous Instruction, Internship/Practicum, Thesis, Dissertation

SOWK 2100 - Social Welfare History and Philosophy (3 Credit Hours)

This course is designed as an introduction to the field of social welfare and its relationship to the profession of social work.

Prerequisite(s): SOWK 1101 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

SOWK 2102 - Fundamentals of Social Work Practice (3 Credit Hours)

This course provides students with the fundamental knowledge, skills and values necessary for generalist social work practice. The focus of the course includes both the acquisition of analytical knowledge and the attainment of core interpersonal and problem solving skills. Development of self awareness and self knowledge related to growth in these skills and a beginning identity as a social work professional will also be emphasized.

Prerequisite(s): SOWK 1101 >= B

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

SOWK 2950 - Selected Topics (1 to 3 Credit Hours)

A variable content course. Either 1) a faculty-initiated course which allows students the opportunity to enroll in specifically titled courses, or 2) a student-initiated directed study at an introductory level. Prerequisite(s): permission of instructor and contractual agreement with department chair. Only one 2950 course may be included in the major.

Prerequisite(s): SOWK 1101 >= D

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

SOWK 3300 - Human Behavior in the Social Environment I (3 Credit Hours)

A study from a multi-theoretical perspective of the interaction of cultural, biological, psychological, social, spiritual, and environmental influences and how they work to promote or deter the development of individuals from birth through adolescence. Attention is given to the range of social systems in which people live. The impact of social and economic forces, oppression, gender, age, and social class on human adaptation will be examined as they relate to human behavior and social work interventions.

Prerequisite(s): SOWK 2102 >= C

Corequisite(s): SOWK 3400

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Social Work

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

SOWK 3301 - Human Behavior in the Social Environment II (3 Credit Hours)

Human Behavior in the Social Environment II is the second semester of a two-part course designed to introduce the student to the theoretical models used by social workers in their understanding of human behavior. The course is taught using a multi-theoretical model, with an eco-systems perspective serving as an organizing framework.

Prerequisite(s): SOWK 3300 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

SOWK 3331 - Youth and Society (3 Credit Hours)

A study of the history of changing conceptions of childhood, the family, and childhood socialization; the invention of adolescence and the various attributions to childhood and adolescence; and a survey of major developmental schemes of adolescence with an emphasis on characteristics of American adolescence as conducive to delinquency.

Prerequisite(s): SOWK 1101 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

SOWK 3375 - Sociology of Death, Grief, and Caring (3 Credit Hours)

Examines the phenomenon of death as it relates to the social structure of selected cultures; the patterns of social interaction which surround and give meaning to various aspects of death, loss, grief, and caring; and the plans of action which individuals and societies develop to guide them as they confront death.

Prerequisite(s): (SOCL 1101 >= D or SOCL 1101H >= D) or (SOWK 1111 >= D or SOWK 1101 >= D) or (SOWK 2234 >= D)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SOWK 3400 - Social Work Practice I (3 Credit Hours)

Drawing on material from the Human Behavior in the Social Environment sequence, this course focuses on the impact of social and economic forces on individuals and social systems, and the ways in which systems promote or deter people in the maintenance or attainment of optimal health and well-being.

Prerequisite(s): SOWK 2102 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Social Work

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

SOWK 3401 - Generalist Practice in Groups (3 Credit Hours)

Expands the theoretical foundation and practice methodology for social work by focusing specifically on knowledge and skills to effect change in small groups.

Prerequisite(s): SOWK 3400 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

SOWK 3402 - Generalist Practice in Communities (3 Credit Hours)

Social work practice with neighborhoods, communities, and human service agencies; program planning, implementation, and evaluation; advocacy; and grant writing.

Prerequisite(s): SOWK 3400 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

SOWK 3500 - Social Welfare Policy (3 Credit Hours)

This course will help the BSW student gain the knowledge and skills needed to understand and influence social, economic, and political environments that affect the attainment of the client's goals.

Prerequisite(s): SOWK 2102 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Social Work

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SOWK 3501 - Child and Family Welfare (3 Credit Hours)

The welfare of both children and families is the focus of this course in which students use policy analysis skills and practice skills gained in prerequisite courses to analyze problems, issues, and policies specific to the area of child and family welfare.

Prerequisite(s): SOWK 3301 >= C and SOWK 3401 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

SOWK 3600 - Social Work Research I (3 Credit Hours)

Introduces students to how the research process enhances the knowledge base of social work. Students are introduced to the basic concepts and procedures of social work research and learn the quantitative and qualitative research approaches that are common to social work and the social sciences.

Prerequisite(s): SOWK 2102 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

SOWK 3601 - Social Work Research II (3 Credit Hours)

Builds on the knowledge and skills developed in SOWK 3600, by introducing students to issues of data collection for both quantitative and qualitative research methods. Students will be exposed to data analysis for both research methodologies. Research proposals and the dissemination of research findings through reports and publications are also covered.

Prerequisite(s): SOWK 3600 >= C and SOWK 3300 >= C and SOWK 3400 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

SOWK 3950 - Selected Topics (3 Credit Hours)

A variable content course. Either 1) a faculty initiated course which allows students the opportunity to enroll in specifically titled courses, or 2) a student initiated directed study at an introductory level. Prerequisite(s): Permission of instructor; and contractual agreement with department chair.

Prerequisite(s): SOCI 1160 >= C

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

SOWK 4421 - Gerontology (3 Credit Hours)

Examines the interaction between the social, physical, psychological, and programmatic aspects of aging. Emphasis is on programs, services, interactive techniques, legislation, and advocacy efforts which address the needs and concerns of older Americans, their family members, and service providers.

Prerequisite(s): SOWK 1111 >= D or SOWK 1101 >= D or SOCI 1101H >= D or SOWK 2234 >= D or SOCI 1101 >= D

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis

SOWK 4601 - Integrated Seminar I (3 Credit Hours)

This course is the first of two integrative seminars that students take in congruence with the field experience courses. The Integrative Seminar I focuses primarily on the value dimension of professional social work practice. Corequisite(s): SOWK 4701.

Prerequisite(s): SOWK 3301 >= C and SOWK 3401 >= C and SOWK 3601 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Social Work

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

SOWK 4602 - Integrative Seminar II (3 Credit Hours)

This course is the second of two integrative seminars that students take in congruence with the field experience courses. Integrative Seminar II focuses primarily on the application and integration of the systems perspective, with a focus on the agency setting in which the student is placed in the field experience. Corequisite(s): SOWK 4702.

Prerequisite(s): SOWK 4601 >= C and SOWK 4701 >= S

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Social Work

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

SOWK 4701 - Field Placement I (6 Credit Hours)

The first of a two-part internship designed to provide students opportunities to apply social work knowledge, values, and skills in a service delivery area, and supervised by a social worker. Students must complete 200 hours of field work for this course, which is arranged and monitored by the field coordinator. Prerequisite(s): 12 or more upper-level hours in SOWK.

Prerequisite(s): SOWK 3301 >= C and SOWK 3401 >= C and SOWK 3601 >= C

Lecture Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Major Restrictions: SOCW - Social Work

Schedule Type (Primary): Internship/Practicum **Schedule Type (Additional):** Lecture, Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Thesis,

Additional Course Fee: BSW Student Liability Insurance Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 13

SOWK 4702 - Field Placement II (6 Credit Hours)

The second field placement is designed to provide an advanced field experience. Students will be required to work 200 hours in the field, supervised by a social worker and monitored by the field coordinator. Students are expected to demonstrate competency in a variety of roles expected of a generalist social worker.

Prerequisite(s): SOWK 4701 >= S

Lecture Hours: 6

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Major Restrictions: Social Work

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

SOWK 4950 - Selected Topics (0 to 3 Credit Hours)

A variable content course. Either as 1) a faculty initiated course which allows students the opportunity to enroll in specifically titled courses, or 2) a student initiated directed study. Prerequisite(s): Junior or senior standing; 6 hours of advanced sociology or social work; permission of instructor; and contractual agreement with department chair.

Lecture Hours: 0 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Directed Study (one-to-one), Asynchronous Instruction

SOWK 4960 - Undergraduate Internship (3 Credit Hours)

A service-learning experience based in an institution/agency, emphasizing the completion of specific tasks and the acquisition of specific knowledge, skills, and values under the supervision of the university, the academic supervisor, and the cooperating institution/agency.

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

SOWK 4990 - Undergraduate Research (1 to 3 Credit Hours)

Independent research on a topic of student choice selected in consultation with an instructor, who will supervise the research. The student must submit a contract proposal for the research project prior to enrolling in the course. Prerequisite(s): Junior or Senior standing; 12 hours of advanced social work courses; and permission of faculty sponsor.

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

SOCI 1101 - Introduction to Sociology (3 Credit Hours)

Introduces students to the major concepts, methods, theories, and findings of sociology—the study of human interaction in groups and organizations as well as the nature of our society and its major social institutions.

Core IMPACTS Requirement(s) Satisfied: Social Sciences (Social Sciences)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis

SOCI 1101H - Honors: Introduction to Sociology (3 Credit Hours)

Introduces students to the major concepts, methods, theories, and findings of sociology—the study of human interaction in groups and organizations as well as the nature of our society and its major social institutions. This is an Honors Course.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group, Asynchronous Instruction

SOCI 1103 - Introduction to Behavioral and Social Science (3 Credit Hours)

An interdisciplinary introduction to methods and concepts in the behavioral and social sciences, including (but not limited to) anthropology, economics, psychology, and sociology. Emphasis will be placed on integrating the perspectives various disciplines contribute to understanding and explaining human behavior and social order. (Cross-listed by participating departments)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F), Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

SOCI 1160 - Social Problems Analysis (3 Credit Hours)

An analytical and critical approach to the study of contemporary social problems.

Prerequisite(s): SOCI 1101 >= C or SOCI 1101H >= C or SOCI 1103 >= C or PSYC 1103 >= C

Core IMPACTS Requirement(s) Satisfied: Social Sciences (Social Sciences)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction

SOCI 2241 - Social and Cultural Diversity (3 Credit Hours)

Introduces students to the social construction of contemporary societies. Focuses on social realities constructed over gender, class, race, national origin, religion, language, and sexuality.

Prerequisite(s): SOCI 1101 >= C or SOCI 1101H >= C or SOCI 1103 >= C or PSYC 1103 >= C

Core IMPACTS Requirement(s) Satisfied: Social Sciences (Social Sciences)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis

SOCI 2950 - Selected Topics (1 to 3 Credit Hours)

A variable content course. Either 1) a faculty-initiated course which allows students the opportunity to enroll in specifically titled courses, or 2) a student-initiated directed study at an introductory level. Prerequisite(s): permission of instructor; and contractual agreement with department chair. Only one 2950 course may be included in the major.

Prerequisite(s): SOCI 1101 >= C or SOCI 1101H >= C or SOCI 1103 >= C or PSYC 1103 >= C

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

SOCI 3000 - Criminology (3 Credit Hours)

The study of criminal behavior and its treatment. The development of criminal behavior and societal reaction in contemporary society are addressed in terms of major social theories of crime and its causation. The treatment and rehabilitation of the offender by probation, imprisonment, and parole are addressed in terms of philosophy and policy.

Prerequisite(s): SOSC 3001 >= C or SOSC 3002 >= C or SOSC 3003 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group, Asynchronous Instruction

SOCI 3001 - Methods in Social Research I (3 Credit Hours)

An introduction to the scientific method in social research; logic of scientific inquiry; relationship between theory and research; logic of sampling; modes of observation (experiments, survey research, field research, evaluation research); and ethics in social research.

Prerequisite(s): (MATH 1001 >= D or MATH 1111 >= D or MATH 1113 >= D) and (SOCI 1101 >= D or SOCI 1101H >= D or SOCI 1103 >= D) and SOCI 1160 >= D

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

SOCI 3002 - Methods in Social Research II (3 Credit Hours)

An introduction to the analysis of social data; including the quantification of data for computer application; use of SPSS (statistical package) for analyzing data, logic of statistical inference; statistical techniques for analyzing data, including univariate, bivariate, and multivariate social statistics; and the reporting of research findings.

Prerequisite(s): SOCI 3001 >= C or SOCI 3381 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

SOCI 3003 - Qualitative Research Methods (3 Credit Hours)

An introduction to qualitative research methodologies including formulating viable research questions; various issues related to ethical conduct and validity when conducting fieldwork; data gathering techniques through participant observation, interviews, and focus groups; coding and analysis of data; and writing research findings.

Prerequisite(s): (SOCI 1101 >= C or SOCI 1101H >= C) and SOCI 1160 >= C and SOCI 3001 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

SOCI 3187 - Sociology of Murder (3 Credit Hours)

The study of homicide from sociological and criminal justice perspectives including the identification of macro level social processes such as political, economic and cultural forces including gender and race that impact on homicide and how individuals in society view and react to different types of homicide. The consequences of homicide for both individuals and society, and different types of possible intervention strategies based on different theoretical approaches to the socio-scientific study of murder are also studied.

Prerequisite(s): CRJU 1103 >= C or SOCI 1101 >= C or SOCI 1101H >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

SOCI 3303 - Sociology of the Family (3 Credit Hours)

Study of the family as an institution in society. Examines why the family takes particular forms in particular societies, and what forces are responsible for changing and shaping it. Attention given to the position of men and women in society, social class, ethnic and racial differences, and historical and comparative materials.

Prerequisite(s): (SOCI 1101 >= D or SOCI 1101H >= D or SOCI 1103 >= D or PSYC 1103 >= D) and SOCI 1160 >= D

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SOCI 3317 - Sociology of Health and Illness (3 Credit Hours)

In this course, students will become familiar with classic and contemporary sociological theory and research on health and illness (with a focus in the United States), examine social determinants of health (including how health is related to socioeconomic status, gender, age, race, and sexuality), consider research in epidemiology (or the distribution of health conditions), and discuss social stress and health behaviors.

Prerequisite(s): (SOCI 1101 >= D or SOCI 1101H >= D) and SOCI 1160 >= D

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SOCI 3320 - Sociology of Aging (3 Credit Hours)

An introduction to the elderly as members of society and the social institutions which impact on their lives and which the elderly helped to shape and currently influence. Covers theoretical perspectives on aging, the individual and the social system, adjustment patterns and changing lifestyles in old age, relevant societal issues, current trends, opportunities, and challenges.

Prerequisite(s): (SOCI 1101 >= C or SOCI 1101H >= C or SOCI 1103 >= D or PSYC 1103 >= D) and SOCI 1160 >= D

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SOCI 3323 - Sociology of Popular Culture (3 Credit Hours)

This course examines how popular culture reflects major characteristics of society and individuals at the same time that it influences that society and those individuals. The history and influence of music, humor, sports, movies and graffiti will be included.

Prerequisite(s): (SOCI 1101 >= D or SOCI 1101H >= D or SOCI 1103 >= D) and SOCI 1160 >= D

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SOCI 3330 - Social Deviance (3 Credit Hours)

Covers theoretical and empirical issues in the understanding and designations of deviant behavior; addresses the analysis of the social causes and consequences of deviance, conformity, and societal reactions.

Prerequisite(s): (SOCI 1101 >= D or SOCI 1101H >= D or SOCI 1103 >= D or PSYC 1103 >= D) and SOCI 1160 >= D

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

SOCI 3331 - Youth and Society (3 Credit Hours)

A study of the history of changing conceptions of childhood, the family, and childhood socialization; the invention of adolescence and the various attributions to childhood and adolescence; and a survey of major developmental schemes of adolescence with an emphasis on characteristics of American adolescence as conducive to delinquency.

Prerequisite(s): (SOWK 1101 >= C or SOCI 1101 >= C or SOCI 1101H >= C or SOCI 1160 >= C or CRJU 1103 >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

SOCI 3336 - Women, Crime and the Criminal Justice System (3 Credit Hours)

A sociological analysis of women as criminal offenders and as workers in criminal justice fields. Examines the socio-historical construction of gender for its influences on criminal law and the practices of criminal justice agencies. Covers historical perspectives on women and crime, the adequacy of contemporary criminological perspectives for explaining female criminality.

Prerequisite(s): SOCI 1160 >= C or WGST 1101 >= C or CRJU 1103 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

SOCI 3340 - Social Stratification (3 Credit Hours)

An introduction to social stratification with a primary emphasis on theories of stratification and on an empirical examination of the American class structure. Includes historical-comparative material and addresses other dimensions of inequality such as race, ethnicity, sex, and age as they interact with social class.

Prerequisite(s): (SOCI 1160 >= D) and (SOCI 1101 >= D or SOCI 1101H >= D or SOCI 1103 >= D or PSYC 1103 >= D)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis

SOCI 3373 - Social Psychology (3 Credit Hours)

Examines social interactions that relate people to each other in everyday life with special focus on symbolic communication. Exploration of how humans create and define experience. This model of symbolic interactionism is compared critically to other approaches for explaining human conduct.

Prerequisite(s): (SOCI 1101 >= D or SOCI 1101H >= D or SOCI 1103 >= D or PSYC 1103 >= D) and SOCI 1160 >= D

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SOCI 3375 - Sociology of Death, Grief and Caring (3 Credit Hours)

Examines the phenomenon of death as it relates to the social structure of selected cultures; the patterns of social interaction which surround and give meaning to various aspects of death, loss, grief, and caring; and the plans of action which individuals and societies develop to guide them as they confront death.

Prerequisite(s): (SOCI 1101 >= D or SOCI 1101H >= D or SOCI 1103 >= D or PSYC 1103 >= D) and SOCI 1160 >= D

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SOCI 3380 - Sociological Theory (3 Credit Hours)

Critical examination of the modern grounding of sociological theory based on the works of classical theorists and the emergence of contemporary theoretical paradigms.

Prerequisite(s): (SOCI 1101 >= D or SOCI 1101H >= D or SOCI 1103 >= D or PSYC 1103 >= D) and SOCI 1160 >= D

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis

Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis

SOCI 3442 - Identity and Social Change (3 Credit Hours)

This course will review the relationship between identity and social change. We will explore the broader interconnectedness between power, privilege, inequality, collective action, and expressions of identity as it relates to social activism.

Prerequisite(s): SOCI 1160 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SOCI 3600 - Victimology and Victimization (3 Credit Hours)

An overview of the sociological approach to victimology and victimization. Topics include: situating victimization within the broader criminological sciences, classic and contemporary theoretical approaches to victimization, the social construction of victimization and "worthy victims," approaches to victimization within the criminal justice system, and impact of victimization on individuals and communities. The role of social inequalities is examined.

Prerequisite(s): CRJU 1103 >= C

Cross-Listed Course(s): CRJU 3600

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SOCI 3950 - Selected Topics (0 to 3 Credit Hours)

A variable content course. Either 1) a faculty-initiated course which allows students the opportunity to enroll in specifically titled courses, or 2) a student-initiated directed study at an introductory level. Prerequisite(s): Permission of instructor, and contractual agreement with department chair.

Prerequisite(s): SOCI 1160 >= D

Lecture Hours: 0 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

SOCI 4285 - Sociology of Sport (3 Credit Hours)

This course will examine sport as a social institution and cultural phenomenon. Topics will include sport and socialization, youth sports, deviance in sports, gender, race, and social class in sports, sports and the media, sports and religion, and sport in educational settings. Students will be encouraged to ask questions and think critically about sports as part of social life.

Prerequisite(s): SOSC 3001 >= C or SOSC 3002 >= C or SOSC 3003 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SOCI 4317 - Sociology of Health Care (3 Credit Hours)

In this course, students will focus on the provision of health care in the United States and will explore these topics: doctor-patient interactions; research on placebos, nocebos, and the significance of clinical rituals; the meaning and practice of complementary and alternative medicine; the training and work of physicians; the meaning and challenges of evidence-based medicine; the work of nurses, physician assistants, pharmacists, and midwives; health-care settings such as hospitals, assisted living facilities, and nursing homes; the problem of pricing health care and the role of markets; and various aspects of the effort to reform health care and policy in the United States.

Prerequisite(s): SOSC 3001 or SOSC 3002 or SOSC 3003

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SOCI 4336 - Gender and Victimization (3 Credit Hours)

A sociological analysis of crime victims and victim-service agencies. Traces the historical development of the field of victimology. Examines the influence of gender on victimization experiences and practices of criminal justice and victim-service agencies.

Prerequisite(s): SOSC 3001 >= C or SOSC 3002 >= C or SOSC 3003 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Directed Study (one-to-one), Asynchronous Instruction

SOCI 4385 - Sociology of Religion (3 Credit Hours)

An introduction to the social scientific study of religion as a social institution and of the relationship of religion and people's experiences.

Prerequisite(s): SOSC 3001 >= C or SOSC 3002 >= C or SOSC 3003 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Directed Study (one-to-one), Asynchronous Instruction

SOCI 4413 - Sociology of Education (3 Credit Hours)

EDUC 2120 EDUC 2120 This course focuses on the relationship between education and society in the United States, including public and private education in America. Particular emphasis will be placed on application of sociological theories and insights to the advancement of the goal of increased effectiveness of schools, teachers and students.

Prerequisite(s): (SOCI 1101 >= C or SOCI 1101H >= C or SOCI 1103 >= C or PSYC 1103 >= C) and SOCI 1160 >= C and EDUC 2110 >= C and EDUC 2120 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SOCI 4421 - Gerontology (3 Credit Hours)

Examines the interaction between the social, physical, psychological, and programmatic aspects of aging. Emphasis is on programs, services, interactive techniques, legislation, and advocacy efforts which address the needs and concerns of older Americans, their family members, and service providers.

Prerequisite(s): SOCI 1101 >= C and PSYC 1101 >= C or (SOSC 3001 >= C or SOSC 3002 >= C or SOSC 3003 >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SOCI 4433 - Juvenile Delinquency and Justice (3 Credit Hours)

This course discusses the philosophy, theory, and history of juvenile delinquency, including its causes, preventions, and measurement from sociological perspectives. It also discusses the historical development of juvenile justice including the establishment of the juvenile court and juvenile corrections in America. Topics include: the philosophical, social, and legal justifications of juvenile justice, contrasts the processing of juveniles with that of adult offenders, and focuses on contemporary issues and problems in juvenile justice.

Prerequisite(s): (SOCI 1101 >= C or SOCI 1101H >= C or CRJU 1103 >= C) and SOCI 1160 >= C

Cross-Listed Course(s): CRJU 4433

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SOCI 4436 - Obedience and Authority (3 Credit Hours)

An examination of the interactions among social structures, societal conditions and social selves that promote obedience to authority as well of those that build communities of dissent and resistance.

Prerequisite(s): SOSC 3001 >= C or SOSC 3002 >= C or SOSC 3003 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group, Directed Study (one-to-one), Asynchronous Instruction

SOCI 4441 - Racial and Ethnic Minority Groups (3 Credit Hours)

This course focuses on the relationships between majority and minority groups in the United States. It will examine the historical and present conditions of society and the forces and motivations which have created and perpetuated minority groups status for various racial and ethnic groups and individuals.

Prerequisite(s): SOSC 3001 >= C or SOSC 3002 >= C or SOSC 3003 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Directed Study (one-to-one), Asynchronous Instruction

SOCI 4442 - Gender and Society (3 Credit Hours)

Sociological insights and concepts will be employed in observing, interpreting, and analyzing the social processes creating, reinforcing and changing gender roles and the statuses of women and men in society.

Prerequisite(s): SOSC 3001 >= C or SOSC 3002 >= C or SOSC 3003 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SOCI 4443 - Social Movements (3 Credit Hours)

Sociological analysis of historical and contemporary social movements nationally and internationally. Special attention is given to the critical analysis of social movement theory and its application to understanding the diversity of social movements. Emphasis is placed on the etiology of social movements, their causes, consequences, and social implications.

Prerequisite(s): SOSC 3001 >= C or SOSC 3002 >= C or SOSC 3003 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group, Directed Study (one-to-one), Asynchronous Instruction

SOCI 4451 - Sociology of Work and Occupation (3 Credit Hours)

An analysis of the social dimensions of work, the labor process, occupations and professions. Other topics covered include the social meaning and organization of work, and the relationships between the structuring of work, social mobility, and social stratification.

Prerequisite(s): SOSC 3001 >= C or SOSC 3002 >= C or SOSC 3003 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group, Asynchronous Instruction

SOCI 4653 - Sociology of Golf (3 Credit Hours)

This course provides a topic of interest for students to explore basic foundational issues in sociology such as social stratification, race, gender, group dynamics, and deviance. Through a fun topic, theoretical concepts and research principles and skills are honed in this 4000 level course. This course also serves as a course in which students may master or polish their skills in critical thinking, computer skills, and communication.

Prerequisite(s): SOSC 3001 >= C or SOSC 3002 >= C or SOSC 3003 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Directed Study (one-to-one), Asynchronous Instruction

SOCI 4723 - Senior Sociology Capstone (3 Credit Hours)

The capstone is designed to be the last course that students take in their major. It is meant to be the culmination of one's undergraduate career, and to prepare students for their transition into the next stages of their educational, civic, and professional life. This course was designed to prepare students to use their sociological knowledge beyond the university.

Prerequisite(s): SOCI 3380 and SOSC 3001 and (SOSC 3002 or SOSC 3003)

Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Sociology **Student Class Restrictions:** Senior-Semester **Degree Restrictions:** Bachelor of Arts **Program**

Restrictions: 1BA-SOC-BA-Sociology

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group

SOCI 4950 - Selected Topics (0 to 3 Credit Hours)

A variable content course. Either as a faculty initiated course which allows students the opportunity to enroll in specifically titled courses, or as a student initiated directed study.

Prerequisite(s): SOCI 1101 >= C and SOCI 1160 >= C

Lecture Hours: 0 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis

SOCI 4960 - Undergraduate Internship (1 to 3 Credit Hours)

A service-learning experience based in an institution/agency, emphasizing the completion of specific tasks and the acquisition of specific knowledge, skills, and values under the supervision of the university, the academic supervisor, and the cooperating institution/agency. **Prerequisite(s):** Permission of instructor.

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

SOCI 4990 - Undergraduate Research (3 Credit Hours)

Independent research on a topic of student choice selected in consultation with an instructor. The student must submit a contract proposal for the research project prior to enrolling in the course. **Prerequisite(s):** Junior or Senior Standing; 12 hours of advanced sociology; and contractual agreement with department chair.

Prerequisite(s): SOCI 3002 >= C and SOCI 3380 >= C

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

SOCI 6436 - Intimate Partner Violence (3 Credit Hours)

Repeatability: May not be repeated for credit.

SPAN 1001 - Elementary Spanish I (3 Credit Hours)

Fundamentals of listening, speaking, reading, and writing Spanish in a proficiency-based classroom. Introduction to Spanish-speaking cultures. Designed for students who have never studied Spanish. Not open to native speakers. Heritage speakers and students who had Spanish in high school should take the placement exam. Students must earn a C or better in order to take SPAN 1002.

Core IMPACTS Requirement(s) Satisfied: Arts, Humanities, and Ethics (Humanities)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SPAN 1002 - Elementary Spanish II (3 Credit Hours)

A continuation of SPAN 1001. Not open to native speakers. Heritage speakers and students who had Spanish in high school should take the placement exam. Students must earn a C or better in order to take SPAN 2001.

Prerequisite(s): SPAN 1001 >= C

Core IMPACTS Requirement(s) Satisfied: Arts, Humanities, and Ethics (Humanities)

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SPAN 2001 - Intermediate Spanish I (3 Credit Hours)

This proficiency-centered course is designed to build on high school Spanish or on SPAN 1002. More emphasis will be placed on listening, speaking, and reading skills in practical situations. Students will learn how to "get around" in places where Spanish is spoken natively. Not open to native speakers. Heritage speakers should take the placement exam.

Prerequisite(s): SPAN 1002 >= C

Core IMPACTS Requirement(s) Satisfied: Arts, Humanities, and Ethics (Humanities)

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SPAN 2002 - Intermediate Spanish II (3 Credit Hours)

This proficiency-centered course includes a grammar review and more intensive work in listening comprehension, speaking, and reading, with more emphasis on writing than in SPAN 2001. Spanish-speaking cultures will be studied through music, art, film, literary and cultural readings, including current events. At the end of this course, students should have a basic competence in Spanish. Students who wish to take upper-division courses in Spanish will need to demonstrate sufficient proficiency as determined by the world language faculty before enrolling in major/minor courses. Not open to native speakers. Heritage speakers should take the placement exam. Students must earn a C or better in order to take classes at the 3000/4000 level.

Prerequisite(s): SPAN 2001 >= C

Core IMPACTS Requirement(s) Satisfied: Arts, Humanities, and Ethics (Humanities)

Lecture Hours: 3 **Lab Hours:** 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SPAN 2950 - Studies in Hispanophone Culture (3 Credit Hours)

A variable content course taught in English that will center on one Hispanophone country or area, or a specific issue dealing with Hispanophone culture. May not be counted towards the Spanish major and may not satisfy world language requirement.

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SPAN 3100 - Conversational Spanish (3 Credit Hours)

A course designed to enhance students' listening and speaking ability in Spanish. Emphasis on expressing hypotheses, opinions, and debate. NOT OPEN TO NATIVE SPEAKERS.

Prerequisite(s): SPAN 2002 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Asynchronous Instruction

SPAN 3150 - Spanish for Heritage Speakers (3 Credit Hours)

This course is for students who grew up speaking and/or listening to Spanish in their home but may have little to no exposure to Spanish used in more formal contexts. In this course, students will develop Spanish oral and written skills used in academic and professional settings. Special focus will be given to fostering skills related to academic writing, grammar, accents, and spelling. Students will also engage in research/community-based projects related to their personal bilingual experiences. This course is for heritage and native speakers of Spanish only. SPAN 3150 and SPAN 3100 are equivalent courses; a student may not receive credit for both.

Prerequisite(s): SPAN 2002 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SPAN 3211 - Spanish-American Civilizations I (Pre-Columbian - 1821) (3 Credit Hours)

This course explores Spanish-American civilizations from pre-Columbian times to 1821. Emphasis is given to the critical analysis of cultural practices and cultural production in the region, and to the causes that led Spanish-American nations to gain their political independence from Spain. While challenging the notion that America was discovered, and while questioning the right of the Spanish Crown to rule in Spanish America, a holistic assessment of the miscegenation and transculturation processes that shaped Spanish America is made throughout this course.

Prerequisite(s): SPAN 2002 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Asynchronous Instruction

SPAN 3212 - Spanish-American Civilizations II (1821 - Present) (3 Credit Hours)

An exploration of Spanish-American civilizations and cultures from 1821 to the present. Emphasis is given to the critical analysis of cultural practices and production in Spanish-American countries after gaining their independence from Spain. While revising the

traditional concept of nation, this course engages students in informed debate on the social conflicts, the political alliances and upheavals, as well as the economic potential and inequalities that have shaped the construction of national identity in the region.

Prerequisite(s): SPAN 2002 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Asynchronous Instruction

SPAN 3220 - The Culture and Civilization of Spain (3 Credit Hours)

A study of the culture and civilization of Spain through its history, geography, customs, art, and music. Emphasis is given to the understanding of Spain's civilization since the Middle Ages and the formation of the diverse national identities. Students will engage in a critical analysis of hispanic civilization, which will allow for the reassessment and evaluation of problems such as social diversity, identity, and religious tolerance. It will also focus on issues concerning Spain and the Hispanic world in a broader historical context to understand the contribution of Spain to western civilization.

Prerequisite(s): SPAN 2002 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Asynchronous Instruction

SPAN 3300 - Spanish Composition (3 Credit Hours)

A course designed to promote the student's ability to express themselves proficiently in written Spanish and become acquainted with different styles. Emphasis on advanced grammar. Some expository and/or argumentative essay writing, letter writing, creative writing, and research-related writing.

Prerequisite(s): SPAN 2002 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Asynchronous Instruction

SPAN 3510 - Introduction to Literature (3 Credit Hours)

A study of the theoretical and practical foundations of literature, including poetry, narrative, drama and essay. Prepares students for analysis and literary criticism.

Prerequisite(s): SPAN 2002 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Asynchronous Instruction

SPAN 3520 - Spanish American Theater (3 Credit Hours)

An introduction to drama in Spain and Hispanic America, focusing on the performance and presentation of dramatic pieces. Emphasis on the development of reading, writing, oral and listening skills.

Prerequisite(s): SPAN 2002 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Asynchronous Instruction

SPAN 3610 - Spanish for Business (3 Credit Hours)

An introduction to the professional terminology and language skills used in business settings in Spanish, while surveying economics and business concepts. Cultural aspects are addressed to enhance students' awareness of business communication practices in Spanish-speaking contexts, both local and abroad.

Prerequisite(s): SPAN 2002 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Asynchronous Instruction

SPAN 3620 - Spanish for the Medical Professions (3 Credit Hours)

A course designed for students seeking to acquire or expand their knowledge of medical terminology in Spanish and the language used in everyday professional health-related situations. Cultural aspects are addressed to enhance students' awareness of Hispanic diversity and cultural perspectives in order to improve effective communication in Spanish between medical professionals and patients.

Prerequisite(s): SPAN 2002 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Asynchronous Instruction

SPAN 3950 - Studies in Hispanophone Culture (3 Credit Hours)

Intermediate level study abroad course denoting junior level work.

Prerequisite(s): SPAN 2002 >= C

Lecture Hours: 3

Repeatability: May be repeated for credit up to three times.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Seminar-Small Group

SPAN 4100 - Advanced Conversational Spanish (3 Credit Hours)

A course designed to enhance students' listening and speaking ability in Spanish at an advanced level. Emphasis on expressing hypotheses, opinions, and debate. NOT OPEN TO NATIVE SPEAKERS.

Prerequisite(s): SPAN 3100 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Asynchronous Instruction

SPAN 4300 - Advanced Composition (3 Credit Hours)

An advanced course that emphasizes critical reading, expository and creative writing. The students will use skills such as summarizing, criticizing, comparing, contrasting and expressing their opinions. This course is designed to help students write better. Emphasis on the development of reading and writing skills.

Prerequisite(s): SPAN 3300 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Asynchronous Instruction

SPAN 4400 - Introduction to Hispanic Linguistics (3 Credit Hours)

An introduction to linguistics using data from the Spanish language: phonetics, syntax, the history of Spanish, and dialectology.

Prerequisite(s): SPAN 2002 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Asynchronous Instruction

SPAN 4410 - The Sound System of Spanish (3 Credit Hours)

Discussion of the sound systems of the contemporary varieties of the Spanish language. Topics include articulatory and acoustic phonetics, intonation, dialectology, previous and current phonological theory.

Prerequisite(s): SPAN 4400 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Asynchronous Instruction

SPAN 4420 - Applied Linguistics (3 Credit Hours)

A study of basic applied linguistics. Emphasis on grammatical difficulties encountered by non-native speakers of Spanish.

Prerequisite(s): Three upper division classes in Spanish with a grade of C or better.

Prerequisite(s): SPAN 2002 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Asynchronous Instruction

SPAN 4560 - Hispanic American Literature (3 Credit Hours)

A study of Hispanic American literature since modernism until the so called post-boom generation, including poetry, narrative and essay, and concepts like neo-baroque, magical realism and boom, among others.

Prerequisite(s): SPAN 2002 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Asynchronous Instruction

SPAN 4600 - Translation Theory and Methodology (3 Credit Hours)

Explores the basic principles of translation, focusing on theory, methods, challenges, and problems involved in rendering written texts from Spanish into English and vice versa. Emphasis is placed on maintaining the basic ideas, intent, stylistic level, and linguistic register. The course focuses on Spanish to English translation.

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Course Level Restrictions: Undergraduate Semester

Schedule Type (Primary): Lecture

SPAN 4630 - Seminar in Translation (3 Credit Hours)

Provides the opportunity to apply the theory and methodology learned in SPAN 4600. Emphasis is placed on the translation of material intended for the general public. The course focuses on specialized material from fields such as business, literature, and medicine. Students practice Spanish to English and English to Spanish translation.

Prerequisite(s): SPAN 4600 >= C

Lecture Hours: 3 **Other Hours:** 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Student Class Restrictions: Sophomore, Junior, Senior

Schedule Type (Primary): Lecture

SPAN 4700 - Interpretation: Theory and Methodology (3 Credit Hours)

Explores the basic and more advanced principles of interpretation. Topics include: theory, methods, challenges, problems, and the satisfaction involved in rendering oral statements from Spanish into English and vice-versa. Emphasis on maintaining the basic ideas, intent, stylistic level, and linguistic register.

Prerequisite(s): SPAN 2002 >= C or placement

Cross-Leveled Course(s): SPAN 6700

Lecture Hours: 3 **Contact Hours:** 3

Grade Mode: N- Normal (A, B, C, D, F)

Student Class Restrictions: Junior, Senior, Sophomore **Course Level Restrictions:** US Undergraduate

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SPAN 4720 - Latin American Film (3 Credit Hours)

This course explores the development of Latin American film industries, as well as social and political historical processes in the region as reflected in selected cinematic master pieces. In addition, students develop skills to assess the adaptation of literary works into screenplays, and become conversant with cinematic elements, techniques and film jargon that enable them to critically analyze films and to write comprehensive film reviews, addressing both the artistic and the sociological value of movies.

Prerequisite(s): SPAN 2002 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Asynchronous Instruction

SPAN 4730 - Seminar in Interpretation (3 Credit Hours)

Provides the opportunity to apply the theory and methodology learned in SPAN 4700. Emphasis is placed on interpretation of material taken from journals, newspapers, digital media, government publications, pre-recorded audio and video speeches and dialogues, and live presentations. The course focuses on specialized material from the fields of business, law, medicine, agriculture, environmental issues, and entertainment. Students practice Spanish to English and English to Spanish interpretation.

Prerequisite(s): SPAN 4700 >=C

Lecture Hours: 3 **Lab Hours:** 3 **Other Hours:** 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Student Class Restrictions: Sophomore, Junior, Senior

Schedule Type (Primary): Lecture

SPAN 4801 - Methods and Materials for Teaching World Language I (2 Credit Hours)

Methods and materials for listening, speaking, reading, writing, and cultural activities appropriate for World Language learners. First and second language acquisition theories, a review of world language teaching methods, testing procedures and teacher preparation and evaluation. A field experience of 25 clock hours is a required component of the course. ENGL 4801/FREN 4801/SPAN 4801 are equivalent courses; a student may only receive credit for one.

Lecture Hours: 2 **Lab Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Asynchronous Instruction

SPAN 4802 - Methods and Materials for Teaching World Language II (2 Credit Hours)

Methods and materials for listening, speaking, reading, writing, and cultural activities appropriate for World Language learners. Advanced instruction in first and second language acquisition theories, a review of world language teaching methods, testing procedures and teacher preparation and evaluation. A field experience of 25 clock hours is a required component of the course. ENGL 4802/FREN 4802/SPAN 4802 are equivalent courses; a student may only receive credit for one.

Lecture Hours: 2 **Lab Hours:** 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Asynchronous Instruction

SPAN 4950 - Selected Topics (3 Credit Hours)

A variable-content course, intended to meet the interests of students minoring or majoring in Spanish and desiring to make an intensive study of some special area of Spanish language or literature.

Prerequisite(s): SPAN 2002 >= C

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Independent Study,Asynchronous Instruction

SPAN 4960 - Undergraduate Internship (1 to 3 Credit Hours)

Service-learning experience based in an off-campus agency/organization. The experience entails completion of a specific set of tasks under the supervision of Augusta University faculty and the cooperating agency/organization. Maximum of three credit hours. Only three hours may be used towards the major. Prerequisite(s): Four upper-division classes in Spanish with a grade of B or better and permission of the instructor.

Lecture Hours: 1 to 3 **Contact Hours:** 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Internship/Practicum

SPAN 6700 - Advanced Interpretation Theory and Professional Practice (3 Credit Hours)

This course offers an in-depth exploration of the advanced principles and practices of interpretation, with a strong focus on professional contexts. Students will critically engage with interpretation theories, methodologies, and the complex cognitive and ethical challenges inherent to the field. Special attention will be given to interpreting in specialized settings (legal, medical, and technical domains). The course emphasizes navigating high-stakes interpretation scenarios with accuracy and professionalism.

Prerequisite(s): Admission to the MAT program.

Cross-Leveled Course(s): SPAN 4700

Lecture Hours: 3 **Lab Hours:** 3 **Other Hours:** 3 **Contact Hours:** 3

Grade Mode: N- Normal (A, B, C, D, F)

Course Level Restrictions: GS Graduate

Schedule Type (Primary): Lecture

SPAN 6801 - Methods and Materials for Teaching World Languages I (3 Credit Hours)

Methods and materials for listening, speaking, reading, writing, and cultural activities appropriate for elementary and middle school learners. First and second language acquisition theories, a review of world language teaching methods, testing procedures, and teacher preparation and evaluation. A field experience of 45 clock hours is a required component of the class.

Cross-Listed Course(s): FREN 6801

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: GS - Graduate-Semester **Degree Restrictions:** MAT - Master of Arts in Teaching

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Asynchronous Instruction

SPAN 6802 - Methods and Materials for Teaching World Languages II (3 Credit Hours)

Methods and materials for listening, speaking, reading, writing, and cultural activities appropriate for secondary learners. First and second language acquisition theories, a review of world language teaching methods, testing procedures, and teacher preparation and evaluation. A field experience of 45 clock hours is a required component of the class.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Student Class Restrictions: Graduate-Semester **Degree Restrictions:** MAT - Master of Arts in Teaching

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Asynchronous Instruction

SPAN 6950 - Selected Topics (3 Credit Hours)

A variable advanced seminar, intended to meet the interests of graduate students desiring to make an intensive study of a specific area of Spanish linguistics or literature. Prerequisite(s): Baccalaureate degree in Spanish or equivalent.

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Asynchronous Instruction

SPDS 5001 - Special Dental Studies (1 to 6 Credit Hours)

Lecture Hours: 2 to 12 **Lab Hours:** 2 to 12 **Contact Hours:** 2 to 12

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Dental College of Georgia

Schedule Type (Primary): Supervised Lab/Clinic

EDUC 2140 - Foundations of Reading (3 Credit Hours)

This course provides a scientifically-based foundation in the cognitive, sociocultural, linguistic, and motivational influences on reading. Concepts of word recognition, phonology, phonics, morphology, fluency, vocabulary, and comprehension are presented. Connections to written expression, discourse writing, and special populations in varied contexts are explored.

Lecture Hours: 3 **Contact Hours:** 3

Grade Mode: Normal (A,B,C,D,F)

Major Restrictions: PSPE-Pre-Special Education; SPEC-Special Education **Campus Restrictions:** OLC-Online Campus

Schedule Type (Primary): Asynchronous **Schedule Type (Additional):** Online

READ 2230 - Cognition and Language (3 Credit Hours)

This course explores the development and interrelationship of cognition and language, emphasizing their roles in learning and communication. It presents language as a dynamic, living system - encompassing phonology, morphology, syntax, semantics, and discourse - and examines theories of cognitive and language development. The course also covers the principles of first and second language acquisition and the impact of cognitive, affective, and socio-cultural factors on language learning, including the critical period hypothesis. Emphasis is placed on practices that promote language and cognitive competencies across diverse contexts and student populations.

Repeatability: Not Repeatable

Grade Mode: Normal (A,B,C,D,F)

Degree Restrictions: BSSED-Bachelor of Science in Education with a Major in Special Education

Schedule Type (Primary): Asynchronous Instruction

READ 3270 - Teaching Reading and Writing to Student with Disabilities (3 Credit Hours)

This course emphasizes instructional strategies for supporting literacy development in students with unique learning needs, including those with disabilities and English language learners.

Grade Mode: Normal (A,B,C,D,F)

Course Level Restrictions: TEPA-Teacher Ed Program Accepted **Degree Restrictions:** BSSED-Bachelor of Science in Education with a Major in Special Education

Schedule Type (Primary): 57-Asynchronous Instruction

READ 4110 - Assessing Reading Development and Instructional Planning (3 Credit Hours)

This course explores the use of formal and informal reading assessments to identify student strengths and needs, guide instructional decision-making, and monitor progress. This course emphasizes data-driven planning for students at varying levels of reading development, including those with disabilities.

Repeatability: Not Repeatable

Grade Mode: Normal (A,B,C,D,F)

Degree Restrictions: BSED - Bachelor of Science in Education in Special Education

Schedule Type (Primary): Asynchronous Instruction

READ 4270 - Intervention Strategies for Struggling Readers (3 Credit Hours)

This course focuses on designing and implementing evidence-based reading interventions for students who require intensive support. This course includes strategies for addressing persistent difficulties in decoding, fluency, and comprehension within Tier 2 and Tier 3 instructional settings.

Repeatability: Not Repeatable

Grade Mode: Normal (A, B, C, D, F)

Degree Restrictions: BSED - Bachelor of Science in Education in Special Education

Schedule Type (Primary): Asynchronous Instruction

SPED 3002 - Teaching Students with Disabilities in the Inclusive Classroom (3 Credit Hours)

Methods for teaching students with disabilities in inclusive settings are described. Definitions and characteristics of students with disabilities are discussed, as well as integration strategies that create safe, equitable and positive learning environments for all students including those at risk of developing disabling conditions. Examined are research-based instructional strategies, models, theories, and philosophies of educating students with disabilities, and how to accommodate and modify to improve outcomes. Candidates must earn a grade of B or better in this course to meet Georgia certification requirements; see 505-2-.24 Special Georgia Requirements for details.

Cross-Leveled Course(s): SPED 5002

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

SPED 3005 - Educational Planning for Exceptional Students (3 Credit Hours)

This course is designed to prepare special educators who are knowledgeable and competent in preparing Individualized Education Plans and lesson plans for individuals with disabilities. Learning environments and assessment data will be analyzed in order to develop high quality instructional plans that include specialized strategies based on collaboration among stakeholders and improving communication for individuals with disabilities. A 25-hour field experience with P-12 students is required for the course.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Supervised Lab/Clinic, Directed Study (one-to-one), Asynchronous Instruction

SPED 3006 - Language Development and Communication Disorders (3 Credit Hours)

In this course, students will study typical language and communication development and the communication disorders associated with children in special education. Students will learn how teachers can design and implement programs to support students in language and communication development. Thirty hours of field experience is required. Prerequisite(s): Admission to undergraduate program.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised

Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

SPED 3008 - Assessment and Instruction in Literacy for Students with Mild Disabilities (3 Credit Hours)

This course addresses the fundamentals of literacy, including early literacy and essential components of readings. We also discuss evidence-based reading strategies, tiered intervention, data-based decision, and progress monitoring for students who have reading difficulties. A 25-hour field experience with P-12 students is required in the course.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Independent Study, Asynchronous Instruction

SPED 3009 - Family and Community Engagement for Exceptional Children (3 Credit Hours)

This course focuses on family and community engagement to meet the needs of exceptional children. Content will be from a variety of literatures in education with focuses on early literacy, family involvement, access to books and expanded learning, as well as mentoring partnerships. A 25-hour field experience with P-12 students is required in the course.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1BSED-SPECE-BSED-Special Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Supervised Lab/Clinic, Independent Study, Asynchronous Instruction

SPED 3110 - Characteristics of Students with Mild Disabilities (3 Credit Hours)

An introductory course in mild disabilities which covers perspectives on disability and issues in identification, instruction, and placement. Cognitive and perceptual characteristics, language characteristics, academic learning characteristics, and social-emotional characteristics of students with mild disabilities will be discussed in this course. A 25-hour field experience with P-12 students is required in the course.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Supervised Lab/Clinic, Independent Study, Asynchronous Instruction

SPED 3111 - Foundations in Special Education (3 Credit Hours)

This course examines characteristics and needs of students with exceptionalities, as well as the role and responsibilities of a special education teacher in multi-tiered systems of support, instruction, evaluation and communication with families of students with special needs.

Grade Mode: Normal (A,B,C,D,F)

Course Level Restrictions: TEPA-Teacher Ed Program Accepted **Degree Restrictions:** BSED-Bachelor of Science in Education with a Major in Special Education

Schedule Type (Primary): Asynchronous

SPED 3112 - Special Education Law, Ethics, and Procedures (3 Credit Hours)

This course will examine key legislation, ethical principles, and procedural safeguards related to special education, including individual education plan development, due process, and transition.

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A,B,C,D,F)

Course Level Restrictions: TEPA-Teacher Ed Program Accepted **Degree Restrictions:** BSED-Bachelor of Science in Education with a Major in Special Education

Schedule Type (Primary): Asynchronous

SPED 3113 - Instructional Technology and Accessibility Tools (3 Credit Hours)

This course explores the integration of instructional technology and assistive tools to support exceptional learners in special education settings.

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A,B,C,D,F)

Course Level Restrictions: TEPA-Teacher Ed Program Accepted **Degree Restrictions:** BSED-Bachelor of Science in Education with a Major in Special Education

SPED 3114 - Collaboration and Consultation in Special Education (3 Credit Hours)

This course focuses on effective collaboration with families, general educators, and service providers to support students with disabilities.

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A,B,C,D,F)

Course Level Restrictions: TEPA-Teacher Ed Program Accepted **Degree Restrictions:** BSED-Bachelor of Science in Education with a Major in Special Education

Schedule Type (Primary): Asynchronous

SPED 3130 - Classroom and Behavior Management (3 Credit Hours)

This course is designed to assist the pre-service teacher in developing the knowledge, skills, and attitudes required to assess, plan, and implement successful behavior management programs and strategies in the classroom. The creation of a positive classroom atmosphere in which students will learn and make behavioral choices is stressed. A 25-hour field experience with P-12 students is required in the course.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Supervised Lab/Clinic, Independent Study, Asynchronous Instruction

SPED 3271 - Positive Behavior Management Strategies (3 Credit Hours)

This course prepares teacher candidates to implement proactive, research-based strategies for managing classroom behavior and supporting students' social-emotional needs.

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A,B,C,D,F)

Course Level Restrictions: TEPA-Teacher Ed Program Accepted **Degree Restrictions:** BSED-Bachelor of Science in Education with a Major in Special Education

Schedule Type (Primary): Asynchronous

SPED 3272 - Instructional Methods for P-5 Learners with Disabilities (3 Credit Hours)

This course focuses on evidence-based, high-leverage behavioral and instructional practices for teaching young learners with disabilities in inclusive and special education classrooms.

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A,B,C,D,F)

Course Level Restrictions: TEPA-Teacher Ed Program Accepted **Degree Restrictions:** BSED-Bachelor of Science in Education with a Major in Special Education

SPED 3273 - Teaching Social Studies and Science to Learners with Disabilities (3 Credit Hours)

This course covers instructional design and adaptations to support access to social studies and science content for students with disabilities.

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A,B,C,D,F)

Course Level Restrictions: TEPA-Teacher Ed Program Accepted **Degree Restrictions:** BSED-Bachelor of Science in Education with a Major in Special Education

SPED 3299 - Practicum I: P-5 Field Experience (3 Credit Hours)

This course provides structured field experiences in P-5 settings where candidates implement and reflect evidence-based practices under the guidance of a mentor teacher.

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A,B,C,D,F)

Course Level Restrictions: TEPA-Teacher Ed Program Accepted **Degree Restrictions:** BSED-Bachelor of Science in Education with a Major in Special Education

Schedule Type (Primary): Asynchronous **Schedule Type (Additional):** Practice Teaching

SPED 4005 - Family Literacy (3 Credit Hours)

This course is designed to examine research-based practices for teachers/families/caregivers in enhancing early literacy and intervention techniques applicable to infants, toddlers, and preschoolers with special needs. Thirty hours of field experience is required.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum

SPED 4007 - Literacy Fundamentals (3 Credit Hours)

This course surveys research-based reading strategies for teaching literacy skills (e.g., reading, writing, listening, speaking, critical thinking, spelling) to students (P-12). Special attention will be given to selecting and using intervention tools for literacy instruction with students who experience literacy problems. Prerequisite(s): Permission of instructor. Thirty hours of field experience is required.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Thesis

SPED 4111 - Assessment for Learners with Disabilities (3 Credit Hours)

This course focuses on the use, interpretation, and implementation of formal and informal assessment tools to guide instruction for students with disabilities.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: BSED - Bachelor of Science in Education in Special Education

Schedule Type (Primary): Asynchronous Instruction

SPED 4112 - Instructional Methods and Transition Planning for 6-12 Learners with Disabilities (3 Credit Hours)

This course focuses on evidence-based high-leverage behavioral and instructional practices for teaching middle and secondary learners with disabilities in inclusive and special education classrooms.

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: BSED - Bachelor of Science in Education in Special Education

SPED 4113 - Teaching Mathematics to Learners with Disabilities (3 Credit Hours)

This course emphasizes effective strategies for teaching mathematical concepts and skills to students with disabilities, including accommodations and modifications.

Grade Mode: Normal, Audit

Course Level Restrictions: TEPA-Teacher Ed Program Accepted **Degree Restrictions:** BSED-Bachelor of Science in Education with a Major in Special Education

SPED 4199 - Practicum II: 6-12 Field Experience (3 Credit Hours)

This course offers continued supervised fieldwork in middle and high school special education settings, emphasizing instructional planning and professional reflection.

Grade Mode: Normal (A,B,C,D,F)

Course Level Restrictions: TEPA-Teacher Ed Program Accepted **Campus Restrictions:** OLC-Online Campus

SPED 4299 - Culminating Residency in Special Education (12 Credit Hours)

A full-time, supervised clinical experience where teacher candidates apply instructional and management strategies in special education settings.

Grade Mode: Normal (A,B,C,D,F)

Course Level Restrictions: TEPA-Teacher Ed Program Accepted **Degree Restrictions:** BSED-Bachelor of Science in Education with a Major in Special Education

Schedule Type (Primary): 60-Practice Teaching **Schedule Type (Additional):** 57-Asynchronous Instruction

Additional Course Fee: Assigned Mentor Teachers in P-12 schools are given a stipend for supervision of senior culminating residency candidates. **Fee Type:** STTF-COEHD Student Teaching Fee **Fee Amount:** \$ 200.00

SPED 4491 - Student Teaching in Special Education (13 Credit Hours)

Students are placed with selected master teachers for an entire semester during which time they are teaching in the curriculum areas for which they are seeking certification. During the semester, the apprentice teacher, under the supervision of the master teacher, assumes the responsibilities of professional teaching practice. Six hundred eighty hours of field experience is required. Prerequisite(s): Completion of all courses in program with a 2.5 GPA or better.

Corequisite(s): EDTD 4940

Lab Hours: 26

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Student Class Restrictions: Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Supervised Lab/Clinic, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum

Additional Course Fee: Student Teaching Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 200

SPED 4950 - Selected Topics in Special Education (3 Credit Hours)

This course examines problems in light of recent knowledge and research in special education. The focus is on specifically designated areas of special education. 30 hours of field experience is required.

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

SPED 5001 - Policies and Procedures in Special Education (3 Credit Hours)

This course introduces the legislation, policies, and procedures in special education. The current trends and practices of special education in today's schools are addressed. Also examined are the historical foundations of special education, multicultural issues, and perspectives toward special education services.

Cross-Leveled Course(s): SPED 3001

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Supervised Lab/Clinic

SPED 5002 - Instructional Strategies for Teaching Students with Disabilities in General Education Settings (3 Credit Hours)

Methods for teaching students with special needs in the general education classroom setting are described. Included are characteristics of the most common disabilities, as well as collaborative interactions with special education teachers. The course covers pre-referral and referral procedures; research-based instructional methodologies; materials, strategies, and techniques; and assistive technologies. Candidates must earn a grade of B or better in this course to meet Georgia certification requirements; see 505-2-.24 Special Georgia Requirements for details.

Cross-Leveled Course(s): SPED 3002

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

Program Restrictions: 1MAT-Master of Arts in Teaching

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Supervised Lab/Clinic, Independent Study, Asynchronous Instruction

SPED 5003 - Educational Assessment in Special Education (3 Credit Hours)

An introductory course which includes basic assessment terminology, administration of frequently used diagnostic instruments, strengths and weaknesses of various assessment tools, and evaluation and instructional recommendations. A 25-hour field experience with P-12 students is required in the course.

Cross-Leveled Course(s): SPED 3003

Lecture Hours: 2 **Lab Hours:** 2 **Contact Hours:** 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Program Restrictions: 1MAT-MAT - MAT-Master of Arts in Teaching

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Supervised Lab/Clinic, Independent Study, Asynchronous Instruction

SPED 5004 - Collaboration and Consultation in Special Education (3 Credit Hours)

This is an in-depth course on techniques for implementing best practices for effective collaboration, consultation, and co-teaching skills. This course will examine the barriers to effective collaboration and possible solutions when working with classroom teachers, paraprofessionals, administrators, volunteers, and parents. Furthermore, this course will examine co-teaching models and how they can be effectively implemented in the classroom.

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SPED 5005 - Educational Planning for Exceptional Students (3 Credit Hours)

This course is designed to prepare special educators who are knowledgeable and competent in preparing Individualized Education Plans and lesson plans for individuals with disabilities. Learning environments and assessment data will be analyzed in order to develop high quality instructional plans that include specialized strategies based on collaboration among stakeholders and improving communication for individuals with disabilities. A 25-hour field experience with P-12 students is required for the course.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Master of Arts in Teaching

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Supervised Lab/Clinic, Independent Study, Asynchronous Instruction

SPED 5006 - Language Development and Communication Disorders (3 Credit Hours)

Students will study how language typically develops, theories related to etiology of language disorders, and the effects of language disorders on functioning for children with disabilities. Students will learn approaches for remediating language disabilities and will apply them in authentic settings. Thirty hours of field experience is required.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Supervised Lab/Clinic,Independent Study,Asynchronous Instruction

SPED 5008 - Assessment and Instruction in Literacy for Students with Mild Disabilities (3 Credit Hours)

This course addresses the fundamentals of literacy, including early literacy and essential components of readings. We also discuss evidence-based reading strategies, tiered intervention, data-based decision, and progress monitoring for students who have reading difficulties. A 25-hour field experience with P-12 students is required in the course.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Supervised Lab/Clinic,Independent Study,Asynchronous Instruction

SPED 5009 - Family and Community Engagement for Exceptional Children (3 Credit Hours)

This course focuses on family and community engagement to meet the needs of exceptional children. Content will be from a variety of literatures in education with focuses on early literacy, family involvement, access to books and expanded learning, as well as mentoring partnerships. A 25-hour field experience with P-12 students is required in the course.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Degree Restrictions: Master of Arts in Teaching

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Supervised Lab/Clinic,Independent Study,Asynchronous Instruction

SPED 5013 - SPED MAT Culminating Residency (4 Credit Hours)

An intensive practicum course designed for graduate candidates who are seeking teacher certification in Special Education (SPED) General Curriculum. A mentor teacher and university faculty member will work with the candidate to support the culminating residency. Candidates are supervised as they plan, reflect, and refine their teaching practice. Successful completion of all program course requirements is expected prior to Culminating Residency.

Corequisite(s): EDTD 5940

Lab Hours: 8 Contact Hours: 8

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Subject Restrictions: EDTD - Teacher Education **Course Level Restrictions:** Graduate Semester **Program Restrictions:** 1MAT-MAT - MAT-Master of Arts in Teaching

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Supervised Lab/Clinic,Asynchronous Instruction,Practice Teaching

Additional Course Fee: Student Teaching Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 200

SPED 5110 - Characteristics of Students with Mild Disabilities (3 Credit Hours)

An introductory course in mild disabilities which covers definitions, historical development of the area of mild disabilities as a field of study, and major contributors; various theories and philosophies affecting the field; and current trends and issues. Thirty hours of field experience is required.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Independent Study,Asynchronous Instruction

SPED 5120 - Methods of Instruction for Students with Mild Disabilities (3 Credit Hours)

This course is designed to prepare educators who are knowledgeable and competent in teaching students with mild disabilities in a variety of collaborative settings. This course encompasses research-based methodologies, learning strategies, the development of teacher-made materials, and the utilization of commercial materials. A 25-hour field experience with P-12 students is required in the course.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Supervised Lab/Clinic,Independent Study,Asynchronous Instruction

SPED 5130 - Classroom and Behavior Management (3 Credit Hours)

This course is designed to assist the pre-service teacher in developing the knowledge, skills, and attitudes required to assess, plan, and implement successful behavior management programs and strategies in the classroom. The creation of a positive classroom atmosphere in which students will learn and make behavioral choices is stressed. A 25-hour field experience with P-12 students is required in the course.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Supervised Lab/Clinic,Independent Study,Asynchronous Instruction

SPED 6007 - Literacy Fundamentals I (P-12) (3 Credit Hours)

This course is designed to examine research on literacy instruction in P-12 settings. It is particularly focused on techniques that have proven to be effective with students experiencing problems in acquiring literacy skills. Thirty hours of field experience is required.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Practice Teaching,Internship/Practicum,Thesis

SPED 6026 - Introduction to Theory and Practices for Teaching Students with Disabilities (3 Credit Hours)

This course provides certified teachers an in-depth look at the historical and theoretical development of special education. Students will examine the principles and theories of learning that serve as the basis for educational models and practices used in special education practice. Special emphasis is given to recent empirical findings and their practical applications to current educational settings.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Asynchronous Instruction,Practice Teaching,Internship/Practicum,Thesis,Dissertation

SPED 6028 - Advanced Assessment in Special Education (3 Credit Hours)

This course emphasizes elements such as: (a) the components of direct instruction, (b) systematic analysis of direct instruction techniques, (c) assessment of student response, (d) direct instruction methodologies, strategies, and techniques and troubleshooting, (e) formal & informal assessment, and (f) adapting instruction to improve outcomes.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

SPED 6500 - Advanced Studies in Special Education (3 Credit Hours)

This course is designed of the cross-categorical model of service delivery for students with emotional/behavioral disorders, mild intellectual disabilities, and learning disabilities. Emphasis is on the similarities and differences of the three categories in historical treatment, definition, characteristics, incidence, prevalence etiology, and implications for teaching. Current issues and trends in special education will be studied.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

SPED 6950 - Selected Topics in Special Education (3 Credit Hours)

This course examines problems in the light of recent knowledge and research in special education. The focus is on specifically designated areas of special education. Thirty hours of field experience is required.

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

SLPP 2100 - Introduction to Speech Language Pathology (3 credit hours)

An introduction to the study of communication sciences and disorders and the fields of speech-language pathology and audiology. Additionally, the typical speech and language development, anatomy and physiology for speech and hearing science, and etiologies, evaluation procedures, and therapy techniques for various communication disorders is included.

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

SLPP 2101 - Anatomy and Physiology of the Speech and Hearing Mechanism (3 Credit Hours)

An introduction to the anatomy and physiology of the speech and hearing mechanism with emphasis on the structure and function of the various components involved in speech and hearing. The course focuses on five subdivisions of the human body: neurological, respiratory, laryngeal, pharyngeal, and auditory. Each subsystem is examined with regard to its contribution to speech production, as well as how the subsystems work together to produce speech. The discussion section expands upon course lectures by focusing on instrumentation and methodology used in research and clinical settings to assess the structure and function of the speech mechanism in both normal and disordered populations.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)
Schedule Type (Primary): Lecture

SLPP 2102 - Introduction to Audiology (3 Credit Hours)

The fundamental aspects of hearing, including a study of the physics of sound, the anatomy of physiology of the hearing mechanism, and the etiology of hearing loss and other auditory processing difficulties.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

SLPP 2103 - Phonetics (3 Credit Hours)

A study of the International Phonetic Alphabet as applied to the English language with an analysis of the of sound both in isolation and connected speech.

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

SLPP 2104 - Clinical Observations in Speech-Language Pathology (3 Credit Hours)

Provides a basic understanding of communication and swallowing disorders across the lifespan. Students are required to complete a minimum of 25 hours of guided clinical observations under the supervision of a speech-language pathologist who holds a current Certificate of Clinical Competence in Speech-Language Pathology (CCC-SLP) from the American Speech-Language-Hearing Association (ASHA). Students also gain experience describing speech and language using both oral and written communication.

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

SLPP 2105 - Speech and Language Development (3 Credit Hours)

Acquaints students with verbal behavior, including assessing verbal behavior in individuals with language development delay and communication disorders, and designing instructional procedures to support individuals through basic and various verbal operants.

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture

SLPP 5101 - Anatomy of the Head and Neck (3 Credit Hours)

This anatomy course is a comprehensive review of head and neck anatomy and physiology using lectures, laboratory dissection, and lab demonstrations. It covers the normal structure and function of head and neck anatomy and related etiologies specific to speech-language communication, voice, hearing, and swallowing production.

Corequisite(s): SLPP 5102 and SLPP 5103 and SLPP 5104 and SLPP 5105 and SLPP 5106

Lecture Hours: 2 **Lab Hours:** 1 **Other Hours:** 0 **Contact Hours:** 3

Repeatability: May be repeated for credit up to 2 times.

College Restrictions: College of Allied Health Sciences **Major Restrictions:** Speech-Language Pathology **Student Class**

Restrictions: GS Graduate Semester **Course Level Restrictions:** GS Graduate Semester **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

Additional Course Fee: Anatomy Lab Supplies Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 400

SLPP 5102 - Cognitive Communication and Language Disorders from Infancy through Adolescence (4 Credit Hours)

This course covers in-depth study of impairments of oral language, reading, written expression, and social skills in school-age children and adolescents. It explores etiology, diagnosis, and treatment of developmental and acquired communication and language delay/disorders from infancy through adolescence. Topics are covered across three broad areas of child language: cultural and linguistic diversity (multicultural issues; ESOL), early intervention (prelinguistic communication), and social communication (pragmatic language deficits across disorders and developmental levels). Assessment and intervention techniques approaches for treating language impairment in children with disabilities, such as specific language impairment, developmental delays, and autism spectrum disorder.

Corequisite(s): SLPP 5101 and SLPP 5103 and SLPP 5104 and SLPP 5105 and SLPP 5106

Lecture Hours: 4 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 4

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Normal (A, B, C, D, F)

Major Restrictions: Speech-Language Pathology **Student Class Restrictions:** Graduate Semester **Course Level Restrictions:** Graduate Semester **Program Restrictions:** Speech-Language Pathology

Schedule Type (Primary): Lecture

SLPP 5103 - Articulation and Phonological Disorders (3 Credit Hours)

This course covers the knowledge base for developmental norms of speech sound development, evaluation, diagnosis, and treatment of articulation and phonological processes affecting disordered speech sound development.

Corequisite(s): SLPP 5101 and SLPP 5102 and SLPP 5104 and SLPP 5105 and SLPP 5106

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Normal (A, B, C, D, F)

Major Restrictions: Speech-Language Pathology

Schedule Type (Primary): Lecture

SLPP 5104 - Pediatric Assessment and Intervention (with Diagnostic Lab) (2 Credit Hours)

This course provides screening, evaluation, and assessment processes for pediatric speech-language-communication disorders. Content encompasses planning, informal, standardized assessment, and interpretation for developing appropriate goals and outcomes. The course introduces students to the process of evaluation and assessment required to identify, define, differentiate, and plan for pediatric individuals presenting with speech-language-communication disorders from birth to adolescence. Students develop prerequisite knowledge for functioning in the capacity of a diagnostician. Learning is facilitated through lectures, observation, discussion, and simulated lab screening/evaluation competencies.

Corequisite(s): SLPP 5101 and SLPP 5102 and SLPP 5103 and SLPP 5105 and SLPP 5106

Lecture Hours: 1 **Lab Hours:** 1 **Contact Hours:** 2

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Normal (A, B, C, D, F)

College Restrictions: College of Allied Health Sciences **Major Restrictions:** Speech-Language Pathology **Student Class Restrictions:** Graduate Semester **Course Level Restrictions:** Graduate Semester **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

SLPP 5105 - The Role of the Speech-Language Pathologist in Special Education (2 Credit Hours)

Speech-Language Pathologists have modified and expanded their role in the education setting in response to populations in need of their expertise and services in the areas of speech, language, cognitive-communication, voice, fluency, swallowing, and hearing loss. Graduate students in this course learn base knowledge of the integral role of the SLP as a school-based therapist. This course is designed to provide information about the range of service delivery models in schools, considerations for providing these services, and relevant resources. Topics include: meeting the tenets of the Individuals with Disabilities Education Act (IDEA; 2004) by delivering a free and appropriate public education program (FAPE) in the least restrictive environment (LRE). The complexity of caseload scheduling, MTSS (Multi-tiered Student Support) and Response to Intervention (RTI) processes, Individualized Education Plan (IEP) and IEP team participation and decision-making, the re-evaluation process, caseload management, recommending classroom supports/modifications, etc. This course addresses the challenges facing school-based SLPs (i.e., "speech teacher" title, high

caseloads, teacher salary pay scale). Topics include: legislative mandates, current issues in education impacting traditional roles of school-based SLPs, SLP Assistants/Aides, service delivery model of diverse populations (e.g., ASD, DHH), AAC in schools, best practices, multi-disciplinary collaborative practice, data collection, and accountability measures. Basic sign language skills are taught during this course.

Corequisite(s): SLPP 5101 and SLPP 5102 and SLPP 5103 and SLPP 5104 and SLPP 5106

Lecture Hours: 2 **Contact Hours:** 2

Repeatability: May not be repeated for credit up to 2 times.

Grade Mode: Normal (A, B, C, D, F)

College Restrictions: College of Allied Health Sciences **Major Restrictions:** SLPP - Speech-Language Pathology **Student Class**

Restrictions: GS Graduate Semester **Course Level Restrictions:** GS Graduate Semester **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

SLPP 5106 - Processes of Clinical Practicum and Interprofessional Education (2 Credit Hours)

This course covers the fundamentals and soft skills required before entering Clinical Practicums I, II, and III. It reviews the basic aspects of professionalism, time management, practicum expectations, treatment delivery, communication skills, interpersonal skills, behavioral management skills, intervention strategies, data collection, and documentation. In addition, the course provides information about the web-based application Clinical Assessment of Learning Inventory of Performance Streamlined Office Operations (CALIPSO) for documentation of student clinical competencies, supervision, and hours via interactive and customized data dashboards that enable knowledge management between the clinical administrator, supervisor, and student including an overview of the Level One, Two, and Three CALIPSO Clinical Competencies Rating Scales.

Corequisite(s): SLPP 5101 and SLPP 5102 and SLPP 5103 and SLPP 5104 and SLPP 5105

Lecture Hours: 1 **Lab Hours:** 1 **Contact Hours:** 2

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Normal (A, B, C, D, F)

Major Restrictions: Speech-Language Pathology

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

SLPP 5201 - Aerodigestive I (with Voice Lab) (3 Credit Hours)

The aerodigestive tract includes the airway (pharynx and larynx), pulmonary tract (trachea, bronchi, and lungs), and upper digestive tract (esophagus). This course complements SLPP 5202 and covers the initial formal education of voice disorders. It covers base knowledge of the etiology, perceptual, acoustic, and endoscopic diagnostic procedures. Emphasis is placed on the fundamental competency skills required to complete and accurately document the diagnostic procedures via instrumental evaluations. Instrumental diagnostic and hands-on experiential learning opportunities are offered using professional grade, videostroboscopy to visualize vocal fold vibration and Visi-Pitch Computerized Speech Lab (CSL) to keep pace with the increase of the medical SLP service delivery needs within the diverse SLP scope of practice. Topics include: intervention approaches for individuals with functional, neurogenic, psychogenic, resonance voice disorders, gender dysphoria, head/neck cancer, laryngectomy, velopharyngeal insufficiency, and tracheostomy and ventilator-dependent interprofessional learning opportunities with on-campus respiratory therapy academic program faculty and students.

Corequisite(s): SLPP 5202 and SLPP 5203 and SLPP 5204 and SLPP 5205 and SLPP 5206

Lecture Hours: 2 **Lab Hours:** 1 **Contact Hours:** 3

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Normal (A, B, C, D, F)

College Restrictions: College of Allied Health Sciences **Program Restrictions:** MHS_SLPA MHS-Speech Language Pathology

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

SLPP 5202 - Aerodigestive II (with Dysphagia Lab) (3 Credit Hours)

The aerodigestive tract includes the airway (pharynx and larynx), pulmonary tract (trachea, bronchi, and lungs), and upper digestive tract (esophagus). This graduate-level course complements SLPP 5201 and covers the initial formal education of swallowing and swallowing disorders. Course materials (lectures, readings, simulations, labs, and assignments) cover normal and abnormal anatomy and physiology related to swallowing function across the lifespan and in various patient populations. Emphasis is placed on the fundamental competency skills required to complete and accurately document the diagnostic procedures via instrumental evaluations using professional-grade Fiberoptic Endoscopic Evaluation of Swallowing (FEES) to keep pace with the increased medical SLP service delivery needs. Diagnostic assessment and treatment of swallowing with hands-on experiential learning includes certification

completion in the Modified Barium Swallowing Impairment Profile (MBSImp) program to develop a repertoire of best practices in interpreting swallowing function. Common patient populations are highlighted (e.g., neurologic, head and neck cancer, end of life, tracheostomy, and ventilated patients). This introductory level course in dysphagia provides students with the foundations of dysphagia that builds upon clinical externships, fellowships, and professional careers.

Corequisite(s): SLPP 5201 and SLPP 5203 and SLPP 5204 and SLPP 5205 and SLPP 5206

Lecture Hours: 2 **Lab Hours:** 1 **Contact Hours:** 3

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Normal (A, B, C, D, F)

Subject Restrictions: SLPP - Speech Language Pathology **College Restrictions:** College of Allied Health Sciences **Student Class Restrictions:** Graduate Semester **Course Level Restrictions:** Graduate Semester **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

SLPP 5203 - Aphasia and Other Neurogenic Disorders (3 Credit Hours)

This course covers acquired cognitive, communication, and language disorders as a result of neurological injury or illness in the adult population. Content focuses on etiology, characteristics, assessment, and intervention in the areas of aphasia, traumatic brain injury, right hemisphere disorder, and dementia.

Corequisite(s): SLPP 5201 and SLPP 5202 and SLPP 5204 and SLPP 5205 and SLPP 5206

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Normal (A, B, C, D, F)

College Restrictions: College of Allied Health Sciences **Major Restrictions:** SLPA - Speech-Language Pathology Program

Restrictions: MHS_SLPA - MHS-Speech Language Pathology **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture

SLPP 5204 - Medical Aspects of Speech-Language Pathology (2 Credit Hours)

Students learn a base knowledge of the relationships between SLPs, medical disciplines, and allied health disciplines (i.e., respiratory therapy, occupational therapy). The course includes medical terminology in English and Spanish, medical chart review, governing bodies of healthcare organizations, medical ethical dilemmas, report writing for the medical model of treatment, interprofessional roles and responsibilities, and tenets of teamwork.

Corequisite(s): SLPP 5201 and SLPP 5202 and SLPP 5203 and SLPP 5205 and SLPP 5206

Lecture Hours: 2 **Contact Hours:** 2

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Normal (A, B, C, D, F)

College Restrictions: College of Allied Health Sciences **Major Restrictions:** SLPA - Speech-Language Pathology Program

Restrictions: MHS_SLPA MHS-Speech Language Pathology **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture

SLPP 5205 - Clinical Practicum I (1 Credit Hour)

Adhering to the American Speech-Language-Hearing Association (ASHA) standards as dictated by the Council on Academic Accreditation (CAA) in SLP and accordance with The Council for Clinical Certification in SLP (CFCC) standards for professional certification, graduate students are required to obtain a minimum of 400 clock hours (375 supervised clinical practicum) for graduation. During this first clinical practicum, Level One graduate students participate in direct patient/client contact while supervised by an ASHA-certified clinical preceptor(s) across various therapeutic settings. Development and application of appropriate evidence-based evaluation and treatment plans, collaborative supervisory meetings, self-analysis skills, and completion of written documentation via CALIPSO are expected.

Corequisite(s): SLPP 5201 and SLPP 5202 and SLPP 5203 and SLPP 5204 and SLPP 5206

Other Hours: 1 **Contact Hours:** 1

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Normal (A, B, C, D, F)

College Restrictions: College of Allied Health Sciences **Major Restrictions:** SLPA - Speech-Language Pathology Program

Restrictions: MHS_SLPA MHS-Speech Language Pathology **Campus Restrictions:** Main Campus

Schedule Type (Primary): Internship/Practicum

SLPP 5206 - Clinical Practicum I Seminar (1 Credit Hour)

In conjunction with Clinical Practicum One, graduate students attend a 50-minute weekly class meeting to guide self-reflection of their supervised clinical training. Self-reflection focuses on self-evaluation as a Level One, novice clinician including evaluation of student therapist-patient communication, plan of care, complete diagnostic assessment and therapeutic intervention tasks, student's ability to plan for the next session, written documentation, time management, and to ensure CALIPSO platform is implemented correctly. Students identify strengths and areas to improve each week based on their knowledge and skills goals for the semester. This weekly class meeting also serves as a supplemental student advising session.

Corequisite(s): SLPP 5201 and SLPP 5202 and SLPP 5203 and SLPP 5204 and SLPP 5205

Other Hours: 1 **Contact Hours:** 1

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Normal (A, B, C, D, F)

College Restrictions: College of Allied Health Sciences **Major Restrictions:** SLPA - Speech-Language Pathology **Program**

Restrictions: MHS_SLPA MHS-Speech Language Pathology **Campus Restrictions:** Main Campus

Schedule Type (Primary): Seminar - Small Group

SLPP 5301 - Professionalism, Ethics, and Counseling in Speech-Language Pathology (3 Credit Hours)

This graduate-level course reviews and discusses the following important ASHA documents: SLP Scope of Practice, SLP Code of Ethics, Preferred Practice Patterns, and CFCC guidelines in reference to professionalism, medical/clinical ethics, and basic counseling principles as an entry-level SLP. Topics include: preparation for the Praxis Exam, SLP professional role, credentialing, ethics, legal considerations involved in the delivering SLP services, legislative mandates affecting the profession, service delivery systems, healthcare reimbursement issues, state licensure, national certification, state teacher certification requirements, job opportunities, SLP professional organizations, and professional advocacy. Students have the opportunity to participate in an interprofessional mock job interview to practice their interview skills with potential employers and program faculty from other disciplines.

Corequisite(s): SLPP 5302 and SLPP 5303 and SLPP 5304 and SLPP 5305 and SLPP 5306 and SLPP 5307

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Normal (A, B, C, D, F)

Subject Restrictions: SLPP - Speech-Language Pathology **College Restrictions:** College of Allied Health Sciences **Major**

Restrictions: SLPA - Speech-Language Pathology **Student Class Restrictions:** Professional **Program Restrictions:** MHS_SLPA -

MHS-Speech-Language Pathology **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

SLPP 5302 - Head and Neck Cancer (1 Credit Hour)

This course covers head and neck cancer diagnosis, treatment options, side effects of non-surgical and surgical treatments, oral cancer surgeries and reconstruction, laryngeal cancer surgery and reconstruction, total laryngectomy, post laryngectomy, voice rehabilitation, pulmonary rehabilitation, swallowing assessment, and treatment of all head and neck cancer diagnoses across the continuum of care. Instruction includes instruction trachs and speaking valves, patient studies, and product samples to support learning.

Corequisite(s): SLPP 5301 and SLPP 5303 and SLPP 5304 and SLPP 5305 and SLPP 5306 and SLPP 5307

Lecture Hours: 1 **Contact Hours:** 1

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Normal (A, B, C, D, F)

Subject Restrictions: SLPP - Speech-Language Pathology **College Restrictions:** College of Allied Health Sciences **Major**

Restrictions: SLPA - Speech-Language Pathology **Student Class Restrictions:** Professional **Course Level Restrictions:**

Professional Semester **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture

SLPP 5303 - Adult Assessment and Intervention (with Diagnostic Lab) (2 Credit Hours)

This graduate-level course complements SLPP 5203 by providing screening, evaluation, and assessment processes related to speech-language-communication disorders. Content encompasses planning, informal, standardized assessment, and interpretation for the development of appropriate goals and outcomes. The purpose of the course is to introduce the student to the process of adult evaluation and assessment required to identify, define, differentiate, and plan for therapeutic intervention. Students develop prerequisite knowledge for functioning in the capacity of a diagnostician. Learning is facilitated through lectures, observation, discussion, and simulated lab screening/evaluation competencies to determine the appropriate screening and evaluation tool(s) to diagnose and treat adults with speech-language, cognitive and/or communication impairments secondary to a new medical onset.

Corequisite(s): SLPP 5301 and SLPP 5302 and SLPP 5304 and SLPP 5305 and SLPP 5306 and SLPP 5307

Lecture Hours: 1 **Lab Hours:** 1 **Contact Hours:** 2

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Normal (A, B, C, D, F)

College Restrictions: College of Allied Health Sciences **Major Restrictions:** SLPA - Speech-Language Pathology **Student Class Restrictions:** Professional **Program Restrictions:** MHS_SLPA - MHS-Speech-Language Pathology **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

SLPP 5304 - Fluency (1 Credit Hour)

This course provides the master's level student in speech language pathology with understanding of the complex issues which surround the successful treatment of fluency disorders, including familial considerations and counseling. By the conclusion of this course, students should be able to demonstrate knowledge of the nature of stuttering and other fluency disorders, including etiological theories, characteristics of the disorder anatomical and physiological bases and correlates of fluency disorders, developmental features of fluency disorders, psychological correlates of fluency disorder, linguistic factors relating to fluency disorders, and social and cultural considerations in the assessment and treatment of fluency disorders.

Corequisite(s): SLPP 5301 and SLPP 5302 and SLPP 5303 and SLPP 5305 and SLPP 5306 and SLPP 5307

Lecture Hours: 1 **Contact Hours:** 1

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Normal (A, B, C, D, F)

College Restrictions: College of Allied Health Sciences **Major Restrictions:** SLPA - Speech-Language Pathology **Student Class Restrictions:** Professional **Program Restrictions:** MHS_SLPA - MHS-Speech-Language Pathology **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

SLPP 5305 - SLP Research and Design I (1 Credit Hour)

This course introduces the principles of research culminating in a Capstone research project that will be completed/presented in SLPP 6404. Students learn the essential components of a peer-reviewed empirical research study related to SLP clinical application and evidence-based treatment.

Corequisite(s): SLPP 5301 and SLPP 5302 and SLPP 5303 and SLPP 5304 and SLPP 5306 and SLPP 5307

Lecture Hours: 1 **Contact Hours:** 1

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Normal (A, B, C, D, F)

College Restrictions: College of Allied Health Sciences **Major Restrictions:** SLPA - Speech-Language Pathology **Student Class Restrictions:** Graduate Semester **Course Level Restrictions:** Professional Semester **Program Restrictions:** MHS_SLPA - MHS-Speech-Language Pathology **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture

SLPP 5306 - Clinical Practicum II (1 Credit Hour)

During this second clinical practicum, Level Two graduate students participate in direct patient/client contact while supervised by an ASHA-certified clinical preceptor(s) across a variety of therapeutic settings. Development and application of appropriate evidence-based evaluation and treatment plans, collaborative supervisory meetings, self-analysis skills, and completion of written documentation via CALIPSO are expected. Adhering to the American Speech-Language-Hearing Association (ASHA) standards as dictated by the Council on Academic Accreditation (CAA) in SLP and in accordance with The Council for Clinical Certification in SLP (CFCC) standards for professional certification, graduate students are required to obtain a minimum of 400 clock hours (375 supervised clinical practicum) for graduation.

Corequisite(s): SLPP 5301 and SLPP 5302 and SLPP 5303 and SLPP 5304 and SLPP 5305 and SLPP 5307

Lecture Hours: 1 **Contact Hours:** 1

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Normal (A, B, C, D, F)

College Restrictions: College of Allied Health Sciences **Major Restrictions:** SLPA - Speech-Language Pathology **Student Class Restrictions:** Professional **Course Level Restrictions:** Professional Semester **Program Restrictions:** MHS_SLPA - MHS-Speech-Language Pathology **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

SLPP 5307 - Clinical Practicum II Seminar (1 Credit Hour)

In conjunction with Clinical Practicum II, Level Two graduate students attend a 50-minute weekly class meeting to guide self-reflection of their supervised clinical training. Self-reflection focuses on self-evaluation as a Level 2 clinician, including evaluation of student therapist-patient communication, plan of care, complete diagnostic assessment and therapeutic intervention tasks, student's ability to plan for the next session, written documentation, time management, and to ensure CALIPSO platform is implemented correctly. Students identify strengths and areas to improve each week based on their knowledge and skills goals for the semester. This weekly class meeting also serves as a supplemental student advising session.

Corequisite(s): SLPP 5301 and SLPP 5302 and SLPP 5303 and SLPP 5304 and SLPP 5305 and SLPP 5306

Lecture Hours: 1 Contact Hours: 1

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Normal (A, B, C, D, F)

College Restrictions: College of Allied Health Sciences **Major Restrictions:** SLPA - Speech-Language Pathology **Student Class Restrictions:** Professional **Program Restrictions:** MHS_SLPA - MHS-Speech-Language Pathology **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

SLPP 6401 - Oral Motor, Feeding, and Neurologically Based Pediatric Dysphagia (with Lab) (3 Credit Hours)

Students are trained in assessing and managing feeding and motor speech disorders from infancy to adolescence. This course covers analysis, synthesis, and evaluation of etiologies, characteristics, anatomical/physiological, neurophysiological, acoustic, psychological, developmental, and linguistic/cultural correlates of pediatric feeding, eating, and swallowing. Explore the three phases of swallowing (oral, pharyngeal, esophageal), oral-motor function, reflux, sensory and feeding aversions, and Modified Barium Swallow Studies (MBSS). Topics include: craniofacial anomalies and genetic disorders resulting in swallowing disorders. This course also includes a discussion of the nature, etiology, diagnosis, and management of motor speech disorders with emphasis on differential diagnosis and treatment across all settings. Topics include: executive function, learning, attention, and processing. Learning will be facilitated through lectures, observation, discussion, and hands-on lab clinical competencies.

Corequisite(s): SLPP 6402 and SLPP 6403 and SLPP 6404 and SLPP 6405 and SLPP 6406

Lecture Hours: 2 Lab Hours: 1 Contact Hours: 3

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Normal (A, B, C, D, F)

College Restrictions: College of Allied Health Sciences **Major Restrictions:** SLPA - Speech-Language Pathology **Student Class Restrictions:** Professional **Course Level Restrictions:** Professional Semester **Degree Restrictions:** MHS- Master of Health Science in Speech-Language Pathology **Program Restrictions:** MHS_SLPA - MHS-Speech-Language Pathology **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

SLPP 6402 - Augmentative and Alternative Communication (AAC) and Hearing Rehabilitation (2 Credit Hours)

This course covers a base knowledge of AAC from low to high technology utilizing the Student, Environment, Tasks and Tools (SETT) framework. The course provides a comprehensive overview of evidence-based augmentative and alternative communication (AAC) systems, assessment, and intervention to enhance the communication and participation of children and adults with developmental and acquired conditions who have complex communication needs. It also includes the integral role of the SLP with an interprofessional approach of AAC services for individuals with complex communication needs who experience a wide range of disabilities, including autism spectrum disorder, cerebral palsy, Down syndrome, amyotrophic lateral sclerosis (ALS), traumatic brain injury, aphasia, and dementia. Aural rehabilitation topics are covered.

Corequisite(s): SLPP 6401 and SLPP 6403 and SLPP 6404 and SLPP 6405 and SLPP 6406

Lecture Hours: 2 Contact Hours: 2

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Normal (A, B, C, D, F)

Subject Restrictions: SLPP - Speech-Language Pathology **College Restrictions:** College of Allied Health Sciences **Major Restrictions:** SLPA - Speech-Language Pathology **Student Class Restrictions:** Professional **Course Level Restrictions:** Professional Semester

Program Restrictions: MHS_SLPA - MHS-Speech-Language Pathology **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

SLPP 6403 - Cultural Responsiveness in Speech-Language Pathology (2 Credit Hours)

This course covers multicultural issues in SLP across all aspects to reflect diversity, equity, and inclusion of the visible and invisible diversity of our ever-evolving global society to meet the speech, language, swallowing needs across our culturally diverse population. Explore DEI initiatives to gain awareness and sensitivity to remove structural and social barriers in the therapeutic setting to optimize evaluation and treatment. Graduate students participate in open discussions regarding issues in the provision of services to multicultural populations including cultural norms, cultural competence, and the SLP scope of practice. Graduate students have the opportunity to participate in service-learning opportunities via AU-related health fair opportunities (i.e., Costa-Layman Outreach Health Fair sponsored by the College of Nursing, Clinica Latina, and Equality Clinic sponsored by the Medical College of Georgia).

Corequisite(s): SLPP 6401 and SLPP 6402 and SLPP 6404 and SLPP 6405 and SLPP 6406

Lecture Hours: 2

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Normal (A, B, C, D, F)

Subject Restrictions: SLPP - Speech-Language Pathology **College Restrictions:** College of Allied Health Sciences **Major**

Restrictions: SLPA - Speech-Language Pathology **Student Class Restrictions:** Professional **Course Level Restrictions:**

Professional Semester **Program Restrictions:** MHS_SLPA - MHS-Speech-Language Pathology **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

SLPP 6404 - SLP Research and Design II (3 Credit Hours)

This graduate-level course is part two of SLPP 5305. Students complete the Capstone project via a literature review on a topic of their choice, focusing on SLP best practices related to a diagnosis, clinical application, and/or evidence-based treatment across the lifespan. Graduate students submit a research proposal for poster submission(s) to the Georgia Speech-Language-Hearing Association (GSHA) and/or American Speech-Language-Hearing Association (ASHA) Convention.

Corequisite(s): SLPP 6401 and SLPP 6402 and SLPP 6403 and SLPP 6405 and SLPP 6406

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Normal (A, B, C, D, F)

Subject Restrictions: SLPP - Speech-Language Pathology **College Restrictions:** College of Allied Health Sciences **Major**

Restrictions: SLPA - Speech-Language Pathology **Student Class Restrictions:** Professional **Course Level Restrictions:**

Professional Semester **Program Restrictions:** MHS_SLPA - MHS-Speech-Language Pathology **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

SLPP 6405 - Clinical Practicum III (1 Credit Hour)

During this third and final clinical practicum, Level Two graduate students participate in direct patient/client contact while supervised by an ASHA-certified clinical preceptor(s) across a variety of therapeutic settings. Development and application of appropriate evidence-based evaluation and treatment plans, collaborative supervisory meetings, self-analysis skills, and completion of written documentation via CALIPSO are expected. Adhering to the American Speech-Language-Hearing Association (ASHA) standards as dictated by the Council on Academic Accreditation (CAA) in SLP, and in accordance with The Council for Clinical Certification in SLP (CFCC) standards for professional certification, graduate students are required to obtain a minimum of 400 clock hours (375 supervised clinical practicum) for graduation.

Corequisite(s): SLPP 6401 and SLPP 6402 and SLPP 6403 and SLPP 6404 and SLPP 6406

Lecture Hours: 1 **Contact Hours:** 1

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Normal (A, B, C, D, F)

Subject Restrictions: SLPP - Speech-Language Pathology **College Restrictions:** Department of Allied Health Professions **Major**

Restrictions: SLPA - Speech-Language Pathology **Student Class Restrictions:** Professional **Course Level Restrictions:**

Professional Semester **Program Restrictions:** MHS_SLPA - MHS-Speech-Language Pathology **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

SLPP 6406 - Clinical Practicum III Seminar (1 Credit Hour)

In conjunction with Clinical Practicum III, Level Two graduate students attend a 50-minute weekly class meeting to guide self-reflection of their supervised clinical training. Self-reflection focuses on self-evaluation as a novice clinician, including evaluation of student therapist-patient communication, plan of care, complete diagnostic assessment and therapeutic intervention tasks, student's ability to plan for the next session, written documentation, time management, and to ensure CALIPSO platform is implemented correctly. Students identify strengths and areas to improve each week based on their knowledge and skills goals for the semester. This weekly class meeting also serves as a supplemental student advising session.

Corequisite(s): SLPP 6401 and SLPP 6402 and SLPP 6403 and SLPP 6404 and SLPP 6405

Lecture Hours: 1 Contact Hours: 1

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Normal (A, B, C, D, F)

Subject Restrictions: SLPP - Speech-Language Pathology **College Restrictions:** College of Allied Health Sciences **Major**

Restrictions: SLPA - Speech-Language Pathology **Student Class Restrictions:** Professional **Course Level Restrictions:**

Professional Semester **Program Restrictions:** MHS_SLPA - MHS-Speech-Language Pathology **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

SLPP 6501 - Pediatric Externship (11 Credit Hours)

Adhering to the American Speech-Language-Hearing Association (ASHA) standards as dictated by the Council on Academic Accreditation (CAA) in SLP and in accordance with The Council for Clinical Certification in SLP (CFCC) standards for professional certification, graduate students are required to obtain a minimum of 400 clock hours (375 supervised clinical practicum) for graduation. During this pediatric externship, Level Three graduate students participate in direct patient/client contact while supervised by an ASHA-certified clinical preceptor(s) to refine their clinical independence during a full-time clinical experience. Graduate students demonstrate entry-level SLP clinical competency skills by providing meaningful and efficient patient care management, independently gather and use relevant information including co-morbidities, cultural and social background, and social support to develop and implement a plan of care with other specialties for optimal patient outcomes.

Corequisite(s): SLPP 6502

Other Hours: 11 Contact Hours: 11

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Normal (A, B, C, D, F)

Subject Restrictions: SLPP - Speech-Language Pathology **College Restrictions:** College of Allied Health Sciences **Major**

Restrictions: SLPA - Speech-Language Pathology **Student Class Restrictions:** Professional **Course Level Restrictions:**

Professional Semester **Program Restrictions:** MHS_SLPA - MHS-Speech-Language Pathology **Campus Restrictions:** Main Campus

Schedule Type (Primary): Internship/Practicum

SLPP 6502 - Pediatric Externship Seminar (1 Credit Hour)

In conjunction with the Pediatric Externship, graduate students attend a 50-minute weekly class meeting to guide self-reflection of their supervised clinical training. Self-reflection focuses on self-evaluation as an independent clinician and soon-to-be entry-level SLP, including evaluation of extern-patient communication, plan of care, complete diagnostic assessment and therapeutic intervention tasks, written documentation, time management, and to ensure CALIPSO platform is implemented correctly. Students identify strengths and areas to improve each week based on their knowledge and skills goals for the semester. This weekly class meeting also serves as a supplemental student advising session.

Corequisite(s): SLPP 6501

Other Hours: 1 Contact Hours: 1

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Normal (A, B, C, D, F)

Subject Restrictions: SLPP - Speech-Language Pathology **College Restrictions:** College of Allied Health Sciences **Major**

Restrictions: SLPA - Speech-Language Pathology **Student Class Restrictions:** Professional **Course Level Restrictions:**

Professional Semester **Program Restrictions:** MHS_SLPA - MHS Speech-Language Pathology **Campus Restrictions:** Main Campus

Schedule Type (Primary): Seminar Small Group

SLPP 6601 - Adult Externship (8 Credit Hours)

Adhering to the American Speech-Language-Hearing Association (ASHA) standards as dictated by the Council on Academic Accreditation (CAA) in SLP and in accordance with The Council for Clinical Certification in SLP (CFCC) standards for professional certification, graduate students are required to obtain a minimum of 400 clock hours (375 supervised clinical practicum) for graduation. During this adult externship, graduate students participate in direct patient/client contact while supervised by an ASHA-certified clinical preceptor(s) to refine their clinical independence during a full-time clinical experience. Graduate students demonstrate entry-level SLP clinical competency skills by providing meaningful and efficient patient care management, independently gather and use relevant information including co-morbidities, cultural and social background, and social support to develop and implement a plan of care with other specialties for optimal patient outcomes.

Corequisite(s): SLPP 6602

Other Hours: 8 Contact Hours: 8

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Normal (A, B, C, D, F)

Subject Restrictions: SLPP - Speech-Language Pathology **College Restrictions:** College of Allied Health Sciences **Major Restrictions:** SLPA - Speech-Language Pathology **Student Class Restrictions:** Professional **Course Level Restrictions:** Professional Semester **Program Restrictions:** MHS_SLPA - MHS-Speech-Language Pathology **Campus Restrictions:** Main Campus **Schedule Type (Primary):** Internship/Practicum

SLPP 6602 - Adult Externship Seminar (1 Credit Hour)

In conjunction with the Adult Externship, graduate students attend a 50-minute weekly class meeting to guide self-reflection of their supervised clinical training. Self-reflection focuses on self-evaluation as an independent clinician and soon-to-be entry-level SLP including evaluation of extern-patient communication, plan of care, complete diagnostic assessment and therapeutic intervention tasks, written documentation, time management, and to ensure CALIPSO platform is implemented correctly. Students identify strengths and areas to improve each week based on their knowledge and skills goals for the semester. This weekly class meeting also serves as a supplemental student advising session.

Corequisite(s): SECR 6601

Other Hours: 1 **Contact Hours:** 1

Repeatability: May be repeated for credit up to 2 times.

Grade Mode: Normal (A, B, C, D, F)

SPMT 2100 - Introduction to Sport Management (3 Credit Hours)

Introduction to sport management, covering its history, foundational principles, and the diverse segments of the sport industry, from youth to professional levels. The course also addresses international sports, ethical issues, and the AU Sport Management program, offering educational and experiential opportunities crucial for future sport managers. The management skills gained are widely applicable across various businesses and organizations.

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Asynchronous Instruction

SPMT 3400 - Current Issues in Sports Management (3 Credit Hours)

Explores the most pressing trends and challenges in the sports industry today, including athlete compensation, engagement, mental health, technological innovations, and the global nature of sports. Through critical analysis and case studies, students gain practical insights into how these issues impact sports organizations and management practices. By the course's conclusion, students are equipped with the skills and knowledge to effectively navigate the evolving sports management landscape.

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SPMT 3450 - E-Sport Management (3 Credit Hours)

An introduction to E-Sport Management, covering the unique aspects of the rapidly growing esports industry. Students explore the history, structure, and key stakeholders of esports, as well as essential management principles, including event planning, marketing, and legal considerations. The course prepares students for careers in the dynamic world of esports by providing foundational knowledge and practical insights into this evolving industry.

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Asynchronous Instruction **Schedule Type (Additional):** Lecture

SPMT 3500 - Sports Ethics (3 Credit Hours)

The course is designed to provide an examination and discussion of ethical, managerial and moral issues related to individuals who work and participate in the area of sport and physical activity. A primary focus will be sport as a tool for social change. Through readings, interactive discussions, and case studies, students will develop the knowledge and skills to better understand and apply sound principles as they relate to moral character and corresponding ethical issues.

Lecture Hours: 3 **Lab Hours:** 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SPMT 3510 - Sport Marketing (3 Credit Hours)

Sport Marketing is designed to introduce students to the application of the principles of marketing to the managed sport industry with emphasis on intercollegiate athletics, professional sport, and multi-sport club operations. The function of the course is to provide students with an up-to-date understanding of marketing concepts as they are currently being applied in various sport management contexts; and it is intended to provide a foundation for those students who plan to do advanced study and work in marketing, consumer behavior and related fields.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SPMT 3550 - Legal Issues in Sports (3 Credit Hours)

Introduces the U.S. legal system, statutes, standards, and case law that establish legal responsibilities, rights, privileges, and controls related to the field of sport management. Students study and analyze the law as it pertains to sport/physical activity programs, as well as examine how courts have interpreted and applied laws.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SPMT 4140 - Organizational Behavior in Sport (3 Credit Hours)

This course equips students with essential skills to analyze organizational behavior and lead effectively in the sport industry. Students learn to make strategic decisions, influence and motivate others, manage organizational culture, and optimize team performance. The course also addresses the challenges of health and safety, technology, climate change, and engagement, preparing students to drive meaningful change and achieve success in the dynamic world of sport management.

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SPMT 4510 - Financial Management of Sport (3 Credit Hours)

This course will provide an in-depth view of the sport industry, team and business finances, and impact of fan loyalty and sponsorship on revenues. Various topics related to sport finance will be examined including facilities, policies, team salaries, and collegiate sport finances. Students will review case studies and analyze the principles of economics and finance focusing on the application of those principles to the sport industry.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SPMT 4540 - Management of Sport and Physical Activity Organizations (3 Credit Hours)

Sports event management introduces students to the planning and management of sport events through the strategic and systematic process of event management that includes phases and structural domains associated with the EMBOK model. Students learn key

managerial issues associated with project management, logistics, risk management, sustainability, sponsorship, human resources, and contracts among other topics through case studies, readings, discussions, lectures, and assignments.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SPMT 4600 - International Sport Management (3 Credit Hours)

An in-depth overview of how sport is organized, managed, funded, and governed globally. Students explore the international sport environment, focusing primarily on sports outside the USA. Topics include: global sports events, governance, key organizations, business and financial aspects, marketing, and cultural significance. By the end of the course, students will gain a comprehensive understanding of international sport systems, key trends, and the global sport calendar.

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 3 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SPMT 4710 - Management and Governance of Sport Organizations (3 Credit Hours)

Explores the key factors behind the success and failure of sport organizations, focusing on the dynamic relationship between strategy and environment. Students learn to evaluate threats, opportunities, strengths, and weaknesses for strategic decision-making. Emphasizing entrepreneurship and innovation, the course covers strategy formulation and implementation, integrating knowledge from core sport management areas to provide a comprehensive understanding of strategic management's role in achieving sustained success.

Lecture Hours: 3 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

SPMT 4960 - Internship in Sports Management (6 Credit Hours)

The purpose of the internship is to provide the student with experience in the sports management field. The internship will further the development of professional and educational competence and provide students an opportunity to apply the knowledge/skills learned from their coursework to their chosen profession. All internship locations must be pre-approved by an advisor and site coordinator.

Lecture Hours: 0 **Lab Hours:** 0 **Other Hours:** 0 **Contact Hours:** 6

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Department of Kinesiology **Department Restrictions:** Education: Dept. of Kinesiology **Degree Restrictions:**

BA- Bachelor of Arts with a Major in Sports Management

Schedule Type (Primary): Internship/Practicum

STAT 4020 - Statistics and Research Methodology (3 Credit Hours)

This course provides an introduction to research methodology and principles including basic methods of statistical analysis. Topics include descriptive and inferential statistics, basic probability, nonparametrics, epidemiology, and research designs. Students will create data summaries and perform statistical analyses using a statistical software package.

Prerequisite(s): MATH 1111 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

STAT 6300 - Introduction to Epidemiology and Biostatistics (3 Credit Hours)

This course introduces the basic principles and methods of epidemiology and biostatistics. Introduction to epidemiology will cover topics on uses of epidemiology, measures of morbidity and mortality, descriptive epidemiology, screening, outbreak investigation, and study

designs. Introduction to biostatistics will cover topics on methods to summarize data using descriptive statistics, basic concepts of hypothesis testing, and statistical methods appropriate for different data types.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

STAT 7010 - Biostatistics I (3 Credit Hours)

An introduction to the basic statistical techniques used to analyze and interpret data in the health sciences and related fields. Emphasis is on application of these methods. Topics include: graphical methods, probability, discrete and continuous distribution, inferential statistics (estimation and hypothesis testing) for numeric and categorical data, non-parametric methods, analysis of variance, regression, correlation and critical reading of the research literature.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_AHSC, MPH_HINF, MCTS_CTS, MSPED_EPID, CREM_CTS

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

STAT 7020 - Biostatistics II (3 Credit Hours)

This course is the second course in a two-course sequence in Biostatistics that offers an introduction to some of the more advanced statistical techniques used to analyze and interpret data in the health sciences and related fields. Emphasis is on applications of these methods. Topics include factorial ANOVA, multiple linear regression and correlation, ANCOVA, logistic regression, longitudinal data analysis, survival analysis, clinical trials, experimental design, epidemiology, diagnostic tests, and critical reading of the research.

Prerequisite(s): STAT 7010 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_AHSC, MCTS_CTS, MSPED_EPID, CREM_CTS

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

STAT 7030 - Seminar in Clinical and Translational Science (2 Credit Hours)

This course consists of clinical and translational research seminars by faculty members and visiting researchers. Students will have an opportunity to talk to each speaker informally and to serve as hosts to visiting scientists.

Lecture Hours: 2

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: CERCTS_CTS, CERM_CTS, MCTS_CTS

Schedule Type (Primary): Seminar - Small Group

STAT 7040 - Mentored Research in Clinical and Translational Science (1 to 12 Credit Hours)

Students work closely with their faculty mentors and advisory committee on an in-depth study of a research question of interest to both student and mentors. The course may be repeated as necessary until the student completes the research. Prerequisite: Permission of clinical and translational science program and admission in the clinical and translational science program.

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: CERCTS_CTS, CERM_CTS, MCTS_CTS

Schedule Type (Primary): Thesis

STAT 7060 - Research Design and Statistics (1 Credit Hour)

The primary objective of this course is to provide students with an understanding of basic concepts and methods of statistical inference in the biomedical health sciences. Upon completion of the course, students should be able to understand, interpret, and critique the

results of application of statistical techniques as found in the health sciences literature. This course is comprised of eight WebCT modules with voice-overs and remote administration/testing capabilities. Prerequisites: College algebra and permission of the instructor.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

STAT 7070 - Biomedical Statistics (3 Credit Hours)

This course offers an introduction to the majority of statistical techniques used to analyze and interpret data in the biomedical-sciences and related fields. Emphasis is on applications of these methods, with the following topics covered: graphical methods, probability, discrete and continuous distributions, inferential statistics (estimation and hypothesis testing) for numeric and categorical data, non-parametric methods, analysis of variance, regression, and correlation.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

STAT 7110 - Statistical Models and Methods (3 Credit Hours)

This course offers an introduction to the basic statistical techniques used to analyze and interpret data in scientific research. Emphasis is on statistical reasoning and applications of statistical methods including graphical visualization, estimation and hypothesis testing, categorical data analysis, non-parametric methods, analysis of variance, regression, and correlation

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_BIOS, MS_BIOS, MS_DSCI **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

STAT 7130 - Introduction to Epidemiology (3 Credit Hours)

This course introduces the basic principles of epidemiology and demonstrates its applicability in the field of public health. Topics to be covered include uses of epidemiology, measures of morbidity and mortality, descriptive epidemiology, epidemiological data sources, study designs, screening and its characteristics, and sources of and ways to address bias in research. Students will also learn about disease causation, epidemiologic triad in disease causality, and outbreak investigation.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Asynchronous Instruction

STAT 7240 - Introduction to Clinical Trials (3 Credit Hours)

This introductory course will address basic and advanced statistical techniques used in clinical trials. Material presented will include the principles underlying the planning, management and implementation of clinical trials, the application of basic statistical methods used in the analysis of data from clinical trials, and the interpretation of results.

Prerequisite(s): (STAT 7010 $\geq$ C or STAT 7110 $\geq$ C) and STAT 7020 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: MSEPD_EPID, MCTS_CTS

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

STAT 7260 - Design Analysis and Observational Studies (3 Credit Hours)

Advantages and disadvantages of prospective and retrospective study designs; design and analysis issues in both cohort and case-control studies, including proper selection of study subjects, data quality, sources and types of bias, controlling for confounding, maximizing participation and minimizing loss to follow-up in prospective studies, power and sample size; statistical methods including

categorical data analysis, logistic regression, Cox regression; use of statistical packages such as SAS and StatXact for analysis. Review and discussion of current representative studies.

Prerequisite(s): (STAT 7010 >= C or STAT 7110 >= C) and EPID 7130 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_BIOS, MS_BIOS, MS_DSCI, MCTS_CTS, MSEP_D_EPID

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

STAT 7350 - Epidemic Investigation (3 Credit Hours)

The course will provide students with the foundations in epidemic investigation with emphasis on infectious diseases. The course will start by defining causative agents, disease occurrence, reservoir, and mode of transmission and provide examples of outbreaks and end with detailed description of methods of control (preventive and control measures) and steps of outbreak investigation.

Prerequisite(s): STAT 7010 >= C and STAT 7130 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

STAT 7360 - Systematic Reviews (3 Credit Hours)

This course covers systematic reviews of the literature for controlled clinical trials and observational studies. Statistical methods and computer software is reviewed and how to use systematic reviews in practice is detailed. Topics to be covered are introduction to systematic reviews and meta analysis, systematic reviews of controlled clinical trials, investigating variability between studies, systematic reviews of observational studies, statistical methods and computer software, using systematic reviews in practice, the Cochrane Collaboration, and other evidence-based medicine topics.

Prerequisite(s): STAT 7010 >= C and STAT 7020 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

STAT 7370 - Intermediate Epidemiology (3 Credit Hours)

Illustrates concepts, methods, and strategies used in epidemiology studies, beyond the principles discussed in basic epidemiology courses. Topics include basic study designs, analysis of birth cohorts, measures of disease frequency and association, bias, confounding, effect modification and interaction, stratification and adjustment, quality control, and reporting of epidemiologic results. In the exercises, students work in small groups, further considering and discussing the topics and concepts covered in lectures.

Prerequisite(s): STAT 7110 >= C and STAT 7130 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture

STAT 7520 - Statistical Theory I (3 Credit Hours)

Fundamentals of random variables and probability theory, discrete and continuous distributions, exponential families; joint, marginal, and conditional distributions, functions of random variables, transformation and change of variables, order statistics, convergence concepts, central limit theorem, sampling distributions.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_BIOS, MS_BIOS

Schedule Type (Primary): Lecture

STAT 7533 - Medical Genetics and Genetic Epidemiology (3 Credit Hours)

Advanced statistical analyses specific for medical and health data and designs involving humans. Topics included are linkage analyses, association studies, linkage disequilibrium mapping, segregation analyses, and gene and environment interaction.

Prerequisite(s): STAT 8432 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_BIOS, MS_BIOS **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture

STAT 7620 - Statistical Theory II (3 Credit Hours)

Point and interval estimation, hypothesis and significance testing maximum likelihood and moment estimators, Bayes estimators, unbiased estimators, sufficiency and completeness, Fisher information, uniformly most powerful tests, likelihood ratio tests, asymptotic inference, introduction to Bayesian inference.

Prerequisite(s): STAT 7520 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_BIOS, MS_BIOS

Schedule Type (Primary): Lecture

STAT 7630 - Applied Linear Models (3 Credit Hours)

This course will cover simple linear regression with extension to multiple linear regression models including model selection, validation, diagnostics and remedial measures. Additionally, one-way analysis of variance (ANOVA), multiple treatment comparisons, factorial ANOVA, randomized complete-block designs, analysis of covariance (ANCOVA), ANOVA with unbalanced data, fixed-/random-/mixed-effect models, repeated-measures designs, and nested designs. SAS will be used for applying these methods to biomedical data.

Prerequisite(s): ((DATS 7100 $\geq$ C or STAT 7110 $\geq$ C) and DATS 7510 $\geq$ C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_BIOS, MS_BIOS, MS_DSCI **Campus Restrictions:** AU Online

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

STAT 7640 - Generalized Linear Models I (3 Credit Hours)

Fitting of generalized linear models, diagnostics, contingency tables, categorical data analysis, measures of agreement, asymptotic theory, overdispersion, quasi-likelihood, multicategorical responses.

Prerequisite(s): STAT 7620 $\geq$ C and STAT 7630 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_BIOS, MS_BIOS

Schedule Type (Primary): Lecture

STAT 7650 - Introduction to Stochastic Processes (3 Credit Hours)

Finite probability models, Markov chains, martingales, random walk, Poisson processes, model elements of renewal and reliability theory, Brownian motion, stochastic differential equations.

Prerequisite(s): STAT 7520 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_BIOS, MS_BIOS
Schedule Type (Primary): Lecture

STAT 7670 - Modern Methods of Multivariate Analysis (3 Credit Hours)

This course is designed as a first course in multivariate analysis, with emphasis on learning theoretical concepts and corresponding analytical tools in R. Topics to be covered include: discrete and continuous multivariate distributions, MANOVA, multivariate multiple regression, principal component analysis, discriminant analysis, canonical correlation analysis, dimension reduction methods such as multidimensional scaling and stochastic neighborhood embedding, data visualization, Gaussian graphical models and high dimensional inference. Upon successful completion of the course, the students will have sufficient practical knowledge for analyzing any multivariate data set. In this course, topics relevant to modern day problems in big data analysis are discussed and the multivariate tools necessary to tackle them are discussed.

Prerequisite(s): DATS 7100 $\geq$ C or STAT 7630 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_BIOS, MS_BIOS, MS_DSCI **Campus Restrictions:** AU Online

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

STAT 7720 - Survival Analysis (3 Credit Hours)

This course offers an introduction to the analysis of observed times to events, e.g., times to death (survival times). The course focuses on methods of regression generalized to the case of censored survival data. Regression models studied include non-parametric (Kaplan-Meier), semi-parametric (Cox's PH Model), and parametric regression models (Exponential, Weibull, Log-Logistic, & others). Other topics covered include model development, model adequacy, extensions to the Cox PH model, recurrent event models and frailty models.

Prerequisite(s): STAT 7620 $\geq$ C and STAT 7630 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_BIOS, MS_BIOS

Schedule Type (Primary): Lecture

STAT 7740 - Design and Analysis of Clinical Trials (3 Credit Hours)

This course will examine the design of and statistical methods used in clinical trials including, but not limited to, dose finding designs, factorial designs, sequential and adaptive designs; randomization and treatment assignment techniques; blinding; interim analysis considerations and stopping rules; statistical methods for analysis of continuous, categorical and time to event data; power and sample size considerations for equivalence, non-inferiority, superiority, or differences; and data monitoring.

Prerequisite(s): STAT 7630 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_BIOS, MS_BIOS

Schedule Type (Primary): Lecture

STAT 7750 - Introduction to Genetic Analysis (3 Credit Hours)

This course provides a basic introduction to genetics, and aims to connect fundamental principles of biology, genetics, and evolution to mathematical and statistical models used in genetic research. Topics include statistical aspects of human population genetics, genetics in epidemiology, theoretical basis of genetic analysis, single locus and multilocus inheritance, different types of genetic variation and how any of these concepts could be quantified in statistical and/or mathematical models.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_BIOS, MS_BIOS, MS_DSCI **Campus Restrictions:** AU Online

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

STAT 7850 - Omics Data Analysis (3 Credit Hours)

This course will cover quality assessment and normalization of arrays; Summarization of various array-based assays: CGH, ChIP and methylation; Issues for high-throughput sequencing data; Tests of significance and multiple comparisons; Multivariate analysis of pathways and GO functional groups.

Prerequisite(s): DATS 7510 >=C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_BIOS, MS_BIOS, MS_DSCI **Campus Restrictions:** AU Online

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

STAT 7870 - Biostatistical Consulting in Research (3 Credit Hours)

This course is designed for student to gain practical experience in integration of statistical theory and application in current research, systematic formulation of research problems, data formatting, data collection, study design, data analysis, and interpretation and communication of results.

Prerequisite(s): STAT 7620 >= C and STAT 7630 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_BIOS, MS_BIOS

Schedule Type (Primary): Lecture

STAT 7880 - Special Topics (1 to 3 Credit Hours)

This course is designed to cover special topics in theory and methods of Biostatistics that are not covered in regular courses. The topics will depend on the research interests of the instructor and the students. Prerequisites: Permission of Instructor.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_BIOS, MS_BIOS

Schedule Type (Primary): Lecture

STAT 7910 - Biostatistical Consulting Project (1 to 12 Credit Hours)

Required course for master of science students who choose the non-thesis option. Consists of one or more consulting project write-up(s), directed by a biostatistics faculty member. A formal oral presentation is required at the conclusion of the consulting project(s).

Contact Hours: 1 to 12

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MS_BIOS

Schedule Type (Primary): Thesis

STAT 7920 - Thesis Research (1 to 12 Credit Hours)

Prerequisite: Consent of major advisor. The thesis project for the MS program will be for two types: (i) use of established but state-of-the-art statistical tools to analyze and report on collected data sets; or (ii) a rigorous review of statistical literature, possibly involving a small amount of methodological research, that has potential use in complex biomedical data analysis.

Contact Hours: 1 to 12

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MS_BIOS

Schedule Type (Primary): Thesis

STAT 8150 - Advanced Genomic Data Analysis (3 Credit Hours)

This course introduces statistical methods for describing variation in qualitative and quantitative (disease) traits using genomic data. Topics include transmission of genes in populations, heritability, polygenic and multi-factorial traits, methods of mapping and characterizing simple and complex trait loci, pedigree analysis, variance components estimation, likelihood based and Bayesian interval mapping, inference of demographics and population ancestry, and use of public domain genetic analysis software.

Prerequisite(s): STAT 7110 >= C or DATS 7100 >=C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_BIOS, MS_BIOS, MS_DSCI

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

STAT 8160 - Analysis of Clustered and Correlated Data (3 Credit Hours)

Advanced topics in the analysis of clustered and correlated data, including correlation analysis, tests of correlation and covariance structure, repeated measures analysis, measures of agreement, and cluster-randomized trials. Instruction will be given in the proper use of software to carry out the analyses. Emphasis will be placed on methods and models most useful in clinical research.

Prerequisite(s): STAT 7630 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_BIOS, MS_BIOS

Schedule Type (Primary): Lecture

STAT 8231 - Nonparametric and Robust Statistical Methods (3 Credit Hours)

Non-parametric statistical methods, including rank-based methods for testing location and dispersion for one-, two-, and more than two-sample designs, as well as non-parametric measures of association; robust estimation methods, with emphasis on robust analogs of the mean, standard deviation, and third-moment skewness. Students will be introduced to non-parametric resampling techniques (bootstrapping and permutation methods), which will be used with robust estimation to test hypotheses. Extensive use of computer-intensive estimation and hypothesis testing procedures.

Prerequisite(s): STAT 7620 >= C and DATS 8170 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_BIOS, MS_BIOS

Schedule Type (Primary): Lecture

STAT 8270 - Computational Genomics and Proteomics (3 Credit Hours)

This course introduces computational inference and visualization approaches for high-throughput data from genomics and proteomics. Topics include an introduction to high-throughput experimental data, experiment planning, data normalization, data representation, clustering, classification, approaches for detecting differential expression, hierarchical Bayesian models, Bayesian variable selection, data integration, statistical network models, and statistical metrics for model validation.

Prerequisite(s): STAT 7640 >= C and DATS 8170 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_BIOS, MS_BIOS

Schedule Type (Primary): Lecture

STAT 8890 - Readings and Research (1 to 12 Credit Hours)

This course consists of readings and research in the current biostatistical literature, advanced topics in biostatistical theory and methods, and a supervised research project which will potentially lead to publications and/or presentations. Prerequisites: Permission of instructor and permission of major advisor.

Contact Hours: 1 to 12

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit
Program Restrictions: DPHIL_BIOS, MS_BIOS
Schedule Type (Primary): Independent Study

STAT 9120 - Theory of Linear Models (3 Credit Hours)

This course is a study of the general linear statistical model. Topics include the theory of linear models, distributions of quadratic forms, full rank linear models, estimation under linear constraints and hypothesis testing for the full rank linear models, and fixed effect models of less than full rank, and other related models.

Prerequisite(s): STAT 7620 $\geq$ C and STAT 7630 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_BIOS, MS_BIOS

Schedule Type (Primary): Lecture

STAT 9140 - Generalized Linear Models II (3 Credit Hours)

Linear mixed effects models for continuous responses, Longitudinal data analysis for continuous responses, Restricted maximum likelihood estimation, Generalized estimating equations (GEE), Growth curve model, Multinomial logistic regression models, Generalized linear mixed effects models for discrete responses (binary, binomial, and count).

Prerequisite(s): STAT 7640 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_BIOS, MS_BIOS

Schedule Type (Primary): Lecture

STAT 9220 - Advanced Statistical Inference (3 Credit Hours)

This course provides an advanced and in-depth view of statistical inference. Topics in estimation include unbiased estimation and variance bounds, curved exponential families, large sample theory for estimation, estimating equations and maximum likelihood estimation, Bayesian estimation; and topics in hypothesis testing include invariance, minimax principle, large sample theory and optimality, multiple testing and simultaneous inference.

Prerequisite(s): STAT 7620 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_BIOS, MS_BIOS

Schedule Type (Primary): Lecture

STAT 9240 - Bayesian Inference (3 Credit Hours)

This course provides the student with an introduction to Bayesian inference. The course will emphasize the theoretic aspects of the Bayesian paradigm. Topics covered in the course will be: utility, loss functions, minimaxity and admissibility, Bayes' estimators, maximum entropy priors, conjugate priors, non-informative priors, improper priors, Bayes factors, Markov chain Monte-Carlo algorithms including Metropolis-Hastings and Gibbs sampling.

Prerequisite(s): STAT 7620 $\geq$ C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_BIOS, MS_BIOS

Schedule Type (Primary): Lecture

STAT 9280 - Advanced Special Topics (1 to 3 Credit Hours)

This course is designed to cover advanced topics in the theory and methods of biostatistics, clinical trials, epidemiology, statistical and quantitative genetics, and other areas that are not covered in existing courses. The topics will depend on the research interests of the instructor and the students.

Lecture Hours: 1 to 3 **Lab Hours:** 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: DPHIL_BIOS, MS_BIOS

Schedule Type (Primary): Lecture

STAT 9300 - Dissertation Research (1 to 12 Credit Hours)

Students work closely with their faculty mentor on an in-depth study of a research question of interest to both student and advisor. The course may be repeated as necessary until the student completes the research. Enrollment in this course requires official admission to candidacy.

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit, In Progress

Program Restrictions: DPHIL_BIOS

Schedule Type (Primary): Dissertation

MEDS 1100 - Science Principles: Health Sciences Application (0 Credit Hours)

A team-based science course designed to: a) improve students' knowledge of basic science principles that involve reviewing, acquiring, integration, and application of the basic science principles that underlie biomedical theory and practice; b) analyze clinically relevant problems to recognize the molecular basis for the causes, effects, and methods of treatment for a disease; and c) become aware of the advances in health sciences and understand the contributions of research to health care and public health.

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: SEEP-Summer Ed Enrichment Prgm

Schedule Type (Primary): Seminar - Small Group

MEDS 1107 - Biological Principles (4 Credit Hours)

This course is an introductory college level Biology course for aspiring science majors and pre-health professions students. The course is designed to hone students' skills and preparation for college level science courses, contributing to enhanced premedical preparation.

Lecture Hours: 6 **Lab Hours:** 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: SEEP-Summer Ed Enrichment Prgm

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

MEDS 3000 - Biological Chemistry (4 Credit Hours)

This course serves as an excellent introduction to students pursuing a career in medicine, dentistry, allied health, or biological research. The course surveys the fundamental components of biochemistry including organic chemistry and biology.

Lecture Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: SEEP-Summer Ed Enrichment Prgm

Schedule Type (Primary): Lecture

MEDS 3100 - Scientific Interpretation and Critical Thinking (2 Credit Hours)

This course is designed to introduce students to the fundamental concepts and practices of critical thinking in the sciences. Special focus is placed on the reading and interpretation of scientific and medical literature and applying concepts from the literature to novel situations, specifically in the area of health disparities.

Contact Hours: 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: SEEP-Summer Ed Enrichment Prgm

Schedule Type (Primary): Seminar - Small Group

SABR 2930 - Studies Abroad (1 to 4 Credit Hours)

Lower level study abroad course denoting sophomore level work. Prerequisite: Varies with discipline and subject.

Lecture Hours: 1 to 4

Repeatability: May be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

SABR 3930 - Studies Abroad (1 to 3 Credit Hours)

Intermediate level study abroad course denoting junior level work. Prerequisite: Varies with discipline and subject.

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

SABR 4930 - Studies Abroad (1 to 12 Credit Hours)

Upper level study abroad course denoting senior level work. Prerequisite: Varies with discipline and subject.

Lecture Hours: 1 to 12

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

SABR 6930 - Study Abroad (1 to 3 Credit Hours)

Graduate level study abroad course. Prerequisite: Varies with discipline and subject

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Internship/Practicum, Thesis, Dissertation

SABS 2930 - Study Abroad System (1 to 3 Credit Hours)

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Internship/Practicum, Thesis, Dissertation

SABS 3930 - Study Abroad System (0 to 3 Credit Hours)

Lecture Hours: 0 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Internship/Practicum, Thesis, Dissertation

SABS 4930 - Study Abroad System (1 to 12 Credit Hours)

Lecture Hours: 1 to 12

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Internship/Practicum, Thesis, Dissertation

SURG 5000 - Basic Clerkship in Surgery (18 Credit Hours)

This six-week clerkship provides fundamental experience in general surgery. Although most of the students' time will be spent helping to care for inpatients, they will also participate in outpatient clinics. Emphasis will be placed on diagnostic evaluation, as well as preoperative and postoperative care. Evaluation of common outpatient conditions often seen by surgeons will also be emphasized.

Lecture Hours: 1 **Contact Hours:** 17

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit, Continuing Progress Courses

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Internship/Practicum

SURG 5002 - General Surgery Research (4 to 8 Credit Hours)

Individual students may elect to study in-depth, for a period of one to two months, any specific area in surgery under the guidance of the faculty member most familiar with that specific area. A thesis or report on the subject chosen is a necessary part of this elective. No student is eligible for more than one such elective.

Lecture Hours: 15 **Contact Hours:** 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

SURG 5003 - General Surgery Externship (4 to 8 Credit Hours)

Clinical experience with individual private preceptor, in their office, operating room, and hospital. Individual arrangements must be made through both the chairperson of surgery and the clinical surgeon involved.

Lecture Hours: 15 **Contact Hours:** 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

SURG 5004 - General Surgery Off-Campus Externship (4 to 8 Credit Hours)

Students may elect off-campus experience in some phase of surgery in some other medical school or institution for a period of one to two months. For help in making arrangements, interested students should contact the Medical College of Georgia counterpart of the

individual at the other institution with whom they wish to work. Such electives must be an identifiable course of instruction. An evaluation of student's performance will be required. No student is eligible for more than one such elective.

Repeatability: May be repeated for credit up to 3 times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Internship/Practicum

SURG 5005 - Surgery Critical Care/Trauma (12 Credit Hours)

The student will be assigned to the Director of the Trauma Service and be responsible to him. The experience will include trauma call, trauma surgery, patient care in the trauma intensive care unit, and patient care in the outpatient clinics. Lectures on trauma care and trauma system development will be included. An introduction to the principles and practices of pre-hospital care, to include experience on both helicopter and ground EMS services, is included. (Carl R. Boyd, M.D.) Objectives: To give the student an understanding of the principles and practice of care of the multiple injured patient. Also, the student should gain an understanding of the importance of the trauma care system development in pre-hospital care of the trauma patient. Evaluation: Evaluation will be by direct observation by the preceptor and also by standardized written tests at the end of the rotation.

Contact Hours: 40

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

SURG 5007 - Surgery Sub-I (12 Credit Hours)

Students function as substitute interns on the general surgical services at the Medical College of Georgia hospitals. They are assigned to a specific surgical service and function as an integral part of that service. Students are expected to initiate the clinical database, begin diagnostic measures, and -- where possible -- to perform surgical procedures with supervision. In addition, students participate in the teaching responsibilities, conferences, clinics, and operating experiences of the service to which they are assigned and are assigned night call responsibilities.

Contact Hours: 50

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Internship/Practicum

SURG 5015 - Tutorial in the History of Medicine (4 Credit Hours)

Students perform research on a selected topic in the history of medicine. They meet regularly with Dr. Nesbit for discussion and will prepare a paper suitable for submission for presentation/publication. Elective must be approved by Dr. Robert Nesbit.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

SURG 5016 - Surgery Sub-I for Military Students (12 Credit Hours)

Increased knowledge and skills in the field of Surgery and in the care of surgical patients. The student will perform accurate and thorough history and physical examinations on surgical inpatients and outpatients, participate with increasing responsibility under supervision in the evaluation and preoperative and postoperative care of surgical patients.

Lecture Hours: 10 **Contact Hours:** 80

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Unsupervi Lab/Clinic

SURG 5017 - Limited Vascular Rotation for Military Students (0 to 3 Credit Hours)

This rotation is an extension of the Eisenhower Army Medical Center surgical clerkship rotation designed to expose military students to surgical vascular cases they would not otherwise see at the DDEAMC facility. Enrolled, properly vetted students function as visiting medical students and accompany Dr. Soo Hoo to and participate in/scrub for surgical cases in the operating room at AU Health. This rotation does not meet requirements for course credit. Evaluation of student performance is included in Dr. Soo Hoo's evaluation of their overall surgical clerkship rotation. No grade or credit hours will be recorded for time spent in the AU Health operating room or clinics.

Repeatability: May not be repeated for credit.

Grade Mode: S- Satisfactory/Unsatisfactory

College Restrictions: 04 Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

SURG 5020 - Acute Care Surgery Externship (4 or 8 Credit Hours)

In this course, students will experience the broad spectrum of our Acute Care Surgery and Trauma service, working alongside faculty and residents in all areas, including outpatient clinics, inpatient wards and the operating room. Upon completion, students should have increased knowledge and skills in the field of Acute Care Surgery and the care of surgical patients.

Lecture Hours: 15 **Other Hours:** 40

Repeatability: May not be repeated for credit.

Grade Mode: S- Satisfactory/Unsatisfactory

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

SURG 5021 - Minimally Invasive Surgery Externship (4 or 8 Credit Hours)

In this course, students will experience the broad spectrum of our Minimally Invasive Surgery service, working alongside faculty and residents in all areas, including outpatient clinics, inpatient wards and the operating room. Upon completion, students should have increased knowledge and skills in the field of Minimally Invasive Surgery and the care of surgical patients.

Lecture Hours: 15 **Other Hours:** 40

Repeatability: May not be repeated for credit.

Grade Mode: S- Satisfactory/Unsatisfactory

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

SURG 5022 - Surgical Oncology Externship (4 or 8 Credit Hours)

In this course, students will experience the broad spectrum of our Surgical Oncology service, working alongside faculty and residents in all areas, including outpatient clinics, inpatient wards and the operating room. Upon completion, students should have increased knowledge and skills in the field of Surgical Oncology and the care of surgical patients.

Lecture Hours: 15 **Other Hours:** 40

Repeatability: May not be repeated for credit.

Grade Mode: S- Satisfactory/Unsatisfactory

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

SURG 5023 - Transplant Surgery Externship (4 or 8 Credit Hours)

In this course, students will experience the broad spectrum of our Transplant Surgery service, working alongside faculty and residents in all areas, including outpatient clinics, inpatient wards and the operating room. Upon completion, students should have increased knowledge and skills in the field of Transplant Surgery and the care of surgical patients.

Lecture Hours: 15 **Other Hours:** 40

Repeatability: May not be repeated for credit.

Grade Mode: S- Satisfactory/Unsatisfactory

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

SURG 5024 - Vascular Surgery Externship (4 or 8 Credit Hours)

In this course, students will experience the broad spectrum of our Vascular Surgery service, working alongside faculty and residents in all areas, including outpatient clinics, inpatient wards and the operating room. Upon completion, students should have increased knowledge and skills in the field of Vascular Surgery and the care of surgical patients.

Lecture Hours: 15 **Other Hours:** 40

Repeatability: May not be repeated for credit.

Grade Mode: S- Satisfactory/Unsatisfactory

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

SURG 5025 - Fundamentals of Robotics - General Surgery Externship (4 to 8 Credit Hours)

Students will experience the broad spectrum of our vascular surgery service, working alongside faculty and residents in all areas, including outpatient clinics, inpatient wards and surgical procedures. In this course, students will participate in all activities of the practice including outpatient clinics, inpatient wards and surgical procedures. Upon completion, students should have increased knowledge and skills in the field of general surgery and the care of surgical patients. Note that this course does not meet the requirements of the Sub-I.

Lecture Hours: 15 **Contact Hours:** 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

SURG 5026 - Surgery Sub I, Cardiothoracic Surgery (12 Credit Hours)

On service, students will become an integral part of the Cardiothoracic Team and take responsibility for managing assigned patients. Students are expected to complete tasks such as initiating the clinical database, beginning diagnostic measures and where possible, perform surgical procedures with supervision. Additionally, students will participate in teaching responsibilities, conferences, clinics, patient consultations, operating room cases and night call experiences of the service. Students will finish the rotation with increased knowledge and skills needed to care for Cardiothoracic surgical patients.

Prerequisite(s): SURG 5000 >= C

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Program Restrictions: MD_MEDD - MD-Medicine

Schedule Type (Primary): Internship/Practicum **Schedule Type (Additional):** Supervised Lab/Clinic

SURG 5027 - Surgery Sub I, Neurosurgery (12 Credit Hours)

On service, students will become an integral part of the Neurosurgery Team and take responsibility for managing assigned patients. Students are expected to complete tasks such as initiating the clinical database, beginning diagnostic measures and where possible, perform surgical procedures with supervision. Additionally, students will participate in teaching responsibilities, conferences, clinics, patient consultations, operating room cases and night call experiences of the service. Students will finish the rotation with increased knowledge and skills needed to care for Neurosurgery patients.

Prerequisite(s): SURG 5000 >= C

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Program Restrictions: MD_MEDD - MD-Medicine

Schedule Type (Primary): Internship/Practicum **Schedule Type (Additional):** Supervised Lab/Clinic

SURG 5028 - Surgery Sub I, Orthopedic Surgery (12 Credit Hours)

On service, students will become an integral part of the Orthopedics Team and take responsibility for managing assigned patients. Students are expected to complete tasks such as initiating the clinical database, beginning diagnostic measures and where possible, perform surgical procedures with supervision. Additionally, students will participate in teaching responsibilities, conferences, clinics, patient consultations, operating room cases and night call experiences of the service. Students will finish the rotation with increased knowledge and skills needed to care for Orthopedic patients.

Prerequisite(s): SURG 5000 >= C

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Program Restrictions: MD_MEDD - MD-Medicine

Schedule Type (Primary): Internship/Practicum **Schedule Type (Additional):** Supervised Lab/Clinic

SURG 5029 - Surgery Sub I, Otolaryngology (12 Credit Hours)

On service, students will become an integral part of the Otolaryngology Team and take responsibility for managing assigned patients. Students are expected to complete tasks such as initiating the clinical database, beginning diagnostic measures and where possible, perform surgical procedures with supervision. Additionally, students will participate in teaching responsibilities, conferences, clinics, patient consultations, operating room cases and night call experiences of the service. Students will finish the rotation with increased knowledge and skills needed to care for Otolaryngology patients.

Prerequisite(s): SURG 5000 >= C

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Program Restrictions: MD_MEDD - MD-Medicine

Schedule Type (Primary): Internship/Practicum **Schedule Type (Additional):** Supervised Lab/Clinic

SURG 5030 - Surgery Sub I, Plastic Surgery (12 Credit Hours)

On service, students will become an integral part of the Plastic Surgery Team and take responsibility for managing assigned patients. Students are expected to complete tasks such as initiating the clinical database, beginning diagnostic measures and where possible, perform surgical procedures with supervision. Additionally, students will participate in teaching responsibilities, conferences, clinics, patient consultations, operating room cases and night call experiences of the service. Students will finish the rotation with increased knowledge and skills needed to care for surgical patients.

Prerequisite(s): SURG 5000 >= C

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Program Restrictions: MD_MEDD - MD-Medicine

Schedule Type (Primary): Internship/Practicum **Schedule Type (Additional):** Supervised Lab/Clinic

SURG 5031 - Surgery Sub I, Urology (12 Credit Hours)

On service, students will become an integral part of the Urology Team and take responsibility for managing assigned patients. Students are expected to complete tasks such as initiating the clinical database, beginning diagnostic measures and where possible, perform surgical procedures with supervision. Additionally, students will participate in teaching responsibilities, conferences, clinics, patient consultations, operating room cases and night call experiences of the service. Students will finish the rotation with increased knowledge and skills needed to care for Urology patients.

Prerequisite(s): SURG 5000 >= C

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Program Restrictions: MD_MEDD - MD-Medicine

Schedule Type (Primary): Internship/Practicum **Schedule Type (Additional):** Supervised Lab/Clinic

SURG 5032 - Surgery Sub I, Vascular Surgery (12 Credit Hours)

On service, students will become an integral part of the Vascular Surgery Team and take responsibility for managing assigned patients. Students are expected to complete tasks such as initiating the clinical database, beginning diagnostic measures and where possible, perform surgical procedures with supervision. Additionally, students will participate in teaching responsibilities, conferences, clinics, patient consultations, operating room cases and night call experiences of the service. Students will finish the rotation with increased knowledge and skills needed to care for Vascular surgical patients.

Prerequisite(s): SURG 5000 >= C

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Program Restrictions: MD_MEDD - MD-Medicine

Schedule Type (Primary): Internship/Practicum **Schedule Type (Additional):** Supervised Lab/Clinic

SURG 5077 - Surgery Ambulatory Selective (12 Credit Hours)

This course is a 4-week selective with 100% of the focus on outpatient care of surgical patients. Students on this rotation do not scrub in the operating room for procedures. The primary focus of this selective is to increase the student's capacity to function as a caring, increasingly independent but supervised clinician in an outpatient setting. During this selective, students acquire the clinical skills, knowledge and professional attitudes, and behavior necessary to evaluate, diagnose, and treat adult patients with a wide variety of illnesses. This rotation is designed to fulfill the ambulatory selective requirement. The four week selective is comprised of the following: General Surgery (Working with Surgeons, and in some instances APPs) and Subspecialty Surgery (Vascular, Urology, Thoracic, Orthopedic, ENT).

Lab Hours: 12 **Contact Hours:** 12

Repeatability: May not be repeated for credit.

Grade Mode: Normal (A, B, C, D, F)

Campus Restrictions: Main Campus, Athens Campus

SURG 5084 - Introduction to Plastic Surgery (1 Credit Hour)

To introduce first year students to what plastic surgery is. To outline the steps involved in becoming a plastic surgeon. To prepare the students cognitively, affectively, and technically for plastic surgery residency.

Contact Hours: 1.5

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia **Campus Restrictions:** Main Campus

Schedule Type (Primary): Seminar - Small Group

SURG 5120 - Introduction to Acute Care Surgery (4 Credit Hours)

This course will familiarize students with common Acute Care Surgery pathologies as well as develop patient-centered communication, history-taking and physical exam skills while integrating basic sciences and clinical medicine. Students will learn to evaluate history and physical findings to form a problem list and differential diagnosis. Students will be introduced to core professional, ethical and legal concepts related to patient care.

Prerequisite(s): SURG 5000 >= C or OBGN 5000 >= C

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Program Restrictions: MD_MEDD MD-Medicine

Schedule Type (Primary): Supervised Lab/Clinic

SURG 5121 - Introduction to Minimally Invasive Surgery (4 Credit Hours)

This course will familiarize students with common MIS pathologies as well as develop patient-centered communication, history-taking and physical exam skills while integrating basic sciences and clinical medicine. Students will learn to evaluate history and physical findings to form a problem list and differential diagnosis. Students will be introduced to core professional, ethical and legal concepts related to patient care.

Pre- or Corequisite(s): SURG 5000 >= C or OBGN 5000 >= C

Grade Mode: S-Satisfactory/Unsatisfactory

Program Restrictions: Doctor of Medicine (Main Campus)

Schedule Type (Primary): 30-Supervised Lab/Clinic

SURG 5122 - Introduction to Surgical Oncology (4 Credit Hours)

This course will familiarize students with common Surgical Oncology pathologies as well as develop patient-centered communication, history-taking and physical exam skills while integrating basic sciences and clinical medicine. Students will learn to evaluate history and physical findings to form a problem list and differential diagnosis. Students will be introduced to core professional, ethical and legal concepts related to patient care.

Prerequisite(s): SURG 5000 >= C or OBGN 5000 >= C

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Program Restrictions: MD_MEDD MD-Medicine

Schedule Type (Primary): Supervised Lab/Clinic

SURG 5123 - Introduction to Transplant Surgery (4 Credit Hours)

This course will familiarize students with common Transplant pathologies as well as develop patient-centered communication, history-taking and physical exam skills while integrating basic sciences and clinical medicine. Students will learn to evaluate history and physical findings to form a problem list and differential diagnosis. Students will be introduced to core professional, ethical and legal concepts related to patient care.

Prerequisite(s): SURG 5000 >= C or OBGN 5000 >= C

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Program Restrictions: MD_MEDD MD-Medicine

Schedule Type (Primary): Supervised Lab/Clinic

SURG 5124 - Introduction to Vascular Surgery (4 Credit Hours)

This course will familiarize students with common ENT pathologies as well as develop patient-centered communication, history-taking and physical exam skills while integrating basic sciences and clinical medicine. Students will learn to evaluate history and physical findings to form a problem list and differential diagnosis. Students will be introduced to core professional, ethical and legal concepts related to patient care.

Prerequisite(s): SURG 5000 >= C or OBGN 5000 >= C

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Program Restrictions: MD_MEDD MD-Medicine

Schedule Type (Primary): Supervised Lab/Clinic

SURG 5125 - Introduction to Cardiothoracic Surgery (4 Credit Hours)

This course will familiarize students with common Cardiothoracic pathologies as well as develop patient-centered communication, history-taking and physical exam skills while integrating basic sciences and clinical medicine. Students will learn to evaluate history and physical findings to form a problem list and differential diagnosis. Students will be introduced to core professional, ethical and legal concepts related to patient care.

Prerequisite(s): SURG 5000 >= C or OBGN 5000 >= C

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Program Restrictions: MD_MEDD MD-Medicine

Schedule Type (Primary): Supervised Lab/Clinic

SURG 5150 - Introduction to Urology (4 Credit Hours)

This course will familiarize students with common Urology pathologies as well as develop patient-centered communication, history-taking and physical exam skills while integrating basic sciences and clinical medicine. Students will learn to evaluate history and physical findings to form a problem list and differential diagnosis. Students will be introduced to core professional, ethical and legal concepts related to patient care.

Prerequisite(s): SURG 5000 >= C or OBGN 5000 >= C

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Program Restrictions: MD_MEDD - MD-Medicine

Schedule Type (Primary): Supervised Lab/Clinic

SURG 5154 - Introduction to Otolaryngology (4 Credit Hours)

This course will familiarize students with common ENT pathologies as well as develop patient-centered communication, history-taking and physical exam skills while integrating basic sciences and clinical medicine. Students will learn to evaluate history and physical findings to form a problem list and differential diagnosis. Students will be introduced to core professional, ethical and legal concepts related to patient care.

Prerequisite(s): SURG 5000 >= C or OBGN 5000 >= C

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Program Restrictions: MD_MEDD - MD-Medicine
Schedule Type (Primary): Supervised Lab/Clinic

SURG 5175 - Introduction to Orthopedic Surgery (4 Credit Hours)

This course will familiarize students with common Orthopedic pathologies as well as develop patient-centered communication, history-taking and physical exam skills while integrating basic sciences and clinical medicine. Students will learn to evaluate history and physical findings to form a problem list and differential diagnosis. Students will be introduced to core professional, ethical and legal concepts related to patient care.

Prerequisite(s): SURG 5000 >= C or OBGN 5000 >= C

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Program Restrictions: MD_MEDD - MD-Medicine

Schedule Type (Primary): Supervised Lab/Clinic

SURG 5200 - Neurosurgery Externship (4 to 8 Credit Hours)

This externship provides opportunity for combining the direct patient care responsibilities of a junior house officer with practice in performing neurological examinations while participating with staff members in the practice of neurosurgery. The extern will be assigned eight patients for which they will have primary responsibility for daily care under the supervision of the senior house officer and staff of the Neurosurgery Service. They will participate in patient evaluations in the clinic and in daily teaching conferences. This elective provides for a close working relationship between the staff and the student while at the same time providing opportunity for patient care responsibilities.

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Supervised Lab/Clinic

SURG 5201 - Introduction to Neurosurgery (4 Credit Hours)

This course will familiarize students with common Neurosurgery pathologies as well as develop patient-centered communication, history-taking and physical exam skills while integrating basic sciences and clinical medicine. Students will learn to evaluate history and physical findings to form a problem list and differential diagnosis. Students will be introduced to core professional, ethical and legal concepts related to patient care.

Prerequisite(s): SURG 5000 >= C or OBGN 5000 >= C

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Program Restrictions: MD_MEDD - MD-Medicine

Schedule Type (Primary): Supervised Lab/Clinic

SURG 5202 - Neurosurgery Off-Campus Externship (4 to 8 Credit Hours)

This elective provides an opportunity for students who wish to study neurosurgery at another institution. It will be necessary to talk over the needs of the student in detail with Dr. Mark Lee prior to making arrangements for this elective.

Repeatability: May be repeated for credit up to 3 times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Directed Study (one-to-one)

SURG 5203 - Neurosurgery Externship and Research (4 to 8 Credit Hours)

Increased knowledge and skills in the field of Neurological surgery and in the care of neurosurgical patients, and participation in a limited neurological clinical research experience.

Contact Hours: 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia
Schedule Type (Primary): Internship/Practicum

SURG 5205 - Pediatric Neurosurgery Externship (4 to 8 Credit Hours)

Pediatric neurosurgery focuses on the management of developing nervous system. This elective will encompass inpatient and outpatient care of these children. The student will participate in daily ward rounds, diagnostic and treatment planning, surgery and outpatient evaluation under the supervision of neurosurgery houses officers and faculty. The emphasis of the clerkship will be on the unique nature of children's neurosurgical problems, as well as on the management of these problems, both through surgery and the interactions with other medical and surgical pediatric specialist such as neonatology, neurology, oncology and intensive care. Participation as above in all activities of the neurosurgical service.

Lecture Hours: 1 **Lab Hours:** 8 **Contact Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

SURG 5252 - Otolaryngology Off-Campus Externship (4 to 8 Credit Hours)

Students may elect off-campus experience in place of otolaryngology in some other medical school or institution for a period of one to two months. For help in making arrangements, interested students should contact the section of otolaryngology here at the Medical College of Georgia. Arrangements then can be made with the counterpart at the other institution. An evaluation of the student's performance will be required.

Contact Hours: 40

Repeatability: May be repeated for credit up to 3 times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Supervised Lab/Clinic

SURG 5254 - Otolaryngology Externship (4 to 8 Credit Hours)

Increased knowledge and skills in the field of otolaryngology and in the care of surgical patients. Students perform accurate and thorough history and physical on surgical inpatients and outpatients, participate with increasing responsibility under supervision in the evaluation of preoperative and postoperative care of surgical patients, fully participate in all educational conferences and appropriately participate in patient procedures. Students on this elective will function as substitute interns on the otolaryngology service at the Medical College of Georgia. Students function as an integral part of the service. They are expected to initiate the clinical data base, begin diagnostic measures, and where possible, perform surgical procedures with supervision. In addition, they participate in the teaching responsibilities, conferences, clinics, and operating experiences of the service to which they are assigned and they are assigned night call responsibilities. Participation as above in all activities of the surgical service. Note: 24 operating room hours per week and eight hours of ward work per week.

Lecture Hours: 8 **Contact Hours:** 16

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

SURG 5255 - Research in Otolaryngology (8 Credit Hours)

Upon completion of this course, students will be equipped with the knowledge and skills needed to conduct impactful research in the field of Otolaryngology. They will learn to formulate research questions, design studies, analyze data and communicate findings through scientific writing and presentation.

Lab Hours: 8

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: MEDICAL COLLEGE OF GEORGIA - ATHENS CAMPUS, MEDICAL COLLEGE OF GEORGIA - MAIN CAMPUS, MEDICAL COLLEGE OF GEORGIA - SAVANNAH CAMPUS

Schedule Type (Primary): Supervised Lab/Clinic

SURG 5275 - Orthopedics Externship (4 to 8 Credit Hours)

Increased knowledge and skills in the field of orthopedic surgery and in the care of orthopedics patients.

Contact Hours: 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Supervised Lab/Clinic

SURG 5278 - Orthopedics Off-Campus Externship (4 to 8 Credit Hours)

Increased knowledge and skills in the field of Orthopedic Surgery and in the care of orthopedics patients.

Repeatability: May be repeated for credit up to 3 times.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Internship/Practicum

SURG 5292 - Orthopedic Surgery Research (4 to 8 Credit Hours)

Increased knowledge, skill and appreciation in the field of surgical research. The student will gain research experience in orthopedic surgery. Students will participate in studies that are currently ongoing in the section or suggest a research proposal.

Lecture Hours: 20 **Contact Hours:** 40

Repeatability: May be repeated for credit one time.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Internship/Practicum

SURG 5300 - Pediatric Surgery Externship (4 to 8 Credit Hours)

Increased knowledge and skills in the field of pediatric surgery and in the care of pediatric surgical patients. The student will perform accurate and thorough history and physical examination on pediatric surgical inpatients and outpatients. Students will participate with increasing responsibility under supervision in the evaluation and preoperative and postoperative care of pediatric surgical patients.

Lecture Hours: 20 **Contact Hours:** 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

SURG 5301 - Introduction to Pediatric Surgery (4 Credit Hours)

This course will familiarize students with common Pediatric Surgery pathologies as well as develop patient-centered communication, history-taking and physical exam skills while integrating basic sciences and clinical medicine. Students will learn to evaluate history and physical findings to form a problem list and differential diagnosis. Students will be introduced to core professional, ethical and legal concepts related to patient care.

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Program Restrictions: MD_MEDD - MD-Medicine

Schedule Type (Primary): Supervised Lab/Clinic

SURG 5325 - Thoracic and Cardiac Surgery Externship (4 to 8 Credit Hours)

This elective is designed to provide additional experience in pathophysiology and treatment of intrathoracic disease. The student participates with the chief resident and/or attending thoracic surgeon in answering consultations regarding patients with potential thoracic surgical problems on other services. In addition, opportunities are available for experience in treatment of critically ill patients in the surgical intensive care unit. Responsibilities of the student are entirely separate from those taking the required subspecialty clerkship. (SUR 5000) In addition, the student participates in all conferences, rounds and clinics.

Repeatability: May not be repeated for credit.
Grade Mode: Satisfactory/Unsatisfactory, Audit
College Restrictions: Medical College of Georgia
Schedule Type (Primary): Internship/Practicum

SURG 5326 - Off-Campus Thoracic and Cardiac Surgery Externship (4 to 8 Credit Hours)

Increased knowledge and skills and treatment of cardiothoracic diseases. The student will perform accurate and thorough history and physical examination on cardiothoracic inpatients and outpatients. Students participate with increasing responsibility under supervision in the evaluation and care of preoperative and postoperative patients.

Repeatability: May be repeated for credit up to 3 times.
Grade Mode: Satisfactory/Unsatisfactory, Audit
College Restrictions: Medical College of Georgia
Schedule Type (Primary): Internship/Practicum

SURG 5350 - Urology Externship (4 to 8 Credit Hours)

Increased knowledge and skills in the field of urology surgery and in the care of urological surgical patients. The student will perform accurate and thorough history and physical examinations on urology inpatients and outpatients and participate with increasing responsibility under supervision in the evaluation and preoperative and postoperative care of urology patients.

Contact Hours: 25
Repeatability: May not be repeated for credit.
Grade Mode: Satisfactory/Unsatisfactory, Audit
College Restrictions: Medical College of Georgia
Schedule Type (Primary): Supervised Lab/Clinic

SURG 5351 - Urology Off-Campus Externship (4 to 8 Credit Hours)

Increase knowledge and skills in the field of urology and the care of urological surgery patients. The student will perform accurate and thorough history and physical examinations on general urology inpatients and outpatients. Participate with increasing responsibility under supervision in the evaluation and preoperative and postoperative care of urology patients.

Repeatability: May be repeated for credit up to 3 times.
Grade Mode: Satisfactory/Unsatisfactory, Audit
College Restrictions: Medical College of Georgia
Schedule Type (Primary): Internship/Practicum

SURG 5352 - Urologic Research (4 to 8 Credit Hours)

Increased knowledge, skill and appreciation in the field of surgical research. The student will gain research experience in urologic research, participate in studies that are currently ongoing. The student will gain research experience in urologic research, participate in studies that are currently ongoing.

Lecture Hours: 2 **Lab Hours:** 18
Repeatability: May not be repeated for credit.
Grade Mode: Satisfactory/Unsatisfactory, Audit
College Restrictions: Medical College of Georgia
Schedule Type (Primary): Lecture/Supervised Lab/Clinic

SURG 5375 - Plastic Reconstructive Surgery Externship (4 to 8 Credit Hours)

Increased knowledge and skills in the field of plastic surgery and in the care of plastic surgery patients. The student will perform accurate and thorough history and physical examinations on plastic surgery inpatients and outpatients. Participate with increasing responsibility under supervision in the evaluation and management of preoperative and postoperative plastic surgery patients.

Repeatability: May not be repeated for credit.
Grade Mode: Satisfactory/Unsatisfactory, Audit
College Restrictions: Medical College of Georgia
Schedule Type (Primary): Supervised Lab/Clinic

SURG 5376 - Introduction to Plastic Surgery (4 Credit Hours)

This course will familiarize students with common Plastic Surgery pathologies as well as develop patient-centered communication, history-taking and physical exam skills while integrating basic sciences and clinical medicine. Students will learn to evaluate history and physical findings to form a problem list and differential diagnosis. Students will be introduced to core professional, ethical and legal concepts related to patient care.

Prerequisite(s): SURG 5000 >= C or OBN 5000 >= C

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Program Restrictions: MD_MEDD - MD-Medicine

Schedule Type (Primary): Supervised Lab/Clinic

SURG 5379 - Pediatric Urology Externship (4 to 8 Credit Hours)

Students will identify pediatric urology problems, evaluate and treat patients, and learn surgical procedures.

Prerequisite(s): SURG 5000

Lecture Hours: 5 **Contact Hours:** 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia **Course Level Restrictions:** Professional Semester **Degree Restrictions:** Doctor of Medicine

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

SURG 5380 - Surgery Boot Camp (4 to 8 Credit Hours)

This elective has been specifically designed for students entering a surgical residency. The aim is to prepare the student with the basic surgical skills and knowledge necessary to successfully begin their PGY 1 year in surgical training.

Lecture Hours: 10 **Lab Hours:** 20

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MD_MEDD-Medicine

Schedule Type (Primary): Lecture/Unsupervised Lab/Clinic

SURG 5500 - Integrated Anatomy for General Surgery (8 Credit Hours)

This 4-week, 8-credit hours course is designed for students who have declared general surgery or another surgical field as their specialty. This course focuses on strengthening surgically relevant anatomy understanding through region-based clinical cases, hands-on cadaveric dissection, procedural simulations, and real-time operating room experiences. Students will revisit key anatomical concepts and apply their knowledge in both practical and observational settings. This integrated approach allows students to connect foundational basic science with clinical knowledge, reinforcing the relevance and application of anatomy in surgical practice.

Lecture Hours: 4 **Lab Hours:** 4

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: MEDICAL COLLEGE OF GEORGIA - ATHENS CAMPUS, MEDICAL COLLEGE OF GEORGIA - MAIN CAMPUS, MEDICAL COLLEGE OF GEORGIA - SAVANNAH CAMPUS

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

SURG 5501 - Integrated Anatomy for Orthopedic Surgery (8 Credit Hours)

This 4-week, 8-credit hour elective course is designed for post-clerkship medical students planning to pursue residency in orthopaedic surgery. The course aims to strengthen and expand upon existing knowledge of musculoskeletal anatomy through an immersive, clinically oriented experience that integrates cadaveric dissection focused on regions relevant in orthopaedic surgery, clinical observation, procedural practice, and teaching opportunities.

Lecture Hours: 4 **Lab Hours:** 4

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: MEDICAL COLLEGE OF GEORGIA - ATHENS CAMPUS, MEDICAL COLLEGE OF GEORGIA - MAIN

CAMPUS, MEDICAL COLLEGE OF GEORGIA - SAVANNAH CAMPUS
Schedule Type (Primary): Lecture/Supervised Lab/Clinic

SURG 5999 - Basic Clerkship Remediation in Surgery Subspecialty (1 Credit Hour)

Remediation of the Basic Core Clerkship in Surgery.

Prerequisite(s): SURG 5000 and SURG 5100

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Schedule Type (Primary): Independent Study

SURG 6599 - SURG Student Chief (4 to 8 Credit Hours)

This elective is designed to allow M4 students an opportunity to practice their leadership skills as they serve as a peer role model to M3 students on the Surgery rotation. Student must receive approval from Site CD.

Prerequisite(s): SURG 5000 >= B

Lab Hours: 35 **Contact Hours:** 2

Repeatability: May be repeated for credit one time.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: Medical College of Georgia - Athens Campus, Medical College of Georgia - Main Campus **Campus**

Restrictions: Athens Campus

Schedule Type (Primary): Internship/Practicum

RSUR 5000 - Surgery (27 Credit Hours)

Lecture Hours: 10 **Contact Hours:** 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Internship/Practicum

RSUR 5001 - Neurosurgery (27 Credit Hours)

Lecture Hours: 10 **Contact Hours:** 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Internship/Practicum

RSUR 5002 - Otolaryngology (27 Credit Hours)

Lecture Hours: 10 **Contact Hours:** 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Internship/Practicum

RSUR 5003 - Orthopedics (27 Credit Hours)

Lecture Hours: 10 **Contact Hours:** 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents
Schedule Type (Primary): Internship/Practicum

RSUR 5004 - Plastic/Reconstructive Surgery (27 Credit Hours)

Lecture Hours: 10 **Contact Hours:** 40
Repeatability: May not be repeated for credit.
Grade Mode: Satisfactory/Unsatisfactory
College Restrictions: Residents
Schedule Type (Primary): Internship/Practicum

RSUR 5005 - Thoracic/Cardiac Surgery (27 Credit Hours)

Lecture Hours: 10 **Contact Hours:** 40
Repeatability: May not be repeated for credit.
Grade Mode: Satisfactory/Unsatisfactory
College Restrictions: Residents
Schedule Type (Primary): Internship/Practicum

RSUR 5006 - Oral Surgery Internship (27 Credit Hours)

Lecture Hours: 10 **Contact Hours:** 50
Repeatability: May not be repeated for credit.
Grade Mode: Satisfactory/Unsatisfactory, Audit
College Restrictions: Residents
Schedule Type (Primary): Internship/Practicum

RSUR 5007 - Neurosurgery Spine Fellow non ACGME (27 Credit Hours)

Lecture Hours: 10 **Contact Hours:** 40
Repeatability: May not be repeated for credit.
Grade Mode: Satisfactory/Unsatisfactory, Audit
College Restrictions: Residents **Program Restrictions:** PPROF_NEUR-Neurology Residency **Campus Restrictions:** Main Campus
Schedule Type (Primary): Internship/Practicum

EDTD 2011 - Educational Technology (3 Credit Hours)

Examines creative use and assessment of various computer platforms, specialty hardware, integrated software, presentation software, communication software, and information systems which are directly related to effective teaching.

Lecture Hours: 3
Repeatability: May not be repeated for credit.
Grade Mode: Normal, Audit
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

EDTD 2500 - Effective Professional Communication in Education (3 Credit Hours)

This course addresses the discourses required of teachers in the field of education, with an emphasis on composing various professional documents and the etiquette for engaging in written and oral communication within professional education contexts. Students will learn how to use and apply source materials in academic writing and review basic writing conventions and formatting. An exploration of discourse and its relationship to culture and identity will also be included.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Undergraduate Semester **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Independent Study,Asynchronous Instruction

EDTD 3011 - Educational Technology (3 Credit Hours)

Examines creative use and assessment of various computer platforms, specialty hardware, integrated software, presentation software, communication software, and information systems which are directly related to effective teaching.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Junior-Semester, Senior-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervi

Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Asynchronous Instruction,Practice Teaching,Internship/Practicum,Thesis

EDTD 3200 - Assessment and Differentiation for Adolescent Learners (3 Credit Hours)

This course will examine principles and strategies of effective classroom assessment techniques as well as methods for using assessment to inform instruction in a differentiated adolescent classroom setting. A special focus will be placed on meeting the needs of all learners. A 25-hour field experience component is required in a middle or secondary grade level within a local school system that aligns with the student's program of study.

Lecture Hours: 2 **Lab Hours:** 2 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

EDTD 3221 - Adolescent English Pedagogy (3 Credit Hours)

In this course, students will demonstrate abilities to analyze and apply models of instructional approaches and assessment in English language arts, particularly related to literature, reading and writing skills, and language development. Students will develop skills necessary to plan instructional units and lessons that meet all learners' needs. A field experience component is required in a middle or secondary grade level within a local school system that aligns with the student's program of study.

Lecture Hours: 2 **Lab Hours:** 2 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

EDTD 3231 - Adolescent Mathematics Pedagogy (3 Credit Hours)

This course focuses on the curriculum and evaluation standards of the National Council of Teachers of Mathematics (NCTM) and the Georgia Standards of Excellence (GSE). Emphasis is on problem-solving, measurement, computation, hypothesis posing, and hypothesis testing, and on algebraic and geometric analyses. Teaching and learning strategies are examined. A field experience component is required in a local school setting.

Lecture Hours: 2 **Lab Hours:** 2 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

EDTD 3241 - Adolescent Social Science Pedagogy (3 Credit Hours)

This course will emphasize how the conceptual themes and modes of inquiry represented in the national social studies standards are to be applied when formulating instruction and assessment activities that are appropriate to adolescent students. Special emphasis will be placed on concept formulation, thematic problem solving, strategic learning, complex skill development, and performance assessment. A field experience component is required in a local school setting.

Lecture Hours: 2 **Lab Hours:** 2 **Contact Hours:** 3
Repeatability: May not be repeated for credit.
Grade Mode: Normal, Audit
Schedule Type (Primary): Lecture/Supervised Lab/Clinic

EDTD 4920 - Student Teaching and edTPA Remediation (3 Credit Hours)

Candidates who need further remediation in an identified area of student teaching and/or whose edTPA submissions do not meet the professional performance standard as specified by the state of Georgia will be provided additional support. Students who need to retake edTPA will receive support prior to and throughout the retake process. When possible, the candidate will remain in the originally assigned classroom, but this will require permission and support from the clinical teacher and university supervisor.

Lecture Hours: 3
Repeatability: May be repeated for credit one time.
Grade Mode: Satisfactory/Unsatisfactory, Audit
College Restrictions: College of Ed & Human Dev
Schedule Type (Primary): Directed Study (one-to-one) **Schedule Type (Additional):** Internship/Practicum

EDTD 4940 - Foundations of Reading Seminar (2 Credit Hours)

This course provides a scientifically based foundation in the cognitive, sociocultural, linguistic, and motivational influences on reading. Concepts of word recognition, phonology, phonics, morphology, fluency, vocabulary, and comprehension are presented. Connections to written expression, assessment, content area/disciplinary literacy and special populations in varied contexts are explored. Candidates must earn a B or higher in this course to satisfy the foundations of literacy requirement.

Prerequisite(s): Admission to teacher education.
Corequisite(s): ELED 4491 or SPED 4491 or MGED 4210 or SCED 4901 or MUSI 4492
Lecture Hours: 2 **Contact Hours:** 2
Repeatability: May not be repeated for credit.
Grade Mode: N- Normal (A, B, C, D, F)
Schedule Type (Primary): Asynchronous Instruction

EDTD 4950 - Selected Topics (1 to 6 Credit Hours)

A variable content course intended to meet the needs and interests of undergraduate students in selected areas of education.
Prerequisite(s): Permission of department chair.

Lecture Hours: 1 to 6
Repeatability: May be repeated for credit.
Grade Mode: Normal, Audit
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

EDTD 5101 - Secondary School Curriculum Design (3 Credit Hours)

This course is designed to introduce MAT teacher candidates to educational research and learning theory relevant to adolescents. Teacher candidates will study the characteristics of secondary school learners and the principles of educational psychology that inform our understanding of these learners. This course will examine the implications of learner characteristics for curriculum, instruction, assessment, and management. A 25-hour field experience in a secondary school setting is required for successful completion of this course.

Lecture Hours: 2 **Lab Hours:** 2
Repeatability: May not be repeated for credit.
Grade Mode: Normal, Audit
Course Level Restrictions: Graduate Semester **Degree Restrictions:** Master of Arts in Teaching
Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Independent Study, Asynchronous Instruction

EDTD 5102 - Secondary School Curriculum Theory (3 Credit Hours)

This course is designed to introduce teacher candidates to language bases derived from educational research, from state, national, and local curriculum standards, and from secondary school effective practices. This course will examine the secondary school curriculum in terms of the connections that exist among the subject area disciplines and in terms of the strategies that secondary school teachers and learners use (including models of teaching, critical thinking techniques, and approaches to content area reading). This course will examine the secondary school in its historical and political context as well as in relation to pertinent philosophical issues. In addition, this course will examine multiple models of classroom management and their relationship to the learning environment of the classroom.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Degree Restrictions:** Master of Arts in Teaching

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Independent Study, Asynchronous Instruction

EDTD 5221 - Best Practices in Language Arts Education (3 Credit Hours)

This course focuses on helping teachers learn the basic development and integration of skills in the areas of reading, writing, listening, and speaking as well as how to effectively implement these skills in the classroom. Topics such as spelling, grammar, speaking and writing process are also addressed along with practice in informal, formal, and authentic assessment. A 25-hour field experience in P-12 is required for this course.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Degree Restrictions:** Master of Arts in Teaching

Schedule Type (Primary): Lecture/Unsupervi Lab/Clinic **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

EDTD 5222 - Best Practices in Language Arts Education for Middle/Secondary (3 Credit Hours)

This course focuses on helping middle school and secondary teachers learn the basic development and integration of skills in the areas of reading, writing, listening, and speaking as well as how to effectively implement these skills in the classroom. Topics such as spelling, grammar, speaking and writing process are also addressed along with practice in informal, formal, and authentic assessment. A 25-hour field experience in P-12 is required for this course.

Lecture Hours: 2 **Lab Hours:** 2 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1MAT-Master of Arts in Teaching

Schedule Type (Primary): Lecture/Unsupervi Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

EDTD 5225 - Reading and Writing Across the Curriculum (3 Credit Hours)

Designed for candidates seeking initial certification who wish to improve their students' ability to read, write about, and comprehend subject area materials. Teacher candidates will develop strategies to engage students effectively in reading and writing across content areas. Candidates will develop approaches that emphasize reading and writing as a means to learn. Candidates will also develop strategies to enable students to deal with reading deficiencies and other challenges students may face as reader and writers.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Degree Restrictions:** Master of Arts in Teaching

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Asynchronous Instruction

EDTD 5231 - Best Practices in Social Science Education (3 Credit Hours)

In this course students will examine three models of inquiry centered social science instruction: historical investigations, simulation problem solving with decision tree strategies, and hypothesis testing. All three models emphasize the development of conceptual understanding and the integral use of complex thinking skills in learning subject matter. Students will examine adaptations of these models to learners of varied ages and developmental characteristics. A 25-hour field experience in P-12 is required for this course.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Degree Restrictions:** Master of Arts in Teaching

Schedule Type (Primary): Lecture/Unsupervi Lab/Clinic **Schedule Type (Additional):** Independent Study,Asynchronous Instruction

EDTD 5232 - Best Practices in Social Science Education for Middle/Secondary Teachers (3 Credit Hours)

This course is designed for middle/secondary teachers. In this course students will examine three models of inquiry centered social science instruction: historical investigations, simulation problem solving with decision tree strategies, and hypothesis testing. All three models emphasize the development of conceptual understanding and the integral use of complex thinking skills in learning subject matter. Students will examine adaptations of these models to learners of varied ages and developmental characteristics. A 25-hour field experience in P-12 is required for this course.

Lecture Hours: 2 **Lab Hours:** 2 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1MAT-Master of Arts in Teaching

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

EDTD 5241 - Best Practices in Mathematics Education (3 Credit Hours)

The course examines best practices in mathematics education and theory and research, which supports such practices. These best "practices" are drawn from the literature and actual classroom practice. A 25-hour field experience in P-12 is required for this course.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Major Restrictions: Elementary Education **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Master of Arts in Teaching

Schedule Type (Primary): Lecture/Unsupervi Lab/Clinic **Schedule Type (Additional):** Independent Study,Asynchronous Instruction

EDTD 5242 - Best Practices in Mathematics Education for Middle/Secondary Teachers (3 Credit Hours)

This course is for middle grades and secondary teachers. The course examines best practices in mathematics education and theory and research, which supports such practices. These best "practices" are drawn from the literature and actual classroom practice. A 25-hour field experience in P-12 is required for this course.

Lecture Hours: 2 **Lab Hours:** 2 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1MAT-Master of Arts in Teaching

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

EDTD 5251 - Best Practices in Science Education (3 Credit Hours)

Those in this course will study the application of current research in science and design lessons in order to apply the research to their classroom. Included in this course will be authentic assessment practices such as hands-on practicums and research projects appropriate to K-12 classrooms. Also included will be action research techniques and appropriate dissemination of the results. A 25-hour field experience in P-12 is required for this course.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Degree Restrictions:** Master of Arts in Teaching

Schedule Type (Primary): Lecture/Unsupervi Lab/Clinic **Schedule Type (Additional):** Independent Study,Asynchronous Instruction

EDTD 5252 - Best Practices in Science Education for Middle/Secondary Teachers (3 Credit Hours)

This course is designed for middle/secondary teachers. Those in this course will study the application of current research in science and design lessons in order to apply the research to their classroom. Included in this course will be authentic assessment practices such as hands-on practicums and research projects appropriate to K-12 classrooms. Also included will be action research techniques and appropriate dissemination of the results. A 25-hour field experience in P-12 is required for this course.

Lecture Hours: 2 Lab Hours: 2 Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1MAT-Master of Arts in Teaching

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

EDTD 5274 - Introduction to Literacy (3 Credit Hours)

This course is designed for beginning teachers to develop the skills to teach fluency, vocabulary, comprehension, phonemic awareness, and phonics. It will focus on the best practices supported by research in these fields and will emphasize how the teacher can set up a classroom that fosters literacy learning for students in grades P-5. A 25-hour field experience in P-12 is required for this course.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Degree Restrictions:** Master of Arts in Teaching

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction

EDTD 5275 - Introduction to Literacy Assessment (3 Credit Hours)

Examines reading and writing difficulties encountered in the classroom. Emphasizes diagnostic/prescriptive teaching through experience with informal diagnostic assessment tools. Students then use results of these assessments to design and implement instructional interventions for children experiencing difficulties with reading and writing. Special emphasis is placed on incorporating family literacy. A 25-hour field experience in P-12 is required for this course

Prerequisite(s): EDTD 5274

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Degree Restrictions:** Master of Arts in Teaching

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction

EDTD 5364 - Planning for Instruction (3 Credit Hours)

This course is designed to prepare pre-service teachers to plan lessons and units of study that are aligned with standards and learning objectives. Emphasis is placed on selecting instructional strategies that incorporate student-centered methodology.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Degree Restrictions:** Master of Arts in Teaching

Schedule Type (Primary): Lecture/Unsupervised Lab/Clinic **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

EDTD 5381 - Assessment and Differentiation (3 Credit Hours)

This course is designed to examine trends and proven practices in educational assessment. Participants will evaluate a variety of approaches to assessment of student achievement. Emphasis will be placed on using formative assessment data to make decisions about differentiation. A 25-hour field experience in P-12 is required for this course.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Degree Restrictions:** Master of Arts in Teaching

Schedule Type (Primary): Lecture/Unsupervised Lab/Clinic **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

EDTD 5411 - Understanding and Teaching Early Adolescents (3 Credit Hours)

This course is designed to enable teacher candidates to analyze and examine the nature of the middle grades student. The developmental needs and characteristics of students as adolescents and as individuals will be studied. Instructional strategies designed to meet the unique needs of middle grades students will be addressed. A 25-hour field experience in P-12 is required for this course.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Degree Restrictions:** Master of Arts in Teaching

Schedule Type (Primary): Asynchronous Instruction

EDTD 5412 - Theory Into Practice in Middle Grades (3 Credit Hours)

This course is designed to familiarize students with the research base, which undergirds students-centered pedagogy, and student driven curriculum in the middle grades. Current trends and issues related to middle grades education will further be examined in light of middle school theory. An examination of the research and theory related to instruction designed specially for young adolescents will lead to the development of strategic plans for teachers to use this research within their own classrooms, schools districts and state. A 25-hour field experience in P-12 is required for this course.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Degree Restrictions:** Master of Arts in Teaching

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Asynchronous Instruction

EDTD 5432 - Reaching All Students with Asset-Based Teaching (3 Credit Hours)

This course engages candidates in developing a sound understanding of different learners that exist in schools and larger communities. Candidates will examine how asset-based teaching practices can address student learning needs and encourage independent learning through rigor and fairness in P-12 schools.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Degree Restrictions:** Master of Arts in Teaching

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Unsupervi Lab/Clinic,Independent Study,Asynchronous Instruction

EDTD 5491 - Classroom Management Techniques and Strategies (3 Credit Hours)

This course is designed specifically for pre-service teachers who are preparing to work in P-12 classrooms. Its primary focus is on the theory, research, concepts, and skills needed to design, implement, and evaluate classroom management plans and strategies.

Lecture Hours: 3 **Lab Hours:** 0 **Contact Hours:** 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Degree Restrictions:** Master of Arts in Teaching

Schedule Type (Primary): Lecture/Unsupervised Lab/Clinic **Schedule Type (Additional):** Independent Study,Asynchronous Instruction

EDTD 5910 - MAT Culminating Residency (4 Credit Hours)

An intensive practicum course designed for graduate candidates who are seeking teacher certification. A mentor teacher and university faculty member works with the candidate to support the culminating residency. Candidates are supervised as they plan, reflect, and refine their teaching practice. Successful completion of at least 33 credit hours of program requirements coursework is required.

Corequisite(s): EDTD 5940

Lab Hours: 8 **Contact Hours:** 8

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Subject Restrictions: EDTD - Teacher Education **Program Restrictions:** 1MAT-MAT - MAT-Master of Arts in Teaching

Schedule Type (Primary): Asynchronous Instruction **Schedule Type (Additional):** Practice Teaching, Internship/Practicum
Additional Course Fee: Student Teaching Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 200

EDTD 5920 - Student Teaching and edTPA Remediation (3 Credit Hours)

Candidates who need further remediation in an identified area of student teaching and/or whose edTPA submissions do not meet the professional performance standard as specified by the state of Georgia will be provided additional support. Students who need to retake edTPA will receive support prior to and throughout the retake process. When possible, the candidate will remain in the originally assigned classroom, but this will require permission and support from the clinical teacher and university supervisor.

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: College of Ed & Human Dev

Schedule Type (Primary): Independent Study **Schedule Type (Additional):** Internship/Practicum

EDTD 5940 - Foundations of Reading Seminar (2 Credit Hours)

This course provides a scientifically based foundation in the cognitive, sociocultural, linguistic, and motivational influences on reading. Concepts of word recognition, phonology, phonics, morphology, fluency, vocabulary, and comprehension are presented. Connections to written expression, assessment, content area/disciplinary literacy and special populations in varied contexts are explored.

Candidates must earn a B or higher in this course to satisfy the foundations of literacy requirement.

Corequisite(s): EDTD 5910 or SPED 5013

Lecture Hours: 2 **Contact Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: N- Normal (A, B, C, D, F)

Schedule Type (Primary): Asynchronous Instruction

EDTD 6001 - Theory into Practice I (2 Credit Hours)

The purpose of this course is to expose practicing teachers to various types of current educational research, critical analysis of research evidence, reflective practices, and concept application.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

EDTD 6002 - Theory into Practice II (1 Credit Hour)

This course is taken in the final semester of the M.Ed. in Instruction program and is intended to guide the student through active reflection of concepts learned throughout the program with consideration given to application in the classroom. The student submits the final key assessment for the program.

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

EDTD 6003 - Induction Practicum (1 to 6 Credit Hours)

Effective teacher Induction programs have an impact on teacher effectiveness, teacher retention and teacher leadership, all of which will have an impact on student learning and growth. The purpose of this course is to provide high-quality and well-planned induction experiences to support induction-phased teachers. The course will provide high-quality professional learning that is regularly assessed using multiple sources of data such as self-assessment, observations, and documentation.

Lecture Hours: 1 to 6

Repeatability: May be repeated for credit up to two times.

Grade Mode: Normal, Audit

Program Restrictions: 1MED-INSR-MED-Instruction

Schedule Type (Primary): Directed Study (one-to-one) **Schedule Type (Additional):** Asynchronous Instruction

EDTD 6011 - Instructional Technology Applications (3 Credit Hours)

This course will examine and evaluate seven basic technology strands as they relate to the instructional process: (1) curriculum integration, (2) productivity, (3) operating systems and networking, (4) telecommunications and on-line services, (5) distance learning-exploration, (6) multimedia/presentations, (7) desktop publishing. Students previously successfully completing EDTD 3011 or the equivalent test-out may not take EDTD 6011.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis

EDTD 6033 - Integrative STEM/STEAM Education: A Pedagogical Approach (3 Credit Hours)

This course will help students learn the definitions of STEM literacy and integrative STEM/STEAM (iSTEM/iSTEAM) education. Additionally, students will study strategies that support such an approach to teaching and learning. Strategies will include, but not be limited to, project-based learning, problem-based learning, place-based education and design-based learning. Thus, candidates will be prepared to demonstrate their understandings of STEM education as a transdisciplinary, collaborative endeavor through classroom and/or curricular applications (GA 505-3-1, 3 & 4).

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction, Practice Teaching

EDTD 6044 - Integrative STEM/STEAM Education: Driving Forces (3 Credit Hours)

This course introduces the concepts of grand challenges, essential and driving questions, technology and engineering (T/E) based design thinking, artistic based design thinking, creative thinking, model-based reasoning, computational reasoning, complex systems thinking, quantitative reasoning, wonderment and awe in order to prepare candidates to use STEM and STEM related pedagogical practices to engage learners in the ways of thinking and habits of mind used in STEM and STEM related disciplines (GA 505-3-2 & 4).

Prerequisite(s): EDTD 6033 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

EDTD 6055 - Integrative STEM/STEAM Education: Clinical Experience (3 Credit Hours)

This course will provide candidates authentic experiences in STEM/STEAM related careers and design tasks in which to observe, practice, reflect upon and deepen understandings of integrative STEM/STEAM education in preparation for implementation.

Prerequisite(s): EDTD 6033 >= C and EDTD 6044 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction, Practice Teaching

EDTD 6100 - Research in Content Area Instruction (3 Credit Hours)

Current research and initiatives concerning content area education. The philosophical underpinnings of a variety of curricular and instructional approaches will be examined. Results of these studies will be compared to the recommendations made in current research studies in various content area fields.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study,Asynchronous Instruction

EDTD 6110 - Curriculum in Theory and Practice (3 Credit Hours)

This course explores the theoretical frameworks that inform various instructional models, historical and contemporary issues in curriculum development, and the nature and purpose of curriculum change. In addition, theoretical constructs and philosophical frameworks that undergird modern classroom instruction and assessment practices will be examined. Candidates in this course will apply curriculum theory and conceptual frameworks to design and develop content-specific curriculum. This course should be taken by the end of the second semester in the program.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Student Class Restrictions: Graduate-Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

EDTD 6120 - Basic Instruction in Literacy (3 Credit Hours)

This course advances teachers' knowledge and skills in the area of literacy through an in-depth study of ways in which components of reading build, intersect, and apply to K-12 readers. Candidates will utilize this foundational knowledge as they implement culturally responsive literacy practices within authentic contexts. This is the first of three courses required for the reading endorsement.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Asynchronous Instruction,Practice Teaching,Internship/Practicum,Thesis,Dissertation

EDTD 6131 - Research in Social Studies Education (3 Credit Hours)

This course will examine research in strategic learning and schema theory and the implications for social science curriculum and instruction.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Independent Study,Asynchronous Instruction

EDTD 6222 - Current Best Practices in Literacy (3 Credit Hours)

In this course theory and practice come together as students implement research-based practices for literacy instruction in schools and communities. These practices will include, but will not be limited to, the following: assessment and remediation, content-area reading, program planning at the classroom and school levels, and advocacy for literacy with all stakeholders.

Prerequisite(s): EDTD 6120 >= C

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic,Lecture/Unsupervised Lab/Clinic,Seminar-Small Group,Supervised Lab/Clinic,Unsupervised Lab/Clinic,Independent Study,Directed Study (one-to-one),Asynchronous Instruction,Practice Teaching,Internship/Practicum,Thesis

EDTD 6223 - Applications of Effective Reading Strategies (3 Credit Hours)

In this course, theory and practice come together as students implement research-based practices for literacy instruction in schools and communities. These practices will include, but will not be limited to, the following: assessment and remediation, content-area reading, program planning at the classroom and school levels, and advocacy for literacy with all stakeholders.

Prerequisite(s): EDTD 6120 >= C and EDTD 6222 >= C

Lecture Hours: 1 **Lab Hours:** 4

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

EDTD 6224 - Literacy in the Content Areas (3 Credit Hours)

This course will address literacy strategies and skills in content areas/disciplines to enhance learning and student understanding. Emphasis is placed on research-based instructional strategies that facilitate cross-content literacy.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

EDTD 6225 - Reading Across Curriculum (3 Credit Hours)

Designed for content area teachers (grades 4-12) who wish to improve their students' ability to read and comprehend subject area materials. Emphasis is placed upon teaching for understanding by taking advantage of the contributions of literacy processes (listening, speaking, thinking, and reading) to content area achievement. Topics include readability of texts; vocabulary development; trade books; strategies to improve reading in math, science, social studies, literature, physical and health education; study techniques; and assessment.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Supervised Lab/Clinic, Asynchronous Instruction

EDTD 6228 - Using Children's Literature in the Classroom (3 Credit Hours)

This course is designed to familiarize students with a variety of current literature for children and young adolescents. Students will design strategies for utilizing literature in the classroom as a basis for sound language arts instruction and as a means to integrate reading and literature throughout the curriculum and across various content areas. Issues of student motivation, meeting adolescent needs, reading instruction, response to literature, connections to writing and assessment will be addressed.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Internship/Practicum, Thesis, Dissertation

EDTD 6256 - Writing Theory (3 Credit Hours)

This course will examine general theories of writing instruction and composition. In addition, writing theory as it relates to classroom writing instruction will be addressed and the theories that undergird best instructional practices in writing will be explored in detail.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Asynchronous Instruction

EDTD 6257 - Best Practice in Writing Instruction (3 Credit Hours)

This course will examine best practices in writing instruction. Strategies for teaching writing will be explored in depth. Cross curricular writing strategies will be addressed.

Prerequisite(s): EDTD 6256

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Asynchronous Instruction

EDTD 6259 - Applications of Effective Writing Instruction (3 Credit Hours)

This course is the culminating component of the writing certificate. It will examine best writing practices in schools, implementation of these practices in classrooms, assessment in writing, and writing theory as it relates to practice. Educational theory and practice will come together to enable students to develop strategies and employ best writing practices.

Pre- or Corequisite(s): EDTD 6258

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group,Asynchronous Instruction

EDTD 6276 - ESOL Methods, Materials, and Assessment in Content Classrooms (3 Credit Hours)

This course provides an understanding of research, theory, methods, assessments, and materials for teaching English to Speakers of Other Languages (ESOL) in grades P-12. This course is one of three required courses for the ESOL Endorsement. Students are required to recruit and work with one or more P-12 students who are learning English as an additional language for the completion of a 25-hour field experience.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Independent Study,Asynchronous Instruction

EDTD 6277 - Understanding Cultural Issues and Ethics in ESOL Education (3 Credit Hours)

This course explores how teachers and school communities can effectively provide and support meaningful American school experiences of ESOL (English Speakers of Other Language) students and their families. This course is one of three courses for the add-on ESOL endorsement. Prerequisite: Teaching Certificate

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

EDTD 6362 - Advanced Instructional Strategies (3 Credit Hours)

This course is designed to familiarize and enable students to utilize research-based instructional strategies for the middle grades. Instructional strategies include project-based, placed-based, active, technological, inquiry, concept-based, and design based learning, among others. Research on instructional strategies that work will be translated into practice across content areas. Reflection and critical analysis will combine in order for teachers to apply these strategies within their own classrooms, schools, and districts.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Internship/Practicum, Thesis, Dissertation

EDTD 6363 - Social Interactive Models of Teaching (3 Credit Hours)

This course is designed to help teachers develop teaching/learning strategies and to integrate curriculum in their classrooms. Emphasis is placed upon helping teachers to adapt strategies, choose materials, and design units that integrate subject areas across a non-textbook based, student-centered curriculum.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Internship/Practicum, Thesis, Dissertation

EDTD 6381 - Assessment and Differentiation (3 Credit Hours)

This course examines the theoretical frameworks that inform assessment practices. Candidates will utilize data derived from a variety of diagnostic, formative, and summative assessments to plan, guide, inform, and differentiate instruction. This course is designed to examine current trends and proven practices in educational assessment. Participants will evaluate a variety of approaches recommended for both traditional and alternative approaches to assessment of student achievement.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Degree Restrictions:** Specialist in Education, Master of Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Unsupervised Lab/Clinic, Asynchronous Instruction

EDTD 6410 - Applied Research in Curriculum and Instruction (3 Credit Hours)

Students analyze data and apply best practices to the development and implementation of improvement in curriculum and instruction. This is accomplished through investigating a significant question or issue related to teaching in Pre-K-12 schools.

Lecture Hours: 3 Lab Hours: 0

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Degree Restrictions:** Specialist in Education, Master of Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

EDTD 6416 - Advanced Instructional Technology (3 Credit Hours)

This course focuses on technology resources and integration strategies for several different content areas with special emphasis on incorporating the current trends toward thematic, interdisciplinary instruction. Students will dive deeply into the Internet as a tool for inquiry and develop web based activity units that will provide children with opportunities for seeking the information needed for authentic problem-solving projects.

Prerequisite(s): EDTD 6011 >= B

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis,

EDTD 6432 - Asset-Based Teaching and Learning (3 Credit Hours)

This course explores teaching and learning through asset-based frameworks that promote rigorous and independent learning for all students within K-12 classroom settings. Students explore their identities as leaders within their classrooms and learn about effective teaching practices for addressing student learning needs. Students will advance mindsets and professional dispositions that will help all students to succeed within their K-12 classrooms through fairness and opportunity.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

EDTD 6461 - Critical Issues in Education (3 Credit Hours)

An introduction to education developments, opportunities, and challenges in the United States from both discipline-based and integrative approaches, including political, technological, and curricular trends. Students examine current initiatives and modern educational considerations pertaining to policy, structure, process, and student learning, exploring the theoretical foundations of the trends, as well as the pedagogical practices aligned with the trends.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

EDTD 6471 - Issues in Early Childhood Education (3 Credit Hours)

Provides opportunities to explore political, technological, and curricular trends as they relate to early childhood education at the school, local, state, and national level. Students examine current initiatives and contemporary considerations pertaining to policy, structure, process, and student learning, exploring the theoretical foundations of the trends, as well as the pedagogical practices aligned with the trends.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

EDTD 6481 - Enhancing Student Performance (3 Credit Hours)

The course will emphasize strategies for adapting curriculum, instruction, resources, and assessments in order to maximize learning. The course will provide educators with ways to identify, analyze, and use results from multiple assessments to plan instruction aimed at enhancing and demonstrating learning. The course will familiarize and enable students to utilize research-based instructional strategies for early childhood education.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

EDTD 6491 - Advanced Instructional Management (3 Credit Hours)

This is an advanced course in effective classroom management for experienced K-12 educators. The primary focus is on using current learning theory and research to design, implement, and assess highly effective instructional management. This course will address the use of performance data to make decisions and adjustments to individualized classroom management for instructional improvement.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

EDTD 6500 - Exploring P-12 Computer Science Standards and Curriculum (3 Credit Hours)

This is the first course in the Computer Science Endorsement. The course includes an introduction to the Georgia P-12 Computer Science Standards and exploration of resources for curriculum and instruction that align and support the use of the standards.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

EDTD 6501 - P-12 Computer Science Education and Pedagogy I (3 Credit Hours)

This is the second course in the Georgia P-12 Computer Science Endorsement. The focus of the course is continued development of computer science content knowledge, design of instructional units, and ability to deliver computer science instruction.

Prerequisite(s): EDTD 6500 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

EDTD 6502 - P-12 Computer Science Education and Pedagogy II (3 Credit Hours)

This is the final course in the Georgia P-12 Computer Science Endorsement. The focus of the course is continued development of computer science content knowledge, the design of semester plans, instructional units, and the ability to deliver computer science instruction.

Prerequisite(s): EDTD 6501 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

EDTD 6610 - Foundations of Effective PBIS (3 Credit Hours)

Intended to provide educators with a deep and broad knowledge of content, pedagogy, and implementation related to Positive Behavioral Interventions and Supports (PBIS). The course will prepare educators to effectively integrate PBIS into their own classroom management practices. This course will focus on the foundations of research based effective management practices such as building strong teacher/student relationships, strategies to creating an effective positive learning environment, and proactive management strategies.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

EDTD 6620 - Improving PBIS in the Classroom (3 Credit Hours)

EDTD 6620 Is intended to provide educators with a deep and broad knowledge of the methodology involved in collecting, reviewing, and decision making using various school data platforms related to Positive Behavioral Interventions and Supports (PBIS). The course will focus on PBIS at the classroom level and prepare educators to effectively integrate PBIS into their own classroom instructional practices.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

EDTD 6630 - PBIS Multi-Tiered Systems and Clinical Practice (3 Credit Hours)

This course will focus on the implementation of a multi-tiered system of supports at the classroom and school wide levels in Positive Behavioral Interventions and Supports (PBIS). Candidates will implement, evaluate and plan for improvement PBIS in their classroom setting.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

EDTD 6905 - Seminar in Field Studies (1 to 6 Credit Hours)

This course is designed to be an intensive review of classroom management strategies, professional responsibilities, time management, instructional strategies, and MAT portfolio requirements. This course is designed to meet the individual needs of the student and correct deficiencies noted during the Practicum experience. An extended field experience will also be required during this courses. The number of hours will be determined by the Instructor. Prerequisite(s): Permission of Instructor.

Lecture Hours: 1 to 6

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Dissertation

EDTD 6950 - Current Trends and Issues (1 to 6 Credit Hours)

A variable content course intended to meet the needs and interests of graduate students in selected areas of education. Prerequisite(s): Permission of department chair.

Lecture Hours: 1 to 6

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

EDTD 7160 - Curriculum Design and Program Assessment (3 Credit Hours)

This course will examine and analyze the following core elements of curriculum design: conceptual purpose, content, coherence, articulation within a subject area across grade levels, and across subjects, alignment with both achievement standards and achievement assessments. Program assessment will be examined with particular attention to how it differs from but is relevant to student performance assessment.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Degree Restrictions:** Specialist in Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Directed Study (one-to-one), Asynchronous Instruction, Thesis

EDTD 7162 - Advanced Topics in English Education (3 Credit Hours)

This course will examine current research, practices, and issues in language arts/english education as delineated in journal readings, conference proceedings, and other relevant sources. Students will synthesize these findings and will determine implications for curriculum and instruction in language arts. Prerequisite(s): Admission to the Ed.S. program or permission of the instructor.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Degree Restrictions:** Specialist in Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

EDTD 7163 - Advanced Topics in Social Science Education (3 Credit Hours)

This course will examine current research, practices, and issues in social science education as delineated in journal readings, conference proceedings, and other relevant sources. Students will synthesize these findings and will determine implications for curriculum and instruction in social science. Prerequisite(s): Admission to the Ed.S. program or permission of the instructor.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Degree Restrictions:** Specialist in Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

EDTD 7164 - Advanced Topics in Science Education (3 Credit Hours)

This course will examine current research, practices, and issues in science education as delineated in journal readings, conference proceedings, and other relevant sources. Students will synthesize these findings and will determine implications for curriculum and instruction in the natural sciences. Prerequisite(s): Admission to the Ed.S. program or permission of the instructor.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Degree Restrictions:** Specialist in Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

EDTD 7165 - Advanced Topics in Mathematics Education (3 Credit Hours)

This course will examine current research, practices, and issues in mathematics education as delineated in journal readings, conference proceedings, and other relevant sources. Students will synthesize these findings and will determine implications for curriculum and instruction in mathematics. Prerequisite(s): Admission to the Ed.S. program or permission of the instructor.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Degree Restrictions:** Specialist in Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

EDTD 7210 - Issues and Trends In Middle Grades Education (3 Credit Hours)

This course examines current issues and trends related to middle grades education, including issues of school reform, implementing best practices, assessment, accountability, and teaming and collaborating with parents and other members of the school community.

Lecture Hours: 2 Lab Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Degree Restrictions:** Specialist in Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

EDTD 7221 - Authentic Literacy Assessment (3 Credit Hours)

This course is designed to teach educators how to assess what goes on in classrooms where reading and writing for real purposes is the norm. It will involve study of the evolution of literacy assessment from standardized tests to informal tests to criterion-referenced tests and authentic assessment.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Degree Restrictions:** Specialist in Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

EDTD 7222 - Engaging Students in Literacy (3 Credit Hours)

This course will concentrate on interpreting available research on motivation to read. In addition, finding and using motivational materials that are also instructionally sound will be studied.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Degree Restrictions:** Specialist in Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

EDTD 7364 - Impacting Instruction (3 Credit Hours)

This course will focus on a variety of instructional techniques and strategies to promote content knowledge acquisition, conceptual knowledge acquisition, skill based knowledge and critical thinking. The practicality and applicability of various instructional strategies will also be addressed.

Lecture Hours: 2 **Lab Hours:** 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Degree Restrictions:** Specialist in Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

EDTD 7909 - Thesis I (1 to 3 Credit Hours)

Students will carry out empirical research that represents the application of theory, the extension of research, or the development of creative approaches to aspects of teaching and learning. Students will describe in a thesis the results of their research.

Prerequisite(s): EDUC 7021 >= C

Lecture Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Degree Restrictions:** Specialist in Education

Schedule Type (Primary): Lecture

EDTD 7910 - Thesis II (3 Credit Hours)

This course is a continuation of EDTD 7909. Students will carry out empirical research that represents the application of theory, the extension of research, or the development of creative approaches to aspects of teaching and learning. Students will describe in a thesis the results of their research, and will orally defend the thesis.

Prerequisite(s): EDTD 7909 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Degree Restrictions:** Specialist in Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

EDTD 7950 - Advanced Topics in Content Area Instruction (1 to 6 Credit Hours)

A variable content course intended to meet the needs and interests of graduate students in selected areas of education.

Lecture Hours: 1 to 6

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Course Level Restrictions: Graduate Semester **Degree Restrictions:** Specialist in Education

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

THEA 1100 - Theatre Appreciation (3 Credit Hours)

Survey and appreciation of theatre as a literary and performing art. Introduction to and improvement of critical and aesthetic evaluation of theatrical performances, including the contributions of the playwright, the actor, the director, the designer, and the audience member.

Core IMPACTS Requirement(s) Satisfied: Arts, Humanities, and Ethics (Humanities)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

THEA 2000 - Approaches to Acting (3 Credit Hours)

An introduction to the craft of the actor, including training in voice, movement, emotional sensitivity, improvisation, and scene study.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

THEA 2010 - Performance Composition (3 Credit Hours)

An introduction to composing and performing original texts for the stage.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

THEA 3000 - Voice and Movement (3 Credit Hours)

This course helps students to develop fundamentals of voice and movement in performance, including breathing, kinesthetic awareness, vocal placement and resonance, physical performance, and integration of vocal and physical elements of performance.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

THEA 3010 - Writing for the Stage (3 Credit Hours)

A workshop in the writing of one-act and full-length plays. Topics include dramatic theory, plot structure, character, dialogue, naturalism, symbolism, theme, production problems, and manuscript format. Students will write a one-act play or a short screen play.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

THEA 3020 - Directing for the Stage (3 Credit Hours)

This course explores the theory and practice of directing diverse texts for the stage.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

THEA 3100 - History of Performance (3 Credit Hours)

This course provides a survey of a particular era or event in theater and/or performance history.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

THEA 3200 - Scenography (3 Credit Hours)

This course introduces students to the theoretical, practical, and technical elements, in the creation and execution of the theatrical stage production.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

THEA 4000 - Performance Theory and Practice (3 Credit Hours)

Advanced study of selected theater and performance theories and methods.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

THEA 4150 - Performance Studies (3 Credit Hours)

This course examines performance as a way of knowing and understanding the world and as a critical tool for engaging, analyzing, and creating aesthetic texts.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Asynchronous Instruction

THEA 4990 - Undergraduate Research in Performance (3 Credit Hours)

This course provides students with an undergraduate immersion in theater and performance research and creative scholarship. Students will develop and produce a theater performance project for public presentation or exhibition.

Prerequisite(s): (THEA 2000 >= C and THEA 2010 >= C and THEA 3000 >= C) and (THEA 3010 >= C or THEA 3020 >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

DLAB 1 - Transfer Lab Science (1 to 10 Credit Hours)

Lecture Hours: 1 to 10

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

TXPL 5602 - Treatment Planning II (1 Credit Hour)

Lecture Hours: 1

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

Major Restrictions: Advanced Standing DMD

Schedule Type (Primary): Lecture

CURS 2990 - Undergraduate Research and Scholarship I (0 Credit Hours)

Provides undergraduate students the opportunity to complete undergraduate research and/or creative activity in any discipline. The research and/or creative activity can be outside of the student's chosen major and can take place on any AU campus. The student and faculty member should agree upon a weekly and semester schedule and goals. Faculty projects should be registered in the CURS Undergraduate Research Opportunity Portal. The roles and expectations of each member of the project should be outlined in a syllabus.

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Course Level Restrictions: Undergraduate Semester

Schedule Type (Primary): Supervised Lab/Clinic **Schedule Type (Additional):** Independent Study, Directed Study (one-to-one)

CURS 3990 - Undergraduate Research and Scholarship II (0 Credit Hours)

This course is designed to give undergraduate students the opportunity to complete undergraduate research and/or creative activity in any discipline. The research and/or creative activity can be outside of the student's chosen major and can take place on either the Summerville or Health Sciences campus. The student and faculty member should agree upon a weekly and/or semester schedule. Roles and expectations of each member of the project should be outlined as well. This is a zero credit hour course.

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Course Level Restrictions: Undergraduate Semester

Schedule Type (Primary): Supervised Lab/Clinic **Schedule Type (Additional):** Independent Study, Directed Study (one-to-one)

CURS 4990 - Undergraduate Research and Scholarship III (0 Credit Hours)

This course is designed to give undergraduate students the opportunity to complete undergraduate research and/or creative activity in any discipline. The research and/or creative activity can be outside of the student's chosen major and can take place on either the Summerville or Health Sciences campus. The student and faculty member should agree upon a weekly and/or semester schedule. Roles and expectations of each member of the project should be outlined as well. This is a zero credit hour course.

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Course Level Restrictions: Undergraduate Semester

Schedule Type (Primary): Supervised Lab/Clinic **Schedule Type (Additional):** Independent Study, Directed Study (one-to-one)

RURO 5000 - Urology (27 Credit Hours)

Lecture Hours: 10 **Lab Hours:** 4 **Contact Hours:** 40

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: Residents

Schedule Type (Primary): Internship/Practicum

USGG 1002 - Studies Abroad (0 Credit Hours)

Lower level study abroad course denoting sophomore level work. Prerequisite: Varies with discipline and subject.

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Thesis

USGG 1005 - Study Abroad System (0 Credit Hours)

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Internship/Practicum, Thesis, Dissertation

USGG 1011 - Study Abroad System (0 Credit Hours)

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Internship/Practicum, Thesis, Dissertation

USGG 1017 - Study Abroad System (0 Credit Hours)

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction

USGG 1018 - Study Abroad System (0 Credit Hours)

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction

USGG 2004 - Study Abroad System (0 Credit Hours)

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction

USGG 2009 - Study Abroad System (0 Credit Hours)

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Internship/Practicum, Thesis, Dissertation

USGG 2020 - Study Abroad System (0 Credit Hours)

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction

USGG 2033 - Americans and Paris: A Survey of U.S. History with a French Twist (0 Credit Hours)

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction

USGG 2048 - Study Abroad System (0 Credit Hours)

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction

USGG 2049 - Introduction to Human Development: Growing Up Porto Style (0 Credit Hours)

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Directed Study (one-to-one), Asynchronous Instruction

USGG 3008 - Study Abroad System (0 Credit Hours)

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Internship/Practicum, Thesis, Dissertation

USGG 3016 - Study Abroad System (0 Credit Hours)

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Internship/Practicum, Thesis, Dissertation

Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Internship/Practicum, Thesis, Dissertation

USGG 3027 - Study Abroad System (0 Credit Hours)

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction

USGG 3034 - American Literature II: "More Freedom in One Square Block of Paris" - American Expatriate Writers (0 Credit Hours)

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching

USGG 4003 - Study Abroad System (0 Credit Hours)

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Internship/Practicum, Thesis, Dissertation

USGG 4005 - Study Abroad System (0 Credit Hours)

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Internship/Practicum, Thesis, Dissertation

USGG 4007 - Studies Abroad (0 Credit Hours)

Upper level study abroad course denoting senior level work. Prerequisite: Varies with discipline and subject.

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

USGG 4013 - Studies Abroad (0 Credit Hours)

Upper level study abroad course denoting senior level work. Prerequisite: Varies with discipline and subject.

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Practice Teaching, Internship/Practicum, Thesis

USGG 4017 - Study Abroad System (0 Credit Hours)

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction

USGG 4022 - Environmental Psychology (0 Credit Hours)

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study, Directed Study (one-to-one), Asynchronous Instruction

USGG 4812 - Study Abroad System (0 Credit Hours)

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction

VBIO 8010 - Methods in Cardiovascular Research (3 Credit Hours)

An in-depth study of vascular biology with a focus on state of the art techniques and methodology. A mixture of didactic learning and data analytical techniques in silico will be employed. Prerequisites: Completion of first year biomedical sciences graduate core curriculum or consent of course director.

Lecture Hours: 3

Repeatability: May be repeated for credit one time.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy

Schedule Type (Primary): Lecture

VBIO 8020 - New Frontiers in Vascular Biology (2 Credit Hours)

An in-depth study of vascular biology based on the current literature. Emphasis will be given to novel theories of mechanisms regulating vascular function along with state-of-the-art methodologies, concepts and trends in vascular biology research. A range of standard topics will be covered along with the introduction of new material each time the course is presented. See course director for details. Prerequisites: Completion of firstyear biomedical sciences graduate core curriculum or consent of course director.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus

VBIO 8130 - Modern Drug Discovery and Development (3 Credit Hours)

This three credit hour course is interdisciplinary with an emphasis on current techniques, concepts and trends in drug discovery and development today. Strategies for deciphering a drug target and for discovering new classes of drugs and therapies will be the main themes of the course.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Program Restrictions:** DPHIL_VBIO-Vascular Biology **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture

VBIO 8140 - Cell Signaling in Vascular Biology (2 Credit Hours)

An in-depth study of cell signaling in vascular biology based on the current literature. Emphasis will be given to state-of-the-art methodology and novel theories as it pertains to the mechanisms of cell signaling in vascular biology.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

College Restrictions: The Graduate School **Degree Restrictions:** Doctor of Philosophy

Schedule Type (Primary): Lecture

VBIO 8300 - Thesis Research (1 to 12 Credit Hours)

Permanent assignment to a specific lab with a faculty advisor and a defined research project. Students work under the mentorship of their faculty thesis advisor to define, develop, and carry out the basic study of a research problem of interest to both student and advisor. This course is designed to develop the experience, understanding, and skills to conduct and assess original, independent research in biomedical science. This course is typically taken more than one time and culminates in the final semester in the preparation and defense of a MS thesis.

Lab Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Program Restrictions: MS_VBIO-Vascular Biology

Schedule Type (Primary): Thesis

VBIO 9010 - Seminar in Vascular Biology (1 Credit Hour)

Lab Hours: 30

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy

Schedule Type (Primary): Seminar - Small Group **Schedule Type (Additional):** Supervised Lab/Clinic

VBIO 9020 - Vascular Biology Journal Club (1 Credit Hour)

Weekly presentation and discussion of recent journal articles in the field of vascular biology. All students enrolled will be required to present at least one journal paper per semester and will be expected to lead the discussion and answer questions in relation to the specific background, method, results, discussion and conclusions as it relates to the paper and field in general.

Lecture Hours: 1

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

College Restrictions: The Graduate School **Student Class Restrictions:** Graduate-Semester **Course Level Restrictions:** Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Seminar - Small Group

VBIO 9210 - Investigation of a Problem in Vascular Biology (1 to 12 Credit Hours)

Laboratory rotation course where the student works with individual faculty members on a specific research topic. This provides as introduction to techniques utilized in the laboratory as well as in introduction to the scientific method.

Lab Hours: 30

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: The Graduate School **Major Restrictions:** Vascular Biology **Student Class Restrictions:** Graduate-Semester

Course Level Restrictions: Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Program Restrictions:** DPHIL_VBIO-Vascular Biology

Schedule Type (Primary): Supervised Lab/Clinic

VBIO 9300 - Research in Vascular Biology (1 to 12 Credit Hours)

Enrollment in vascular biology graduate program and permanent assignment to a specific laboratory with faculty advisor and defined research project. Students work closely with their faculty thesis/dissertation mentor on an in-depth study of a research question of interest to both student and mentor. This course culminates in the preparation of a PhD dissertation and a thesis defense. Enrollment in this course requires official admission to candidacy.

Lab Hours: 30

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: The Graduate School **Major Restrictions:** Vascular Biology **Student Class Restrictions:** Graduate-Semester

Course Level Restrictions: Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Program Restrictions:** DPHIL_VBIO-Vascular Biology

Schedule Type (Primary): Dissertation

VBIO 9310 - Modern Drug Discovery and Development for the Physician (1 Credit Hour)

The course is interdisciplinary with an emphasis on current techniques, concepts, and trends in drug discovery and development today. The course presents information on how drugs are developed from concept all the way through clinical trials. Lecturers include numerous guest faculty from outside MCG who are currently working in the industry.

Lecture Hours: 2

Repeatability: May not be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory

College Restrictions: The Graduate School **Major Restrictions:** Vascular Biology **Student Class Restrictions:** Graduate-Semester

Course Level Restrictions: Graduate Semester **Degree Restrictions:** Doctor of Philosophy **Campus Restrictions:** Main Campus

Schedule Type (Primary): Lecture

WMBA 1000 - WebMBA Orientation (0 Credit Hours)

The Georgia WebMBA Orientation focuses on team building, program requirements and information, and includes interaction with our program faculty, administrators, and graduates. Sessions include communication and team maintenance, personality assessments, technology updates, presentations by course leads for each WebMBA course, and presentations and meetings with first course faculty. Students will work with their selected teams to create team contracts, have face-to-face time with their faculty, deans, and administrators. Students will also attend a panel discussion comprised of current students and alumni. All students must successfully complete this mandatory orientation held in Atlanta prior to starting the first semester.

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1MBA-MBA-Master of Bus Admin

Schedule Type (Primary): Lecture/Supervised Lab/Clinic **Schedule Type (Additional):** Seminar-Small Group

WMBA 6000 - Human Behavior in Organizations (3 Credit Hours)

Human Behavior in Organizations is a graduate level introductory course to organizational behavior designed for both the entry level and high level manager with any functional responsibility. This course explores some of the ways in which human behavior affects how one manages and leads and ultimately how it affects individual, group, and organizational performance. Students will apply concepts to case studies, their own companies and industry leaders. By the end of the course, students will be able to identify key organizational behavior issues and apply practical solutions to improve organizational effectiveness.

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1MBA-MBA-Master of Bus Admin
Schedule Type (Primary): Asynchronous Instruction

WMBA 6010 - Managerial Accounting (3 Credit Hours)

Managerial Accounting is designed for both entry level and high level managers with any functional responsibility. The course covers a wide range of topics that emphasize the use of both internal and external data to enhance the decision-making skills of managers. Concepts covered include an overview of the management accounting function within the organization, cost management and cost accumulation systems, planning and control systems, use of historical data in forecasting costs, and the use of accounting information in management decision-making. Case studies will be used to enhance students' critical thinking, problem solving, and communication skills. Students will apply concepts to a variety of companies using problems and case studies. By the end of the course, students will be able to understand and apply accounting information in management decision making functions.

Program Restrictions: 1MBA-MBA-Master of Bus Admin

Schedule Type (Primary): Asynchronous Instruction

WMBA 6030 - Global and International Business (3 Credit Hours)

Global and International Business is designed for both entry level and high level managers with any functional responsibility. The course is designed to explain to students the growing opportunities and potential risks in doing business across national boundaries. The nature and economic role of the global business, including the impact of legal, political, social, and cultural variables are examined for their influence upon business performance and managerial activity. Students will apply concepts to case studies, country report, and other assignments. By the end of the course, students will have a truly global approach in identifying, analyzing, and solving problems.

Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1MBA-MBA-Master of Bus Admin

Schedule Type (Primary): Asynchronous Instruction

WMBA 6040 - Managerial Decision Analysis Using Business Intelligence (3 Credit Hours)

Managerial Decision Analysis Using Business Intelligence is designed for entry level through high level managers who either provide input to or are responsible for managerial decisions based on solid logic and analysis. The course presents an introduction to the statistical and management science techniques that are most commonly used by managers in both the public and private sectors. We build the course providing tools you may find useful for your team project which may either be a consulting project addressing a real issue in a not-for-profit or for-profit entity or focus on a current topic of interest to a segment of the business community. By the end of the course, students will be able to understand the role of quantitative methods in the decision-making process; demonstrate the ability to visualize, present, analyze and interpret business data; develop an understanding of the application of quantitative analysis to the solution of management problems; and utilize spreadsheet analysis as a tool in analyzing data and developing a solution/recommendation to a problem situation.

Contact Hours: 3

Repeatability: May not be repeated for credit.

Program Restrictions: 1MBA-MBA-Master of Bus Admin

Schedule Type (Primary): Asynchronous Instruction

WMBA 6050 - Strategic Marketing (3 Credit Hours)

Strategic Marketing is a graduate level introductory course to marketing designed for both the entry level and high level manager with any functional responsibility. The purpose of the course is to familiarize students with the marketing concept and to help students understand how the marketing concept (and a firm's market orientation) influences various decisions made by managers in a firm. Marketing management involves the coordination and control of the firm's marketing functions in a dynamic environment. This course provides a study of the strategic managerial aspects of marketing and covers topics that include basic marketing concepts as well as some of the tools and strategies used by marketing managers. Topics focus on product, price, promotion, and place in the ethical planning, implementing, and controlling of marketing activities. A strategic marketing simulation that provides the opportunity for

students to apply and demonstrate understanding of the concepts learned in the course.

Contact Hours: 3

Program Restrictions: 1MBA-MBA-Master of Bus Admin

Schedule Type (Primary): Asynchronous Instruction

WMBA 6060 - Managerial Finance (3 Credit Hours)

Managerial Finance is a study of financial risk and return, capital budgeting, valuation, capital structure, working capital management and current topics in financial management. It develops a student's knowledge, analytical skills and communication skills in the area of financial management. The course gives students tools to analyze a company's financial position relative to the industry, apply time value of money concepts to business cash flows, evaluate the acceptability of a short-term and long-term financial decision, and understand the relationship between capital structure, risk, and the cost of capital.

Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1MBA-MBA-Master of Bus Admin

Schedule Type (Primary): Asynchronous Instruction

WMBA 6070 - Entrepreneurship (3 Credit Hours)

Entrepreneurship is intended to expose graduate business students to both the spirit and mechanics of entrepreneurial thinking and action. The course takes the perspective of both the would-be entrepreneur and the manager of creative and entrepreneurial activity within established organizations. This course is also designed to offer insight for students seeking entrepreneurial careers in new or established businesses. It describes the new venture startup process and strategies for increasing the likelihood of successful venture launch. Topics covered include models of new venture formation, strategic resource acquisition and deployment, marketing, operations, and financial strategies for successful ventures, and the leadership skills and behaviors required for venture success. Participants will also learn how to write a business plan and assess business plans written by others.

Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1MBA-MBA-Master of Bus Admin

Schedule Type (Primary): Asynchronous Instruction

WMBA 6080 - Management Information System (3 Credit Hours)

The Management Information Systems course is designed to provide a framework for understanding how technology can support (or hinder) organizational success, impacting decision making from operational activities to strategic decisions. Course lectures, discussions, application-oriented activities, team-based activities, and individual essays are used to develop the ability to incorporate academic theories into business practice. Business cases, current events, and personal experiences are discussed to help students learn to find points of success or failure based on the theories presented in class. Student teams investigate emerging technology topics and record videos to apply the new technology to business opportunities. The final project is an interview with the CIO (or equivalent) that allows you to apply these skills in a personal way to develop a framework for IT decisions.

Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1MBA-MBA-Master of Bus Admin

Schedule Type (Primary): Asynchronous Instruction

WMBA 6100 - Operations and Supply Chain Management (3 Credit Hours)

Operations and Supply Chain Management is designed for both new and high level managers with any functional managerial responsibility – which requires both administrative and analytical skills. The course will cover a wide range of topics such as: operations strategy, process selection, capacity planning, facility location and layout planning, job design, and total quality management. Students will apply concepts to all possible operational issues and challenges in their daily function. By the end of the course, students will be able to identify strategic decisions in operations management; select appropriate process for a given production system, employ

available techniques in firm's long-range capacity planning and layout design, and apply all related OM approaches in management decision making process.

Contact Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Program Restrictions: 1MBA-MBA-Master of Bus Admin

Schedule Type (Primary): Asynchronous Instruction

WMBA 6110 - Business Strategic Management (3 Credit Hours)

Business strategic management is designed to provide an executive viewpoint on strategy formation and enterprise management. It is the final experience for WebMBA students. It serves as an integrative capstone for the program. Students learn how to analyze complex situations to determine the firm's strategies for competitive advantage and growth in competitive markets.

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Internship/Practicum, Thesis, Dissertation

Additional Course Fee: Wellness Activity Course Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 20

WELL 1509 - Pilates (1 Credit Hour)

Lab Hours: 2

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

Additional Course Fee: Wellness Activity Course Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 20

WELL 1511 - Core Conditioning (1 Credit Hour)

Lab Hours: 2

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Internship/Practicum, Thesis, Dissertation

Additional Course Fee: Wellness Activity Course Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 20

WELL 1512 - Zumba (1 Credit Hour)

Zumba is an exercise program that fuses international dance rhythms and easy to follow routines. The routines feature interval training sessions where fast and slow rhythms and resistance training are combined to tone, and sculpt your body while burning fat.

Lab Hours: 2

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

Additional Course Fee: Wellness Activity Course Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 20

WELL 1528 - Bicycling (1 Credit Hour)

Lab Hours: 2

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Internship/Practicum, Thesis, Dissertation

Additional Course Fee: Wellness Activity Course Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 20

WELL 1699 - Selected Topics (1 Credit Hour)

Lab Hours: 2

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Lecture/Supervised Lab/Clinic, Lecture/Unsupervised Lab/Clinic, Seminar-Small Group, Supervised Lab/Clinic, Unsupervised Lab/Clinic, Independent Study, Directed Study (one-to-one), Asynchronous Instruction, Practice Teaching, Internship/Practicum, Thesis, Dissertation

Additional Course Fee: Wellness Activity Course Fee **Fee Type:** Flat Fee **Fee Amount:** \$ 20

WGST 1101 - Introduction to Women's and Gender Studies (3 Credit Hours)

Introduction to Women's and Gender Studies is an interdisciplinary course designed to provide a foundation for the minor. Instructors are encouraged to use methods and theories from fields such as communications, art, history, sociology, anthropology, literature, psychology, and women's and gender studies to explore how gender, as it intersects with other identities, influences individuals' lives experiences.

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Dual Enrollment Status: Approved for Dual Enrollment

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

WGST 2950 - Selected Topics (3 Credit Hours)

Seminar in Women's Studies often conducted on an interdisciplinary basis.

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

WGST 3310 - Women's Literature (3 Credit Hours)

An examination of a wide range of women writers, both classic and contemporary, with an emphasis on multicultural and/or multidisciplinary approaches.

Prerequisite(s): (ENGL 1101 >= C or ENGL 1101H >= C or ENGL1113 >= C) and (ENGL 1102 >= C or ENGL 1102H >= C or ENGL1114 >= C) and (WGST 1101)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

WGST 3336 - Women, Crime, and the Criminal Justice System (3 Credit Hours)

A sociological analysis of women as criminal offenders and as workers in criminal justice fields. Examines the socio-historical construction of gender for its influences on criminal law and the practices of criminal justice agencies. Covers historical perspectives on women and crime, the adequacy of contemporary criminological perspectives for explaining female criminality.

Prerequisite(s): (WGST 1101 >= C or SOCI 1160 >= C or CRJU 1103 >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

WGST 3870 - Identity: Ethnicity, Gender, and Class (3 Credit Hours)

This course examines the processes through which identities are culturally constructed and experienced. The focus is on key ideas and theoretical debates surrounding race and ethnicity, gender, sexuality, and class through a cross-cultural perspective. These identities intersect with each other and with other identities such as religious, educational, parental, etc.

Prerequisite(s): WGST 1101 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

WGST 4011 - History of Women (3 Credit Hours)

This course will examine the history of women in either a geographical or topical approach. It will examine the female role of mother, daughter, sister, and leader in a particular society, such as America, Europe, Asia, Latin America, etc. Or, the course will be centered on a particular cross-cultural topic, such as suffrage, family roles, leaders, religion, etc. In all cases, this course is intended to explore the paradox between the ideal woman and actual treatment of women in a given era, society, culture, or movement. Students taking the graduate level course will be required to complete additional work.

Prerequisite(s): HIST 1111 >= C or HIST 1112 >= C

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

WGST 4021 - Gender and Family History (3 Credit Hours)

This is an in-depth look at the relationship between men and women with particular emphasis on their roles in the family. The course will look at childhood, marriage, work, and cultural practices in a particular period from antiquity to modernity. Primary and secondary sources will provide comparisons between men and women in both the elite and common sectors of society. Students taking the graduate level course will be required to complete additional work.

Prerequisite(s): HIST 1111 >= C or HIST 1112 >= C

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

WGST 4120 - Gender and Communication (3 Credit Hours)

This course explores gendered communication patterns in a variety of contexts and examines how communication creates and reinforces gender. Theories that explain how culture shapes gendered communication and how gendered communication shapes culture will be examined.

Prerequisite(s): WGST 1101 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

WGST 4310 - Studies in Feminism (3 Credit Hours)

A course which uses feminist scholarship to analyze selected texts and topics.

Prerequisite(s): (WGST 1101 >= C) or (ENGL 1101 >= C or ENGL 1101H >= C or ENGL1113 >= C) and (ENGL 1102 >= C or ENGL 1102H >= C or ENGL1114 >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture

WGST 4336 - Gender and Victimization (3 Credit Hours)

A sociological analysis of crime victims and victim-service agencies. Traces the historical development of the field of victimology. Examines the influence of gender on victimization experiences and practices of criminal justice and victim-service agencies.

Prerequisite(s): (SOSC 3001 >= C or SOSC 3002 >= C or SOSC 3003 >= C or WGST 1101 >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Seminar-Small Group, Directed Study (one-to-one), Asynchronous Instruction

WGST 4442 - Gender and Society (3 Credit Hours)

Sociological insights and concepts will be employed in observing, interpreting, and analyzing the social processes creating, reinforcing and changing gender roles and the statuses of women and men in society.

Prerequisite(s): (WGST 1101 >= C) and (SOCI 1101 >= C or SOCI 1101H >= C or SOCI 1103 >= C or PSYC 1103 >= C)

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Asynchronous Instruction

WGST 4950 - Selected Topics (3 Credit Hours)

A seminar in a particular area of women's, gender, and/or sexuality studies, often conducted on an interdisciplinary basis.

Prerequisite(s): WGST 1101 >= C

Lecture Hours: 3

Repeatability: May be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Lecture **Schedule Type (Additional):** Independent Study

WGST 4960 - Undergraduate Internship (1 to 3 Credit Hours)

A civic engagement experience based in an off-campus agency or organization. Under the supervision of a faculty member at the university and a supervisor at a cooperating agency or organization, a student completes specific tasks and acquires specific knowledge and skills related to an area of women's, gender, and/or sexuality studies.

Prerequisite(s): WGST 1101 >= C

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Internship/Practicum

WGST 4961 - Feminist Media Production Internship (1 to 3 Credit Hours)

A feminist media production internship. Students will participate in the production of feminist media through writing original material, evaluating and editing submitted material, and formatting material for outside readers. Application and approved plan for credit-hour option required.

Contact Hours: 1 to 3

Repeatability: May be repeated for credit.

Grade Mode: Satisfactory/Unsatisfactory, Audit

Schedule Type (Primary): Internship/Practicum

WGST 4990 - Undergraduate Research (3 Credit Hours)

A major research project exploring a specific topic in women's, gender, and/or sexuality studies under the direction of a supervising instructor.

Prerequisite(s): WGST 1101 >= C

Lecture Hours: 3

Repeatability: May not be repeated for credit.

Grade Mode: Normal, Audit

Schedule Type (Primary): Independent Study

ANAT 7120 - Advanced Strategies in Anatomical Education (1 Credit Hour)

This course is designed to prepare graduate students and early-career professionals for teaching-focused academic careers in anatomy and medical education. Participants will engage in activities that support the development of a comprehensive teaching philosophy, the construction of a curriculum vitae tailored to teaching-centered positions, and the refinement of academic interview skills. Emphasis will be placed on exploring current trends and innovations in anatomy education, as well as foundational principles and methodologies in education research. Through critical reading, reflective writing, and guided discussions, students will gain the tools

necessary to evaluate educational literature, formulate research questions, and position themselves as scholarly educators in the evolving landscape of health sciences education.

Grade Mode: S-Satisfactory/Unsatisfactory

College Restrictions: The Graduate School **Department Restrictions:** MCG Cellular Biology & Anatomy **Degree Restrictions:** Doctor of Philosophy

Schedule Type (Primary): Lecture

ANAT 7130 - Supervised Anatomy Teaching Practicum (4 Credit Hours)

This course provides students with hands-on teaching experience through active participation in the gross anatomy laboratory for the College of Allied Health Sciences. Under the mentorship of the anatomy faculty, students will prepare for and assist in laboratory dissections, exam practical preparation, and lecture in a large-group, graduate-level setting. As part of their experience, students will develop and deliver an instructional lecture, receive feedback from faculty, and explore evidence-based teaching strategies that support diverse learning needs. By the end of the course, students will have gained practical teaching experience, enhanced their communication and presentation skills, and developed a critical awareness of their teaching style and teaching effectiveness in gross anatomy.

Prerequisite(s): CAHS 7400>=B and ANAT 7110>=B

Grade Mode: S-Satisfactory/Unsatisfactory

College Restrictions: The Graduate School **Department Restrictions:** MCG Cellular Biology & Anatomy **Degree Restrictions:** Doctor of Philosophy

Schedule Type (Primary): Lecture/Supervised Lab/Clinic

KNHS 3400 - Coaching Principles (3 Credit Hours)

This course introduces the fundamental principles and practices of effective coaching with an emphasis on an athlete-centered approach. Students will explore the roles and responsibilities of a coach, including planning, organizing, teaching, and conducting practices, while developing the skills needed to create a positive and productive sport environment. The course emphasizes placing athlete development as the top priority, encouraging future coaches to foster growth, performance, and well-being in those they lead.

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: NR-Not Repeatable

Grade Mode: N-Normal (A,B,C,D,F)

Schedule Type (Primary): 10-Lecture **Schedule Type (Additional):** 57-Asynchronous Instruction

PTHP 9110 - Topics in Physical Therapy (Elective) (1 Credit Hour)

Students gain knowledge and skills in a physical therapy special interest area by individually defining personal learning objectives and developing learning activities to achieve those objectives. Self-assessment, expert opinion and/or peer assessments are utilized to evaluate outcomes of the experience. Study may be in areas related practice, administration, education or research.

Grade Mode: S-Satisfactory/Unsatisfactory

Schedule Type (Primary): 81-Internship/Practicum

SLPP 2106 - Speech and Hearing Science (3 Credit Hours)

The general theme of this course will be to acquaint the student with an introduction to the physics of sounds and to the functioning of the vocal tract as a resonating system for speech production. Instruction will focus on the clinical application of principles of speech and hearing science to the evaluation and treatment of individuals with communication disorders. Students in this course will be able to define sound, simple harmonic motion, pressure waves, decibels, complex waves, resonance, and sound transmission and will learn the application of acoustics to speech production, spectrographic analysis, speech synthesis, as well as the relationship between acoustics, articulation, and resonance.

Lecture Hours: 3 **Contact Hours:** 3

Repeatability: Not Repeatable

Grade Mode: Normal (A,B,C,D,F)

Schedule Type (Primary): Lecture

Academic Resources

The Academic Resources listed here are university-provided tools and services that support student learning, research, and academic success. For additional information, see the Student Manual.

- Academic Advisement Center
- Academic Success Center
- Alumni Association
- Career Services
- Center for Undergraduate Research and Scholarship
- Center for Writing Excellence
- Distance Education
- Professional and Continuing Education
- Study Abroad Office

Academic Advisement Center

augusta.edu/advising | **706-731-7979** | academicadvisement@augusta.edu

Academic Advisement is where undergraduates begin. The centralized advisement services are designed to provide comprehensive support as students navigate their way into their respective major programs. The team of Undergraduate Academic Advisors are well-versed in the undergraduate programs and core curriculum, assisting students in developing academic plans, selecting courses, recommending actions, and connecting them with campus resources as needed.

They work closely with academic programs and support services to help students identify and confirm their academic career paths. Professional advisors offer ongoing support through various means including outreach services, personal phone calls, targeted emails, and electronic messages.

There are two convenient locations for students: (1) on the second floor of University Hall (262) on the Summerville campus and (2) in the Greenblatt Library on the Health Sciences Campus. Offices are open weekdays from 8:00 a.m. to 5:00 p.m. Walk-in hours for quick consultations are available. For up-to-date walk-in hours, visit the Academic Advisement Center Staff webpage. Advising appointments are required for next term advisement to ensure both the advisor and student are prepared for a productive session. Additional information can be found on the Academic Advisement website.

Academic Success Center

augusta.edu/academicsuccess | **706-667-4777** | asc@augusta.edu

Our number one goal is to see students succeed! The Academic Success Center (ASC) is home to a variety of free in-person and online academic support services. We provide peer tutoring for most subjects across the undergraduate curriculum and academic coaching is available to all AU students. The ASC is located on the first floor of University Hall at Summerville and in Greenblatt Library at Health Sciences. The ASC is open for general study. Visit us to reduce your stress and build your skill set.

Alumni Association

augusta.edu/alumni | **706-737-1759** | alumni@augusta.edu

The Augusta University Alumni Association with its affiliate college alumni societies exists to promote the growth and welfare of Augusta University and link alumni to their alma mater. The association is composed of former students and graduates of Augusta University and its legacy institutions -- the Medical College of Georgia, Augusta College, Augusta State University, Georgia Health Sciences University, and Georgia Regents University -- who share a goal to build community and connection through social activities, professional networking, mentorship, service, and other opportunities to give back to the university. Together we aim to amplify the profile and value of an Augusta University education and to strengthen the lifelong connections that our graduates have with the university. All graduates become members of the alumni association upon graduation.

Career Services

augusta.edu/careerservices | **706-737-1604** | careercenter@augusta.edu

Career Services provides career development and job search assistance to all currently enrolled students at Augusta University. Graduating seniors have access to Career Services for one full year after graduation. After this period, Alumni Services are available for a nominal fee. The office is located on the Summerville campus in University Hall, Suite 210.

Office hours are 8 a.m. - 5:00 p.m., Monday through Friday, with evening appointments available upon request. Career Consultants, assigned by major, are available for in person or virtual appointments to work individually with students on their specific career planning or job search needs. Additionally, Career Services offers walk-in hours that do not require an appointment. The website also offers extensive career development content and resources to assist students online.

To schedule an appointment, students may call 706-737-1604 or opt to schedule through their Handshake account.

Some of the primary activities of the office are:

Career Planning and Exploration

Students unsure of a career path or academic major are encouraged to schedule an appointment with their Career Consultant for guidance and access to a variety of career assessments and planning tools. The career planning and exploration page of our website offers several online assessments that can be used prior to a career exploration appointment.

- **Steppingblocks:** Online career exploration platform that includes a 3-minute personality and career assessment. Using the results of your assessment to explore majors, occupational trends, and real career paths of AU alumni. Identify skillsets needed for occupations to help you target your resume effectively.
- **Traitify:** Interactive, 5 minute online career assessment with your university email. No appointment is needed.
- **DISC Index & Values Index:** Designed to help individuals understand how their behavioral strengths and tendencies can impact their goal achievement, interpersonal communication, job selection and optimization of their personal potential.
- **Focus2:** Combines self-assessment, career and major exploration, decision making and action planning into one comprehensive product.

The Hull College of Business CAP (Career & Academic Planning) Center is available to support all business majors with career advisement by calling 706-737-1560 to schedule a virtual appointment or visit their suite in Allgood Hall, N-112.

Job Search Preparation and Assistance

Once enrolled at Augusta University, students have access to a variety of career preparation resources including:

- Handshake: Career Services online one-stop shop for job search, career event registration, and appointment scheduling. Students seeking jobs can view full-time, part-time on- and off-campus opportunities, internships, and seasonal hiring needs. Students can use the same online portal to schedule career consultant appointments and register for Career Services events.
- Resume, cover letter, and personal statement reviews with feedback usually provided within 1 business day
- Mock interviews for employment or graduate/professional school
- Tips on networking, using social media in the job search and business etiquette
- Researching employers, competitive salaries and salary negotiations, job fairs, and employer panels

Cooperative Education

Cooperative Education is an academic program that provides an excellent means to develop marketable skills in the workplace that complement a student's educational experience in the classroom. Co-op positions are paid and structured to enhance the curriculum and expand the knowledge of the student. Students receive documentation of the Co-op experience on the academic transcript as a non-credit course. There are three Co-op plans for student participation. Under the Parallel plan, students work part-time and attend school concurrently. The Alternating plan allows students to rotate between semesters of full-time work and school. The Co-op Intern program is a paid, career-related work experience for one semester only.

To apply for the Co-op program, the candidate must be a full-time student with a declared major, a minimum overall GPA of 2.5, a minimum of 24 credit hours earned, have completed at least one full semester of coursework at AU, and be willing to work at least two academic semesters in a Co-op assignment (Co-op Intern excluded from two semester commitment). Call the office at 706-737-1604 to schedule an appointment to discuss qualifications.

Center for Undergraduate Research and Scholarship

The Center for Undergraduate Research and Scholarship (CURS), located in the Summerville Research Suite (AH E-325-330), fulfills part of the AU mission toward high impact engaged student learning. CURS aims to build and improve the culture of research through inclusive and collaborative relationships between undergraduate students and research mentors across all colleges. Students can find research opportunities through the Undergraduate Research Opportunity Portal and receive advising on registering for research courses. CURS sponsors a variety of programs, such as workshops on how to get started in research and presenting research in a public forum. CURS also provides grants for supplies and travel and a Summer Scholars Program to assist students in real world learning through research.

Center for Writing Excellence

augusta.edu/cwe | **706-737-1402** | cwe@augusta.edu

The Center for Writing Excellence (CWE) offers free in-person and online tutoring consultations for students, faculty, and staff working in all majors and disciplines with the goal of improving written, oral, and multimedia communication skills. Friendly and non-evaluative, the staff empowers writers to make well-informed decisions about their texts while helping them to develop individualized writing processes. Trained writing consultants assist writers at any stage in the writing process, including brainstorming, drafting, revising, and editing. The center also offers professional development for faculty who teach writing in their courses and in-class writing workshops for students to support the teaching of writing across and in the disciplines. The CWE uses best practices in composition pedagogy to inform its instruction. The center has two locations: Allgood Hall room E158 on the Summerville campus and Greenblatt Library room 1203 on the Health Sciences campus. Hours of operation vary by term and are available on the website. Appointments can be made by visiting the website; walk-ins are also welcome dependent upon consultant availability.

Distance Education

Augusta University offers a variety of distance education programs and courses designed to help meet the evolving learning needs of students who prefer the online format or require more flexibility in their coursework. These courses are designed for students who may not be able to attend a class at a specific time, day or place due to balancing their career, family responsibilities, travel, and/or physical challenges.

Currently, Augusta University offers degree programs and courses through non-traditional delivery methods via the Internet utilizing synchronous and asynchronous technologies. The courses utilize the Brightspace by D2L learning management system and other online educational tools such as Echo360 lecture viewing, Zoom and Microsoft Teams and synchronous audio and video chatting, video conferencing, various online testing systems, among additional technologies.

Asynchronous courses are electronically interactive, but may use a combination of live chat rooms, threaded discussions, electronic bulletin boards, email and/or interactive web pages which require completing assignments before an established deadline. Some courses are delivered via synchronous video at scheduled times with a professor in one site delivering live two-way video instruction, generally through Zoom, Microsoft Teams, or Echo360 Streaming service.

Augusta University has procedures in place to verify identification and to protect the privacy of students who participate in distance learning activities and students are informed of any additional charges associated with distance learning courses at the time of registration.

Augusta University authenticates that the student who registers in a distance learning course is the same student who participates in, completes the course, and receives the credit, by verifying the identity of the student using the following methods:

- Requiring unique usernames and secure passwords on which students' access to all secure online and network campus resources are based. These online campus resources include, but are not limited to, access to the student information system (Banner), learning management system (Brightspace by D2L) through which students access their online coursework, electronic mail, as well as some course-specific systems. Passwords must be changed every 180 days and must adhere to certain complexity requirements. These procedures are outlined in the Acceptable Use Policies.
- Requiring identification in the registration process including social security number during application process and photocopy of student driver's license or some other form of identification. A photocopy scanned or faxed copy will be acceptable if student is a distance-learning student and cannot travel to campus.
- Some online courses require students to travel to an approved testing site for proctored exams. At each testing site, the proctor is required to check the identity of the student against an official form of ID (state-issued driver's license, passport, or student ID).
- Some online courses utilize electronic exam software to administer and/or proctor examinations with security measures designed to ensure academic integrity. These systems require students to log on to the Learning Management System or other exam environment,

while the exam software or a remotely located proctor temporarily monitors and/or limits certain functions of the students' computer, including but not limited to the keyboard, screen, camera and microphone.

- For online courses administered through the eCore consortium, Augusta University students access the course through the GoVIEW system. Visit ecore.usg.edu for more information about eCore requirements.

For students enrolled in distance education courses, the last date of attendance for federal financial aid is calculated using one of the following USG approved methods:

- Last date an assignment was completed
- Last attempt at an exam, text, or quiz
- Last interaction on a discussion post
- Last interaction with the instructor of record via email regarding the course

Augusta University Online

Augusta University Online brings the tight-knit community experience found on campus to students across the country. Small class sizes, engaged professors, strong relationships with a multitude of professional organizations and valuable input from subject matter experts across industries allow our graduate degrees to provide students with individualized attention and practical, real-world skills. One of the country's top universities for improving economic outcomes for graduates, Augusta University Online gives students a truly transformative degree experience that allows them to make a profound impact on their lives. Visit online.augusta.edu for more information and a list of available programs.

Online Tuition

Students are informed in advance of any additional charges associated with distance education degree programs and/or courses at the time of registration. All tuition and fee schedules are publicly available on the Augusta University website, including the costs associated with online courses so that students are notified in advance of registration of any additional expenses.

Professional and Continuing Education

augusta.edu/pace | coned@augusta.edu

The Division of Professional and Continuing Education (PaCE) sets the PaCE in distance learning and provides learning opportunities for the community, state, region, and nation. AU offers various online training programs on multiple topics, from professional certifications to personal enrichment. The online courses are affordable, fun, fast, convenient, and geared for adults with busy lives.

PaCE provides access to innovative, flexible, and responsive continuing education opportunities supporting learners of all ages seeking to grow professionally, personally, and culturally. Whether you desire to acquire new workforce skills, upgrade current skills or seek personal enrichment, we offer something for you. Search the professional and personal enrichment courses on our website to learn new possibilities of inspiration in your life. There are no academic admissions requirements to enroll in PaCE courses.

Study Abroad Office

augusta.edu/studyabroad | **706-729-2306** | studyabroad@augusta.edu

The Study Abroad Office (SAO) offers a variety of credit-bearing study abroad and away programs, both internationally and domestically. These programs typically range from 1 to 5 weeks and are designed to help students earn core curriculum or major-specific credit in an immersive, hands-on learning environment. Although most programs are first-come, first-served, some do require prerequisites or faculty approval. Program offerings vary year to year, with some departments offering recurring programs. Current programs actively recruiting students are promoted each summer on the Study Abroad website and Instagram (@aug_studyabroad).

SAO partners with USG Goes Global, a consortium offering summer study abroad programs open to students across the University System of Georgia. These programs are a great way for Augusta University students to take courses led by faculty from other USG institutions while exploring destinations like Spain, France, or Ghana. We also have an affiliation with CIS Abroad, a third-party provider offering programs for the summer, semester, or academic year. Through CIS Abroad, students have access to global internships (both in-person and virtual) in addition to the variety of academic offerings and locations.

In addition to faculty-led programs, we support independent student travelers, students who are participating in academic study abroad programs not directly led by Augusta University. Our office assists with the approval process, ensures students meet risk management and insurance requirements, and helps them stay connected to Augusta University while they are abroad.

The staff is here to help students navigate their options and find the program that best fits their academic goals, budget, and interests. Whether students are looking for a short-term spring or summer program or a semester-long adventure, the Study Abroad Office is committed to helping them make the most of their experience.

Teresa Waters, PhD

Dean, School of Public Health

Interim Dean, Hull College of Business

Mickey Williford, MPA

VP, Institutional Effectiveness

Kerri Wilson, ABJ

AVP, Financial Planning & Analysis

Judi Wilson, EdD

Dean, College of Education and Human Development

Faculty Listing

Use the letters below to jump down to faculty with the last name of that letter.

A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P	Q	R	S	T	U	V	W	X	Y	Z

A**Abais-Battad, Justine M**

Assistant Professor, Physiology

PHD, 2014, Virginia Commonwealth University, BS, 2009, Virginia Commonwealth University

Abbas, Kendall Richard

Assistant Professor, Pediatrics

MD, 2019, University of South Carolina, BS, 2012, Furman University

Abdelsamed, Hossam Aly

Assistant Professor, Immunology Center of Georgia

PHD, 2012, University of Tennessee Health Science Center, BS, 2001, Ain Shams University

Abdelsayed, Rafik A

Professor, Oral Health and Diagnostic Sciences

DDS, 1993, Indiana University-Purdue University Indianapolis, BDS, 1980, Cairo University, MS, 1990, Indiana University-Purdue University Indianapolis

Abdulovic-Cui, Amy L.

Associate Dean, College of Science & Mathematics

PHD, 2007, Emory University, BS, 2001, Grove City College

Abebe, Worku

Associate Professor, Oral Biology

PHD, 1990, University of British Columbia

Abed, Wafa Y

Lecturer, Mathematics

MS, 1989, Yarmouk University, MBA, 2014, Georgia Regents University, BS, 1987, Yarmouk University

Abuzeid, Adel Mohamed Osman

Associate Professor, Surgery

MBBS, 1999, St. Bartholomew's & the Royal London Hospital

Acosta, Moniqua Sue

Lecturer, English & World Languages

MA, 2008, University of Florida, BA, 2005, Augusta State University

Adair,Dionne Joy

Assistant Professor,Pediatrics
MD,2011,University of the West Indies

Adam,Bao-Ling

Assistant Professor,Surgery
PHD,1990,Old Dominion University,BS,1982,Taiwan Normal University

Adams,Natalie Joy

Instructor ,Psychological Sciences
MS,2025,Augusta State University,BS,2023,Augusta University

Adeyemi,Amidat

Assistant Professor,Medicine
MD,2017,Augusta University,MSC,2007,Georgia Institute of Technology,BSChEM,2005,SUNY College at Purchase

Adibi,Arman

Assistant Professor,Computer & Cyber Sciences
PHD,2023,University of Pennsylvania,BS,2018,Isfahan University of Technology

Adu Dapaah,Eunice

Assistant Professor,Medicine
MBBS,2013,University of Ghana Medical School

Agabin,Edward V

Associate Professor,Medicine
MD,2011,Ross University School of Medicine,MPH,2021,Augusta University,BS,2007,University of Florida

Agarwal,Gautam

Section Chief,Surgery
MBBS,1994,Sriram Chandra Bhanu Medical College and Hospital

Agbali,Raphael Ayegba

Assistant Professor,Health Management, Economics, & Policy
PHD,2023,Augusta University,MPH,2014,Emory University,BPHARM,1997,University of Jos

Agee,Brian M

Assistant Professor,Chemistry and Biochemistry
PHD,2015,Tennessee Technological University,MS,2009,Tennessee Technological University,BS,2007,Tennessee Technological University

Agochukwu,Uzundu F

Professor,Surgery
MD,2007,Indiana University-Purdue University Indianapolis,BS,2003,Louisiana State University Health Sciences Center

Agualimpia Garcia,Andrea

Assistant Professor,Pathology
MD,2009,Universidad del Valle-Cali

Agyapong,Afua Mmra

Department Chair,Speech & Language
PHD,2018,University of North Dakota,MBA,2025,Francis Marion University,MS,2012,University of North Dakota,BA,2007,University of Ghana,BGS,2010,Minot State University

Aherrahrou,Redouane

Assistant Professor,Immunology Center of Georgia
PHD,2015,Université Moulay Ismail,MS,2009,Université Moulay Ismail,BS,2006,Université Moulay Ismail

Ahluwalia,Pankaj Kumar

Assistant Research Scientist,Pathology
PHD,2020,Guru Nanak Dev University,MS,2012,Guru Nanak Dev University,BS,2010,Guru Nanak Dev University

Ahmadieh,Samah

Assistant Professor,Medicine

MD,2018,Mercer University,BS,2013,University of Georgia

Aiken,Caroline Marie

Instructor ,Prelicensure Nursing

DNP,2018,Augusta University,BSN,2013,Georgia Regents University

Aiken,Thomas Paul

Assistant Professor,MCG-UGA Medical Partnership

MD,2016,Mercer University,BSA,2011,University of Georgia

Ajith,Ashwin

Assistant Research Scientist,Georgia Cancer Center

PHD,2019,Augusta University,MSC,2011,Manipal University,MS,2014,SUNY at Albany,BSC,2009,Manipal University

Akers,Troy Wayne

Assistant Professor,Emergency Medicine

DO,2008,Edward Via College of Osteopathic Medicine,BS,2003,Bridgewater College

Al Haj Ali,Emad

Assistant Professor,Otolaryngology

MD,2003,University of Damascus

Albert,Craig D

Professor,Social Sciences

PHD,2009,University of Connecticut,MA,2003,University of Connecticut,BA,2001,Augusta State University

Albritton,Josephine Belle

Assistant Professor,MCG-UGA Medical Partnership

MD,1984,Augusta University,BS,1980,Augusta State University

Albritton,Thomas A

Professor,MCG-UGA Medical Partnership

MD,1980,University of Guadalajara,BS,1976,University of Georgia

Alderman,Penny T.

Senior Lecturer,Social Sciences

MSW,1982,Atlanta University,BA,1975,University of Georgia

Aleroud,Ahmed

Associate Professor,Computer & Cyber Sciences

PHD,2014,University of Maryland, Baltimore,BS,2006,The Hashemite University

Ali,Muhammad Salman

Assistant Professor,Neurosurgery

MBBS,2007,Bahria University

AlJaroudi,Wael Adnan

Professor,Medicine

MD,2002,American University of Beirut

Alkathiri,Saleh Ali Abdulaziz

Assistant Professor,Radiology and Imaging

MBBS,2010,Jordan University of Science

Allen Jr.,Kevin Lindsey

Assistant Professor,Emergency Medicine

MD,2012,Meharry Medical College,BS,2008,North Carolina Central University

Allen,Jennifer Tomlinson

Interim Section Chief,Obstetrics and Gynecology

MD,2010,Medical University of South Carolina

Allen,Jonathon C

Assistant Professor, Emergency Medicine
MD, 2004, Indiana University School of Medicine, BA, 2000, Wabash College

Allen, Kelly Renee

Assistant Professor, Research. Counseling & Curriculum
PHD, 2022, University of Wisconsin-Milwaukee, MS, 2018, University of Wisconsin-Milwaukee, BS, 2015, University of Wisconsin-Milwaukee, CER, 2017, University of Wisconsin-Milwaukee

Allen, Michael John

Assistant Professor, Emergency Medicine
DO, 2007, Lake Erie College of Osteopathic Medicine, BS, 2003, Saint Vincent College & Seminary

Allen, Steven Robert

Assistant Professor, Medicine
MD, 2016, Ross University, BS, 2010, University of California UCLA

Allmond, Lynn Marie

Instructor, Doctorate of Nursing Practice Program
MS, 1990, Ohio State University, BSN, 1985, Bowling Green State University, CER, 1997, University of South Carolina

Al-Mamun, Abdullah

Assistant Professor, Computer Science
PHD, 2022, University of Nevada-Reno, MSCS, 2013, RWTH Aachen University, MS, 2013, RWTH Aachen University, BS, 2009, American International University

Alperin, Henry

Assistant Professor, Radiology and Imaging
MD, 1968, Virginia Commonwealth University, BS, 1964, University of Richmond

Amarasinghe, Asanka Malinda

Assistant Professor, Physics and Biophysics
PHD, 2022, University of Connecticut, MS, 2018, University of Connecticut

Ameri, Afshin

Professor, Pediatrics
MD, 1987, Philipps-Universität Marburg

Amm, Hope M

Assistant Professor, Oral Biology
PHD, 2010, University of Alabama at Birmingham, BS, 2002, St Marys College

Amornpan, Suwakitti

Assistant Professor, Hull College of Business
PHD, 2024, University of Texas Rio Grande, MBA, 2012, Mahasarakham University, BBA, 2009, Mahasarakham University

Anand, Usha Nandhini

Campus Ast Dean Curriculum WK, MCG Academic Affairs
MBBS, 1998, Jawaharlal Institute of Postgraduate Medical Education

Ande, Satyanarayana

Associate Professor, Georgia Cancer Center
PHD, 2004, Universitat Hannover University, MS, 1998, Nagarjuna University, BS, 1996, Nagarjuna University

Anderson, Daniel Thomas

Assistant Professor, Pharmacology and Toxicology
PHARM, 2018, University of Georgia

Andrews, Meygan Briana

Instructor, Prelicensure Nursing
BSN, 2021, Augusta University

Ang,Sheryl Siok Hoon

Assistant Professor,Anesthesiology and Perioperative Medicine
MBCHB,2010,National University of Singapore

Ange,Brittany Layne

Assistant Dean,MCG Academic Affairs
EDD,2017,Georgia Southern University,MS,2011,Georgia Health Sciences University,BS,2009,University of Georgia

Ankomah,Edmund Hammah

Assistant Professor,English & World Languages
PHD,2024,Illinois State University,MPHIL,2014,University of Ghana,BA,2011,University of Ghana

Annex,Brian Herb

Department Chair,Medicine
MD,1985,Yale University School of Medicine,BS,1981,SUNY-Stony Brook

Ansa,Benjamin Etim Okon

Assistant Professor,Health Management, Economics, & Policy
MBBS,1988,University of Nigeria,PHD,2022,Augusta University,MS,2012,Morehouse School of Medicine

Appiah-Pippim,James Akwa

Professor ,MCG-UGA Medical Partnership
MD,1990,University of Ghana,MPH,1999,Yale University

Arbab,Ali Syed

Professor,Georgia Cancer Center
MD,1988,University of Dhaka,PHD,1998,Yamanashi Medical University

Ard,Kevin Dalton

Lecturer,Biological Sciences
MS,2025,Augusta University,BS,2022,Augusta University,BA,2022,Augusta University

Aristilde,Wilnia

Instructor ,Teaching and Leading
EDD,2022,Piedmont College,EDS,2012,Piedmont College,MA,2004,Kean University,BA,1999,Kean University

Arlauskas,Vincent Kline

Associate Professor,MCG-GS Savannah Partnership
MD,1995,Thomas Jefferson University,BS,1991,University of Scranton

Armstrong,Brian A

Associate Professor,History, Anthropology and Philosophy
PHD,2007,Pennsylvania State University,MA,1996,University of Oregon,BA,1993,University of Kansas

Armstrong,Jennifer Marie

Instructor ,Teaching and Leading
EDS,2009,University of West Georgia,BBA,2003,Augusta State University,BSE,2006,Augusta State University

Armstrong,Rhonda J

Professor,English & World Languages
PHD,2005,St Louis University,MA,1999,St Louis University,BA,1995,Western Kentucky University

Arnold,Alicia Huff

Associate Professor,Surgery
DO,2011,Philadelphia College of Osteopathic Medicine,BS,2006,University of North Carolina-Chapel Hill

Arora,Vishal

Professor,Medicine
MD,2000,Augusta University,BS,1996,University of South Carolina

Arthur,Mary Ewurabena

Professor,Anesthesiology and Perioperative Medicine
MD,1993,University of Ghana

A'see,Kandyce Mack

Professor,Dental Hygiene

EDD,2024,University of North Georgia,MS,2011,Augusta University,BS,2007,Medical College of Georgia

Ash,Dipankar

Assistant Research Scientist,Vascular Biology Center

PHD,2015,Jawaharlal Nehru University,MS,2008,University of Calcutta,BS,2006,University of Calcutta

Atchley,Ronald B

Assistant Professor,MCG-UGA Medical Partnership

MD,2014,University of North Carolina-Chapel Hill,BS,2014,Northwestern University

Athanasadi,Argyro

Assistant Professor,Psychiatry and Health Behavior

MD,2010,Demokritos University of Thrace,MS,2013,Demokritos University of Thrace

Attie,Paul C

Professor,Computer Science

PHD,1995,University of Texas-Austin

Aubert,Clement

Associate Professor,Computer Science

PHD,2014,University of Paris 13

Aucello,Kelley Raye

Assistant Professor,Psychological Sciences

PSYD,2020,Nova Southeastern University,MS,2018,Nova Southeastern University,AB,2015,Florida Atlantic University

Ausban,Jason Dean

Instructor ,Music

MM,2011,University of Wisconsin-Milwaukee,BS,2010,Indiana State University

Avent-Holt,Dustin R

Associate Dean,Pamplin College of Arts, Humanities & Social Sciences

PHD,2012,University of Massachusetts-Amherst,MS,2005,North Carolina State University,BA,2003,Georgia State University

Avila Hernandez,Adrian Nicolas

Assistant Professor,Anesthesiology and Perioperative Medicine

MD,2011,Universidad Nacional De Columbia

Aycock,Carey A

Instructor ,Teaching and Leading

EDD,2019,Georgia Southern University,EDS,2007,Augusta University,MED,2006,Augusta University,BSED,2004,Augusta University

Azeem,Sameera Warsi

Assistant Professor,Psychiatry and Health Behavior

MD,2012,Augusta University,MPH,2007,Emory University,BS,2001,Augusta State University

B**Baban,Babak**

Professor,Oral Biology

PHD,1998,University of London,MPH,2015,Augusta University,MS,1992,Tehran University of Medical Sciences,MBA,2008,Augusta State University,BS,1989,Urmia University

Babayan,Liana

Associate Professor,English & World Languages

PHD,2010,University of Georgia

Bachand,William Randall

Professor,General Dentistry

DDS,1979,Marquette University School of Dentistry,MS,2001,US Army War College,BA,1984,University of Maryland

Bae,Sejong

Department Chair,Biostatistics, Data Science, & Epidemiology

PHD,1999,University of Alabama at Birmingham,MS,1993,University of Georgia,BS,1990,University of Georgia

Baer Ellington,Aimee Elizabeth

Assistant Professor,Emergency Medicine

MD,2013,Augusta State University,BS,2009,University of Georgia

Baer Ellington,Christopher Lee

Associate Professor,Medicine

MD,2015,Augusta State University,MSPH,2011,Emory University

Bagi,Zsolt

Professor,Physiology

MD,2000,Semmelweis University of Budapest,PHD,2004,Semmelweis University of Budapest

Bailey,Caryl Fredreka

Assistant Professor,Anesthesiology and Perioperative Medicine

MD,2011,University of the West Indies, Mona, Jamaica

Balas,E Andrew

Professor,Health Management, Economics, & Policy

MD,1977,Semmelweis University of Budapest,PHD,1991,University of Utah

Balducci,Rachel Swenson

Senior Lecturer,Communication

MA,1997,University of Georgia,BA,1994,Georgia State University

Baldwin,Erin Alexandra

Assistant Professor,MCG-UGA Medical Partnership

MD,2019,Tulane University School of Medicine,BS,2014,Louisiana State University & A&M College

Bales,Amy Lynn

Instructor ,Prelicensure Nursing

MSN,2018,Walden University

Ballance,Darra Rhynn

Assistant Professor,Dean-AHEC

MLIS,1991,University of South Carolina,BA,1990,College of Charleston

Ballard,Jedidiah Amos

Associate Professor,Emergency Medicine

DO,2010,Des Moines University-College of Osteopathic Medicine,BS,2005,University of Northern Colorado

Baltzegar,Jennifer Fountain

Assistant Professor,Biological Sciences

PHD,2020,North Carolina State University,MS,2010,College of Charleston,BS,2004,College of Charleston

Bancroft,Christina Anne

Assistant Professor,Pediatrics

PHD,2020,University of North Dakota,MED,2014,William and Mary,BA,2012,University of South Florida

Bansal,Juhi

Instructor,Radiology and Imaging

MBBS,2010,University of Rajasthan

Bao,Yuyan

Assistant Professor,Computer Science

PHD,2017,University of Central Florida,ME,2007,Beihang University,BE,2003,Beijing University of Technology

Barefield,Amanda Carroll

Professor,Allied Health Professions

EDD,2006,Nova Southeastern University,MS,1999,Central Michigan University,BS,1994,Augusta University

Barefield, Trisha Ann Tonge

Assistant Professor, Teaching and Leading

PHD, 2024, University of Georgia, MED, 2018, University of Georgia, BS, 2012, Central Michigan University

Barker Jr., Bobby Gene

Assistant Professor, Chemistry and Biochemistry

PHD, 2018, University of South Carolina

Barker, Kim S

Associate Dean, College of Education and Human Development

PHD, 2016, Georgia State University, MED, 2006, Georgia State University, BA, 1986, Berry College, BA, 1986, Berry College

Barman, Scott A

Professor, Pharmacology and Toxicology

PHD, 1986, University of North Dakota, MS, 1983, University of North Dakota, BS, 1980, Muhlenberg College

Barnes, Benjamin T

Assistant Professor, Neurology

MD, 2015, University of Kentucky, BA, 2011, University of Kentucky

Barnett, Andrew K

Assistant Professor, MCG-UGA Medical Partnership

MD, 2001, Pennsylvania State University, BS, 1993, Clemson University

Barrett, Amanda

Associate Professor, Pathology

MD, 2013, Augusta University, BS, 2009, Duke University

Barrett, John Ryan

Associate Professor, Emergency Medicine

MD, 2013, Augusta University, BA, 2009, Johns Hopkins University

Barrett, John Thomas

Department Chair, Radiation Oncology

MD, 1985, University of South Carolina, PHD, 1981, University of South Carolina, BS, 1976, Tulane University

Barrick, Justin Del-Lee

Instructor, Prelicensure Nursing

MSN, 2020, Augusta University, BS, 2019, University of Montevallo

Bartlett, Linda Alice

Instructor, Family Medicine

MD, 1986, Memorial University of Newfoundland, MB, 1984, Memorial University of Newfoundland, MS, 1994, University of British Columbia

Bartoli, Manuela

Professor, Ophthalmology

PHD, 1997, University of Rome, MS, 1991, University of Rome, BS, 1986, University of Rome

Barwick, Shannon

Assistant Professor, Cellular Biology and Anatomy

PHD, 2022, Augusta University, BS, 2017, Converse College

Bassali, Reda W

Professor, Pediatrics

MD, 1979, Alexandria University

Bassett, Casey

Campus Asst Dean-Student Affair, MCG-UGA Medical Partnership

PHD, 2001, Vanderbilt University, BS, 1996, Tennessee Technological University

Basta, Mafdy Nazir

Associate Professor, Anesthesiology and Perioperative Medicine

MD, 1988, Ain Shams University

Bates,Christopher S.

Assistant Chair,Biological Sciences

PHD,2005,Georgia State University,MS,1999,Georgia State University,BA,1995,Maryville College

Bates,William B

Associate Professor,Radiology and Imaging

MD,1976,Augusta University,MA,1972,University of Georgia,BS,1970,University of Georgia

Bayhaghi,Giti

Associate Professor,Allied Health Professions

PHD,2024,Augusta University,MHS,2011,Georgia Health Sciences University

Beasley,Jordon J

Assistant Professor,Research. Counseling & Curriculum

PHD,2021,Mercer University,EDS,2015,Clemson University,MED,2015,Clemson University,BA,2010,College of Charleston,BS,2010,College of Charleston

Beaudreau,Jennifer Celesa

Associate Professor,Pediatrics

MD,1998,Augusta University,BS,1994,Furman University

Becton,Alicia Brown

Department Chair,Research. Counseling & Curriculum

PHD,2014,University of Texas Rio Grande Valley,MS,2010,North Carolina Agricultural and Technical State University,BS,2007,East Carolina University

Bedder,Marshall David

Associate Professor,Psychiatry and Health Behavior

MD,1982,University of Manitoba

Beesam Shashank,Reddy

Assistant Professor,Psychiatry and Health Behavior

MD,2002,Crimean State Medical University

Behr,Amanda Dawn

Department Chair,Medical Illustration

PHD,2024,Augusta University,MA,2004,Johns Hopkins Hospital Schools,BFA,2002,University of Georgia

Beigh,Shameem Ahmad

Assistant Professor,Medicine

MBBS,2003,Government Medical College

Belanger,Bonnie M

Instructor ,Teaching and Leading

EDD,2018,University of South Carolina,EDS,2012,Augusta University,MED,2008,Southern Wesleyan University,BS,1995,Columbia College

Belcher,Matthew

Associate Professor,Dermatology

MD,2013,Augusta University,BS,2009,University of Georgia

Beldin,Alexandra Lee

Instructor ,Teaching and Leading

EDD,2025,Augusta University,MED,2020,Augusta University,BS,2016,Augusta University

Belin de Chantemele,Eric Jacques

Professor,Vascular Biology Center

PHD,2005,Universite Lyon I-Universite,MS,2003,Universite Lyon I-Universite,BS,2001,Universite Lyon I-Universite

Bell,George

Instructor ,Computer & Cyber Sciences

MST,2001,University of Pittsburgh,BS,1998,University of Pittsburgh

Bell,Lorna E

Assistant Professor,Emergency Medicine

MD,1992,State University of New York-Binghamton,BS,1987,State University of New York-Binghamton

Belle-Isle,Richard M

Instructor ,Anesthesiology and Perioperative Medicine

MD,2007,Saba University School of Medicine,BS,1996,University of Minnesota, Morris,BS,1998,Touro College

Bemiller,Melissa Jo

Associate Professor,Social Sciences

PHD,2013,University of Central Florida,MA,2010,University of Central Florida,BS,2008,University of Central Florida

Ben Omran,Mohamed A I

Associate Professor,Anesthesiology and Perioperative Medicine

MBBS,2008,Benghazi University Faculty of Medicine

Benevides,Teal Wisniewski

Professor,Community & Behavioral Health Sciences

PHD,2014,Virginia Commonwealth University,MS,2004,Thomas Jefferson University,BS,2002,College of William & Mary

Bennett,Hannah Rita

Associate Professor,Kinesiology

PHD,2015,Middle Tennessee State University,MS,2012,Georgia Southern University,BA,2010,University of Connecticut

Bennetts,Stacy T.

Associate Professor,Biological Sciences

PHD,2005,University of Exeter-Exeter,MS,2000,East Tennessee State University,BA,1997,Agnes Scott College

Bentley,Brandon Gregory Alan

Assistant Professor,Family Medicine

MD,2019,Jacobs School Of Medicine And Biomedical Sciences,BS,2015,University of Buffalo

Berardi JR,Anthony Mark

Assistant Professor,Family Medicine

MD,2022,Trinity School of Medicine,MS,2017,University of Central Florida,BS,2012,Florida State University

Beres,Micheal Donald

Associate Professor,Emergency Medicine

MD,2012,University of South Carolina,MA,2003,University of South Carolina,BS,2001,Clemson University

Berg,Michael S

Instructor ,Teaching and Leading

EDD,2014,University of West Georgia,EDS,2010,Augusta State University,MS,1993,Nova Southeastern University,BA,1991,Florida Atlantic University

Bergeron,Brian Edward

Professor,Endodontics

DMD,1990,University of Florida,BA,1986,Jacksonville University

Berrong,Anne Marie

Assistant Professor,Prelicensure Nursing

DNP,2024,Augusta University,MSN,2018,Augusta University,BS,2001,University of Wisconsin-Milwaukee

Berrong,Zuzana

Assistant Research Scientist,Georgia Cancer Center

PHD,2016,Augusta University

Berry,Megan Elizabeth

Lecturer,Biological Sciences

PHD,2025,University of Tennessee-Knoxville,MS,2020,Clemson University,BS,2016,University of South Carolina

Bertrand,Desiree Renee

Assistant Professor,Prelicensure Nursing

PHD,2017,Medical University of South Carolina,MSN,2002,Midwestern State University,BS,1995,University of the Virgin Islands

Best,Rebecca Lee

Instructor ,Hull College of Business

MBA,2009,Augusta State University,BA,2004,Augusta State University

Bethel,Monique L

Assistant Professor,Medicine

MD,2006,University of Cincinnati,MPH,2018,Augusta University,BSME,2002,University of Cincinnati

Bevel,Malcolm Seth

Assistant Professor,Georgia Cancer Center

PHD,2020,University of South Carolina,MSPH,2011,Meharry Medical College

Biasetti,Giada

Associate Professor,English & World Languages

PHD,2009,University of Florida,MA,2005,Florida Atlantic University,BA,2003,Florida Atlantic University

Bickel JR,Richard Alan

Associate Professor,Pediatrics

MD,1997,University of Miami School of Medicine,BS,1993,University of Florida

Bigham,Lauren Elizabeth

Assistant Professor,Cancer Service Line

PHD,2018,University of Georgia,MS,2010,Georgia Southern University,BA,2008,Mercer University

Bigler,Diana Jean

Assistant Professor,Otolaryngology

MD,2019,University of Kentucky,BS,2015,Rhodes College

Black,Mary Lewis

Assistant Professor,Emergency Medicine

MD,2004,Emory University,BS,2000,Emory University

Blacker,Casey Alexander

Assistant Professor,Mathematics

PHD,2018,University of California,MA,2015,University of California

Blagg,Margaret Kitterman

Associate Professor,Physical Therapy

DPT,2008,Augusta University,BSE,2004,University of Georgia

Blair,Claire Labitigan

Instructor ,Teaching and Leading

EDD,2022,Liberty University,MED,2015,Texas A&M University

Blake Jr.,David Trumbull

Professor,Neuroscience and Regenerative Medicine

PHD,1995,Johns Hopkins University,BS,1990,Duke University

Blanchard,Amy Renee

Professor,Medicine

MD,1994,Augusta University,BS,1989,University of Georgia

Blas,Susan Acuff

Assistant Professor,Biological Sciences

PHD,2005,University of South Carolina,MS,1990,University of Tennessee-Knoxville,BS,1986,Augusta University

Bledsoe,Robert S

Professor,English & World Languages

PHD,1994,University of California, Berkeley,MA,1986,University of California, Berkeley,BA,1983,University of California, Berkeley

Bodie,Davis H

Instructor ,Research. Counseling & Curriculum

DPHIL,2022,University of Tennessee-Knoxville,MS,2011,Emory and Henry College,BA,2011,Emory and Henry College

Bohlke,Scott

Assistant Professor,MCG-GS Savannah Partnership

MD,1992,Augusta University,BS,1987,University of Georgia

Bolduc,Aaron Robert

Associate Professor,Surgery

MD,2011,Augusta University,BS,2007,Georgia Institute of Technology

Bolgia,Lori Ann

Professor,Physical Therapy

PHD,2005,University of Kentucky,MS,1998,Augusta University,MACC,1985,University of Georgia,BBA,1984,University of Georgia,BS,1993,Augusta University

Bollag,Roni Jacob

Professor,Pathology

MD,2004,Augusta University,PHD,1990,Yale University,MPHIL,1987,Yale University,BS,1984,Pennsylvania State University

Bollag,Wendy B

Professor,Physiology

PHD,1990,Yale University,MS,1988,Yale University,BS,1984,Pennsylvania State University

Bollinger,Kathryn Elizabeth

Professor,Ophthalmology

MD,2003,Medical College of Wisconsin,BS,1996,University of Wisconsin-Madison

Bombin,Andrey Sergeyevich

Research Scientist,Computer & Cyber Sciences

PHD,2020,University of Alabama,MS,2015,University of Alabama,BS,2013,University of Alabama

Bombin,Sergei

Assistant Research Scientist,Georgia Cancer Center

PHD,2021,University of Alabama,MS,2015,University of Alabama,BS,2013,University of Alabama

Bond,Candis Elizabeth

Interim Chair,English & World Languages

PHD,2015,St Louis University,MA,2010,St Louis University,BA,2008,Loyola University Chicago

Bondar,Susanna Mariah

Instructor ,Art and Design

MFA,2020,University of Georgia,BFA,2017,Augusta University

Bookout,Amanda Leigh

Assistant Professor,Allied Health Professions

BSRS,2017,Georgia Southern University

Bora,Vaibhav

Associate Professor,Anesthesiology and Perioperative Medicine

MBBS,2009,Dr. S.N. Medical College

Borgini,Matteo

Assistant Professor,Chemistry and Biochemistry

PHD,2020,University of Siena,MS,2020,University of Siena

Bosomtwi,Asamoah

Senior Research Scientist,Georgia Cancer Center

PHD,2008,Oakland University,MS,2004,University of Kentucky

Botero,Christopher G

Associate Professor,English & World Languages

PHD,2011,Pennsylvania State University,MA,2004,Pennsylvania State University,BA,2001,State University of New York-Binghamton

Boudakov,Ivo Iankov

Professor,GS Savannah Partnership

Kingree, Alyssa Nicole Yerger

Instructor, Prelicensure Nursing
MSN, 2018, Liberty University, BS, 2011, Sacred Heart University

Kirchgraber, Paul Richard Norman

Assistant Professor, MCG-UGA Medical Partnership
MD, 1988, Cornell University Medical College, BS, 1984, Manhattan College

Kirkland, Anthony B

Instructor, Music
DMA, 1997, University of Maryland, MM, 1985, Florida State University, BME, 1983, Troy State University

Kirkpatrick, Paul Daniel

Assistant Professor, Medicine
MD, 2017, American University of the Caribbean School of Medicine, BS, 2012, University of California UCLA

Kirov, Sergei A

Professor, Neuroscience and Regenerative Medicine
PHD, 1991, Saint Petersburg State University, MS, 1987, Saint Petersburg State University

Kislinger Hoffmann, Igor Ignacio

Assistant Professor, Anesthesiology and Perioperative Medicine
MD, 2009, Universidad Central De Venezuela

Kitase, Yukiko

Assistant Professor, Oral Biology
BDS, 1996, Tokushima University, PHD, 2000, Tokushima University

Kittaka, Mizuho

Assistant Professor, Oral Biology
DDS, 2008, Hiroshima University, PHD, 2013, Hiroshima University

Klaassen, Zachary W A

Associate Professor, Urology
MD, 2010, St. George's University

Klein, Kandace R

Assistant Professor, Radiology and Imaging
DO, 2005, University of North Texas Health Science, BS, 2001, Baylor University

Klein, Sarah V

Instructor, Teaching and Leading
PHD, 2017, Georgia State University, EDS, 2011, Mercer University, MED, 2009, Mercer University, BLAS, 2005, Mercer University

Kleinheksel,Amanda Joy

SPEAR Director,Office of the Provost

PHD,2015,University of Florida,MED,2009,University of Florida,BA,2004,Michigan State University

Knight,Cameron Michael

Instructor ,Prelicensure Nursing

MSN,2019,Augusta University,BS,2017,University of North Georgia

Koehn,Heather Anne

Associate Professor,Otolaryngology

MD,2015,University of North Carolina,BS,2009,Creighton University

Koerber,Nate D

Assistant Professor,Research. Counseling & Curriculum

DR,2021,University of Tennessee-Knoxville,MA,2015,Adams State University Colorado,BA,2013,University of Iowa

Kohl,Kathleen Theresa

Instructor,Teaching and Leading

EDD,2025,Walden University,MED,2002,Augusta University,BA,1987,California State University-Northridge

Kohler,Austin Alan

Lecturer,Kinesiology

MS,2022,Augusta University,BSK,2020,Augusta University,CER,2022,The Citadel

Kolhe,Ravindra Bharat

Department Chair,Pathology

MBBS,2001,Mahatma Gandhi Mission Medical College,PHD,2006,Mississippi State University

Komaravolu,Ravi Kumar

Research Scientist,Immunology Center of Georgia

PHD,2016,Ruprecht-Karls-Universität Heidelber,MS,2004,Andhra University,MT,2009,Jawaharlal Nehru Technical University,BS,2003,Acharya Nagarjuna University

Koshi,Rachel

Professor,GS Savannah Partnership

MBBS,1983,Christian Medical College,PHD,1999,The Tamil Nadu Dr. MGR Medical University,MS,1988,Christian Medical College

Kota,Vamsi

Professor,Medicine

MBBS,2003,Armed Forces Medical College

Kountakis,Stilianos E

Department Chair,Otolaryngology

MD,1988,Texas A&M University System Health Sciences Center College of Medicine,PHD,1998,University of Crete,BS,1983,University of Houston

Kovacs,Laszlo

Assistant Professor,Medicine

PHD,2010,University of Debrecen Medical,MS,2006,University of Debrecen Medical

Kovacs-Kasa,Anita

Assistant Research Scientist,Vascular Biology Center

PHD,2014,University of Debrecen

Kowalski,Dariusz Rafal

Professor,Computer Science

PHD,2001,University of Warsaw

Kozak,Pawel Konrad

Senior Lecturer,Music

DM,2011,University of Georgia,MM,2005,University of Georgia,BM,2003,Augusta State University

Kozlowski,David J

Professor,Neuroscience and Regenerative Medicine

PHD,1997,University of Rochester,MS,1992,University of Rochester,BS,1990,University of Connecticut

Kraft,Adam Benjamin

Lecturer,Chemistry and Biochemistry

MSED,2012,Purdue University,BS,2009,Clemson University

Kraslow,Michelle Lauren

Assistant Professor,Medicine

MD,2018,University of Florida,BS,2014,University of Florida

Kridel,Matthew Michael

Assistant Professor,Psychiatry and Health Behavior

PHD,2019,University of South Alabama,MS,2016,University of South Alabama,BA,2014,Gannon University

Kriegel,Alison J

Professor,Physiology

PHD,2008,Medical College of Wisconsin,BS,2001,University of Wisconsin-Milwaukee

Kriegel,David Lynn

Professor,Family Medicine

MD,1998,Augusta University,BS,1994,Augusta State University,BA,1992,Augusta State University

Krupp,David C

Associate Professor,Family Medicine

MD,1998,Southern Illinois University,BS,1991,Illinois State University

Krupp,Michelle Marie

Associate Dean,MCG Academic Affairs

DED,2019,Nebraska Methodist College of Nursing and Allied Health,MS,1994,Illinois State University,BS,1991,Illinois State University

Kruse-Diehr,Aaron James

Department Chair,Community & Behavioral Health Sciences

PHD,2015,University Of Toledo,MA,2007,DePaul University,BA,2004,Ohio State University

Krysta,Piotr Jan

Professor,Computer Science

PHD,2001,Universitat des Saarlandes,MSIT,1997,Uniwersytet Wroclawski

Krzywanski,David Mark

Assistant Professor,Physiology

PHD,2006,University of Alabama at Birmingham,BS,1999,University of Pennsylvania

Kuchinski,Ann Marie

Assistant Professor,Emergency Medicine

PHD,2014,University of Missouri-Columbia,MA,1997,Georgia State University,BA,1992,Georgia State University

Kumar,Ajay

Assistant Research Scientist,Vascular Biology Center

DR,1995,Maharshi Dayanand University,MS,1986,Aligarh Muslim University

Kumar,Vikas

Professor,Anesthesiology and Perioperative Medicine

MBBS,2003,Bangalore Medical College

Kuo,Nai-Cheng

Professor,Teaching and Leading

PHD,2013,Michigan State University,MA,2007,National Yunlin University of Science,BBA,2003,Shih Chien University

Kurago,Zoya Bronislavovna

Professor,Oral Health and Diagnostic Sciences

DDS,1989,University of North Carolina,PHD,1997,University of Iowa

Kurek,Julie A

Associate Professor,Neurology
MD,2009,New York Medical College

Kurtzman,David

Assistant Professor,General Dentistry
DDS,1981,Emory University,BS,1977,Emory University

Kutal,Durga Hari

Assistant Professor,Mathematics
PHD,2018,Florida Atlantic University,MS,2010,Boise State University,MS,2012,Clemson University,MS,2015,Florida Atlantic University

Kutlar,Abdullah

Professor ,Medicine
MD,1971,Ankara University

Kwag,Giyoona

Assistant Professor,Hull College of Business
PHD,2025,Clemson University,MS,2019,Illinois Institute of Technology,BBA,2017,Korea Aerospace Univeristy

Kwon,Kenneth Sang Ho

Associate Professor,Cellular Biology and Anatomy
PHD,2005,Johns Hopkins University

L**LaChance,David Paul**

Associate Professor,Medicine
DO,2015,Edward Via College of Osteopathic Medicine,BS,2011,Mercyhurst Univresity

Ladonice,Shellea

Assistant Professor,Social Sciences
PHD,2024,University of Central Florida,MSW,2013,University of Southern California,BSW,2009,University of South Florida

Laffitte IV,Moses Tucker

Assistant Professor,GS Savannah Partnership
MD,2011,Medical University of South Carolina,BA,2007,Washington and Lee University

Lai,Jialin

Assistant Professor,Teaching and Leading
PHD,2025,Texas A&M University,MA,2020,Sun Yat-sen University,BA,2018,Sun Yat-sen University,CERG,2025,Texas A&M University

Lakovics,Magnus

Associate Professor,Emergency Medicine
MD,1971,SUNY Upstate Medical University,BA,1967,Harpur College

Lamarre,Lynda L

Lecturer,History, Anthropology and Philosophy
MA,2011,Georgia Southern University,BA,2007,Augusta State University

Lambert,Jordan Williams

Instructor ,English & World Languages
MA,2018,Universite Clermont Ferrand 2,MA,2016,Universite Clermont Ferrand 2,BA,2005,Augusta University

Lambert,Nevin A

Professor,Pharmacology and Toxicology
PHD,1991,Kent State University,BS,1990,Youngstown State University

Lane,Natalie E

Professor,Emergency Medicine
MD,1988,University of South Alabama,BS,1982,Samford University

Langham, Sierra Lewis

Instructor ,Prelicensure Nursing
MSN,2019,Mount St. Joseph University,BS,2018,Georgia Southern University

Langley-Brady,Dawn L

Assistant Professor,Nursing Science
PHD,2020,Augusta University,MSN,2009,University of Phoenix,BFA,1996,Augusta State University,DIP,1989,Augusta Technical College

Langridge,Paul David

Associate Professor,Biological Sciences
PHD,2006,University of Cambridge

Lanham,Jason Seton

Associate Professor,Family Medicine
MD,2014,MCP Hahnemann University,MA,2017,Saint Leo University,MPH,2025,Augusta University,BA,2014,Muhlenberg College,BS,2014,Muhlenberg College

LaRavia, Lee E

Associate Professor,Emergency Medicine
DO,2010,Philadelphia College of Osteopathic Medicine

Lariscy,Samantha Victoria

Instructor ,Prelicensure Nursing
MSN,2023,Augusta University,BS,2021,Georgia Southern University

Larkin,Melissa A

Instructor ,Music
MM,2008,University of North Carolina-Chapel Hill,BA,2002,Prairie College,BM,2005,University of Lethbridge

Larson,Rebecca Lynne

Assistant Professor,Community & Behavioral Health Sciences
DPH,2019,Georgia Southern University,MA,2023,Marshall University,MS,2008,Eastern Michigan University,BS,1998,Utah State University

Latif,Erin Zodrow

Associate Professor,Obstetrics and Gynecology
MD,2002,Augusta University,BS,1998,Birmingham Southern College

McCall, David Charles

Assistant Professor, Physics and Biophysics

PHD, 2025, Clemson University, MS, 2016, Embry - Riddle Aeronautical University, BS, 2013, Augusta University

McCall, William Vaughn

Professor, Psychiatry and Health Behavior

MD, 1984, Duke University, MS, 1999, Wake Forest University

McCann, Cassidy R

Instructor, Psychological Sciences

MS, 2025, Augusta University, BS, 2023, Missouri State University

McCauley, Jacob David

Instructor, Social Sciences

PHD, 2024, Clemson University, MBA, 2018, Georgia Southern University, BA, 2006, California State University-Fullerton

McCluskey, Lynnette

Professor, Neuroscience and Regenerative Medicine

PHD, 1996, University of Virginia, MA, 1995, University of Virginia, BA, 1990, Florida State University

McCollum, Daniel Jay

Professor, Emergency Medicine

MD, 2010, Augusta University

McCollum, Sarah R

Assistant Professor, Research. Counseling & Curriculum

PHD, 2024, University of Georgia, MED, 2011, University of Georgia, BS, 2009, Clemson University

McCool, Harry Worthington

Assistant Professor, General Dentistry

DDS, 1982, University of Tennessee Health Science Center, BA, 1978, Southwestern at Memphis

McCutcheon, John B

Assistant Professor, Emergency Medicine

MD, 2015, Augusta University, MS, 2010, Tulane University, BS, 2009, Suwanee

McDonough, Colleen Hope

Associate Professor, Pediatrics

MD, 1995, Augusta University, BA, 1990, Duke University

McEvoy, Joseph Patrick

Professor, Psychiatry and Health Behavior

MD, 1973, Vanderbilt University, BA, 1969, Manhattan College

McFalls,Candis Nicole

Assistant Professor,Psychiatry and Health Behavior

PSYD,2021,The Wright Institute,MA,2013,The Wright Institut,BA,2008,University of Tennessee-Knoxville

McGee Lawrence,Meghan Elizabeth

Department Chair,Cellular Biology and Anatomy

PHD,2009,Michigan Technological University,BS,2005,Michigan Technological University

McGee,Blake Tyler

Associate Professor,Nursing Science

PHD,2018,Emory University,MPH,2007,Columbia University-New York,BS,2013,Emory University

McGill,Janelle Ann

Assistant Professor,Pediatrics

MD,2015,Augusta University,BS,2011,University of Georgia

McGuire,Brooke J

Assistant Professor,Mathematics

PHD,2003,University of Arizona,MS,1997,University of Arizona,BS,1994,University of Rochester

McIndoe,Richard A

Director,Center for Biotechnology and Genomic Medicine

PHD,1991,University of Florida,BS,1984,University of Florida

McKenzie,Jaine Lin

Assistant Professor,Surgery

MD,2015,Florida State University,BS,2009,Florida State University

McKenzie,Jonathan Andrew

Assistant Professor,Surgery

MD,2017,Florida State University,MBA,2021,Augusta University,BS,2009,Florida State University

McKie,Kathleen T

Associate Professor,Pediatrics

MD,2001,Augusta University,BA,1997,Duke University

McKinnon,Caroline Rita

Associate Professor,Doctorate of Nursing Practice Program

PHD,2013,Augusta University,MSN,2002,University of Virginia,BSN,1986,Boston College

McLeod,Colin Patrick

Assistant Professor,Neurology

MD,2013,University of Florida,BS,2008,University of Florida

McLeod,Kathryn S

Professor,Pediatrics

MD,1995,Augusta University,BS,1991,University of Richmond

McLeroy,Bethany V

Instructor,MCG Academic Affairs

MS,2006,Troy State University,BSN,2001,Augusta University

McNair,Nancy Lynn

Assistant Professor,Neurology

MD,1986,Augusta University,BA,1980,Davidson College

McNutt,Richard Stanley

Assistant Professor,Emergency Medicine

MD,2016,Havard University

Meade Clayton,Tyger Cyerra Naomi

Associate Professor,Physician Assistant Program

MPAS,2014,Augusta University,BGS,2007,Georgia Southern University

Meares,Wesley

Professor,Social Sciences

PHD,2014,University of Louisville,MPA,2011,Western Kentucky University,BA,2010,LaGrange College

Medcalfe,Simon K

Professor,Hull College of Business

PHD,2006,Lehigh University,MS,1998,University of Leicester,BA,1991,University of Leicester

Mehran,Weeda

Assistant Professor,Social Sciences

PHD,2015,University of Cambridge,MS,2007,University of Oxford,MA,2010,University of Kent,MA,2009,University of Kent,BA,2006,University of Toronto

Mehta,Renuka

Professor,Pediatrics

MBBS,1987,Ranchi University,BS,1979,Ranchi University

Meiler,Steffen E

Department Chair,Anesthesiology and Perioperative Medicine

MD,1985,Johann Wolfgang Goethe-University,BS,1978,Musterschule,BS,1978,Musterschule

Meira Castro Trindade,Ronald

Assistant Professor,Radiology and Imaging

MD,2005,Universidade Federal da Bahia

Menk,Tandy McNeal

Instructor ,Hull College of Business

JD,1985,University of Georgia,LLM,1990,Emory University,BBA,1982,University of Georgia

Messer,Regina L W

Associate Dean,Oral Biology

PHD,1999,University of Alabama at Birmingham,MS,1993,University of Alabama at Birmingham,BS,1990,University of Tennessee-Knoxville

Metz,Alexandra Gloria Andronic

Instructor ,Prelicensure Nursing

MSN,2022,Augusta University,BS,2018,Augusta University

Metzler,Kurt Thomas

Assistant Professor,Restorative Sciences

DDS,1991,Ohio State University,BA,1987,Ohio State University

Meyer,Nicole

Professor,English & World Languages

PHD,1988,University of Pennsylvania,MA,1983,University of Pennsylvania,BA,1980,University of Wisconsin-Madison

Meyer,Robert J

Associate Professor,MCG-UGA Medical Partnership

MD,1999,Augusta University,BS,1995,The Citadel

Mezzetti,Christopher John

Instructor ,Social Sciences

MPA,2010,Augusta State University,BA,2003,Augusta State University

Miano,Joseph Michael

Professor,Vascular Biology Center

PHD,1992,New York Medical College,MS,1988,New York Medical College,BS,1986,SUNY College-Cortland

Miao,Shaobin

Associate Professor,Chemistry and Biochemistry

PHD,2004,University of South Carolina

Middendorf, Bruce F.

Assistant Professor, MCG-UGA Medical Partnership
MD, 1974, SUNY at Buffalo/School Of Medicine, BA, 1970, Wabash College

Middleton, Lisa M

Associate Professor, Georgia Cancer Center
PHD, 1998, Case Western Reserve University

Milgrom, Daniel Paul

Assistant Professor, Surgery
MD, 2013, Indiana University, MS, 2021, Indiana University, BA, 2009, University of Pennsylvania

Millender, Desmond Jamal

Associate Professor, Kinesiology
PHD, 2022, University of New Mexico, MED, 2018, Auburn University Montgomery, BS, 2016, Troy State University

Miller Jr., Jerry A.

Professor, MCG Academic Affairs
MD, 1976, Augusta University

Miller, Brian J

Professor, Psychiatry and Health Behavior
MD, 2005, Ohio State University, MPH, 2005, Ohio State University, BS, 2000, Vanderbilt University

Miller, Daniel L

Professor, Surgery
MD, 1985, University of Kentucky, BS, 1981, Georgetown College

Miller, Donald D

Professor, Medicine
MDCM, 1978, McGill University, MBA, 1999, St Louis University

Miller, Kenda Renee

Instructor, Prelicensure Nursing
MSN, 2012, Augusta University, BS, 2006, Augusta University

Miller, Laurence L

Associate Professor, Psychological Sciences
PHD, 2010, University of North Carolina-Chapel Hill, MA, 2005, University of North Carolina-Asheville

Million, Bonnie M

Instructor, Communication
PHD, 2006, Utah State University, MA, 1995, Utah State University

Mills, Randi Shanea

Instructor, Teaching and Leading
EDD, 2020, Nova Southeastern University, MS, 2003, Nova Southeastern University, BS, 2000, University of Central Florida

Minhas, Priyanka

Assistant Professor, Radiology and Imaging
MBBS, 2004, M.L.B. Medical College and Hospital

Minton, Duygu

Senior Lecturer, English & World Languages
PHD, 2013, Southern Illinois University, MA, 2008, Southern Illinois University, BA, 2005, Bogazici University

Miranda Galvis, Marisol

Assistant Research Scientist, Georgia Cancer Center
PHD, 2019, Universidade Estadual De Campinas

Mitchell, Cynthia Yvonne

Instructor, Prelicensure Nursing
MS, 2021, Western Governors University, BS, 2018, Western Governors University

Mitchell,Kirk T

Instructor ,Kinesiology
BS,1998,Augusta University

Mitchell,Star Anna

Associate Dean,College of Nursing
PHD,2016,University of North Carolina-Chapel Hill,MSN,1979,East Carolina University,BSN,1975,Florida State University

Mittal,Pardeep Kumar

Professor,Radiology and Imaging
MD,1980,Government Medical College

Mivechi,Nahid F

Director,Georgia Cancer Center
PHD,1981,Florida State University,MS,1977,Florida State University,BS,1974,Florida State University

Mobley,Harve Weddington

Instructor ,Kinesiology
MS,1985,Ohio State University,BS,1983,University of Kentucky

Mobley,Megan Clark

Assistant Professor,Physical Therapy
DPT,2010,Augusta University,BED,2007,University of Georgia

Mody,Roxanne Rustom

Assistant Professor,MCG-GS Savannah Partnership
MD,2015,University of Texas Medical School,BS,2011,University of Texas-Austin

Mohamed,Riyaz

Assistant Research Scientist,Physiology
PHD,2013,University of Mysore,MS,2005,University of Mysore,BS,2003,University of Mysore

Mohanty,Namita

Assistant Professor,Medicine
MD,2008,Mercer University,BA,2003,Wesleyan College

Mollica Jr.,Anthony Guy

Associate Professor,General Dentistry
DDS,1979,Ohio State University,BS,1976,Clemson University

Mondal,Ashis Kumar

Assistant Professor,Pathology
PHD,2002,Indian Institute of Technology,MS,1992,Kalyani University,BS,1989,University Of Burdwan

Moon,Hyun Chang

Assistant Professor,Education Discovery Institute
PHD,2020,Texas Tech University,MS,2016,St Cloud State University

Moore,Andrew Ray

Associate Professor,Kinesiology
PHD,2017,Springfield College,MS,2016,Springfield College,BS,2012,Humboldt State University

Moore,Donna B

Associate Professor,Pediatrics
MD,1993,SUNY Upstate Medical University,BS,1987,Hobart and William Smith College

Moore,Jeffrey Alan

Associate Professor,MCG-UGA Medical Partnership
MD,1999,Virginia Commonwealth University,BS,1995,University of Richmond

Moore,Kimberly Maxwell

Associate Professor,Allied Health Professions
MS,2016,College of Saint Scholastica,BS,2007,Augusta University,CERHIA,2015,College of Saint Scholastica

Moore, Lydia Matilda

Instructor ,Prelicensure Nursing

MSN,2007,University of Phoenix,BSN,1990,Augusta College

Moore, Nicole M

Assistant Professor,Interdisciplinary Health Sciences

MS,2009,University of Kentucky,BSFCS,2003,University of Georgia,BS,2002,University of Georgia

Moore, Thomas Madison

Assistant Professor,Chemistry and Biochemistry

PHD,2015,University of Tennessee-Knoxville,BS,2007,University of Tennessee-Knoxville

Moore-Hill, Debra Tanece

Associate Professor,Neurology

MD,2007,Augusta University,MPH,2017,Augusta University

Mor, Danielle Emille

Assistant Professor,Neuroscience and Regenerative Medicine

PHD,2016,University of Pennsylvania,BA,2010,Wesleyan University

Morandini, Ana Carolina

Associate Professor,Oral Biology

DDS,2006,Universidad De Sao Paulo,PHD,2012,Universidad De Sao Paulo,MDS,2009,Universidad De Sao Paulo

Morgan, Alan R

Associate Professor,MCG-UGA Medical Partnership

MD,2003,Augusta University,BSCHEM,1998,University of Georgia

Morgan, Angela L

Department Chair,Music

DM,1988,Florida State University,MMUS,1985,Florida State University,BM,1983,University of Tennessee-Knoxville

Morgan, Joel L.

Associate Professor,MCG Expansion

MD,1987,Augusta University,MS,1979,University of Georgia,BS,1976,Valdosta State University

Morgan, John Christopher

Professor,Neurology

MD,1998,Augusta University,PHD,1999,Augusta University,BS,1990,University of North Florida

Morgan, Lori Burkhead

Assistant Professor,Speech & Language

PHD,2005,University of Florida,MS,1994,MGH Institute of Health Professions,BS,1992,University of South Alabama

Morganstern, Bradley Andrew

Associate Professor,Urology

MD,2011,Yeshiva University,BS,2003,Boston University

Mori, Shogo

Assistant Professor,Chemistry and Biochemistry

PHD,2015,Texas A&M University,BS,2008,Jacksonville State University

Morrell, Jori Adkins

Instructor ,Prelicensure Nursing

MSN,2021,Augusta University,BS,2020,University of Georgia

Morrell, Rachel Blackwood

Instructor ,Prelicensure Nursing

BA,1993,University of Georgia

Morris, Andrew P

Campus Assoc Dean Curriculum,MCG-UGA Medical Partnership

Su, Huabo

Professor, Vascular Biology Center

PHD, 2004, Fudan University

Su, Shaoyong

Professor, GA Prevention Institute

PHD, 2005, Peking Union Medical College

Su, Yunchao

Professor, Pharmacology and Toxicology

MD, 1985, Tongji Medical University, PHD, 1991, Tongji Medical University, MMS, 1988, Tongji Medical University

Sukumari Ramesh,Sangeetha

Associate Professor,Pharmacology and Toxicology

PHD,2006,Sree Chitra Tirunal Institute,MS,2000,University of Kerala,BS,1999,University of Kerala

Sullivan,Daniel

Associate Professor,MCG-GS Savannah Partnership

DO,2006,Western University of Health Sciences,MS,1999,California State University-Long Beach,BA,1993,University of California-Riverside

Sullivan,Jennifer C

Dean,The Graduate School

PHD,2000,Albany Medical College,MS,1999,Albany Medical College,BS,1996,SUNY Geneseo

Sullivan,Lawrence R

Instructor ,Chemistry and Biochemistry

MS,1994,Florida State University,BA,1988,Connecticut College

Sultana,Nafeesa

Assistant Professor,Pediatrics

DO,2014,Edward Via College of Osteopathic Medicine,BA,2009,University of Virginia

Sun,Zhuo

Associate Professor,Anesthesiology and Perioperative Medicine

MD,1996,Nantong University China

Superneau,Allison Mary

Assistant Professor,Surgery

DO,2015,Philadelphia College of Osteopathic Medicine,BA,2008,Cabrini College,BS,2008,Cabrini College

Sutherland,John C.

Dean,College of Science & Mathematics

PHD,1967,Georgia Institute of Technology,MSP,1964,Georgia Institute of Technology,BSP,1962,Georgia Institute of Technology

Sutherland,Scott Andrew

Instructor ,Teaching and Leading

EDD,2022,University of South Carolina,MED,2016,University of South Carolina,BS,2012,Georgia Southern University

Sutton,Danielle Baskin

Assistant Professor,Emergency Medicine

MD,2014,Augusta University,BS,2009,Valdosta State University

Sweat,Michelle M

Instructor ,Prelicensure Nursing

MSN,2004,Augusta State University,BSN,1995,Augusta College

Sweeney,Daniel Joseph

Assistant Professor,Anesthesiology and Perioperative Medicine

MD,2019,St. George's University,BA,2014,Hobart and William Smith College

Swift,Thomas Robert

Professor ,Neurology

MD,1965,Cornell University,BA,1961,Trinity College

Swint,Shelton Gregory

Lecturer,Biological Sciences

MS,2025,Augusta University,BS,2023,Augusta University

Switzer,Erin F

Assistant Professor,Surgery

DO,2001,Kirksville College of Osteopathic Medicine,BS,1997,Arizona State University

Switzer,Jeffrey A

Department Chair,Neurology

DO,2001,Kirksville College of Osteopathic Medicine,MS,2011,Georgia Health Sciences University,BA,1994,Swarthmore College

Sword,Rhoda Joyner

Professor,Restorative Sciences

DMD,2003,Augusta University,MPH,2024,Augusta University,BS,1999,Baylor University

Syms,Frank H

Instructor ,Physics and Biophysics

PHD,2002,University of South Carolina,MSC,1997,University of South Carolina,BSC,1987,University of South Carolina

Szabo,Edward Francis

Assistant Professor,Surgery

DPM,2002,Ohio College of Podiatric Medicine,BA,1996,University Of Toledo

T**Tabernik,Holly E.**

Associate Professor,Psychiatry and Health Behavior

PHD,2012,Sam Houston State University,MA,2007,Cleveland State University

Talbert,Jeffery C

Department Chair,Artificial Intelligence & Health

PHD,1995,Texas A&M University,MA,1991,Texas A&M University,BS,1989,Texas A&M University

Tan,Ming Ming

Instructor,Computer Science

PHD,2015,Nanyang Technological University,BS,2010,Nanyang Technological University

Tang,Yao Liang

Professor,Vascular Biology Center

MD,1993,Shanghai Jiao Tong University,PHD,2002,Fudan University

Tannebaum,Rory Philip

Department Chair,Teaching and Leading

PHD,2015,Clemson University,MED,2009,University of Georgia,BS,2008,University of Georgia

Tarrazzi,Daler Elisa

Assistant Professor,Restorative Sciences

DDS,2000,Central University of Venezuel,MS,2005,University of Michigan

Taskar,Varsha Surendranath

Professor,Medicine

MBBS,1988,Seth GS Medical College

Tauscher,Dillon Edward

Instructor ,Computer & Cyber Sciences

MS,2024,Augusta University,BS,2020,Augusta University

Tay,Franklin Chi Meng

Department Chair,Endodontics

BDS,1981,University of Queensland,PHD,1998,University of Hong Kong

Taylor,Donna Lester

Instructor,Teaching and Leading

PHD,2008,Georgia State University,MS,2004,Georgia State University,MED,2008,Georgia State University,BS,1987,Georgia State University

Taylor,Laurie Pacetti

Instructor ,Teaching and Leading

Weir, Forest

Assistant Professor, Otolaryngology
MD, 2017, University of South Carolina, BA, 2012, Furman University

Weiss, Danielle L

Assistant Professor, Neurology
MD, 2015, University of Miami, BS, 2011, University of Miami

Weiss, Steven Dale

Instructor , History, Anthropology and Philosophy
PHD, 1989, University of Wisconsin-Madison, MA, 1982, University of Wisconsin-Madison, BA, 1973, University of Illinois at Urbana-Champaign

Welcher, Princess Puckett

Instructor , Prelicensure Nursing
MSN, 2018, Augusta University, BS, 2011, Delaware State University

Welch-Sigmon, Lori Toler

Associate Professor, Psychiatry and Health Behavior
PHD, 2004, Fielding Graduate Institute, MS, 1994, Augusta State University, MA, 2000, Fielding Graduate Institute, BS, 1992, Florida State University

Weldon,Steven

Instructor ,Computer & Cyber Sciences
MS,1997,Naval Postgraduate School,BA,1990,George Washington University

Wells,Larry Joe

Assistant Professor,Radiology and Imaging
DO,1977,Midwestern University,BS,1969,United States Military Academy

Welty,Karson Michael

Lecturer,Mathematics
MS,2022,Augusta University,BS,2016,University of South Carolina

Wenderoth,Christopher J

Instructor ,Orthodontics
DMD,1990,University of Pittsburgh

Wesley,Elizabeth

Assistant Professor,Emergency Medicine
MD,2021,Augusta University,BS,2016,University of Georgia

West,Lindsey Michelle

Associate Professor,Psychiatry and Health Behavior
PHD,2011,University of Massachusetts-Amherst,MA,2008,University of Massachusetts-Amherst,BA,2005,Brown University

Westafer,George W.

Instructor ,Music
BM,1970,North Carolina School of the Arts

Whirley,Elizabeth Michelle

Instructor ,Prelicensure Nursing
BSN,2020,Augusta University,BS,2006,University of North Texas

Whisenant,Ebony Broadwater

Associate Professor,Family Medicine
MD,2008,Morehouse School of Medicine,BS,2004,Georgia State University

Whitaker Haley,Dyane Alice

Instructor ,Prelicensure Nursing
MSN,2013,Augusta University,BA,2000,University of Wyoming

Whitaker,Derek C

Professor,Surgery
MD,1998,Virginia Commonwealth University,BS,1993,University of Richmond

Whitaker,Gregory Hiram

Assistant Professor,Biological Sciences
PHD,2023,University of Georgia,MS,2015,Texas A&M University,BS,2009,Texas A&M University

White,John Jason

Professor ,Medicine
MD,2000,Augusta University,BS,1996,University of Georgia

White,Makacha Coley

Instructor ,Prelicensure Nursing
MBA,2009,Kaplan University,MSN,2003,University of Phoenix,BSN,1999,Georgia College & State University

White,William Benjamin

Assistant Professor,Medicine
MD,2016,Augusta University,BSBMED,2008,Georgia Institute of Technology

Whitford,Jennifer Lind

Instructor ,Psychological Sciences
PHD,2006,University of Georgia,MS,2001,Augusta State University,BA,1993,Augusta State University

Widner,Sabina C

Professor,Psychological Sciences

PHD,1994,University of Georgia,MA,1989,Wake Forest University,BA,1987,University of Kentucky

Wilcher,Brandon Lashawn

Assistant Professor,Health Management, Economics, & Policy

DPH,2020,Georgia Southern University,MED,2021,Georgia Southern University,MHA,2015,Georgia Southern University,BS,2010,Georgia Southern University,BS,2009,Georgia Southern University

Wilde,James A

Professor,Emergency Medicine

MD,1984,Indiana University-Bloomington,BA,1980,Duke University

Wiles,Karen Godfrey

Assistant Professor,Physiology

PHD,2010,Vanderbilt University,BS,2003,Salisbury University

Wiley,Faith E.

Assistant Professor,Biological Sciences

PHD,2007,Clemson University,MS,2003,Clemson University,BS,2001,Clemson University

Wilkes,Amanda Rachel

Assistant Professor,Allied Health Professions

MS,2017,Georgia State University,MS,2019,Georgia State University,BS,2016,Georgia Southern University

Wilkes,Scott Willard

Instructor ,Psychological Sciences

MS,1995,Augusta State University,BA,1992,Augusta State University

Wilkins,Jeff T

Professor,Family Medicine

MD,1995,Medical University of South Carolina,BS,1991,Francis Marion University

Williams Mayweather,Lyndsey Sherell

Instructor ,Research. Counseling & Curriculum

EDD,2022,University of Georgia,MS,2012,Florida State University,BS,2010,Clemson University

Williams,David Russel

Associate Professor,Psychiatry and Health Behavior

MD,2010,University of South Carolina,BA,2005,Princeton University

Williams,Demica Nicole

Assistant Professor,Doctorate of Nursing Practice Program

DNP,2020,Samford University,MSN,2007,Augusta University,BSN,2001,Bowling Green State University

Williams,Jason Alan

Assistant Professor,Information Systems/Technology

PHD,2020,Kennesaw State University,MBA,2007,Georgia Southern University,BBA,2003,Georgia Southern University

Williams,Katherine Ann

Lecturer,Psychological Sciences

PHD,2001,Georgia State University,AM,1994,Georgia State University,BA,1989,Florida Atlantic University

Williams,Michelyn Jenee

Assistant Professor,Doctorate of Nursing Practice Program

DNP,2024,Augusta University,MSN,2018,Augusta University,BS,2016,Augusta University

Williams,Patrice Trinette

Instructor ,Kinesiology

BS,1993,Louisiana State University & A&M College

Williamson,Amy Lynn

Instructor ,Research. Counseling & Curriculum

DED,2021,Capella University,EDS,2010,Augusta State University,MED,2006,Augusta State University,BSE,2005,Augusta State University

Willson,Mary Elizabeth Miller

Assistant Professor,Occupational Therapy

MHS,2010,Augusta University,BS,2007,Georgia Southern University

Wilson,Anastasia Bridner

Associate Professor,Mathematics

PHD,2016,Clemson University,MS,2009,North Carolina State University

Wilson,Christina A

Assistant Professor,Biological Sciences

PHD,2012,Augusta University,BS,2006,University of South Carolina

Wilson,Dylan Trussell

Assistant Professor,Communication

MFA,2015,Savannah College of Art & Design,BA,2013,University of Georgia,ABJ,2005,University of Georgia

Wilson,Judi H

Dean,College of Education and Human Development

EDD,2001,Georgia Southern University,EDS,1995,University of Georgia,MED,1993,University of Georgia,BA,1990,Furman University

Wilson,Michael Daniel

Assistant Professor,Doctorate of Nursing Practice Program

DNP,2021,Medical University of South Carolina,BSN,2014,Augusta University

Wilson,Nathan Andrew

Associate Professor,Pediatrics

MD,2003,Medical College of Georgia,BS,1999,University of Georgia

Winders,Linda Jaehne

Assistant Professor,GS Savannah Partnership

MD,1995,Emory University,BS,1991,Emory University

Winkelstein,Devlin P

Instructor ,Social Sciences

PHD,2017,Georgetown University,MA,2015,Georgetown University,BS,2006,United States Military Academy

Winkler,Angelia Maleah

Associate Professor,Kinesiology

PHD,2016,Auburn University,MS,2012,Indiana University-Bloomington,BA,2006,University of North Carolina-Chapel Hill

Winston,Nicole Rockich

Assistant Dean,MCG Academic Affairs

PHARMD,2012,University of Wisconsin-Madison,EDD,2020,Marshall University,MS,2010,University of Wisconsin-

Madison,BS,2006,University Of Toledo

Winston-Parker,Whitney Lorie

Assistant Professor,Doctorate of Nursing Practice Program

DNP,2023,Augusta University,MSN,2018,Georgia Southern University,BSN,2012,Emory University

Wireman,Olivia Helen

Assistant Professor,Cellular Biology and Anatomy

PHD,2024,University of Kentucky,BS,2019,University of Kentucky

Wise,Scott C

Associate Professor,Allied Health Professions

MSAD,2001,Central Michigan University,BS,1989,Augusta University

Wise,Spencer Harrison

Associate Professor,English & World Languages

PHD,2015,Florida State University,MA,2009,University of Texas-Austin,BA,1999,Tufts University

Wolf III, Charles R.

Associate Professor, Neurology

MD, 1977, University of Missouri-Columbia, BS, 1972, University of Notre Dame

Wolff, David W

Assistant Professor, Georgia Cancer Center

PHD, 2017, SUNY at Albany, BS, 2011, SUNY at Albany

Wood, Heather Marie

Instructor, Mathematics

PHD, 2024, Mississippi State University, MS, 2010, Mississippi State University, BS, 2008, Mississippi State University

Wood, Jesse L

Instructor, Research. Counseling & Curriculum

PHD, 2019, University of Tennessee-Knoxville, MAT, 2010, Lee University, BA, 2007, Lee University

Woodard, Shayne Scott

Instructor, Kinesiology

MS, 2022, Augusta University, BBA, 2009, Augusta State University

Woodham, Padmashree Chaudhury

Professor, Obstetrics and Gynecology

MD, 2005, Emory University of Medicine, BS, 2001, Emory University

Wooten, Melanie Susannah

Assistant Professor, MCG-UGA Medical Partnership

MD, 2015, University of Alabama College, BS, 2011, Georgia College & State University

Wright, Alex C

Assistant Professor, Physics and Biophysics

PHD, 1991, Georgia Institute of Technology, BS, 1986, Georgia Institute of Technology

Wright, Anna Goodbread

Assistant Professor, Pediatrics

PHD, 2017, University of Georgia, MA, 2012, University of Georgia, BA, 2010, Augusta University

Wright, April Latrice

Instructor, Prelicensure Nursing

MN, 2017, Walden University, BSN, 2014, Walden University

Wright, Stephanie M

Associate Professor, Doctorate of Nursing Practice Program

DNP, 2013, Augusta University, MSN, 2007, University of Phoenix, MBA, 2007, University of Phoenix, BSN, 2002, Augusta University

Wu, Guangyu

Professor, Pharmacology and Toxicology

MD, 1988, Xuzhou Medical College, PHD, 1994, Peking Union Medical College

Wu, Hanping

Associate Professor, Radiology and Imaging

MB, 1995, Tongji University

Wylie V, Robert Lowry

Assistant Professor, Medicine

MD, 2022, University of South Carolina, MS, 2018, Medical University of South Carolina, BS, 2017, University of South Carolina

Wynn, William David

Assistant Professor, Emergency Medicine

MD, 2020, Medical University of South Carolina, BS, 2012, Wofford College

Xi,Caixia

Assistant Research Scientist,Georgia Cancer Center

PHD,2003,Chinese Academy of Military Medical Sciences,MS,2000,Nanjing Agricultural University,BS,1997,Hebei Agricultural University

Xiang,Weiming

Associate Professor,Cyber Science/Engineering

PHD,2014,Southwest Jiaotong University

Xie,Ding

Assistant Professor,Medicine

MD,1994,Sun Yat-sen University

Xie,Xiaoling

Senior Research Scientist,Neuroscience and Regenerative Medicine

MS,2012,University of Rochester,BS,1985,Zhengzhou University

Xu,Hongyan

Professor,Biostatistics, Data Science, & Epidemiology

PHD,2003,Texas A&M University System Health Sciences Center College of Medicine,MS,1999,Fudan University/Institute of Genetics,BS,1996,Fudan University/Institute of Genetics

Y**Yakoub,Danny**

Section Chief,Surgery

MBBCHBAO,1998,University of Cairo

Yan,Chunhong

Professor,Georgia Cancer Center

PHD,1997,Peking Union Medical College,MS,1994,Wuhan University,BS,1991,Wuhan University

Yan,Shun

Senior Research Scientist,Center for Biotechnology and Genomic Medicine

PHD,2015,University of Alabama,MS,2010,Qufu Normal University,BS,2007,Qufu Normal University

Yanasak,Nathan Eugene

Associate Professor,Radiology and Imaging

PHD,1997,University of Utah,MS,1993,University of Illinois at Urbana-Champaign,BA,1991,University of Chicago

Yancey,David Ashton Rice

Instructor ,Research. Counseling & Curriculum

EDD,2023,Augusta University,EDS,2019,University of Georgia,MED,2017,Mercer University,BA,2008,University of Georgia,BS,2009,University of Georgia

Yang,He

Associate Professor,Mathematics

PHD,2014,Rensselaer Poly Institute,MA,2010,State University of New York-Binghamton

Yang,Hsiang-Chieh

Assistant Professor,Hull College of Business
